FÆCES, Fæces.

FÆCONDATION, Fecundation.

FÆCONDITÆ, Fecundity.

FÆCULA, *Fæcula*, diminutive of *fæx*, 'lee.'

An immediate principle of vegetables, composed of hydrogen, oxygen, and carbon. It exists in several plants, and has different names, according to that which furnishes it. When extracted from wheat or barley, it is called *starch*, *Amylum*. When from *Cycas circoinalis*, *Sago*;—from *Oreohis morio*, *Salap*. We say, also, *Fæcula* of the *Potato*, *Bryony*, *Arum*, *Manioc*, &c.

FÆCULA GREEN. This name is given to a green, solid matter of variable character, which is believed to be resinous, and which renders turbid several kinds of juices, extracted from vegetables. It is, also, called *Chlorophyll*.

FÆCULA AMYLACEA, *Amylum*—f. *Marantæ*, Arrow root—f. *Tapioka*, see *Jatropha manihot*.

FÆCULENCE, *Fæculentia*, *Fæcositas*, *Fæx*, *Lemna*, *Fæces*, *Læ*, *Deposit*, *Dregs*. In *Pharmacy*, feculent, albuminous, or other substances, which are deposited from turbid fluids.

FÆCULENT, *Fæculentus*, *Hypotrygus*, *Trygodes*. 'Foul, dreggy, excrementitious;' as a *feculent fluid*, *feculent evacuations*, &c.

FÆCUND, *Fæcundus*, *Fæcundus*, (F.) *Fæcond*. Same etymon as the next. Fruitful, Prolific.

FÆCUNDATION, *Fæcundatio*, *Impregnatio*, *Impregnatio*, *Ingravidatio*, *Prægnatio*, *Gravidatio*, *Prægnatus*, *Fructificatio*, *Cyosis*, *Encyosis*, *Encymosis*, (F.) *Fæcondation*. The act by which, in organized beings, the material furnished by the generative organs of the female, unites with that prepared by those of the male, so that a new being results.

FÆCUNDITY, *Eutocia*, *Fæcunditas*, *Productivitas*, (F.) *Fæcondité*. The faculty of reproduction, possessed by organized bodies.

It has been estimated that throughout a country, taking one marriage with another, not more than 4 children are the result; and in towns only 35 children to 10 marriages.

FEE, *Sostrum*.

FÆGARITE, *Cancer aquaticus*, *Stomatitis*, pseudo-membranous.

FEIGNED DISEASES, *Morbi dissimulati seu simulati seu celati seu infidiati seu pseudoalati*; *Simulated diseases*, *Pretended diseases*, (F.) *Maladies dissimulées*, *M. simulées*, *M. feintes*, *M. supposées*. The tricks employed, by impostors, to induce a belief that they are attacked with diseases when they are not. These are generally assumed by beggars to obtain alms; by criminals to escape punishment; and by soldiers to be exempt from duty.

The following table exhibits the chief feigned diseases, with the means of detection.

A TABLE OF FEIGNED, PRETENDED, SIMULATED, OR EXCITED DISEASES OR DISQUALIFICATIONS.

DISEASES, &c.	HOW FEIGNED.	HOW DETECTED.
1. ABORTION.	By staining the clothes and body with borrowed blood.	By constant and minute attention.
2. ABSTINENCE.		
3. AMAUROTIC BLINDNESS.	By applying the extract of belladonna or the datura stramonium to the eye.	Amaurosis is characterized by dilated pupil. Where these substances have been applied, the effects will go off in ten days or a fortnight.
4. APOPLEXY.	By falling down as if deprived of sensation and consciousness.	By powerful stimulants; an electric shock; application of hot water, stannatories, actual cautery, &c.
5. CACHEXIA, ANEMIA, AND DEBILITY.	Using substances to make the face appear pale and livid. Indulging freely in wine, and privation of sleep prior to examination.	By examining if the pulse be strong, and the skin hot, and whether there be loss of appetite or of strength, or swelling of the limbs.
6. EXCRETION OF CALCULI.	Putting sand, pebbles, &c. into the urine.	By the aid of chymistry. We are acquainted with the chymical composition of urinary calculi.
7. CANCEROUS ULCER.	By gluing on a portion of a spleen with the smooth side to the skin, leaving on the outside the appearance of an ulcerated surface.	By noticing whether there be signs of cachexia, and by attentive examination of the part.
8. CATALEPSY.	By seeming to be suddenly motionless, the joints remaining flexible, and external objects making no impression.	By powerful stimulants, as recommended under apoplexy. Letting fall a drop of boiling water on the back. Proposing to use the actual cautery and seeing whether the pulse rises.

DISEASES, &c.	HOW FEIGNED.	HOW DETECTED.
9. CHOREA.	By assuming the convulsive motions of a part which characterize chorea.	By examining the patient whilst he may imagine himself unobserved, and seeing whether the convulsive motions go on then.
10. CONTRACTION OF JOINTS IN GENERAL.	.....	Mode of discrimination sometimes so obscure as to deceive the most practised and attentive.
11. CONTRACTION OF THE FINGERS.	.....	Introduce a cord between the fingers and the palm of the hand, and gradually apply weights so as to expand the fingers. Confine him so that he cannot obtain his food without using his clenched hand.
12. CONVULSIONS.	.....	When feigned, they do not present the rigidity of muscles or the rapidity of action which characterize the real. The mode of detection must be the same as in epilepsy.
13. OPAKE CORNEA.	Produced by the application of a strong acid, by acrid powders, as quicklime, &c.	The existence of the opacity can be detected by attentive observation.
14. CUTANEOUS DISEASES.	Some articles of diet will bring on <i>urticaria</i> or <i>nettle-rash</i> , in particular individuals, as shell-fish, bitter almonds, &c. By acrids, acids, or any irritants applied to the surface. An ointment of tartarized antimony causes a painful pustular eruption. See Porrijo, in this list.	By careful examination on the part of practitioner and nurse.
15. DEAF-DUMBNESS.	.....	The really deaf and dumb acquire an expression of countenance and gestures which it is difficult to assume.
16. DEAFNESS.	It may be assumed or excited by putting a pea in the ear, or by inserting irritants, so as to induce inflammation and temporary loss of function.	Make a noise when not expected, and see if the countenance varies or pulse rises. Put to sleep by opium, and then fire a pistol close to the ear, when he may be thrown off his guard. Examine the ear to see if any trick has been played there.
17. DEATH.	Some persons possess the power of suspending or moderating the action of the heart.	If suspected, the plan recommended under apoplexy, will be found most efficacious.
18. DEBILITY, see CACHEXIA.		
19. DEFORMITY.	.....	Examine the part and its articulation, naked, and compare it with the opposite.
20. DELIVERY.	After enlargement produced artificially, a subsidence of the tumefaction; the parts being moistened by borrowed blood, and the child of another substituted as the female's own.	Can only be positively detected by examination <i>par vaginam</i> . Soon after delivery, the vagina will be relaxed and the lochial discharge be flowing—in greater abundance, the shorter the time that may have elapsed since delivery.
21. DIARRHŒA.	Said to have been caused by a mixture of vinegar and burnt cork. (?) May be occasioned by the use of any of the purgative roots, &c.	When diarrhœa is feigned by the lower classes, inspect the linen; if clean the bowels are probably not much out of order. Let every individual have a close stool of his own; and inspect the evacuations, taking care that one suffering under the disease does not lend his evacuations to another.
22. DROOPY.	May be feigned, like pregnancy, by wearing pads. The anasarctous condition of the lower limbs has been caused by applying a ligature round them. By inflating the cellular membrane of the abdomen.	Can be detected by attentive examination. There will be a want of that leucoplegmatic habit, which accompanies and characterizes droopy.
23. DYSENTERY.	May be feigned, like diarrhœa, by adding a little blood to the evacuations, or by introducing a soap or some more irritating suppository.	Same rules as under diarrhœa.

DISEASES, &c.	HOW FEIGNED.	HOW DETECTED.
24. EPILEPSY.	The foaming of the mouth has been produced by keeping a piece of soap in it.	Sensation in epilepsy is totally abolished. If any remain, disease probably feigned. Incontractility of pupil, which occurs in epilepsy, cannot be feigned. Same means to be used as in feigned apoplexy.
25. FEVER.	By various stimulants, as wine, brandy, pepper; swallowing a small quantity of tobacco, or introducing it into the anus. Flour or chalk used to whiten the tongue. Redness of skin, caused by friction with a hard brush.	The deceit is generally developed by a day or two's examination. Where flour or chalk has been used to whiten the tongue, the line of demarcation, between the whitened part and the clean, healthy margin of the tongue, is too well marked to escape observation.
26. FISTULA IN ANO.	By making an incision near the verge of the anus, and introducing into it an acrid tent, such as the <i>root of white hellebore</i> , &c.	By careful examination.
27. FRACTURES.	There is generally nothing but the man's own testimony. He complains of pain in the part; if fracture of the skull be feigned, he states, perhaps, that he becomes deranged on tasting liquor.	By attentive examination.
28. HEMATEMESIS.	By drinking the blood of some animal, or using some coloured liquid, and then throwing it up.	By cutting off the supply of the fluid and careful examination.
29. HEMOPTYSIS.	By secreting bullock's blood for the purpose of colouring the saliva; making small incisions in the mouth; using bole armeniac or paint of vermilion.	Blood from the lungs is frothy and light-coloured. Mouth and fauces must be carefully inspected, and the individual be observed.
30. HEMORRHOIDS.	By introducing bladders of rats or of small fish partly into the rectum. The linen has also been stained with borrowed blood.	The means are obvious.
31. HEART, DISEASES OF, see PALPITATION.		
32. HEPATITIS.	.....	Unless the person be a well educated impostor, acute inflammation of the liver will be detected by the absence of marks of strong inflammatory action. <i>Chronic liver disease</i> is, frequently, not characterized by well marked symptoms, and hence, when assumed, is difficult of detection.
33. HERNIA.	In the same manner as hydrocele;—by inflation.	The detection is easy.
34. HYDROCELE.	By puncturing the skin of the scrotum, and inflating the cellular membrane.	Do.
35. HYDROCEPHALUS.	By opening the integuments of the head, near the vertex, e. g. and blowing in air.	Do.
36. HYSTERIA.	.....	Does not easily resist the application of strong stimulatives to the nostrils. Attentive examination necessary.
37. INSANITY.	.....	The expression of countenance cannot easily be feigned. Nor can the affection be kept up so long as in real mental alienation. The individual cannot do so long without food, sleep, &c.
38. JAUNDICE.	By colouring the skin with an infusion of turmeric or tincture of rhubarb. <i>Clay-coloured stools</i> produced by taking daily a small quantity of muriatic acid. <i>High-coloured urine</i> by rhubarb taken internally.	The eyes cannot be coloured, although smoke has been used for this purpose. The skin must be washed to remove the colouring matter if any exist, and the supply of acid and rhubarb be prevented.
39. LAMENESS.	By keeping the limb in a contracted state, and resisting any efforts to move it.	By two persons taking hold of the individual and moving rapidly along with him; and when they are tired, having relays. The impostor will generally give in.

DISEASES, &c.	HOW FEIGNED.	HOW DETECTED.
40. MENSTRUATION.	By staining the clothes and body with borrowed blood.	By cutting off the supply.
41. MYOPIA. <i>Short-Sightedness.</i>	.....	Present an open book, and apply the leaves close to the nose. If it cannot be read distinctly, when thus placed, or when glasses proper for short-sightedness are used, the disease is feigned.
42. OPHTHALMIA.	Excited by a variety of acrid and corrosive substances applied to the eye; as lime, &c. A portion of black muslin, spread over the cornea. The eyelashes are sometimes extracted, and caustic applied to excite disease in the palpebræ.	When ophthalmia is thus excited, its progress is ordinarily very rapid, arriving at its height within a few hours.
43. OZENA.	By impregnating a piece of sponge with some offensive juices or oils, mixed with decayed cheese, and putting the imboed sponge into the nostrils.	
44. PALPITATION.	White hellebore, given in the dose of 10 or 12 grains, and repeated, will occasion general indisposition, and undue action of the heart.	Cut off the supply.
45. PAIN.	.....	The detection is here often difficult. The non-existence of pain cannot be proved, and great pain may be present without any appearance externally. The imposition is more frequently detected by inconsistencies and contradictions in the patient's history of the case, than in any other manner.
46. SHAKING PALSY.	.....	May be suspected, if the person be in an ordinary state of vigour. Try violent remedies and means, recommended under Chorea.
47. PARALYSIS.	.....	Violent remedies are here required. Cold affusion, actual cautery, electric shocks, &c.
48. PHTHISIS PULMONALIS.	Individuals with long necks and contracted shoulders have simulated phthisis, by covering the chest with blisters, cicatrices of issues, &c; and by taking drugs which cause paleness.	By attentive examination of the symptoms.
49. POLYPUS NASI.	By introducing the testicle of a young cock, or the kidney of a rabbit into the nostril, and retaining it there by means of a sponge fastened to it.	
50. PORRIGO. <i>Scalped Head.</i>	By applying nitric acid to the head, after protecting the face with fatty substances; but the chronic state is imitated by the use of depilatories of different kinds applied sometimes in patches, so as to resemble the <i>Porri-go decalvans</i> .	
51. PREGNANCY.	By wearing pads, and assuming the longing after particular articles of diet, &c.	By the absence of the areola; the presence of a pad; and, if necessary, by examination <i>per vaginam</i> .
52. PROLAPSUS ANI.	By a portion of the intestine of the ox, in which a sponge, filled with a mixture of blood and milk is placed.	
53. PROLAPSUS UTERI.	By a similar fraud.	
54. PULSE, WEAKNESS OR DEFECT OF.	By ligatures applied to the corresponding arm.	By examining whether the arteries of the two arms beat alike; and if a ligature be placed on the arm.
55. CHRONIC RHEUMATISM. <i>See PAIN.</i>		
56. SCROFULA.	By exciting ulcers below the angles of the jaw.	By examining the general habit, and observing, whether the ulcerations be glandular, and the discharge of a scrofulous character.

DISEASES, &c.	HOW FEIGNED.	HOW DETECTED.
57. SCURVY.	By covering the teeth with wax, and then applying acid, corrosive substances to the gums.	By examining the general habit; whether debilitated, cachectic, and possessing the usual general signs of scorbutus. Simulators of this defect generally state, that it is connate, or ascribe it to a fit of apoplexy or severe fever. Where the organs of speech were perfect, and the moral evidence of the previous existence of the infirmity was not satisfactory, the French authorities used to confine the soldiers, and not supply them with food, until they called for it without stammering.
58. STAMMERING.	.....	.....
59. STRUCTURE OF THE URETHRA.	.....	By passing a bougie.
60. SWELLING OF THE LEGS.	By ligatures round the thighs.	Examine the limbs uncovered.
61. SYSCOPE.	Ligatures are sometimes used to prevent the pulse being felt. By applying lotions to the face to make it pale.	By using sternutatories. By the absence of some of the symptoms of syncope. Examine the naked arms. Wash the face.
62. TYMPANY.	Persons have possessed the power of swallowing air, so as to distend the stomach, and simulate tympany.	.....
63. ULCER OF THE EAR.	By introducing a tent, imbued with blistering plaster into the ear, and repeating the application, until the tube becomes ulcerated, and a discharge of puriform matter is established. The fetid smell is imitated, by dropping into the ear a mixture of empyreumatic oil, asafoetida and old cheese. Also, by introducing a little honey into the meatus.	By careful examination.
64. ULCERS OF THE LEGS, &c.	By corrosives, or irritants. Sometimes by abrasion, by rubbing sand on the shin-bone. At others, they are pretended, by giting on a piece of a spleen or the skin of a frog.	Artificial ulcers have, usually, a more distinct margin, and are more readily healed than others; the latter being generally indicative of an impaired constitution.
65. BLOODY URINE.	The fruit of the Indian Fig ( <i>Cactus opuntia</i> ) colours the urine as red as blood. Cantharides will cause it. Blood may also be procured and mixed with the urine.	By making the patient pass his urine in the presence of the physician, and examining the vessel before and after. By cutting off the supply of any substance, which could cause the appearance.
66. INCONTINENCE OF URINE.	.....	Difficult, at times, of detection. Give the person a full dose of opium, and introduce the catheter when he is asleep. If there be urine, the incontinence is feigned.
67. VARICOSE VEINS.	By a ligature, placed tightly round the limb. They may be excited in this manner, or aggravated if already existing.	By examining the limb.

FEL, Bile—*f.* Anguilla, see Bile—*f.* Bovinum, Bile of the Ox—*f.* Bovis, see Bile—*f.* Natura, Aloes—*f.* Tauri, see Bile—*f.* Terræ, Ludus Helmontii—*f.* Ursi, see Bile—*f.* Vitri, see Vitrum.

FELINEUS, Biliious.

FELLEUS, Biliary, Biliious.

FELLIDUCUS, Cholagogue.

FELLIS OBSTRUCTIO, Icterus—*f.* Superfusio, Icterus—*f.* Suffusio, Icterus.

FELON, Paronychia.

FELTING, from Anglo-saxon *felc*, cloth or stuff made without weaving. *Tangling*. A term applied to the hair when inextricably in-

terlaced, as occasionally in women from inattention.

FÉLURE DE GLASER, Fissure, glenoid. FELWORT, Gentiana lutea.

FEMALE, *Femina, Gyné, (F.) Femello*. In animals, the one that engenders and bears the young. It is, also, used adjectively;—as, the *Female sex, &c.*

FEMALE PARTS, Vulva.

FEMELLE, Female.

FEMEN, Thigh, Vulva.

FEMINA, Female.

FEMME EN COUCHE, Puerpera.

FEMORAL, *Femoralis*, from *femur*, 'the

thigh-bone.' Belonging or relating to the thigh; as *Femoral artery, Femoral hernia, &c.* See Crural.

FEMORALIS, *Triceps cruris.*

FÉMORO-CALCANIEN PETIT, Plantar muscle—*f.* Popliteal, great, Sciatic nerve, great—*f.* *Popliti-tibial, Poplitis* muscle.

FEMORO-TIBIAL, *Femoro-tibia'lis.* Belonging to the femur and tibia. The *Femoro-tibial articulation* is the knee-joint.

FEMUR, *Merus, Me'rium, Os fem'oris.* The thigh bone. (F.) *L'os de la Cuisse.* The strongest and longest of all the bones of the body, extending from the pelvis to the tibia, and forming the solid part of the thigh. The femur is cylindrical, slightly curved anteriorly, unsymmetrical and oblique downwards and inwards. The body of the bone is prismatic, and has, behind, a prominent ridge, the *linea aspera.*

PROCESSES.	{ <i>Upper or Pelvic Extremity.</i> { <i>Inferior or Tibial Extremity.</i>	{ Head supported on a column or neck. { Great trochanter. { Lesser trochanter.
		{ External condyle. { Internal condyle. { External tuberosity. { Internal tuberosity.

The femur ossifies from five points—one on each process of the pelvic extremity; one in the body of the bone; and two on the condyles. It is articulated with the pelvis, tibia, and patella. See Thigh.

FÉMUR COL DU, Collum femoris—*f.* *Movement septimus, Iliacus internus*—*f.* *Movement sextus, Psoas magnus*—*f.* *Summum, Vulva.*

FENESTRA. A window. (F.) *Fenêtre.* Anatomists have given this name to two apertures, situate in the inner paries of the cavity of the tympanum. The one of these is the *Fenest'ra ovalis, F. vestibula'ris, Fora'men ovalle.* It is oval-shaped; situate at the base of the stapes, and corresponds with the cavity of the vestibule. The other is the *Fenest'ra rotunda, F. Cochlea'ris, Fora'men rotundum.* It is closed by a fine, transparent membrane, called *Membra'na Tympani secunda'ria, Tympanum minus seu secunda'rium, Membra'na fenestrae rotunda,* and corresponds to the inner scala of the cochlea.

FENESTRA OCULI, Pupil.

FENESTRAL, *Fenestra'tus, from fenestra, 'a window.'* (F.) *Fenêtré et Fenêtré.* Bandages, compresses, or plasters with small perforations or openings, are so called. The openings prevent the detention of the discharge.

FENESTRATUS, Fenestral.

FENESTRÉ, Fenestral.

FENÊTRE, Fenestra.

FENÊTRÉ, Fenestral.

FENNEL, Anethum—*f.* Dogs', *Anthemis cotula*—*f.* Flower, *Nigella*—*f.* Hog's, *Peucedanum*—*f.* Sweet, Anethum—*f.* Water, *Phellandrium aquaticum.*

FENOUIL, Anethum—*f.* *d'Eau, Phellandrium aquaticum*—*f.* *Marin, Crithmum maritimum*—*f.* *de Porc, Peucedanum*—*f.* *Puant, Anethum graveolens.*

FENTE, Fissure—*f.* *Capillaire, see Pilatio*—*f.* *Glenoidale, Fissure, glenoid*—*f.* *Orbitaire, Orbital fissure*—*f.* *Orbitaire inférieure, Spheno-maxillary fissure*—*f.* *Spheno-maxillaire,*

*Spheno-maxillary fissure*—*f.* *Sphénoïdale, Sphenoidal fissure.*

FÉNUGREC, *Trigonella fœnum.*

FENUGRECK, *Trigonella fœnum.*

FER, Ferrum—*f.* *Acétate de, Ferri acetat*—*f.* *Carbonate de, Ferri protocarbonas*—*f.* *Chaud, Pyrois*—*f.* *Hydrate de, tritozide de, Étités*—*f.* *Iodure de, Ferri iodidum, see Iodine*—*f.* *Lactate de, Ferri Lactas*—*f.* *Limaille de, Ferri limatura*—*f.* *Perozide de, Ferri subcarbonas*—*f.* *et de Potasse, tartrate de, Ferrum tartaratum*—*f.* *et de Potassium, Cyanure de, Potassii Ferrocyanuretum*—*f.* *et de Potassium, Protocyanure de, Potassii Ferrocyanuretum*—*f.* *Sulfate de, Ferri Sulphuretum*—*f.* *Sulfure de, Ferri Sulphuretum.*

FERALIS PEDICULUS, see *Pediculus.*

FERINE, *Fer'nis; 'savage, brutal;'* *Therio'des.* A term, applied to any malignant or noxious disease. In France it is used only when joined to *Toux; Toux férine,* a dry, obstinate, and painful cough.

FERMENT, *Formen'tum, (quasi fervimentum), Zyma, Zymo'ma, Levon, (F.) Lévain.*—The Iatrochymists applied this name to imaginary substances, *Formen'ta morb'i,* to which they attributed the power of producing diseases, by exciting a fermentation in the humours.

FERMENTATION, *Formen'tatio, Zymo'is, Éstuat'io, Causis, Brasmos.* An intestinal movement, occurring spontaneously in a liquid; whence result certain substances, that did not previously exist in it.

The chemical physicians attributed all diseases to an imaginary fermentation of the humours.

FERMENTATION, PUTREFACTIVE, Putrefaction.

FERMENTUM CEREVISIÆ, Yest—*f.* Morbi, Ferment—*f.* *Ventriculi, Gastric juice.*

FERN, FEMALE, *Asplenium filix femina, Pteris aquilina*—*f.* Male, *Polypodium filix mas*—*f.* Bush, *Comptonia asplenifolia*—*f.* Gale, *Comptonia asplenifolia*—*f.* Meadow, *Comptonia asplenifolia*—*f.* Rock, *Adiantum pedatum*—*f.* Root, *Polypodium vulgare*—*f.* Sweet, *Adiantum pedatum, Comptonia asplenifolia*—*f.* Sweet, shrubby, *Comptonia asplenifolia.*

FERNAMBUCO WOOD, *Cassalpinia echinata.*

FERRAMENTUM, *Sidérion, Instrumen'tum fer'reum.* Any surgical instrument, made of iron. By the vulgar, in France, the word *ferrements* means the instruments used in difficult labours.

FERRARIA, *Scrophularia aquatica.*

FERRATUS, Chalybeate.

FERREIN, CANAL OF, *Ductus Ferrei'ni.* A triangular channel, which Ferrein supposed to result from the approximation of the free edges of the eyelids applied to the globe of the eye; and which he considered adapted for directing the tears towards the puncta lachrymalia, during sleep. The canal is, probably, imaginary.

The same name is likewise given to the cortical canals—the first portions of the uriferous ducts, whilst still in the cortical substance of the kidney.

FERRIN, PYRAMID OF, *Pyram'is Ferrei'ni.* Each of the papills of the kidney, according to Ferrein, consists of, at least, 700 subordinate cones or pyramids. To these last, the name '*pyramids of Ferrein, Pyram'ides renales Ferrei'ni, Fasci'uli pyramida'les,* has been given.

**FERRI ACETAS**, *Extractum martis aceticum*, *Aceticum martiale*, *Ac'etate of Iron*, *Iron liquor*, (F.) *Acétate de fer*. A preparation of the Dublin Pharmacopœia, made by digesting 1 part of carbonate of iron in 6 parts of acetic acid for three days, and filtering. Dose, as a tonic and astringent, ℥v to ℥xx in water.

**FERRI ÆRUGO**, F. Subcarbonas—f. et Ammonium murias, Ferrum ammoniatum—f. Ammonio-chloridum, Ferrum ammoniatum.

**FERRI AMMONIO-CITRAS**, *Ammonio-citrate of iron*, *Citrate of ammonia and iron*. Prepared by adding ammonia to citrate of iron, so as to neutralize the excess of acid. Dose, gr. v, to gr. viii.

**FERRI AMMONIO-TARTRAS**, *Ammonio-tartrate of iron*. This salt is best made by dissolving to saturation freshly precipitated hydrated oxide of iron in a solution of bitartrate of ammonia, and evaporating to dryness. It is very soluble. The dose is five grains or more in pill or solution.

**FERRI ARSENIAS**, *Arseniate of Iron*—f. Bromidum, see Bromine—f. Nitritus Liquor, see Tinctura Ferri muriatis—f. Sesquinitratiss, liquor, see Tinctura Ferri muriatis—f. Borussias, Prussian blue—f. Carbonas, F. subcarbonas—f. Carbonas Saccharatum, see F. Protocarbonas—f. Carbonatum, Graphites—f. Carburetum, Graphites.

**FERRI CITRAS**, *Citrate of Iron*. Two citrates of iron have been prepared of late—the *Sesquicitrate* or *Citrate of the Sesquioxide*; and the *Citrate of the protoxide*. They resemble, in their medical properties, the tartrate and the lactate of the metal.

**FERRI CYANURETUM**, *Prussian blue*—f. Deutocarbonas fuscus, F. subcarbonas—f. Deutoxydum nigrum, *Æthiops martialis*—f. Ferrocyanas, Prussian blue—f. Ferrocyanuretum, Prussian blue—f. Hydriodas, F. Iodidum—f. Hydrocyanas, Prussian blue—f. Hypercarburetum, Graphites.

**FERRI IODIDUM**, *F. Ioduratum*, *F. Hydriodas*, *Iodide*, *Ioduret* or *Hydriodate of Iron*, *F. Iodure de fer*, (Iodin. ℥ij, *Ferri rament*. ℥j, *Aq. destillat*. Oiss.) Mix the iodine with a pint of the distilled water in a porcelain or glass vessel, and gradually add the iron filings, stirring constantly. Heat the mixture gently until the liquid acquires a light greenish colour; then filter, and after the liquid has passed, pour upon the filter half a pint of the distilled water, boiling hot. When this has passed, evaporate the filtered liquor, at a temperature not exceeding 212°, in an iron vessel to dryness; keep the dry iodide in a closely stopped bottle. (Ph. U. S.) See, also, Iodine.

**FERRI IODURETUM**, F. Iodidum.

**FERRI LACTAS**, *Lactate of Iron*, *Lactate of Protoxide of Iron*, (F.) *Lactate de Fer*. Prepared by digesting in a sand bath, at a low temperature, diluted lactic acid with iron filings. It is employed in the same cases as the precipitated subcarbonate of iron, and especially in chlorosis. Twelve grains of the lactate may be given in the 24 hours, in the form of lozenges.

**FERRI LIMATURA PURIFICATA**, *Purified Iron Filings*:—purified by means of the magnet, for internal use. The filings are, also, called *Ferri Scobis*, *F. Ramenta* et *Fila*, *Martis Limatura*, *Speculum Indicum*, *Ferri in pul'verem resoluti-*

*tie*, (F.) *Limaille de Fer*. They are considered to possess the general properties of iron:—the iron becoming oxidized.

**FERRI OXIDUM FUSCUM**, F. subcarbonas—f. Oxidum Nigrum, Oxidum ferri nigrum—f. Oxidum rubrum, Colcothar, Ferri subcarbonas—f. Oxidum hydratum, Ferrum et Oxidum hydratum—f. Percyanidum, Prussian blue—f. Pila, F. limatura—f. et Potassas tartaras, Ferrum tartarizatum—f. Potassio-tartaras, Ferrum tartarizatum.

**FERRI PHOSPHAS**, *Phosphate of Iron*, (*Ferri Sulphat*. ℥v, *Sodæ Phosphat*. ℥vi, *Aquas*, cong. Dissolve the sulphate of iron and phosphate of soda, severally in four pints of the water; then mix the solutions, and set the mixture by, that the powder may subside; lastly, having poured off the supernatant liquor, wash the phosphates of iron with water, and dry it with a gentle heat.—Ph. U. S.) Dose, 5 to 10 grains as a chalybeate. Rarely used.

**FERRI POTASSIO-TARTRAS**, Ferrum tartarizatum.

**FERRI PROTOCARBONAS**, *Protocarbonate of Iron*, (F.) *Carbonate de fer*. The protocarbonate of iron, thrown down from a solution of the sulphate of iron by the carbonate of soda, readily attracts oxygen and becomes converted into the sesquioxide. To prevent this, it may be associated with honey and sugar, and the mixture be reduced by evaporation to a pilular consistence. The mass constitutes the *Ferruginous Pills*—*Pilules ferrugineas*, of Vallet—*Vallet's Pills*. See Pilulæ Ferri Carbonatis. The Edinburgh Pharmacopœia contains the *Ferri Carbonas Saccharatum*, *Saccharine Carbonate of Iron* prepared in this manner. It is the *Ferrum Carbonicum Saccharatum* of Klauer.

The protocarbonate is given in the same diseases as the lactate of iron. Ten or fifteen grains in the course of the twenty-four hours.

**FERRI PROTOSULPHAS VIRIDIS**, F. sulphas—f. Prussias, Prussian blue.

**FERRI et QUINIAE CITRAS**, *Citrate of Iron and Quinia*, formed by the union of four parts of citrate of iron and one part of citrate of quinia, has been prescribed in cases where a combination of these tonics is indicated.

**FERRI RAMENTA**, F. limatura—f. Rubigo, F. subcarbonas—f. Scobis, F. limatura—f. Sesquioxidum, F. subcarbonas precipitatum.

**FERRI SUBCARBONAS**, *F. Carbonas*, *Ferrum precipitatum*, *Chalybis Rubigo preparata*, *Ferri Rubigo*. (The last two terms, as well as *Rubigo*, are applied to the subcarbonate or rust, *Ærugo Ferri*, *Cacaferri*, formed by the action of moist air on metallic iron.) A protoxide of iron, oxidized by the decomposition of water; the carbonic acid being attracted from the air. Dose, gr. v to ʒss and more.

The *Ferri Subcarbonas* may be precipitated from sulphate of iron by carbonate of soda. The following is the formula of the Pharmacopœia of the United States—*Ferri sulph.* ℥viij; *soda carb.* ℥ix; *aquas bullient*. cong. Dissolve the sulphate of iron and carbonate of soda severally in four pints of the water, then mix the solutions, and having stirred the mixture, set it by that the powder may subside; having poured off the liquor wash the subcarbonate with hot water, wrap it in bibulous paper, and dry with a gentle heat. It is, also, called *Ferri sesquioxidum*, *Oxidum ferri fuscum*, *Oxidum*

*ferri rubrum, Deuto-carbonas Ferri fuscus, Cræcus martis apertius, Sesquioxide or peroxide of iron, (F.) Peroxide de fer, Safran de Mars apertif.*

**FERRI SULPHAS, Sal Martis, Vitriolum Martis, Vitriolum Ferri, Ferrum Vitriolatum, Sulphas vel Protosulphas Ferri viridis, Calceadanium, Cal'coar, Cal'coar, Chalcanthum, Calctia, Achromentum sutorium, Vitriol, Vitriolum viride, Anima Hepatica, Sulphate of Iron, Green Vitriol, Copperas, (F.) Sulfate de fer.** The Pharmacopœia of the United States directs it to be made by the action of sulphuric acid  $\text{℥xviij}$ , on *Iron wire*, cut in pieces,  $\text{℥ij}$ —*water*, a gallon—*evaporating*, crystallizing, and drying the crystals on bibulous paper. This salt is inodorous, and of a strong styptic taste. The crystals are light green, transparent, rhomboidal; and soluble in two parts of water. It is tonic and anthelmintic. *Dose*, gr. j. to vj and more.

**FERRI SULPHAS CALCOINATUM, Colcothar.**

**FERRI SULPHURETUM, Sulphuret of Iron, Iron pyrites, (F.) Sulfure de fer;** may be made by heating one part of *sublimed sulphur*, over three parts of *iron filings* in a crucible until the mass begins to glow. It is employed as a ready means for obtaining hydrosulphuric acid gas by the addition of sulphuric or chlorohydric acid.

**FERRI TARTARUM, Ferrum tartarizatum—f. Tritoxydum, Colcothar.**

**FERRICUS HYDRAS, Ferrum oxydum hydratum.**

**FERRUGINEUS, Chalybeate.**

**FERRUGINOSUS, Chalybeate.**

**FERRUGO, Ferri subcarbonas, Ferrum oxydum hydratum.**

**FERRUM, Mars, Sideros, Metallum hæmatopœiticum, Iron, (F.) Fer.** A metal of a bluish-gray colour; fibrous texture; brilliant and fine-grained fracture. Specific gravity 7.600 to 7.800: hard, ductile, malleable, and magnetic. The medicinal virtues of iron are tonic; producing fetid eructations, when it takes effect, owing to its meeting with acid in the stomach, which oxidizes it, and causes the evolution of hydrogen gas. When given in the metallic state, the filings are chiefly used: but the oxides and salts are most commonly employed.

**FERRUM AMMONIATUM, Muriatis Ammoniaci et Ferri, Ferri ammonio-chloridum, Flores martiales, Flores salis ammoniaci martiales, Ens martis, Ens Venæris Boylei, Sal Martis muriaticum sublimatum, Sal ammoniacum martiale, Ammonium muriaticum martiatum seu martiale, Arophi Paracelsi, Calendula minorales, Ferrum ammoniacale, Ammoniated Iron, Ammonio-chloride of Iron, (F.) Muriate d'ammoniaque et de fer.** A submuriate of ammonia with red muriate of iron. (*Ferri Subcarb.*  $\text{℥ij}$ ; *acid muriat.*  $\text{℥. ℥x}$ ; *ammon. muriat.*  $\text{℥ij}$ ; *aq. destillat.*  $\text{Oiv}$ .) Mix the subcarbonate with the acid in a glass vessel and digest for two hours; then add the muriate, previously dissolved in distilled water, and having filtered the liquor, evaporate to dryness. Rub to powder.—(Ph. U. S.) *Dose*, gr. iij. to gr. xv.

**FERRUM AMMONIACALE, F. ammoniatum—f. Borussicum, Prussian blue—f. Carbonicum Saccharatum, Ferri protocarbonas—f. Cyanogenatum, Prussian blue—f. Hæmatites, Hæmatites—f. Magnes attractorium, Magnet.**

**FERRUM OXYDATUM HYDRATUM, Ferri Ox-**

**idum Hydratum (Ph. U. S.), Ferrugo, Hydras Ferrius, Hydrato-oxide of Iron, Hydrated Oxide of Iron, Hydrated peroxide of Iron, Hydrated Trioxide of Iron.** It may be prepared by taking a solution of sulphate of iron, increasing its dose of oxygen by heating it with nitric acid, and precipitating the oxide by adding pure ammonia in excess, washing the precipitate and keeping it moist.

The following is the formula adopted by the Pharmacopœia of the United States, (1842): *Ferri Sulph.*  $\text{℥iv}$ ; *acid. sulphuric.*  $\text{℥. ℥iiiss}$ , *Liq. ammonia* q. s., *aq.æ Oij*. Dissolve the sulphate of iron in the water, and having added the sulphuric acid, boil the solution: then add the nitric acid in small portions, boiling the liquid for a minute or two after each addition, until the acid ceases to produce a dark colour. Filter the liquid, allow it to cool, and add the liquor ammonia in excess, stirring the mixture briskly; wash the precipitate with water, until the washings cease to yield a precipitate with chloride of barium, and keep it close in bottles with water sufficient to cover it.

It has been brought forward, of late, as an antidote to arsenic; and many cases of its efficacy have been published.

From 10 to 20 parts of the hydrated oxide would seem to be more than sufficient to convert 1 part of arsenious acid into the basic salt of iron.

**FERRUM OXYDULATUM HYDROCYANICUM, Prussian blue—f. Potabile, F. tartarizatum—f. Præcipitatum, Ferri subcarbonas.**

**FERRUM TARTARIZATUM, Tartras Potassæ et Ferri, Tartarum Ferri, Ferri et Potassæ Tartras, Tartarus chalybeatus, Mars solubilis, Tartras kalico ferrius, Chalybtartarizatus, Tartarus martialis, Ferri potassio-tartras, Tartras Potassæ ferruginosus, Ferrum potabile, Globus martialis, Globuli Tartari martiales seu martiales soluti seu martiati seu tartratis ferri et lixivii, Bolus Martis, Pyri martiales, Tartarized Iron, Tartrate of Potassa and Iron, (F.) Tartrate de potasse et de fer, Boule de Mars, Boule de Nancy, B. de Mohlheim, B. d'Acier. (Ferri subcarb.  $\text{℥ij}$ , *Acid. muriat.*  $\text{℥. ℥x}$ ; *Liquor Potassæ*,  $\text{Ovss}$ ; *Potass. Bitart.*  $\text{℥vijs}$ , *Aqua destillat.* cong. iss.) Mix the subcarbonate of iron and the muriatic acid, and digest for two hours; pour the solution into a gallon of the distilled water; set aside for an hour, and pour off the supernatant liquor. To this add the liquor potassæ; wash the precipitate formed frequently with water, and, while yet moist, mix it with the bitartrate of potassæ and half a gallon of the distilled water. Keep the mixture at the temperature of  $140^{\circ}$  for 30 hours, frequently stirring; filter the solution, and evaporate by means of a water bath, at the same temperature, to dryness.—(Ph. U. S.) It is one of the mildest of the salts of iron, and not unpalatable. *Dose*, gr. x. to  $\text{℥ss}$ .**

The *Tinctura Martis Apertiva, Tincture of Ludwig; Alcohol cum Sulphate Ferri tartarizatus; Tinctura Martis Glauberi* is, essentially, a solution of this salt. It is also called *Eau de Boule*, and is used in contusions.

*Helvetius's Styptic* was composed of the filings of iron and tartar, mixed to a proper consistence with French brandy. It was called

in England *Eaton's Stypsis*; but this is now formed of *Sulphate of Iron*.

**FERRUM VITRIOLATUM**, *Ferri sulphas*—*f. Vitriolatum utatum*, *Colcothar*—*f. Zooticum*, Prussian blue.

**FERTILITY**, *Fecundity*.

**FERULA**, *Fanon*, *Palette*, *Splint*—*f. Africana*, *Bubon galbanum*—*f. Asafetida*, see *Asafetida*—*f. Persica*, see *Sagapenum*.

**FESSES**, *Nates*.

**FESSIER**, *Gluteal*—*f. Grand*, *Glutæus maximus*—*f. Moyen*, *Glutæus medius*—*f. Petit*, *Glutæus minimus*.

**FETID**, *Fætidus*, *Dysodor*, *Cæodor*, *Bromosus*, *Gravæolens*. Having a bad smell.

**FETUS**, *Fætus*.

**FEU ACTUEL**, *Cauterium*—*f. Persique*, *Herpes zoster*, see *Anthrax*—*f. Potential*, see *Cauterium*—*f. Saocré*, *Erysipelas*—*f. St. Antoine*, *Erysipelas*—*f. Sauvage*, *Ignis sylvaticus*—*f. Volage*, *Ignis sylvaticus*.

**FEUX DE DENTS**, *Strophulus*—*f. Volage*, *Porriro larvalis*.

**FÈVE**, *Vicia faba*—*f. de Carthagène*, *Habilla de Carthagena*—*f. de Cochon*, *Hyoecyanus*—*f. Épaisse*, *Sedum telephium*—*f. des Marais*, *Vicia faba*—*f. de Saint Ignace*, *Ignatia amara*—*f. Purgatif*, *Ricinus communis*.

**FEVER**, *Febris*, from *feritas*, 'wildness,' or from *feror*, 'heat,' or from *ferbro*, 'I purify.' *Pyr*, *Pyrætos*, *πυρετός*, (*F.*) *Fidvrs*. One of the most frequent and dangerous affections to which the body is liable. A person has an attack of fever, when he is affected with rigors, followed by increased heat of skin, quick pulse, languor, and lassitude. Rigors, increased heat, and frequency of pulse have each been assumed as the essential character of fever. It is not characterized, however, by any one, but depends upon the coexistence of many symptoms. Fevers have been usually divided into *idiopathic* or *essential*, and into *symptomatic*. The *idiopathic* arise without any obvious local cause. The *symptomatic* are dependent upon local irritation. *Idiopathic* fevers may be divided into three classes: 1. Those attended with distinct paroxysms:—*intermittents*. 2. *Remittent* and *continued* fevers; and 3. Fevers, complicated with eruptions, or the *exanthematous*. These divisions admit of great variety, owing to climate, season, soil, age, &c. All ages and climates are liable to fever; and its exciting causes are very numerous. These causes may be common; as irritations in the intestines; external injuries, stimulants, &c.; or they may be specific; as miasmata, contagion, &c. The greatest diversity has prevailed regarding the theory of fever. Its primary seat has been placed in the brain, mucous membrane of the stomach and intestines, skin, nerves, blood-vessels, liver, vena cava, pancreas, &c. It would seem, however, that although, in fever, the whole of the functions are morbidly impressed, the arguments in favour of the impression being first made on the nervous system and the capillary system of vessels are the strongest. The exciting cause of fever, whatever it may be, produces an irregular action of the capillary system, which is soon conveyed to the rest of the system, owing to the extensive sympathy which exists between every part of the body; and it is probable, that all those local inflammations and congestions are the con-

sequence, rather than the cause, of this disordered condition of the system. The general character of fever is clearly shown by examination of the blood. When fever is devoid of inflammatory complication, the quantity of fibrin is in no case augmented. It frequently remains in the healthy proportion, and at times diminishes to an extent not met with in any other acute disease. The alteration of the blood in fevers, which consists generally in a diminution of the fibrinous element, is the reverse of what occurs in inflammation.

Many phenomena of fever are influenced by that *periodicity*, which we notice in the execution of several of the functions of the body. The types of intermittents are strong evidences of such an influence.

In the treatment of fever, it is important, 1. To bear in mind its tendency, particularly in the case of the exanthemata, to run a definite course, and terminate in restoration to health. 2. The disposition to local determination or hyperæmiæ:—the most frequent cause of the fatal termination of fever; a circumstance requiring the vigilant attention of the physician. 3. That the symptoms must be attentively studied, in order to deduce, as far as possible from them, the indications of cure. Lastly, attention must be paid to the prevalent epidemic. There are particular seasons in which fevers are very malignant; and others in which they are as mild; circumstances which necessarily have an effect upon the treatment.

**FEVER**, *ADENO-MENINGEAL*, *Febris adenomeningea*, *Febris mesenterica* (BAGLIVI.) *Morbus mucosus*, *Febris mucosa*; *Mucous fever*, *Gastro-duodenopyra*, *Pituitous Fever*, *Catarhal Fever*, *Phlegmopyra*, *Phlegmopyra*, *Phlegmatopyra*, *Gastro-bronchitis*. Fever, accompanied with considerable mucous secretion; especially from the digestive tube.

**FEVER**, *ADYNAMIC*, *Febris adynamica*, *Asthenicopyra*, *Asthenicopyretus*, *Asthenopyra*, *Asthenopyretus*. Fever attended with great prostration of the vital powers—as Typhoid and Typhus fever.

**FEVER**, *ALGID*, see *Algidus*.

**FEVER**, *ANOMALOUS*, *Febris anomala*, *F. erraticica*, *F. irregularis*, *F. vaga*. A fever, whose progress and type are irregular.

**FEVER**, *APHONIC*, *Febris aphonica*. A variety of intermittent, in which the voice is lost during the paroxysm.

**FEVER**, *APOPLECTIC*, *Febris apoplectica*, *Comatosa Fever*, *Febris comatosa*, *F. Lethargica*, *F. soporosa*. An intermittent or continued fever, attended with apoplectic symptoms.

**FEVER**, *ARTICULAR ERUPTIVE*, *Dengue*—*f. Articular rheumatic*, *Dengue*.

**FEVER**, *ARTIFICIAL*, *Febris artificialis*, *Febris arte promota*. Fever produced designedly by the internal or external use of stimulants.

**FEVER**, *ASTHENIC*, *Febris asthenica*. Fever accompanied with debility. It may include every variety of fever under certain circumstances, but is generally appropriated to typhus.

**FEVER**, *ASTHMATIC*, *Febris asthmatica*. A pernicious intermittent, accompanied with symptoms of asthma.

**FEVER**, *ATAXO-ADYNAMIC*; *Febris ataxo-odynamic*. Fever characterized by symptoms of ataxia and adynamia.

**FEVER, BARCELONA, FEVER, yellow**—f. Bastard, Illegitimate fever.

**FEVER, BILIOUS, Febris biliosa, F. polychol'ica, Syn'ochus bilio'sa, F. aso'das, F. choleric'a, F. gas'trica, F. hepatic'a, Cholery'gra, Cholopyr'etus, Hepatogastrocholo'sis, Febris cholopyret'ica, Enteropy'ra bilio'sa, Choloss'mia febrilis.** The common remittent fever of summer and autumn; generally supposed to be owing to, or connected with, derangement of the biliary system.

**FEVER, BILIOUS REMITTING, YELLOW, Fever, yellow**—f. Bladdery, Pemphigus—f. Bouquet, Dengue—f. Brain, F. cerebral, Phrenitis—f. Brain, water, Hydrocephalus internus—f. Bucket, Dengue—f. Bulam, Fever, yellow—f. Camp, Typhus gravior.

**FEVER, CARDIAL'GIC, Febris cardial'gica.** A variety of pernicious intermittent, accompanied with violent cardialgia during the paroxysm.

**FEVER, CARDIT'IC.** Intermittent fever, accompanied with pain at the heart.

**FEVER, CATARRHAL, F. adeno-meningeal.**

**FEVER, CEPHALAL'GIC, Febris cephalal'gica.** A pernicious intermittent, accompanied with intense pain of the head. Also, intermittent cephalalgia.

**FEVER, CEREBRAL, Brain fever.** Fever, generally of an ataxic character, in which the brain is considerably affected.

**FEVER, CHILDRED, Fever, puerperal, Puerperal Fever**—f. Childbed, Low, see Peritonitis.

**FEVER, CHOLERIC, Febris choleric'a.** A variety of pernicious intermittent, accompanied with symptoms of cholera morbus.

**FEVER, CHOLERIC, OF INFANTS, Cholera infantum.**

**FEVER, CHRONIC, Febris chron'ica.** Some authors apply this name to protracted fevers; others to hectic fever.

**FEVER, COLLIQUATIVE, Febris tab'ida, Febris colliquati'va.** Fever, characterized by rapid emaciation, copious evacuations, and rapid prostration of strength.

**FEVER, COMATOSE, F. apoplectic.**

**FEVER, CONGESTIVE, Febris congesti'va.** Fever accompanied by obscure symptoms; or by great oppression and depression; in which it is difficult—and often impossible—to induce reaction. Congestive fevers occur in various parts of this country, especially in the fall; and they are very common in India. The term congestive fever is often used in some parts of the south of the United States very indefinitely—to include winter typhus and typhoid fevers, typhoid pneumonia, as well as intermittents and autumnal remittents.—Dickson.

**FEVER, CONTINENT, see Continent and Continued fever**—f. Continual, see Continued fever—f. Continued, common, Synochus.

**FEVER, CONVULSIVE, Febris convulsi'va.** A pernicious intermittent, accompanied by convulsions.

**FEVER, DELIRIOUS, Febris cum delir'io, (F.) Fièvre délirante.** A pernicious intermittent, characterized by delirium in the paroxysms.

**FEVER, DEPURATORY, Febris depurato'ria.** A fever, to which was attributed the property of purifying the blood; or which indicated, that such a supposed depuration had occurred.

**FEVER, DIAPHORETIC, Febris diaphoret'ica, Febris sudato'ria.** A pernicious intermittent, with excessive sweating during the fit.

**FEVER, DIARY, Ephemera.**

**FEVER, DIGESTIVE.** The chilliness, followed by increased heat and quickness of pulse, which frequently accompanies digestion.

**FEVER, DOUBLE, (F.) Fièvre double ou doublée.** An intermittent, which has two paroxysms in a given time, instead of one.

**FEVER, DOUBLE-QUARTAN.** A fever, whose paroxysms occur two days in succession, and fail the third day; the first paroxysm resembling the 4th; and the second the 5th.

**FEVER, DOUBLE-QUOTIDIAN.** An intermittent, whose paroxysms return twice every day at corresponding hours.

**FEVER, DOUBLE-TERTIAN.** An intermittent, whose paroxysms return every day; the first corresponding with the 3d, the second with the 4th, and so on.

**FEVER, DUODECIMANE, Febris duodecima'na.** A supposititious intermittent, whose paroxysms recur on the 12th day, or every 11 days.

**FEVER, DYNAMIC, Synocha**—f. Endemial, Remittent F.—f. Endemic, Remittent F.—f. Enteric, see Typhus—f. Ephemeral, Ephemera.

**FEVER, ÉPILEPTIC, Febris epilep'tica.** A variety of pernicious intermittent, accompanied with attacks of epilepsy.

**FEVER, ÉROTIC, Febris erot'ica, (F.) Fièvre d'amour.** A chronic fever, occasioned by unpropitious love.

**FEVER, ERRATIC, see Erratic**—f. Eruptive, Exanthematica—f. Eruptive, articular, Dengue—f. Exacerbating, Remittent Fever.

**FEVER, GANGRENOUS, Febris gangrano'das.** Fever, accompanied by gangrene of various parts, and especially of the limbs and genitals. Sénac describes an intermittent of this kind.

**FEVER, GASTRAL'GIC.** An intermittent accompanied with acute burning lacerating pain at the stomach.

**FEVER, GASTRIC, Febris gas'trica, F. gas'trica bilio'sa, Gastrocholo'sis, Hepatogastrocholo'sis, Stomach'ic fever, Syn'ochus Bilio'sa.** A name, given by some to bilious fever, which has appeared to be dependent on an affection of the stomach. Also, called *Meningo-gastric fever, Febris meningo-gas'trica, Meningo-gastritis, Harvest fever, (F.) Fièvre de la Moisson, F. Méningo-gastrique.*

**FEVER, GASTRO-DYNAM'IC, Febris gastro-adynam'ica.** A fever, in which the symptoms of bilious fever are joined with those of adynamic fever.

**FEVER, GASTRO-ANGIOTEN'IC.** A fever, in which the symptoms of bilious are united with those of inflammatory fever.

**FEVER, GASTRO-ATAX'IC.** A fever, in which the symptoms of bilious fever are united with those of ataxic fever.

**FEVER, GIBRALTAR, Fever, yellow**—f. Harvest, F. Gastric—f. Hæmagastic, F. yellow.

**FEVER, HÆMOR'HOIC, Febris Hæmopto'ica.** A variety of masked intermittent, in which periodical hæmoptysis is the chief symptom.

**FEVER, HAY, Catarrhus anti'vus, Summer Catarrh, Hay Asthma, Ross Catarrh, Summer Bronchitis.** A catarrh to which certain persons are subject in summer, and which has been ascribed in England to the effluvia of hay, but this is not the probable cause. It is a catarrh with sneezing, headache, weeping, snuffing

and cough, with, at times, fever and general discomfort. It is not uncommon in this country. It disappears spontaneously,—to recur on subsequent weeks about the same period.

**FEVER, HEBDOM'ADAL.** A supposititious fever, whose paroxysms return weekly, and on the same day.

**FEVER, HECTIC,** see Consumption, and Hæctic Fever.

**FEVER, HEPAT'IC or HEPATAL'GIC.** A pernicious intermittent, with violent pain in the right hypochondrium.

**FEVER, HILL.** A modification of remittent, occurring in the hilly districts of India.

**FEVER, HOSPITAL,** Typhus gravior.

**FEVER, HU'MORAL,** *Febris humoralis*. Fever, in which an alteration or deterioration of the humours is suspected.

**FEVER, HUN'GARY,** *Febris Hungarica* seu *Pannonica* seu *Morbus Ungaricus*, *Cephalon'ous*, *Vermis cerebri*, (F.) *Fievre Hongroise* ou *de Hongrie*. An epidemic typhus, common amongst the soldiers in barracks, in Hungary.

**FEVER, HYDROPHOB'IC,** *Febris hydrophobica*. Pernicious intermittent with dread of liquids.

**FEVER, HYSTER'IC,** *Febris hysterica*. Hysteria, accompanied by fever. Hysteria, occurring with each paroxysm of intermittent.

**FEVER, ICTERIC,** *Febris icterica*. Fever, accompanied by jaundice. Some intermittents exhibit this complication at each paroxysm.

**FEVER, INFANTILE REMITTENT,** *Febris infantum remittens*, *F. vermino'sa*, (of many), *Spurious worm fever*, *Remittent fever of children*, *F. muco'sa vermino'sa*, *Hæctica infantilis*, *Febris lenta*. A fever occurring in childhood, which often assumes many of the characters of hydrocephalus. It appears generally to be dependent upon a morbid condition of the stomach and bowels.

**FEVER, INFLAMMATORY,** Synocha.

**FEVER, INSID'IOUS.** Fever, which, at first, seems devoid of danger, but subsequently becomes of a more or less malignant character.

**FEVER, INTERMITTENT,** see Intermittent fever—f. Jail, Typhus gravior—f. Jungle, see Jungle fever—f. Lenticular, Miliary fever.

**FEVER, LO'CHIAL,** *Febris lochia'lis*. That acceleration of the circulation which sometimes occurs during the discharge of the lochia.

**FEVER, LUNG,** Catarrh, Pneumonia.

**FEVER, MALIGNANT,** *Febris maligna*. Fever which makes its approaches insidiously, and subsequently becomes formidable. Any fever which exhibits a very dangerous aspect.

**FEVER, MALIGNANT,** Typhus gravior—f. Malignant pestilential, Fever, yellow—f. Marsh, *Eloides* (febris.)

**FEVER, MASKED,** *Febris larvata*, (F.) *Fievre larvée*, *Dead Agus*, *Dumb Agus*. Anomalous intermittent, the paroxysms of which have not the regular stages.

**FEVER, MENINGO-GASTRIC,** Fever gastric.

**FEVER, MESENTER'IC,** *Febris mesenterica*. A name given, by Baglivi, to a species of fever which appears to have belonged either to the *mucous* or *bilious*.

**FEVER, MILK,** *Febris lactea*, (F.) *Fievre de lait* ou *laitesse*, *F. Lactis*; *Galactopyra*, *Galactopyretus*. The fever, which precedes or accompanies the secretion of milk in women recently delivered. It comes on generally about the third day after delivery, and is character-

ized by quick pulse; increased heat; redness of face; diminution or temporary suspension of the lochial discharge; tumefaction and tension of the breasts. It commonly terminates in twenty-four hours, and often with profuse perspiration. It requires the use of antiphlogistics, with dry diet.

**FEVER, MIXED,** Synochus—f. Mucous, F. adeno-meningeal.

**FEVER NEPHRIT'IC,** *Febris nephritica*. Intermittent fever, accompanied with nephritic pain during the paroxysm.

**FEVER, NERVOUS,** *Febris nervosa* seu *neurodes*, *Febris lenta nervosa*, *Neuropyra*, *Neuropyretus*. A variety of Typhus; the Typhus *mitior* of Cullen. By many, however, it is esteemed a distinct disease. See Typhoid fever.

**FEVER, NERVOUS, WITH EXANTHEMATOUS ERUPTION,** Typhus.

**FEVER, NON'ANE,** *Febris nonana*. A supposititious fever, whose paroxysms recur every ninth day, or every eight days.

**FEVER, OCT'ANE,** *Febris octana*. An intermittent, whose paroxysms recur every eighth day.

**FEVER, PALUDAL,** Intermittent—f. Paroxysmal, Remittent fever—f. Periodic, Intermittent.

**FEVER, PERIOD'ICAL,** *Febris periodica*. An intermittent or remittent fever.

**FEVER PERNIC'IOUS,** *Febris perniciosa*. Intermittent fever, when attended with great danger, and which destroys the majority of those affected by it in the first four or five paroxysms; sometimes in the very first.

**FEVER, PESTILENTIAL,** *Febris pestilentialis*. The *Plagus*. Also a severe case of typhus. The yellow fever and sweating sickness have, likewise, been thus designated.

**FEVER, PITUITOUS,** F. adeno-meningeal.

**FEVER, PLEURIT'IC.** An intermittent or remittent, accompanied with inflammation of the pleura.

**FEVER, PNEUMON'IC,** *Febris pneumonica*, an intermittent, accompanied with inflammation of the lungs. Also, pneumonia.

**FEVER, PUER'PERAL,** *Febris puerperalis*, *Childbed fever*, (F.) *Fievre puerperale*. This name has been given to several acute diseases, supervening after delivery. It means, generally, a malignant variety of peritonitis, which runs its course very rapidly, and passes into a typhoid condition, unless met, at the very onset, by the most active depleting measures. By the generality of practitioners, it is esteemed to be eminently contagious; some, however, deny that it is so. See Peritonitis, and Puerperal fever.

**FEVER, PUERPERAL ADYNAMIC or MALIGNANT,** see Peritonitis.

**FEVER, PUKING,** Milk sickness.

**FEVER, PU'ULENT,** *Febris purulenta*. Fever, which accompanies suppuration.

**FEVER, PUTRID,** Typhus gravior.

**FEVER, QUINTAN,** *Febris quinta'na*. A fever, whose paroxysms return every fifth day. It is seen rarely, if ever.

**FEVER, QUOTIDIAN,** see Quotidian—f. Red Tongue, see Typhus.

**FEVER, REG'ULAR,** *Febris regularis* seu *acquisita*. An intermittent whose paroxysms follow a determinate type. It is opposed to *atypic*. Sometimes opposed to *anomalous*.

**FEVER, REMITTENT**, see Remittent Fever—*f.* Remittent, infantile, see Fever, infantile remittent—*f.* Remittent of children, *F.* infantile remittent—*f.* Rheumatic, Rheumatism, acute—*f.* Root, *Triosteum perfoliatum*.

**FEVER, SCORBU'TIC**, *Febris scorbutica*. The febrile movement, which sometimes accompanies scorbutus or scurvy.

**FEVER, SEC'ONDARY**. A febrile condition, which recurs in certain affections after having ceased; such as the secondary fever, which comes on at the time of the maturation of the variolous pustules, or as the eruption of scarlatina, &c., disappears.

**FEVER, SEPTAN**, *Febris septimana*. An intermittent, whose paroxysms recur every six days, and consequently on the seventh.

**FEVER, SEXTAN**, *Febris sexta'na*. A fever, which recurs every five days, and consequently on the sixth.

**FEVER, SIMPLE**, *Febris simplex*. Simple fever is that which has no predominant character—bilious, inflammatory, or nervous; and which is unaccompanied by any local determination, hyperæmia, or complication. It may be continued, remittent, or intermittent.

**FEVER, SIMPLE CONTINUED**. This is the most favourable form of continued fever, and has a tendency to wear itself out, provided only the *lædencia* be avoided. The prognosis is consequently favourable, and the treatment simple; consisting in perfect repose of body and mind, abstinence, and relieving the thirst by cold drinks.

**FEVER, SINGUL'TOUS**, *Febris singul'tosa* seu *lygmo'des* seu *lyngo'des*. Fever, accompanied with singultus or hiccup.

**FEVER, SPOTTED**, Typhus gravior.

**FEVER, STER'CORAL**, *Febris stercoral'is*. Fever, produced by an accumulation of fæces in the intestines.

**FEVER, STOMACHIC**, Gastric Fever.

**FEVER, STRANGERS'**. Yellow, or remittent fever, which is endemic in certain places, and to which strangers are especially liable.

**FEVER, SUBCONTINUAL**, Remittent Fever.

**FEVER, SUBINTRANS**, *Febris subin'trans*. An intermittent, in which one paroxysm is scarcely finished before the other begins.

**FEVER, SWEATING**, Sudor Anglicus.

**FEVER, SYN'OPAL**, *Febris synopala'is*, *F. minima*, (*F.*) *Febris synopala*. A variety of pernicious intermittent, in which there is, in every paroxysm, one or more faintings.

**FEVER, SYNOCOID**, Synochus.

**FEVER, SYPHILIT'IC**, *Febris syp'hilit'ica*. Fever, accompanying syphilis, or supposed to be owing to a syphilitic taint.

**FEVER, TER'TIAN**, *Febris tertiana*. A fever, whose paroxysm returns on the third day, and consequently every two days.

**FEVER, TRAG'IC**, *Febris Trag'ica*. A low fever, in which the patient declaims like an actor during the delirium.

**FEVER, TRAUMAT'IC**, *Febris traumat'ica*. The fever, which supervenes on wounds or great surgical operations.

**FEVER, TYPHOID**, see Typhus—*f.* Typhoid of India, Cholera—*f.* Typhous, Typhus.

**FEVER, VER'MINOUS**, *Febris vermin'osa*, *Helminthop'gra*, worm fever. Fever, produced by the presence of worms in the digestive tube, or accompanied by their expulsion.

**FEVER, VERNAL**, *Febris vernal'is*. An intermittent or other fever occurring in the spring. Vernal intermittents were formerly considered salubrious.

"An ague in the spring  
Is physic for a king."

**FEVER, VESICULAR**, Pemphigus.

**FEVER, WAL'CHEREN**, *Gall-sickness*. The remittents and intermittents to which the British troops were exposed, who were attached to the expedition to Walcheren, in 1809.

**FEVER, WATER BRAIN**, Hydrocephalus internus—*f.* Winter, see Tongue, black—*f.* Worm, Verminous *F.*—*f.* Worm, spurious, Fever, infantile remittent.

**FEVER, YELLOW**, *Febris flava*, *F.* seu *Pestis America'na*, *Cholo'ris America'na*, *Ochrot'iphus*, *Loimocholo'ris*, *F. flava Americo'rum*, *Pestilen'tia homagast'rica*, *Pestis occidentalis seu intert'rop'ica*, *Vom'itus niger*, *Epan'tetus malignus flavus*, *Remitt'ens ictero'des*, *Trit'oph'ya America'na*, *Typhus ictero'des*, *F. trop'icus*, *F. contin'ua pu'trida ictero'des Caroliniana*, *F. Elo'des ictero'des*, *Febris maligna bilio'sa America*, *Ochro'p'gra*, *Syn'ochus ictero'des*, *Febris mate-lote*, *Febris maligna flava In'dia Occidentalis*, *Endemial Causus of the West Indies*, *Causus trop'icus endem'icus*, *Bilious remitting yellow fever*, *Malignant pestilential fever*, *Fièvre jaune d'Amérique*, *Fièvre gastro-adynamique*, *Typhus miasmaticus ataxique putride jaune*, *T. jauna*, *Vomito prieto*, *Vomito negro*, *Mal de Siam*, *Fièvre de la Barbade*, *F. de Siam*, *F. Ictérique*, *F. Gastro-hépatique*, *Hæmagas'trio Fever* or *Pestilence*, *Black vomit*, *Febris tox'ica*, *Febris trop'ica*, *Typhus d'Amérique*, *Bulam Fever*, *Gibraltar Fever*, *Barcelona Fever*.

A very acute and dangerous febrile affection; so called, because complicated, in its second stage, with jaundice, and accompanied by vomiting of black matter. Sauvages, Cullen, and others regard it as a variety of typhus; and Pinel as a species of gastro-adyamic, or bilious putrid fever. It occurs, endemically, only within the tropics; but it has been met with epidemically in the temperate regions. Broussais regards the disease as gastro-enteritis, exasperated by atmospheric heat; so that it runs through its stages with much greater rapidity than the gastro-enteritis of our climates. The yellow colour of the skin, according to him, is owing to the inflammation of the small intestine,—and especially of the duodenum,—augmenting the secretion of the liver, and at the same time preventing its discharge into the duodenum. The pathology of this affection, as well as its origin, is still unsettled. The treatment must generally be of the most active nature at the onset; consisting in bleeding largely, and exhibiting mercury so as to excite a new action, if possible;—the other symptoms being combated according to general principles. It must vary, however, according to the epidemic.

**FEVERBUSH**, Laurus benzoin, Prinos.

**FEVERFEW**, Matricaria.

**FEVERISH**, *Febr'ens*, *Febrico'sus*. (*F.*) *Fièvreux*; from *febris*, 'fever.' That which causes fever, as *feverish food*, *feverish diathesis*, &c. Also, the state of one labouring under fever.

**FE'VERISHNESS**, *Febricitatio*. The state of having fever. A slight febrile disorder.

FEVERROOT, *Pterospora andromedea*.

FEVERTREE, *Pinckneya pubens*.

FEVERWOOD, *Laurus benzoin*.

FEVERWORT, *Eupatorium perfoliatum*, *Triosteum*.

FIBER, *Castor fiber*.

FIBRA, *Fibre*—*f.* *Aurea*, *Coptis*—*f.* *Sanguinis*, *Fibrin*.

FIBRE, *Fibra*, *Is*, *Cidon*, *Filum*. An organic filament, of a solid consistence, and more or less extensible, which enters into the composition of every animal and vegetable texture. The simple or elementary fibre of the ancients, from a particular assemblage and arrangement of which every texture of the body was conceived to be constituted, seems entirely ideal. The moderns usually admit, with Haller and Blumenbach, three elementary fibres or tissues.

1. The *cellular* or *laminated*, formed chiefly of thin plates, of a whitish colour and extensible, which seems to consist of concrete gelatin. 2. The *nervous*, *pulpy*, or *medullary*, formed of a soft substance, contained in a cellular sheath, and consisting of albumen united to a fatty matter. 3. The *muscular*, composed of round filaments, of a grayish or reddish colour, and formed of fibrin. Chaussier has added to these the *albuginous fibre*, but it seems to differ from the cellular fibre only in greater condensation of the molecules.

A very small or ultimate fibre is called a *Fibril*, *Fibrilla*.

FIBRE, ALBUGINEOUS, see *Albuginea*.

FIBRES, REMAK. Fibre described by Remak as peculiar to the sympathetic nerve, but which Valentin considers to be neurilemma, and to consist of fibro-cellular bundles.

FIBRIL, see *Fibre*.

FIBRILLA, *Fibril*.

FI-BRIN or *Fibrin*, *Fibrina*, *Fibrina*, *Fibri'na*, *Fibri'ne*, *Fibra sanguinis*, *Materia fibrosa*, *Lympha plastica*. An immediate animal principle—solid, white, and inodorous; insipid; heavier than water; without action on the vegetable blues: elastic, when moist; hard and brittle when dry. It enters into the composition of the chyle and the blood, and forms the chief part of the muscles of red-blooded animals. In certain diseased actions, *Fibrin* or *Coagulable lymph*, *gluten*, is separated from the blood, and is found in considerable quantity on the surfaces of membranes, and in the cavities of the body. Fibrin is likewise a proximate principle of vegetables, and differs but little in chemical composition from animal fibrin; nor does it differ much from albumen and casein. It is, however, more organizable than either. Albumen, indeed, possesses no plastic powers; but it appears to be converted into fibrin, which acquires such powers by some peculiar action of the living tissue.

Fibrin is very nutritious.

FIBRINOUS, *Fibrinosus*. That which is composed of fibrin, or has the appearance of fibrin.

FIBRO-CARTILAGE, *Fibro-cartilago*. An organic tissue, partaking of the nature of the fibrous tissue, and of that of cartilage. It is dense, resisting, elastic, firm, supple, and flexible. Fibro-cartilages are distinguished into,—1. *Membraniform*, or those which serve as moulds to certain parts, as the *alæ nasi* and eyelids. 2. *Vaginiform*, or those which form sheaths for the sliding of tendons. 3. *Interar-*

*ticular*, those which are met with in the movable articulations. 4. *Uniting*, (*F.*) *Fibro-cartilages d'union*, which form a junction between two bones, as the symphysis pubis. Fibro-cartilages are sometimes formed adventitiously, as the result of a morbid process in different organs.

FIBRO-CARTILAGES, TARSAL, see *Tarsus*.

FIBRO-MUCOUS, *Fibro-mucosus*. Possessing the nature of fibrous and of mucous membranes. A term applied to fibrous membranes, which are intimately united with other membranes of a mucous nature, as the *pituitary membrane*, the *membrane of the urethra*, &c.

FIBRO-SEROUS, *Fibro-serosus*. Possessing the nature of fibrous and serous membranes. Membranes, composed of a fibrous, and a serous sheet, intimately united:—as the *Dura Mater*, *Pericardium*, *Tunica albuginea testis*, &c.

FIBROUS, *Fibrosus*. Composed of fibres. Certain membranes, as the *dura mater*, *periosteum*, *ligamentous capsules of the joints*, &c. are fibrous. The *fibrous system* of Bichat includes the system of organs formed by the *albuginous fibre* of Chaussier. It comprises, particularly, the *periosteum* and *perichondrium*; the *articular capsules and ligaments*; the *tendons*; the *dura mater*, *pericardium*, *tunica sclerotica*, *tunica albuginea testis*, *outer membrane of the spleen*, &c. Under *simple fibrous tissues*, certain writers have classed the *white* and *yellow fibrous tissues*, and *areolar tissue*. Both the yellow and the white may be detected in the areolar tissue. The *white* is said to exist alone in ligaments, tendons, fibrous membranes, aponeuroses, &c. The *yellow* exists separately in the middle coat of the arteries, the *chordæ vocales*, *ligamentum nuchæ* of quadrupeds, &c. It differs from the white in possessing a high degree of elasticity.

FIBROUS MATTER OF THE BRAIN, see *Cerebrum*—*f.* *Membranes*, see *Membranes*, fibrous.

FIBŪLA, *Cruris radialis*, *Canna minor*, *Os peronei*, *Peroneum*, *Fos'ill minus*, *Sura*, *Arun'do minor*, *Fist'ula Cruris*, *Tib'ia minima*, *Os tib'is minus*, 'a clasp.' The *splinter bone* of the leg. (*F.*) *Péroné*. The long, small bone, situate at the outer part of the leg. The superior or tibial extremity of the fibula is rounded and forms the *caput* or *head*. It is articulated with the tibia. Its inferior or tarsal extremity is broader than the superior. It is articulated with the tibia and astragalus, and forms the *malleolus externus* or *outer ankle* by means of its *coronoid process*. The body of the bone has three faces, having more or less prominent edges. It is separated from the tibia by the *interosseous space*, and is developed by three points of ossification; one at the body, and one at each extremity. It prevents the foot from turning outwards.

FIBULAR, *Peroneal*.

FIBULATIO, *Infibulatio*.

FIC, *Ficus*.

FICAIRE, *Ranunculus ficaria*.

FICARIA, *Scrophularia aquatica*—*f.* *Ranunculoides*, *Ranunculus ficaria*.

FICATIO, *Ficus*.

FICOSA EMINENTIA, *Ficus*.

FICUS, *Sycé*, *Sy'ca*, *Sycum*, *Syco'sis*, *Syc'oma*, *Fica'tio*, *Fico'sus Tumor*, *Fico'sa eminentia*, *Maris'ca*, (*F.*) *Fic*. A fleshy excrescence, often soft and reddish, sometimes hard

and scirrhous, hanging by a peduncle, or formed like a fig; occurring on the eyelids, chin, tongue, anus, or organs of generation. The fig seated on the last mentioned parts are generally of a syphilitic character.

**FIGUS, F. Carica.**

**FIGUS CARICA.** The systematic name of the fig tree. (F.) *Figular. Carica, Ficus, Ficus vulgaris, Ficus communis, Sycl, ouxh, (F.) Figue*: the fig—*Ficus*, (Ph. U. S.)—is a pleasant fruit when ripe; as well as when dried in the state in which it is found in the shops. It is used, at times, in place of a cataplasm; especially in gum boils.

**FIGUS INDIE GRANA, Coccus cacti**—f. *Indica, Musa paradisiaca*, see *Caoutchouc* and *Lacca*—f. *Religiosa*, see *Lacca*.

**FIDGETS.** Of doubtful etymology. *Dysphoria simplex, D. nervosa, Erethismus simplex, Titubatio, (F.) Prétillément.* General restlessness and troublesome uneasiness of the nerves and muscles; with increased sensibility, and inability of fixing the attention, accompanied with a perpetual desire of changing the position. See *Agacement des Nerve*s.

**FIDICINALES, Lumbricales manus.**

**PIEL, Bile.**

**FIELDWEED, Anthemis cotula, Erigeron Philadelphicum.**

**FIEVRE, Fever**—f. *d'Accès, Intermittent fever*—f. *Adynamique, Typhus*—f. *Algide, see Algidae*—f. *d'Amour, Fever, erotic*—f. *Angéiotémique, Synocha*—f. *Annuelle, see Annual Diseases*—f. *Ardent, Ardent fever, Synocha*—f. *Asaxique, Typhus*—f. *de la Barbade, Fever, yellow*—f. *Bulleuse, Pemphigus*—f. *des Camps, Typhus gravior*—f. *Catarrhale, Catarrh*—f. *Catarrhale épidémique, Influenza*—f. *Cérébrale, Cerebral fever*—f. *Cérébrale des Enfants, Hydrocephalus internus*—f. *Cholérique, Choleric fever*—f. *de Consumption, see Consumption*—f. *Continente inflammatoire, Synocha*—f. *Déirante, Fever, delirious*—f. *Double, Fever, double*—f. *Doublee, Fever, double*—f. *Entéro-mésentérique, Typhoid fever*—f. *Etique, Hectic fever*—f. *Gastro-adyamique, Fever, yellow*—f. *Gastro-hépatique, Fever, yellow*—f. *Hectique, Hectic fever*—f. *de Hongrie, Fever, Hungarian*—f. *d'Hôpital, Typhus gravior*—f. *Ictérique, Fever, yellow*—f. *Inflammatoire, Synocha*—f. *Intermittente, Intermittent fever*—f. *Irritative, Synocha*—f. *Jaune d'Amérique, Fever, yellow*—f. *Lactée, Fever, milk*—f. *de Lait, Fever, milk*—f. *Laituse, Fever, milk*—f. *Larvée, Fever, masked*—f. *Lenticulaire, Typhus gravior*—f. *du Levant, Plague*—f. *des Marais, Intermittent Fever*—f. *Matelote, Fever, yellow*—f. *Méningo-gastrique, Fever, gastric*—f. *Mésentérique, see Typhus*—f. *de la Moisson, Fever, gastric*—f. *Morbilleuse, Rubéola*—f. *Nerveuse, Typhus mitior*—f. *Nozocomiale, Typhus gravior*—f. *Ortiée, Urticaria*—f. *Oscitante, Oscitant fever*—f. *Périodique, Intermittent fever*—f. *Péripneumonique, Pneumonia*—f. *Pernicieuse déirante, see Delirious*—f. *Pleurétique, Pleurisy*—f. *des Prisons, Typhus gravior*—f. *Pneumonique, Pneumonia*—f. *Pourprée, Scarlatina*—f. *Puerérale, Fever, puerperal, see Peritonitis*—f. *Quarto, Quartan*—f. *Quotidienne, Quotidian*—f. *Rémittente, Remittent fever*—f. *Rhumatismale, Rheumatism, acute*—f. *Rouge, Roseolæ, Scarlatina*—f. *Sanguine, Synocha*—f. *Semiterce, Hemitritea*—f. *de Siam,*

*Fever, yellow*—f. *Suante, Sudor Picardicus*—f. *Synopale, see Fever synopale, and Synopale*—f. *Tierce, Tertian fever*—f. *Typhoïde, see Typhus*—f. *Vésiculaire, Pemphigus.*

**FIEVREUX, Feverish.**

**FIG, INDIAN, Cactus opuntia.**

**FIGUE, see Ficus carica.**

**FIGUIER, Ficus carica**—f. *d'Inde, Cactus opuntia.*

**FIGURATIO, Imagination.**

**FIGURE, Countenance.**

**FIGURÉ, (F.)** An epithet for a compressive bandage, applied over the head after bleeding from the frontal vein. It has also been called *bandage royal*.

**FIGWORT, Scrophularia nodosa**—f. *Water, greater, Scrophularia aquatica.*

**FILACEOUS, Filamentous.**

**FILAMENT, Filum, Filamentum, from flum, 'a thread.'** This word is used synonymously with *fibril*; thus, we say, a *nervous* or *cellular filament* or *fibril*. Also, the glairy, thread-like substance, which forms in the urine in some diseases, and which depends on a particular secretion from the mucous membrane of the urinary passages.

**FILAMEN'TO'US, Filamento'sus.** Filaceous; threadlike; filiform. Containing threadlike substances, as the *Turcica filamentosa* or *Decidua*:—*Filamentous urine*; urine containing threadlike substances.

**FILAMENTUM, Frænum.**

**FILARIA HOMINIS BRONCHIALIS, see Worms**—f. *Medinensis, Draconculus*—f. *Oculi, see Worms.*

**FILBERT, Corylus avellana.**

**FILPELLUM, Frænum.**

**FILET (DE LA LANGUE,) Frænum**—f. *de la Verge, Frænum penis*—f. *Opération du, see Frænum.*

**FILETUM, Frænum linguae.**

**FILICULA, Polypodium filix mas.**

**FILIFORM, Filiformis,** from *flum, 'a thread,'* and *forma, 'form,'* having the shape of a thread; as the *filiform papillæ* of the tongue. See *Papillæ*.

**FILING, Limatio.**

**FILIPENDULA, Spiræa filipendula.**

**FILIUS ANTE PATREM, Tusilago.**

**FILIX FEMINEA, Pteris aquilina**—f. *Florida, Osmunda regalis*—f. *Mas, Polypodium filix mas*—f. *Nymphæa, Pteris aquilina*—f. *Veneris, Adiantum pedatum.*

**FILLE, Girl.**

**FILLET, Fascia.**

**FILTRATION, Filtratio, Percolatio, F'itissis, Ethis'mus.** A pharmaceutical operation, which consists in passing a fluid through a filter or strainer, for the purpose of clarifying it. In ancient physiology, it meant the action by which the different humours of the body are separated from the mass of the blood.

**FILTRUM.** A filter. Any porous material; such as *sand, some kinds of freestones, powdered charcoal, pounded glass, flannel, unsized paper, &c.,* through which a fluid is passed for the purpose of separating it from the matters suspended in it.

**FILUM, Filament**—f. *Tæniaforme, Tæniola.*

**FIMBRIA, Parar'ma.** A band; a fringe; as the *fimbria* or *fimbriated extremity* of the Fallopian tube.

**FIMBRIÆ CARNOSÆ COLI, Epiploic ap-**

pendages—*f.* Tubarum Fallopii, see Tube, Fallopiian.

FIMUS, *Borborus, Onihus, Stercus.* Dung; excrement.

FIMUS seu STERCUS ANSERIS, *Goose-dung*, was applied as a poultice to the feet in malignant fever. See *Chenocopus*.

FIMUS EQUINUS, *Stercus equi non castrati, Stone horse-dung*, was once thought anti-pleuritic.

FIMUS VACCÆ, *Cow-dung*, was employed as a cataplasm, especially in gout.

FINCKLE, Anethum.

FINGER, Digitus—*f.* Ring, Annular finger—*f.* StALL, Digitale.

FINIS ASPERÆ ARTERIÆ, Larynx.

FIÖLE, Phiala.

FIRE, PERSIAN, Anthracion—*f.* St. Anthony's, Erysipelas—*f.* Weed, Senecio.

FIRE-DAMP, Hydrogen, carburetted.

FIRING, Cauterization.

FIR, SCOTCH, Pinus sylvestris—*f.* Spruce, Norway, Pinus abies—*f.* Tree, silver, European, Pinus pecea—*f.* Yew-leaved, Pinus abies.

FIR-MOSS, UPRIGHT, Lycopodium selago.

FISHSKIN, Ichthyosis.

FISH-TONGUE. An instrument—so called from its shape—used by some dentists for the removal of the dentes sapientiae.

FISSICULATIO, from *fissicula*, 'to cut off,' 'open,' 'make incisions.' An old word for an opening made with a scalpel.

FISSIPAROUS, see Generation.

FISSURA, Fissure—*f.* Capillorum, Distrix—*f.* Contrajacens, Contra-fissura—*f.* Magna vulvæ, see Rima—*f.* Pilaris, Trichiasmus.

FISSURE, *Fissu'ra, Sakhisma, Scissu'ra, Rhagè, Rhagma, Rhogmus*, from *findere*, 'to cleave;' a long and narrow cleft or opening in a bone—*Rhagè, ραγή, Ceasma, usarma.* (F.) *Fissure, Fente.*

FISSURE has various acceptations. 1. A fracture, *Catag'na fissu'ra*, in which the bone is cracked, not separated, as in fracture. 2. A narrow, long, and superficial solution of continuity, around the external openings of the mucous membranes. A sort of chap, observed on the hands, particularly on the callous hands, of workmen, in certain mechanical employments. 3. Small, chapped ulcerations, sometimes noticed in young children, owing to the contact of the faces and urine with the fine delicate skin of the thighs, nates, and genital organs. 4. Clefts of a more or less deep nature, occurring on the genital organs in the vicinity of the anus, in those labouring under syphilis. These are usually called *rhagades*.

FISSURE, CAPILLARY, see Pilatio.

FISSURE, CENTRAL. The aggregate of the cavities or ventricles of the brain. Meckel considers this but one cavity in the form of a cross.

FISSURE OF GLASSER, Fissure, glenoid—*f.* of Glaserius, *f.* Glenoid.

FISSURE, GLENOID, *Fissure of Glaser* or *Glasserius*, (F.) *Fissure* ou *Scissure de Glaser, Fente glenoidale* ou *Fêture de Glaser*, divides the glenoid cavity of the temporal bone into two parts, and gives passage to the chorda tympani, &c.

FISSURE, INFRAORBITAL, Suborbital fissure—*f.* Orbital, see Orbital fissure—*f.* Orbital, inferior, Spheno-maxillary fissure—*f.* Orbital, superior, Sphenoidal Fissure.

FISSURE OF ROLANDO. A transverse fissure

placed between two superior cerebral convolutions, which are met with above the fissure of Sylvius.

FISSURE, SEMILUNAR. A notch at the anterior edge of the cerebellum, where it receives fibres which connect it to the cerebellum and mesocephalon.

FISSURE OF SYLVIVS, *Fissu'ra* vel *Fossa Magna Sy'vis*. A deep, narrow sulcus, which ascends obliquely backwards from the temporal ala of the sphenoid bone near to the middle of the parietal bone; and which parts the anterior and middle lobes of the cerebrum on each side.

FISSURE OF SYLVIVS, Ventricle, fifth.

FISTULA, *Syrinx, Syrin'ga, Autos*—when of a small size, *Aulis'cos*. A solution of continuity, of greater or less depth, and sinuosity; the opening of which is narrow, and the disease kept up by an altered texture of parts, so that it is not disposed to heal. A fistula is *incomplete* or *blind*, when it has but one opening; and *complete* when there are two, the one communicating with an internal cavity, the other externally. It is lined, in its whole course, by a membrane, which seems analogous to mucous membranes. *Incomplete fistula* may be *internal* or *external*. The former are those which open *internally*; the latter those which open *externally*. *External incomplete fistula* are kept up by caries or necrosis of bones, by extraneous bodies in any of the living textures, or by purulent cavities, the walls of which have not become united. *Internal incomplete fistula* generally soon become complete, since the discharge that escapes from them into the cavities into which they open, has a constant tendency to make its way outwardly, and soon occasions ulceration of the integuments. Fistulae have received different names according to the discharge which they afford, and the organs in which they are seated,—as *lachrymal, biliary, salivary, synovial, urinary*—*Fistula urinae, Uriae*. The great object of treatment, in fistulous sores, is to bring on an altered condition of the parietes of the canal, by astringent or stimulating injections, caustics, the knife, pressure, &c. Those which are dependent on diseased bone, cartilage, tendon, &c., do not heal until after the exfoliation of the diseased part. Fistulae of excretory ducts are produced either by an injury of the duct itself or by the retention and accumulation of the fluids to which they have to give passage. Thus, *Fistula lachrymalis, Daeryosyrinx, Emphragma lachrymalè, Hydrops sacci lachrymalis, Dropsy of the lachrymal sac*, commonly proceeds from the obliteration of the nasal duct, or from atony of the lachrymal sac; which circumstances prevent the tears from passing into the nostrils.

FISTULA IN ANO, *Archosyrinx*, generally occurs from some mechanical pressure or impediment. The principal indication in the treatment of these fistulae of the excretory canals being to put a stop to the constant discharge of the secretions, &c., through the preternatural channel, the fistulous passage is at times laid open, and a communication established with the natural excretory canal; at others, strong pressure is employed to procure its obliteration.

FISTULA BELLINIANA, Uriniferous tube—*f.* Cibalis, *Cesophagus*—*f.* Cruris, *Fibula*—*f.* Duræ matris, Sinus of the dura mater—*f.* Lachrymalis, see *Fistula*—*f.* Nervorum, *Neurilemma*—

f. Sacra, Medulla spinalis, Vertebral column.—f. Spiritalis, Trachea.—f. Urinaria, Urethra.—f. Ureterum renum, see Calix.—f. Urinæ, see Fistula.—f. Ventriculi, Œsophagus.

• **PISTULES STERCORAIRES**, see Stercoraceous.

**FISTULOUS**, *Fistulosus*, *Syringiosus*, *Syringoides*. Relating to, or resembling, a fistula; as 'a fistulous opening.'

**FITROOT**, *Monotropa uniflora*.

**FIVE FINGERS**, *Panax quinquefolium*.

**FIXED**, *Fixus*, from *Agere*, 'to fasten.' A body not capable of being volatilized by fire is said to be fixed. Thus, we say *fixed oils*, in contradistinction to *volatile oils*.

**FIXEN, MINERAL WATERS OF**. This spring is four leagues from Waldsassen, in Bavaria. It contains carbonic acid, holding in solution carbonates of lime and magnesia, chlorides of lime and magnesia, carbonate of soda and silica. In Bavaria, it replaces the Seltzer water.

**FIXI DENTES**. The teeth of the second dentition.

**FLABELLATION**, *Flabella'rio*, from *flabellare*, to agitate the air. An operation, recommended by Ambrose Paré, which consists in keeping the fractured limbs cool, as well as the dressings surrounding them, by the renewal of the air around them, either by the use of a fan, or the repeated change of position of the parts affected.

**FLABELLUM ET VENTILABRUM GORDIS**, Pulmo.

**FLACCIDITY**, *Flacciditas*, from *flaccidus*, 'flabby,' 'soft.' Softness of a part so as to offer little resistance on pressure.

**FLAG, BLUE, Iris versicolor**—f. Myrtle, *Acorus calamus*—f. Root, *Acorus calamus*.

**FLAGELLATIO**, Mastigosis.

**FLAMBE**, *Iris Germanica*—f. *Bâtard*, *Iris pseudacorus*.

**FLAMBOISE**, *Ignis sylvaticus*.

**FLAME, VITAL**, Vital principle.

**FLAMMA**, *Fleam*—f. *Cordis*, *Biolychnium*—f. *Vitalis*, *Biolychnium*.

**FLAMME**, *Fleam*—f. *Vitalis*, Vital principle.

**FLAMMETTE**, *Fleam*.

**FLAMMON**, *Lachesis rhombata*.

**FLAMMULA**, *Fleam*—f. *Cordis*, *Biolychnium*—f. *Jovis*, *Clematis recta*—f. *Vitalis*, Animal heat, *Biolychnium*, Vital principle.

**FLANCS**, *Flanks*.

**FLANKS**, *Il'ia*, *Il'ea*, *La'gones*, *Lap'ara*, *Cosno'nes*, (F.) *Flancs*, *Les Iles*. The regions of the body, which extend on the sides, from the inferior margin of the chest to the *crista ilii*.

**FLAP OPERATION OF AMPUTATION**, *Amputation à lambeaux*.

**FLATUARIUS**, Alchymist.

**FLATULENCE**, *Flatulentia*, *Flatus*, *Flatus'itas*, *Aëriflux'us*, *Pneumato'sis ventriculi* et *Pn. enter'ica*, *Pneumato'sis*, *Bdes'ma*, *Hyperpneus'ia*, *Clydon*, *Physa*, *Polyphy'sia*, *Limo'sis* *Flatus*, *Ereux'is*, *Bombus*, *Flatuos'ity*, *Wind*, (F.) *Ventosité*, *Flatuosité*. Emission of wind by the mouth or anus, or accumulation of wind in the digestive tube.

**FLATULENT**, Windy.

**FLATULENTIA**, Flatulence.

**FLATUOSITÉ**, Flatulence.

**FLATUOSITY**, Flatulence.

**FLATUS**, Crepitation, Flatulence—f. *Furi-*

*osus*, *Ambulo-flatulentus*—f. *Spinæ*, *Spina ventosa*.

**FLAVEDO CORTICUM CITRI**, see *Citrus medica*.

**FLAVOUR**, from (F.) *flavor*, 'to smell.' The quality of a sapid body, which is appreciated by the taste and smell combined, and more especially by the latter. Some physiologists consider, that flavour is effected through the smell alone.

**FLAVUS**, Yellow.

**FLAX, COMMON**, *Linum usitatissimum*—f. *Purging*, *Linum catharticum*—f. *Seed*, see *Linum usitatissimum*—f. *Toad*, *Antirrhinum linaria*.

**FLEA, COMMON**, *Pulex irritans*.

**FLEABANE, GREAT**, *Conyza squarrosa*—f. *Various-leaved*, *Erigeron heterophyllum*—f. *Bane*, *Canada*, *Erigeron Canadense*—f. *Philadelphia*, *Erigeron Philadelphicum*—f. *Skeviash*, *Erigeron Philadelphicum*.

**FLEAM**, *Flamma*, *Flam'mula*, *Schaste'ron*, *Fosso'rium*, *Phlebot'omum*. A surgical instrument used for the operation of phlebotomy. (F.) *Flamme*, *Flammets*. It consists of a small metallic box, containing a spear-pointed cutting instrument, which, by means of a spring, can be forced into the vein. It is much used in Germany and some other European countries, and is not unfrequently employed in America; but is scarcely ever seen in France or Great Britain.

**FLEAWORT**, *Plantago psyllium*.

**FLÉCHISSEUR**, *Flexor*—f. *Court commun des orteils*, *Flexor brevis digitorum pedis*—f. *Court du petit doigt*, *Flexor parvus minimi digiti*—f. *Court du petit orteil*, *Flexor brevis minimi digiti pedis*—f. *Profond des doigts*, *Flexor profundus perforans*—f. *Sublime des doigts*, *Flexor sublimis perforatus*—f. *Superficiel des doigts*, *Flexor sublimis perforatus*—f. *Court du gros orteil*, *Flexor brevis pollicis pedis*—f. *Grand commun des orteils*, *Flexor longus digitorum pedis profundus perforans*—f. *Long commun des orteils*, *Flexor longus digitorum pedis profundus perforans*—f. *Long du gros orteil*, *Flexor longus pollicis pedis*—f. *Court du Pouce*, *Flexor brevis pollicis manus*.

**FLECTENS PAR LUMBORUM**, *Quadratus lumborum*.

**FLEGMEN**, *Flemen*.

**FLEMEN**, *Flegmen*. A tumour about the ankles. Also, a chap on the feet and hands.

**FLERECIN**, *Gout*.

**FLESH**, *Caro*, *Sarz*, (F.) *Chair*. Every soft part of an animal is so named; but more particularly the muscles, which are called *muscular flesh*.

**FLESH, PROUD**, *Fungosity*.

**FLETUS**, *Lachrymatio*.

**FLEURS**, *Flowers*, *Menses*—f. *Blanches*, *Leucorrhœa*—f. *de Muscade*, *Mace*—f. *de Soufre*, *Sulphur sublimatum*.

**FLEXIBILITY**, *Flexibilit'itas*, from *flexere*, 'to bend.' Capability of being bent. A physical property of the tissues, which varies greatly according to the structure. The tendons exhibit this property in a marked manner.

**FLEXIO**, *Campsis*.

**FLEXION**, *Flex'io*, *Camp'e*, from *flexere*, 'to bend.' The state of being bent. The action of a flexor muscle.

**FLEXOR**. Same etymon. (F.) *Fléchisseur*.

A muscle, whose office it is to bend certain parts.

**FLEXOR BREVIS DIGITORUM PEDIS PERFORATUS**, *F. Sublimis, Flexor brevis, Flexor digitorum brevis sive perforatus pedis, Perforatus seu flexor secundi internodii digitorum pedis, Calcaneo-sous-phalangien commun, — Calcaneo-sous-phalangien commun, — (Ch.) (F.) Muscle court fléchisseur commun des orteils.* A muscle, placed at the middle of the sole of the foot. It is narrower and thicker behind than before, where it is divided into four portions. It arises from the posterior part of the inferior surface of the os calcis, and is inserted at the inferior surface of the second phalanx of the last four toes. It bends the second phalanges of the toes on the first, and the first on the metatarsal bones; in this manner augmenting the concavity of the vault of the foot.

**FLEXOR BREVIS MINIMI DIGITI**, *F. parvus minimi digiti.*

**FLEXOR BREVIS MINIMI DIGITI PEDIS**, *Parathenar minor, (F.) Court fléchisseur du petit orteil, Tarso-sous-phalangien du petit orteil — (Ch.)* A muscle, situate at the anterior and outer part of the sole of the foot. It arises from the posterior extremity of the fifth metatarsal bone, and is inserted into the posterior part of the first phalanx of the little toe, which it bends.

**FLEXOR BREVIS POLLICIS MANUS**, *Flexor secundi internodii, Thenar, Flexor primi et secundi ossis pollicis, (F.) Court fléchisseur du pouce — Carpophalangien du pouce. — (Ch.) Demi-interosseux du pouce.* A muscle, situate at the outer part of the palm of the hand. It is divided into two portions by the tendon of the *Flexor longus pollicis*. It arises from the os magnum, the anterior annular ligament of the carpus and the third metacarpal bone; and is inserted into the superior part of the first phalanx of the thumb, and into the two ossa sesamoidea at the articulation of the first phalanx with the first metacarpal bone. Its use is to bend the first phalanx of the thumb on the first metacarpal bone; and the latter upon the trapezium.

**FLEXOR BREVIS POLLICIS PEDIS**, *Flexor brevis, Flexor hallucis vel brevis pollicis, (F.) Tarso-phalangien du pouce, Court fléchisseur du gros orteil, Tarso-sous-phalangien du premier orteil — (Ch.)* It is situate at the anterior and inner part of the sole of the foot; is thin and narrow behind, thick and divided into two portions before. It arises from the inferior part of the os calcis and the last two cuneiform bones, and is inserted at the inferior part of the base of the first phalanx of the great toe, and into the two sesamoid bones of the corresponding metatarso-phalagian articulation. It bends the first phalanx of the great toe on the first metacarpal bone.

**FLEXOR CARPI RADIALIS**, *Palmaris magnus — f. Carpi ulnaris, see Cubital (muscles) — f. Hallucis, F. brevis pollicis pedis — f. Hallucis longus, F. longus pollicis pedis.*

**FLEXOR LONGUS DIGITORUM PEDIS PROFUNDUS PERFORANS**; *Perforans seu Flexor profundus, Perodactylus, Peronodactylus, Peronodactylus, Peronodactylus, Flexor digitorum longus sive Perforans pedis, Perforans seu Flexor tertii internodii digitorum pedis; (F.) Tibio-phalangien — (Ch.), Grand ou*

*long fléchisseur commun des orteils.* A muscle, situate at the posterior, and deep-seated part of the leg. It is broader at its middle than extremities, the inferior of which is divided into four portions. It arises from the posterior surface of the tibia; and its tendons are attached to the posterior part of the lower surface of the three phalanges of the last four toes. It bends the three phalanges on each other, and the toes on the metatarsus, and extends the foot on the leg.

*The Accessorius Flexoris Longi Digitorum Pedis, Caro quadrata Syl'vii, C. accessoris, Massa car'nea Jaco'bi Syl'vii, Plantaris vorus, (F.) Accessorius du long fléchisseur commun des orteils, Carré,* is a small muscle of the sole of the foot, which passes obliquely from the os calcis to the outer edge of the flexor longus, whose force it augments, and corrects its obliquity.

**FLEXOR LONGUS POLLICIS MANUS**, *Flexor longus pollicis, Flexor tertii internodii, Flexor tertii internodii sive longus simul pollicis; (F.) Radio-phalangien du pouce, — (Ch.)* Situate at the anterior and profound part of the forearm. It arises from the upper three quarters of the anterior surface of the radius and interosseous ligament, and is inserted, by a tendon, into the anterior surface of the last phalanx of the thumb. It bends the second phalanx of the thumb on the first; the first on the corresponding metacarpal bone, and this upon the radius. It can, also, bend the hand on the forearm.

**FLEXOR LONGUS POLLICIS PEDIS**, *Flexor hallucis vel Pollicis longus, (F.) Péronéo-phalangien du gros orteil, Long fléchisseur du gros orteil, Péronéo-sous-phalangien du pouce, — (Ch.)* It is situate at the posterior and profound part of the leg. It arises from the posterior surface of the fibula and the interosseous ligament, and is inserted, by means of a long tendon, into the inferior part of the first phalanx of the great toe. It bends the third phalanx on the first, and this upon the corresponding metatarsal bone. It augments the concavity of the sole of the foot, and extends the foot on the leg.

**FLEXOR PARVUS MINIMI DIGITI**, *Abductor minimi digiti, Hypoth'encar Riola'ni, Flexor brevis minimi digiti manus, Hypoth'encar minimi digiti, (F.) Carpo-phalangien du petit doigt, — (Ch.) Court fléchisseur du petit doigt.* It arises from the anterior annular ligament of the carpus and the process of the os unciniforme, and is inserted at the inner side of the superior extremity of the first phalanx of the little finger. It bends the first phalanx of the little finger.

**FLEXOR PERFORANS**, *F. profundus perforans — f. Perforatus, F. sublimis perforatus — f. Primi internodii, Opponens pollicis — f. Primi internodii digitorum manus, Lumbricalis manus — f. Primi et secundi ossis pollicis, F. brevis pollicis manus.*

**FLEXOR PROFUNDUS PERFORANS**, *F. Profundus, F. Perforans, F. Perforans vulgo profundus, Flexor tertii internodii digitorum manus vel Perforans manus; (F.) Cubito-phalangien commun — (Ch.), Fléchisseur profond des doigts.* A thick, flat, long muscle, seated beneath the *Flexor sublimis perforatus*. Its upper extremity is simple, and arises from the anterior surface of the ulna and from the interosseous ligament. Its inferior extremity terminates by four tendons which, after having passed through the slits in the *sublimis*, are inserted into the anterior surface of the last phalanges of the four

fingers. It bends the third phalanges on the second; and, in other respects, has the same uses as the Flexor sublimis perforatus.

**FLEXOR SECUNDI INTERNODII DIGITORUM PÆDIS**, *F. brevis digitorum pedis*—*f.* Tertii internodii, *F. longus pollicis manus*—*f.* Tertii internodii digitorum manus, *F. profundus perforans*—*f.* Tertii internodii digitorum pedis, *F. longus digitorum pedis profundus perforans*—*f.* Ossis metacarpi pollicis, *Opponens pollicis*—*f.* Perforatus pedis, *F. brevis digitorum pedis*—*f.* Sublimis, *F. brevis digitorum pedis*.

**FLEXOR SUBLIMIS PERFORATUS**, *F. Perforatus*, (*F.*) *Fléchisseur sublime ou superficial des doigts, Épitrokle-phalanginien commun*;—(*Ch.*) It is a thick, flat, muscle, seated at the anterior part of the forearm. Its upper extremity, which is simple, arises from the internal condyle of the os humeri;—from the coronoid process of the ulna, and from the anterior edge of the radius. Its lower extremity divides into four tendons, which slide under the anterior annular ligament of the carpus, and are inserted into the second phalanges of the last four fingers, after having been slit to allow the tendons of the flexor profundus to pass through them. This muscle bends the second phalanges on the first; these on the carpal bones, and the hand on the forearm.

**FLEXURA**, Curvature—*f.* Sigmoides, Sigmoid flexure.

**FLIXWEED**, *Sisymbrium sophia*.

**FLOCCI**, see Villous membranes.

**FLOCCILEGIUM**, *Carphologia*.

**FLOCCORUM VENATIO**, *Carphologia*.

**FLOCCULI**, see Villous membranes.

**FLOE DE MISTELA**, see Mistura.

**FLORENCE**, CLIMATE OF. This agreeable Italian city is by no means a favourable residence for the phthisical invalid. Sir James Clark affirms, indeed, that he does not know any class of invalids for whom Florence offers a favourable residence. It is subject to sudden vicissitudes of temperature, and to cold piercing winds during the winter and spring.

**FLORES BENZOES**, Benjamin, flowers of—*f.* Boracis, Boracic acid—*f.* Macidos, see *Myristica moschata*—*f.* Macis, Mace—*f.* Martiales, Ferrum ammoniatum—*f.* Salis ammoniaci martiales, Ferrum ammoniatum.

**FLORIDA**, CLIMATE OF, see Saint Augustine.

**FLORIDA**, WATERS OF. Near Long Lake, in Florida, United States, which communicates with St. John's River by a small creek, there is a vast fountain of hot mineral water, issuing from a bank of the river. From its odour it would seem to be sulphurous.

**FLORION**, Influenza.

**FLOS**, *Anthus*. A flower. Also, the finest and noblest part of a body.

**FLOS**, *Jovis*, *Crocus*—*f.* Salis, Soda, subcarbonate of—*f.* Sanguineus monardi, *Tropœolum majus*—*f.* Virginitatis, Hymen.

**FLOUR**, COLD, *Pinoli*—*f.* Potato, see *Solanum tuberosum*.

**FLOWER DE LUCE**, *Iris Germanica*.

**FLOWERS**, *Flores*, (*F.*) *Flours*. The ancient chymists gave this name to different solid and volatile substances, obtained by sublimation. The term is not yet entirely banished from chymical and medical language, as *Flowers of Benjamin*, *Flowers of Sulphur*, &c.

**FLOWERS**, *Menses*.

**FLOWERS**, FOUR CARMINATIVE, *Quatuor flores carminati'vi*, were chamomile, dill, feverfew, and melilot.

**FLOWERS**, FOUR CORDIAL, *Quatuor flores cordiales*, were formerly, borage, bugloss, roses, and violets.

**FLUCTUATIO**, Fluctuation—*f.* Aurium, Tinnitus aurium.

**FLUCTUATION**, *Fluctuatio*, from *fluctus*, 'a wave;' *Undulatio*, (*F.*) *Ondulation*. The undulation of a fluid collected in any natural or artificial cavity, which is felt by pressure or by percussion, properly practised. In ascites, the fluctuation is felt by one of the hands being applied to one side of the abdomen, whilst the other side is struck with the other hand. In abscesses, fluctuation is perceived by pressing on the tumour, with one or two fingers alternately, on opposite points.

**FLUELLEN**, *Antirrhinum elatine*.

**FLUELLIN**, *Veronica*.

**FLUEUES**, *Menses*—*f.* *Blanchas*, *Leucorrhœa*.

**FLUID**, *Fluïdes*, from *fluere*, 'to flow.' The human body is chiefly composed of fluids. If one, weighing 120 pounds, be thoroughly dried in an oven, the remains will be found not to weigh more than 12 or 13 pounds; so that the proportion of fluids to liquids in the body is about 9 or 10 to 1.

TABLE OF FLUIDS OF THE HUMAN BODY.

1. *Blood*.

2. *Lymph*.

3. *Exhaled or Perspiratory*.

4. *Follicular*.

5. *Glandular*.

Transpiration of the mucous, serous, and synovial membranes; of the cellular membrane; of the adipous cells; of the medullary membrane; of the interior of the thyroid gland; the thymus; suprarenal capsules; eye; ear; vertebral canal, &c.

Sebaceous humour of the skin; cerumen; gum of the eye; mucus of the mucous glands and follicles; that of the tonsils, of the glands of the cardia, the environs of the anus, the prostate, &c.

Tears; saliva; pancreatic fluid; bile; cutaneous transpiration; urine; fluid of the glands of Cowper; sperm; milk; of the testes and mammae of the new-born child.

**FLUID**, CEPHALO-RACHIDIAN, Cephalo-spinal fluid—*f.* Cephalo-spinal, Cephalo-spinal fluid—*f.* Cerebro-spinal, Cephalo-spinal fluid—*f.* of Scarpa, *Vitruvius auditivus*.

**FLUIDUM NERVEUM**, Nervous fluid—*f.* Cerebro-spinal, Cephalo-spinal fluid.

**FLUKÈ**, *Distoma hepaticum*—*f.* Liver, *Distoma hepaticum*.

**FLUMEN DYSENTERICUM**, Dysentery.

**FLUOR**, Flux—*f.* Albus Intestinarum, Cœliac flux—*f.* Albus malignus, Gonorrhœa impura—*f.* Muliebris, Leucorrhœa—*f.* Muliebris non Gallicus, Leucorrhœa—*f.* Sanguinis pulmonum, Hæmoptysis—*f.* Sanguinis vesicæ, Cystorrhœa.

**FLUX**, *Fluxus*, *Profuvium*, *Fluor*, from

*fluere*, 'to flow.' A discharge. *Rhysis*. In nosology, it comprises a series of affections, the principal symptom of which is the discharge of a fluid. Generally it is employed for dysentery.

**FLUX, BILIOUS, Fluxus biliosus.** A discharge of bile, either by vomiting or by stool, or by both, as in cholera.

**FLUX, BLOODY, Dysentery**—*f. de Bouche*, Salivation—*f. Bronchicus*, Bronchorrhœa—*f. Dysentérique*, Dysentery—*f. Hépatique*, Hepatirrhœa—*f. Muqueux*, Catarrh—*f. Muqueux de l'estomac*, Gastrorrhœa—*f. Muqueux de la vessie*, Cystirrhœa—*f. Root*, *Asclepias tuberosa*—*f. Salivaire*, Salivation—*f. de Sang*, Hæmorrhagia, Dysentery—*f. Sebaceous*, Stearrhœa—*f. de Sperme*, Spermatorrhœa—*f. de Sueur*, Ephidrosis—*f. Weed*, *Sysymbrium sophia*—*f. d'Urina*, Diabetes—*f. de Ventre*, Diarrhœa.

**FLUXIO ALBA, Leucorrhœa**—*f. Arthritica*, Gout—*f. Vulvæ*, Leucorrhœa.

**FLUXION, Fluxio, Affluxus.** A flow of blood or other humour towards any organ with greater force than natural. A *determination*. Thus we say, in those disposed to apoplexy, there is a *fluxion* or *determination* of blood to the head.

**FLUXION CATARRHALE, Catarrh**—*f. sur les Dents*, Odontalgia.

**FLUXION DE POITRINE, (F.)** By this name, the French often understand *acute pulmonary catarrh*, or *pleurisy*, but most commonly *peripneumony*.

**FLUXUS, Discharge**—*f. Alvinus*, Diarrhœa—*f. Chylosus*, Cœliac flux—*f. Cœliacus*, Cœliac flux—*f. Cœliacus per Renes*, Chyluria—*f. Cruentus cum tenesmo*, Dysentery—*f. Dysentericus*, Dysentery—*f. Hepaticus*, Hepatirrhœa, see Hepatos—*f. Lientericus*, Lientery—*f. Lunaris*, Menses—*f. Matricis*, Leucorrhœa—*f. Menstrualis*, Menstruation—*f. Menstruus*, Menses—*f. Muliebris*, Leucorrhœa—*f. Salivæ*, Salivation—*f. Splenicus*, Melæna—*f. Venereus*, Gonorrhœa impura—*f. Ventriculi*, Gastrorrhœa.

**FLYTRAP, Apocynum androsæmifolium.**

**FOC'ILE.** This name was formerly given to the bones of the leg, as well as to those of the forearm.

**FOCILE MAJUS, Tibia**—*f. Inferius seu majus*, Ulna—*f. Minus*, Fibula—*f. Minus seu superius*, Radius.

**FÆCUNDATIO, Fecundation.**

**FÆCUNDITAS, Fecundity.**

**FÆCUNDUS, Fecund.**

**FÆCEN, Perinæum.**

**FÆNICULUM, Anethum**—*f. Aquaticum*, Phellandrium aquaticum—*f. Erraticum*, Peucedanum silaus—*f. Porcinum*, Peucedanum—*f. Vulgare*, Anethum.

**FÆNUGREEK, Trigonella fœnum.**

**FÆNUM CAMELORUM, Juncus odoratus**—*f. Græcum*, Trigonella fœnum.

**FÆTAB'ULUM.** An encysted abscess.—*Marcus Aurelius Severinus*.

**FÆTAL, Fœtalis.** Relating to the fœtus. A name, given to the parts connected with the fœtus. Thus we say—the *fœtal surface* of the *placenta*, in contradistinction to the *uterine* or *maternal surface*.

**FÆTAL CIRCULATION** differs from that of the adult in several respects. Commencing with the placenta, where it probably undergoes some change analogous to what occurs in the lungs in extra-uterine existence, by the umbilical vein

as far as the liver, where a part of it is poured into the vena porta; the other proceeds into the vena cava inferior; the latter, having received the suprahepatic veins, pours its blood into the right auricle. From the right auricle, a part of the blood is sent into the right ventricle; the rest passes directly through into the left auricle, by the foramen ovale. When the right ventricle contracts, the blood is sent into the pulmonary artery; but as the function of respiration is not going on, no more blood passes to the lungs than is necessary for their nutrition; the remainder goes directly through the ductus arteriosus into the aorta. The blood, received by the left auricle from the lungs, as well as that which passed through the foramen ovale, is transmitted into the left ventricle; by the contraction of which it is sent into the aorta, and by means of the umbilical arteries, which arise from the hypogastric, it is returned to the placenta.

**FÆTAL HEAD.** The diameters of this at the full period are as follows:—1. The *Biparietal* or *transversæ*, extending from one parietal protuberance to the other, and measuring 3½ inches. 2. The *Temporal*, from one temple to another, 3 inches. 3. The *Occipito-mental*, from the occiput to the chin; the greatest of all, 5 inches. 4. The *Occipito-frontal* or *antero-posterior*, 4½ or 4¼ inches. 5. The *Cervico-bregmatic*, from the nape of the neck to the centre of the anterior fontanelle. 6. The *Fronto-mental*, from the forehead to the chin, about 3½ inches. 7. The *Trachelo-bregmatic*, from the front of the neck to the anterior fontanelle, 3½ inches. 8. The *Vertical diameter*, from the vertex to the base of the cranium.

**FÆTAL NUTRITION, Cytrophy.**

**FÆTATION, Pregnancy.**

**FÆTICIDE, Fœtici'dium;** from *fatus*, and *cædere*, 'to kill;' *Abortivum*. Criminal abortion.

**FÆTIDUS, Fetid.**

**FÆTOR, Dysodia**—*f. Oris*, Breath, offensive.

**FÆTUS, Fetus, Cys'ma, Onus ventris, Sarcina,** from *fœo*, 'I bring forth.' The unborn child. By *αυγα*, *Cys'ma*, Hippocrates meant the feundated, but still imperfect, germ. It corresponded with the term *embryo*, as now used; whilst *εμβρυον*, 'embryo,' signified the fœtus at a more advanced stage of utero-gestation. The majority of anatomists apply to the germ the name *embryo*, which it retains until the third month of gestation, and with some until the period of quickening; whilst *fatus* is applied to it in its latter stages. The terms are, however, often used indiscriminately. When the ovule has been feundated in the ovarium, it proceeds slowly towards, and enters the uterus, with which it becomes ultimately connected by means of the placenta. When first seen, the fœtus has the form of a gelatinous flake, which some have compared to an ant, a grain of barley, a worm curved upon itself; &c. The fetal increment is very rapid in the first, third, fourth, and sixth months of its formation, and at the end of nine months, it has attained its full dimensions. Generally, there is but one fœtus in utero; sometimes, there are two; rarely three. The fœtus presents considerable difference in its shape, weight, length, situation in the womb, proportion of its various parts to

each other, arrangement and texture of its organs, state of its functions at different periods of gestation, &c. All these differences are important in an obstetrical and medico-legal point of view. The following table exhibits the length and weight of the fœtus at different periods of gestation, on the authority of different

observers. Their discordance is striking. It is proper to remark, that the Paris pound—*Poid de Marc*—of 16 ounces, contains 9216 Paris grains, whilst the avoirdupois contains only 8532.5 Paris grains, and that the Paris inch is 1.065977 English inch.

	<i>Beck.</i>	<i>Maygrier.</i>	<i>Granville.</i>	<i>Beck.</i>	<i>Maygrier.</i>	<i>Granville.</i>

FŒTUS IN FŒTU, Cryptodidymus.

FŒTUS SEPTIMES TRIS. A seven months' fœtus.

FŒTUS ZEPHYRIUS, Mole.

FOIE, Liver—*f. d'Antimoine*, Oxidum stibii sulphuretum—*f. de Soufre*, Potassæ sulphuretum.

FOLIACEUM ORNAMENTUM, see Tuba Fallopiana.

FOLIE, Insanity—*f. des Ivrognes*, Delirium tremens.

FOLLETTE, Influenza.

FOLLICLE, *Folliculus*, *Cystis*, diminutive of *Follic*, a bag. See *Cystis*.

FOLLICLES, CILIARY, Meibomius, glands of—*f. of De Graaf*, *Folliculi Graafiani*—*f. of Lieberkühn*, see Intestine—*f. Palpebral*, Meibomius, glands of—*f. Solitary*, Brunner's glands—*f. Synovial*, *Bursæ mucosæ*.

FOLLICULE, Crypta—*f. Ciliaire*, Meibomius, gland of—*f. Dentaire*, Dental follicle—*f. Palpebral*, Meibomius, gland of.

FOLLICULI GRAAFIANI, *Ovula Graafiana*, *Follicles* or *Vesicles* of *De Graaf*, *Ovarian vesicles*. Small spherical vesicles deposited in the stroma of the ovary, which have two coats; the inner termed *ovicapsule* and *ovisac*. They exist in the fœtus. The ovum—*ovule* of some—is contained in them.

FOLLICULI ROTUNDI ET OBLONGI CERVICIS UTERI, Nabothi glandulæ—*f. Sanguinis*, Globules of the blood—*f. Sebacei*, Sebaceous glands.

FOLLICULOSE GLAND, Crypta.

FOLLICULUS, Ulva—*f. Dentis*, Dental Follicle—*f. Fellei*, Gall-bladder—*f. Genitalis*, Scrotum:

TO FOMENT, *Fove're*, (F.) *Étuver*, *Bassiner*. To apply a fomentation to a part.

FOMENTATION, *Fomentatio*, *Fotus*, *Pyria*, *Thermas'ma*, *Chlias'ma*, *Æon'sis*, *Perfusio*, *Asper'sio*, *Fomentum*, (quasi *fovementum*), from *fovere*, 'to bathe.' A sort of partial bathing, by the application of cloths, which have been previously dipped in hot water or in some medicated decoction. They act, chiefly, by virtue of their warmth and moisture, except in the case of narcotic fomentations, where some additional effect is obtained.

A dry fomentation is a warm, dry application to a part;—as a hot brick, wrapped in flannel;

—a bag, half filled with chamomile flowers made hot, &c.

FOMENTATION HERBS, *Herba pro fotu*. The herbs, ordinarily sold under this title by the English apothecary, are—*southernwood*, *tops of sea wormwood*, *chamomile flowers*, each two parts: *bay leaves*, one part. ℞iijss of these to Ovj of water.

FOMENTUM, Fomentation.

FOMES MORBI, *Fomes mali*. The focus or seat of any disease. (F.) *Foyer*.

FOMES VENTRICULI, Hypochondriasis.

FOMITES, from *fomes*, 'fuel, any thing which retains heat.' *Enaus'ma*, *Zopyron*. A term, applied to substances which are supposed to retain contagious effluvia; as wool-len goods, feathers, cotton, &c.

FONCTION, Function.

FOND, Fundus.

FONDANT, Solvent.

FONGIFORME, Fungoid.

FONGOÏDE, Fungoid.

FONGOSITE, Fungosity.

FONGUS, Fungus—*f. Médullaire*, *Encephaloïd*.

FONS, Fontanella—*f. Lachrymarum*, see Canthus—*f. Medicatus*, Water, mineral—*f. Pulsans*, Fontanella—*f. Pulsatilis*, Fontanella—*f. Salutaris*, Water, mineral—*f. Soterius*, Water, mineral.

FONSANGE, MINERAL WATERS OF. Fonsange is situate near Nismes in France. The water is sulphuretted.

FONTANA, CANAL OF. A canal of a triangular shape, at the inner side of the ciliary circle; partly formed by the groove at the inner edges of the cornea and sclerótica.

FONTANELLA. A fontanel;—diminutive of *fons*, 'a fountain.' *Fons pulsatilis*, *Fons pulsans*, *Vertex palpitans*, *Fons*, *Bregma*, *Fonticulus*, *Lacuna*, *Mould*. The opening of the head. A name, given to a space occupied by a cartilaginous membrane, in the fœtus and new-born child; and situate at the union of the angles of the bones of the cranium. There are six fontanels. 1. The *great* or *sincipital* or *anterior*, situate at the junction of the sagittal and coronal sutures. 2. The *small* or *bregmatic* or *posterior*, situate at the part where

the posterior and superior angles of the parietal bones unite with the upper part of the os occipitis. 3. The *two sphenoidal*, in the temporal fossæ; and, 4. The *two mastoid*, or of Casserius, at the union of the parietal, occipital, and temporal bones.

FONTES, see Fons—f. Medicati Plumbarii, Plombières, Mineral waters of—f. Sulphurei calidi, Waters, mineral, sulphureous.

**FONTICULE À POIS**, see Fonticulus.

**FONTICULUS**, *Fontanel'la*, *Exutorium*, *Exutory*, *Issue*, (F.) *Fonticula*, *Cautére*. A small ulcer produced by art, either by the aid of caustics or of cutting instruments; the discharge from which is kept up with a view to fulfil certain therapeutical indications. The *Pea issue*, (F.) *Fonticule à pois*, is kept up by means of a pea placed in it. This *pea*, (F.) *Pois à cautère*, is sometimes formed of wax; at others, the young, blasted fruit of the orange is employed. The common dried garden pea answers the purpose. The seton is also an issue.

**FOOD**, Aliment—f. of the Gods, Asafœtida.

**FOOL'S STONES**, MALE, Orchis mascula.

**FOOT**, Pes—f. Flat, see Kylosis—f. Grifon's, Gryphius pes.

**FOOTLING CASE**. A presentation of the foot or feet in parturition.

**FORAMEN**, *Troma*, from *foro*, 'I pierce.' *Aulos*, (F.) *Trou*. Any cavity, pierced through and through. Also, the orifice of a canal.

**FORAMEN ALVOLARE ANTERIUS**, see Palatine canals—f. Alveolare posterius, see Palatine canals—f. Amplum pelvis, Obturatorium foramen—f. Aquæductus Fallopii, F. stylomastoideum—f. Auditorium externum, see Auditorial canal, external—f. Auditorium internum, see Auditory canal, internal—f. of Bichat, see Canal, arachnoid—f. of Botal, see Botal foramen—f. Cæcum ossis maxillaris superioris, see Palatine canals.

**FORAMEN CÆCUM OF THE MEDULLA OBLONGATA**, of VICQ. D'AZEY; (F.) *Trou borgne*. A tolerably deep fossa at the point where the médium furrow at the anterior surface of the medulla oblongata meets the pons.

**FORAMEN CÆCUM OF THE TONGUE**, see Cæcum foramen and Tongue—f. Carotid, see Carotica foramina.

**FORAMEN CENTRALE ET LIMBUS LUTREUS RETINE**; the *central foramen and yellow spot of the retina*; discovered by Sömmering. *Maccula lutæa*, (F.) *Tache jaune*. It is situate about two lines to the outside of the optic nerve, and in the direction of the axis of the eyes.

**FORAMEN COMMUNE ANTERIUS**, *Vulva*—f. Commune posterius, see Anus—f. Condylloid, see Condylloid—f. Conjugationis, see Conjugation—f. Ethmoideum, Orbital foramen, internal—f. Incisivum, see Palatine canals—f. Infrapubium, see Suborbital canal—f. Infrapubium, Obturatorium foramen—f. Jugulare, Lacerum posterius foramen—f. Lacerum in basi cranii, Lacerum posterius foramen—f. Lacerum inferius, Sphenomaxillary fissure—f. Lacerum superius, Sphenoidal fissure—f. Magnum, see Occipital bone—f. Mastoid, see Mastoid foramen—f. Mental, see Mental foramen.

**FORAMEN MONRO**. An opening behind the anterior pillar of the fornix, somewhat above the anterior commissure, by which the

third ventricle communicates with the lateral ventricle.

**FORAMEN OF MORGAGNI**, see Cæcum foramen and Tongue—f. Obturatorium, Obturator foramen—f. Oculi, Pupil—f. Oodes, Ovale foramen—f. Orbitarium internum, Orbital foramen, internal—f. Orbitarium superius, Orbital foramen, superior, F. supraorbitarium—f. Ovale, Botal foramen, Fenestra ovalis, Obturatorium foramen, Ovale foramen—f. Palatinum anterius, see Palatine canals—f. Palatinum posterius, see Palatine canals—f. Palato-maxillare, see Palatine canals—f. Rotundum, Fenestra rotunda—f. Spheno-spinosum, Spinale foramen—f. Thyroideum, Obturatorium foramen—f. of Winslow, Hiatus of Winslow.

**FORAMINA THEBÆICA**. Openings resembling vascular orifices found below the orifice of the vena cava superior in the right auricle, which are supposed to be the openings of veins.

**FORATIO**, Trepanning.

**FORCE**, from *fortis*, 'strong.' *Via*, *Potentia*, *Energia*, *Dynamis*, *Cratos*. Any power which produces an action. Those powers which are inherent in organization are called *vital forces*. We say, also, *organic force*, and *muscular force*, to designate that of the organs in general, or of the muscles in particular. To the latter the word *Dynamis*, *δυναμις*, corresponds; and the absence of this force is termed *adynamia*. The *vital forces* have to be carefully studied by the pathologist. The doctrine of diseases is greatly dependent on their augmentation or diminution; freedom or oppression, &c.

**FORCE OF ASSIMILATION**, Plastic force—f. Catalytic, see Catalysis—f. of Nutrition, Plastic force—f. Vital, *Vis vitalis*—f. *Vitalis*, *Vis vitalis*.

**FORCE-REAL**, MINERAL WATERS OF. The name of a mountain, situate four leagues from Perpignan in France. The water is chalybeate.

**FORCEPS**, quasi, *ferriceps*, from *ferrum*, 'iron,' and *capio*, 'I take.' *Pincers*, *Labis*, *Volcel'la*. An instrument for removing bodies, which it would be inconvenient or impracticable to seize with the fingers. (F.) *Pincers*, *Pincettes*. There are various kinds of forceps, 1. The ordinary kind, contained in every dressing-case, for removing lint, &c. from wounds or ulcers. (F.) *Pincers à anneaux*. 2. *Dissecting or Ligature or Arterial Forceps*, (F.) *Pincers à dissection*, *P. à ligature*, to lay hold of delicate parts. 3. *Polypus Forceps*, *Tooth Forceps*, *Forceps of Museux* for laying hold of the tonsils or other parts to be removed. 4. The *Bullet Forceps*, *Strombulcus*, (F.) *Tyrballe*, &c. 5. The *Lithotomy Forceps*, *Lithotomion*, *Lithotomium*, *Tomacula*, *Volcel'la*, which resembles the *Craniotomy Forceps*, (F.) *Tenettes*.

*Forceps* is also an instrument used by obstetrical practitioners to embrace the head, and bring it through the pelvis. It consists of two branches, blades or levers; one of which, in the case of the *short forceps*, is passed over the ear of the child, and the other opposite to the former, so that the blades may lock. When the head is securely included between the blades, the operation of extraction can be commenced. See Parturition.

**FORCEPS ARTERIAL**, see Forceps—f. Bullet, see Forceps—f. Craniotomy, see Forceps—f.

Deceptoria, see Forceps—f. Lithotomy, see Forceps—f. of Museux, see Forceps—f. Polypus, see Forceps—f. Tooth, see Forceps.

FORD'S BALSAM OF HOREHOUND, see Balsam of horehound.

FOREARM, *Antibrachium*, *Pygmæ*, *Pars inferior brachii*, *Cubitus*, (F.) *Avant-bras*. The part of the upper extremity, comprised between the arm and the hand. It is composed of two bones—*radius* and *ulna*—and 20 muscles.

FOREHEAD, Front.

FORENSIC ANATOMY, see Anatomy—f. Medicine, Medicine, legal.

FORESKIN, Prepuce.

FORFEX, Scissors—f. Dentaria, Dentagra.

FORGES, MINERAL WATERS OF. Forges is situate four leagues from Gournay, in the department of Seine Inférieure, France. There are three springs, which are acidulous chalybeates. They are called *Royal*, *Reinette*, and *Cardinal*, in honor of Louis XIII., Queen Anne of Austria, and Cardinal Richelieu, who used them.

FORMATIVE, Plastic.

FORMICA, *Myrmex*. The ant or pismire. (F.) *Fourmi*. It contains an acid juice and gross oil, which were formerly extolled as aphrodisiacs. The chrysalides of the animal are said to be diuretic and carminative; and have been used in dropsy. 2. Also the name of a black wart, *verruca formicaria*, with a broad base and cleft surface; so called because the pain attending it resembles the biting of an ant, *μύμηξια*, *myrmecia*.—Forestus. 3. A varicose tumour on the anus and glans penis. 4. Also, military herpes.

FORMICA AMBULATORIA, *Herpes circinatus*—f. Corrosive, *Herpes exedens*.

FORMICANT, *Myrmecison*, *Formicans*, from *formica*, 'an ant.' (F.) *Fourmillant*. An epithet given to the pulse, *Pulsus formicans*, when extremely small, scarcely perceptible, unequal, and communicating a sensation like that of the motion of an ant through a thin texture.

FORMICATION, *Formicatio*, *Myrmeciasmos*, *Myrmeciasis*, *Myrmeciasmus*, *Myrmecosis*, *Stupor formicans*. Same etymon. (F.) *Fourmillement*. A pain, compared with that which would be caused by a number of ants creeping on a part.

FORMIX, *Herpes esthiomenus*.

FORMULA, from *forma*, 'a form.' (F.) *Formule*, *Ordonnance*. The receipt for the formation of a compound medicine; a prescription.

FORMULARY, *Formulaarium*, *Codex medicamentarius*, *Narthevia*, *Narthevium*, *Narthez*. A collection of medical formulæ or receipts.

FORMULE, Prescription.

FORMYL, PERCHLORIDE OF, Chloroform.

FORNIX, 'an arch or vault.' *Fornix cerebri*, *Camera*, *Fornix trilateralis*, *Palis*, *Psalidium*, *Testudo cerebri*, *Arcus medullaris*, (F.) *Trigone cerebral*—(Ch.) *Voûte à trois piliers*, *Triangle Médullaire*. A medullary body in the brain, below the corpus callosum and above the middle ventricle, on the median line. This body, which is curved upon itself, terminates anteriorly by a prolongation, which constitutes its anterior pillar or crus, (F.) *Pilier antérieur*, and posteriorly by two

similar prolongations, called posterior pillars or crura. See Achicolum, and Vault.

FORNIX CEREBRI, Fornix.

FORFEX, Scissors.

FORTIFIANT, Corroborant, Tonic.

FORTRAITURE, Hysteralgia.

FOSSA, *Fovea*, from *foveo*, 'I dig.' *Scamma*. A cavity of greater or less depth, the entrance to which is always larger than the base. The fossæ of bones have been called simple, when they belong to one bone only, as the *parietal fossa*; and compound, (F.) *Fossæ compostæ*, when several concur in their formation, as the *orbital fossa*, *temporal fossa*, &c.

FOSSA AMYGDALOID, *Amygdaloid excavation*. The space between the anterior and posterior pillars of the fauces, which is occupied by the tonsils.

FOSSA AMYNTÆ. A kind of bandage, used in fractures of the nose; so called, by Galen, from Amyntas of Rhodes, its inventor. It consisted of a long band, applied round the head, the turns of which crossed at the root of the nose.

FOSSA CANINA, Canine fossa.

FOSSA CEREBELLI, (F.) *Fosse cérébelleuse*. The inferior occipital fossa, which lodges the corresponding portion of the cerebellum.

FOSSA CORONALIS, *Coronal* or *frontal fossa*. A depression on the orbital plate of the frontal or coronal bone, which supports the anterior lobe of the brain.

FOSSA CORONOIDEA, *Coronoid fossa*. A cavity before the inferior extremity of the humerus, in which the coronoid process of the ulna is engaged during the flexion of the forearm.

FOSSA COTYLOIDEA, see Cotyloid.

FOSSA, DIGASTRIC, *Fossa digastrica*. A deep groove on the mastoid portion of the temporal bone, which gives origin to the digastric muscle.

FOSSA ETHMOIDALIS, *Ethmoidal fossa*. A shallow gutter on the upper surface of the cribriform plate of the ethmoid bone, on which is lodged the expanded portion of the olfactory nerve.

FOSSA GENU, Poples.

FOSSA GUTTURA'LIS, *Guttural fossa*. The depression which forms the guttural region of the base of the cranium, between the foramen magnum and posterior nares.

FOSSA HYALOIDEA, see Hyaloid (Fossa)—f. Iliac, see Iliac fossæ—f. Infraorbital, Canine fossa—f. Infraspineus, see Infraspinata fossa—f. Ischio-rectal, Perineal fossa—f. Jugularis, Jugular fossa—f. Lachrymalis, Lachrymal fossa—f. Magna Muliebris, Vulva—f. Magna Sylvii, Fissura Sylvii.

FOSSA, MENTAL, *Fossa mentalis*. A small depression on each side of the symphysis on the anterior surface of the body of the maxilla inferior, for the attachment of muscles.

FOSSA NAVICULARIS, Navicular fossa.

FOSSA OCCIPITALIS, *Occipital fossa*. The occipital fossæ are four in number; the superior or cerebral, and the inferior or cerebellous. They are separated by a groove, which lodges the lateral sinus.

FOSSA OVALIS, see Ovalis fossa—f. Palatina, Palate—f. Perinæi, Perineal fossa—f. Pituitaria, Sella Turcica.

FOSSA POPLITEA, *Popliteal fossa*. The hollow of the ham;—the popliteal region.

FOSSA SCAPHOIDES, Navicularis fossa—f. Suborbital, Canine fossa.

**FOSSA**, SUBPYRAMIDAL, *F. subpyramidalis*. A deep fossa under the pyramid and behind the fenestra rotunda in the middle ear, remarkable for its constancy, and pierced by several foramina at the bottom.

**FOSSA SUPRA-SPHENOIDALIS**, Pituitaria fossa—*f.* of Sylvius, Ventricle, fifth—*f.* Umbilicalis, see Liver.

**FOSSÆ CEREBRALES**, *Cer'bral fossæ*. Fossæ or excavations at the base of the cranium. They are nine in number; three occupy the median line, and three are placed at each side. They are distinguished into *anterior, middle, and posterior*.

**FOSSÆ DIGITALES**, see Impression.

**FOSSÉ BASILAIRE**, Basiliary fossa—*f. Sous-épineuse, Infra-spinata fossa—f. Sus-épineuse, Fossa supra-spinata.*

**FOSSÆ CONDYLOÏDIENNES**, Condyloidea foramina—*f. Nasales, Ouvertures postérieures des, Nares, posterior.*

**FOSSETTE**, (F.) Diminutive of *fossa*. *Scrobiculus, Bothrion*. Several depressions are so called. A *dimpled chin, Fossette du menton*, consists in a slight depression, which certain persons have on the chin. 2. *A dimple of the cheek, (F.) Fossette des joues*, a depression which occurs on the cheeks of certain persons when they laugh. *Scrobiculus cordis, Anticardion, Præcordium, (F.) Fossette du cœur*. The depression observed on a level with the xiphoid cartilage at the anterior and inferior part of the chest. It is, also, called *pit of the stomach, (F.) Creux de l'estomac.*

**FOSSETTE**, *Fos'cula, Anulus, Bothrium*, is also a small ulcer of the transparent cornea, the centre of which is deep.

**FOSSETTE ANGULAIRE DU QUATRIÈME VENTRICULE**, Calamus scriptorius—*f. du Cœur, Scrobiculus cordis.*

**FOSSORIUM**, Fleam.

**FOSSULA**, Argema, Fossa, *Fossette, Fovea.*

**FOTHERGILL'S PILLS**, see Pilulæ aloes et colocynthidis.

**FOTUS**, Fomentation—*f. Communis, Decoctum papaveris.*

**FOUGÈRE FEMELLE**, Asplenium filix fœmina, Pteris aquilina—*f. Granda, Pteris aquilina—f. Mâle, Polypodium filix mas.*

**FOULÛRE**, Sprain.

**FOUNDLING HOSPITAL**, Brephtropheum.

**FOURCHE**, (F.) *fouché, 'cleft,' from furca, 'a fork.' Apostéma Phalan'gum*. A French provincial term for small abscesses, which form on the fingers and hands of working people. Also, an instrument, invented by M. J. L. Petit for compressing the ranine artery, in cases of hemorrhage from that vessel.

**FOURCHETTE**, *Furcul'a, a little fork. Fur'cula*. A surgical instrument used for raising and supporting the tongue, during the operation of dividing the frænum.

*Fourchette*, in anatomy, is, 1. The posterior commissure of the labia majora, called also, *Frænum and Fur'cula*. 2. The cartilago ensiformis: so called from its being sometimes cleft like a fork. Also, the semilunar notch at the superior or clavicular extremity of the sternum.

**FOURMI**, Formica.

**FOURMILLANT**, Formicant.

**FOURMILLEMENT**, Formication.

**FOUSEL OIL**, see Oil, Fusel.

**FOVEA**, Diminutive *Fove'ola*, from *foddo, 'I dig.' Bothros*. A slight depression. *Fos'sula. The pudendum muliebre; see Vulva*. Also, the *fossa navicularis*. A vapour bath for the lower extremities.

**FOVEA AXILLARIS**, Axilla—*f. Hemispherica, see Crista vestibuli—f. Lacrymalis, Lacrymal fossæ—f. Oculi, Orbit—f. Semi-elliptica, see Crista Vestibuli.*

**FOVEOLA**, Fovea.

**FOX BERRY**, *Arbutus uva ursi.*

**FOXGLOVE**, *Digitalis.*

**FOYER**, Fomes morbi.

**FRACTURA**, Fracture—*f. Dentis, Odontoclasia.*

**FRACTURE**, *Fractur'a*, from *frangere, fractum, 'to break,' 'bruisé.' Catag'ma, Catag'ma Fractur'a, Catax'is, Clasis, Clasma, Agmè, Ag'ma, Diarr'hagè*. A solution of continuity in a bone, *Osseol'asis*. A simple fracture is when the bone only is divided. A compound fracture is a division of the bone with a wound of the integuments communicating with the bone,—the bone, indeed, generally protruding. In a comminuted fracture, *Aphise'don, αψησιδον, Carys'don Catag'ma, καρυσδον καταγμα*, the bone is broken into several pieces; and in a complicated fracture there is, in addition to the injury done to the bone, a lesion of some considerable vessel, nervous trunk, &c. Fractures are also termed *transverse, oblique, &c.*, according to their direction. The treatment of fractures consists, in general, in reducing the fragments when displaced; maintaining them when reduced; preventing the symptoms, which may be likely to arise; and combating them when they occur. The reduction of fractures must be effected by extension, counter-extension, and coaptation. (See these words.) The parts are kept in apposition by position, rest, and an appropriate apparatus. The position must vary according to the kind of fracture. Commonly, the fractured limb is placed on a horizontal or slightly inclined plane, in a state of extension; or rather in a middle state between extension and flexion, according to the case.

**FRACTURE EN RAVE**, Raphanedon.

**FRACTURES PAR RESONNANCE**, see Contrassura.

**FRÆNA MORGAGNII**, F. of the Valve of Bauhin.

**FRÆNA OF THE VALVE OF BAUHIN**, (F.) *Freins de la valvule de Bauhin*. A name given by Morgagni to the projecting lines formed by the junction of the extremities of the two lips of the ileo-cæcal valve. They are also called *Fræna and Rosinad'ula Morgagni'i.*

**FRÆNULUM**, see Frænum, *Bride—f. Clitoridis, Frænum clitoridis—f. Novum, Tænia semicircularis.*

**FRÆNUM**, *Fre'nnum; (F.) Frein, 'a bridle.' Frænulum, Filal'um, Filamentum*. 'A small bridle.' A bridle. Names given to several membranous folds, which bridle and retain certain organs.

**FRÆNUM CLITORIDIS**, *Frænulum Clitor'idis, (F.) Frein du Clitoris*. A slight duplicature formed by the union of the internal portions of the upper extremity of the nymphæ.

**FRÆNUM GLANDIS**, F. Penis.

**FRÆNUM LABIORUM**, (F.) *Frein des lèvres*. There are two of these; one for the upper, the other for the lower lip. They unite these parts

to the maxillary bone, and are formed by the mucous membrane of the mouth.

**FRÆNUM LINGUÆ, Frænulum seu Vinculum, Linguae, Glossodes'mus, Filletum, (F.) Fillet ou Frein de la langue,** is a triangular reflection, formed by the mucous membrane of the mouth, and situate between the inferior paries of that cavity and the inferior surface of the tongue. When the frænum extends as far as the extremity of the tongue, it cramps its movements, interferes with sucking, &c. This inconvenience is remedied by carefully snipping it with a pair of scissors. The French call this *l'opération du fillet*.

**FRÆNUM PENIS, F. seu Frænulum seu Vinculum Præputii, F. Glandis, Cynodes'mion, Cynodes'mus, Vinculum Caninum, (F.) Fillet ou Frein de la verge,** is a membranous reflection which fixes the prepuce to the lower part of the glans. When too short, it prevents the prepuce from sliding over the glans.

**FRÆNUM PRÆPUTII, F. Penis.**

**FRAGARIA, from fragro, 'I smell sweetly.'** The Strawberry, *Fragaria vesca, Chamæbatos, (F.) Fraisier.* The fruit is agreeable and wholesome, and the roots have been used as tonic and slightly diuretic. The fruit is the *Fragum, rospæro,* of the ancients; (F.) *Fraise.*

**FRAGARIA VESCA, Fragaria.**

**FRAGILE VITREUM, Fragilitas ossium.**

**FRAGILITAS, Ruptibilitas, from frango, 'I break.'** Fragility, Brittleness. The state of being easily broken or torn.

**FRAGILITAS OSSIIUM, Osteopathyros'is, Brittleness of the bones, Friability of the bones, Paros'tia frag'ilis, Frag'ile vit'reum.** Pathologists have given this name to the extreme facility with which bones break in certain diseases of the osseous texture. It is owing to a deficiency of the animal matter.

**FRAGMENT, Fragmentum, Fragment, Ramentum, from frangere, 'to break.'** The French use this term for the two portions of a fractured bone; thus, they speak of the *superior and inferior fragment.*

**FRAGMENTS, PRECIOUS.** A name formerly given, in *Pharmacy,* to the garnet, hyacinth, emerald, sapphire and topaz. The Arabs falsely attributed to them cordial and alixterial properties.

**FRAGON, Ruscus.**

**FRAGUM, see Fragaria.**

**FRAISE, see Fragaria.**

**FRAISIER, Fragaria.**

**FRAMBOË'SIA, Frambæ'sia, Lepra fungifera, from Framboise, (F.)** A raspberry. *Syph'ilis Ind'ica, Anthrac'ia ru'bula, Thymio'sis, Thymio'sis seu Lues Ind'ica, Vari'ola Amboinon'sis, Lepra fungifera, Scroph'ula Molucca'na.* The *Yaws, Erian, Pian.* A disease of the Antilles and of Africa; characterized by tumours, of a contagious character, which resemble strawberries, raspberries, or champignons; ulcerate, and are accompanied by emaciation. The *Pian,* for so the Indians call it, differs somewhat in America and Africa.

*Pian of America, Frambæ'sia America'na, Anthrac'ia Ru'bula Americana,* occurs under similar circumstances with the next, and seems to be transmitted by copulation. The tumours have a similar form, and are greater in proportion to their paucity. In some cases they are mixed with ulcers.

*Pian of Guin'ea, Frambæ'sia Guineen'sis, Anthrac'ia Ru'bula Guineen'sis,* is common amongst the negroes, especially in childhood and youth. It begins by small spots, which appear on different parts, and especially on the organs of generation and around the anus; these spots disappear, and are transformed into an eschar, to which an excrescence succeeds, that grows slowly, and has the shape above described.

The treatment is nearly the same in the two varieties. The tumours will yield to mercurial friction, when small. When large they must be destroyed by caustic. In both cases, mercury must be given to prevent a recurrence.

An endemic disease resembling yaws was observed in the Feejee Islands by the medical officers of the United States' Exploring Expedition. It is called by the natives *Dihoko.*

**FRAMBESIA ILLYRICA, Scherlievo—f. Scotica, Sibbens.**

**FRAMBOISE, Rubus idæus.**

**FRANCOLIN, Attagen.**

**FRANGES SYNOVIALES, Synovial glands.**

**FRANGULA ALNUS, Rhamnus frangula.**

**FRANKINCENSE, COMMON, see Pinus abies—f. True, Juniperus lycia.**

**FRANZENSBAD, MINERAL WATERS OF.** A celebrated water at Eger in Bohemia, which contains sulphate of soda, carbonate of iron, and carbonic acid gas. The springs are also called *Franzensbrunnen.*

**FRASERA CAROLINIENSIS, see Calumba —f. Officialis, see Calumba—f. Walteri, see Calumba.**

**FRATERNITAS, Adelpixia.**

**FRATRATIO, Adelpixia.**

**FRAVINELLA, WHITE, Dictamnus albus.**

**FRAVINUS EXCEL'SIOR.** The systematic name of the *Ash tree, Fraxinus, Ornus* seu *Fraxinus sylvestris, Bumelia* seu *Macedon'ica Fraxinus, Bumelia. Ord. Oleimæ. (F.) Frêne.* The fresh bark has a moderately strong, bitterish taste. It has been said to possess resolvent and diuretic qualities, and has been given in intermittents. The seeds, called *Birds' tongues, Lingua avis, Ornithogloss'æ,* have been exhibited as diuretics, in the dose of a drachm. Its sap has been extolled against deafness.

**FRAVINUS MACEDONICA, F. Excel'sior.**

**FRAVINUS ORNUS, Fraxinus Me'lia.** The systematic name of the tree whence *manna* flows. This substance is also called *Manna Calabri'na, Ros Calabri'nus, Aorom'eli, Drosom'eli, Drosom'eli, Mal æ'trium.* In Sicily, not only the *Fraxinus Ornus,* but also the *rotundifolia* and *excel'sior* are regularly cultivated for the purpose of procuring manna, which is their condensed juice. In the Ph. U. S. it is assigned to the *Ornus Europæa.* Manna is inodorous, sweetish, with a very slight degree of bitterness; in friable flakes, of a whitish or pale yellow colour; opaque, and soluble in water and alcohol. It is a laxative, and is used as a purgative for children, who take it readily on account of its sweetness. More generally it is employed as an adjunct to other purgatives. Dose, ℥ss to ʒij. Its immediate principle is called *Mannite* or *Mannin.* This has been recommended by Magendie as a substitute for manna. Dose ʒij for children.

**FRAVINUS ROTUNDIFOLIA, F. ORNUS.**

**FRAYEUR NOCTURNE, Panophobia.**

FRECKLES, Ephelides.

FREEMAN'S BATHING SPIRITS, see Linimentum saponis compositum.

FREIN, Frænum—*f. du Clitoris*, Frænum clitoridis—*f. de la Langue*, Frænum linguae—*f. des Lèvres*, Frænum labiorum—*f. de la Vergé*, Frænum penis.

FREINS DE LA VALVULE DE BAUHIN, Fræna of the valve of Bauhin.

FREINWALDE, MINERAL WATERS OF. These springs are in Brandenburg, twelve leagues from Berlin. They contain chloride of sodium, sulphate of magnesia, muriate of magnesia, sulphate of lime, carbonates of lime and magnesia, iron, &c., and are used in asthenic diseases.

FRÉMISSEMENT, Shuddering.

FRÉMISSEMENT CATAIRE (F.), 'Cat's purr.' Laënnec has given this name to the agitation which is sensible to the hand, when applied on the præcordial region, and which he considers a sign of ossification or other contraction of the auriculo-ventricular openings. This name was chosen by him from the analogy of the sound to the purring of a cat.

FREMITUS, *Bruissement*, *Frémissement*, Shuddering.

The *Per toral* or *Vocal Fremitus* or *Pectoral Vibration* is an obscure diffused resonance of the voice, which is felt when the hand is applied to the chest.

FRENA, Alveolus.

FRÈNE, Fraxinus excelsior—*f. Épinosa*, Xanthoxylum clava Herculis.

FRENULUM, see Frænum.

FRENUM, Frænum.

FRET, Herpes.

FRÉTILLEMENT, Fidgets.

FRICATIO, Friction.

FRICATORIUM, Liniment.

FRICE, *Fricum*, *Friconium*. A medicine which the ancients employed under the form of friction. They distinguished the *Fricis sicca* and *F. mollis*—Gaubius.

FRICONIUM, Frice.

FRICTA, Colophonia.

FRICTIO, Friction—*f. Humida*, see Friction—*f. Sicca*, see Friction.

FRICITION, *Fric'tio*, *Fricatio*, *Anat'ribé*, *Anat'rip'sis*, *Trypsis*, *Chirap'sia*, from *fricare*, 'to rub.' The action of rubbing a part of the surface of the body more or less forcibly, with the hands, a brush, flannel, &c., constituting *Xerotrib'ia*, *Xerotrip'sis*, *Fric'tio sicca*, or *dry friction*; or with ointments, liniments, tinctures, &c., constituting *moist friction*, *Fric'tio hu'mida*. It is a useful means for exciting the action of the skin.

FRICITION SOUND, *Bruit de frottement*.

FRICTRIX, *Tribade*.

FRICTUM, Liniment.

FRICUM, Frice.

FRIGEFACIENTIA, Refrigerants.

FRIGID, *Frig'idus*, (F.) *Froid*: same etymon as Frigidity. Cold. Not easily moved to sexual desire. Impotent.

FRIGIDARIUM, Bath, cold.

FRIGIDITY, *Frig'iditas*, from *frigidum*, 'cold.' A sensation of cold. Also, impotence, and sterility. *Frigidity of the stomach* is a state of debility of that organ, imputed to excessive venery,—the *Anorexia exhaustivum* of Sauvages.

FRIGIDUS, Frigid.

FRIGORIFIC, from *frigus*, 'cold,' and *facio*, 'I make.' That which has the power of producing cold. The best FRIGORIFIC MIXTURES are the following. Their effects are owing to the rapid absorption of heat when solids pass into the liquid state.

FRIGORIFIC MIXTURES WITH SNOW.

<i>Mixtures.</i>		<i>Therm. falls.</i>	
Snow, or pounded ice,	two parts by weight;	From any temperature.	
Chloride of Sodium, - - -	1.		to—5°
Snow or pounded ice, - - -	5.		to—12°
Chloride of Sodium, - - -	2.		
Mur. of Ammonia, - - -	1.		to—18°
Snow or pounded ice, - - -	24.		
Chloride of Sodium, - - -	10.		to—25°
Muriate of Ammonia, - - -	5.		
Nitrate of Potash, - - -	5.		from+32°
Snow or pounded ice, - - -	12.		
Chloride of Sodium, - - -	5.		to—23°
Nitrate of Ammonia, - - -	5.		
Dilut. Sulph. Acid, - - -	2.		from+32°
Snow, - - -	3.		
Concentr. Mur. Acid, - - -	5.	to—27°	
Snow, - - -	8.		
Concentr. Nitrous Acid, - - -	4.	from+32°	
Snow, - - -	7.		
Chloride of Calcium, - - -	5.	to—30°	
Snow, - - -	4.		
Crystall. Chloride of Calcium, - - -	3.	from+32°	
Snow, - - -	2.		
Fused Potash, - - -	4.	to—50°	
Snow, - - -	3.		
		from+32°	
		to—51°	

Frigorific Mixtures may also be made by the rapid solution of salts, without the use of snow or ice. The salts must be finely powdered and dry.

FRIGORIFIC MIXTURES WITHOUT SNOW.

<i>Mixtures.</i>		<i>Therm. falls.</i>
Mur. of Ammonia, - - -	5.	from+50°
Nitrate of Potash, - - -	5.	
Water, - - -	16.	to—10°
Mur. of Ammonia, - - -	5.	from+50°
Nitrate of Potash, - - -	5.	
Sulphate of Soda, - - -	8.	to+10°
Water, - - -	16.	
Nitrate of Ammonia, - - -	1.	from+50°
Water - - -	1.	
Nitrate of Ammonia, - - -	1.	to+ 4°
Carbonate of Soda, - - -	1.	
Water, - - -	1.	from+50°
Sulphate of Soda, - - -	3.	
Dilut. Nitrous Acid, - - -	2.	to— 3°
Sulphate of Soda, - - -	6.	
Mur. of Ammonia, - - -	4.	from+30°
Nitrate of Potash, - - -	2.	
Dilut. Nitrous Acid, - - -	4.	to—10°
Sulphate of Soda, - - -	6.	
Nitrate of Ammonia, - - -	5.	from+50°
Dilut. Nitrous Acid, - - -	4.	
Nitrate of Ammonia, - - -	6.	to—14°
Dilut. Nitrous Acid, - - -	4.	
Phosphate of Soda, - - -	9.	from+50°
Dilut. Nitrous Acid, - - -	4.	
Phosphate of Soda, - - -	9.	to—12°
Nitrate of Ammonia, - - -	6.	
Dilut. Nitrous Acid, - - -	4.	from+50°
Sulphate of Soda, - - -	8.	
Muriatic Acid, - - -	5.	to— 0°
Sulphate of Soda, - - -	5.	
Dilut. Sulphuric Acid, - - -	4.	from+50°
		to— 3°

**FRIGUS**, Cold—*f. Tenue*, see *Rigor*.

**FRISSON**, Rigor.

**FRISSEMENT**, Horripilation.

**FROGLEAF**, *Braenia Hydropeltis*.

**FROG TONGUE**, *Ranula*.

**FROGS' SPAWN**, *Sperma ranarum*.

**FROID**, Cold, Frigid—*f. Glacial*, Ice-cold.

**FROISSEMENT**, (F.) 'Rubbing, bruising.'

**FROISSEMENT PULMONAIRE**. A name given by M. Fournet to a respiratory sound, which communicates to the ear the sensation of the rubbing (*froissement*) of a texture compressed against a hard body. It is by no means well defined.

**FRÔLEMENT**, (F.) 'Grazing or touching lightly.'

**FRÔLEMENT PÉRICARDIQUE**. Rustling noise of the pericardium. A sound resembling that produced by the crumpling of a piece of parchment or of thick silken stuff, accompanying the systole and diastole of the heart. It indicates roughness of the pericardium induced by disease.

**FROMAGE**, Cheese.

**FROMENT**, Triticum.

**FRONCEMENT**, Corrugation.

**FRONCLE**, Furunculus.

**FRONDE**, Funda.

**FRONT**, *Frons*, *Metopon*, Forehead, Brow.

That part of the visage, which extends from one temple to the other, and is comprised in a vertical direction, between the roots of the hair and the superciliary ridges.

**FRONTAL**, *Frontalis*. Relating or belonging to the front. This name has been given to several parts. Winslow, Sömmering, and others, call the anterior part of the occipito-frontalis—the *frontal muscle* or *frontalis*, *Musculus Frontis Cutem movens substantia Par* (Vesalius).

**FRONTAL ARTERY**, *A. supra-orbitalis*, is given off by the ophthalmic, which is itself a branch of the internal carotid. It makes its exit from the skull at the upper part of the base of the orbit, and ascends the forehead between the bone and the orbicularis palpebrarum; dividing into three or four branches, which are distributed to the neighbouring muscles.

**FRONTAL BONE**, *Os frontis*, *Os corona'le*, *Os inverson'dum*, *Metopon*, *Os pappis*, *Os Ratio'nis*. A double bone in the fetus, single in the adult, situate at the base of the cranium, and at the superior part of the face. It forms the vault of the orbit; lodges the ethmoid bone in a notch at its middle part; and is articulated, besides, with the sphenoid, parietal, and nasal bones, the ossa unguis, superior maxillary, and malar bones.

**FRONTAL FURROW** extends upwards from the frontal spine, and becomes gradually larger in its course, to lodge the upper part of the superior longitudinal sinus, and to give attachment to the falx cerebri.

**FRONTAL NERVE**, *Palpibro-frontal*—(Ch.) is the greatest of the three branches of the ophthalmic nerve,—the first division of the 5th pair. It proceeds along the superior paries of the orbit, and divides into two branches:—the one, *internal*, which makes its exit from the orbital fossa, passing beneath the pulley of the oblique muscle:—the other, *external*, issuing from the same cavity, by the foramen orbitarium superius.

**FRONTAL PROTUBERANCE**, *Frontal tuberosity*, *Tuber fronta'le*, *Suggrun'dium supercilio'rum*. The protuberance of the frontal bone above the superciliary arch.

**FRONTAL SINUSES**, *Frontales Sinus*, *Metopon'tra*, *Prosopon'tra*, *Sinus Supercilio'ros*, *S. punita'rii frontis*, *Caver'na frontis*, are two deep cavities in the substance of the frontal bone, separated from each other by a medium septum, and opening, below, into the anterior cells of the ethmoid bone.

**FRONTAL SPINE**, *Crista inter'na*, is situate in the middle of the under part of the bone, and is formed by the coalescence of the inner tables for the attachment of the falx cerebri.

Surgeons have given the name **FRONTALIA**, to a bandage or topical application to the forehead. Such have, also, been called, *τεμετωπιδία* and *ανακολληματα*.

**FRONTAL TUBEROSITY**, Frontal protuberance.

**FRONTA'LE**, from *frons*, 'the forehead.' A medicine applied to the forehead.

**FRONTALISET OCCIPITALIS**, Occipito-frontalis.

**FRONTALIS VERUS**, *Corrugator supercillii*.

**FRONTO-ETHMOID FORAMEN**, *Cæcum foramen*—*f. Nasal*, *Pyramidalis nasi*—*f. Sower-cilior*, *Corrugator supercillii*.

**FROSTBITE**, Congelation.

**FROSTWEED**, *Erigeron Philadelphicus*, *Helianthemum Canadense*.

**FROSTWORT**, *Helianthemum Canadense*.

**FROTHY**, from Gr. *αἴθος*, 'froth.' (?) *Spum'osus*, (F.) *Spumous*, *Ecumous*, *Moussous*. An epithet given to the sæces or sputa, when mixed with air.

**FROTTEMENT**, see *Bruit de frottement*.

**FROTTEMENT GLOBULAIRE**. A name given by M. Simonnet, to the pulse in aortic regurgitation, when it is jerking, and, in well marked cases, appears as if the blood consisted of several little masses, which passed in succession under the finger applied to the artery.

**FRUCTIFICATIO**, Fecundation.

**FRUCTUS HORÆI**, Fruit, (summer)—*L. Immaturus*, Abortion.

**FRUGIVOROUS**, *Frugiv'orus*, from *fruges*, 'fruits,' and *voro*, 'I eat.' One that eats fruits.

**FRUIT**, *Fructus*, from *frui*, 'to enjoy.' *Carpos*. In a medical sense it may be defined to be;—that part of a plant which is taken as food. The effects of fruits on the body, in a medical as well as a dietetical point of view, are various. They may be distinguished into classes: for, whilst the *Cerealia*, for example, afford fruits, which are highly nutritious, the *Summer Fruits* (*Fructus Horæi*), which include strawberries, cherries, currants, mulberries, raspberries, figs, grapes, &c. are refrigerant and grateful, but afford little nourishment.

**FRUMENTUM**, Triticum—*f. Corniculatum*, *Ergot*—*f. Cornutum*, *Ergot*—*f. Luxurians*, *Ergot*—*f. Temulentum*, *Ergot*—*f. Turgidum*, *Ergot*.

**FRUSTRATOIRE** (F.) Any liquor, taken a short time after eating, for the purpose of assisting digestion, when difficult. Sugared water, *sau sucrés*, or water with the addition of a little brandy, or some aromatic substance, is commonly used for this purpose.

**FRUTEX BACCIFER BRAZILIENSIS**, *Caa-ghivuyo*—*f. Indicus spinosus*, *Cara schulli*.

**FUCUS**, *F. vesiculosus*, Paint.

**FUCUS AMYLA'CEUS**, *Ceylon Moss*, *Marine*

*Moss.* This moss belongs to the natural order *Algae*. It was introduced some years ago into England, from India. It is white, filiform and fibrous, and has the usual odour of sea-weeds. Its medical properties are similar to those of Irish moss.

FUCUS, BLADDER, *F. vesiculosus*.

FUCUS CRISPUS, *Lichen Carrageen, Chondrus, Ch. crispus, Spharococcus crispus, Ulva crispa, Chondrus polymorphus, Irish moss, Carrageen or Corrigee moss, (F.) Moussé d'Islande, M. perlée*. This *Fucus*, of the Natural Family *Algae*, is found on the coast of England, Ireland, Western France, Spain, and Portugal, and as far as the tropics. It is also a native of the United States. In Ireland, it is used by the poor as an article of diet. As met with in America, it is of a light yellow colour, and resembles plates of horn, crisped and translucent. An agreeable jelly is obtained from it by boiling it in water or milk, which forms a good article of diet in consumptive cases. Its properties are indeed exactly like those of the *Iceland Moss*.

FUCUS HELMINTHO-CORTON, *Corallina Corsicana*—*f. Saccharine, Rhodomela palmata*.

FUCUS VESICULOSUS, *Quercus Mari'na, Fucus, Bladder Fucus, Sea Oak, Sea Wrack, Yellow Bladder Wrack, (F.) Varec vésiculeux, Chêne marin*. It has been said to be a useful assistant to sea-water, in the cure of disorders of the glands. When the wrack, in fruit, is dried, cleaned, exposed to a red-heat in a crucible with a perforated lid, and is reduced to powder, it forms the *Æthiops vegetabilis*—the *Pulvis Quercus Mari'nae* of the Dublin Pharmacopœia—which is used, like the burnt sponge, in bronchocele and other scrofulous swellings. Its efficacy depends on the iodine it contains. Dose, gr. x. to ℥ij, mixed in molasses or honey. See *Soda*.

FUGA DÆMONUM, *Hypericum perforatum*.

FUGA'CIOUS, *Fugax*, from *fugere*, 'to fly.' An epithet given to certain symptoms, which appear and disappear almost immediately afterwards; as a *fugacious redness*,—a *fugacious swelling*, *Tumor fugax*, &c.

FUGAX, *Fugacious*.

FUGE, from *fugo*, 'I expel,' 'an expeller.' A common suffix. Hence *Febrifuge*, *Vermifuge*, &c.

FU'GILE, *Fugilla*. This term has several acceptations. It means, 1. The cerumen of the ear. 2. The nebulous suspension in, or deposition from, the urine. 3. An abscess near the ear.—Ruland and Johnson. 4. Abscess in general.

FUGILLA, *Fugile*.

FULGUR, *Astrape*.

FULGI'NOUS, *Fuliginosus, Lignyo'des*, from *fuligo*, 'soot.' Having the colour of soot. An epithet given to certain parts, as the lips, teeth, or tongue, when they assume a brownish colour, or rather are covered with a coat of that colour.

FULIGO, *Lignys, Soot; (F.) Suis, &c. Wood soot, Fuligo Ligni*, consists of volatile alkaline salt, empyreumatic oil, fixed alkali, &c. A tincture, *Tinctura Fulig'inis*, prepared from it, has been recommended as a powerful antispasmodic in hysterical cases. (*Fulig. lign. ℥ij. potass. subcarb. ℞ss, ammon. muriat. ℥j. aqua fluviat. Oijj.* Digest for three

days.) This tincture bears the name *Soot drops* and *Fit drops*. An ointment of soot has been used in various cutaneous diseases.

FULIGO ALBA PHILOSOPHORUM, *Ammoniac murias*.

FULIGO'KALI, from *fuligo*, 'soot,' and *kali*, 'potassa.' This is an analogous preparation to *anthrakokali*; soot being used in the place of coal. It is employed in the same diseases. What might be regarded as a weak solution of fuligokali has been used for many years in Philadelphia, under the names *medical lye, soot tea, alkaline solution, and dyspeptic lye*.

FULLERS' EARTH, *Cimolia purpurescens*.

FULMEN, *Astrape*.

FULNESS, *Repletio, Plenitudo, Pletho'ra*. Also, a feeling of weight or distention in the stomach or other part of the system.

FUMARIA, *Fumaria officinalis, Fumaria terra, Capno, Herba melancholicifuga, Fumitory, Common Fumitory, Fumitoria, Solamen Scabiosorum, (F.) Fumeterre*. The leaves are extremely succulent, and have a bitter, somewhat saline, taste. The infusion of the dried leaves and the expressed juice of the fresh plant have been extolled for their property of clearing the skin of many disorders of the leprous kind.

FUMARIA BULBO'SA, *Aristolochia fabacea, Corydalis bulbosa, Capnorhiza*. The root of this plant was formerly given as an emmenagogue and anthelmintic. (F.) *Fumeterre bulbosa*.

FUMETERRE, *Fumaria*.

FUMIGATIO, *Fumigation*—*f. Antiloinica Gaubii, see Disinfection—f. Guytoniensis, see Disinfection—f. Smythiana, see Disinfection*.

FUMIGATION, *Fumigatio*, from *fumus*, 'smoke.' *Suffitus, Suffitio, Suffuminatio, Suffumig'ium, Suffumantum, Apocapsis'mus, Thymi'ama, Epithymi'ama, Hypothymi'ama, Hypothymi'asis, Thymi'asis, Capnis'mos, Hypocapsis'mos, Hypat'mus, Hypat'mis'mus, Anathymi'asis*, from *fumus*, 'smoke.' An operation, the object of which is to fill a circumscribed space with gas or vapour; with the intention either of purifying the air, of perfuming it, or of charging it with a substance proper for acting upon a part of the surface of the human body. Hence, fumigations have been distinguished into *aqueous, aromatic, sulphureous, mercurial, disinfecting, Guytonian, &c.* Benzoin generally constitutes the chief ingredient in the *Fumigating Pastilles*, to which any variety of odoriferous substances may be added. The following is one formula:

℞. *Benzoin, ℥j, cascarille ℥ss, myrrh. ℥j, ol. myrist., ol. caryoph. aa gtt. x, potassa nitrat. ℥ss, carbon. lign. ℥vj, mucil. trag. (q. s.).*

FUMIGATION, *Chlorenk, see Disinfection—f. Nitrous, see Disinfection—f. Oxymuriatic, see Disinfection*.

FUMITERRA, *Fumaria*.

FUMITORY, *Fumaria*.

FUMUS ALBUS, *Hydrargyrum—f. Citrinus, Sulphur—f. Terræ, Fumaria*.

FUNAMBULA'TIO, from *funis*, 'a cord,' and *ambulare*, 'to walk.' An exercise with the ancients, which consisted in scaling ropes.

FUNCTION, *Functio, Actio, (F.) Functio*; from *fungor*, 'I act,' 'perform.' The action of an organ or system of organs. Any act, necessary for accomplishing a vital phenomenon. A *function* is a special office in the animal

economy, which has as its instrument, an organ or apparatus of organs. Thus, *respiration* is a function. Its object is the conversion of venous into arterial blood, and its instrument is the lungs. The ancient physiologists divided the functions into *vital, animal, and natural*. They called *vital functions* those which are essential to life, as innervation, circulation, respiration; *animal functions*, those which belong to the encephalon; viz: the functions of the intellect, the affections of the mind, and the voluntary motions; and *natural functions, Facultates seu Actiones naturales*, those relating to assimilation, such as the actions of the abdominal viscera, of the absorbent and exhalant vessels, &c. Bichat divided the functions into those which relate to the preservation of the individual, and those that relate to the preservation of the species. The former he subdivided into *animal and organic*. The *animal functions or functions of relation* are those of the intellect, sensation, locomotion, and voice. The *organic functions* include digestion, absorption, respiration, circulation, secretion, nutrition, and calorification. The *functions*, whose object is the preservation of the species—the *organic, nutritive or vegetative functions*—are all those that relate to generation;—such as conception, gestation, accouchement, &c. Each of these admits of numerous subdivisions in a complete course of *Physiology*;—for so the doctrine of the functions is called.

**FUNDA, Sphen'odont, (F.) Fronde.** 'A bandage, composed of a fillet or long compress, cleft at its extremities to within about two inches of its middle. It is used in diseases of the nose and chin, and especially in cases of fracture of the lower jaw. In such case it has, also, been called *Mentonnière*, because placed beneath the chin; from (F.) *Menton*, 'the chin.'

**FUNDAMENT, Anus**—f. Falling down of the, Proctocele.

**FUNDAMENTAL, from fundare, 'to lie deeply.'** Some anatomists have called the sacrum *Os Fundamentale*, because it seems to serve as a base to the vertebral column. The *sphenoid bone* has, likewise, been so denominated, from its being situate at the base of the cranium.

**FUNDUS, (F.) Fond.** The base of any organ which ends in a neck, or has an external aperture; as the Fundus vesicæ, F. uteri, &c. Also, the Vulva.

**FUNDUS VAGINÆ, Laquear vaginæ.**

**FUNES CORDIS, Columnæ carnæ**—f. Semicirculares, Semicircular canals.

**FUNGIFORM PAPILLÆ, see Papillæ of the Tongue.**

**FUNGOID, Fungoides, Myco'des, Fungiformis, Fungiform, (F.) Fongoids, Fongiforme, from fungus, 'a mushroom,' and sidoc, 'resemblance.'** That which has the shape of, or grows in some measure like a mushroom, as the *fungoid or fungiform papillæ of the tongue*.

**FUNGOID DISEASE, Encephaloid.**

**FUNGOSITY, Fungositas, Curo luxurians, C. fungo'sa, Esaroc'na, Proud Flesh, Hypersaroc'na, Hypersaroc'itis, (F.) Fongosité.** The quality of that which is fungous:—fungous excrescence, *Excrescentia fungo'sa*. The fungosities which arise in wounds or ul-

cers, are easily repressed by gentle compression, dry lint, the sulphas cupri, or other gentle caustics. At times, the more powerful are necessary, and, sometimes excision is required.

**FUNGUS, Myces, (F.) Fongus, Champignon.** The mushroom order of plants; class Cryptogamia, in the Linnæan system. In *Pathology* the word is commonly used synonymously with fungosity, *myco'sis*. M. Breschet has proposed to restrict the term *fungosity* to vegetations which arise on denuded surfaces, and to apply the term *fungus* to the tumours which form in the substance of the textures, without any external ulceration. Fici, and warts, for example, would be fungi of the skin.

**FUNGUS ALBUS SALIGNEUS, Boletus suaveolens**—f. Articulii, Spina ventosa—f. Bleeding, Hæmatodes fungus—f. Cancrosus hæmatodes, Hæmatodes F.—f. Cancrosus medullaris, see Encephaloid—f. Cerebralis, see Encephaloid—f. Cerebri, Encephalocèle—f. Cynosbati, Bedeguar—f. Hæmatodes, Hæmatodes fungus—f. Ignarius, Boletus ignarius—f. Laricis, Boletus laricis—f. of Malta, Cynomorion coccineum—f. Medullaris, see Encephaloid—f. Melanodes, Melanosis—f. Melitensis, Cynomorion coccineum—f. Petrus marinus, Umbilicus marinus—f. Quercinus, Boletus ignarius—f. Rosarum, Bedeguar—f. Salicis, Boletus suaveolens—f. Sambucinus, Peziza auricula.

**FUNICULUS, Cord**—f. Spermaticus, Spermatic cord—f. Tympani, Chorda tympani.

**FUNICULUS UMBILICALIS, Fumis umbilicalis, Intestin'ulum, Vin'culum umbilical'e, Umbilical cord, Navel string, from Funis, 'a cord.'** (F.) *Cordon ombilicale*. A cord-like substance, which extends from the placenta to the umbilicus of the fœtus. It is composed of the chorion, amnion, an albuminous secretion called the *Jelly of the Cord*, cellular substance, an umbilical vein, and two umbilical arteries. The former conveys the blood from the placenta to the fœtus—the latter return it. All these parts are surrounded by a sheath—*Investitu'ra seu Vagi'na funiculi umbilicalis*. Its usual length is from 16 to 22 inches.

**FUNICULUS VARICOSUS, Cirrocèle.**

**FUNIS, Cord, Laqueus**—f. Argentæ, Medulla spinalis—f. Hippocratis, Achillis tendo—f. Umbilicalis, Funiculus umbilicalis.

**FUR, Enduit.**

**FURCELLA, Fur'cula; diminution of furca, 'a fork.'** The upper part of the sternum, the clavicle. The *Fourchette*.

**FURCELLA INFERIOR, Xiphoid cartilage.**

**FURCHMUEHL, MINERAL WATERS OF.** These Bavarian springs contain carbonic acid, sulphuretted hydrogen, carbonates of lime and soda; chlorides of lime and magnesium, oxides of iron and magnesium, &c.

**FURCILLA, Fourchette.**

**FURCULA, Furcella, Clavicle, Fourchette.**

**FUREUR UTÉRINE, Nymphomania.**

**FURFUR, Bran, Pit'ron, Ach'ron, Apobras'ma, Lemma, Cantabru'no, (F.) Son.** The decoction is sometimes employed as an emollient.

**FURFURA, Scarf.**

**FURFURACEOUS, from furfur, 'bran.'** *Scurfy, Canica'ceous, Pityri'nius, Pityroides, Pityro'des*. Resembling bran. A name given to eruptions, in which the epidermis is detached in small scales resembling bran. Also,

a bran-like sediment observed at times in the urine;—*Urina furfuracea, Sedimentum Urinae pityroides.*

**FURFURATIO**, Porrigo, Pityriasis.

**FURFURISCA**, Pityriasis.

**FURIA INFERNALIS**. A kind of vermiform insect, scarcely two lines long, common in Sweden, which flies about and stings both man and animals, exciting the most excruciating torture.

**FURIBUNDUS**, Maniodes.

**FURIOSUS**, Maniodes.

**FURIOUS**, Maniodes.

**FURNAS, MINERAL WATERS OF**. A thermal chalybeate water in St. Michael's, Azores, which contains carbonic acid, and carbonate of iron.

**FURONCLE**, Furunculus.

**FURONCLE GUÉPIER**. A malignant boil, *Wasp's nest boil*, which generally attacks the nape and region of the neck, and rarely others than old people. Hence it has been called *Old People's boil*.

**FUROR**, Mania—*f. Brevis*, Rage—*f. Mania*, Mania—*f. Uterinus*, Nymphomania.

**FURROW, MENTO-LABIAL**, see Mentolabial furrow.

**FURUNCULI ATONICI**, Ecthyma—*f. Ventriculus*, see Furunculus.

**FURUNCULUS**, from *furiare*, 'to make mad.' *Chi'adus, Chi'oti, Dok'son, Dok'hion,*

*Furuncululus suppuratorius, F. Verus, F. benignus, Phyma furuncululus, Abscessus nucleatus. A furuncle, a boil, a bila. (F.) Furuncle, Froncle, Clous. A small phlegmon, which appears under the form of a conical, hard, circumscribed tumour, having its seat in the dermoid texture. At the end of an uncertain period, it becomes pointed, white or yellow, and gives exit to pus mixed with blood. When it breaks, a small, grayish, fibrous mass sometimes appears, which consists of dead cellular tissue. This is called the *Core, Seifast, Ventruculus seu Nucleus Furunculi, (F.) Bourbillon*. The abscess does not heal until after its separation. The indications of treatment are,—to discuss by the application of leeches and warm fomentations;—or, if this cannot be done, to encourage suppuration by warm, emollient cataplasms. When suppuration is entirely established, the part may be opened or suffered to break, according to circumstances.*

**FURUNCULUS GANGRENEOSUS**, Anthrax—*f. Malignus, Anthrax.*

**FUSÉE PURULENTE**, (F.) The long and sinuous route, which pus takes, in certain cases, in making its way to the surface. These *Fusées* almost always form beneath the skin between the muscles; or along aponeuroses, bones, tendons, &c.

**FUSEL OIL**, see Oil, Fusel.

**FUSTIC TREE**, *Cladrastis tinctoria.*

**FUTUTOR**, Tribade.

## G.

The Greek Γ, γ, with the ancient Greek physicians, signified an ounce.—Rhod. ad Scribonium.

**GABALLA**, Cabal.

**GABELLA**, Mesophryon.

**GABIR'EA**, γαβίρα. A fatty kind of myrrh, mentioned by Dioscorides.

**GÆOPHAGIA**, Geophagism.

**GÆOPH'AGUS**, from γαία, 'earth,' and φαγεῖν, 'I eat.' One who eats earth.

**GAGEL**, Myrica gale.

**GAGUE SANG**, *Caque-sang.*

**GAHET**, *Cagot.*

**GAJAC**, Guaiacum.

**GAILLET ACCROCHANT**, Galium aparine—*g. Crochant*, Galium aparine—*g. Jaune*, Galium verum—*g. Vrai*, Galium verum.

**GAÏNE**, Vagina or sheath—*g. de l'Apophyse styloïde*, Vaginal process of the temporal bone—*g. de la veine porte*, Vagina or sheath of the vena porta.

**GALA**, γαλα, genitive γαλακτος, milk; hence: **GALACTACRA'SIA**, from γαλα, 'milk,' and ακρασία, 'imperfect mixture.' A morbid mixture or constitution of the milk.

**GALACTACRATIA**, Galactia.

**GALACTAGOGA**, Galactopoietica.

**GALACTAPOSTEMA**, Mastodynia apostematosa.

**GALACTIA**, *Galactirrhœa, Galactorrhœa*, from γαλα, 'milk.' *Lactis redundantia, Polygalactia, Galactosœmia*. A redundant flow of milk, either in a female who is suckling, or in one who is not. It may occur without being provoked by suckling. When to a great extent,

it sometimes causes wasting; *Tabes lactea, T. nutritivum*. Dr. Good uses *Galactia*, in his Nosology, for 'morbid flow or deficiency of milk,' *Galactœrati'a.*

**GALACTICUS**, Lactic.

**GALACTIFER**, Galactophorous.

**GALACTINE**, Casein.

**GALACTINUS**, Lactic.

**GALACTIRRHœA**, Galactia.

**GALACTIS**, Galaxias.

**GALACTIS'CHESIS**, *Galactos'chesis, Lactis retentio*, from γαλα, 'milk,' and ἔχειν, 'to restrain.' Retention or suppression of milk.

**GALACTITES**, Galactis.

**GALACTOCATARACTA**, Cataract, (Milky.)

**GALACTODES**, from γαλα, 'milk,' and εἶδος, 'resemblance.' In Hippocrates, the term signifies milkwarm, and likewise a milky colour, as of the urine—*urina galactodes.*

**GALACTODIÆTA**, *Diæta lactea*, from γαλα, 'milk,' and διαίτα, 'diet.' A milk diet.

**GALACTODIARRHœA**, Coeliac Flux.

**GALCTOGANGLION**, Milk knot.

**GALACTOHÆMIA**, *Galactœhœmia*, from γαλα, 'milk,' and αἷμα, 'blood.' *Lactis sanguinolenti Excretio*. The secretion of bloody or bloodlike milk.

**GALACTOMASTOPARECTOMA**, Mastodynia apostematosa.

**GALACTOM'ETER**, *Lactom'eter*, from γαλα, 'milk,' and μέτρον, 'measure.' An instrument for appreciating the quantity of cream in milk. It is a kind of graduated separatory or *éprou-*

*ωπτε*,—the degrees on the scale indicating the thickness of the layer of cream that forms on the surface of the milk.

**GALACTONCUS**, *Tumor lacteus*, from *γαλα*, 'milk,' and *ογκος*, 'a swelling.' A milk tumour.

**GALACTOPHAGOUS**, *Galactophagus*, *Lactivorus*, sometimes used substantively; from *γαλα*, 'milk,' and *φαγω*, 'I eat.' That which feeds on milk. A name given to certain people, with whom milk appears to constitute the chief nourishment.

**GALACTOPHORA**, *Galactopoietica*.

**GALACTOPHOROUS**, *Galactifer*, *Lactifer*, *Lactiferous*, from *γαλα*, 'milk,' and *φερω*, 'I carry.' That which carries milk.

**GALACTOPHOROUS OF LACTIFEROUS DUCTS**, are those which convey the milk, secreted by the mammary gland, towards the nipple, where their external orifices are situate. The *Lacteals* have also been so called.

**GALACTOPHORUS**. Some accoucheurs have given this name to an instrument intended to facilitate sucking, when the faulty conformation of the nipple prevents the child from laying hold of it.

**GALACTOPHYGUS**, from *γαλα*, 'milk,' and *φυγω*, 'to shun.' That which arrests or disperses the secretion of milk. Hence *Galactophyga Medicamenta*.

**GALACTOPLANIA**, *Metastasis seu Aberratio seu Vix extrahenda lactis*, *Galactorrhæa erronea*, from *γαλα*, 'milk,' and *πλανη*, 'wandering.' Extravasation of milk into the cellular membrane. Secretion of milk elsewhere than from the breasts.

**GALACTOPLEROSIS**, from *γαλα*, 'milk,' and *πληρωσις*, 'repletion.' Redundance of milk.

**GALACTOPOEA**, *Galactopoietica*.

**GALACTOPOESIS**, *Galactopoiesis*.

**GALACTOPOESIS**, *Galactosis*.

**GALACTOPOIETICA**, *Galactophora*, *Galactoga*, *Galactopora*, from *γαλα*, 'milk,' and *ποιω*, 'I make.' Substances, to which has been attributed the property of favouring the secretion of milk and augmenting its quantity.

**GALACTOPOSIA**, from *γαλα*, 'milk,' and *ποσις*, 'drink.' The drinking of milk. Treatment of a disease by means of milk.

**GALACTOPOTES**, *Galactopotus*, *Lactipotor*. Same etymon. A drinker of milk. One subjected to a milk diet.

**GALACTOPYRA**, Fever, milk.

**GALACTOPYRETUS**, Fever, milk.

**GALACTORRHEA**, *Galactia*—g. *Erronea*, *Galactoplasia*—g. *Saccharata*, *Saccharorrhæa lactea*.

**GALACTOSACCHARUM**, *Saccharum lactis*.

**GALACTOSCHESIS**, *Galactischesis*.

**GALACTOSIS**, *Galactopoesis*, *Galactopoesia*, *Secretio lactis*, from *γαλακτοιμαι*, 'I am changed into milk.' The secretion or formation of milk.

**GALACTOTROPHE**, *Galactotrophia*, from *γαλα*, 'milk,' and *τροφη*, 'nourishment.' Nourishment by means of milk.

**GALACTOZEMIA**, from *γαλα*, 'milk,' and *ζαμια*, 'loss.' Loss of milk. Also, *Galactia*.

**GALACTUCHOS**, from *γαλας*, 'milk,' and *χρησις*, 'to have.' Suckling. Giving milk.

**GALACTURIA**, *Chyluria*.

**GALANGA**, *Maranta galanga*.

**GALANGAL**, *Maranta galanga*.

**GALANGALE**, *Cyperus longus*.

**GALARIPS**, *Allamanda*.

**GALAXIA**, *Thoracic duct*.

**GALAXIAS**, *Galactites*, *Galactis*. A milk stone. A stone supposed to be capable of promoting the secretion of milk.

**GALBANUM**, see *Bubon galbanum*—g. *Long-leaved*, *Bubon galbanum*.

**GALBULUS**, from *galbus*, 'yellow.' A kind of congenital jaundice, in which the yellow colour continues through life. It is rather a defect in colour than a disease.—*Vogel*.

**GALE**, *Myrica gale*—g. *Odorant*, *Myrica gale*—g. *Sweet*, *Myrica gale*.

**GALE**, *Psora*—g. *Canina*, *Psoriasis*—g. *Épidémique*, *Eczema*—g. *Militaire*, *Psoriasis*—g. *Sèche*, *Lichen*, *Psoriasis*.

**GALEA**. A helmet, from *γαλη*, 'a cat;' of the skin of which it was formerly made. A name given to the *amios*, and also, to the *bandage of Galen*. In *Pathology*, it indicates a headache affecting the whole head. See, also, *Caul*.

**GALEA APONEUROTICA CAPITIS**, *Galea tendinea Santorini*, *Galea capitis*, *Membra na epicrania*. The tendinous expansion, which unites the frontal and occipital portions of the occipito-frontalis muscle.

**GALEAMAUROSIS**, *Amaurotic cat's eye*.

**GALEANCON**, *Galiancon*, from *γαλας*, 'a cat,' 'a weasel,' and *αυρα*, 'an elbow.' *Mus-telænus*. One who has two short arms.

**GALEANTHROPY**, *Galeanthropia*, from *γαλη*, 'a cat,' and *ανθρωπος*, 'a man.' A variety of melancholy in which the patient believes himself changed into a cat. An affection similar to lycanthropy and cynanthropy.

**GALEGA OFFICINALIS**, *Galega*, *Ruta capraria*, *Goat's rue*, (F.) *Rus de chèvre*, *Faux Indigo*. It is slightly aromatic, and was once used as a sudorific and alexiterial, in malignant fevers, &c.

**GALEGA VIRGINIANA**, *Tephrosia Virginiana*, *Turkey pea*, *Virginia Goat's rue* or *cat gut*, is used in some parts of the United States as an anthelmintic. The decoction of the root is given.

**GALENE**, *Graphites*.

**GALENEA**, *Graphites*.

**GALENIC**, *Galenical*, *Galenicus*, *Galenus*, from *Galenus*. That which relates to the doctrine of Galen or to Galenism. Used, substantively, for drugs that are not chymical.

**GALENIC MEDICINE**, *Galenism*.

**GALENISM**, *Galenic medicine*. The doctrine of Galen.

**GALENIST**, *Galenista*, *Galenistes*. A follower of the doctrine of Galen.

**GALENIUS**, *Galenic*.

**GALEOBDOLON**, *Galeopsis*.

**GALEOPDOLON**, *Galeopsis*.

**GALEOPSIS**, *Lanium album*.

**GALBOPSIS**, *Galiopsis*, *Galeobdolon*, *Galeopdolon*, *Lanium rubrum*, *Urtica iners magna fatidisima*, *Stachys fatida*, *Hedge nettle*, (F.) *Urtica mortis des bois*. This plant was formerly reckoned a vulnerary and anodyne.

**GALBOPSIS GRANDIFLORA**, *G. Ochroleuca*, *G. Segutum*, *Herba Sideritidis*. This plant is regarded in Germany as a bitter resolvent. It is the basis, also, of a celebrated nostrum, the *Blankenheimer Tea*, called, likewise, *Lieber's pectoral and phthisical herbs* (*Liebersche*

Brust oder Auszehrungs-Krauter), which has enjoyed great repute in pectoral complaints. The tops of the plant are given in decoction, (3j), boiled in a pint of water for a quarter of an hour.) This quantity to be taken in a day.

GALEOP'SIS VERSICOLOR, and G. VILLOSA, are possessed of the same virtues.

GALEOPSIS OCHROLEUGA, G. grandiflora—g. Segetum, G. grandiflora.

GALEROPIA, Oxypora.

GAL'IA. An ancient composition, in which galls were an ingredient; the *Galía pura*. There was, also, a *Galía aromática*, *moschata* vel *muscata*, which consisted of a mixture of several perfumes, such as musk.

GALIANCON, Galeancon.

GALIOPSIS, Galeopsis.

GALIP'EA FEBRIFUGA, *Cusparia febrifuga*—g. OFFICIALIS, see *Cusparia febrifuga*.

GALIPOT, see *Pinus sylvestris*.

GAL'LIUM, (from γάλα, 'milk,' because some species curdle milk.) G. verum.

GALUUM ALBUM, G. Mollugo.

GAL'LIUM APARINÉ, *Apariné*, *Lappa*, *Philanthropus*, *Ampelocarpus*, *Omphalocarpus*, *Ixus*, *Asphariné*, *Asperula*, *Goose-grass*, *Cleaver's heels*, *Cleavers*, *Goose-shars*, *Hayrif*. Family, Rubiaceæ. Sex. Syst. Tetrandria Monogynia. (F.) *Gaillet acrochant*, *G. crochant*, *Grateron*. The expressed juice has been given as an aperient diuretic in incipient dropsies; also, in cancer.

GALUUM LUTEUM, G. verum.

GALUUM MOLLUGO, *Galsium album*, *Greater ladies' bed-straw*, *Alyssum Plinii*, (F.) *Cailletait blanc*. The herb and flowers have been used, medicinally, in epilepsy.

GAL'LIUM TINCTORUM, an American species, closely allied in properties to G. verum.

GAL'LIUM VERUM, *Galium*, *G. luteum*, *Ladies' bed-straw*, *Cheese-remat*, *Bed-straw*, *Cleavewort*, *Goose-grass*, *Savoyan*, *Clabber-grass*, *Milk sweet*, *Poor Robin*, *Gravel-grass*, (F.) *Gaillet jaune*, *G. vrai*, *Vrai Cailletait*. The tops were used in the cure of epilepsy. The leaves and flowers possess the property of curdling milk.

GALL, Bile, Glass, see *Eczema Impetiginodes*, *Quercus infectoria*, and *Vitrum*—g. of the Earth, *Prenanthes*—g. Nut, see *Quercus infectoria*—g. of the Ox, see Bile—g. Sickness, Fever, *Walcheren*—g. Turkey, see *Quercus infectoria*.

GALL-BLADDER, *Vesicula fellis*, *Cholecyst*, *Cholecystis*, *Follie'ula fellis*, *Cystis fellis*, *Vesica fellis*, *Vesicula bilis*, *Vesica bilis*, *Follie'ulus fellis*, *Cystis choleo'achus*, (F.) *Vésicule du fel* ou *Vésicule biliaire*, *Réservoir de la bile*. A membranous, pyriform reservoir, lodged in a superficial depression at the inferior surface of the right lobe of the liver. It receives, by the hepatic and cystic ducts, a portion of the bile secreted by the liver, when the stomach is empty, which becomes in it more acrid, bitter, and thick. It receives an artery called the  *cystic*. Its veins empty into the vena porta. Its nerves come from the hepatic plexus, and its lymphatic vessels join those of the liver.

GALLA, see *Quercus infectoria*—g. Maxima Orbiculata, see *Quercus infectoria*.

GALLÆ QUERCUS, see *Quercus infectoria*—g. Tinctoria, see *Quercus infectoria*—g. Turcica, see *Quercus infectoria*.

GALLATURA, Molecule.

GALLI GALLINACEI CAPUT, *Gallina'nis caput*.

GALLINAG'INIS CAPUT, *Galli gallina'cei Caput*, *Caput gallina'ceum*, *Verumontanum*, *Crista urthralis*, *Crête urthrale*,—(Ch.,) from *Gallinago*, 'a woodcock.' An oblong, rounded, projection, formed by the mucous membrane in the spongy portion of the urethra, at the sides of which the ejaculatory ducts open.

GAL'LIPOT. Perhaps from *gala*, 'finery.'

(?) A pot painted and glazed or merely glazed, and commonly used to hold medicines.

GALLITRICHUM, *Salvia sclarea*.

GALLSTONES, *Calculi*, biliary.

GALLUS, Eunuch.

GALREDA, Gelatin.

GALVANISM, *Galvanis'mus*, *Electric'itas zymalia*, *E. Galvan'ica* vel *metal'lica*, *Irritamentum metallicum vel metallicum*, *Vol'taism*, *Vol'taic Electric'ity*. A series of phenomena, consisting in sensible movements, executed by animal parts, which are endowed with irritability, when placed in connexion with two metallic plates of different nature, between which a communication is established by direct contact or by means of a metallic wire. Galvanism has been employed medicinally in the same cases as electricity, and especially in neuralgic affections. It is often applied in the form of plates,—“Mansford's plates.” In asthma, for example, a small blister, the size of a dollar, may be placed on the neck over the course of the phrenic and pneumogastric nerves, and another on the side in the region of the diaphragm. One metal is placed mediately or immediately over the vesicated surface on the neck, and another over that in the side. They are then connected by means of a wire. The new nervous impression, in this way induced, is often signally beneficial.

GALVANOPUNCTURE, Electropuncture.

GAMBA, Patella.

GAMBARUS, Crab.

GAMBIER, see *Nauclia gambir*.

GAMBOGIA, Cambogia.

GAMMARUS, Crab.

GAMMATA FERRAMENTA. Cauteries, having the shape of the Greek letter Γ; which were used for cauterizing hernias.

GAMMAUT. The Italians, according to Scultetus, gave this name to a kind of crooked bistouri, used for opening abscesses.

GAMMISMUS, Psammismus.

GAMPHE, Gena.

GAMPHELE, Gena, Maxillary Bone.

GANGAME, Epiploon.

GANGAMUM, Epiploon.

GANGLIA CEREBRI POSTICA, Thalami nervorum optico'rum—g. Nervorum, Ganglions, nervosis, see *Ganglion*—g. Sensory, see *Sensory ganglia*.

GANGLIAR, Ganglionic.

GANG'LIFORM, *Gang'lioform*, *Gangli'iformis*. Having the shape of a ganglion. A name generally given to a knot-like enlargement, in the course of a nerve.

GANGLI'OLUM, Diminutive of ganglion. A small ganglion.

GANG'LION, *Gang'lium*, 'a knot.' A name given to organs differing considerably from each other in size, colour, texture, functions, &c. They are divided into *glandiform*, *lym-*

*phatic*, and *nervous*. 1. *Glandiform ganglions*, called also *adenoid*, *vascular*, and *sanguinous ganglions*, *blind glands*, *aporic glands*, *glandula spuria*, &c., are organs of whose functions we are, in general, ignorant; and which have the appearance of glands. They are formed of agglomerated globules, pervaded by blood-vessels, surrounded by cellular membrane, and contain a milky or yellowish fluid. To this class belong the thymus, thyroid, and supra-renal glands. 2. *Lymphatic ganglions*. See Conglobate. 3. *Nervous ganglions*, *Ganglia seu Nodi seu Noduli Nervorum*, *Ganglionae*, *Tumores seu Plexus ganglioformes*, *Plexus glandiformes*, *Tubercula nodosa Nervorum*, *Diverticula spiritalia animalium*. Enlargements or knots in the course of a nerve. They belong, in general, to the system of the great sympathetic. One, however, exists on the posterior root of every spinal nerve, and on one cerebral,—the 5th. Bichat regarded them as so many small brains, or centres of nervous action, independent of the encephalon, and intended exclusively for organic life. Being formed by the union of the cerebral and spinal nerves, they may send out the influence of both these nervous centres to the parts to which the nerves proceeding from them are distributed. We know not, however, their precise uses, although it is probable that they may be connected with the nutrition of the part, on which the nerves proceeding from them are dispersed.

**GANGLION**. Same etymon. *Emphyma encystis ganglion*. A globular, hard, indolent tumour, without change in the colour of the skin; of a size varying from that of a pea, to that of an egg, and always situate in the course of a tendon. The tumour is formed of a viscid, albuminous fluid, contained in a cyst of greater or less thickness. The cyst is sometimes loose; but in the majority of cases it communicates, by a narrow footstalk, with the sheath of a tendon, or even with the synovial capsule of a neighbouring articulation. The causes are generally unknown. The treatment consists in compression, percussion, the use of discutients, extirpation, or incision.

**GANGLION ABDOMINALE**, *G. semilunare-g.* Adenoid, *G. glandiform-g.* of Andersch, Petros ganglion—*g.* Annular, see Ciliary ligament—*g.* Auricular, *Oticum G.-g.* Azygous, see Trisplanchnic nerve—*g.* Cardiac, Cardiac plexus—*g.* Cerebelli, *Corpus dentatum-g.* Cerebri Anterioris, *Corpora striata-g.* Cerebri inferioris, *grand*, *Thalami nervorum optico-rum-g. du Corvulet*, *Corpus dentatum-g.* Ciliare, *Corpus dentatum-g.* Ciliary, *Ophthalmic ganglion.*

**GANGLION OF EHRENREITER**, *Ganglion nervi glosso-pharyngei superioris*, *G. jugularis superioris*, *G. Ehrenritteri seu Mulleri*. A reddish-gray mass on the glosso-pharyngeal nerve in the foramen lacerum, above the ganglion of Andersch.

**GANGLION OF GASSER**, *Gan'glium seu Ganglion Gasseri*, *Moles gangliiformis*, *Intumescencia gangliiformis seu semilunaris*. A semicircular knot on the 5th pair of nerves, before its division into three branches.

**GANGLION, GLANDIFORM**, see *Ganglion-g.* *Impar*, see Trisplanchnic nerve—*g.* *Jugulare Superius*, *G. of Ehrenritter-g.* *Laitous*, Milk-

*knot-g.* *Lenticular*, *G. ophthalmic-g.* *Lymphatic*, *Conglobate gland-g.* *Maxillo-sympathique*, *Oticum G.-g.* of Meckel, *Spheno-palatine G.-g.* Mulleri, *G. of Ehrenritter-g.* *Nasopalatine*, see *Nasopalatine ganglion-g.* *Nervi glosso-pharyngei superioris*, *G. of Ehrenritter-g.* *Ophthalmic*, see *Ophthalmic ganglion-g.* *Optic*, *Quadrigenina tubercula-g.* *Orbital*, *G. ophthalmic-g.* *Oticum*, *Oticum G.-g.* *Petrosal*, see *Petros ganglion.*

**GANGLION OF THE PNEUMOGASTRIC**. A ganglionic structure in the pneumogastric as it passes through the foramen lacerum posterius.

**GANGLION OF RIBES**. A nervous ganglion said to exist upon the anterior communicating artery of the brain, and to be found at the point of junction of the right and left trunks of the sympathetic.

**GANGLION SANGUINEOUS**, *G. glandiform-g.* *Sensory*, see *Sensory ganglia-g.* *Solare*, *G. semilunare-g.* *Sphenoidal*, *Sphenopalatine ganglion-g.* *Splanchnicum*, *G. semilunare-g.* *Superior du cerveau (grand)*, *Corpora striata-g.* *Surrenal*, *G. semilunare-g.* *Transversum*, *G. semilunare-g.* *Vascular*, *G. glandiform-g. de Vieussens*, *Cœliac plexus.*

**GANGLIONARY, Ganglionic.**

**GANGLIONES GANGLIOFORMES**, *Ganglions*, *nervous.*

**GANGLIONIC**, *Ganglion'icus*, *Ganglionary*, *Gangliar*. Relating to ganglia. Nerves are so called in the course of which ganglions are met with; as the greater part of the branches of the great sympathetic or trisplanchnic, the posterior roots of the spinal nerves, &c.

**GANGLIONIC NERVE**, *Trisplanchnic nerve.*

**GANGLIONITIS**, *Gangli'itis*, from *γανγλιον*, 'a ganglion,' and *itis*, denoting inflammation. Inflammation of a nervous ganglion. Sometimes used for inflammation of a lymphatic ganglion.

**GANGLIONITIS PERIPHERICA et MEDULLARIS**, *Cholera.*

**GANGLIUM**, *Ganglion-g.* *Gasseri*, *Ganglion of Gasser.*

**GANGRÆNA ALOPECIA**, *Alopecia-g.* *Caries*, *Caries-g.* *Nosocomiorum*, *Hospital gangrene-g.* *Oris*, *Cancer aquaticus-g.* *Ossis*, *Spina ventosa-g.* *Ossium*, *Caries-g.* *Pottii*, see *Gangrene-g.* *Pottii*, *Gangrene of old people-g.* *Pulmonum*, *Necropneumonia-g.* *Senilis*, *Gangrene of old people-g.* *Sphacelus*, *Sphacelus-g.* *Tonsillarum*, *Cynanche maligna-g.* *Ustilagineæ*, *Ergotism-g.* *Vaginæ*, *Colpocæ.*

**GANGRÆNESCENTIA**, *Gangrenosis.*

**GANGRÆNICUS**, *Gangrenous.*

**GANGRÆNODES**, *Gangrenous.*

**GANGRÆNOPSIS**, *Cancer aquaticus*; also, *gangrenous inflammation of the eyelids.* *Blepharitis gangrenosa.*—Siebenhaar.

**GANGRÆNOSIS**, *Gangranosencia*, from *γανγαίρα*, 'gangrene.' The state of being gangrenous or of becoming gangrenous.

**GANGRÆNOSUS**, *Gangrenous.*

**GANGRENE**, *Gangræ'na*, *Cancers'na*, *Hot mortification*, (*F.*) *Gangrène*, *G. Chaudè*, *Asphyxis des parties*. Privation of life or partial death of an organ. Authors have generally distinguished mortification into two stages; naming the first *incipient* or *gangrène*. It is attended with a sudden diminution of feeling in the part affected; livid discoloration; detach-

ment of the cuticle, under which a turbid fluid is effused; with crepitation, owing to the disengagement of air into the cellular texture. When the part has become quite black, and incapable of all feeling, circulation, and life, it constitutes the *second stage*, or *mortification*, and is called *sphac'olus*. Gangrene, however, is frequently used synonymously with mortification,—*local asphyxia* being the term employed for that condition, in which the parts are in a state of suspended animation, and, consequently, susceptible of resuscitation. When the part is filled with fluid entering into putrefaction, the affection is called *humid gangrene*, (F.) *Gangrène humide*: on the other hand, when it is dry and shrivelled, it constitutes *dry gangrene*; (F.) *Gangrène sèche*. To this class belongs the *gangræna senilis*, *G. Pot'ii*, *Presbyosphac'olus*, or *spontaneous gangrene* of old people, which rarely admits of cure. Whatever may be the kind of gangrene, it may be caused by violent inflammation, contusion, a burn, congelation, the ligature of a large arterial trunk, or by some internal cause unappreciable to us.

The treatment, both of external and internal gangrene, varies according to the causes which produce it. Gangrene from excessive inflammation is obviated by antiphlogistics; and that from intense cold by cautiously restoring the circulation by cold frictions, &c. When the gangrene has become developed, the separation of the eschars must be encouraged by emollient applications, if there be considerable reaction; or by tonics and stimulants if the reaction be insufficient.

GANGRENE OF THE LUNGS, Necropneumonia.

GANGRENE DE LA BOUCHE, Cancer aquaticus—*g. Chauds*, Gangrene—*g. Froide*, Sphacelus—*g. Humide*, see Gangrene—*g. Sèche*, see Gangrene—*g. Hôpital*, Hospital gangrene—*g. du Poupon*, Necropneumonia—*g. des Solonies*, Ergotism.

GANGRENOUS, *Gangrænicus*, *Gangranosus*, *Gangranosus*. Affected with or relating to gangrene.

GANJAH, Gunjah.

GANTELET (F.), *Chirotheca*, *Fascia digitalis*, *Gannetlet*; from (F.) *gant*, a glove. A sort of bandage, which envelops the hand and fingers, like a glove. It is made with a long roller, about an inch broad; and is applied so that the fingers are covered to their tips, when it is called *Gantelet entier* ou *complet*. The *Demi-gantelet* includes only the hand and base of the fingers. Both bandages are used in fractures and luxations of the fingers, burns of the hand, &c. See *Chirotheca*.

GANTS DES DAMES, Condom—*g. de Notre Dame*, Digitalis.

GAPING, Yawning.

GARANÇE, Rubia.

GARCINIA MANGOSTANA. The systematic name of the *Mangostan* or *Mangoustan tree*, *Mangostana*. It grows in great abundance in Java and the Molucca islands. The fruit, which is about the size of an orange, is delicious, and is eaten in almost every disorder. The dried bark is used medicinally in dysentery and tenesmus; and a strong decoction has been much esteemed in ulcerated sore throat.

GARDE-MALADE, Nurse.

GARDEROBE, Artemisia brotanium.

GARDEROBES, Fæces.

GARDOUCHES, Vesiculae seminales.

GARETUM, Poples.

GARGALISMUS, Gargalus.

GARGALOS, Gargalus.

GARGALUS, *Gargale*, *Gargalis'mus*, *Titillatio*, *Irritatio*, *Pruritus*. Titillation, irritation, itching. Also, masturbation; and, rarely, animal magnetism.

GARGARON, Uvula.

GARGARISATIO, Gargarism.

GARGARISM, *Gargaris'mus*, *Gargaris'ma*, *Anagargalic'ion*, *Gargaris'mum*, *Collut'io*, *Dialys'ma*, *Anagargaris'ion*, *Anagargarism'us*, *Anaconchylis'mus*, *Anaconchylis'mus*, *Titillamentum*, from *γαργαρίζω*, 'I wash the mouth.' A gargle. Any liquid medicine, intended to be retained in the mouth, for a certain time, and to be thrown in contact with the uvula, velum pendulum, tonsils, &c. For this purpose, the liquid is agitated by the air issuing from the larynx, the head being thrown back. Gargles are employed in cynanche tonsillaris and other diseases of the fauces, and are made of stimulants, sedatives, astringents, refrigerants, &c., according to circumstances.

The process is termed *gargling*, *gargarisatio*.

The term *collut'orium* or *collutorium oris* is generally restricted to a wash for the mouth.

GARGE, *Phytolacca decandra*.

GARGLE, Gargarism.

GARGLING, see Gargarism.

GARGUILLEMENT, Borborygmus, Gurgling. See *Rôle muqueux*.

GARLIC, *Allium*—*g. Hedge*, *Alliaria*.

GAROSMUM, *Chenopodium vulvaria*.

GAROU BARK, *Daphne gnidium*.

GARRETUM, Poples.

GARROPHYLLUS, *Eugenia caryophyllata*.

GARROT (F.), from *garrotter*, 'to tie fast.'

A small cylinder of wood, used for tightening the circular band, by which the arteries of a limb are compressed, for the purpose of suspending the flow of blood in cases of hemorrhage, aneurism, amputation, &c.

GARROTILLO, *Cynanche maligna*.

GARULITAS, Loquacity.

GARUM, *garov*. The ancient Romans gave this name to a kind of pickle made by collecting the liquor which flowed from salted and half putrefied fish. It was used as a condiment.—The *Geoponics*, Humelberg on Apicius, Martial, &c.

GAS, see Gaz—*g. Ammoniacale*, *Ammonia*—*g. Animale sanguinis*, *g. sanguinis*—*g. Azoticum*, *Azote*—*g. Azoticum oxygenatum*, *Nitrogen*, *gaseous oxide* of—*g. Hepaticum*, *Hydrogen*, *sulphuretted*—*g. Hydrogenium sulphuretum*, *Hydrogen*, *sulphuretted*—*g. Intoxicating*, *Nitrogen*, *gaseous oxide* of—*g. Laughing*, *Nitrogen*, *gaseous oxide* of—*g. of the Lungs*, *Gas*, *pulmonary*—*g. Nitrous*, *dephlogisticated*, *Nitrogen*, *gaseous oxide* of—*g. Oxygenated muriatic acid*, *Chlorine*—*g. Oxymuriatic acid*, *Chlorine*—*g. Palustre*, *Miasm*, *marsh*—*g. Paradise*, *Nitrogen*, *gaseous oxide* of—*g. Sulphuris*, *Sulphurous acid*.

GASCARILLA, *Croton cascarrilla*.

GASTEIN, MINERAL WATERS OF. Gastein is in the Noric Alps, Austria. The waters are thermal. Temp. 106° to 118° Fah.

GASTER, *γαστήρ*. The abdomen. At times, but rarely, the uterus. Also, the stomach, in particular; Hence:

**GASTERALGIA**, Gastralgia.

**GASTERANAX**. A name given by Dolæus to a hypothetical vital principle, corresponding to the Archæus of Van Helmont, the seat of which he placed in the lower belly. See *Bithimalca*.

**GASTERANGEMPHRAXIS**, *Gasterangemphraxis*.

**GASTERANGIEMPHRAXIS**, *Gasterangemphraxis*, *Gasteromphraxis*. Obstruction of the pylorus, from γαστήρ, 'stomach,' ἀγχο, 'I strangle,' and ἰμπερασσω, 'I obstruct.'—Vogel. Also, and properly, obstruction or congestion in the vessels of the stomach.

**GASTERASE**, Pepsin.

**GASTERASTHENIA**, *Imbecillitas* seu *Atomia* seu *Laxitas ventriculi*; from γαστήρ, 'stomach,' and ἀσθения, 'debility.' Debility of the stomach.

**GASTERCHEMA**, *Sonitus stomachicus*; from γαστήρ, 'the stomach,' and ἤχημα, 'sound.' Sound presumed to be heard on auscultating the region of the stomach.

**GASTEREMPHRAXIS**, *Gasterangiemphraxis*.

**GASTERHYSTEROTOMY**, *Cæsarean Section*.

**GASTRÆMIA**; from γαστήρ, 'the stomach,' and αἷμα, 'blood.' Determination of blood to the stomach.

**GASTRALGIA**, *Cardialgia*.

**GASTRANEURYSMA**, *Gastræctasis*.

**GASTRECTASIS**, *Gastræctasia*, *Gastræneurysma*, *Dilatatio Ventriculi*: from γαστήρ, 'the stomach,' and ἵκτασις, 'dilatation.' Dilatation of the stomach.

**GASTRELCOBROSIS**, *Gastrobrosis ulcerosa*.

**GASTRELCOISIS**, *Ulcera'tio seu Exulceratio seu Ul'era Ventriculi*, from γαστήρ, 'the stomach,' and ἄλωσις, 'ulceration.' Ulceration of the stomach. When accompanied with hectic, it constitutes *Gastrophthisis*, *Gastrophthoë*.

**GASTRELYTROTOMIA**, see *Cæsarean Section*.

**GASTRENCEPHALOMA**, *Gastromyelo'ma*, *Gastromyelo'sis*, *Gastroencephalo'sis*; from γαστήρ, 'the stomach,' and ἑγκεφαλίς, 'the brain.' Encephaloid of the stomach.

**GASTRENCHYTA**, *Stomach pump*.

**GASTRENTERIC**, *Gastroentericus*.

**GASTRENTERICITIC**, *Gastroenteritic*.

**GASTRENTEROMALACIA**, *Gastroenteromalacia*, from γαστήρ, 'stomach,' ἄσπερον, 'intestine,' and μαλακία, 'softening.' Softening of the stomach and intestines.

**GASTREPATICUS**, *Gastrohepatic*.

**GASTREPATITIS**, *Inflammatio ventriculi et hepatis*; from γαστήρ, 'stomach,' and ἥπαξ, 'liver.' Inflammation of the stomach and liver.

**GASTREPILOICUS**, *Gastroepilic*.

**GASTRERETHISIA**; from γαστήρ, 'stomach,' and ἑρεθίζω, 'I irritate.' Irritation of the stomach.

**GASTRIC**, *Gastricus*; from γαστήρ, 'the stomach.' Belonging or relating to the stomach.

**GASTRIC ARTERIES** are three in number, *Arteria gastro-epiploica dextra*, *A. gastro-epiploica sinistra*, and *A. coronaria ventriculi*.

**GASTRIC JUICE**, *Succus gastricus*, *Men'strum seu Fermentum Ventriculi*, (F.) *Suc Gastricæ*, *Gastric Acid*. A fluid, secreted from the mucous membrane of the stomach. As met

with, it is a mixture of the fluids secreted by that organ with those of the supra-diaphragmatic portion of the alimentary canal. Owing to such admixture, the most contrary properties have been assigned to it. That such a fluid is secreted, which concurs powerfully in digestion, is evident from many considerations, and has been positively proved by the author and numerous others. It is always found to contain, in man, chlorohydric and acetic acids. The gastric fluid in cases of sudden death sometimes corrodes and perforates the stomach; giving rise to interesting questions in medical jurisprudence.

**GASTRIC NERVES**. The two cords by which the pneumogastric nerves terminate, and which descend on the two surfaces of the stomach; as well as the filaments of the great sympathetic, which accompany the gastric vessels.

**GASTRIC PLEXUS**, *Plexus coronarius ventriculi*. A nervous net-work, formed by the solar plexus. It accompanies the *Arteria coronaria ventriculi*, and passes along the lesser curvature of the stomach, to which it gives branches.

**GASTRIC VEINS** follow the same distribution as the arteries, and open into the *Vena porta abdominalis*.

**GASTRICISM**, *Gastricis'mus*, from γαστήρ, 'the stomach.' A name by which is designated the medical theory, that refers all, or almost all, diseases to an accumulation of saburrae in the digestive passages.

**GASTRILIQUE**, *Engastrimythos*.

**GASTRILQUIST**, *Engastrimythos*.

**GASTRIMOQUUS**, *Engastrimythus*.

**GASTRIMARGUS**, *Glutton*.

**GASTRINUM**, *Potash*.

**GASTRISMUS**, *Gluttony*, see *Saburra*.

**GASTRITIC**, *Gastriticus*; same etymon as the rest. Relating to gastritis.

**GASTRITIS**, from γαστήρ, 'the stomach,' and ἴσις, denoting inflammation. *Ventriculi inflammatio*, *Cavum gastritis*, *Empres'ma gastritis*, *Inflammatio gastritis*, *Cardial'gia inflammatoria*, *Febris stomach'ica inflammatoria*, *Inflammatio ventriculi*, *I. stomachi*, *Phlegmont ventriculi*, *Inflammation of the stomach*, (F.) *Inflammation de l'Estomac*, *Gastrite*, *Catarrhe gastricus*. A disease, characterized by pyrexia; great anxiety; heat and pain in the epigastrium, increased by taking any thing into the stomach; vomiting and hiccup. Gastritis may either be seated in the peritoneal or mucous coat. It is most frequently in the latter (*Esogastritis*, *Endogastritis*, *Gastrotycoderitis*), being excited directly by acid ingesta. It requires the most active treatment;—bleeding, blistering, fomentations, diluents, &c. Some degree of inflammation of the mucous coat of the stomach is considered by the followers of Broussais to be present in almost all fevers; and the various forms of dyspepsia have been supposed by some to be nothing more than *chronic endogastritis*.

**GASTRITIS ARTHRITICA**, *Cœliagra*.

**GASTRO-ARTHRITIS**, *Gout*—*g*. *Ataxia*, *Dyspepsia*—*g*. *Atonia*, *Dyspepsia*—*g*. *Bronchitis*, *Fever*, *adenomeningeal*—*g*. *Enteritis intensa*, *Synocha*—*g*. *Enteritis*, with nervous affection of the brain, see *Typhus*—*g*. *Enteritis*, follicular, *Dothinteritis*; see *Typhus*.

**GASTROBROSIS**, *Perforatio Ventriculi*, *Gastrorrhexis*, (F.) *Perforation de l'Estomac*; from γαστήρ, 'the stomach,' and βρωσις, 'the act

of gnawing.' Corrosion and perforation of the stomach.

**GASTROBROSIS ULCERO'SA**, *Gastrelcubro'sis*. Destruction and perforation of the coats of the stomach by ulceration.

**GASTROCELE**, from *γαστήρ*, 'the belly,' and *κύημα*, 'a tumour.' *Hernia of the stomach*, *Hernia ventriculi*, (F.) *Hernie de l'Estomac*. Hernia, formed by the stomach through the upper part of the linea alba: a disease, the existence of which has been doubted by many. See Epigastrocele.

**GASTROCHOLOSIS**, Fever, gastric.

**GASTROCNEME**, Sura.

**GASTROCNEZIA**, Sura.

**GASTROCNE'II**, from *γαστήρ*, 'the belly,' and *κνήμη*, 'the leg.' The name of the two fleshy masses which occupy the posterior and superficial part of the leg; (F.) *Gastrocnémiens*, *Jumeaux de la jambe*, *Gemelli*, *Bifémoro-calcanéiens*—(Ch.) the two constituting the *Gastrocnémius extermus*, of English anatomists. These muscles are distinguished into *internal* and *external*, which are distinct above, but united at their inferior extremity. They are long, flat, and thick; and arise—the *former* from the posterior part of the outer condyle of the femur; the *latter*, from the posterior part of the inner condyle of the same bone. The aponeurosis, which unites these muscles below, joins with that of the solaris, and forms with it, a large tendon, which, under the name *Tendo-Achillis*, is inserted at the posterior part of the calcaneum. These muscles extend the foot on the leg, and the leg on the foot. They can, also, bend the leg and the thigh reciprocally on each other. For the *Gastrocnémius internus*, see Soleus.

**GASTROCNEMIUM**, Sura.

**GASTROCELIACUS**, Cœliac.

**GASTROCELICUS**, Cœliac.

**GASTROCOLIC**, see Epiploon, gastrocolic.

**GASTROCOLICA**, Cardialgia.

**GASTROCOLITIS**, from *γαστήρ*, 'stomach,' and *κόλον*, 'colon.' Inflammation of the stomach and colon.

**GASTROCOLPOTOMIA**, see Cæsarean section.

**GASTRODIDYMUS**, *Didymus*, *Symphogastrius*, *Psodymus*; from *γαστήρ*, 'the belly,' and *διδυμός*, 'a twin.' A monostrony in which twins are united by the abdomen.

**GASTRODUODENAL**, *Gastroduodena'lis*; from *γαστήρ*, 'stomach,' and *duodenum*. Relating to the stomach and duodenum.

**GASTRODUODENOPYRA**, Fever, adeno-meningeal.

**GASTRODYNE**, Cardialgia.

**GASTRODYNIA**, Cardialgia—g. Flatulenta, Colica flatulenta.

**GASTROENTERIC**, *Gastroentericus*, *Gastroenteric*, *Gastroentericus*, from *γαστήρ*, 'the stomach,' and *έντερον*, 'intestine.' Relating to the stomach and intestine.

**GASTROENTERITE**, Gastroenteritis.

**GASTROENTERITIC**, *Gastroenteriticus*, *Gastroenterit'ic*, *Gastroenteriticus*; same etymon as the next. Relating to gastroenteritis.

**GASTROENTERITIS**, *Inflammatio Ventriculi et Intestini-rum*, (F.) *Gastro-entérite*, *Gastro-enteric disease*, from *γαστήρ*, 'the stomach,' *έντερον*, 'an intestine,' and *itis*, a suffix denoting inflammation. Inflammation of the stomach and small intestine. According to

Broussais, the essential fevers of authors are gastro-enteritis, simple, or complicated.

**GASTROEPIPLOIC**, *Gastro-epiploicus*, *Gastroepiploicus*, from *γαστήρ*, 'the stomach,' and *επιπloon*, 'the epiploon.' That which relates to the stomach and epiploon.

**GASTROEPIPLOIC ARTERIES**, or *Gastric inferior*, are two in number, and distinguished into *right* and *left*. The *right*, also called *Gastrohepatic*, *Gastrica inferior dextra*, *Gastro-epiploica dextra*, is furnished by the hepatic artery. It descends behind the pylorus, and passes from right to left, along the great curvature of the stomach. It gives branches to the pancreas, duodenum, stomach, omentum majus, and terminates by anastomosing with the *Gastro-epiploica sinistra*, *Gastrica sinistra*, *Gastrica inferior sinistra*. This—the *left*—arises from the splenic artery. It is of considerable magnitude, and passes from left to right, along the great curvature of the stomach, distributing its branches more particularly to the stomach and omentum majus. It terminates by joining the right gastro-epiploic.

**GASTROEPIPLOIC GANGLIONS** are the lymphatic ganglions or glands, situate towards the great curvature of the stomach, between the two anterior laminae of the omentum majus.

**GASTROEPIPLOIC VEINS** are distinguished, like the arteries, into *right* and *left*. They empty themselves;—the *former*, into the superior mesenteric; the *latter*, into the splenic vein.

**GASTROHEMORRHAGIA**, Hæmatemesis.

**GASTROHEPATIC**, *Gastro-hepaticus*, *Hepato-gastricus*, *Gastroepat'icus*; from *γαστήρ*, 'the stomach,' and *ήπαρ*, 'the liver.' Relating to the stomach and liver. This name has been given to several organs. See Epiploon, gastrohepatic, &c.

**GASTROHYSTEROTOMY**, Cæsarean section.

**GASTROLIENALIS**, Gastrosplenicus.

**GASTROLITHIASIS**, from *γαστήρ*, 'the stomach,' and *λίθιασις*, 'formation of stone.' The formation of concretions, *gastrolithi*, in the stomach.

**GASTROMALACIA**, Gastromalaxia.

**GASTROMALAXIA**, *Gastro-malacia*, *Gastromalaco'sis*, *Malacogaster*, *Malax'is ventriculi*, *Dissolutio ventriculi*, *Emollit'io ventriculi*, *Pseudophlogo'sis ventriculi resoluti'va et colliguat'iva*, *Metamorpho'sis ventriculi gelatiniformis*, (F.) *Ramollissement de l'Estomac*, from *γαστήρ*, 'the stomach,' and *μαλαξίς*, 'softening.' Softening of the stomach, induced at times by the gastric secretions after death.—*Resolutio ventriculi autopeptica*.

**GASTROMENTRIS**, Engastrimythus.

**GASTROMETROTOMIA**, Cæsarean section.

**GASTROMYCODERIS**, see Stomach.

**GASTROMYCODERITIS**, see Gastritis.

**GASTROMYELOMA**, Gastroencephaloma.

**GASTRONOSUS**, Gastropathia.

**GASTROP'ATHY**, *Gastropathia*, *Gastron'osus*, *Gastron'us*, from *γαστήρ*, 'the stomach,' and *πάθος*, 'disease.' Disease of the stomach.

**GASTROPHRENIC**, *Gastro-phrenicus*, from *γαστήρ*, 'the stomach,' and *φρεν*, 'the diaphragm.' Belonging to the stomach and diaphragm.

**GASTROPHRENIC LIGAMENT** is a reflection of the peritoneum, which descends from the inferior surface of the diaphragm to the cardia.

**GASTROPHTHISIS**, *Gastrelcosis*.

**GASTROPHTHOE**, *Gastrelcosis*.

**GASTRO-RAPHY**, *Gastrorrhaphia*, *Gastrorrhaphē*, *Sutura abdominalis*, from γαστήρ, 'the belly,' and ραφή, 'a suture.' The suture used for uniting wounds penetrating the abdomen, when they are too extensive or too unequal to be kept in contact by position, adhesive plaster, or appropriate bandages. The *interrupted* and *quilled* sutures are those chiefly employed.

**GASTRORRHAGIA**, *Hæmatemesis*.

**GASTRORRHÆXIS**, *Gastrobroisis*.

**GASTRORRHŒA**, from γαστήρ, 'the stomach,' and ροή, 'I flow.' *Blennorrhœa seu Fluxus ventriculi*, (F.) *Flux muqueux de l'estomac*, *Catarrhe stomacal*. A morbid condition of the stomach, which consists in the secretion of an excessive quantity of mucus from the lining membrane of the stomach. Also, *Celiac flux*.

**GASTROSCIRRHUS**, *Induratio ventriculi scirrhusa*, *Scirrhus seu carcinoma ventriculi*. Scirrhus induration or cancer of the stomach.

**GASTROSCOPIA**, *Abdominoscopia*.

**GASTRO-SIS**. A generic name for diseases which are seated in the stomach.—Alibert.

**GASTROSPLENIC**, *Gastrospenicus*, *Gastro-lienalis*, from γαστήρ, 'stomach,' and σπλήν, 'the spleen.' Relating to stomach and spleen.

**GASTROSTENOSIS**, *Stricture of the stomach*.

**GASTROSTENOSIS CARDIACA et PYLORICA**; from γαστήρ, 'the stomach,' and στενός, 'narrow.' Narrowness of the cardiac and pyloric orifices of the stomach from cancer of that organ.

**GASTROTOMY**, from γαστήρ, 'the belly,' and τομή, 'incision.' Several different operations have been so called. 1. The *Cæsarean Section*. 2. An incision made into the abdomen for the purpose of removing some internal strangulation or volvulus; or to reduce hernia, *Laparotomy*: and, 3. The opening made in the stomach, to remove a foreign body which has passed into it through the œsophagus.

**GASTRYPERNEURIA**, from γαστήρ, 'stomach,' νῆρο, 'above,' and νεύρον, 'a nerve.' Morbidly increased activity of the nerves of the stomach.

**GÂTEAU FÉBRILE**, *Agne cake*.

**GATTILIER**, *Vitex*.

**GAUDIA FŒDA**, *Masturbation*.

**GAULTHERIA**, *Gaultheria seu Gualtheria procumbens*, *Gautiera repens*, *Mountain Tea*, *Partridge Berry*, *Berried Tea*, *Grouseberry*, *Deerberry*, *Spice berry*, *Tea berry*, *Redberry*, *Wintergreen*, *Redberry Tea*, *Ground berry*, *Ground ivy*, *Ground holly*, *Hill berry*, *Box berry*, *Chequer berry*. An American plant, which is one of the principal articles of the materia medica of some Indian tribes. The infusion of the leaves is stimulant and anodyne, and is said to have been used, with advantage, in Asthma. The oil—*Oleum Gaultheriæ*, Ph. U. S.—is used, chiefly on account of its pleasant flavour, to cover the taste of other medicines.

**GAUNTLET**, *Gantelet*.

**GAUQUAVA**, *Smilax China*.

**GAUTIERA REPENS**, *Gaultheria*.

**GAY FEATHER**, *Liatris spicata*.

**GAYAC**, *Guaicum*.

**GAZ**, *GAS*, *Air*. Van Helmont first de-

signed by this name,—the etymology of which is unknown,—the carbonic acid developed in the vinous fermentation. Afterwards, the term was appropriated to every permanently elastic fluid; that is, which preserves its æriform state at all temperatures: and ultimately it was extended to all æriform bodies;—which were divided into *permanent* and *non-permanent gases*. The latter are generally termed vapours:—they return to the liquid state, when a portion of their caloric is abstracted. The permanent gazes, or *gases* properly so called, are numerous, and may be divided into four sections with regard to their effects on the animal economy.

- |   |   |  |
|---|---|--|
| 1. <i>Irrespirable gases.</i>           | } Carbonic acid, ammoniacal gaz, muriatic acid gaz, deutoxide of azote, nitrous acid gaz, and chlorine. |  |
| 2. <i>Negatively deleterious gases.</i> |   | } Hydrogen, azote.   |
| 3. <i>Positively deleterious gases.</i> |   | } Oxygen, protoxide of azote, carburetted hydrogen, carbonic oxide, sulphuretted hydrogen, and arseniuretted hydrogen. |

It is proper to remark that the term *respirable* has been very differently employed by different writers. Sometimes it has meant the power of supporting life when applied to the blood in the lungs. At others, all gazes have been deemed irrespirable, which are incapable of being introduced into the lungs by voluntary efforts,—without any relation to their power of maintaining vitality; and this is perhaps the best sense. The gazes were, at one time, employed in medicine, under great expectations,—especially by the enthusiastic Beddoes; but they are now scarcely ever had recourse to. They differ, considerably, in their effects on the animal economy. Some, as oxygen, are exciting; others, as nitrogen, depressing; whilst others, again, as the *Protoxide of azote* or *laughing gaz*, produce the most singular effects.

**GAZ**, *PULMONARY*, *Gaz of the lungs*. A name given to the expired air; which contains,—besides common air, an increase of carbonic acid, water, and some animal matter.

**GAZ SANGUINIS**, *Gaz animalis sanguinis*, *Halitus sanguinis*, *Aura sanguinis*, *Hæmatismus*. The halitus, or vapour, given off by freshly drawn blood.

**GAZELLE**, *Antilopos*.

**GEANT**, *Giant*.

**GEBÄRPULVER**, *Ergot*.

**GEDE'OLA**. The convex part of the liver. *Du Cange*.

**GEILENAU, MINERAL WATERS OF**. Geilenua is a village in the grand duchy of Nassau, at no great distance from Frankfort. The waters contain carbonic acid, carbonate, sulphate and phosphate of soda, chloride of sodium, carbonate of lime, magnesia and iron.

**GEISMAR, MINERAL WATERS OF**. The mineral waters of Geismar in Bavaria are acidulous chalybeates.

**GEISUM**, *Geison*. The part of the frontal bone over the eyes.

**GELAPPIUM**, *Convolvulus jalapa*.

**GELASINI DENTES**, *Incisive teeth*.

**GELASMUS**, *Canine laugh*.

**GEL'ATIN**, *Gelatine*, *Gelatina*, *Galreda*,

from (F.) *Gelle*, 'gelly or jelly.' An immediate animal principle. It is semitransparent, insipid, inodorous, insoluble in cold water, very soluble in hot; which it thickens, and transforms into gelly on cooling. Gelatin is a very nutritious substance; and, when dissolved in a considerable quantity of water, forms an emollient fluid, much used in therapeutics, but not the most easy of digestion.

GELATIN OF WHARTON, *Gelatina Whartoniana*, *Jelly of the Cord*. A soft, dense, fluid, gelatinous substance, which envelops the umbilical cord, and is conceived, by some, to be inservient to the nutrition of the fœtus.

GELATINA AQUATICA, *Brasenia hydropheltis*.

GELATIO, Congelation.

GELÉE, Gelly.

GELLY, *Jelly*, *Jus gela'tum*, *Gelu*, *Jus coagula'tum*, (F.) *Gelée*. A substance of a soft consistence, tremulous, and transparent, which is obtained by an appropriate treatment, from animal and vegetable matters: hence the distinction into *animal* and *vegetable jelly*. The former is merely a concentrated solution of gelatin, left to cool.

*Vegetable Jelly* is found in the juice of the currant, mulberry, and of almost all acid fruits, when ripe. It is of itself colourless, but almost always retains a little colouring matter of the fruit which has furnished it. It has an agreeable taste; is scarcely soluble in cold water, but boiling water dissolves it readily: the jelly is, however, almost all deposited on cooling. If this aqueous solution be boiled for a long time, it becomes analogous to mucilage, and loses the property of being jellied on cooling.

GELSEMINUM NITIDUM, *Yellow Jessamino*. The flowers, root, &c., of this shrub are narcotic, and the effluvia from the former are said sometimes to induce stupor.

GELU, Gelly.

GELUS, Risus.

GEMELLI, Gastrocnemii, Ischio-trochanterianus, Testicles.

GEMELLUS, *Gem'inus*, *Did'yimus*, 'a twin.' (F.) *Jumeau*, *Jumelle*, *Besson*, *Bessonnis*. One of two children, twins, born at the same accouchement, or gestation. Also relating to twins, as "a twin conception."

GEMELLUS MUSCULUS. Cowper applies this name to the long portion of the triceps brachialis united to the inner portion.

GEMINI, Ischio-trochanterianus, Testicles.

GEMINUM CENTRUM SEMICIRCULARE, *Tenia semicircularis*.

GEMINUS, Gemellus.

GEMMA, Granulation—g. *Oculi*, Crystal-line.

GEMMIPAROUS, see Generation.

GEMURSA, a Corn; also a name given by the ancients to a disease seated between the toes;—the nature of which is unknown to us.

GEN, *Gen'esis*, 'generation,' from *γεννω*, 'I make.' Hence *Hydrogen*, *Osteogeny*, &c.

GENA. The *Cheek*, *Gensys*, *Parisi'a*, *Gamp'hé*, *Gamp'héllé*, *Gnathos*, *Gnathmus*, *Mala*, (F.) *Joss*. The cheeks form the lateral parts of the mouth. *Externally*, they have no precise limits: they are continuous, *above*, with the lower eyelid; *below*, they descend as far as the base of the jaw; *before*, they terminate at the *alæ nasi*, and at the commissures of the lips; and *behind*, at

the ear. Their thickness varies, according to the degree of fatness of the individual. They are formed of three layers;—one dermoid, another muscular, and the third mucous.

GENCIVES, *Gingiva*.

GENE'AS, *Lanugo prima*, *Probar'bium*.

The downy hairs, which first cover the cheek. Also, a bandage which passes under the chin.

GENERION, Beard, Mentum.

GENERAL ANATOMY, see Anatomy.

GENÉRALE, Influenza.

GENERATIO, Generation—g. *Æquivoca*, see Generation—g. *Calculi*, *Lithia*—g. *Homogenea*, see Generation—g. *Primigena*, see Generation—g. *Primitiva*, see Generation—g. *Originaria*, see Generation—g. *Spontanea*, see Generation.

GENERATION, *Genera'tio*, *Gen'esis*, *Goné*, *Gonus*, *Procrea'tio*, from *γενω*, or *γεννω*, 'I engender.' Under this name physiologists comprehend the aggregate of functions, which concur, in organized beings, towards the production of their kind. The act of generation means the union of the sexes. See Coition. The writers of antiquity believed, that all organized bodies are produced either by what is termed *univocal* or *regular generation*, (*Homogen'esis*, *genera'tio homogen'ea*, *propaga'tio*), which applies to the upper classes of animals and vegetables, or by *spontaneous generation*, (*Autogen'ia*, *heterogen'esis*, *genera'tio heterogen'ea*, *aquiv'oca*, *primiti'va*, *primig'ena*, *originaria*, *sponta'nea*), which they considered applicable to the very lowest classes only, as the mushroom, the worm, the frog, &c. There are still many distinguished naturalists who consider that beings low in the scale of animality, are produced in the latter way. Spontaneous generation and *equivocal generation* have been regarded by many to be synonymous. Others, however, mean by spontaneous generation, the production of a new being from the mere combination of inorganic elements; whilst by equivocal generation they understand the evolution of a new being from organized beings dissimilar to themselves, through some irregularity in their functions, or through the incipient decay or degeneration of their tissues. As to the mode in which regular generation is accomplished, there have been many views. According to the doctrine of Hippocrates, and of the ancient philosophers, the ovaries of the female furnish a prolific fluid, similar to that of the male; and the fœtus results from the mixture of the two seeds in copulation. Steno and others conceived, that the ovaries contain ova, which are not developed until vivified by the male sperm. Bonnet and Spallanzani believed in the pre-existence of germs, created since the origin of the world, but *encased* in each other, and becoming developed in succession; whence it would follow that the ovary of the first female must have contained the germs of all subsequent generations: and that the number of these germs must go on always diminishing, until ultimately extinct. This was the system of the *evolution of germs*. According to Leeuwenhoek, the ovaries do not contain eggs, but vesicles destined to receive animalcules; which, in his view, live in the sperm. Thousands of these animalcules are thrown into the uterus during copulation, and the most expeditious and vigorous reaches the ovary, after having scattered and destroyed its

competitors. Buffon—admitting the hypothesis of the two seeds—supposed that they were formed of molecules proceeding from every part of the body of each parent; and that, by a kind of elective affinity, those which were furnished by the head, the trunk, or the extremities of the male parent, could only unite with those proceeding from the same parts of the female. Before him, Maupertuis, admitting, with many of the ancient philosophers, the system of *Epigenesis*, and adopting, as regarded the composition of the sperm, a theory analogous to that of Buffon, had supposed that the molecules, capable of being organized, were attracted towards a centre; that the nose attracts the two eyes; the body, the arms; the arms, the hands, &c., nearly as the particles of a salt, dissolved in a liquid, arrange themselves in regular crystals around the same nucleus. These and various other systems have been successively proposed and rejected, and the mystery of generation remains impenetrable.

The simplest kind of reproduction does not require sexual organs. The animal separates into several fragments, which form so many new individuals. This is *Fissiparous generation*. *Gemmiparous generation* consists in the formation of buds, sporules or germs on some part of the body, which at a particular period drop off and form as many new individuals. In *Oviparous generation*, the egg is hatched out of the body; in *ovoviviparous generation* the new being is hatched in the excretory passages. In *viviparous generation*, the new individual is born under its appropriate form; and in *marsupial* or *marsupiate generation*, the young being, born at a very early stage of development, is received and nourished in a *marsupium* or pouch.

All the acts comprising the function of generation in man may be referred to five great heads. 1. *Copulation*. 2. *Conception* or *fecundation*. 3. *Gestation* or *Pregnancy*. 4. *Delivery* or *Accouchement*: and, 5. *Lactation*.

GENERATION, ACT OF, see Generation—g. Equivocal, see Generation—g. Fissiparous, see Generation—g. Gemmiparous, see Generation—g. Marsupial, see Generation—g. Organs of, female, see Vulva—g. Oviparous, see Generation—g. Regular, see Generation—g. Spontaneous, see Generation—g. Univocal, see Generation—g. Viviparous, see Generation.

GENEROUS, *Generosus*. A name given to wines which contain a great quantity of alcohol.

GENESIOL'OGY, *Genealogia*, from *γενεσις*, 'generation,' and *λογος*, 'a discourse.' The doctrine of generation.

GENESIS, Generation.

GENET, *Spartium scoparium*—g. à *Balais*, *Spartium scoparium*—g. *des Teinturiers*, *Genista tinctoria*.

GENETHLIACUS, from *γενεθλιος*, 'natal,' 'pertaining to nativity.' A name, given by the ancients to certain astrologers, who, from the state of the heavens at the time of the birth of an individual, predicted his future character and the events of his life.

GENETICA, from *γενεσις*, 'origin,' 'rise.' Diseases of the sexual functions: the 5th class in Good's Nosology.

GENETICOS, Genital.

GENEVA, Gin—g. Hollands, see Spirit.

GENEVRIER, *Juniperus communis*.

GENGIVITE, Ulitis.

GENI, Genian.

GENIAN, *Geniana*, *Genial*, from *γεναιος*, 'the chin.' The *Genian apophysis* or *Process*, (F.) *Apophyse Génienne* ou *généni*, is situate at the posterior part of the symphysis menti, and is formed of four small tubercles.

GENIE, *Genius*. The French sometimes apply this term to diseases nearly synonymously with *nature*; as *Genie inflammatoire*, *G. bilieux*, *G. adynamique*. Some use it in the same sense as *type*; *Genie intermittens*. The unwonted predominance of any mental faculty is also so called.

GENIEN, Genian.

GENIÈVRE, Gin, *Juniperis communis* (the berry.)

GENIOGLOSSUS, *Genio-hyoglossus*, from *γεναιος*, 'the chin,' and *γλωσσα*, 'the tongue.' *Mesoglossus*, *Mesoglossus*, *Nonus lingua musculus*. The name of a flat, triangular muscle, which extends from the genian apophysis to the inferior surface of the os hyoides and tongue, which it carries forward.

GENIOHYODES, Geniohyoides.

GENIOHYOGLOSSUS, Genioglossus.

GENIOHYODES, Geniohyoides.

GENIOHYOIDEUS, *Geniohyoideus*, *Geniohyoideus*, *Mento-bicorneus*, from *γεναιος*, 'the chin,' and *ωοειδης*, 'the os hyoides.' A muscle, which arises from the genian apophysis, and is inserted at the anterior part of the body of the os hyoides. Its use is to raise the os hyoides, and carry it forwards. It may, also, contribute to depress the lower jaw in contracting towards the os hyoides.

GENIO-PHARYNGE'US, from *γεναιος*, 'the chin,' and *φαρυγξ*, 'the pharynx.' A name given, by some anatomists, to a bundle of fibres, which passes from the lower jaw to the sides of the pharynx, and forms part of the *constrictor pharyngis superior*.

GENIPA OBLONGIFOLIA, *Huito*. A plant of Peru, with the juice of which the Indians paint their legs to protect them against the stings of insects.

GENIPI ALBUM, *Artemisia rupestris*—g. *Blanc*, *Artemisia rupestris*.

GENISTA, *Spartium scoparium*—g. *Canariensis*, see *Rhodium lignum*.

GENISTA SPINO'SA INDICA, *Bahel Schulli*. An oriental tree, a decoction of the roots of which is diuretic. The leaves boiled in vinegar have the same effect.—Ray.

GENISTA TINCTORIA, *Dyers' broom*, *Dyers' wood*, *Green wood*, *Wood waven*, (F.) *Genêt des Teinturiers*. A shrub cultivated in this country and in Europe. The flowering tops and seed have been used in medicine. It has the same properties as *Spartium scoparium*.

GENITAL, *Genitalis*, *Geneticos*. Same etymon as Generation. That which belongs to generation.

GENITAL ORGANS, *Sexual Organs*, *Puden'da*, *Natur'alia*, *Natura*, *Eda'a*, *Me'sea*, *Me'sea*, *Me'ron*, *Interfemina'um*, *Genital parts*, *Noble parts*, *Natural parts*, *Private parts*, *Priv'ities*, *Privy parts*, *Privy Members*, the *Parts*, *Partes genital'es*, *Partes generatio'ni inservientes*, *Me'dea*, *Vere'n'da*, *P. obsc'ra*, *Genit'alia*, *Genet'ica*, *Gymna*, *Membra puden'da*, *Organa generatio'ni inservientia*, (F.) *Organes génitaux*, *Parties génitales*, *P. honteuses*, *P. génitales*.

toires, *P. nobles*, *P. sexuelles*, *P. naturelles*, les Parties. The parts that are inservient to the reproduction of the species. These are very different in the male and female. In man, they are numerous; some *secreting the sperm*, as the testicles and their appendages; others *retaining it*, as the vesiculæ seminales; and another for *carrying it* into the organs of the female,—the penis. In the female, the parts of generation form an apparatus, perhaps more complicated than that of the male. Some are inservient to copulation, as the vulva, vagina, &c.; others to conception and the preservation of the product for a determinate time, as the uterus and its appendages; whilst others concur in the alimentation of the infant after birth, as the mammae.

GENITALE, Sperm—g. Caput, Glans.

GENITALIA, Genital organs.

GENTO-CRURAL NERVE, *Nervus genito-cruralis*, *Subpubian nerve*, *Internal inguinal nerve*. A branch of the second lumbar nerve, which passes through the psoas muscle, and, approaching the femoral arch, divides into two branches,—an *internal* or *sorotal*, and an *external* or *femoral cutaneous branch*.

GENITURA. That which is fecundated or engendered in the maternal womb. This word has been used synonymously with *embryo*, *fœtus*, and *infant*. Also, the sperm; and the penis. See GONÆ.

GENIUM, Mentum.

GENNETICA, Genital Organs.

GENNETICOCNES'MUS, from *γενναω*, 'I engender,' and *κνησμος*, 'itching.' Itching of the genital organs.

GENNETICON'OSI, *Genneticonou'si*, from *γεννησιος*, 'genital,' and *νοσος*, 'disease.' Diseases of the genitals.

GENOA, CLIMATE OF. The climate of this Italian city and its vicinity has been often selected as favourable for the phthiical valetudinarian during the winter, but it is now admitted to be decidedly improper for pulmonary affections, being subject to frequent and rapid changes of temperature, and to dry cold winds from the north, alternately with warm moist winds from the south-east.—Sir James Clark.

GENONU'SI, *Morbi sexus*, from *γενος*, 'sex,' and *νοσος*, 'disease.' Sexual diseases.

GENOS, Sex.

GENOU, Genu.

GÉNOUILLÉS, (*Corps*.) Corpora geniculata.

GENRE, Genus.

GENSANG, *Panax quinquefolium*.

GENTIA, Gentianina.

GENTIAN, Triosteum—g. Blue, *Gentiana catesbæi*—g. Catesbian, *Gentiana catesbæi*—g. White, *Laserpitium latifolium*—g. Southern, *Gentiana catesbæi*—g. White, *Triosteum*—g. Yellow, *Gentiana lutea*, see *Calumba*.

GENTIANA, *G. lutea*—g. Alba, *Laserpitium latifolium*—g. Cachenlaguen, *Chironia Chilensis*—g. Centaurium, *Chironia centaurium*.

GENTIANA CATESBÆI; *G. Catesbæiana*, *Blue Gentian*, U. S. *Catesbæian Gentian*, *Southern Gentian*, *Blubells*, *Bitterroot*. It is a pure and simple bitter, and the root may be used wherever that of the *Gentiana lutea* is proper.

GENTIANA CHIBAYTA, *G. Chirayita*, *Honri-cæa Pharmacear'cha*, *Sues'tia*, *Chirayita*, *Ag-*

*tho'tes chirayita*, *Ophelia chirayita*, *Chirayita*, *Chirayita*, *Chirayita*. A native of India, which has been much employed in that country, in dyspepsia, and as an antiperiodic in intermittents. It is preferred by some to sarsaparilla, where the latter is considered to be indicated,—as after large quantities of mercury have been taken, or where profuse salivation has been induced. It has also been advised in atonic leucorrhœa. It yields its virtues to alcohol and water.

GENTIANA LUTEA. The systematic name of the officinal gentian; *Gentiana major*, *G. vut'erum*, *Gentiana rubra*, *Yellow Gentian*, *Felwort*, *Gentiana*. Ord. Gentianes. (F.) *Gentiana jauna*. This is a plant common in the mountains of Europe. The root is almost inodorous, extremely bitter, and yields its virtues to ether, alcohol, and water. It is tonic and stomachic; and in large doses, aperient. Dose, gr. x. to ℥ij. It is most frequently, however, used in infusion or tincture.

GENTIANA MAJOR, *G. lutea*—g. Peruviana, *Chironia Chilensis*—g. Rubra, *G. lutea*—g. Vetterum, *G. lutea*.

GENTIANE JAUNE, *Gentiana lutea*.

GENTIANINA, *Gentianina*, *Gentianin*, *Gentianina*, *Gentia*. A supposed neutral substance, obtained from gentian, and, by some, presumed to be its active principle. It is not so.

GENTILITIUS, Hereditary.

GENU, *Gony*, *γονυ*, (F.) *Genou*. The articulation of the leg with the thigh;—the *Femoro-tibial* joint. It is the most complicated in the body, and is formed by the inferior extremity of the femur, the superior extremity of the tibia, and the rotula. The articular surfaces of the bones are covered by layers of cartilage—more or less thick—and by the synovial membrane of the articulation. The soft parts of this joint are,—the *ligamentum patellæ*, two lateral ligaments, distinguished by the names *internal* and *external*; a posterior ligament; two crucial ligaments,—the one anterior, and the other posterior; two interarticular fibro-cartilages: some albugineous fibres, which form an imperfect capsule, &c. The knee receives its arteries from the femoral and popliteal. They bear the name *articular*. Its veins have the same distribution as the arteries, and discharge their blood into the saphena and crural. Its nerves are furnished by the sciatic, popliteal, and crural. The joint is protected by the tendons and muscles which surround it.

The French use the term *Articulation en genou* for a joint, in which the head of a bone is received into a bony cavity of another, where it rolls and moves in all directions.

GENUGRA, Gonagra.

GENUINUS, Legitimate.

GENUS, (F.) *Genre*. A collection or group of species, analogous to each other; and which can be united by common characters. When a species cannot be referred to a known genus, it constitutes a distinct one.

GENUS CURATIONIS, Ratio medendi.

GENYANTRAL'GIA, from *γεννησιν*, 'the maxilla,' *αντρον*, 'the antrum,' and *αλγος*, 'pain.' Pain in the antrum of Highmore.

GENYANTRITIS, from *γεννησιν*, 'the maxilla,' *αντρον*, 'the antrum,' and *ιτις*, denoting

inflammation. Inflammation of the antrum of Highmore.

GENYANTRUM, Antrum of Highmore.

GENYOCYNANCHE, Cynanche parotidea.

GENYS, γυνυ, 'the jaw;' also the chin. See GENA.

GEOFFRÆA INERMIS, *Geoffra'a, Geoffroy'a, Cabbag'ium, Cabbage Trees, Cabbage Bark Tree, And'i'ra inermis's. Nat. Ord. Leguminosæ. Sez. Syst. Diadelphia Decandria. Geoffraea Jamaicens'sis, Worm-Bark Trees.* The odour of the bark is very unpleasant. It is anthelminthic and cathartic. Dose, of the powder, ʒj to ʒij.

GEOFFRÆA SURINAMENSIS, *And'i'ra Surinamensis'sis*, has similar properties.

Huttenschmidt has separated their active principles, to which he has given the names *Jamaicensis* and *Surinamensis*. They are all alkaline.

GEOFFROYA, *Geoffraea inermis*—g. *Jamaicensis, G. inermis*.

GEOGRAPHY, MEDICAL, *Geographia Medica*. The description of the surface of the globe as regards the influence of situation on the health, vital functions, and diseases of its inhabitants—vegetable and animal; but principally on those of man.

GEOPHAGISM, *Geophag'ia, Geophag'ia*, from γη, 'earth,' and φάγω, 'I eat.' The act or practice of eating earth. See Chthonophagia.

GERÆOLOG'IA, *Geratolog'ia*, from γηρας, 'old age,' and λόγος, 'a discourse.' The doctrine, or a description, of old age.

GERANIS, from γερανός, 'a crane,' which it resembled. A bandage, used by the ancients in cases of fractured clavicle. Some authors attribute it to Hippocrates; others, to Perigenes.

GERANIUM, same etymon, because its pistil is long, like the bill of the crane. The *Crane's Bill*.

GERANIUM MACULATUM, see Geranium and G. Moschatum.

GERANIUM MOSCHATUM; *Erod'ium Moschatum*, (F.) *Bec de grue musqué*. A European plant, esteemed to be excitant and diaphoretic.

GERANIUM NOVEBORACENSIS, G. Maculatum.

GERANIUM ROBERTIANUM: *Stinking Crane's Bill, Herb Robert*, (F.) *Herbe à Robert, Bec de Grue Robertin*. This plant was, at one time, used as an antispasmodic and slight stimulant; as well as for an external application in various painful sores and inflammations.

Most of the species of geranium have been used as astringents. In some of the north-western parts of the United States, the root of the *Geranium maculatum*—*Geranium*, (Ph. U. S.)—*G. Novboracense*, *Spotted Crane's Bill, Crowfoot, Alum root, Tormentil, Stork bill*—is called *Racine à Bequet*, after a person of that name. It is highly extolled by the Western Indians as an antisyphilitic.

GERAS, Senectus.

GERM, *Germen, Blasté, Blastéma*. The rudiment of a new being, not yet developed, or which is still adherent to the mother.

GERMANDER, COMMON, *Teucrium chamaedrys*—g. *Creeping, Teucrium chamaedrys*—g. *Marum, Teucrium marum*—g. *Small, Teucrium chamaedrys*—g. *Water, Teucrium scordium*.

*GERMANDRÉE AQUATIQUE, Teucrium scordium*—g. *Maritime, Teucrium marum*—g. *Officinale, Teucrium chamaedrys*—g. *Scorodons, Teucrium scordium*.

GERME FAUX, Conception, false.

GERMEN, Germ, Sperm—g. *Dentale, Dental Pulp*—g. *Falsum, Mole*—g. *Spurium, Conception, false*.

GERMINAL CELL, see Cytoblast—g. *Membrane and Vesicle; see Molecule*—g. *Nucleus, see Molecule*—g. *Spot, see Molecule*.

GERMS, DISSEMINATION OF, *Panspermia*.

GEROBOS'CIA, *Gerontobos'cia*, from γηρας, 'old age,' and βόσκη, 'food.' Nourishment or maintenance proper for the aged.

GEROCOMEUM, *Gerocomium*.

GEROCOM'IA, *Gerocom'ia, Gerontocom'ia*, from γηρας, 'an aged person,' and κομίζω, 'to take care of.' The part of medicine whose object is the preservation of the health of the aged:—the hygiene of old people.

GEROCOMICE, *Gerocomia*.

GEROCOMI'UM, *Gerocom'um, Presbyodoch'um, Gerontocom'um, Gerotroph'um*, same etymon. An hospital for the aged.

GÉROFLE, see *Eugenia caryophyllata*.

GEROFLÉE JAUNE, *Cheiranthus cheiri*.

GERONTOBOSCIA, *Geroboscia*.

GERONTOCOMICE, *Gerocomia*.

GERONTOCOMIUM, *Gerocomium*.

GERONTOP'IA, from γηρας, 'old age,' and ὄψ, 'the eye.' Weakness of sight of the aged.

GERONTOTOXON, *Gerotoxon*.

GERONTOXON, *Gerotoxon*.

GEROTOXON, *Gerontox'on, Gerontotox'on, Mac'ula cor'nea arcuata, Arcus senilis*; from γηρας, 'an old person,' and τόξον, 'a bow.' A bow-shaped opacity at the under margin of the cornea, common to old people.

GEROTROPHEUM, *Gerocomium*.

GEROTROPHIA, *Geroboscia*.

GERSA, *Plumbi subcarbonas*—g. *Serpentaria*, see *Arum maculatum*.

GESTA, 'things done,' from *gerere, gestum*, 'to do,' 'carry.' A Latin term, introduced by Hallé, into medical language, to designate, among the objects which belong to hygiene, the functions which consist in the voluntary movements of muscles and organs. In the class of *Gesta* are found *sleep, the waking state, movements or locomotion, and rest*.

GESTATION, *Gesta'tio, Phora*, from *gestare*, 'to carry.' The time, during which a female who has conceived, carries the embryo in her uterus. See *Pregnancy*. Gestation, likewise, signifies the bearing or carrying of an individual; a kind of exercise, easier than that in which he moves by virtue of his own powers. Thus, we speak of *gestation on horseback, in a carriage, &c.*

GESTATION, PROTRACTED. *Pregnancy protracted beyond the usual period. See Pregnancy*.

GESTICULATION, *Gesticula'tio*, same etymon. The act of making many gestures; a symptom in disease, which always indicates very vivid sensations. It is met with in numerous affections.

GEUM, G. rivale—g. *Palustre, G. rivale*.

GEUM RIVALE, *G. palus'tri, Water avens, (F.) Benoitte aquatique, B. des Russescaus. Family,*

**Rosaceæ. Sz. Syst. Icosandria Polygynia.** The root of this plant, *Geum* (Ph. U. S.), is astringent. It has been much extolled in the cure of intermittents, diarrhœas, hemorrhages, &c.

**GEUM URBA'NUM**, *Caryophylla'ta*, *Caryophyllus vulg'aris*, *Sanamun'da*, *Lagophthal'mus*, *Caryophyll'a*, *Janamun'da*, *Common avens*, *Herb Bennet*, *Herba benedict'a*, (F.) *Benôite*. The root of this plant has a smell not, unlike that of cloves. Taste bitterish, austere; virtues yielded to water and alcohol. It has been used in intermittents, dysentery, chronic diarrhœa, debility, &c. Dose, ʒss to ʒj of the powder.

**GEUM VIRGINIA'NUM**, *White avens*, *Avens*, *Evan root*, *Choc'olate root*, *Bennet*, *Throat root*, *Cursall*, (F.) *Benôite de Virginie*, is common from Maine to Carolina and Kentucky, flowering in June and July. It has the same medical properties as *Geum rivale*.

**GEUMA**, Taste.

**GEUSION'OSI**, from *γεύω*, 'taste,' and *νοσος*, 'disease.' *Geusion'osi*. Diseases of the organ or sense of taste.

**GEUSIS**, Taste. Rarely, the root of the tongue—*Radix lingua*.

**GEUTHMOS**, Taste.

**GEZIR**, see *Pastinaca opoponax*.

**GEZIT**, *Cagot*.

**GEZITAIN**, *Cagot*.

**GHERKIN**, see *Cucumis sativa*.

**GHITTA JEMOCO**, *Cambogia*.

**GIALAPPA**, *Convolvulus jalapa*.

**GIANT**, *Gigas*, (F.) *Giant*. One much above the ordinary stature.

**GIBBA**, *Hump*.

**GIBBER**, *Hump*.

**GIBBEROSITAS**, *Gibbositas*.

**GIBBOSITAS**, *Gibberos'itas*, *Cyphosis*,

*Rhachio-cyphosis*, from (F.) *Gibbeus*, (L.) *Gibbus*, 'something arched or vaulted, prominent.' *Gibbos'ity*, *Gib'bousness*, *Curvature of the spine*, *Hyb'oma*. A symptom which occurs in different diseases; particularly in rickets and caries of the vertebrae. See *Hump*.

**GIBBOSITAS CARIOSA**, *Vertebral disease*.

**GIBBOUSNESS**, *Gibbositas*.

**GIBBUS**, *Hump*—g. *Pottii*, *Vertebral dispass*.

**GIBLETS**. According to Minsheu, from *Gobbet*, *Goblet*; but, according to Junius, from (F.) *Gibier*, 'game.' The word seems to be the old (F.) *Giboles*, *Gibélet*, &c., i. e. *Gibier*, (L.) *Cibarium*, food, (F.) *Abattis*. It means, generally, the parts which are cut off from a goose before it is roasted. Also, the extremities of fowls, such as the head, wings, feet; to which are sometimes added, the liver, gizzard, &c. *Soup*, made from these, is moderately nutritious.

**GIDDINESS**, *Vertigo*.

**GIGANTEUS**, *Gigantic*.

**GIGANTESQUE**, *Gigantic*.

**GIGANTIC**, *Gigante'us*, *Giganto'des*, (F.) *Gigantesque*. Relating to one much above the ordinary stature.

**GIGANTODES**, *Gigantic*.

**GIGARUS SERPENTARIA**, *Arum dracuncululus*.

**GIGAS**, *Giant*.

**GILARUM**, *Thymus serpyllum*.

**GILEAD**, **BALM OF**, see *Amyris opobalsamum*.

**GILET DE FORCE**, *Waistcoat*, *strait*.

**GILL**, *Glecoma hederacea*.

**GILL-GO-BY-CROUND**, *Glecoma hederacea*.

**GILLA THEOPHRASTI**, *Zinci sulphas*—g. *Vitrioli*, *Zinci sulphas*.

**GILLE'NIA STIPULA'CEA**, *Small-flowered Indian Physic* has the same properties as

**GILLE'NIA TRIFOLIA'TA**, *Spira'a trifolia'ta*, *common Gills'nia*, *Indian Physic*, *Western Drop-wort*, *Indian Hippo*, *Y'pocac*, *Bowman's root*, *Meadow sweet*, *Beaumont root*. *Nat. Ord. Rosaceæ. Sz. Syst. Icosandria Pentagynia.* The root of this shrub,—*Gills'nia*, (Ph. U. S.)—which grows plentifully in the United States, is a safe and efficacious emetic, in the dose of about 30 grains. It resembles, in its properties, the *ipeacuanha*.

**GILLFLOWER**, *Dianthus caryophyllus*.

**GIMBERNAT'S LIGAMENT**. A fibrous, triangular expansion, which is detached from the posterior and inner part of the crural arch, and is inserted into the crest of the pubis. This ligament forms the inner part of the superior aperture of the crural canal. It is one of the most frequent causes of strangulation in crural hernia.

**GIN**, *Hollands*, *Gene'va*, (F.) *Genièvre*. This spirit, which is distilled from corn and juniper berries, or from some substitute for them, is largely used in Great Britain; and is extremely detrimental, to the lower classes particularly. It possesses the properties of other spirituous liquors; but is, in popular medicine, more used than other varieties, in cases of colic or intestinal pain of any kind. See *Spirit*.

**GIN DRINKERS' LIVER**, *Liver*, *nutmeg*.

**GINGEMBEK**, *Amomum zingiber*.

**GINGER**, *Amomum zingiber*—g. *Beer powder*, see *Amomum zingiber*—g. *Indian*, *Asarum canadense*—g. *Jamaica*, concentrated essence of, see *Amomum zingiber*—g. *Preserved*, see *Amomum zingiber*—g. *Wild*, *Asarum Canadense*.

**GINGIBRA'CHIUM**, from *gingiva*, 'the gums,' and *brachium*, 'the arm.' A name given to the scurvy, because the gums and arms are chiefly affected by it. It has, also, been called *Gingips'dium*, because the lower limbs are in many cases the seat of scorbutic spots.

**GINGIBRACHIUM**, *Porphyra nautica*.

**GINGIPEDIUM**, see *Gingibrachium*, *Porphyra nautica*.

**GINGIVÆ**, from *gignere*, 'to beget,' because the teeth are, as it were, begotten in them. (?) The gums, *gums*, *Ulia*, *Carnicula*, (F.) *Genivives*. The portion of the mucous membrane of the mouth which covers the maxillary bones to the level of the alveolar arches. The gums are formed of a red tissue, more or less solid, and of a fibro-mucous nature, which adheres strongly to the necks of the teeth, and transmits, between the roots and their alveoli, a very thin expansion,—the *alveolo-dental periosteum*. The gums fix the teeth and contribute greatly to their solidity. In the aged, after the loss of the teeth, they become fibrous and very solid, and are inert to mastication.

**GINGIVA'LIS**, *Ulat'icus*, *Ulicus*; from *gingiva*, 'the gums.' Relating to the gums.

**GINGLYMOID**, *Ginglymoideus*, *Ginglymo'des*, from *γγλνμος*, 'a ginglymus,' and *μοις*, 'resemblance.' Resembling a ginglymus.

or hinge. An epithet applied to joints which resemble a hinge, as a *ginglymoid joint*.

**GINGLYMUS**, *Cardinamentum*, *Cardo*, 'a hinge.' (F.) *Charnière*, *Articulation en charnières*. A species of diarthrodial articulation, which only admits of motion in two directions, like a hinge,—as the knee-joint or elbow-joint.

**GINSENG**, *Panax quinquefolium*—g. Blue, *Caulophyllum thalictroides*—g. Yellow, *Caulophyllum thalictroides*—g. Horse, *Triosteum*—g. White, *Triosteum*.

**GIRAFFE**, *Dengue*.

**GIRARD ROUSSIN**, *Asarum*.

**GIRDLE**, *Cingulum*.

**GIRL**. This seems, formerly, to have been an appellation common to both sexes. Many etymologists deduce the word from the Su. Goth. *K a r l*, 'a man.' It means a young female, (L.) *Filia*, from *giris*, 'to love.' *Virgo*, (F.) *Fille*.

**GIROFLE**, see *Eugenia caryophyllata*.

**GISSA**, *Cynanche parotidæ*.

**GIZZARD**, *Ventriculus callosus*.

**GLABELLA**, *Mesophryon*.

**GLABRITIES**, *Calvities*.

**GLACE**, *Ice*.

**GLACIALE**, *Mesembryanthemum crystallinum*.

**GLACIALIS HUMOR**, *Crystalline*.

**GLACIES**, *Ice*.

**GLADIOLUS**, *Machæron*—g. *Cæruleus*, *Iris Germanica*.

**GLADIOLUS COMMUNIS**, *G. vulgaris*, *Victoria's rotunda*, *Cornflag*, *Victoria's feminea*, (F.) *Glayoul*. The root of this plant has been considered aphrodisiac. Applied in cataplasm, it has been extolled against scrofulous tumours.

**GLADIOLUS LUTKUS**, *Iris pseudacorus*—g. *Vulgaris*, *G. communis*.

**GLADIUS**, *Penis*.

**GLAMA**, *Lippitudo*, *Chassie*.

**GLAND**, *Glandula*, *Gran'dula*, from *glans*, 'an acorn, a kernel.' *Aden*. The ancient anatomists gave this name to a number of organs, of a texture generally soft, and a shape more or less globular, but differing greatly in their nature and functions. They applied it, for instance, 1. To those organs which separate from the blood, any fluid whatever. When such organs were composed of several lobules, united by common vessels, they received the name *conglomerate glands*, as the parotid, pancreas, &c. 2. To the reddish and spongy, knot-like bodies, which are met with in the course of the lymphatics. These they called *conglobate glands*;—see *Ganglion (lymphatic)*; and 3dly and lastly, to various other organs, whose intimate texture and functions are still unknown, as the *Pineal gland*, *Pituitary gland*, *Glands of Pacchioni*, *Thyroid gland*, *Thymus gland*, *Supra-renal glands*, &c. *Chaussier* restricts the word *gland* to those softish, granular, lobated organs, composed of vessels, and a particular texture, of which there are seven kinds in the human body, viz. the *lachrymal*, *salivary*, and *mammary*, the *testicles*, the *liver*, *pancreas*, and *kidneys*. These are all destined to draw from the blood the molecules necessary for the formation of new fluid; and to convey these fluids externally, by means of one or more excretory ducts. Several glands be-

sides their excretory ducts, have especial reservoirs, in which the fluids, secreted by them, collect, remain for a greater or less space of time, and undergo slight modifications before being evacuated;—such are, the gall-bladder for the liver, the urinary bladder for the kidneys, &c. Each gland has an organization peculiar to it, but we know not the intimate nature of the globular texture.—*Malpighi* believed that the vessels terminate in small, solid masses, to which he gave the name—*glandular grains*. In these, he considered, the excretory ducts originate. *Ruysh* thought that the glands are entirely vascular, and that the excretory ducts are immediately continuous with the *vasa afferentia*, &c. The best view, perhaps, is, that the exhaling or secreting vessel is distributed on the animal membrane, which forms the blind extremity of the excretory duct, and that the secretion is effected through it by means of cells.

The term *glande* (F.), is sometimes appropriated to the tumour formed by inflammation or engorgement of a lymphatic ganglion.

**GLAND**, *Glands*—g. Accessory, of the Parotid, see *Parotid*—g. *Globate*, *Conglobate gland*—g. *Prostate*, *Prostate*—g. *Salivary*, *abdominal*, *Pancreas*.

**GLANDAGE**, *Adenophyma*.

**GLANDE**, *Gland*—g. *Thyroids*, see *Thyroid gland*.

**GLANDERS**, *Equinia*—g. *Farcy*, see *Equinia*.

**GLANDES BRONCHIQVES**, *Bronchial glands*—g. *Conglobées*, *Conglobate glands*—g. *de Croissance*, *Waxing kernels*—g. *de Meibomius*, *Meibomius glands of*.

**GLANDIFORM CORPUSCLE**, *Acinus*—g. *Ganglion*, see *Ganglion*.

**GLANDIUM**, *Thymus*.

**GLANDS**, see *Quercus Alba*—g. Accessory, *Cowper's glands*—g. *Agminated*, *Peyer's glands*—g. *Aporic*, *Ganglions*, *glandiform*—g. *Blind*, *Ganglions*, *glandiform*—g. *Havers's*, *Synovial glands*—g. of *Bartholinus*, *Cowper's glands of the female*—g. *Cowper's*, see *Cowper's glands*—g. of *Duverney*, *Cowper's glands of the female*—g. *Lenticular*, *Lenticulares glandulæ*—g. *Lieberkühn's*, *Lieberkühn's glands*, see *Intestine*—g. *Miliary*, *Sebaceous glands*—g. *Oil*, *Sebaceous glands*—g. *Peyer's*, *Peyeri glandulæ*—g. *Renal*, *Capsules*, *renal*—g. *Sebaceous*, see *Sebaceous glands*—g. *Solitary*, *Brunner's glands*—g. of *Tyson*, *Sebaceous glands of Tyson*—g. of *Vesalius*, *Bronchial glands*—g. of *Willis*, *Albicantia corpora*, *Mamillary tubercles*.

**GLANDULA**, *Gland*—g. ad *Aures*, *Parotid*—g. *Avicennæ*, *Encystis*—g. *Bartholiniana*, *Sublingual gland*—g. *Basilaris*, *Pituitary gland*—g. *Colli*, *Tonsil*—g. *Innominata Galeni*, *Lachrymal gland*—g. *Lachrymalis*, *Lachrymal gland*—g. *Mucosa*, *Conglobate gland*—g. *Pinealis*, *Pineal gland*—g. *Pituitosa*, *Pituitary gland*—g. *Riviniana*, *Sublingual gland*—g. *Salivalis abdominalis*, *Pancreas*—g. *Socia Parotidis*, see *Parotid*—g. *Thymus*, *Thymus*—g. *Thyreidea*, *Thyroid gland*.

**GLANDULÆ AGMINATÆ**, *Peyeri glandulæ*—g. *Articulares*, *Synovial glands*—g. *Assistentes*, *Prostate*—g. *Brunneri*, *Brunner's glands*—g. *Cervicis uteri*, *Nabothi glandulæ*—g. *Duræ matris*, *G. Pacchioni*—g. *Duræ meningis*, *G. Pacchioni*—g. in *Agmen congregatæ intestinorum*,

Peyeri glandulæ—g. Intestinales, Peyeri glandulæ—g. Meibomianæ, Meibomius, glands of—g. Mucosæ coaginatæ intestinorum, Peyeri glandulæ—g. Muciparæ racematim congestæ intestinorum, Peyeri glandulæ—g. Myrtiformes, Carunculæ myrtiformes—g. Odoriferæ Tysoni, see Sebaceous glands—g. Peyerianæ, Peyeri glandulæ—g. Plexiformes, Peyeri g.—g. Prostatæ mulierum, see Corpus glandulosum mulierum—g. Sebacæ ciliares, Meibomius, glands of—g. Solitaria, Brunner's glands—g. Spuriæ, Peyeri glandulæ, Gangliosa, glandiform—g. Sudoriferæ, see Perspiration—g. Suprarenales, Capsule, renal—g. Tysoni, Sebaceous glands of Tyson—g. Vasculosæ, Conglomerate glands—g. Vesalianæ, Bronchial glands.

GLANDULAIRE, Glandular.

GLAND'ULAR, *Glandula'ris, Glandulo'sus*, (F.) *Glandulaire, Glanduleux*: having the appearance, form, or texture of *Glands*; as a *glandular* body, a *glandular* texture, &c.

GLANDULÉUX, Glandular.

GLANDULO'SO-CARNEUS. Ruysch gives this epithet to fleshy excrescences which he found in the bladder.

GLANDULOSUS, Glandular.

GLANS, ('an acorn.') *Balanus, Cyt'taros, Cuspis, Caput, C. Penis, Genital'e caput*, (F.) *Gland*. The extremity of the penis and of the clitoris. The *glans penis* is of a conical, slightly flattened shape. It is continuous with the urethra, which opens at its apex; and is circumscribed by a projecting edge called the *Corona glandis*. It is covered by a thin mucous membrane; is furnished, at its base, with sebaceous follicles, called *glandula odorifera Tysoni*, the secretion from which is termed *Smegma preputii*; and can, almost always, be covered by the reflection of the skin, called the *prepuce*. Lastly, it is formed of a spongy texture, susceptible of being thrown into erection.

GLANS, Bronchocele, Pessary, Suppository.

GLANS CLITOR'IDIS is smaller. It is imperforate, and likewise covered with a sort of prepuce formed by the mucous membrane of the vulva.

GLANS JOVIS THEOPHRASTI, *Fagus castanea*—g. Ulnæ, Olecranon—g. Unguentaria, *Guilandina* moringa, *Myrobalanus*.

GLAREA, Gravel.

GLASS, Vitrum.

GLAUBER'S SALTS, Soda, Sulphate of.

GLAUCEO, Glaucoma.

GLAUOMA, from *γλαυμος*, 'sea-green.' *Glauco'sis, Glauco'do, Cataracta glauca, Oculus cæ'vus, Cæ'vus, Phtharma glauco'ma, Porph'is glauco'sis, Apoglauco'sis*. Amongst the older pathologists, this word was used synonymously with cataract. It is now ordinarily applied to opacity of the vitreous humour or of the tunica hyaloidea, which manifests itself by a grayish, or greenish spot, apparent through the pupil. The diagnosis is generally difficult; and the disease is almost always incurable.

GLAUCOMA WOULDHOUSI, Cataract.

GLAUCOSIS, Glaucoma.

GLAYEUL, *Gladiolus vulgaris*—g. *Puant*, *Iris fetidissima*.

GLECHO'MA HEDERA'CEA, *Heder'ula, Chamæcl'ema, Calamin'ta humil'ior, Chamæcis'sus, Hed'era terre'stris, Nep'ta glecho'ma, Pannac'ea pectoris, Ground icy, Gill, Gill-go-by-ground, Alehoof, Robin runaway*, (F.) *Lierre*

*terrestre, Torratte*. This plant has a strong smell, and a bitterish, somewhat aromatic, taste. It has been considered expectorant and tonic.

GLECHON, *Mentha pulegium*.

GLECHONIT'IS. Wine, impregnated with the Glechon, *γληχων, mentha pulegium*, or penny-royal.

GLEET, see Gonorrhœa.

GLEME, *Chassis*, Lippitudo.

GLENE, *γληνη*. The pupil. The anterior part of the eye. The eyeball. The eye. According to some, the crystalline lens. Also, a glenoid cavity.

GLENITIS, Phacitias.

GLENOID, Glene.

GLE'NOID, *Glenoid'al, Glenoid'a'lis, Glenoi'des, Gleno'des, Gleno'deus*, from *γληνη*, 'the pupil,' and *ιδες*, 'resemblance.' (F.) *Glenoïde, Glénoïdale*. Any shallow, articular cavity, *Glene*, which receives the head of a bone; such as, 1. The *glenoid cavity* or *fossa* of the scapula, *Fossa glenoidæ, Omocol'yle, Acetabulum hu'meri, Cavitates hu'meri glenoides, Entypo'sis*, is situate at the anterior angle of the scapula; and is articulated with the head of the humerus. 2. The *glenoid cavity* or *fossa* of the temporal bone. It is seated between the two roots of the zygomatic process, and receives the condyle of the lower jaw.

GLENOID LIG'AMENT, (F.) *Ligament Glénoïdien*, is a fibro-cartilaginous ring or *bourrelet* which seems formed by the expansion of the tendon of the long head of the biceps brachialis, and surrounds the glenoid cavity of the scapula, the depth of which it increases.

GLENOÏDALE, Glenoid.

GLISCHRAS'MA, *Glis'chrotos*, from *γλισχροσμαινω*, (*γλια*, 'glue,') 'I become glutinous.' Lentor, viscosity.—Hippocrates.

GLISCHROCH'OLUS, from *γλισχροσ*, 'viscid,' and *χολη*, 'bile.' An epithet for excrement which is glutinous and bilious.

GLISCHROTOS, *Glischasma*.

GLISOMARGO, Creta.

GLOBE, Bandage (head)—g. of the Eye, see Eye—g. Flower, *Cephalanthus occidentalis*.

GLOBULAIRE PURGATIVE, *Globularia alypum*.

GLOBULARIA ALYPUM, *Globula'ria, Montpel'lier Turbith, (F.) Globulaire purgative, Turbith blanc*. The leaves of this plant are bitter, and have been used in intermittents and in constipation. See *Alypum*.

GLOB'ULE, *Glob'ulus, Sphæ'rion, Sphæ'rula*: a small globe.

GLOBULES OF THE BLOOD, *Blood-corpuscles, Blood-disks, Blood-vesicles, Glob'uli, Vesic'ule, Sphæ'rula* seu *Follic'uli sanguinis*, (F.) *Globules du sang*, are small, circular bodies, which are particularly observable when the transparent parts of cold-blooded animals are examined by the aid of the microscope. They were first seen by Malpighi, and are met with in the blood of all animals. The globules of blood are circular in the mammalia, and elliptical in birds and cold-blooded animals. They are, also, flat in all animals, and composed of a central nucleus enclosed in a membranous sac. Chemically they consist of hæmatin and globulin—*hæmato-globulin*.

SIZE OF THE GLOBULES.

GLOBULE D'ARANTIUS, see Sigmoid valves—*g. du Sang*, Globule of the blood.

GLOBULES, PUS, see Pus.

GLOBULI ARTERIARUM TERMINI, see Acinus—*g. Sanguinis*, Globules of the blood—*g. Tartari martiales*, Ferrum tartarizatum—*g. Tartratis ferri et lixivii*, Ferrum tartarizatum.

GLOB'ULIN, *Glob'uline*, *Blood ca'sein*. The colourless substance that remains after the abstraction of the colouring matter of the blood-corpuscle. It is a peculiar albuminous principle. The globulin of Berzelius consists of the envelopes of the blood globules, and of the part of their contents that remains after the extraction of the hæmatosin. Lecanu regards it as identical with albumen; and, according to Mulder, it belongs to the combinations of protein.

The term *globulin* is likewise given by M. Donné to small granulations appertaining to the chyle, which are observable in the blood with the microscope. They are small white roundish, isolated or irregularly agglomerated grains; of about the 1-300 of a millimètre in diameter, and are regarded by M. Donné as the first elements of the blood globules. They are the *white granulated corpuscles* of Mandl.

GLOBULUS ARANTII, see Sigmoid valves—*g. Nasi*, see Nasus—*g. Sanguineus*, Punctum saliens—*g. Stapedis Ossis*, Os orbiculare.

GLOBUS HYSTERICUS, *Nodus Hystericus*, *An'gonté*, *Anad'romé*. A sensation, experienced by hysterical persons, as if a round body were rising from the abdomen towards the larynx, and producing a sense of suffocation.

GLOBUS MAJOR see Epididymis—*g. Minor*, see Epididymis—*g. Martialis*, Ferrum tartarizatum.

GLOBUS UTERI'NUS. A term applied by accoucheurs to the round tumour, formed by the uterus in the lower part of the abdomen, immediately after delivery.

GLOMERATE, Conglomerate.

GLOSSA, *Glossa*, 'the tongue.' The power of speech. Speech. Hence:

GLOSSAGRA, *Glossalgia*.

GLOSSAL'GIA, *Glos'sagra*, from *γλωσσα*, 'the tongue,' and *αλγος*, 'pain.' Pain in the tongue.

GLOSSANIS'CHUM, *Glossanoch'cus*, *Glossan'ochum*, from *γλωσσα*, 'tongue,' and *ανιχειν*, 'to hold up.' An instrument for holding up the tongue.

GLOSSANOCHÆUS, *Glossanischum*.

GLOSSANOCHUM, *Glossanischum*.

GLOSSAN'THRAX, *Pestis glossan'thrax*, from *γλωσσα*, 'the tongue,' and *ανθραξ*, 'a carbuncle.' *Carbuncle of the tongue*. A disease more common in cattle than man.

GLOSSEPIGLOTT'IC, *Glossopiglott'icus*. Relating to the tongue and epiglottis, as *Ligamentum glossopiglott'icum*.

GLOSSIANUS, Lingual muscle.

GLOSSITIS, from *γλωσσα*, 'the tongue,' and *itis*, a suffix denoting inflammation. *Glosson'cus inflammato'rius*, *Angi'na lingu'ria*, *Inflammat'io Lingua*, *Inflammation of the tongue*, (F.) *Inflammation de la Langue*. When confined to the mucous membrane, it is of slight importance. That which affects the whole of the tongue is a serious disease, and requires the vigorous use of antiphlogistics. It is rare.

GLOSSOC'ACE, from *γλωσσα*, 'the tongue,' and *μακος*, 'evil.' Ulceration of the tongue with symptoms of adynamic fever.

GLOSSOCARCINOMA, *Glossocarc'ina*, *Carcinoma Lingua*, from *γλωσσα*, 'the tongue,' and *καρκινωμα*, 'cancer.' Cancer of the tongue.

GLOSSOCAT'CHUS, *Glossocat'oché*, from *γλωσσα*, 'the tongue,' and *κατ'χω*, 'I arrest.' *Lingua Detentor*, *Speculum Oris*, (F.) *Abaisseur de la langue*. An instrument, the invention of which is attributed to Paulus of Ægina, and which was employed to depress the tongue, in order to examine diseases of the fauces. It was composed of two branches; one of which had, at its extremity, a plate for depressing the tongue; whilst the other, shaped like a horse-shoe, was applied under the chin. The finger, or the handle of a spoon, or a spatula, is now alone used in similar cases. See *Catagolossus*.

GLOSSOC'E'LE, from *γλωσσα*, 'the tongue,' and *κηλη*, 'hernia,' 'tumour.' *Hernia of the Tongue*, *Paragloss'e*, *Prolapsus lingua*, *Glossomagis'tus*, *Glossopto'sis*. Projection of the tongue from the mouth. It depends, generally, on an inflammatory swelling of the organ. At times, however, a *chronic glossocole*, or sort of œdematous engorgement, is met with; which proceeds to a great length; and deforms the dental arches, the lips, &c. Inflammatory glossocole must be combated by antiphlogistics. In the œdematous kind, such as is sometimes caused by excessive salivation, the infiltrated fluid may be pressed back by the hand of the practitioner, to get the tongue behind the teeth; and it may be kept there by a piece of gauze tied over the mouth. The chronic, elongated kind sometimes requires amputation of a portion of the organ.

GLOSSOCOMA, *Glossospasmus*.

GLOSSOCOMON, *Glossocomum*, *Glossocom'ion*, from *γλωσσα*, 'the tongue,' and *κομειν*, 'to guard.' The ancients gave this name to a small case for holding the tongues of their wind-instruments. By extension, it was applied to the box or cradle in which fractured limbs were kept. We find, in the ancient writers, a *Glossocomon* of Hippocrates, of Nymphodorus, Galen, &c.

GLOSSODESMUS, *Frænum lingua*.

GLOSSO-EPIGLOT'TICUS. That which belongs to the tongue and epiglottis. Some anatomists have so denominated certain fleshy fibres, which pass from the base of the tongue

towards the epiglottis. These muscles are more evident in some of the mammalia than in man; and their use seems to be,—to raise the epiglottis, and to remove it farther from the glottis. Santorini, who described them after Eustachius, calls them *Retractorēs Epiglottidis*.

**GLOSSOGRAPHY**, *Glossographia*, from *γλωσσα*, 'the tongue,' and *γραφη*, 'a description.' An anatomical description of the tongue.

**GLOSSO-HYAL**. A name given, by Geoffroy Saint-Hilaire, to the posterior cornua of the os hyoides.

**GLOSSOLOGY**, *Glossologia*, from *γλωσσα*, 'the tongue,' and *λογος*, 'a treatise,' 'a discourse.' A treatise on the tongue.

**GLOSSOLYSIS**, *Glossoplegia*, *Paralysis linguæ*, from *γλωσσα*, 'the tongue,' and *λυσις*, 'solution.' Paralysis of the tongue.

**GLOSSOMANTIA**, *Prognosis ex linguâ*, from *γλωσσα*, 'the tongue,' and *μαντεια*, 'divination.' Prognosis from the state of the tongue.

**GLOSSOMEGISTUS**, *Glossocèle*, *Paraglossæ*.

**GLOSSONCUS**, from *γλωσσα*, 'the tongue,' and *ογκος*, 'tumour.' *Exonco'sis linguæ*. Swelling of the tongue.

**GLOSSONCUS INFLAMMATORIUS**, *Glossitis*.

**GLOSSO-PALATINUS**, *Glossostaphylinus*—g. Pharyngeal, Pharyngo-glossal.

**GLOSSO-PHARYNGEAL**, *Glossopharyngeus*—g. Nerve, Pharyngo-glossal nerve.

**GLOSSO-PHARYNGEUS**, *Glossopharyngeus*, from *γλωσσα*, 'the tongue,' and *φαρυγξ*, 'the pharynx.' Belonging to the tongue and the pharynx. Some anatomists thus designate certain fleshy bundles, which arise from the lateral parts of the base of the tongue, and are inserted into the parietes of the pharynx. They form part of the constrictor pharyngis superior.

**GLOSSOPLÉGIA**, *Glossylisis*.

**GLOSSOPTOSIS**, *Glossocèle*.

**GLOSSOSCIRRHUS**, *Glossocarcinoma*.

**GLOSSOCOPTIA**, from *γλωσσα*, 'the tongue,' and *οπτια*, 'I view.' Inspection of the tongue as an index of disease.

**GLOSSOSPASMUS**, *Glossocoma*, *Spasmus linguæ*, from *γλωσσα*, 'the tongue,' and *σπασμος*, 'spasm.' 'ramp or spasm of the tongue.'

**GLOSSOSPATHA**, *Spatula pro ore*, from *γλωσσα*, 'the tongue,' and *σπαθη*, 'spatula.' A spatula for pressing down the tongue to enable the fauces to be examined.

**GLOSSO-STAPHYLINUS**, from *γλωσσα*, 'the tongue,' and *σταφυλη*, 'the uvula.' *Glossopalatinus*, *Palato-glossus*, *Constrictor Isthmi Fauicium*. A small, thin, narrow, and long muscle, which arises from the base of the tongue, and is inserted at the inferior and lateral part of the velum palati, in the anterior pillar of which it is situate. Its use is to contract the isthmus faucium, by depressing the velum palati, and raising the base of the tongue.

**GLOSSOSTERE'SIS**, *Lingua extirpatio*, from *γλωσσα*, 'the tongue,' and *στερησις*, 'privation.' Extirpation of the tongue.

**GLOSSOSTROPHIA**, from *γλωσσα*, 'tongue,' and *στρεφω*, 'I turn.' Doubling of the point of the tongue upwards and backwards,—said to have been a mode of suicide. (?)

**GLOSSOTOMY**, *Glossotomia*, from *γλωσσα*, 'the tongue,' and *τομη*, 'to cut.' Dissection of the tongue. Amputation of the tongue.

**GLOSSYPERTROPHIA**, from *γλωσσα*, 'the

tongue,' *σπερ*, 'over,' and *τροφη*, 'to nourish.' Hypertrophy or supernutrition of the tongue.

**GLOTTA**, *Glossa*, *Tongue*.

**GLOTTIS**, *γλωττις*, (also, 'the mouth-piece of a flute,') *Ligula*. A small oblong aperture, situate at the upper part of the larynx. This aperture is comprised between the *chordæ vocales*. It is narrow, anteriorly; wider, posteriorly; and is capable of being modified by muscular contraction, as may be required by the voice. It is by the *chordæ vocales*, that voice is produced. The glottis is nearly an inch long in the adult male:—less in the female and child.

*Glottis* is, by some, used synonymously with ventricle of the larynx: with others, it includes the whole of the larynx.

**GLOTTIS**, *LIRS* or *TEX*, Thyreo-arytenoid ligaments.

**GLOUGLOU D'UNE BOUTEILLE**, Gurgling.

**GLOUTERON**, *Arctium Lappa*—g. *Petit*, *Xanthium*.

**GLOUTIUS**, *Gluteal*—g. *Maximus et extremus*, *Glutæus maximus*—g. *Secundus et medius*, *Glutæus medius*—g. *Tertius et intimus*, *Glutæus minimus*.

**GLOUTON**, *Glutton*.

**GLOW WORM**, *Cicindela*.

**GLUANT**, *Glutinous*.

**GLUCOSE**, from *γλυκος*, 'sweet.' A name for starch sugar, diabetic sugar or the sugar of fruits.

**GLUCOSURIA**, *Diabetes mellitus*.

**GLUE BONE**, *Osteocolla*.

**GLUE FISH**, *Ichthyocolla*.

**GLUTÆUS MAGNUS**, *G. major*—g. *Major*, *G. Maximus*.

*GLUTÆUS MAXIMUS*, *Glutæus major*, *Maximus et extremus gloutius*, *G. magnus*, *Ilio-sacro-femoral*; *Sacro-femoral*, (Ch.,) (F.) *Musculus grand fessier*. This muscle is situate at the posterior part of the pelvis, and at the upper and posterior part of the thigh. It is large, thick, and quadrilateral; it is attached, *above*, to the posterior part of the crista ilii, to the part of the ilium comprised between the crista and the upper curved line, to the posterior surface of the sacrum, coccyx, and great sacro-sciatic ligament; and *below*, it terminates by a broad aponeurosis, which is inserted into the rugged surface that descends from the trochanter major to the linea aspera of the femur. This muscle extends the thigh on the pelvis, and rotates the thigh outwards. It is greatly concerned in station and progression.

*GLUTÆUS MEDIUS*, *Gloutius Secundus et medius*. (F.) *Ilio-trochanterian*: *Grand Ilio-trochanterien*, (Ch.,) *Moyen Fessier*. This muscle is situate in part beneath the preceding; it is broad, very thick, radiated and triangular; attached, *above*, to the crista ilii, and to the part of the outer surface of that bone comprised between the three anterior fourths of its crista, its upper curved line, and its lower; and *below*, it ends by a tendon, inserted at the upper edge of the great trochanter. It is an abductor of the thigh; but can turn the thigh outwards or inwards, according as its posterior or inferior fibres are thrown separately into contraction.

*GLUTÆUS MINIMUS*, *Glutæus minor*, *Ilio-sciio-trochanterian*, *Tertius et intimus Gloutius* (F.) *Petit Fessier*;—*Petit Ilio-trochanterien*

(Ch.) This muscle, which is situate beneath the preceding, is flat, triangular, and with radiated fibres. It is attached, *above*, to the external surface of the os ilii, from the inferior curved line to the acetabulum; and, *below*, is inserted into the anterior part of the great trochanter. It has the same uses as the preceding.

GLUTEUS MINOR, G. minimus.

GLUTEAL, *Gloutius*, *Gluta'us*, from γλυτός, 'the nates' or 'buttocks.' (F.) *Fessier*. That which belongs or relates to the nates. This name has been given to many parts which compose the nates.

GLUTEAL APONEUROSIS. The upper and back part of the femoral fascia. In it is a remarkable opening, called the *gluteal arch*, for the passage of the gluteal vessels and nerves.

GLUTEAL ARCH, see Gluteal aponeurosis.

GLUTEAL ARTERY, *Posterior Iliac Artery*, (F.) *Artère fessière*, is one of the largest branches of the hypogastric. It makes its exit from the pelvis at the upper part of the superior sciatic foramen; gains the posterior part of the pelvis, and divides into two branches;—the one *superficial*, the other *deep-seated*. The last subdivides into three secondary branches, whose ramifications are distributed particularly to the *Glutæi*, *Longissimus Dorsi*, *Sacro-lumbalis*, &c. and anastomose with the sciatic and internal circumflex arteries.

GLUTEAL NERVE, (F.) *Nerv Fessier*, is a large branch, furnished by the 5th pair of lumbar nerves. It is chiefly distributed to the glutæi muscles.

GLUTEAL VEIN, (F.) *Veins fessièrè*, follows the same march as the artery of the same name.

GLUTEN, *Glutinum*, *Lentor*, 'glue, paste.' An immediate principle of vegetables. It is soft, of a grayish white, viscid consistence, and very elastic. Exposed to the air, it becomes hard, brown, and fragile; and, in moist air, putrefies. Water and alcohol do not dissolve it. It is soluble in vegetable, and in weak mineral acids, at a high temperature. The farinæ, in which it is found, are those preferred for the preparation of bread; on account of the property it has of making the paste rise. It is a compound of protein, and has been ranged amongst the "*proteinaceous alimentary principles*" by Dr. Pereira. By washing wheaten dough with a stream of water, the gum, sugar, starch and vegetable albumen are removed: the ductile, tenacious, elastic, gray mass left is the gluten, *common gluten*, *Beccaria's gluten*. *Pure gluten* is the soluble portion on boiling common gluten in alcohol.

GLUTEN ARTICULORUM, Synovia—g. *Beccaria's*, see Gluten—g. Bread, see Bread, gluten—g. Common, see Gluten—g. Pure, see Gluten.

GLUTI, Nates.

GLUTIA, Nates, Quadrigemina corpora.

GLUTINANS, Agglutinant.

GLUTINATIF, Agglutinant.

GLUTINATIO, Agglutination.

GLUTINE' X, Glutinous.

GLUTINOUS, *Glutinosus*, *Collo'des*, from *gluton*, 'paste, glue.' (F.) *Glutineux*, *Gluant*. An epithet given to substances taken from the animal or vegetable kingdom, and endowed with unusual viscid'ity. The decoctions of marshmallows, and figs, and the jelly of hartshorn are said to be glutinous.

GLUTINUM, Gluten.

GLUTOI, Nates.

GLUTTON, same etymon as the next. *Gastrimar'gus*, *Helluo*, *Mando*, *Gulo'sus*, *Lurco*, (F.) *Glouton*, *Gourmand*, *Goulu*. An excessive eater.

GLUT'ONY, from *glutio*, 'I swallow,' *glutus*, 'the gullet.' *Limo'ris Helluo'num*, *Gast'ris'mus*, (F.) *Gourmandise*. Excessive appetite, owing often to habitual indulgence.

GLUTTUS, Œsophagus.

GLUTUS, Trochanter major.

GLYCANSIS, Edulcoration.

GLYCASMA, from γλυκύς, 'sweet.' A sweet wine, prepared from must.—Lindæ.

GLYCERATON, Glycyrrhiza.

GLYCERIN, see Fat.

GLYCIPICROS, Solanum dulcamara.

GLYCISIDE, Psœonia.

GLYCYPHYTON, Glycyrrhiza.

GLYCYRRHIZ'ZA, from γλυκύς, 'sweet,' and ρίζα, 'a root.' *Glycyrrh'za Glabra*, *Liquori'tia*, *Liquori'tia Scyth'ica*, *Glycyrd'aton*, *Glycyph'ytton*, *Liquorice*, *Adip'sos*, *Aleacas*, *Al'mos*, (F.) *Réglisse*. Ord. Leguminosæ. *Sz. Syst.* Diadelphia Decandria. The root of this southern European plant is inodorous; has a sweet taste; is mucilaginous; and leaves, when peeled, a degree of bitterness in the mouth. It is used as a demulcent, and chiefly in catarrh. The extract, made from it and sold in the shops, is known under the name *Spanish Liquorice* or *Liquorice Juris*, (F.) *Jus de Réglisse*.

*Pectoral Balsam of Liquorice*—a quack preparation—is said by Dr. Paris to consist chiefly of *Paragoric Elisair*, strongly impregnated with *Oil of Aniseed*.

GLYCYRRHCE'A, from γλυκύς, 'sweet,' and γένω, 'I flow.' A discharge of saccharine fluid from the system.

GLYCYRRHCEA URINOSA, Diabete mellitus.

GLYSTER HERBS, *Herbes pro Enem'at*. The herbs ordinarily sold by the English apothecary under this title, are:—*mallow leaves*, one part; *chamomile flowers*, one part. (3iss to Oj of water.)

GNAMPISIS, Curvature.

GNAPHALIIUM DIOICUM, Antennaria dioica.

GNAPHALIIUM MARGARITACEUM; *Cudweed*, *Life everlasting*. An indigenous plant, growing in woods and fields, and flowering in August. Its virtues are not defined, and the same may be said of

GNAPHALIIUM POLYCEPH'ALUM; *Sweet-scented Life everlasting*.

GNATHALGIA, Neuralgia maxillarum.

GNATHANCYLO'SIS, from γνάθω, 'the jaw,' and κύκλωσις, 'stiffness of joint.' Ankylosis of the lower jaw.

GNATHITIS, *Inflammatio gena*, from γνάθος, 'the cheek, the jaw.' Inflammation of the cheek or upper jaw.

GNATHMUS, Gnathus.

GNATHOCEPH'ALUS, from γνάθος, 'the jaw,' and κεφαλή, 'head.' A monster who has no head visible externally, but exhibits voluminous jaws.—G. St. Hilaire.

GNATHOCYNANCHE, Cynanche parotidæ.

GNATHONEURALGIA, Neuralgia maxillarum.

GNATHOPLASTICE, from γνάθος, 'cheek,'

and πλαστικός, 'formative.' The formation of an artificial cheek.

**GNATHOPLEGIA**, from γνάθος, and πλεγή, 'a stroke.' Paralysis of the cheek.

**GNATHORRHAG'IA**, from γνάθος, and ῥιζυμι, 'to burst forth.' Hemorrhage from the internal surface of the cheeks.

**GNATHOSPASMUS**, Trismus.

**GNATHUS**, *Gnathmus*, from γνάθος, 'I scrape, rub.' The *cheek*, the *jaw*. Also, the part of the jaws in which the teeth are fixed.—Hippocrates, Fœsius. See *Bucca*, *Gena*, and *Maxillary Bone*.

**GNESIOS**, Legitimate.

**GNOME**, Intellect.

**GNOSIS**, γνώσις, 'knowledge.' A common suffix, as in *Diagnosis*, *Prognosis*, &c.

**GOACONAZ**, see *Toluifera balsamum*.

**GOATS' BEARD**, COMMON, *Tragopogon*.

**GOATS' THORN**, *Astragalus verus*.

**GOBLET ÉMÉTIQUE**, Goblet, emetic.

**GOBLET, EMETIC**, *Poculum emeticum*, *Calix vomitoria*, (F.) *Goblet émetique*. A vessel, made by pouring melted antimony into a mould. By putting wine into this and allowing it to stand some time, it acquires the property of producing vomiting. This kind of emetic has been long rejected, as the practitioner could never be certain of the dose he exhibited.

**GODFREY'S CORDIAL**. A celebrated nostrum, for which Dr. Paris has given the following formula. Infuse ℥ij of *sassafras* and of the seeds of *caraway*, *coriander*, and *anise*, of each ℥ij, in six pints of *water*. Simmer the mixture until reduced to ℔iv: then add ℔vj of *treads*, and boil the whole for a few minutes. When cold, add ℥ij of *tincture of opium*. The following form is recommended by a committee of the Philadelphia college of Pharmacy. *Tinct. Opii*, Oiss; *Syrupi Nigri*, Oxxvj; *Alcoholis*, Oij; *Aquæ*, Oxxvj; *Carbonatis Potassæ*, ℥ijias; *Olei Sassafras*, f. ℥iv, M. It is anodyne.

**GODRONNÉ (CANAL)**, *Canalis Pettid-nus*, *Couronne ciliare*, *Canal de PETIT*, *Canal godronné*, *Bulbular canal of Petit*. Petit gave this name (from (F.) *godron*, 'a plait or fold,') to the semicircular canal, formed by the tunica hyaloidea around the edge of the crystalline; because it appears, as it were, plaited or festooned.

**GOGGLE-EYE**, Strabismus..

**GOÏTRE**, Bronchocele—*g. Leaf*, see *Laminaria*.

**GOÏTRE STICKS**. In South America the stems of a seaweed are so called, because they are chewed by the inhabitants where goître prevails.—*Royle*.

**GOÏTREUX**, (F.) One affected by *Goître* or Bronchocele.

**GOLD, Aurum, Chrysos, Sol, Rex metallo-rum**, (F.) *Or*. A solid, yellow, very brilliant, hard, very ductile, malleable, tenacious, and heavy metal; found in nature, either in its native state, or combined with a little silver, copper or iron. S. g. 19.25.

*Muriate of Gold, Chloride of Gold, Auri Chlor'idum, A. Terchio'idum, A. Mu'rias, A. Chlorure'tum, A. Muriat'icum, A. Chlorat'um, A. Oxydulat'um muriat'icum, A. Salit'um*, (F.) *Chlorure d'or, Muriate d'or, Hydro-chlorate d'or*, has been admitted into the Pharmacopœia of the United States, and into that of Paris, &c.

The formulæ, however, differ. That of the United States is a muriate with two bases; and is prepared, according to the form of Dr. Chretien, by dissolving the gold in a mixture of nitric and muriatic acids, and adding chloride of sodium to the residuum after evaporation; then redissolving and evaporating slowly to dryness. The Parisian formula for the *Muriate d'or*, *Murias* seu *Chlorure'tum Auri*, consists in simply dissolving the gold in the acids, and evaporating to dryness. It has been recommended as an antisyphilitic in old, rebellious, venereal affections, exostoses, and in venereal, scrofulous or cancerous glandular enlargements. Dose, gr. 1-8th to gr. ss, rubbed on the tongue or gums. Internally, one-sixteenth of a grain, in pill.

Various other preparations, as the *Cyanide* or *Terey'anide*, (*Auri Cyan'idum, A. Cyanure'tum, A. Tereyan'idum*, (F.) *Cyanure d'or*;) the metallic gold in a state of division (*Aurum metallicum, Pulvis Auri*) obtained by amalgamating gold with mercury and driving the latter off by heat, and in the form of filings (*Aurum limat'um*;) the *Chloride of Gold and Sodium*, (*Aurum muriat'icum natronat'um, A. muriat'icum, A. chlorat'um natronat'um, Chlorat'um Au'ricum Chlorat' nat'ris, Murias Au'rico-nat'ricum, Chlorure'tum auri et nat'ris, S'odii auraterchio'idum, Hydrochlorate or muriate of Gold and Soda*, (F.) *Chlorure d'or et de Sodium, Hydrochlorate ou muriate d'or et de Soude*; the *Nitromuriate of Gold*, (*Aurum Nitrico-muriat'icum, Auri nitromurias*, (F.) *Nitromurias d'or*), the *Oxide of Gold*, (*Auri Ox'idum, Aurum Oxida'tum, Auri teroz'idum, Perox'ide of gold, Auric acid*, (F.) *Oxide d'or*); and the *Iodide of Gold*, (*Auri Iod'idum, A. Iodure'tum*, (F.) *Iodure d'or*), have been employed in the like affections, and with similar results.

**GOLD-BEATER'S SKIN**. The intestina recta of the ox, which have been beaten quite smooth, for the manufacture of gold leaf. Used as a defensive dressing for slight cuts, &c.

**GOLD, CHLORIDE OF**, see *Gold—g. Cyanide* of, see *Gold—g. Hydrochlorate* of, see *Gold—g. Iodide* of, see *Gold—g. Muriate* of, see *Gold—g. Nitro-muriate* of, see *Gold—g. Oxide* of, see *Gold—g. Peroxide* of, see *Gold—g. Tereyanide* of, see *Gold—g. and Sodium, Chloride* of oxide of, see *Gold—g. and Soda, hydrochlorate* of, see *Gold—g. and Soda, muriate* of, see *Gold*.

**GOLD LEAF, Aurum foliat'um, Aurum in libellis**. Used to gild pills and to plug carious teeth.

**GOLD THREAD**, *Coptis*.

**GOLDEN ROD**, *Solidago virgaurea*.

**GOLDENS**, *Chrysanthemum leucanthemum*.

**GOLDEN-SEAL**, see *Calumba, Hydrastis Canadensis*.

**GOLDWASSER**, see *Spirit*.

**GOLFE**, *Sinus—g. de la Veine jugulaire*, see *Jugular veins*.

**GOLUNCHA**, *Menispermum cordifolium*.

**GOMME**, *Gumma, Gummi—g. Adragant*, *Tragacanth—g. Ammoniaque*, *Ammoniac gum—g. Arabique*, *Acacis gummi—g. Astringente de Gambis*, see *Butea frondosa—g. Caragne*, *Caranna—g. Carano*, *Caranna—g. Gnaïac*, *Guaïacum—g. Gutte*, *Cambogia—g. de Lièvre*, see *Hedera helix—g. du Pays*, *Gummi nostras g. Sérapihique*, *Sagapenum*.

**GOMPHIASIS**, *Gomphias' mus*, from γομφιας,

'a nail.' A disease of the teeth, and particularly of the molares; looseness of the teeth in their sockets. *Agomphi'asia*. Pain in the teeth. Odontalgia.

GOMPHIASMUS, Gomphiasis.

GOMPHIOL, Molar tooth.

GOMPHOMA, Gomphosis.

GOMPHOSIS, *Cardianamantum, Clavatio, Gomphoma, Coagmentatio, Inclavatio*, from  $\gamma\omicron\mu\phi\omicron\varsigma$ , 'a nail.' *Engomphi'osis*. An immovable articulation, in which one bone is received into another, like a nail or peg into its hole. Gomphosis is only met with in the articulations of the teeth with the alveoli. It is, also, called *Articulation par implantation*.

GOMPHUS, Clavus.

GONACRASIA, Spermatorrhœa.

GONACRATIA, Spermatorrhœa.

GON'AGRA, *Gonyagra*, from  $\gamma\omicron\nu$ , 'the knee,' and  $\alpha\gamma\alpha$ , 'a prey.' That which attacks the knees. Gout in the knees. Paracelsus calls it *Gonyagra*.

GONAL'GIA, from  $\gamma\omicron\nu$ , 'the knee,' and  $\alpha\lambda\gamma\omicron\varsigma$ , 'pain.' Pain in the knees. *Gonyal'gia*. This is almost always produced by gout. It may, however, depend on some other disease, either of the knee or of another part—particularly of the hip-joint.

GONARTHRTIS, from  $\gamma\omicron\nu$ , 'the knee,'  $\alpha\rho\theta\rho\varsigma$ , 'joint,' and  $\acute{\iota}\tau\iota\varsigma$ , denoting inflammation. Inflammation of the knee-joint.

GONARTHROCEAE, Gonocœce.

GONAURA, see Sperm.

GONDOLE OCULAIRE, Scaphium oculare.

GONDRET'S AMMONIACAL CAUSTIC, *Pommade de Gondret*—g. Counter-irritant, *Pommade de Gondret*.

GONÈ, *Gones, Genit'ra*. The semen; (hence, gonorrhœa)—the uterus, offspring. Hipocœrates. See Epigone and Generation.

GONECYSTIDES, Vesiculae seminales.

GONECYSTITIS, *Inflammatio vesiculærum seminalium*, from  $\gamma\omicron\eta$ , 'sperm,'  $\kappa\upsilon\sigma\tau\iota\varsigma$ , 'bladder,' and  $\acute{\iota}\tau\iota\varsigma$ , 'denoting inflammation.' Inflammation of the vesiculae seminales.

GONEPCEUS, Spermatopœus.

GONEPOIETICUS, Spermatopœus.

GONFLEMENT, Swelling.

GONGRONA, Bronchocele.

GONGROPHTHISIS, Phthisis pulmonalis.

GONGYLIDIUM, Pilula.

GONGYLION, Pilula.

GONGYLIS, Pilula.

GONOBOLIA, Ejaculation, spermatic.

GONOC'ACÈ, *Gonarthroc'acè*, from  $\gamma\omicron\nu$ , 'the knee,' and  $\kappa\alpha\kappa\epsilon$ , 'evil.' *Tumor genu albus*. White swelling of the knee. Hydrarthrus.

GONOCELE, Spermatocœle.

GONODES, from  $\gamma\omicron\eta$ , 'seed,' and  $\upsilon\delta\omicron\varsigma$ , 'appearance.' *Genit'ra sim'ilis*. Similar to sperm. *Sperm'atoid, Spermato'des, Spermato'des*. A term appropriated to any substance, which resembles sperm.

GONOIETICUS, Spermatopœus.

GONORRHEE BÂTARDE, Gonorrhœa spuria.

GONORRHŒA. Erroneously called from  $\gamma\omicron\eta$ , 'sperm,' and  $\rho\eta$ , 'I flow,' because the older writers believed it to be a flux of semen. *Blennorrh'gia, Blennorrh'a, Blennur'ithria, Phallorrh'a, Medorrh'a, M. viri'lis, Catar'*

*rhus Gonorrh'ea, C. urethra, Urethrit'is, Inflammatio urethra, Urethral'gia, Proflu'vium mucosum urethra, Blennorrh'a urethral'is, Catar'hus urethral'is, (F.) Écoulement, Urethrit'is, Uretritis*. An inflammatory discharge of mucus from the membrane of the urethra in both sexes; and from that of the prepuce in man, and the vagina in woman. It may be excited spontaneously, or by irritants applied directly to the membrane; but is, usually, produced by impure connexion. Two great varieties have been generally reckoned.—1. GONORRHŒA PURA

VEL BENIGNA. That which does not follow an impure connexion; (F.) *Echauffement*; the *Blennorrh'gia benigna, Castorrh'a benigna, Catar'hus Urethra, Gonorrh'ea catarrhal'is, G. non contagio'sa*:—and 2. GONORRHŒA IMPURA, maligna, contagio'sa, syphilitica, et virulenta; *Fluxus albus malignus, Fluxus venereus, Blennorrh'a luo'des, Myzio'sis, Luos gonorrh'o'ica, Scroph'ula gonorrh'o'ice, Tubercula gonorrh'o'ica, Clap, (F.) Chaudépisse*; that which is the result of impure commerce. The French, also, distinguish the *Chaudépisse sèche*, or that, unaccompanied with discharge; and the *Chaudépisse cordée, Gonorrh'ea cordata*, or that accompanied with chordee, and which, of course, occurs only in the male. It is the kind which most frequently engages the attention of the practitioner, and is characterized by mucous discharge from the urethra or vagina intermixed with specific matter, and accompanied by burning pain on micturition. It is decidedly infectious. It is, however, a distinct disease from syphilis, and never produces it. Its duration is various, but the inflammatory symptoms usually subside in four or five weeks; leaving generally behind more or less of the gonorrhœa mucosa or gleet. Gonorrhœa of every kind, attended with any inflammatory symptoms, is best treated by the antiphlogistic regimen; avoiding every kind of irritation, and keeping the body cool by small doses of salts, and the urine diluted by the mildest fluids. After the inflammatory symptoms have subsided, cubeb, or the balsam of copaiba, exhibited in the dose of a teaspoonful, three times a day, will be found effectual: indeed, during the existence of the inflammatory symptoms, it often affords decided relief. Injections are rarely required.

Sometimes, gonorrhœa affects the glans; when it is called *Gonorrh'ea spuria, G. Bal'ani, Balanoblennorrh'a, Balanorrh'a, Balan'itis, Blennorrh'gia spuria vel notha, (F.) Blennorrh'gia du gland, Gonorrh'ée bâtarde, Fausse Blennorrh'gia*. It requires only cleanliness and cooling lotions.

Some other varieties of gonorrhœa have been enumerated, but they are of little moment.

In consequence of repeated attacks of gonorrhœa, or of the debility induced by a single attack, it not unfrequently happens, as already remarked, that a constant, small discharge occurs, or remains behind, after all danger of infection is removed. The great difference between it and gonorrhœa is, that it is uninfected. The discharge consists of globular particles, contained in a slimy mucus, and is generally devoid of that yellow colour, which characterizes the discharge of gonorrhœa virulenta. It is unattended with pain, scalding, &c. To this state the names *Gleet, Gonorrh'a muc' sa, Blennorrh'a achron'ica, Blennorrh'a, &c.* have

been given. It is commonly a disease of some duration, and demands the use of the copaiba, astringent injections; and, if obstinate, the introduction of the bougie.

**GONORRŒA BALANI**, *G. spuria*—*g.* Benigna, *Leucorrhœa*—*g.* Catarrhalis, *G. pura*—*g.* Chordata, *Chordee*.

**GONORRŒA DORMIENTIUM**, *G. Oniurogonos*. The seminal discharge, which occurs during sleep, and is occasioned by libidinous dreams. *Pollution*.

**GONORRŒA LAXORUM**, *G. libidinosæ*, *Spermorrhœa atonica*, consists of a pellucid discharge from the urethra, whilst awake, without erection of the penis, but with venereal thoughts.

**GONORRŒA LAXORUM**, *Pollution*, *G. libidinosæ*—*g.* Mucosa, (*gleet*), see *Gonorrhœa*—*g.* Noncontagiosa, *G. pura*—*g.* Notha inveterata, *Leucorrhœa*—*g.* Oniurogonos, *G. dormientium*, *Pollution*—*g.* Vera, *Pollution*, *Spermatorrhœa*.

**GONOS**, *Gone*.

**GONOSTROMA**, *Proligerous disk*.

**GO NY**, γόνυ, *Genu*, 'the knee;' hence:

**GO NY AGRA**, *Gonagra*.

**GO NY ALGIA**, *Gonalgia*.

**GO NY C ROTUS**, from γόνυ, 'the knee,' and ροιῶν, 'I strike.' One who is knock-kneed, or in-kneed. See *Entogonyancon*.

**GO NY ONCUS**, from γόνυ, 'the knee,' and ὄγκος, 'a tumour.' A swelling of the knee.

**GO DY ER A PUBES CENS**, *Tussæca reticulata*, *Satyrium*, *Neottia*, *Rattlesnake leaf*, *Networt*, *Netleaf*, *Scrofula weed*. An indigenous plant, used empirically in scrofula—the fresh leaves being applied to the sores. It is employed by the Indians.

**GOOSEFOOT**, *Chenopodium anthelminticum*—*g.* Angular-leaved, *Chenopodium bonus Henricus*—*g.* Stinking, *Chenopodium vulvaria*.

**GOOSEGRASS**, *Galium aparine*, *G. verum*.

**GOOSESHARE**, *Galium aparine*.

**GOOSESKIN**, *Horrida cutis*.

**GORDIUS MEDINENSIS**, *Dracunculus*.

**GORGE**, *Throat*—*g.* *Grosse*, *Bronchocele*—*g.* *Mal de*, *Cynanche*.

**GORGERET**, *Goorget*—*g.* *Lithotome*, *Goorget*, *Lithotomy*—*g.* à *Repoussoir*, see *Goorget*.

**GORGET**, from (F.) *gorge*, 'the throat.' *Canalis canaliculatus*, *Ductor canaliculatus*, (F.) *Gorgeret*. An instrument representing a long gutter, in the shape of a throat, which is especially employed in the operations of lithotomy and fistula in ano.

**GORGET**, *Cutting*, see *Goorget* and *Lithotomy*.

**GORGET**, *LITHOTOMY*, (F.) *Gorgeret Lithotome*, *Cutting Gorget*, is the one used in the operation for the stone, for the purpose of dividing the prostate and the neck of the bladder, so as to enable the surgeon to introduce the forceps, and extract the stone. At the end of this gorget is a crest or beak, which fits the groove of the staff, and admits of the gorget being passed along it into the bladder. Besides *cutting*, there are also *blunt* gorgets, intended to be introduced into the wound—their concavity serving as a guide for the forceps into the bladder.

The chief modifications in the gorget have been made by Andouillet, Bell, Blicke, Bromfield, Cline, Desault, Foubert, Hawkins, Larrey, Lefèvre, Michaelis, Thomas, &c.

**GORGET FOR FISTULA IN ANO** consists of a semi cylindrical, wooden staff; four inches long,

without including the handle, and furnished with a wide groove. This is introduced into the rectum to prevent the point of the bistoury from injuring the intestine, when the internal orifice of the fistula is deeply situate and it is desirable to perform the operation by incision. This instrument, invented by Marchettis, has been modified by Percy, Runge, &c.

Desault invented an instrument for conducting the wire by the anus, in the operation for fistula by ligature. He called it *Gorgeret à repoussoir*.

**GORGO'NEI FONTES**. Fountains, described by Libavius, as containing water which possessed a petrifying property; probably, water holding in solution supercarbonate of lime.

**GORGOSSET**, *Pyrosis*.

**GOSIER**, *Pharynx*, *Throat*.

**GOSSUM**, *Bronchocele*.

**GOSSYP' IUM**, *Gossypium Herbaocum*; *Gossypion Xylon*, *Xylum*, *Bombax*, *Cotton*, (F.) *Coton*. *Family Malvacæe*. *Sex. Syst. Monadelphia Polyandria*. The seeds of the *Cotton Tree*, *Gossypium arboræum*, have been administered in coughs, on account of the mucilage they contain. The cotton wool is used in medicine for making moras, &c.

**GOTIUM**, *Bronchocele*.

**GOUDRON**, see *Pinus sylvestris*.

**GOUET**, *Arum maculatum*.

**GOUËTRE**, *Bronchocele*.

**GOULARD'S LOTION**, see *Lotion*, *Goulard's*.

**GOULARD WATER**, *Liquor plumbi subacetatis dilutus*.

**GOULU**, *Glutton*.

**GOURD**, *Cucurbita*—*g.* *Bitter*, *Cucumis colocynthis*—*g.* *Bottle*, *Cucurbita pepo*.

**GOURDWORM**, *Distoma hepaticum*.

**GOURMANDISE**, *Gluttony*.

**GOURME**, *Porrigo larvalis*.

**GOUSSE**, *Legumen*.

**GOUT**, *Arthritis*, *Arthragra*, *Arthralgia*, *Morbus domino'rum*, *Malum articulo'rum*, *Morbus articulo'ris*, *Gutta*, *Arthro'ria Pod'agra*, *Pod'agra*, *Pod'agra*, *Arthriticus verus*, *Arthritis Podagra*, *Podagra Arthritis*, *Fluxio arthritica*, *Febris arthritica*, *F. podagrica*, *Arthrodyn'ia podagrica*, *Cauma podagricum*, *Flerecin*, *Gastro-arthritis*, *Misoptochos*, (F.) *Goutte*. The gout was formerly regarded as a catarrh, and received its name from (F.) *goutte*, (L.) *gutta*, 'a drop;' because it was believed to be produced by a liquid, which distilled, *goutte à goutte*, 'drop by drop,' on the diseased part. This name, which seems to have been first used about the year 1273, has been admitted into the different languages of Europe. Gout is an inflammation of the fibrous and ligamentous parts of the joints. It almost always attacks, first, the great toe; whence it passes to the other smaller joints, after having produced, or been attended with, various sympathetic effects, particularly in the digestive organs: after this, it may attack the greater articulations. It is an affection which is extremely fugitive, and variable in its recurrence. It may be acquired or hereditary. In the former case, it rarely appears before the age of thirty-five; in the latter, it is frequently observed earlier. It is often difficult to distinguish it from rheumatism. A combination is, indeed, supposed to exist sometimes; hence called *Rheumatic gout*. During

the paroxysm or fit, a burning, lancinating pain is experienced in the affected joint, attended with tumefaction, tension, and redness. One or more joints may be attacked, either at the same time or in succession; and, in either case, the attack terminates by resolution in a few days. This is the *Arthritis acuta, inflammatoria vel regularis, Regular gout, Arthrosia podagra regularis, Arth'raza legitima seu vera seu genuina seu normalis*, (F.) *Goutte régulière chaude*. At other times, pains in the joints exist, of more or less acute character; the swelling being without redness. These pains persist, augment, and diminish irregularly, without exhibiting intermission, and, consequently, without having distinct paroxysms. The disease is then called *aton'ic, asthen'ic, imperfect or irregular gout, Chronic G., Arthritis atonica vel asthenica, Arthrosia Podagra, larvata, Dysarthrit'is*. It is, also, commonly called in France *Goutte froide, Goutte blanche*. It may appear primarily, or succeed attacks of regular gout.

Gout does not always confine itself to the joints. It may attack the internal organs: when it is called *Arthritis aberrans seu erraticæ seu planetica, Arth'raza anomala, Podagra aberrans, Vars'ni, Wandering, misplaced, or anomalous gout*, (F.) *Goutte vagus, Retrograde gout, Arthritis retrograda, Podagra retrograda, Arthrosia Podagra complicata, Recedent, misplaced gout*, (F.) *Goutte remontée, G. malplacée, G. rentrée*, is when it leaves the joints suddenly and attacks some internal organ, as the stomach, intestines, lungs, brain, &c.

Gout is also called, according to the part it may affect, *Podagra, Gonagra, Chiragra*, &c. It may be acute or chronic, and may give rise to concretions, which are chiefly composed of urate of soda. See Calculus, (Arthritic.) It may, also, give occasion to nodosities, when it is called *Arthritis nodosa*, (F.) *Goutte nouée*.

The treatment is of the antiphlogistic kind, and the local disorder should be but little interfered with. Colchicum seems to have great power over the disease. It forms the basis of the *Eau médicinale d'Husson*; a celebrated French gout remedy. The bowels must be kept regular by rhubarb and magnesia; and a recurrence of the disease be prevented by abstemious habits.

GOUT, DIAPHRAGMATIC, Angina pectoris—g. Rheumatic, see Rheumatism, acute—g. Weed, Ligusticum podagraria.

GOUT, Taste.

GOUTTE, Gout, Gutta—g. *Blanche*, Gout (atonic)—g. *Froide*, Gout (atonic)—g. *Malplacée*, Gout, (retrograde)—g. *Nouée*, Gout (with nodosities)—g. *Régulière chaude*, Gout (regular)—g. *Remontée*, Gout (retrograde)—g. *Rentrée*, Gout, (retrograde)—g. *Rosee*, Gutta rosea—g. *Sciatique*, Neuralgia femoro-poplitea—g. *Serena*, Amaurosis—g. *Vagus*, Gout (wandering.)

GOUTTEUX, Arthritic.

GOUTTIÈRE (F.), *Collie'is*. A gutter in a bone, like that used for carrying off rain. Some of these cavities are intended to facilitate the sliding of tendons, such as the *Gouttière Bicipitale* or *Bicipital groove*. Others, as the *Gouttière sagittale* or *Sagittal groove*, lodge blood-vessels and especially veins. Others, again, are merely intended for the support of

certain organs; as the *Gouttière basilaires* or *Basilary fossa* which supports the medulla oblongata.

GOUTTIÈRE BICIPITALE, Bicipital groove—g. *Lacrymale*, Lacrymal groove—g. *Sacré*, Sacral groove.

GOUTY RHEUMATISM, see Rheumatism, acute.

GOVERNAIL DU TESTICULE, gubernaculum testis.

GOWLAND'S LOTION, see Lotion, Gowland's.

GOWN, RED, Strophulus—g. Yellow, Icterus infantum.

GRAC'ILIS, *Macor, Macilon'tus*. Slender, lean. Also, the slender *Rectus interior femoris* sive *Grac'ilis interior, Sous-pubio-crété tibial, Sous-pubio-pré-tibial* (Ch.) *Droit ou crête interne de la cuisse*. This muscle is situated at the inside of the thigh. It is thin and very long; and arises from the descending ramus of the pubis, to be inserted at the inner and inferior part of the tuberosity of the tibia. It bends the leg and causes abduction of the thigh. See *Grèle*.

GRACILIS, ANTERIOR, Rectus femoris.

GRADUATE, *Graduatus*, from *Gradus*, 'a step,' 'a degree.' In medicine, one who has attained a degree,—usually, the *degrees* of doctor.

GRÆA, γραια. The pellicle, which forms on milk. The folds of skin round the umbilicus. An old woman.

GRAIN, *Granum*; the 60th part of a Troy, and the 72d part of a *Poids de marc* drachm.

GRAINE D'ÉCARLATE, *Coccus cacti*—g. *Musc*, *Hibiscus abelmoschus*—g. *de Turquois*, *Zea mays*—g. *d'Aspic*, see *Phalaris Canariensis*—g. *de Paradis*, *Amomum grana paradisi*—g. *de Porroquet*, *Carthamus tinctorius* (seed.)

GRAISSE, *Pinguedo*—g. *de Mouton*, *Sevum*—g. *d'Oie*, *Adeps anserina*—g. *Oxygénée*, *Unguentum acidi nitrosi*—g. *de Porc*, *Adeps præparata*.

GRAMEN ÆGYPTIACUM, G. *Crucis cyperoidis*—g. *Caninum*, *Triticum repens*.

GRAMEN CRUCIS CYPEROIDIS, *Gramen Ægyptiacum, Egyptian Cock's foot grass*. The roots and plants possess the virtues of the *Triticum repens*, and have been recommended in the earlier stages of dropsy. They were, formerly, considered to possess many other properties.

GRAMEN DIOSCORIDIS, *Triticum repens*—g. *Major*, *Sarsaparilla Germanica*—g. *Orientalis*, *Juncus odoratus*—g. *Repens*, *Triticum repens*—g. *Rubrum*, *Sarsaparilla Germanica*.

GRAMIA, CHASSIE, Lippitudo.

GRAMINIVOROUS, *Graminivorus*, from *gramen*, 'grass,' and *voros*, 'I eat.' Feeding or subsisting on grass.

GRAMMARIUM, Scruple.

GRAMME, γραμμα. An ancient weight, equivalent to the 24th part of an ounce, or to 24 grains, or a scruple, avoirdupois. At the present day, the gramme is equal in weight to a cubed centimètre of water; or to 18 grains, poids de marc—15.444 grains, Troy.

GRAMME, Iris, Line.

GRANA, *Hemicrania*—g. *Molucca*, *Croton tiglium*—g. *Moschi*, *Hibiscus abelmoschus*—g. *Orientis*, see *Menispermum cocculus*—g. *Tiglii* seu *Tiglia*, see *Croton tiglium*—g. *Tillii*, *Croton tiglium*.

GRANADILLA, APPLE-SHAPED, *Passiflora maliformis*.

GRANATI RADICIS CORTEX, see *Punica granatum*.

GRAND DORSAL, *Latissimus dorsi*.

GRANDE'ALÆ. The hair which grows in the arm pits.

GRANDINOSUM OS, Cuboid.

GRANDO, Chaliza.

GRANDULA, Gland.

GRANIVOROUS, *Granivorus*, from *granum*, 'a grain,' and *voro*, 'I eat.' Feeding or subsisting on grain or seeds.

GRANTRISTUM, Anthrax.

GRANULAR DEGENERATION OR DISORGANIZATION OF THE KIDNEY, Kidney, Bright's disease of the.

GRANULAR CONJUNCTIVA, Trachoma—g. Eyelid, Trachoma—g. Liver, Cirrhosis.

GRANULATED LIVER, Cirrhosis.

GRANULATION, *Granulatio*, from *granum*, 'a grain.' *Gemma*, (F.) *Bourgeon*, *B. charnu*. Granulations are the reddish, conical, flesh-like shoots, which form at the surface of suppurating wounds and ulcers. They are the product of inflammatory excitement, and may be produced in indolent ulcers, by exciting the parts by proper stimulants. They form the basis of the cicatrix.

GRANULATION is, likewise, a name given by the modern French physicians to an organic lesion, consisting in the formation of small, round, firm, shining, semi-transparent tumours, of the size and shape of millet seed or of a pea; which are met with in the lungs particularly, and in considerable quantity; often without materially interfering with their functions.

GRANULATIONS CEREBRALES, Glandulæ Pacchioni.

GRANULATIONS MILIARY, or *Miliary tubercles*, are the small transparent grains, of variable size, from that of a millet seed to that of a grain of hemp, which are presumed to be the primitive state of tubercles.

GRANULE, *Granulum*; diminutive of *granum*, 'a grain.' A small grain; a small compact particle, a cytoblast.

GRANULES SEMINAL, *Granula seminis*. Minute, rounded, granulated bodies, observable in the semen, which are, in all cases, much less numerous than the spermatozoids. See Sperm.

GRANVILLE'S LOTION, see Lotion, Granville's counter-irritant.

GRAPE, see *Vitis vinifera*—g. Sea-side, see Kino.

GRAPE-CURE, (F.) *Cure du raisin*, (G.) *Traubencur*. A mode of medication in Germany, which consists in the use of the grape for both meat and drink; nothing more at the farthest being allowed than a piece of dry bread. This diet is continued for weeks. Its effects are altogether revellent, and resemble in many respects those of hydropathy.

GRAPES, DRIED, *Uvæ passæ*.

GRAPHIDOIDES, Styloid.

GRAPHIOIDES, Styloid.

GRAPHIOIDES, Styloid.

GRAPHISCUS, *Graphiscus Dioclis*. An instrument invented by Diocles for extracting darts. It is described by Celsus.

GRAPHITES, *Plumba'go*, *Supercarbure'tum Ferri*, *Carbure'tum Ferri*, *Ferri Carbonat'um*, *F. Supercarbure'tum*, *Carbo mineralis*, *Gale-*

*ns'a*, *Gale'n's*, *Carburet of iron*, *Black lead*, *Wad*, (F.) *Crayon noir*, *Plombagine*. This substance has been esteemed slightly astringent and desiccative. It has been advised by Weinhold in the cure of herpes.

GRAPHOIDES, Styloid.

GRAS DES CADAVRES, Adipoceire—g. *de Jambé*, *Sura*—g. *des Cimetières*, Adipoceire—g. *de Jambé*, *Sura*.

GRAS FONDURE (F.), *Diarrhœa adiposa*, literally *molten grease*. A species of diarrhœa, referred to by old writers; accompanied with great emaciation, and in which the evacuations contain fat-like matter. According to Sauvages, the *Gras-fondure* differs from colliquative diarrhœa in not being attended with hectic fever.

GRASS, Asparagus—g. Bitter, *Aletris farinosa*—g. Canary, cultivated, *Phalaris Canariensis*—g. Couch, *Triticum repens*—g. Dog, *Triticum repens*—g. Egyptian cock's foot, *Gramen crucis cyperoides*—g. Goat's, *Scorzonera*—g. Knot, *Polygonum aviculare*—g. Sweet, *Acorus Calamus*—g. Vipers', *Scorzonera*.

GRASSET, (F.) The anterior region of the thigh, bounded below by the patella.

GRASSEYEMENT (F.), *Sonus Nasus*, *Rotacismus*, from (F.) *gras*, 'thick,' 'speaking thick.' According to Sauvages, a vicious pronunciation of the letter *r*. They who speak thick, like the inhabitants of Newcastle, in England, or of Havre, in France, have difficulty in pronouncing the *r*, and they frequently substitute for it the letter *l*; but this does not properly constitute *Grasseyement*. It consists in this: that, in words in which the letter *r* is joined to another consonant, a sort of *burrowing* or guttural rolling is heard, nearly like that produced by gargling. See *Rotacism*.

GRASUS, Cinabra.

GRATELLE, Psoriasis.

GRATIA DEI, *Gratiola officinalis*.

GRATIOLA CENTAURIODES, *G. officinalis*.

GRATIO'LA OFFICINA'LI, *Digitalis minima*, *Gratia Dei*, *Gratiola Centauroiodes*, *Hedys hyssop*, *Herb of Grace*. It is a native of the South of Europe. (F.) *Herbe au pauvre homme*. The plant is inodorous; taste strong, bitter, nauseous. It is possessed of anthelmintic, purgative, emetic, and diuretic properties. Dose, ten grains.

GRATTERON, Galium aparine.

GRATTOIR, Raspatorium.

GRAVATIF, Heavy.

GRAVE, Serious—g. Plant, *Datura sanguinea*.

GRAVEDO, Catarrh, *Coryza*—g. Neonatorum, Snuffles.

GRAVEL, *Lith'ia renalis arenosa*, *Lith'ia nephrit'ica*, *L. renalis*, (F.) *Gravelle*. A disease occasioned by small concretions, similar to sand or gravel, *Gla'ra*, (F.) *Gravier*, which form in the kidneys, pass along the ureters to the bladder, and are expelled with the urine. These concretions, which are commonly composed of uric acid and an animal matter, are deposited at the bottom of the vessel, immediately after the excretion of the urine; and, by their hardness and resistance under the finger, differ considerably from the ordinary sediment of that liquid. A vegetable diet and alkaline drinks are the best prophylactics. See *Calculi*, *Urinary*. *A fit of the Gravel*, *Ne-*

*phral'gia calculo'sa seu aren'o'sa, Col'lica nephrit'ica* is the excruciating suffering induced by the passage of gravel from the kidney to the bladder. It can only be relieved by opiates, the warm bath, &c.

When the deposit is in fine particles, it is termed *Sand, Are'na, Aren'ula, Psamm'a, Psammus*.

GRAVEL GRASS, *Galium verum*.

GRAVEL, PILIBOUS OR HAIRY, (F.) *Gravelle pileuse*. A species of gravel containing hairs, phosphate of lime, ammoniaco-magnesian phosphate, and a little uric acid.—Magendie.

GRAVELLEUX, Calculous.

GRAVELLE, Chalaza, Gravel—*g. Pileuse*, Gravel, pileous.

GRAVEOLENS, Fetid.

GRAVIDA, Pregnant.

GRAVIDITAS, Fecundation; Pregnancy—*g. Abdominalis*, Pregnancy, abdominal—*g. Extraterina*, see Pregnancy—*g. Extraterina* in Ovario, Pregnancy, ovarian—*g. Extraterina Secundaria*, Metacyesis—*g. Interstitialis*, Pregnancy, interstitial—*g. Molaris*, Mole—*g. Spuria*, Pregnancy, false—*g. Tubaria*, Salpingocycsis—*g. Uteri substantiã*, Pregnancy, interstitial—*g. Uterina*, Pregnancy.

GRAVIER, Gravel.

GRAVIMETER, Areometer.

GRAVIS, Heavy.

GRAVITY, SPECIFIC, *Gravitas specific'a, (F.) Pesanteur sp'cifiqu'e*. The relation between the weight of a body and its bulk; thus, supposing four bodies to be of the same size, but which weigh, one four, another three, another two, and the fourth one; the specific gravity of the first, will be four times greater than that of the last. The specific gravities of different bodies are, therefore, as the weights, bulk for bulk. For solids, and liquids, water is taken as the unit; atmospheric air for the gases. Thus, water is 1.000; mercury at the common temperature, 13.58. Whence, we conclude mercury is between thirteen and fourteen times heavier than water.

GRAY MATTER OF THE BRAIN, Cortex cerebri.

GREASE, BARROW'S, *Adeps suilla*—*g. Goose*, *Adeps anserina*—*g. Molten*, *Gras-fondure*.

GREENHEART, see Bebeeru.

GREENHOW'S TINCTURE FOR THE TEETH, *Spiritus armorac'ie compositus*.

GREEN SICKNESS, Chlorosis.

GREENWEED, *Genista tinctoria*.

GRÈLE (F.), *Grac'élis*, 'long and thin.' This epithet is given by the French to various parts, as the

*Apophyse Grêle du Marteau*, the slender apoph'ysis or process of the malleus, a long process situate at the anterior part of the neck of the malleus, which passes out by the fissure of Glaserius. It is also called the *Apoph'ysis of Rav*, although it was already known to Fabricius ab Aquapendente and to Cæcilius Follius.

GRÈLE, Chalaza—*g. Interne de la ovisse*, Gracilis.

GRÊMIL OFFICINALE, *Lithospermum officinale*.

GREMIUM, Vulva.

GRENADÉ, Influenza.

GRENADIER, *Punica granatum*.

GRENADIN, see *Punica granatum*.

GRÉNIERS, *Vesiculae seminales*.

GRENOUILLE, *Rana esculenta*.

GRENOUILLETTE, *Ranula*.

GRÉOULX, MINERAL WATERS OF. Sulphuretted springs in the department of Basses-Alpes, France.

GRESSUR, *Perinæum*.

GRESSUS, Walking.

GREVEURE, Hernia.

GRIELUM, *Apium petroselinum*, *Smyrniium olusatrum*.

GRINCEMENT DES DENTS, *Brygmus*.

GRINDERS, Molar teeth—*g. Asthma*, see *Asthma*, grinders'—*g. Rot. Asthma*, grinders'.

GRIPES, *Tormina*, Colic.

GRIPES, WATERY. A popular name for a dangerous form of diarrhoea, common in England, which does not differ essentially from the cholera infantum of this country.

GRIPHOSIS, *Onychogryphosis*.

GRIPPE (F.), from *gripper*, 'to gripe,' 'catch hold of.' A vulgar name for several catarrhal diseases, which have reigned epidemically; as the Influenza.

GRIPPE, Pinched.

GROAN, see *Susprium*.

GROATS, German *Grutze*; *Grutum*, *Ave'na sacortica'ta*; (F.) *Gravau*, Oatmeal, (*Yorkshire*.) Oats, hulled, but unground, (*Lancashire*.) Hulled oats, half ground. Oats that have the hulls taken off; *Griis*. When crushed, they are termed *Emden groats*.

A decoction of these is administered as a diluent and demulcent.

GROATS, CRACOW, *Semolina*.

GROG-BLOSSOMS, *Gutta rosea*.

GROG-ROSES, *Gutta rosea*.

GROMWELL, *Lithospermum officinale*.

GROOVE, *Furrow*, *Sulcus*, (F.) *Rainure*. Icelandic, *grafa*, Sax. *grafan*, to dig. A channel or gutter, in a bone or surgical instrument. See *Couliisse*.

GROOVED. Same etymon. *Sulcatus*, *Striatus*, *Canaliculatus*, (F.) *Cannelé* ou *Cannelé* ou *Canaliculé*; *Canaliculated*. Having a small channel or gutter.

GROS, Drachm—*g. Cou*, Bronchocele.

GROSELLIER NOIR, *Ribes nigrum*—*g. Rouge*, *Ribes rubrum*.

GROSSE GORGE, Bronchocele.

GROSSESSE, Pregnancy—*g. Abdominale*, Pregnancy, abdominal—*g. Afatale*, Pregnancy, afetal—*g. Bigéminal*, Pregnancy, bigeminal—*g. Complexe*, Pregnancy, complex—*g. Composée*, Pregnancy, compound—*g. Contro-nature*, Pregnancy, extra-uterine—*g. Fausse* ou *apparente*, Pregnancy, false—*g. Fatale*, Pregnancy, fetal—*g. Gazo-hystérique*, Pregnancy, gazo-hysterical—*g. Hématohystérique*, Pregnancy, hemato-hysterical—*g. Hydro-hystérique*, Pregnancy, hydro-hysterical—*g. Inter-extra-utérine*, Pregnancy, complex—*g. Ovarienn*, Pregnancy, ovarian—*g. Sarco-hystérique*, Pregnancy, sarco-hysterical—*g. Sarcofatale*, Pregnancy, sarcofetal—*g. Simple*, Pregnancy, solitary—*g. Solitaire*, Pregnancy, solitary—*g. Trigéminal*, Pregnancy, trigeminal—*g. Triple*, Pregnancy, trigeminal—*g. Tubaire*, Pregnancy, tubal—*g. Utéro-abdominale*, Pregnancy, utero-abdominal—*g. Utéro-ovarienn*, Pregnancy, utero-ovarian—*g. Utéro-tubaire*, Pregnancy, utero-tubal.

GROSSULARIA NON SPINOSA, Ribes nigrum.

GROUILLEMENT D'ENTRAILLES, Borborygmus.

GROUND BERRY, Gaultheria—g. Holly, Gaultheria—g. Ivy, Gaultheria—g. Nut, Arachis hypogea, Pignut.

GROUND PINE, Teucrium chamæpitys—g. p. French, Teucrium iva.

GROUNDSEL, Senecio.

GROUSEBERRY, Gaultheria.

GROWTH, from Dutch *groeyen*, *Crescentia*, *Anaplo'sis*, *Anaptyx'is*, (F.) *Croissance*. The development of the body; particularly in the direction of its height. Also, any adventitious tissue; thus, we speak of a *morbid growth* or *formation*.

GRUAU, Groats.

GRUMEAU, Coagulum.

GRUMOUS, *Grumo'sus*, from *grumus*, 'a clot.' Clotted.

GRUMUS, Coagulum.

GRUTUM. 'Groats.' *Grutum Mil'ium*, *Mil'ium*. A hard white tubercle of the skin, resembling, in size and appearance, a millet-seed. It is confined to the face. See, also, Groats.

GRYPHIUS PES. The *Griffon's foot*, (F.) *Pied de Griffon*. An instrument of which Ambrose Paré speaks, which was used for extracting moles from the uterus.

GRYPHOSIS, Onychogryphosis.

GRYPO-SIS, from *γκρῦναι*, 'I incurvate.' *Incurvatio*. Curvature or crookedness in general. Crookedness or incurvation of the nails. See *Onychogryphosis*.

GRYPOTES, see Grypus.

GRYPUS. One who has a crooked or aquiline nose. The condition is termed *Grypotes*.

GUA'CO, *Hua'co*. The name of a plant, *Eupato'rium Guaco*, described by Humboldt and Bonpland under the name *Mika'nia Guaco*, which grows in the valleys of Madalena, Rio-Cauca, &c., in South America. The negroes use the juice against the bites of poisonous reptiles;—both in the way of prevention and cure. It has been, of late, brought forward as a remedy in cholera.

GUAIIACINE, see Guaiacum.

GUAIIACUM, *G. Officina'lle*; *G. America'num*, *Lignum vitæ*, *L. sanctum*, *L. benedictum*, *Palus sanctus*, *Lignum In'dicum*, *Hagiog'ylium*, (F.) *Gayac*, *Gaiac*; *Gomme Guai'ac*. The resin and wood are both used in medicine. Their odour is slightly fragrant; taste warm and bitter, of the resin more so than of the wood. The resin is concrete, brittle; colour, externally, greenish; internally grayish. Water dissolves about one-tenth; alcohol 95 parts. It is soluble, also, in *liquor potassa* 15 parts, *liquor ammonia* 38 parts. The powder is whitish, but changes to green in the air. The base of the guaiacum is a peculiar resin, called *Guaiacina*.

Guaiacum is stimulant and diaphoretic; and in large doses, purgative. It is administered in chronic rheumatism, gout, cutaneous diseases, and the sequelæ of syphilis. Dose of resin, gr. v to xx:—to purge, gr. xx to xl.

GUALTHERIA, Gaultheria.

GUANO,—according to Tschudi, properly *Huanu*,—is formed of the excrements of different kinds of marine birds—mews, divers, sheer-breaks, &c., but especially of the *Sula varie-*

*ga'ta*. It is found in enormous layers in the South American islands of the Pacific, and is used as manure.

GUARANA, Paullinia.

GUARAPO. A fermented liquor made, in Peru, of sugarcane pulp and water. It is a very favourite beverage of the negroes.—Tschudi.

GUARD (for a bed), *Allés*.

GUARERBA ORBA, *Momordica elaterium*.

GUAVA APPLE, *Psidium pomiferum*.

GUAYAVA, *Psidium pomiferum*.

GUBERNAC'ULUM DENTIS, (*Gubernaculum*, 'a rudder.') A cord, which passes from the follicle of the permanent tooth along a small long canal behind the alveolus of the milk tooth, and becomes continuous with the gum. The gubernaculum has been supposed to direct the permanent tooth outwards. The canal has been termed *Iter dentis*.

GUBERNACULUM TESTIS, *G. t. Hunteri*, *Ligamentum suspensorium Testis*, (F.) *Gouvernail du testicule*. A triangular, fibro-cellular cord; which, in the fœtus, arises from the ramus of the ischium and the skin of the scrotum, and proceeds to the posterior part of the testicle, before this organ issues from the abdomen. It is a continuation of the fascia superficialis, and, by contracting to occasion the descent of the testicle, it lengthens the fibres of the lesser oblique muscle; so as to produce the cremaster, and is itself expanded to constitute the dartos.

GUÈPE, Wasp.

GUERISON, Cure.

GUERISSABLE, Curable.

GUI, Viscum album.

GUILANDINA MORINGA. A plant, which affords the *Ben nut*, and the *lignum nephriticum*. It is also called *Moringa Oleifera*, *M. Zeylan'ica*, *Ben*, *Glans unguenta'ria*, *Ben Nux*, *Balanus Myrep'sica*, *Sand'alum caruleum*, *Oily Acorn* or *Ben nut*. It is a West India nut which furnishes an oil, *O'leum Balans'num*, that does not become rancid by age, and is hence used by perfumers. It is purgative.

The wood of the Guilandina is called *Lignum Nephriticum*, and has been used in decoction, in affections of the urinary organs.

GUIMAUVE, *Althæa*—g. *Veloutée*, *Hibiscus abelmoschus*.

GULA, Œsophagus, Pharynx.

GULÆ IMBECILLITAS, Pharyngoplegia—g. *Principium*, Pharynx.

GULET, Œsophagus.

GULOSUS, Glutton.

GUM ANIME, Anime—g. Arabic, *Acaciæ gummi*—g. British, *Dextrin*—g. *Butea*, see *Butea frondosa*—g. *Caranach*, *Caranna*—g. *Dragon*, *Tragacantha*—g. *Elastic*, *Caoutchouc*—g. *Falling away* of the, *Ulatrophia*—g. *Hemlock*, see *Pinus Canadensis*—g. *Indigenous*, *Gummi nostras*—g. *Juniper*, *Sandarac*—g. *Orenburg*, see *Pinus larix*—g. *Red*, *Strophulus*—g. *Resin*, *Gummi resina*—g. *Sandarach*, *Sandarac*—g. *Seneca*, *Acaciæ gummi*—g. *Senega*, *Acaciæ gummi*—g. *Shrinking of the*, *Ulatrophia*—g. *Sweet*, *Liquidambar styraciflua*—g. *Tragacanth*, *Tragacanth*—g. *Tree*, brown, see *Kino*—g. *White*, *Strophulus*—g. *Yellow*, *Icterus infantum*.

GUM-LANCET, *Dentical'pium*, *Odontog'yphon*, (F.) *Déchaussoir*. An instrument for separating the gum from the cervix of the tooth,

prior to extraction. It is formed much like a foam. The operation itself is called *Lancing the gums, Dentium scalptura*, (F.) *Déchaussement*.

## GUMBOIL, Parulis.

**GUMMA**, (F.) *Gomme*. An elastic tumour, formed in the periosteum, occupying particularly the cranium and sternum, and produced by the syphilitic virus, when it has been long in the constitution. It is so called, because, when opened, it contains a matter like gum.

**GUMMI**, *Commi*, *ρομμί*, (F.) *Gomme*. An immediate principle of vegetables. It is a solid uncrystallizable, inodorous substance, of a mawkish taste, unchangeable in the air, insoluble in alcohol, but soluble in water, with which it forms a mucilage. It is obtained from various species of *mimosa* and *prunus*; and consequently there are many varieties of gum. They are used in medicine as demulcents, emollients, and relaxants, particularly in catarrh, intestinal irritations, &c.; and in *Pharmacy*, they are employed in the formation of emulsions, pills, &c.

**GUMMI ACACIÆ ARABICÆ**, *Acaciæ gummi*—*g. Acanthinum*, *Acaciæ gummi*—*g. Adstringens Fothergilli*, *Kino*—*g. Ammoniacum*, *Ammoniac*—*g. Anime*, *Anime*—*g. Arabicum*, *Acaciæ gummi*—*g. Astragali* *Tragacantha*, *Tragacantha*—*g. Bogia*, *Cambogia*—*g. Brelisia*, *Caranna*—*g. Gamandra*, *Cambogia*—*g. Gambiense*, *Kino*—*g. de Gos*, *Cambogia*—*g. Gutta*, *Cambogia*—*g. Hedera*, see *Hedera helix*—*g. de Jemu*, *Cambogia*—*g. Juniperi*, *Sandarac*—*g. Lacca*, *Lacca*—*g. Ladanum*, see *Cistus creticus*—*g. Lamac*, *Acaciæ gummi*—*g. Leucum*, *Acaciæ gummi*.

**GUMMI NOSTRAS**, (F.) *Gomme du Pays*; *Indig'enus Gum*. These generic names are given to several species of gum; which flow spontaneously from certain European fruit trees,—such as the almond, cherry, peach, apricot, &c. The indigenous gums have nearly the same properties as gum Arabic, but they are inferior to it.

**GUMMI PANACIS**, see *Pastinaca opoponax*—*g. ad Podagram*, *Cambogia*.

**GUMMI-RESINA**, *Gum-Resin*. A milky juice, obtained by making incisions into the branches, stalks and roots of certain vegetables. Gum-resins are compounds of resins, gum, essential oil, and different other vegetable matters. They are solid, opaque, brittle, of a strong odour, acrid taste, variable colour, and are heavier than water: Water dissolves a part of them, and alcohol another; hence proof spirit is the proper menstruum. The generality of the gum-resins are powerful stimulants to the whole or to parts of the economy. The chief are *asafetida*, *gum ammoniac*, *euphorbium*, *galbanum*, *camboge*, *myrrh*, *olibanum*, *opoponax*, *scammony*, *aloes*, &c.

**GUMMI RUBRUM ADSTRINGENS GAMBIENSE**, *Kino*, see *Butea Frondosa*—*g. Serapionis*, *Acaciæ gummi*—*g. Thebaicum*, *Acaciæ gummi*—*g. Tragacantha*, *Tragacantha*.

**GUMMIDODES**, Mucilaginous.

**GUMMIODES**, Mucilaginous.

**GUMMOSUS**, Mucilaginous.

**GUMS**, *Gingivæ*.

**GUNJAH**, *Ganjah*. The dried hemp plant, which has flowered, and from which the resin has not been removed. It yields to alcohol 20 per cent. of a resinous extract, composed of the resin—*churru*, and green colouring mat-

ter. The Gunjah is used for smoking. The larger leaves and capsules, without the stalks, constitute *Sidhee*, *Subjoo* or *Bang*, which is used to form with water an intoxicating drink. See *Bangue*.

**GURGITELLO, MINERAL WATERS OF**. A thermal spring in the isle of Ischia. Temp. at its source, 176° Fah. It contains carbonic acid, carbonates of lime, magnesia, iron and soda, sulphates of lime and soda, chloride of sodium and silica.

**GURGLING**. 'Gushing with noise,' as water from a bottle. (F.) *Gargouillement*, same etymon as *gargle*. The rhonchus or *râle* heard on auscultation when there is a cavity in the lungs containing pus. It is the 'cavernous rattle,' *Râle cavernoux*. If the cavern be large, this *râle* will nearly resemble the gurgling of a bottle (*glouglou d'une bouteille*;) if, on the contrary, the cavern be small, it will not differ from the *râle muqueux*.

**GURGULIO**, *Penis*, *Uvula*.

**GUSTATIF**, (*Nerf*;) see *Lingual nerve*.

**GUSTATION**, *Degustation*, *Taste*.

**GUSTATORY NERVE**, see *Lingual Nerve*.

**GUSTUS**, *Taste*—*g. Depravatus*, *Paragustia*.

**GUT**, *Intestine*—*g. Blind*. *Cæcum*.

**GUTS, SLIPPERINESS OF THE**, *Lientery*.

**GUTTA**, *Apoplexy*, *Cambogia*, *Gout*—*g. Gamandra*, *Cambogia*—*g. Gamba*, *Cambogia*—*g. Opaca*, *Cataract*.

**GUTTA**. A *Drop*, *Stalagma*, *Alun'sol*, *Stilla*, (F.) *Goutte*. A quantity of liquid, generally valued, in pharmacy, at the weight of a grain. It is clear, however, that the weight must vary according to the nature of the liquid:—a drop of ether, cannot weigh as much as one of sulphuric acid. The form of the mouth of the phial likewise alters the size of the drop. These and other circumstances have induced the London College to institute the *minim*, which is the sixtieth part of a fluidrachm. See *Minimum*.

**GUTTA PERCHA**. The concrete juice of a tree, which is indigenous in Singapore and its vicinity, and belongs to the natural order *Sapotaceæ*. Plunged in boiling water it softens when it may be moulded like caoutchouc to any form, which it retains on cooling. Splints have been made of it.

**GUTTA ROSACÆ SYPHILITICA**, *Crown of Venus*.

**GUTTA ROSEA**, *Gutta Rosacea*, *Ion'thus corymbifer*, *Crusta serpiginosa*, *C. pruriginosa*, *Aenè rosacea*, *Ros'ola acnosa*, *Thylacit'ia*, *Bacchia*, *Butiga*, *Carbuncled Face*, *Rosy Drop* or *Whelk*, *Copper-nose*, *Bottle-nose*, *Grog-blossoms*, *Grog-roses*, (F.) *Couperose*, *Goutte Rose*, *Bourgeons*, *Dartre pustuleuse couperose*. An eruption of small, suppurating tubercles, with shining redness, and an irregular granular appearance of the skin of the part of the face which is affected. The redness commonly appears first at the end of the nose, and then spreads on both sides. It is often produced by hard drinking. Its cure must be attempted by regular regimen, and cooling means internally: weak spirituous or saturnine lotions externally. The affection is usually very obstinate.

**GUTTA SERENA**, *Amaurosis*.

**GUTTÆ ABBATIS ROUSSEAU**, *Laudanum abbatia Rousseau*—*g. Ammoniaci*, see *Am-*

moniac gum—g. Acidæ tonicæ, Elixir acidum Halleri—g. Nervina, Alcohol sulfurico-æthereus ferri.

**GUTTA NIGRA**, *Acetum o'pii*, Common Black Drop. (*Opis* 3viii, *aceti destillat.* Bij, Infuse.) It is milder than the tincture of opium.—Gray.

The celebrated *Black Drop*, *Lancaster* or *Quaker's Black Drop*, may be made as follows: take half a pound of *Opium shood*; three pints of good *verjuice*, (Juice of the wild crab,) one and a half ounce of nutmegs, and half an ounce of saffron. Boil to a proper thickness and add a quarter of a pound of sugar, and two spoonfuls of yeast. Set the whole in a warm place, near the fire, for six or eight weeks; then place it in the open air until it becomes a syrup. Lastly, decant, filter, and bottle it up, adding a little sugar to each bottle. One drop is equal to three of laudanum; and it is nearly devoid of all the unpleasant exciting effects of the latter.

**GUTTALIS CARTILAGO**, Arytenoid Cartilage.

**GUTTERIA**, Bronchocele.

**GUTTUR**. The throat; the larynx; the trachea.

**GUTTUR GLOBOSUM**, Bronchocele—g. Tumidum, Bronchocele.

**GUTTURAL**, *Gutturalis*, from *guttur*, 'the throat.' Relating or belonging to the throat.

The *Superior Thyroidal Artery* is sometimes called *Gutturial Artery*.

A *Gutturial Cough* is one occasioned by irritation of the larynx or trachea.

A *Gutturial Sound* is one produced, as it were, in the throat.

**GUTTURIS OS**, Hyoides os.

**GUTTURNIA**, Arytenoid cartilages.

**GYMNA**, Genital organs.

**GYMNASION**, Exercise.

**GYMNASIUM**, from *γυμνος*, 'naked.' *Palastra*. An establishment amongst the ancients, intended for bodily exercises, as wrestling, running, &c.

**GYMNAST**, *Gymnastes*, *Gymnasta*; same etymon. The manager of a gymnasium. One, whose profession it is to prevent or cure diseases by gymnastics.

**GYMNASTICS**, *Gymnastica*, *Medicina gymnastica* seu *suecetica*, *Somaestica*. Same etymon. That part of hygienic medicine which treats of bodily exercises. It is called *Medical Gymnastics*. The ancients had also *Athletic Gymnastics*, and *Military Gymnastics*. Herodotus, of Selivra, first proposed gymnastics for the cure of disease.

**GYMNODODUS CANADENSIS**, *Coffea Tree*, *Mahogany*, *Nickar Tree*, *Bondus*. An in-

digenous tree, which grows from Ohio to Louisiana, the leaves of which are cathartic and said to contain cytisin. The seeds are good substitutes for coffee.

**GYMNOSIS**, Denudation.

**GYNÆCANER**, from *γυνή*, 'a woman,' and *ανηρ*, 'a man.' *Vir effeminatus*. An effeminate man.

**GYNÆCEA**, *Gynæcea*.

**GYNÆCEIA**, *Gynæcia*, *Gynæcea*, from *γυνή*, 'a woman.' The catamenia;—the lochia. The diseases of women in general.—Hippocrates, Galen, Pösius.

**GYNÆCEUM**, Antimonium, Vulva.

**GYNÆCEUS**, from *γυνή*, 'a woman.' Belonging to women. Female. Feminine.

**GYNÆCIA**, *Gynæcia*, *Menses*.

**GYNÆCOLOGIA**, *Gynecology*, from *γυνή*, 'a woman,' and *λογος*, 'a description.' The doctrine of the nature, diseases, &c. of women.

**GYNÆCOMANIA**, from *γυνή*, 'woman,' and *μανια*, 'mania,' 'rage.' That species of insanity, which arises from love for women. Some have used the word synonymously with nymphomania.

**GYNÆCOMASTUS**, *Gynæcomastus*, from *γυνή*, 'woman,' and *μαστος*, 'a breast.' A man whose breasts are as large as those of a woman.—Galen, Ingrassias.

A considerable enlargement of the breasts of a female was formerly called *Gynæcomastion*.

**GYNÆCOMYSTAX**, from *γυνή*, 'woman,' and *μυσταξ*, 'the beard.' The hair on the pubes of women.—Rolfink.

**GYNÆCOPHONUS**, from *γυνή*, 'a woman,' and *φωνη*, 'voice.' A man who has an effeminate voice.

**GYNANDRIA**, Hermaphrodeity.

**GYNANDRUS**, *Gynanthropus*.

**GYNANTHROPUS**, *Gynandrus*. An hermaphrodite who belongs more to the male than to the female sex.

**GYNATRESIA**, from *γυνή*, 'a woman,' and *σπεντος*, 'imperfect.' Closure or imperforation of the external parts of generation of the female.

**GYNE**, Female.

**GYNECOLOGY**, *Gynæcologia*.

**GYNIDA**, Hermaphrodite.

**GYNOARIUM**, Ovarium.

**GYPSY-WEED**, *Lycopus Virginicus*.

**GYRI CEREBRI**, Anfractuosities (cerebral,) Convulsions (cerebral,)—g. Cochleæ, Scelæ of the Cochlea.

**GYROMIA VIRGINICA**, *Medeola Virginica*.

**GYROPHLE**, see *Eugenia caryophyllata*.

**GYROPHORA**, see *Trips de Rocha*.

**GYRUS**, Anfractuosity, Convolution.

## H.

**HAB-EL-KALIMBAT**, *Pistacia terebinthus*. **HABENA**. A *Bridle*, *Tel'omon* A bandage for uniting the lips of wounds; which, in many instances, replaced the suture.—Galen.

**HABENÆ OF THE PINEAL GLAND**, see Pineal gland.

**HABILLA DE CARTHAGENA**, *Bejuco*, *Carthagena Bean*, (F.) *Fève de Carthagène*.

A kind of bean of South America, famed as an effectual antidote for the poison of all serpents, if a small quantity be eaten immediately.

**HABIT**, *Habitudo*, from *habere*, 'to have or to hold'; *Assuetudo*, *Mos*, *Usus*, *Consuetudo*, *Ethos*, 'êr, *Hæsis*, *Ethmos'gnê*, (F.) *Habitude*, *Accoutumance*. Habit is the aptitude for repeating certain acts:—or, a facility, which re-

sults from the frequent repetition of the same act. It is, according to vulgar expression, 'a second nature.' Habit may predispose to certain diseases, or it may protect us against them. It ought not to be lost sight of, in attending to the progress of disease, or its treatment.

**HABIT OF BODY, Constitutio, Habitus, Habitus Corporis, Catas'tasis, Hæsis, Epiphani'a, (F.) Habitude extérieure, Habitude du corps.** The aggregate of the physical qualities of the human body.

**HABITUDE, Habit—h. du Corps, Habit of body—h. Extérieure, Habit of body.**

**HABITUDO, Habit.**

**HABITUS, Habit of body—h. Apoplecticus, Apoplectic habit—h. Corporis, Habit of body.**

**HACHISCH, Banguæ.**

**HÆMA, 'αἷμα, 'αἱματός, 'blood.'**

**HÆMACHROINE, Hæmatine.**

**HÆMACHRO'SES, (G.) Hæmachrosen,** from 'αἷμα, 'blood,' and χροῖς, 'coloration.' A family of diseases in which the blood has its colour different from usual, as in purpura and cyanosis.—Fuchs.

**HÆMACY'ANIN, from 'αἷμα, 'blood,' and κυανός, 'blue.'** A blue colouring matter, detected by Sanson in healthy blood, and in bile by some chemists, but not by others.

**HÆMADON'OSUS, from 'αἷμα, 'blood,' and νόσος, 'a disease.' Hæmatangion'osus, Hæmatangion'us, Hæmatangio'sis.** Disease of the blood-vessels.

**HÆMADOSTO'SIS, from 'αἷμα, 'blood,' and ὄστων, 'a bony tumour.' Ossification of the blood-vessels.**

**HÆMADYNAMETER, Hæmadynamometer.**

**HÆMADYNAMOM'ETER, Hæmadynamometer;** from 'αἷμα, 'blood,' δύναμις, 'power,' and μέτρον, 'a measure.' An instrument for measuring the force of the blood in the vessels. It consists of a bent glass tube, the lower bent part of which is filled with mercury. A brass head is fitted into the artery, and a little of a solution of soda is interposed between the mercury and the blood, which is allowed to enter the tube for the purpose of preventing its coagulation. The pressure of the blood on the mercury in the descending portion of the bent tube causes the metal to rise in the ascending portion; and the degree to which it rises indicates the pressure under which the blood moves.

**HÆMAGASTRIC PESTILENCE, Fever, yellow.**

**HÆMAGOGUM, Pæonia.**

**HÆMAGO'GUS, from 'αἷμα, 'blood,' and ἄγω, 'I drive off.' A medicine which promotes the menstrual and hemorrhoidal discharges.**

**HÆMALO'PIA, Hæmophthalmia, Hæmalopis.**

**HÆMALOPIS, Hæmophthalmia.**

**HÆMALOPS, Hæmophthalmia.**

**HÆMAPERITONIRRHAG'IA, (F.) Hæmoperitonirrhagis;** from 'αἷμα, 'blood,' περιτοναίον, 'peritoneum,' and ῥήγη, 'a violent rupture.' An exhalation of blood into the peritoneum.

**HÆMAPHÆIN, Hæmatophæum, Hæmophæum, from 'αἷμα, 'blood,' and φαῖς, 'of a dusky colour.' A term applied by Simon to the brown colouring matter of the blood, supposed by some to be nothing more than hæmatin modified by an alkali.**

**HÆMAPH'OBUS, Hæmoph'obus, from 'αἷμα, 'blood,' and φοβός, 'dread.' One who has a dread of blood—who cannot look at it without fainting.**

**HÆMAPORTA, Hæmatapor'ia, Hæmatapor'ia, Oligohæ'mia, Oligæ'mia, from 'αἷμα, 'blood,' and ἀνερός, 'poor.' Paucity of blood. See Anæmia.**

**HÆMAPTYSIS, Hæmoptysis.**

**HÆMAS, 'αἷμα, gen. 'αἱμάδος. A blood-vessel.**

**HÆMASTATICA, Hæmatostatica.**

**HÆMASTATICÆ, from 'αἷμα, 'blood,' and ἵστημι, 'I remain,' 'reside.' A science, which treats of the strength of the blood-vessels; Hymastat'ico.**

**HÆMATANGIONOSUS, Hæmadonosus.**

**HÆMATANGIOSIS, Hæmadonosus.**

**HÆMATAPORRHOSIS, Cholera.**

**HÆMATEC'LYSIS, Hæmatec'ia, Hæmatec'is, Hæmatosep'is, Sanguinis dissolutio.** Dissolution of the blood.

**HÆMATELÆUM, see Blood.**

**HÆMATEM'ESIS, from 'αἷμα, 'blood,' and ἔμεσι, 'I vomit.' Vomitus cruentus, Hæmorrhæ'gia Hæmatosec'is, Vomitus seu Vomit'io Sanguinis, Gastrorrhæ'gia, Gastro-hæmorrhæ'gia, Hæmorrhæ'gia ventriculi, Hæmorrhæ'gia ventriculi, Vomiting of Blood, (F.) Hæmatémese, Vomissement de sang.** Hæmatemesis is generally preceded by a feeling of oppression, weight; and dull or pungent pain in the epigastric, and in the hypochondriac regions; by anxiety, and, occasionally, by syncope. Blood is then passed by vomiting, and sometimes, also, by stool,—the blood being generally of a grumous aspect. Hæmatemesia may be active or passive; acute or chronic. The blood effused proceeds, almost always, from a sanguineous exhalation at the surface of the mucous membrane of the stomach. It is often observed in females, whose menstrual secretion is irregularly performed. It is not of much danger, except when connected with disease of some of the solid viscera of the abdomen. On dissection of those who have died from protracted hæmatemesia,—for the acute kind is comparatively devoid of danger,—the mucous membrane of the stomach is found red and inflamed, or black, and the vessels considerably dilated. Complete abstinence from food; rest; the horizontal posture; bleeding, if the hemorrhage be active; cold, acidulous drinks, &c., constitute the usual treatment.

**HÆMATENCEPHALUM, Apoplexy.**

**HÆMATEPAGOGÆ, Congestion.**

**HÆMATERA, Hepatirrhæa.**

**HÆMATERUS, Sanguine.**

**HÆMATERYTHRUM, Hæmatin.**

**HÆMATEXOSTOSIS, Osteosarcoma.**

**HÆMATHIDROSIS, Sudor cruentus.**

**HÆMATHORAX, Hæmatothorax.**

**HÆMATIASIS, Hæmatonosus.**

**HÆMAT'ICA, from 'αἷμα, 'blood.' Diseases of the sanguineous function—the third class in the nosology of Good.**

**HÆMATICA DOCTRINA, Hæmatology.**

**HÆMATIDROSIS, Sanguine.**

**HÆMATICIDROSIS, Sudor cruentus.**

**HÆMATIN, Hæmat'ina, Hæmatine, Hæmatosin, Hæmatosine, Hæmater'ythrum, Hæmerythrum, Zödhæ'matin, Hæmach'r'in, Cru'orin, Rubrin, Glob'ulin of some; from 'αἷμα, 'blood.'**

The red colouring principle of the blood. It resides in distinct particles or globules of the blood, and, in the opinion of some observers, in the envelope of the globules. It appears to be of a peculiar character, and one that has not yet been determined by the chemist. That the colour of the blood is not owing to the peroxide of iron which it contains is shown by the fact mentioned by Scherer, that he removed the iron by acids, and yet a deep red tincture was formed when alcohol was added to the residuum.

**HÆMATINUS**, Sanguine.

**HÆMATISCHESIS**, *Hæmischesis*, *Hæmorrhæsis*, from *αἷμα*, 'blood,' and *σχησις*, 'to suppress.' The retention or suppression of a natural or artificial flow of blood.

**HÆMATISMUS**, Epistaxis, Hæmorrhagia.

**HÆMATISTH'MUS**, from *αἷμα*, 'blood,' and *σθῆναι*, 'pharynx.' Hemorrhage into the pharynx.

**HÆMATITES**, *Hæmatitis*, from *αἷμα*, 'blood.' Resembling blood. *Lapis Hæmatites*. A beautiful ore of iron, called also, *Bloodstone*, *Ochrea rubra*, *Oxydum ferricum crystallisatum nativum*, *Ferrum Hæmatites*. When finely levigated, and freed from the grosser parts, by frequent washings with water, it has been long recommended in hemorrhage, fluxes, uterine obstructions, &c., in doses of from one scruple to three or four. Also, a vessel that contains blood, *αἱματιτικὸν ὄργανον*.

**HÆMATMUS**, Gaz sanguinis.

**HÆMATOCATHARTICA**, from *αἷμα*, 'blood,' and *καθαρσις*, 'purification or purgation.' Remedies for purifying the blood.

**HÆMATOCELE**, from *αἷμα*, 'blood,' and *κύησις*, 'tumour.' A tumour formed by blood. By some, this term has been applied to a tumour formed by blood, effused into the cellular texture of the scrotum. Others have used it for tumours arising from effusion of blood into the tunica vaginalis:—*Hæmatocele*, according to them, differing from hydrocele, only in the character of the effusion.—Heister. Others, again, have applied it to effusions of blood into the interior of the tunica albuginea itself.—Richter. The first is the usual acceptation. It is most commonly caused by wounds or contusions; and requires the use of antiphlogistics, discutients, &c. Sometimes it is necessary to evacuate the effused blood.

**HÆMATOCELE ARTERIOSA**, Aneurism.

**HÆMATO-CEREBRIFORM DISEASE**, Encephaloid.

**HÆMATOCHEZIA**, from *αἷμα*, 'blood,' and *χίσις*, 'I go to stool.' *Sedes cruentæ*, *Cæterrhææis vera*, *Enterorrhag'ia simplex*, *Diærrhæa cruentæ seu sanguinolenta*, *Hæmato-diarrhæa*, *Hæmorrhag'ia intestino-rum*, *Enterohæmorrhag'ia*, (F.) *Hæmorrhagis des intestins*, *Keutlement de sang par l'Intestin*. Discharge of blood by stool. See *Melæna*.

**HÆMATOCHYSIS**, Hæmorrhagia.

**HÆMATOCE'LIA**, from *αἷμα*, 'blood,' and *κοιλία*, 'the cavity of the abdomen.' Effusion of blood into the abdomen.

**HÆMATOCOL'PUS**, from *αἷμα*, 'blood,' and *κολπος*, 'vagina.' Effusion of blood into the vagina. Accumulation of blood owing to occlusion of the vagina.

**HÆMATOCYANOSIS**, Cyanopathy.

**HÆMATOCYSTE**, *Hæmatoma saccatum*.

**HÆMATOCYSTIS**, from *αἷμα*, 'blood,' and *κύστις*, 'bladder.' Hemorrhage into the bladder.

**HÆMATO'DES**, *Hæmato'des*, *Sanguin'ous*, *Hæmatoid*, *Hæmatoid*, from *αἷμα*, 'blood,' and *εἶδος*, 'appearance.' That which contains blood, or has the character of blood.

**HÆMATODES FUNGUS**, *Hæmatomy'ces*, *Fungus cancer'osus hæmato'des*, *Mela'na fungo'sa carcino'des*, *Angidiospon'gus*, *Angiomy'ces*, *Hæmatospon'gus*, *Tumor fungo'sus sanguin'ous seu anom'alus*, *Spon'goid inflammation*, *Pulpy or Med'ullary Sarco'ma*, *Carcino'ma Hæmato'des*, *Carcino'ma Spongio'sum*, *Bleeding Fungus*, *Soft Cancer*, (F.) *Carcinoma sanglantis*, *Hæmatonc'is fungoides*. An extremely alarming, carcinomatous affection, which was first described, with accuracy, by Mr. John Burns, of Glasgow. It consists in the development of cancerous tumours, in which the inflammation is accompanied with violent heat and pain, and with fungous and bleeding excrescences. Even when the diseased part is extirpated, at a very early period, recovery rarely follows: other organs being generally implicated at the same time. Fungus hæmatodes was the term first applied to the disease by Mr. Hey of Leeds. Mr. J. Burns called it *Spongioid inflammation*, from the spongy, elastic feel, which peculiarly characterizes it, and continues even after ulceration has taken place. The disease has, most frequently, been met with in the eyeball, the upper and lower extremities, testicle and mamma: but it occurs in the uterus, ovary, liver, spleen, brain, lungs, thyroid gland, and in the hip and shoulder-joint.

Some French surgeons designate, by this name, those tumours which were formerly termed *anormales*, *cæcæruæses*, *variqueuses*, called *Erectiles* by Dupuytren, *Hæmatonc'is* by Alibert, *Telangiectasia* by Grafe.

**HÆMATODIARRHŒA**, *Hæmatochezia*.

**HÆMATOGASTER**, from *αἷμα*, 'blood,' and *γαστήρ*, 'stomach.' Effusion of blood into the stomach.

**HÆMATOGLOBULIN**, see Globules of the blood.

**HÆMATOGRA'PHIA**, *Hæmatography*, from *αἷμα*, 'blood,' and *γραφία*, 'a description.' A description of the blood.

**HÆMATOID**, *Hæmatodes*.

**HÆMATOL'OGY**, *Hæmatology*, *Hæmatolog'ia*, *Hæmat'ica doctr'ina*, (F.) *Hæmatologie*, from *αἷμα*, 'blood,' and *λογος*, 'a discourse.' That part of medicine which treats of the blood.

**HÆMATOLOGY**, PATHOLOGICAL, (F.) *Hæmatologie pathologique*. Observation of the blood to detect its varying characters in disease.

**HÆMATOL'YSES**, ((G.) *Hæmatolyse*,) from *αἷμα*, 'blood,' and *λυσις*, 'solution.' An order of diseases in which there is diminished coagulability of the blood.—Fuchs.

**HÆMATOMA**, *Thrombus*, *Tumor sanguin'ous*. A bloody tumour, especially of the scalp of the new-born.

**HÆMATOMA SACCA'TUM**. An encysted tumour containing blood—*Hæmatocyste*.

**HÆMATOMANTI'A**, from *αἷμα*, 'blood,' and *μαντις*, 'divination.' Judgment of disease from the appearance of the blood.

**HÆMATOMETRA**, *Metrorrhagia*.

**HÆMATOMETACHYSIS**, *Transfusio sanguinis*.

HÆMATOMETRA, Metrorrhagia.

HÆMATOMMA, Hæmophthalmia.

HÆMATOMPHALOCÆLE, *Hæmatomphalum*, *Hæmatom'phalus*, from 'αἷμα, 'blood,' φάλλος, 'the navel,' and κηλή, 'a tumour.' Umbilical hernia, the sac of which encloses a bloody serum; or which has, at its surface, a number of varicose veins; constituting *Varietom'phalus*.

HÆMATOMPHALUM, Hæmatomphalocæle.

HÆMATOMYCES, Hæmatodes fungus.

HÆMATONCUS, (F.) *Hématoncis*, from 'αἷμα, 'blood,' and κύρις, 'a tumour.' Alibert has given this name to the *Navi mater'ni*, *Varietose tumours*. He admits three varieties:—the *H. fungoides*, *H. framboisée*, and *H. tubéreuse*.

HÆMATONOSUS; *Hæmatosis*, *Hæmatopathi'a*, *Hæmopathi'a*, from 'αἷμα, 'blood,' and νόσος, 'disease.' A disease of the blood.

HÆMATOPATHIA, Hæmatonosis.

HÆMATOPEDESIS, see Diapedesis.

HÆMATOPERICARDIUM, from 'αἷμα, 'blood,' and περικαρδιον, 'pericardium.' Effusion of blood into the pericardium.

HÆMATOPHÆUM, Hæmaphæin.

HÆMATOPHILIA, *Hæmophil'ia*, *Hæmorrhophil'ia*, *Idiosyncrastia hæmorrhag'ica*, from 'αἷμα, 'blood,' and φίλος, 'I love.' A hemorrhagic diathesis.

HÆMATOPHLEBESTASIS. Sudden suppression of a hemorrhage;—from στήσις 'αἱματός φλεβών, 'suppression of the blood of the veins.'—Galen.

HÆMATOPHOBIA, *Hæmophob'ia*, from 'αἷμα, 'blood,' and φόβος, 'dread.' Dread or horror at the sight of blood, producing syncope, &c.

HÆMATOPHTHALMIA, Hæmophthalmia.

HÆMATOPHTHORES, (G.) *Hæmatophthores*; from 'αἷμα, 'blood,' and φθώρα, 'corruption.' An order of diseases in the classification of Fuchs, in which the blood is materially altered in its composition, as in typhus.

HÆMATOPISIS, (F.) *Hæmatopisis*. M. Capuron, of Paris, has applied the term *Hæmatopisis utérine*, from analogy with *Hydropisis utérine*, to a collection of blood which sometimes takes place in the uterus, when, owing to faulty conformation, the exit of the menstrual flux is prevented.

HÆMATOPLANIA, *Hæmatoplans'is*, from 'αἷμα, 'blood,' and πλανη, 'wandering.' A vicarious hemorrhage.

HÆMATOPLANIA MENSTRUALIS, Menstruation, vicarious.

HÆMATOPLETHORA, Plethora.

HÆMATOPEA, Hæmatopœtica.

HÆMATOPOESIS, Hæmatosis.

HÆMATOPOETICA, *Hæmatopœ'a*, from 'αἷμα, 'blood,' and ποιη, 'I make.' Agents that favour hæmatosis. Iron was called by the ancients *metal'um hæmatopœt'icum*.

HÆMATOPOIESIS, Hæmatosis.

HÆMATOPORIA, Hæmaporia.

HÆMATOPS, Hæmophthalmia.

HÆMATOPSIA, Hæmophthalmia.

HÆMATOPTYSIA, Hæmoptysis.

HÆMATOPTYSIS, Hæmoptysis.

HÆMATORRHACHIS, Apoplexia myelica.

HÆMATORRHAGIA, Hæmorrhagia.

HÆMATORRHŒA, Hæmorrhagia.

HÆMATORRHOSIS, Cholera.

HÆMATORRHYSIS, Hæmorrhagia.

HÆMATOSCHEOCÆLE, *Hæmoschœoc'le*, *Hæmatos'cheum*, from 'αἷμα, 'blood,' σχιον, 'scrotum,' and κηλή, 'rupture.' Effusion of blood into the scrotum.

HÆMATOSCHEUM, Hæmatoschœocæle.

HÆMATOSCOPIA, *Hæmoscop'ia*, *Hæmorrhœopsie*, from 'αἷμα, 'αἱματος, 'blood,' and σκοπεω, 'I view.' An examination of blood drawn.

HÆMATOSEPSIS, Hæmatoclysis.

HÆMATOSIN, Hæmatin.

HÆMATOSIN, *Exæmato'sis*, *Enhæmato'sis*, *Hæmatopoi'sis*, *Hæmatopoe'sis*, *Procreatio sanguinis*; *Decarbonization*, *Atmosphærication of the blood*; *Sanguification*; from 'αἷμα, 'blood.' The transformation of the venous blood and chyle into arterial blood by respiration. Called, also, *Aëration*, *Arterialization of the blood*. Formation of blood in general.

HÆMATOSPILIA, Purpura hæmorrhagica.

HÆMATOSPONGUS, Hæmatodes fungus.

HÆMATOSTATICA, from 'αἷμα, 'blood,' and στατική, 'statics.' *Ischæ'mia*, *Hæmatat'ica*, *Hæmatostat'ios*, *Hæmostat'ica*, *En'ama*, *Hæmatostatiques*, *Hæmastatiques*, *Hæmostatiques*. The doctrine of the motion of the blood in living bodies. Also, remedies for stopping blood.—*Catastatica*.

HÆMATOSTEON, from 'αἷμα, 'blood,' and στήσις, 'a bone.' Effusion of blood into the bones or joints.

HÆMATOSYMPHOESIS, Congestion.

HÆMATOSYNGOGE, Congestion.

HÆMATOTELANGIOSIS, Telangiectasia.

HÆMATOTIS, *Hæmat'us*, from 'αἷμα, 'blood,' and οτι, gen. ωτος, 'the ear.' Effusion of blood into the inner ear.

HÆMATOTHORAX, *Hæmathor'ax*, *Hæmoptysis inter'na*, *Pleurorrhœa sanguin'ea*, *Pneumorrhœ'gia inter'na*, *Hæmorrhag'io Pleur'ica*, from 'αἷμα, 'blood,' and θώραξ, 'the chest.' Extravasation of blood into the chest.

HÆMATOXYLON CAMPECHIANUM, *Acacia Zeylon'ica*, *Logwood*. The part of the tree, used in medicine, is the wood, *Hæmatoglyi Lignum*, *Lignum Campechen'se*, *L. Campechia'num*, *L. Campescœ'num*, *L. Indicum*, *L. Sappan*, *L. Brasilia'num rubrum*, *L. caru'leum*, (F.) *Bois de Campêche*. Family, Leguminosæ. Sex. Syst. Decandria Monogynia. Logwood is almost inodorous; of a sweetish, subastringent, taste; and deep red colour. Its virtues are extracted both by water and alcohol. It is astringent and tonic, and is used in the protracted stage of diarrhœa and dysentery.

HÆMATURESIS, Hæmaturia.

HÆMATURIA, *Hæmature'sis*, from 'αἷμα, 'blood,' and ούρον, 'I make urine.' Voiding of blood by urine. *Hæmorrhœ'gia hæmat'ria*, *H. ex viris urina'riis*, *Hæmure'sis*, *Hæmure'ria*, *Micticruen'ta*, *M. Sanguin'ea*, *Mictus Cruen'tus seu Sanguineus*, *Hæmorrhœ'a viar'um urinariarum Sanguis in Uri'na*, *Bloody urine*, (F.) *Pissement de sang*, *Hæmaturie*. Hemorrhage from the mucous membrane of the urinary passages. Like other hemorrhages, it may be *active* or *passive*. It may proceed from the kidneys, bladder, or urethra. The essential symptoms are:—blood, evacuated by the urethra; preceded by pain in the region of the bladder or kidneys, and accompanied by faintness. Whencesoever it proceeds, hæmaturia always takes place by

exhalation. Rupture of vessels is by no means common in the mucous membranes. *Actio hæmaturia* requires general or local blood letting; diluent and cooling drinks; absolute rest, and the horizontal posture. The *chronic* kind is more troublesome. It requires acidulated or aluminous drinks; chalybeates and tonics in general. When hæmaturia is excessive, cold injections may be thrown into the rectum or into the vagina of women, and topical applications be made to the perinæum.

**HÆMATURIA CYSTICA**, Cystorrhagia — h. Ejaculatoria, Spermatozystidorrhagia — h. Seminalis, Spermatozystidorrhagia — h. Stillitia, Urethrorrhagia.

**HÆMATUS**, Hæmatosis.

**HÆMAXIS**, Blood-letting.

**HÆMENCEPHALUS**, Apoplexy.

**HÆMERYTHRUM**, Hæmatin.

**HÆMIDROSIS**, see Diapedesis.

**HÆMISCHESES**, Hæmatischesis.

**HÆMITIS**, from *αἷμα*, 'blood,' and *itis*, a suffix denoting inflammation. Inflammation of the blood. (F.) *Hémite*. The alteration of the blood, which occurs in inflammatory diseases. —Piorry.

**HÆMO-ARTHRITIS**, Rheumatism, (acute.)

**HÆMOCARDIORRHAG'IA**, *Apoplex'ia cordis*, Apoplexy of the heart, from *αἷμα*, 'blood,' *καρδία*, 'the heart,' and *ἐκπίπτειν*, 'I break forth.' Effusion of blood into the substance of the heart.

**HÆMOCERCH'NOS**. This term has received two acceptations, owing to the different senses in which *κέρχης* is employed; signifying, sometimes, *hissing*; at others, *dry*. Consequently, the hellenists have translated the compound word, at times, by spitting of blood, with hissing in the throat; at others, by evacuation of dry matters.

**HÆMOCRYPHIA**, Hæmatischesis.

**HÆMODES**, Sanguine.

**HÆMO'DIA**, *Hæmodias'mus*, *Hæmo'dia*, *Hætu'do* seu *Stupor Dentitium*, from *αἰμώδης*, 'I stupify.' Pain of the teeth,—and more especially *Agacement*, or the setting on edge of those bodies by acid or acerb substances. It is also called *Odon'tia Stupor'is*, *Odon'tal'gia hæmo'dia*, *Dolor dentitium à strido're*, *Cataplex'is*, *Odon'tamblyog'mus*, *Odon'thyperasthes'is*, *Tooth-edge*.

**HÆMODIASMUS**, Hæmodia.

**HÆMOIDES**, Sanguine.

**HÆMOPATHIA**, Hæmatonosis.

**HÆMOPERICARDIUM**, *Pericarditis œsudato'ria*, from *αἷμα*, 'blood,' and *pericardium*. Effusion of blood into the pericardium.

**HÆMOPERITONÆ'UM**, from *αἷμα*, 'blood,' and *περιτόναιον*, 'peritoneum.' Effusion of blood into the peritoneum.

**HÆMOPEXIE**, (G.) *Hæmopezian*, from *αἷμα*, 'blood,' and *πέξις*, 'coagulation.' An order of diseases in which there is increased coagulability of the blood.—*Hyperino'sis sanguinis*.—Fuchs.

**HÆMOPHEUM**, Hæmaphein.

**HÆMOPHILIA**, Hæmatophilia.

**HÆMOPHOBIA**, Hæmatophobia.

**HÆMOPHTHAL'MIA**, *Hæmatophthal'mia*, *Hæmatop'tia*, from *αἷμα*, 'blood,' and *ὀφθαλμός*, 'eye.' *Hæmalop'tia*, *Hæmalop'tis*, *Hæ'malops*. Effusion of blood into the eye. When the extravasation is external, it is called *H. exter'na*, *Hypophag'ma* and *Hæmalops œ-*

*terna*; when internal, *Hæmophthal'mia inter'na*; *Hydrophthal'mus cruen'tus*, *Hypoph'ysis hæmato'des*, *Hæmatom'ma*, and *Hæ'malops inter'nus*. A blood-shot eye.

**HÆMOPLANIA MENSTRUALIS**, Menstruation, vicarious.

**HÆMOPLETHORA**, Plethora.

**HÆMOPROCTIA**, Hæmorrhoids.

**HÆMOP'TOE**, Hæmoptysis—h. *Laryngea* et *Trachealis*, *Tracheorrhagia*.

**HÆMOP'TOSIS**, Hæmoptysis.

**HÆMOP'TYSIS**, from *αἷμα*, 'blood,' and *πτύω*, 'I spit.' *Spitting of blood*, *Hæmorrhagia Hæmoptysis*, *Hæmopt'ysis*, *Hæmatop'tis'ia*, *Hæmatop'tysis*, *Emp'tot*, *Emp'otot*, *Emp'to'ica pas'sio*, *Hæmopt'ys'mus*, *Hæmopto'sis*, *Sputum sanguinis*, *San'guinis fluor pulmo'nium*, *Emp'to'ica pas'sio*, *Hæmotis'mus*, *Hæmorrh'a'a pulmonalis*, *Cruen'ta exspu'tio*, *Hæmorrh'gia pulmo'nis*, *Pas'sio hæmopto'ica*, *Rejectio sanguinis è pulmo'nibus*, *Expectoratio sanguinis*, *Hæmorrh'gia Bron'chicæ*, *Pneumorrh'gia*, *Pneumorrhag'ia*, *Pneumonorrh'gia*, *Pneumonorrh'a'a*, *Bronchorrh'gia*, *Emp'tysis*, *Hæmoptot*, *Sputum cruen'tum*, (F.) *Hæmoptysie*, *Crachement de sang*, *Expectoration de sang*. Hemorrhage from the mucous membrane of the lungs; characterized by the expectoration of more or less florid and frothy blood. It is generally preceded by cough; dyspnoea; sense of heat in the chest, &c. It is important to discriminate between hæmoptysis, produced by some accidental cause acting irregularly or periodically on the lungs; and that which is, as it were, constitutional, and dependent on some organic affection of the lungs, or some faulty conformation of the chest. These two varieties differ as much in their prognosis and method of treatment, as in their causes. Constitutional hæmoptysis is a serious disease, almost always announcing phthisis pulmonalis. The accidental variety is chiefly dangerous by frequent recurrence, or too great loss of blood.

The *general causes* of hæmoptysis are the same as those of other kinds of hemorrhage. It has, besides, *particular causes*; such as too great exercise of the lungs;—loud speaking, playing on wind instruments, breathing acrid vapours, &c. It usually occurs between puberty and the age of 35. A sudden and terrific kind of hæmoptysis is sometimes met with; consisting in a great afflux of blood into the lungs. This has been called *Pulmonary Apoplexy*, *Apoplex'ia pulmonalis*, *A. pulmo'nium*, *Pneumorrh'gia*, *Infar'tus hæmorrhag'icus pulmo'nium*, (F.) *Apoplex'ia pulmonare*, *Hæmoptysis foudroyante*, *Hæmorrh'gie interstitielle de Poumon*. Infiltration of blood into the air cells may occur without any hæmoptysis.

*Physical signs*. Percussion may not always aid us in hæmoptysis, but generally a circumscribed dulness will be perceived. The inspiratory murmur, on auscultation, is feeble or absent, locally; and is replaced by bronchial respiration and *bronchophony*. A fine liquid crepitus is detected around the affected part; and in the larger tubes, near the spine, a liquid bubbling rhonchus is usually heard. The value of these signs is determined by the nature of the expectoration. The treatment of hæmoptysis must be like that of internal hemorrhage in general.

**HÆMOP'TYSIS INTERNA**, Hæmatothorax—h.

HÆMORRHOIDAL VEINS follow the same distribution, and generally empty themselves into the lesser mesenteric. Some of them assist in the formation of the hypogastric vein.

HÆMORRHOIDAL VESSELS, *Vasa sœdalis*, are those vessels which are distributed to the rectum—the seat of hemorrhoids.

HÆMORRHOIDALES NODI, Hæmorrhoids. HÆMORRHOIDES, see Hæmorrhoids—h. Cæca, see Hæmorrhoids—h. Fluentes, Hæmorrhoids—h. Furentes, see Hæmorrhoids—h. Mariæcœ, Hæmorrhoids—h. non Fluentes, Hæmorrhoids—h. Oris, Stomatorrhagia.

HÆMORRHOÏS, *Aimor'rhois*, *Asclepias'mus*, from 'αἷμα, 'blood,' and ῥεω, 'I flow.' *Aimor'rhois*, *Proctica Mari'sca*, *Mari'sca*, *Proctalgia Hæmorrhoidalis*, *Morbus Hæmorrhoidalis*, *Piles*, (F.) *Hæmorrhoides*. The essential symptoms of this affection are:—Livid and painful tubercles or excrescences, (*Hæmorrhoid'al Tumours*;) usually attended with a discharge of mucus or blood, (*Hæmorrhoid'al Flux*, *Proctorrhœ'a*, *Hæmoproctia*, *Hæmorrhœ'a vasorum hæmorrhoid'alium*, (F.) *Hæmoproctis*.) The most common causes of piles are a sedentary life; accumulation of fæces in the rectum; violent efforts at stool; pregnancy, &c. The precursory symptoms are:—pains in the loins; stupor of the lower limbs; and uneasiness in the abdomen and rectum, with more or less gastric, cerebral, and indeed general disorder;—constituting the *Diath'esis Hæmorrhoidalis*, *Motus seu Turba Hæmorrhoidalis*, and *Mol'i'men Hæmorrhoid'al'e*, of most of the writers of Continental Europe. To these symptoms follow one or more round, smooth, renitent, painful, pulsating, and erectile tumours, around the margin of the anus, or within the anus; some pouring out blood occasionally. After having remained, for a time, tense, and painful, they gradually shrink and disappear. The chief symptoms, occasioned by hæmorrhoidal tumours, when much inflamed, are: constant pain, liable, however, to exacerbations, and obliging the patient to preserve the horizontal posture, and to become augmented by the least pressure, or by the passage of the fæces.

Hæmorrhoids have generally been distinguished into—*Hæmorrhoides Fluentes seu Mari'scœ*, *Proctica Mari'sca cruenta*, *Blending or Open Piles*; and into *H. non Fluentes*, *Proctica Mari'sca cæca*, *Hæmorrhoides cæca*, *Hæmorrhoidales nodi seu furentes*, *Shut or blind piles*. They have, also, been divided into *internal or occulti*, and *external*, according to their situation; and into *accidental or constitutional*.

*Hæmorrhoidal Tumours* are extremely troublesome, by their disposition to frequent recurrence; and they are apt to induce fistula; otherwise, they are devoid of danger. When anatomically examined, they are found not to consist in a varicose dilatation of the veins of the rectum; but to be formed of a very close, spongy, texture; similar to that which surrounds the orifice of the vagina; and to be erectile, like it. They are surrounded by a delicate membrane, and have no internal cavity. The treatment, in mild cases of hæmorrhoidal tumours, is simple. Rest; the horizontal posture; the use of mild laxatives, as sulphur, castor oil, and emollient glysters, will be sufficient. If they be much inflamed, leeches may

be applied; and warm cataplasms or cold lotions, according to circumstances, be prescribed, with abstinence, and cooling drinks. Afterwards, an ointment, composed of powdered galls and opium, may afford relief. It is in the relaxed kind, that such ointment, and the internal use of *Ward's Paste*, can alone be expected to afford much benefit. If, after repeated attacks, the tumours remain hard and painful, and threaten fistula, they may be removed.

By *Hæmorrhoidal Flux*, *Fluxus hæmorrhoidalis*, *Proctorrhœ'gia*, is meant the hemorrhage which takes place from the rectum, owing to hemorrhoids. It is a common affection. The quantity of blood discharged is various: at times, it is very trifling; at others, sufficient to induce great debility, and even death. It is announced and accompanied by the same symptoms, as precede and attend hæmorrhoidal tumours. Like other hemorrhages it may be *active or passive*; *accidental or constitutional*. The prognosis is rarely unfavourable. The affection may, almost always, be relieved by properly adapted means. These resemble such as are necessary in hemorrhages in general. Perfect quietude,—mental and corporeal,—light diet, cooling drinks; bleeding if the symptoms indicate it; astringents, (if the disease be protracted and passive,) such as the *Tinctura Ferri Chloridi*; aspersions of cold water on the anus: astringent injections; plugging and compression. Such will be the principal remedial agents. When the hemorrhage has become habitual or is vicarious, some caution may be required in checking it; and, if inconvenience arise from a sudden suppression, its return may be solicited by the semicupium, sitting over warm water; aloetic purgatives, glysters, irritating suppositories, &c.; or leeches may be applied to the anus.

To the internal bleeding pile, a soft, red, strawberry-like elevation of the mucous membrane, Dr. Houston, of Dublin, gives the name *vascular tumour*. For its removal he recommends the application of nitric acid, so as to produce sloughing of its surface.

Some authors have described a species of *Leucorrhœ'a Analis*; or whitish discharge from the anus, which often attends ordinary hæmorrhoids. This they have called *Proctica mari'sca muco'sa*, *Hæmorrhœ'is alba*, *Hæmorrhœ'gia muco'sa*, *Leucorrhœ'is*, &c. It requires no special mention.

HÆMORRHOÏS ΔΕ ΕΧΑΝΙΑ, Proctocœle—h. Proccedens, Proctocœle.

HÆMORRHOÏS CHESIS, from 'αἰμορροῖν, 'Hæmorrhœ'is,' ῥεω, 'I flow,' and ἵσταν, 'I restrain.' *Ecten'tio Fluxus hæmorrhoidalis*. Suppression or retention of the hæmorrhoidal flux.

HÆMORRHOPHÆSIS, *Absorptio sanguinis*, from 'αἷμα, 'blood,' and ῥεω, 'I sip up.' Absorption of blood.

HÆMORRHOPHILIA, Hæmatophilia.

HÆMORRHOSCOPIA, Hæmatoscopia.

HÆMORRHYSIS, Hæmorrhagia.

HÆMOSCHEOCELE, Hæmatoschœcele.

HÆMOSCOPIA, Hæmatoscopia.

HÆMOSPASTIC, (F.) *Hémospastique*, from 'αἷμα, 'blood,' and πασσω, 'I draw.' An agent which draws or attracts blood to a part; as a cupping-glass. The operation is termed *Hæmospas'tia*, (F.) *Hémospasie*. It is generally applied to a process by which the air is exhausted

over a considerable surface, as over one or more of the extremities, by an appropriate pneumatic apparatus.

**HÆMOSTASIA**, *Hæmostasis*, *Epidæsis*, *Sanguinis stagnatio*, (F.) *Hæmostasis*, from *αἷμα*, 'blood,' and *στασις*, 'stagnation.' Stagnation of blood. This name has also, been given to any operation, the object of which is to arrest the flow of blood.

**HÆMOSTATICS**, *Hæmostatica*.

**HÆMOTELANGIOSIS**, *Telangiectasia*.

**HÆMOTEXIA**, *Hæmateclysis*.

**HÆMOTEXIS**, *Hæmateclysis*.

**HÆMOTISMUS**, *Hæmoptysis*.

**HÆMOTROPHY**, *Hæmotrophia*; from *αἷμα*, 'blood,' and *τροφή*, 'nourishment.' Excess of sanguineous nourishment.—*Prout*.

**HÆMURIA**, *Hæmaturia*.

**HÆMURESIS**, *Hæmaturia*.

**HÆMYDOR**, Serum of the blood.

**HÆREDITARIUS**, *Hereditary*.

**HÆSITATIO**, *Balbuties*.

**HÆVEA GUIANENSIS**, see *Caoutchouc*.

**HAGARD**, *Haggard*.

**HAGENIA ABYSSINICA**, *Brayera anthelmintica*. An Abyssinian tree of the family *Rosaceæ*, *Sexual system*, *Icosandria Digynia*, which the natives plant round their habitations, as an ornament. The infusion or decoction of its flowers is employed by them as an anthelmintic especially in cases of tape-worm. It is called, there, *Cusso* or *Kosso*.

**HAGGARD**, (F.) *Hagard*. The French use the term, *Air hagard*, *Œil hagard*, '*Haggard air*,' '*Haggard eye*,' for a physiognomy, in which there is at once an expression of madness and terror.

**HAGIOSPERMUM**, *Artemisia santonica*.

**HAGIOXYLUM**, *Guaiaacum*.

**HAIL**, *Chalaza*.

**HAIR**, *Sax. hær*, *Crines*, *Pilus*, *Thrix*, (F.) *Poil*. A conical, corneous substance; issuing to a greater or less distance from the skin, to the tissue of which it adheres by a bulb, *Bulbus pili*, seated in the cellular membrane,—where alone it is sensible. The hair receives various names in different parts—as *Beard*, *Cilia*, *Eyebrows*, *Hair of the head*, (*Capilli*), &c.

**HAIR**, FALLING OFF OF THE, *Alopecia*—*h. Matted*, *Plica*—*h. Plaited*, *Plica*—*h. Trichomatose*, *Plica*.

**HAIR-WORM**, *Seta equina*—*h. Muscular*, *Draconculus*.

**HAL**, *Salt*.

**HALATION**, *Halditium*; diminutive of *αλ*, 'salt.' A pungent remedy, with the ancients, which contained salts.

**HALCHEMIA**. The alchemists so called the art of fusing salts:—from *αλ*, 'salt,' and *χημ*, 'I pour out.'—*Libavius*.

**HALCYON**, *Aleyon*.

**HALCYONIUM ROTUNDUM**, *Pila marina*.

**HALE**, *Ephelides*.

**HALFINE**, *Breath*—*h. Courts*, *Dyspnœa*.

**HALELE'ON**, *Halela'um*, from *αλ*, 'salt,' and *λαίον*, 'oil.' *Oleum Sali mixtum*. A mixture of oil and salt, for removing swellings of the joints—*Galen*.

**HALÉTRATION**, *Alteration*.

**HALF-CASTE**, *Half-Cast*, see *Caste*. A term applied in India, to the offspring of a Hindoo and a European. Since, extended to the offspring of mixed races. The subjoined list

from *Tschudi's Travels in Peru, 1838—1842*, shows the parentage of the different varieties of half-casts, and also the proper designations of the latter, as observed in South America.

PARENTS.	CHILDREN.
White Father and Negro Mother,	Mulatto.
White Father and Indian Mother,	Mestizo.
Indian Father and Negro Mother,	Chino.
White Father and Mulatta Mother,	Cuarteron.
	Creole (only distinguished from the white by a pale-brownish complexion)
White Father and Mestiza Mother,	Chino-blanco.
White Father and China Mother,	Quinterc.
White Father and Cuarterona Mother,	White.
Negro Father and Mulatta Mother,	Zambo-negro.
Negro Father and Mestiza Mother,	Mulatto-oscuro.
Negro Father and China Mother,	Zambo-chino.
Negro Father and Zamba Mother,	Zambo-negro (perfectly black)
Negro Father and Cuarterona or Quinteras Mother,	Mulatto (rather dark.)
Indian Father and Mulatta Mother,	Chino-oscuro.
Indian Father and Mestiza Mother,	Mestizo-claro (frequently very beautiful.)
Indian Father and China Mother,	Chino-cholo.
Indian Father and Zamba Mother,	Zambo-claro.
Indian Father with China-chola Mother,	Indian (with rather short frizzy hair.)
Indian Father and Cuarterona or Quinteras Mother,	Mestizo (rather brown.)
Mulatto Father and Zamba Mother,	Zambo (a miserable race)
Mulatto Father and Mestiza Mother,	Chino (of rather clear complexion.)
Mulatto Father and China Mother,	Chino (rather dark.)

See *Mulatto*.

**HALICA**, *Alica*.

**HALICACALUM**, *Physalis*.

**HALICES**, *Pandiculation*.

**HALINA'TRUM**, *Halini'trum*, *Haloni'trum*; from *αλ*, 'salt,' and *natrum* or *natron*. A name given by the ancients to subcarbonate of soda, containing a little subcarbonate of ammonia, which is found, ready-formed, on the plaster of damp walls, in places inhabited by man or animals. Also *Potassæ nitras*.

**HALINITRUM**, *Halinatrum*.

**HALINUS**, *Saline*.

**HALITUOUS**, *Halituo'sus*, from *halitus*, 'vapour.' (F.) *Halituscus*. The skin is said to be *halituscus*, when covered with a gentle moisture. The vapour, exhaled in all the cavities of the body, so long as the blood is warm, is called *Halitus*. The odorous vapour, exhaled by the blood itself whilst warm, is called *Halitus Sanguinis*.

**HALITUS**, *Breath*—*h. Oris Fœtidus*, *Breath*, offensive—*h. Sanguinis*, *Gaz sanguinis*. See *Halituum*.

**HALL**, MINERAL WATERS OF. The springs of Hall, in Upper Austria, contain iodine.

**HALLUCINATIO HYPOCHONDRIASIS**, *Hypochondriasis*—*h. Vertigo*, *Vertigo*.

**HALLUCINATION**, *Hallucina'tio*, *Halucina'tio*, *Falla'cia*, *Illu'sio sen'sus*, *Socordia*, *Alu'sia*, *Illu'sio*, *Allucina'tio*, *Parora'nis*, *Somnia'tio in statu vigili*, *Ido'lum*, *Waking dream*, *Phan'tasm*, from *hallucinari*, 'to err;' 'to be deceived.' A morbid error in one or more of the senses. Perception of objects, which do not in fact exert any impression on the external senses. Hallucination, almost always, if not always, depends on disorder of the brain, but is not an index of insanity, unless the patient believes in the existence of the subject of the hallucination.

HALLUS, Pollex pedis.

HALLUX, Pollex pedis.

HALME, Muria.

HALMYRODES, *Salsugino'sus*, from 'αλυροεις, ('αληρη, 'sea-water,' αλς, 'salt,') 'a salt liquor.' An epithet given to any affection, in which the heat feels pungent under the finger of the physician.—Hippocrates.

HALMYRUS, Saline.

HALO, Areola.

HALO SIGNATUS. The impression made by the ciliary processes on the anterior surface of the vitreous humour. So called from its consisting of a circle of indentations.—Sir C. Bell. Called by Haller, *Stria retina subjecta ligamento ciliaris*.

HALODERÆUM, from 'αλς, 'salt,' and δερμα, 'a collar,' (δερη, 'neck,') *Collarium salinum*. A collar of salt applied to the neck, as in cases of croup.

HALOGENE, Chlorine.

HALOIDUM OXYGENATUM, Potassæ murias hyperoxygenatus.

HALONITIS, Induration of the cellular tissue.

HALONITRUM, Halinatrum.

HALOS, Areola.

HALOTYLE, *Culcita salina*, from 'αλς, 'salt,' and τυλη, 'a bolster.' A bolster or pillow of salt recommended in croup.

HALS, 'αλς, 'salt;' hence *Halogene, Haloid*, &c.

HALTERES. Pieces of lead held in the hands of the ancients to assist them in leaping.

HALUCINATIO, Hallucination.

HALYCODES, Saline.

HALYSIS MEMBRANACEA, Bothricephalus latus—h. *Solium, Tœnia solium*.

HAM, Poples.

HAMAMELIS VIRGINIANA, *H. Virginica*, *Witch hazel, Winter witch hazel, Snapping Hazelnut, Winter bloom*. The bark of this tree, which is a native of the United States, is somewhat bitter and sensibly astringent; but it has not been much used. A cataplasm of the inner rind of the bark is said to have been found efficacious in painful inflammation of the eyes.

HAMARTHRTIS, *Holarthritis, Catholarthritis, Arthritiis universalis*, from 'αμα, 'at once,' and αρθριτις, 'gout.' Gout in all the joints. Universal gout.

HAMMA, *Nodus*, 'a tie.' A knot, used for retaining bandages on any part.—Hippocrates. A truss.

HAMPSTEAD, MINERAL WATERS OF. These waters, situate in the neighbourhood of London, are a good chalybeate.

HAMULAR PROCESS, see *Hamulus*.

HAMULUS. Diminutive of *hamus*, 'a hook.' A hook or crook: *Ancistrum*. Also, any hook-like process; as the *hamulus* or *hamular process* of the pterygoid process.

HAMUS, see *Hamulus*.

HANCHE, Haunch.

HAND, Manus.

HANDS, DROPPED, *Hand drop*. A popular term for the paralysis of the hand, induced by the action of lead.

HANGERS, *Crusta genu equinæ*.

HANGNAIL, (F.) *Onxis*. A portion of epidermis, detached so as to tear the integument in the vicinity of the finger nails.

HANNEBANE, *Hyoxyamus*.

HAPANTISMUS, Badly formed, from *πας*, or 'απας, 'all.' *Obliteratio completa*. The matting or growing together of organic parts.

HAPHE, 'αφη, 'feeling, touch.' Hence:

HAPHONOSI, *Haphonosi*, from 'αφη, 'the touch.' *Morbi tactus*. Diseases of the sense of touch.

HAPLOACNE, Acne simplex.

HAPLOPATHIA, from 'απλος, 'simple,' and *πάθος*, 'disease.' *Morbus simplex*. A simple or uncomplicated affection.

HAPLOTOMIA, *Simplex sectio, Incisio simplex, Operatio simplex*, from 'απλος, 'simple,' and *τομή*, 'incision.' A simple incision.

HAPSIS, Touch.

HAPTODYSPHORIA, *Tactus dolorificus*; from 'αφη, 'touch,' and *δυσφορος*, 'difficult to be borne.' Painful to the touch.

HAPTOTICA, *Haptoticta*, from 'αφη, 'touch.' The doctrine of the phenomena of touch.

HARD, (G.) *hart, Durus, Scleros*, (F.) *Dur*. That which offers much resistance. In anatomy, the *hard parts* are those which compose the osseous basis of the body; in other words, the skeleton. See *Pulse*, *hard*.

HARDESIA, *Hibernicus lapis*.

HARDHACK, *Spiræa tomentosa*.

HARE-LIP, *Lagochilus, Lagostoma, Lagontomum, Lagenotomum, Labium Leporinum, Olophonia Labii Labiata, Leporinum rostrum*, (F.) *Bec de Lièvre*. A fissure or perpendicular division of one or both lips. It has been so called, in consequence of the upper lip of the hare being thus divided. Hare-lip is generally congenital; at other times it is accidental, or produced by a wound, the edges of which have not been brought into contact, and have healed separately. It is *simple*, when there is but one division; *double*, when there are two; and *complicated*, when there is, at the same time, a division or cleft of the superior maxillary bone and of the palate—*Cleft palate, Wolf's jaw, Rictus lupinus*; or a projection of the teeth into the separation of the lip.

In the *Hare-lip operation*, there are two indications to be fulfilled. First, to pare, with the knife or scissors, the edges of the cleft, and, afterwards, to preserve them in contact; in order to cause adhesion. This last object is accomplished by means of pins, passed through the edges of the division; in other words by the twisted suture. The projecting teeth must, of course be previously removed. If there be separation of the palate, it will become less and less after the union of the lip, or the operation of staphyloraphy may be performed upon it.

HARE'S EAR, *Bupleurum rotundifolium*—h. *Eye, Lagophthalmia*.

HARGNE, *Hernia*—h. *Anterymale, Circumphalus*.

HARICOT, *Phaseolus vulgaris*—h. *Grande Perou, Jatropha curcas*.

HARMALIA, Aliment.

HARMONY, *Harmonia, Harmos*, primarily from *αρη*, 'I adjust.' Anatomists have called

*Suture by Harmony* or simply *Harmony, False or superficial suture, Sutura osseum spuria, Compagines osseum per lineam simplicem*, an immovable articulation, in which the depressions and eminences, presented by the bony surfaces, are but slightly marked; so that

it might be presumed, that the junction of the bones took place by simple apposition of their surfaces. An instance of harmony occurs in the union of the superior maxillary bones with each other.

HARMUS, Articulation, Harmony.

HARROGATE, MINERAL WATERS OF.

The villages of High and Low Harrogate are situate in the centre of the county of York, near Knaresborough, twenty miles from York, and fifteen from Leeds. Here are several valuable sulphureous and chalybeate springs. The *sulphureous springs* contain chloride of sodium, chloride of calcium, chloride of magnesium, bicarbonate of soda, sulphohydric acid, carbonic acid, carburetted hydrogen, and azote. The *chalybeate springs* contain protoxide of iron, chloride of sodium, sulphate of soda, chloride of calcium, chloride of magnesium, carbonic acid, azote, and oxygen. For the former Harrogate is celebrated and frequented.

HARROGATE SALTS, ARTIFICIAL, are much employed, and not unrequently by those who drink the genuine water for the purpose of increasing its aperient power. They may be made as follows:—*Sulph. Potass. cum Sulph.* ℥vj; *Potass. bitart.* ℥j; *Magnes. Sulph.* in pulv. ℥vj. M. The usual dose is a tea-spoonful in a small tumblerful of tepid water early in the morning.

HARROGATE WATER, ARTIFICIAL, may be formed of *common salt* ℥v, *water Oij*, impregnated with the gas from *sulphuret of potass*, and *sulphuric acid* ℥℥ ℥iv. The following form has also been recently recommended. *Sulphat. Potass. cum sulph.* (Ph. Ed.) ℥j; *Potass. bitart.* ℥ss; *Magnes. sulphat.* ℥vj; *Aqua destillat.* Oij. One half to be taken for a dose.

HARTFELL, MINERAL WATERS OF.

Hartfell Spa is about five miles from Moffat, in Scotland. The water is a chalybeate, and is much used.

HARTSHORN, *Cervus*, *Cornu cervi*, *Liquor cornu cervi*—h. Red, *Spiritus lavandulæ compositus*—h. and Oil, *Linimentum ammoniæ carbonatæ*.

HARTS' TONGUE, *Asplenium scolopendrium*.

HARTWORT OF MARSEILLES, *Seseli tortuosum*.

HASTA, *Penis*—h. *Nuptialis*, *Penis*—h. *Virilis*, *Penis*.

HASTELLA, Splint.

HASTINGS, CLIMATE OF. This place has the reputation of being one of the mildest and most sheltered winter residences on the south coast of England. Owing to its low situation, and the height of the neighbouring cliffs, it is protected in a great degree from all northerly winds; and hence is found a favourable residence generally for invalids labouring under diseases of the chest.

HASTULA REGIS, *Asphodelus ramosus*.

HATFIELD'S TINCTURE, see *Tinctura Guaiaci ammoniata*.

HAUNCH, *Coxa*, *Coxen'dix*, of the Latins; *αχχον*, or *ισχιον*, of the Greeks, *Ancha*, *Ischion*, *Hip*, *Cossa*, (F.) *Hanche*. The region of the trunk which is formed by the lateral parts of the pelvis and the hip joint, including the soft parts. In women, on account of the greater width of the pelvis, the haunches are more marked and prominent than in men.

HAUSTUS, *Potio*, *Potiu'cula*. A Draught. A liquid medicine, which can be taken at a draught.

HAUSTUS NIGER, see *Infusum sennæ compositum*.

HAUT MAL, Epilepsy.

HAVANNAH, CLIMATE OF. The climate of Cuba is often selected for the phthisical invalid during the winter months, and so far as regards elevation and comparative equality of temperature, it is more favourable for those of weak lungs than that of the United States. The mean annual temperature is high (78°,) but the difference between the mean temperature of the warmest and coldest months is twice as great as at Madeira.

HAWKNUT, *Bunium bulbocastanum*.

HAWTHORN, WHITE, *Mespilus oxyacantha*.

HAY, CAMEL'S, *Juncus odoratus*.

HAY ASTHMA, Fever, Hay.

HAYRIFF, *Galium aparine*.

HAZEL, BEAKED, *Corylus rostrata*—h. Crotches, *Lichen pulmonarius*—h. Nut, snapping, *Hamamelis Virginiana*—h. Nut tree, *Corylus avellana*—h. Witch, *Hamamelis Virginiana*.

HEAD, *Sax.* *heafob*, *heaf*, *heaved*; the past participle of *heafan*, 'to heave up.' *Caput*, *Cephale*, *κεφαλη*, *Cy'bè*, *κεψη*, (F.) *Tête*. The head forms the upper extremity of the body, and tops the skeleton. It consists of the cranium and face. The first, which comprises all the superior and posterior part, has the encephalon in its cavity: the latter forms only the anterior part, and serves as the receptacle for the greater part of the organs of the senses.

HEAD, WATER IN THE, *Hydrocephalus*.

HEAD ACHE, *Cephalæa*, *Cephalalgia*—h. Ache, intermittent, *Cephalalgia periodica*—h. Ache, sick, *Cephalæa spasmodica*.

HEADY, same etymon. (F.) *Capiteux*. That which inebriates readily. An epithet, applied to wines, which possess this quality.

HEAL-ALL, *Collinsonia Canadensis*, *Prunella vulgaris*.

HEALING, Curative—h. Art, Medicine.

HEALTH, Sanitas.

HEALTHY, Salutory.

HEARING, HARDNESS OF, Deafness—h. Perverse, *Paracusis perversa*.

HEART, *Sax.* *heort*, *Germ.* *Herz*, *Cor*, *Cœur*, *Cor*, *Car'dia*, *καρδιον*, *καρδια*, (F.) *Cœur*. An azygous muscle, of an irregularly pyramidal shape; situate obliquely and a little to the left side, in the chest;—resting on the diaphragm by one of its surfaces:—suspended by its base from the great vessels; free and movable in the rest of its extent, and surrounded by the pericardium. The right side of the body of the heart is thin and sharp, and is called *Margo acutus*: the left side is thick and round, and termed *Margo obtusus*. It is hollow within, and contains four cavities; two of which, with thinner and less fleshy walls, receive the blood from the lungs and the rest of the body, and pour it into two others, with thick and very fleshy parietes, which send it to the lungs and to every part of the body. Of these cavities, the former are called *auricles*, the latter *ventricles*. The right auricle and right ventricle form the *Pulmonic* or *right* or *anterior heart*, (F.) *Cœur du poulmon*, *C. du sang noir*, *C.*

*droit, C. antérieur*: and the left auricle and ventricle the *systemic, corporeal, left, or aortic heart, (F.) Cœur du corps, C. gauche, C. aortique* ou *C. rouge*. In the adult, these are totally distinct from each other, being separated by a partition;—the *septum cordis*. Into the right auricle, the *venæ cavæ*,—superior and inferior,—and the coronary vein, open. The pulmonary artery arises from the right ventricle; the four pulmonary veins open into the left auricle, and the aorta arises from the left ventricle.

The mean weight of the heart, in the adult, from the twenty-fifth to the sixtieth year, is, according to Bouillaud, from eight to nine ounces. The dimensions, according to Lobstein and Bouillaud, are as follows:—Length, from base to apex, five inches six lines; breadth, at the base, three inches; thickness of the walls of the left ventricle, seven lines; at a finger's breadth above the apex, four lines; thickness of the walls of the right ventricle, two and a quarter lines; at the apex, half a line; thickness of right auricle one line; of the left auricle, half a line. The heart is covered, externally, by a very thin, membranous reflection from the pericardium. The muscular structure of which it is constituted is much thicker in the parietes of the ventricle than in that of the auricles. Its cavities are lined by a very delicate membrane, the *endocardium*, which is continuous with the inner membrane of the arteries, as regards the left cavities, and with that of the veins, as regards the right. Its arteries—the *coronary*—arise from the commencement of the aorta. Its nerves proceed, chiefly, from the pneumogastric and the cervical ganglions of the great sympathetic. The heart is the great agent in the circulation. By its contraction, the blood is sent over every part of the body. Its action does not seem to be *directly* owing to nervous influence, received from the brain or spinal marrow, or from both. The circulation may, indeed, be kept up, for some time, if both brain and spinal marrow be destroyed.

When the ear is applied to the chest, a dull, lengthened sound is heard, which is synchronous with the arterial pulse. This is instantly succeeded by a sharp, quick sound, like that of the valve of a bellows or the lapping of a dog, and this is followed by a period of repose. The first sound appears to be mainly produced by the contraction of the ventricles; the second by the reflux of the blood against the semilunar valves. These are what are called the *Sounds of the Heart*. Dr. C. J. B. Williams thinks that the word *tubb-dup*, conveys a notion of the two sounds. *The Beating or Impulse of the heart*, against the parietes of the chest is mainly caused, perhaps, by the systole of the heart, which tends to project it forwards. It is doubted, however, by some, whether the impulsion be produced by the dilatation or the contraction of the ventricles.

The heart is subject to different organic diseases; the chief of which are *aneurism, contraction of the apertures, and rupture of its parietes*.

**HEART, ATROPHY OF THE, *Atroph'ia* seu *Aridur'ia Cordis, Phthisis Cordis, Cardi'atroph'ia, Acardi'atroph'ia*.** A condition of the organ in which there is diminution in the thickness of the parietes of the whole organ.

**HEART, DILATATION OF THE, see Aneurism.**—*h.* Displacement of the, *Ectopia Cordis*—*h.* Fatty, *Steatosis cordis*.

**HEART, HYPERTROPHY OF THE, *Hypertroph'ia Cordis, Hypercor'dia, Hypersarcosis Cordis, Hypercardi'atroph'ia, Cor bovinum, (F.) Hypertrophie du Cœur*.** Supernutrition of the muscular parietes of the heart, which are thicker than usual; the cavities being generally diminished. The *physical signs* which indicate it are the following. In cases of long standing, the præcordial region is generally prominent; the pulsations of the heart are visible over a greater extent than natural; and a marked vibration is communicated to the hand when placed on the cardiac region. The dull sound on percussion is more extensive than natural; and on auscultation there is a permanent increase of the force and extent of the heart's action; there is no increase, however, of frequency, and the rhythm is regular. The pulse is generally strong, full, and hard.

**HEART, HYPERTROPHY WITH DILATATION OF THE, *Actus aneurism, Eccentric hypertrophy*.** In this affection, the pulsations can be seen and felt over a larger space, and the apex is more to the left and lower down than natural. The impulse is less steady, but at times more violent than what accompanies simple hypertrophy. Percussion gives more distinct evidence of the enlargement, the sound being more extensively dull. On auscultation, the impulse is often violent, but irregular: in extreme cases it produces the sensation of a large mass of flesh rolling or revolving beneath the ear. The pulse is strong, full and vibratory. The shock of the heart's action is often transmitted to the whole person, and to the bed on which the patient is lying.

**HEART, CONCENTRIC HYPERTROPHY OF THE, *Cardiacitis*,** is when the parietes augment at the expense of the cavities.

**HEART, NEURALGIA OF THE, *Angina Pectoris***—*h.* Rupture of the, *Cardiorrhæxis*—*h.* Sounds of the, see *Heart*.

**HEART'S EASE, *Viola tricolor*.**

**HEARTS, LYMPH, *Lymphatic hearts***—*h.* Lymphatic, *Lymphatic hearts*.

**HEARTBURN, *Ardor ventriculi, Cardialgia*.**

**HEARTWORT, *Laserpitium album*.**

**HEAT, past participle of *Sax. hætan, 'to make warm.' Calor, Therma, Segun. (F.) Chaleur*.** The material cause, which produces the sensation—or the particular sensation itself—produced by a body of an elevated temperature, on our organs, especially on the organs of touch. Modern chymists have given the name *Caloric* to the principle, whatever may be its nature, which is the cause of heat. When we touch a body of a temperature superior to our own, a portion of caloric passes from the body to the hand, and produces the sensation of *heat*. If, on the contrary, we touch a body of a temperature inferior to our own, we communicate a portion of our caloric to it, and experience the sensation of *cold*. Our own sensations are but imperfect indexes of temperature. Two men meeting at the middle of a mountain,—the one ascending, the other descending,—will experience different sensations. The one ascending, passes from a warmer to a colder atmosphere;—the one descending from a colder to a warmer. The chief instrument for mea-

asuring heat, used in medicine, is the thermome-  
 ter. Of this there are three kinds,—that of  
 Fahrenheit, that of Réaumur, and that of Cel-  
 sius or the *Centigrade*. The following Table  
 exhibits the correspondence of these different  
 thermometric scales.

Fah.	Ré o.	Centig.	Fah.	Réau	Centig.	Fah.	Réau.	Centig.	Fah.	Réau.	Centig.
912a	80.00	100.00	149	51.55	64.44	85	93.55	92.44	92	- 4.44	- 5.55

- a Water boils (Barom. 30 inches.)
- b Heat of a stove, borne by Dr. So-lander.
- c Heat of a stove, borne for 10 minutes by Sir Joseph Banks and Dr. Solander.
- d Water simmers.
- e Alcohol boils.
- f Very pure ether distils.
- g Rees' wax melts.
- h Spermaceti melts.
- i Temperature at which liquids are often drunk.
- j Heat observed in Scarlatina.
- k Temperature of the common hen.
- l Temperature of arterial blood.[?]
- m Temperature of venous blood.
- n Phosphorus melts.
- o Ether boils.
- p Nitric ether boils.
- q Muriatic ether boils.
- r Medium temperature of the globe.
- s Ice melts.
- t Milk freezes.
- u Vinegar freezes.
- v Strong wine freezes.
- w A mixture of one part of alcohol and three of water freezes.
- x Cold at the battle of Eylau, 1807.
- y A mixture of equal parts of alcohol and water freezes.
- z A mixture of two parts of alcohol and one of water freezes.
- aa Melting point of quicksilver.

The human body can bear a high degree of heat diffused in the atmosphere. There are cases on record, where air of 400° and upwards, of Fahrenheit's scale, has been breathed with impunity for a short time. It can likewise withstand very severe cold. In the expedition of Capt. Back to the Arctic regions, the thermometer was as low as -70° of Fahr. Excessive heat disposes the body to gastric and intestinal diseases, and particularly to inflammation and enlargement of the liver; hence, the frequency of such affections within the torrid zone. Heat is often used therapeutically: the actual cautery, at a white heat, disorganizes the

parts to which it is applied: a lesser degree occasions violent inflammation. Heat higher than that of the human body is exciting; of a lower degree, sedative. Excessive cold acts as a powerful sedative—inducing sleep, the tendency to which, after long exposure, becomes irresistible. See Cold. Many of the topical applications—as cataplasms—act wholly by virtue of their warmth and moisture.

HEAT, INTER'NAL, (F.) *Chaleur interne*, is a sensation of heat felt by the patient, but not sensible to the touch. *External heat*, (F.) *Chaleur extérieure*, that which can be felt by others. Heat, *Ardor*, is called *moist*, (F.) *haliteuse*, when accompanied with moisture, like that felt after bathing; *dry*, (F.) *seche*, when the skin has not its ordinary softness. It is called *acid* and *pungent*, (F.) *âcre et mordicante*, when it conveys a disagreeable tingling to the fingers. The French employ the terms *nervous heat* and *erratic heat*, *Chaleur nerveuse* and *Chaleur erratique* for that which comes by flushes, alternating with chills, and which moves rapidly from one part to another. M. Double has used the term *septic heat*, (F.) *Chaleur septique*, for that which produces a piquant sensation on the hand, similar to that of the acid heat, but milder and more uniform, and which is accompanied with feebleness and frequency of pulse, &c.

HEAT, ACRID, see Acrid—h. Prickly, Lichen tropicus.

HEAT, *Ardor venereus*, (F.) *Chaleur des animaux*, *Rut*, is the periodical sexual desire experienced by animals. It is supposed by many to be owing to the periodical maturation and discharge of ova,—*Ovulation*.

HEATH, COMMON, *Erica vulgaris*.

HEAVINESS, Somnolency.

HEAVY, *Gravis*, (F.) *Gravatif*, from Sax. heafan, 'to heave.' An epithet given to any pain, which consists in a sensation of weight or heaviness, or is accompanied by such sensation.

HEBDOMADARIA, Octana.

HEBE, ἠβη. This word has been employed to designate, 1. The first hair that grows on the pubes, 2. The pubic region, and 3. Puberty.

HEBETES, Adolescens.

HEBETOR, Adolascens.

HEBETUDO ANIMI, Imbecility—h. Dentium, Hæmodia—h. Visus, Amblyopia, Caligo.

HEBREWS, MEDICINE OF THE. Medicine seems to have been at a very low ebb with the ancient Hebrews. Of *anatomy* they knew nothing. Their *physiology* was imperfect and filled with superstitions; and their *therapeutics* unsatisfactory. *Hygiene* appears to have been most attended to. Of the other departments of medicine we cannot judge of their knowledge.

HECATOMPHYLLUM, *Rosa centifolia*.

HECTEUS, ἠκτεος. A Greek measure, containing about 72 chopines or pints.

HECTIC FEVER, *Febbris hectica*, *Hectico-pygra*, *Hectico-pyretos*, *Hectica*, *Amphimer'ina hectica*, *Febbris phthis'ica*, *Syntecopygra*, *Syntectico-pygra*, *Febbris marasmo'des*, *Marasmo-pygra*, *Febbris tab'ida*, *Leucopyria*, *Epanctus hectica*, *Febbris linta*, *F. amphimer'ina hectica*, *Febbris amato'ria*, *Chloro'nis amato'ria*, (F.) *Fibvre Hectique*, *F. Etique*, from ἥετις, 'habit of body;' because in this disease every part of the body is emaciated; or perhaps, from ἠκτεος, 'I consume,' 'I am exhausted.' The name of a slow,

continued, or remittent fever, which generally accompanies the end of organic affections, and has been esteemed idiopathic, although it is probably always symptomatic. It is the fever of irritation and debility; and is characterized by progressive emaciation; frequent pulse; hot skin,—especially of the palms of the hands and soles of the feet; and, towards the end, colliquative sweats and diarrhœa. Being symptomatic, it can only be removed by getting rid of the original affection. This is generally difficult and almost hopeless in the disease, which it most commonly accompanies,—consumption. HECTICA, Hectic Fever—h. Infantilis, Fever, infantile remittent.

HECTICOPYRA, Hectic fever.

HECTICOPYRETOS, Hectic fever.

HECTISIS, (F.) *Étisis*. Same etymon. The state of those who have hectic fever.

HECTOGRAMME, *Hectogram'ma*, from ἑκατο, 'a hundred,' and γραμμα. A measure of 100 grammes, i. e. 3 ounces, 1 drachm, and 44 grains, Troy.

HECTOLITRE. A measure containing 100 litres or 26.42 wine pints.

HECUSIUS, Voluntary.

HEDEOMA, *Hedea'oma pulgoid'es*, *Cuni'la pulgoid'es*, *Malis'sa pulgoid'es*, *Pennyroyal*, *Tickweed*, *Stinking Balm*, *Squawmint*. *Sax. Syst.* Diandria Monogynia; *Nat. Ord.* Labiata.

An indigenous plant, common in all parts of the United States, and which, where it is abundant, perfumes the air for a considerable distance. It is employed in the same cases as the mints and the English pennyroyal. In popular practice it is used as an emmenagogue.

The *Oleum Hedea'mæ* (Ph. U. S.) or *Oil of Pennyroyal* is used as a stimulating carminative, dropped on sugar. Dose, ʒ to 6 drops.

HEDERA ARBorea, H. Helix.

HEDERA HELIX, *Hed'era arbo'ra*, *Bac'hica*, *Cissos*, ἡσσος, *Cittos*, κίττος, *Ed'era*, *Corymbo'tra*, *Corym'bos*, *Ivy*, (F.) *Lierre*. The taste of *ivy leaves* is bitter, styptic, and nauseous. They are not used in medicine. According to Haller, they were recommended in Germany against the atrophy of children; and the common people of England sometimes apply them to running sores and to keep issues open. The *berries* were supposed, by the ancients, to have an emetic and purgative quality; and a watery extract was made from them, called by Quercetanus *Extractum purgans*. From the stalk of the tree a resinous juice exudes in warm climates, called *Gummi Hed'erae*, (F.) *Gomme de lierre*, *Rosine de lierre*. It is possessed of tonic and astringent properties, but is not used.

HEDERA TERRESTRIS, *Glecoma hederacea*.

HEDERULA, *Glecoma hederacea*.

HEDISARUM ALKAGI, Agul.

HEDRA, ἠδρα, ἠδρη, 'a vestige.' A fracture of the bones of the cranium, in which the trace of the fracturing instrument is still perceptible. It was, also, used, by the ancients, for the anus, for excrement, and for the bottom of an abscess.

HEDROCELE, Proctocele.

HEDYCHROUM, from ἠδυς, 'sweet,' and χροῦς, 'colour.' A remedy of a pleasant colour. Applied to certain trochs, the chief constituent of which was Theriac.

HEDYPHONIA, from ἠδύς, 'sweet,' and φωνή, 'voice.' Sweetness of voice.

**HEDYPNEUSTUS**, *Hedypnotus*, from ἡδυ, 'sweet,' and πνεω, 'I breathe.' Breathing sweetly or softly. Smelling sweetly.

**HEDYSMA**, Condiment.

**HEEL**, see Calcaneum.

**HELICENTERITIS**, Dothinerenteritis.

**HELCODES**, Ulcerous.

**HELCOLOGY**, *Helcologia*; from ἑλκος, 'ulcer,' and λογος, 'discourse.' The doctrine of, or a treatise on, ulcers.

**HELCOMA**, Ulcer.

**HELCOPTHALMIA**, *Ophthalmia ulcero-sa*. Ophthalmia with ulceration.

**HEL'COS**, from ἑλκος, 'an ulcer.' Hence:

**HELCOISIS**, *Elcosis*. Ulceration—h. Cerebri, Encephalopyosis—h. Laryngis, Phthisis laryngea—h. Pulmonalis, Phthisis pulmonalis—h. Renalis, Nephrelocosis—h. Uteri, see Metrophthisis—h. Vesicæ, Cystophthisis.

**HELCOSTAPHYLOMA**; from ἑλκος, 'ulcer,' and σταφυλίωμα, 'staphylo-ma.' Staphylo-ma ending in ulceration.

**HELCOXEROSIS**, from ἑλκος, 'ulcer,' and ξηρωσις, 'dryness.' The drying of an ulcer.

**HELCTICA**, Epispastica.

**HELCUS**, Ulcer.

**HELICYD'RION**, *Helcyd'rium*, ἑλκυδριον, *Ulcus oculum*, a small ulcer, a superficial ulceration of the cornea—Galen, Paulus, Foësius.

**HEL CYSTER**, from ἑλκω, 'I draw.' An iron hook or crotchet for extracting the fœtus. See Crotchet.

**HELENIUM**, *Inula helenium*.

**HELENIUM AUTUMNA'LE**, *Falso Sunflower*, *Sneezewort*, *Sneezeweed*, *Swamp Sunflower*, *Yellow star*, *Ox-eye*. An indigenous herb, with large golden-yellow compound flowers, which appear in August. All its parts are bitter and somewhat acrid, and when snuffed up the nostrils in powder are powerful sternutories.

**HELIANTHEMUM CANADENSE**, *Cistus Canadensis*, *Frostwort*, *Frostweed*, *Rock-rose*. An herbaceous plant having large yellow flowers, which grows in all parts of the United States, and flowers, in the Middle States, in June. It has an astringent, slightly aromatic and bitterish taste. It has been prescribed in scrofula, but probably is nothing more than an aromatic tonic.

**HELIASIS**, Astrabolistmus, Insolation.

**HELICIA**, Age.

**HELICINE**, *Helicinus*, *Helicoides*, *Helicoides*, from *Helix*, 'the tendril of the vine.' Resembling the tendril of the vine.

**HELICINE ARTERIES** of the penis, as described by J. Müller, are short vessels given off from the larger branches, as well as from the finest twigs of the artery of the organ: most of those come off at a right angle, and project into the cavity of the spongy substance, either terminating abruptly or swelling out into a club-like process without again subdividing. Almost all these vessels are bent like a horn, so that the end describes half a circle or somewhat more. They have a great resemblance to the tendrils of the vine, whence their name. A minute examination of them, either with the lens or the microscope, shows that, although they at all times project into the venous cavities of the corpora cavernosa, they are not entirely naked, but are covered with a delicate membrane, which, under the microscope, appears granular.

**HELICIS MAJOR**. A muscle of the ear, which originates from the anterior, acute part of the helix, upon which it ascends and is inserted into the helix. It pulls the part into which it is inserted a little downwards and forwards.

**HELICIS MINOR**. This muscle originates from the under and fore part of the helix, and is inserted into the helix, near the fissure in the cartilage, opposite the concha. Its use is to contract the fissure.

**HELICOIDES**, Helicine.

**HELICOTRE'MA**, from ἑλιξ, 'helix, cochlea,' and τρημα, 'a foramen.' The hole by which the two scales of the cochlea communicate at the apex.

**HELIGMUS**, Convolution.

**HELIKIA**, Age.

**HELIOSIS**, Astrabolistmus, Insolation.

**HELIIOTROPE**, *Heliotropium Europæum*.

**HELIIOTROPION**, *Cichorium intybus*.

**HELIIOTROPIUM EUROPEUM**, *Verrucaria*. The *Heliotrop*, (F.) *Tournesol*, *Herbe aux versives*. This plant is considered to possess aperient properties; and to be capable of destroying cutaneous excrescences; hence one of its names.

**HELIX**, *Capreolus*, from ἑλιξ, 'to envelop,' 'surround.' The fold is thus called, which forms the outer circumference or ring of the external ear.

**HELIX**, *Limax*.

**HELIX POMATIA**. A large kind of snail, transported from the south of Europe to England by Sir Kenelm Digby, for his lady when in a decline. It was considered highly restorative.

**HELLEBORASTER**, *Helleborus fœtidus*.

**HELLEBORE**, *Dracontium fœtidum*—h. American, *Veratrum viride*—h. Black, *Helleborus niger*—h. *Blanc*, *Veratrum album*—h. *Noir*, *Helleborus niger*—h. Stinking, *Helleborus fœtidus*—h. Swamp, *Veratrum viride*—h. White, *Veratrum album*.

**HELLEBORISMUS**, *Elleborismus*. The method of treating disease, amongst the ancients, by hellebore. This comprised not only the choice, preparation, and administration of the medicine, but, likewise, the knowledge and employment of preliminary precautions and remedies proper for aiding its action, and preventing the pernicious effects which it might occasion.

**HELLEBORUS**, *H. niger*—h. *Albus*, *Veratrum album*—h. *Trifolius*, *Coptis*.

**HELLEBORUS FÆTIDUS**, *Helleboraster*, *Elleboraster*, *Stinking Hel'labors* or *Bear's foot*, *Setterwort*, (F.) *Halléboro* ou *Elléboro fétide*, *Pied de Griffon*. The leaves of this plant are said to be anthelmintic. The smell of the fresh plant is extremely fetid, and the taste bitter and acrid. It usually acts as a cathartic.

**HELLEBORUS NIGER**, *Melampodium*, *Melanorrhizum*, *Ectomon*, *Black Hel'labors*, *Christmas Rose*, (F.) *Halléboro noir*. The root of this European plant—*Helleborus*, (Ph. U.S.)—has a disagreeable odour, and bitter, acrid taste. It is possessed of cathartic properties, and has been recommended as an emmenagogue. It has been given in mania, melancholia, dropsy, suppressed menses, &c. Dose, gr. x. to ʒj, as a cathartic.

**HELLECEBRA**, *Sedum*.

**HELMET-FLOWER, YELLOW**, *Aconitum Anthora*.

**HELMET POD**, *Jeffersonia Bartoni*.  
**HELMINS**, Plur. *Helminthes* seu *Elminthes*, from 'ἕλμις, 'a worm.' A worm; an entozoon:—hence:  
**HELMINTHAGOGUE**, Anthelmintic.  
**HELMINTHI**, Worms.  
**HELMINTHIA**, Helminthiasis — h. Alvi, Worms.  
**HELMINTHIA ERRATICA**, Worms, introduced by accident and without finding a proper habitation in the stomach or intestines; producing spasmodic colic, with severe tormina, and occasionally vomiting or dejections of blood; the 12th genus of the order *Euterica*, class *Caliaca*, of Good.  
**HELMINTHIA PODICIS**, Worms.  
**HELMINTHIASIS**, from 'ἕλμις, 'a worm.' A generic name for the condition which gives occasion to the presence of intestinal worms. It is, also, called *Helminthia*, *Verminatio*, *Morbus verminosus*, *Status verminosus*, *Saburra verminosae*, *Scoleciasis*, *Scoleciasis*, *Entozogoniasis*, *Parasitismus intestinalis*, *Worm disease*, *Inverminatio*. See Worms.  
**HELMINTHIC**, Anthelmintic.  
**HELMINTHOCHORTUM**, *Corallina Corsicana*.  
**HELMINTHOCOLICA**, *Colica verminosa*.  
**HELMINTHOCORTON**, *Corallina Corsicana*.  
**HELMINTHOL'OGY**, *Helminthologia*, from 'ἕλμις, 'a worm,' and *λογος*, 'a description.' A treatise on worms.  
**HELMINTHOPYRA**, *Helminthopyretos*, *Febri verminosae*, from 'ἕλμις, 'a worm,' and πυρ, 'a fever.' Fever occasioned by worms. See Fever, verminous.  
**HELMINTHOPYRETOS**, *Helminthopyra*.  
**HELMINTHUS GORDII**, *Seta equina*.  
**HELODES**, *Elodes*.  
**HELONIAS OFFICINALIS**, see *Veratrina*.  
**HELOPYRA**, *Elodes* (febris).  
**HELOPYRETUS**, *Elodes* (febris).  
**HELOS**, *Clavus*, Marsh.  
**HELO'SIS**, *Helo'sis*: from ἑλσ, 'I turn.' Eversion of the eyelids, and convulsions of the muscles of the eyes. *Plica Polonica*. *Strabismus*.  
**HELOTIS**, *Helosis*, *Plica*.  
**HELUS**, *Clavus*, *Helos*.  
**HELXINE**, *Parietaria*.  
**HEMACHROIN**, *Hæmatin*.  
**HÉMAPÉRTONIRRHAGIE**, *Hæmoperitonorrhagia*; from αἷμα, 'blood,' *peritonæum*, and ἠρῶνυμι, 'I break forth.' Hemorrhage into the peritoneum.  
**HÉMAPROCTIE**, *Hæmorrhoids*.  
**HÉMASTATIQUES**, *Hæmatostatica*.  
**HÉMATIDROSE**, *Sudor cruentus*.  
**HÉMATIN**, *Hæmatin*.  
**HÉMATO-ENCEPHALIE**, *Apoplexy*.  
**HÉMATOID**, *Hæmatodes*.  
**HÉMATOLOGIE**, *Hæmatology*.  
**HÉMATOLOGY**, *Hæmatology*.  
**HÉMATOMYÉLIE**, *Hémorrhagie de la Moëlle épinière*.  
**HÉMATONCIE**, *Hæmatoncus*, see *Hæmatodes fungus*—h. *Fongoids*, *Hæmatodes fungus*.  
**HÉMATOPISIE**, *Hæmatops*.  
**HÉMATORRHACHIS**, *Apoplexia myelifica*.  
**HÉMATOSIN**, *Hæmatin*.  
**HEMERA**, ἡμερα, 'a day.' *Dies*. Hence:

**HEMERALOPIA**, see *Nyctalopia*.  
**HEMERALOPIA**, from ἡμερα, 'the day,' and οπτομαι, 'I see.' *Hæmeralops*, *Dysopia tenebrarum*, *Caligo tenebrarum*, *Paropsis Noctifuga*, *Visus diurnus*, *Nyctalopia*, (of some), *Nyctophlosia*, *Amblyopia crepuscularis*, *Cæcitas crepuscularis* seu *nocturna*, *Diæsi diurna*, *Day-sight*, *Day-vision*, *Hen blindness*, *Night blindness*, (F.) *Vus diurne*, *Aveuglement de Nuit*. A disease in which the eyes enjoy the faculty of seeing, whilst the sun is above the horizon; but are incapable of seeing by the aid of artificial light. Its causes are not evident. The eye, when carefully examined, presents no alteration, either in its membranes or humours.  
**HEMERALOPS**, *Dorcas* One labouring under hemeralopia. Also, *Hemeralopia*.  
**HEMERATYPHLOSIS**, *Nyctalopia*.  
**HEMERODROMA**, (febris) *Ephemera*.  
**HEMEROPATHIA**; from ἡμερα, 'a day,' and πάθος, 'an affection.' A disease, which continues only a day; or, which is only observed during the day.  
**HEMI**, ἡμι, ἡμισυς, 'half,' 'semi.' Hence:  
**HEMIAMAUROSIS**, *Hemiopia*.  
**HEMIANDRUS**, *Eunuch*.  
**HEMIANOR**, *Eunuch*.  
**HEMIANTHROPIA**, *Mania*.  
**HEMIANTHROPUS**, *Eunuch*, *Maniac*.  
**HEMIAZYGA**, (*Vena*) See *Azygos vein*.  
**HEMICEPHALÆA**, *Hemicrania*.  
**HEMICEPHALÆUM**, *Sinciput*.  
**HEMICEPHALIUM**, *Sinciput*.  
**HEMICEPHALUM**, *Sinciput*.  
**HEMICEPHALUS**, *Semicephalus*, from ἡμι, 'half,' and κεφαλή, 'head.' One who has half a head.  
**HEMICRANIA**, *Hemicephala*, *Migræna*, *Grana*, *Hemiparagia*, *Hemiparagia*, *Heterocrænia*, *Monoparagia*, *Monoparagia*, *Cephalæa Hemicrænia*, *Hemiparathia*, *Migræm*, from ἡμισυς, 'half,' and κρανιον, 'cranium.' (F.) *Migræna*. Pain, confined to one half the head. It is almost always of an intermittent character;—at times, continuing only as long as the sun is above the horizon; and hence sometimes called *Sun-pain*,—and is cured by cinchona, arsenic, and the remedies adapted for intermittents.  
**HEMICRANIA IDIOPATHICA**, *Neuralgia*, *facial*.  
**HEMIDESMUS INDICUS**, *Periploca Indica*, *Asclepias Pseudosarsa*, *Indian Sarsaparilla*. A Hindusthane plant, the root of which has a peculiar aromatic odour, and a bitterish taste. It is used in India as a substitute for sarsaparilla.  
**HEMIDIAPHORESIS**, *Transpiratio Unilateralis*; from ἡμι, 'half,' and διασπρωσις, 'perspiration.' Perspiration of one half the body.  
**HEMIECTON**, *Hemiection*, *Semisectum*. A vessel capable of containing 36 chopines or pints, and in which fumigations were made in diseases of the uterus and vagina.—Hippocr.  
**HEMIM'ELLES**, from ἡμισυς, 'one-half,' and μελος, 'a limb.' A genus of monsters in which the upper or lower extremities are very defective—mere stumps, and the fingers and toes are entirely wanting or very imperfect.—G. St. Hilaire.  
**HEMIM'ERION**, from ἡμισυς, and μοιρα, 'a part.' 'One half.'—Poësius. Also, half a drachm.—Erolian.  
**HEMINA**. A Greek measure, answering to

the *Cotyle*, *κοτυλη*, i. e. one half the sextarius, or about half a pint, English.

**HEMIOBOLION**, *Hemiobolion*. Half the obolus. A weight of about five grains.—Goræus.

**HEMIO'LION**. A weight of 12 drachms, or oz. 1½.—Galen. See *Sesuncia*.

**HEMIOPIA**, *Hemiopis*, *Hemiopiasis*, *Suf-fusio dimidia*, *Visus dimidia*, *Marmor-ypgê Hippocratis*, *Hemiamaurosis*, *Amauros*, *dimidia*, from *ἡμιονος*, 'one half,' and *οπτιμας*, 'I see.' Depraved vision, in which the person sees only one half of an object.

**HEMIOPIASIS**, *Hemiopia*.

**HEMIOPSIS**, *Hemiopia*.

**HEMIPA'GES**, *Dicaor'ypus dikypogastrius*, *Ot'opus synaphoccephalus*, from *ἡμι*, 'half,' and *πηγνυμι*, 'I fasten.' A monstrosity, in which twins are united from the navel to the vertex.—I. G. Saint Hilaire.

**HEMIPAGIA**, *Hemicrania*.

**HEMIPATHIA**, *Hemicrania*.

**HEMIPEGIA**, *Hemicrania*.

**HEMIPHONIA**, from *ἡμι*, 'half,' and *φωνη*, 'voice.' Great weakness of voice.

**HEMIPLE'GIA**, *Hemiplegia*, *Paralysis Hemiplegia*, *Semiplegia*, *Semi-sideratio*, from *ἡμιονος*, 'one half,' and *πλεσσω*, or *πλεσσω*, 'I strike.' Paralysis of one side of the body. See *Paralysis*. One, so palsied, is said to be *hemipleg'ic*, *semi-sideratus*.

**HEMIPLEGIA FACIALIS**, *Paralysis*, *Bell's*.

**HEMIPLEXIA**, *Hemiplegia*.

**HEMIPROSOPLEGIA**, *Paralysis*, *Bell's*.

**HEMISPHERÆ CEREBRI**, *Hemispheres* of the brain.

**HEMISPHERE**, *Hemisphæra*, *Hemisphærium*, from *ἡμιονος*, 'one half,' and *σφαίρα*, 'a sphere.' One half of a sphere or of a body having a spheroidal shape. The *hemispheres* of the brain, *Hemisphæra cerebri*, are the upper spheroidal portions of the brain, separated from each other by the falx cerebri.

**HÉMITE**, *Hæmitis*.

**HEMITRITÆA**, (*FEBRIS*), *F. Semi-tertia*, *Febbris sesquialtera*, (*F.*) *Semi-tierce*, *Febvre demitierce*. A semi-tertian fever, so called because it seems to possess both the characters of the tertian and quotidian intermittent.—Galen, *Spigelius*.

**HEMIUN'CIA**, *Hemiuncion*.

**HEMIUN'CION**, *Hemius'cia*, *Semun'cia*, *Semunc'cia*. Half an ounce.

**HEMLOCK**, *Conium maculatum*—h. American, *Cicuta maculata*—h. Bastard, *Chærophyllum sylvestre*—h. Common, *Conium maculatum*—h. Dropwort, *Enanthe*—h. Gum, see *Pinus Canadensis*—h. Pitch, see *Pinus Canadensis*—h. Spruce, *Pinus Canadensis*—h. Water, American, *Cicuta maculata*—h. Water, fine-leaved, *Phellandrium aquaticum*—h. Water, *Cicuta aquatica*—h. Wild, *Cicuta maculata*.

**HÉMOCARDIOPLASTIES**, see *Polypus*.

**HEMODIA**, *Hæmodia*.

**HÉMO-ENCEPHALORRHAGIE**, *Apoplexy*.

**HÉMOHÉPATORRHAGIE**, *Hepatorrhagia*.

**HÉMOMYÉLORRHAGIE**, *Apoplexy*, *spinal*.

**HÉMOPTYSIE**, *Hæmoptysis*—h. *Foudroyante*, see *Hæmoptysis*.

**HEMORRHAGE**, *Hæmorrhagia*—h. From

the bladder, *Cystirrhagia*—h. From the intestines, *Melena*—h. *Interstitiale*, *Apoplexy*—h. From the pituitary membrane, *Epistaxis*—h. From the skin, *Sudor cruentus*—h. *Spinal*, *Apoplexy spinal*—h. *Uterine*, *Metrorrhagia*.

**HEMORRHAGIC PLEURISY**, *Hæmatothorax*.

**HÉMORRHAGIE BUCCALE**, *Stomatorrhagia*—h. *Cérébrale*, *Apoplexy*—h. *du Foie*, *Hepatorrhagia*—h. *Interstitielle*, *Apoplexy*—h. *Interstitielle du Poumon*, *Hæmoptysis*—h. *des Intestins*, *Hæmatochezia*—h. *de la Matrice*, *Metrorrhagia*—h. *Meningée*, *Apoplexy*, *meningeal*—h. *de la Moëlle épinière*, *Apoplexia myelastica*—h. *Nasale*, *Epistaxis*—h. *de la Vessie*, *Cystirrhagia*.

**HEMORRHAGIP'AROUS**, *Hæmorrhagiparus*; from *hæmorrhagia*, 'hemorrhage,' and *parire*, 'to bring forth.' That which gives occasion to hemorrhage: thus, softening of the neurine may be *hæmorrhagiparous*.

**HÉMORRHINIE**, *Epistaxis*.

**HÉMORRHÔIDAIRE**, (*F.*) One who is subject to hemorrhoids.

**HÉMORRHÔIDES**, *Hæmorrhoids*—h. *Arteriales*, *Cæcæ hæmorrhoides*.

**HÉMORRHOSCOPIE**, *Hæmatoscopia*.

**HÉMOSPASIE**, *Hæmospasia*.

**HÉMOSPASIQUE**, *Hæmospastic*.

**HÉMOSTASIE**, *Hæmostasia*.

**HÉMOSTATIQUES**, *Hæmostatica*.

**HEMP, INDIAN**, *Apocynum cannabinum*, *Bangue*.

**HEMPSEED**, see *Cannabis sativa*.

**HENBANE**, *Hyoscyamus*.

**HEN-BLINDNESS**, *Hemeralopia*.

**HENNÉ**, *Lawsonia inermis*.

**HENRICEA PHARMACEARCHA**, *Gentiana chirayita*.

**HENRICUS RUBENS**, *Colcothar*.

**HEPAR**, *ἥπαρ*, 'genitive,' *ἥπατος*, 'liver.' A name for substances resembling liver in appearance. The ancient name for the *liver of sulphur*, *Hepar sulphuris*; which is sometimes a compound of sulphur and potassium; at others, of sulphur and potassa. See *Potassa sulphuretum*.

**HEPAR ADULTERINUM**, *Spleen*.

**HEPAR ANTIMONIA'TUM** is a compound of a sulphuret of antimony and an alkali. See *Oxydum stibii sulphuretum*.

**HEPAR MARTIA'LE**. A compound of sulphuret of potass and an oxide of iron.

**HEPAR SANGUINUS**, see *Blood*—h. *Sinistrum*, *Spleen*—h. *Sulphuris salinum*, *Potassa sulphuretum*—h. *Sulphuris volatile*, *Ammonia sulphuretum*—h. *Uterinum*, *Placenta*.

**HEPATAL'GIA**, *Hepatodyn'ia*, *Neural'gia hepatis*, *Col'ica hepatic'a*; from *ἥπαρ*, 'liver,' and *άλγος*, 'pain.' Pain in the liver. *Neuralgia* of the liver. (*F.*) *Néuralgie du Foie*.

**HEPATALGIA CALCULOBA**, *Colica hepatica*—h. *Petitiana*, *Turgescentia vesiculæ felleæ*—h. *Phegmonoides*, *Hepatitis*.

**HEPATAPOSTEMA**, from *ἥπαρ*, 'the liver,' and *ἀποστημα*, 'an abscess.' Abscess of the liver.

**HEPATARIUS**, *Hepaticus*.

**HEPATECHE'MA**, *Son'itus hepatic'us*, from *ἥπαρ*, 'liver,' and *ἤχημα*, 'sound.' Sound rendered by the liver on percussion.

**HEPATEMPHRAX'IS**, from *ἥπαρ*, 'liver,'

and *μπαρσσω*, 'I obstruct.' Hepatic obstruction.—Ploucquet.

HEPATENCEPHALO'MA, *Hepatomyelo'ma*, *Fungus hepatis medullaris*, from *ἥπαρ*, 'liver,' and *εγκεφαλος*, 'encephalon.' Encephaloid of the liver.

HEPATE'RUS, *Hepaticus*, *Jecora'rius*. A variety of diarrhæa, *Fluxus hepaticus*.—Gorr.

HEPATHÆMORRHAG'IA, *Hæmorrhag'ia hepatica*, *Hæmorrhag'ia*, *Apoplez'ia hepatica*, (F.) *Hæmorrhagie du foie*, *Hæmohæpatorrhagie*, from *ἥπαρ*, 'liver,' and *αἱμορραγία*, 'hemorrhage.' Hemorrhage from the liver.

HEPAT'IC, *Hepaticus*, *Hepata'rius*, *Hepate'rus*, *Hepatoides*, *Hepato'des*, *Jecora'rius*, from *ἥπαρ*, 'the liver.' Belonging or relating to or resembling liver.

HEPATIC ARTERY, *Arteria Hepat'ica*, one of the three branches given off by the cæliac. It passes towards the inferior surface of the liver; where it divides into two branches, a *right* and *left*, which proceed towards the corresponding parts of that organ. The right branch gives off the cystic artery. Before dividing, the hepatic artery sends off two considerable branches, the *A. pylorica* and *Gastro-epiploica dextra*.

HEPATIC DUCT, *Ductus hepaticus*, (F.) *Canal hépatique*, is about three fingers' breadth in length, and of the size of a quill. It is formed by the union of the biliary ducts, and joins the cystic duct at a very acute angle, to form the ductus choledochus. Its function is to convey the bile from the liver towards the duodenum.

HEPATIC PLEXUS, *Plexus hepaticus*, consists of nervous filaments, sent by the cæliac plexus to the liver, which accompany the hepatic artery.

HEPATIC VEINS or *Supra-hepatic veins*, *Vena cava hepatica*, (F.) *Veines sus-hépatiques*, *Intra-lobular veins*, do not follow the course of the arteries of the same name. They arise in the substance of the liver; converge towards the posterior margin of that viscus, and open into the vena cava inferior. They convey away the blood carried to the liver by the hepatic artery and vena porta.

HEPAT'ICA. A name formerly given to medicines which were believed capable of removing diseases of the liver.

HEPATICA, *Anemone hepatica*, see *H. triloba*—*h. Americana*, *H. triloba*—*h. Fontana*, *Marchantia polymorpha*—*h. Nobilis*, *Anemone hepatica*—*h. Stellata*, *Asperula odorata*.

HEPATICA TRIL'OBATA, *H. Americana*, *Trifolium aureum*, *Liverwort*, *Liverweed*, *Trefoil*, *Noble Liverwort*, (F.) *Hépatique des jardins*. This plant—*Hepatica* (Ph. U. S.)—is a gentle astringent, but not possessed of much virtue.

HEPATICULA, *Hepatitis*, chronic.

HEPATICUS, *Hepateros*—*h. Flos*, *Anemone hepatica*.

HEPATIFICATIO, *Hepaticization*.

HÉPATIQUE ÉTOILÉE, *Asperula odorata*—*h. des Fontaines*, *Marchantia polymorpha*—*h. des Jardins*, *Hepatica triloba*.

HEPATIRHŒ'A, *Fluxus hepaticus*, *Dysenteria hepatica*, *Diarrhæa hepatica*, *Hæpatorrhæa*, *Hæpatocholorrhæa*, *Hæpatodysentoria*, *Hæpatorrhægia*, *Hæmatæra*, *Aimatæra*, (F.) *Flux hépatique*, from *ἥπαρ*, 'the liver,' and *ρῶ*, 'I flow.' A species of diarrhæa

in which the excreted matters seem to come from the liver, or are much mixed with bile.

HEPATIS EMUNCTORIA, *Inguen*—*h. Suspensorium*, *Ligament*, *suspensory*, of the liver.

HEPATISATIO, *Hepaticization*—*h. Pulmonum*, *Hepaticization of the Lungs*.

HÉPATISATION, *Hepaticization*—*h. Grise*, see *Hepaticization*—*h. Rouge*, see *Hepaticization*.

HEPATITES VENA, *Cava vena*.

HEPATITIS, *Empyema hepaticum*, *Causa hepaticum*, *Inflammatio hepatis*, *I. Jecino'ris*, *Febris hepatica inflammatoria*, *Hepatal'gia phlegmonoi'des*, *Morbus jecino'ris*, *Hepatophlegmonè*, *Inflammation of the liver*, (F.) *Hépatite*, *Inflammation du foie*, *Pâtes* (*Provincial.*) It may be seated either in the peritoneal covering, *Sero-hepaticum*, or in the substance of the liver, or in both, *Puro-hepaticum*, and may be acute or chronic. The peculiar symptoms are;—pain in the right hypochondrium, shooting to the back and right shoulder, and increased on pressure; difficulty of lying on the left side; sometimes jaundice with cough, and synocha. Its termination is generally by resolution: in tropical climates it often runs on to suppuration, *Jecoris vom'ica*, *Hepatitis apostematosa*, the abscess breaking either externally, or forming a communication with the intestines or chest, or breaking into the cavity of the abdomen. The *causæ* are those of inflammation in general. Heat predisposes to it; hence its greater frequency in hot climates. On dissection of those who have died of it, the liver has been found hard and enlarged; colour of a deep purple; or the membranes have been more or less vascular; or adhesions, or tubercles, or hydatids, or abscesses, or biliary calculi may be met with. The treatment must be bold. Bleeding, general and local, fomentations, blisters, purgatives, and the antiphlogistic regimen. In hot climates especially, a new action must be excited by mercury as early as possible.

HEPATITIS APOSTEMATOSA, see *Hepatitis*.

HEPATITIS, CHRONIC, *Hepatitis chronica*, *Inflammatio hepatis lenta*, *Hepatitis occulta*, *Hepatic'ula*, *Subinflammatio hepatis*, (F.) *Chronic'hépatite*, *Chronic liver disease*, is not as common as is believed. It may be suspected from the existence of the symptoms above mentioned, when in a minor degree; enlargement, constant dull pain in the region of the liver; sallow countenance; high-coloured urine; clay-coloured feces, &c. The great object of treatment is to excite a new action by mercury and counter-irritants, and to keep the liver free by cathartics.

HEPATITIS CYSTICA, *Cholecystitis*—*h. Occulta*, *H. chronic*.

HEPATIZATION, *Hepaticatio*, *Hepaticificatio*, from *ἥπαρ*, 'the liver.' Conversion into a liver-like substance. Applied to the lungs when gorged with effused matters, so that they are no longer pervious to the air;—*Hepaticatio pulmonum*, *Carnificatio pulmonum*. In such state, they are said to be *hepatized*.

HEPATIZATION, RED, (F.) *Hépatisation rouge*, *Endurcissement rouge*, *Ramollissement rouge*, characterizes the first stage of consolidation of the lungs in pneumonia.

HEPATIZATION, GRAY, (F.) *Hépatisation grise*, *Induration grise*, *Ramollissement gris*,

*Infiltration purulenta*, characterizes the third stage, or stage of purulent infiltration.

HEPATIZON, Chloasma.

HEPATOC'ACE, from 'ηπαρ, 'liver,' and κακοί, 'evil.' Gangrene of the liver.

HEPATOCE'LF, from 'ηπαρ, 'the liver,' and κλη, 'a tumour;' *Her'nia hepat'ica*; *Hernia of the Liver*. The liver has never been found entirely out of the abdominal cavity. Increase of its bulk, or injuries of the parietes of the abdomen, have been the sole cause of the protrusions which have been occasionally met with, especially in infants, in whom the upper part of the linea alba is very weak, and indeed scarcely seems to exist. Sauvages has distinguished two species of hepatocele:—the *ventral* (in the linea alba), and the *umbilical* or *hepatomphalum*.

HEPATOCHOLORRHŒA, Hepatirrhœa.

HEPATOCHOLICUM. A ligament of the liver, described by Haller, as passing from the gall-bladder and contiguous sinus portarum, across the duodenum to the colon. Another, termed *Hepato-renal*, descends from the root of the liver to the kidney. They are both peritoneal.

HEPATO CYSTIC, *Hepatocysticus*, *Cystid-epat'icus*, from 'ηπαρ, 'the liver,' and κυστις, 'bladder.' Relating to the liver and gall-bladder.

HEPATO CYSTIC DUCT, *Ductus hepatocyst'icus*, Choledoch duct.

HEPATODYNIA, Hepatgia.

HEPATODYSENTERIA, Hepatirrhœa.

HEPATO GASTRIC, Gastrohepatic.

HEPATO GASTROCHOLOSIS, Fever bilious, Fever, gastric.

HEPATO GRAPHY, *Hepatographia*; from 'ηπαρ, 'the liver,' and γραφω, 'a description.' The part of anatomy which describes the liver.

HEPATO HŒMIA, *Hyperhæmia hepatis*, *Hepatic Engorgement*, (F.) *Hyperémie du Foie*, from 'ηπαρ, 'the liver,' and 'αιμα, 'blood.' Sanguineous congestion of the liver.

HEPATOES, Hepatic.

HEPATOIDES, Hepatic.

HEPATO LITHIASIS, from 'ηπαρ, 'the liver,' and λιθιασικ, 'formation of stone.' The formation of concretions, *Hepato lithi*, in the liver.

HEPATO L'OGY, *Hepatology*, from 'ηπαρ, 'the liver,' and λογος, 'a discourse,' 'treatise.' A treatise on the liver.

HEPATOMALA'CIA, *Malacia hepatis*, (F.) *Ramollissement du Foie*. Softening of the liver.

HEPATOMYELOMA, Hepatencephaloma.

HEPATON'CUS, from 'ηπαρ, 'the liver,' and ογκος, 'a tumour.' Tumefaction of the liver.

HEPATOPAREC'TAMA, from 'ηπαρ, 'the liver,' and παρεκ'τιμα, 'considerable extension.' Excessive enlargement of the liver.

HEPATOPATHIA, from 'ηπαρ, 'liver,' and παθος, 'suffering.' Disease of the liver.

HEPATO PATHIE CANCÉREUSE, Hepatoscirrhus—h. *Tuberculeux*, *Hepatostrumosis*.

HEPATOPHLEGMONE, Hepatitis.

HEPATOPHTHISIS, *Pthisis hepatica*, from 'ηπαρ, 'the liver,' and φθισω, 'I consume.' Consumption from suppuration of the liver.

HEPATORRHAGIA, Hepatirrhœa, Hepat-hæmorrhagia.

HEPATORRHÆX'IS, from 'ηπαρ, 'liver,' and ρηξις, 'rupture.' Rupture of the liver.

HEPATORRHŒA, Hepatirrhœa.

HEPATOSARCOMIE, Hepatoscirrhus.

HEPATO SCIRRHUS, from 'ηπαρ, 'liver,' and σκίρρως, 'cancerous induration.' *Scirrhus hepatis*, *Encephalosis of the liver*, *Carcinoma of the liver*, (F.) *Hépatosarcomie*, *Hépatopathie cancéreuse*, *Cancer du Foie*. Scirrhus or Cancer of the liver.

HEPATO STRUMOSIE, *Tuber'cula hepatis*, (F.) *Tubercules du Foie*, *Hépatopathie tuberculeuse*; from 'ηπαρ, 'the liver,' and struma, 'a tumour,' 'a scrophulous tumour.' Tubercle of the liver.

HEPATO TOMY, from 'ηπαρ, 'the liver,' and τομω, 'I cut.' Dissection of the liver.

HEPIALOS, Epialos.

HEPS, see Rosa canina.

HEPSEMA, Decoction.

HEPSESIS, Decoction.

HEPTAL'ON GRAVEOLENS, *Hogwort*, *Bear's fright*. An indigenous plant, which has a fetid porcine smell; and is said to be used by the Indians as a diaphoretic, cathartic, &c.

HEPTAPHAR'MACUM, from 'επτω, 'seven,' and φαρμακον, 'a remedy.' A medicine composed of seven substances; ceruse, litharge, pitch, wax, colophony, frankincense, and bullock's fat. It was regarded as laxative, suppurative and healing.

HEPTAPHYLLUM, Tormentilla.

HEPTAPLEURON, Plantago major.

HERACLEUM, see H. lanatum—h. Gummi-ferum, see Ammoniac gum.

HERACLEUM SPONDYL'IUM, *Branca ursi'na Germanica*, *Spondyl'ium*, *Cow Parsnep*, *All-heal*, (F.) *Berce*, *Branco-ursino bâtard*, *Fausse Acanthe*. Family, Umbelliferae. *Sez. Syat.* Pentandria Digynia. The root of this plant has a strong, rank smell; and a pungent almost caustic taste. It has been given as a tonic, stomachic and carminative; both in powder and in decoction. The Russians, Lithuanians, and Poles obtain from its seeds and leaves, by fermentation, a very intoxicating spirituous liquor, which they call *Parst*.

The root of *Heracleum Lanatum*, *Masterwort*, *Cow parsnep*,—*Heracle'um* (Ph. U. S.)—is in the secondary list of the Pharmacopœia of the United States.

HERACLEUS MORBUS, Epilepsy.

HERB, *Herba*, *Bot'an?*. Any ligneous plant which loses its stalk during the winter.

HERB CHRISTOPHER, *Actæa spicata*—h. of Grace, *Gratiola officinalis*—h. Mastich, common, *Thymus mastichina*—h. Mastich, Syrian, *Teucrium marum*—h. Robert, *Geranium Robertianum*—h. of Saint Cunegonde, *Eupatorium cannabinum*—h. Sophia, *Sisymbrium sophia*—h. Trinity, *Anemone hepatica*.

HERBA, Herb—h. *Alexandrina*, *Smyrnum olusatrum*—h. *Anthos*, *Rosmarinus*—h. *Benedicta*, *Geum urbanum*—h. *Britannica*, *Rumex hydro-lapathum*—h. *Canni*, *Artemisia santonica*—h. *Cardiaca*, *Leonurus cardiaca*—h. *Cardui veneris*, *Dipsacus fullonum*—h. *Dorea*, *Solidago virgaurea*—h. *Felis*, *Nepeta*—h. *Genipi*, *Achillea atrata*—h. *Ignis*, *Lichen pyxidatus*—h. *Melancholifuga*, *Fumaria*—h. *Militaris*, *Achillea millefolium*—h. *Papularis*, *Lapsana*—h. *Paralyseos*, *Primula veris*—h. *Paralytica*, *Primula v*

ris—*h.* Patzæ lapinæ, Leonurus cardiaca—*h.* Pulicaris, Plantago psyllium—*h.* Quercini, Lichen plicatus—*h.* Sacra, Verbena officinalis—*h.* Salivaris, Anthemis pyrethrum—*h.* Sideritidis, Galeopsis grandiflora—*h.* Tabaci, Nicotiana tabacum—*h.* Trinitatis, Anemone hepatica—*h.* Trinitatis, Viola tricolor—*h.* Veneris, Adiantum pedatum—*h.* Ventis, Anemone pulsatilla—*h.* Zazarhendi, Origanum.

HERBÆ PRO ENEMATE, Glyster herbs—*h.* pro fotu, Fomentation herbs.

HERBALIST, Herborist.

HERBARIUM, from *herba*, a plant. A collection of plants. Generally applied to a collection of dried plants—*Hortus siccus*. In Pharmacy, a plant that is used entire.

HERBARIUS, Herborist.

HERBE, Herb—*h.* *au Canoeur*, Plumbago Europæa—*h.* *aux Chantres*, Erysimum—*h.* *aux Charpentiers*, Justitia pectoralis—*h.* *aux Chats*, Nepeta, Teucrium marum—*h.* *au Coq*, Tanacetum balsamita—*h.* *au Cuillers*, Cochlearia officinalis—*h.* *aux Érouelles*, Scrophularia nodosa—*h.* *aux Écus*, Lysimachia nummularia—*h.* *à Eternuer*, Achillea ptarmica—*h.* *aux Gueux*, Clematis vitalba—*h.* *à la Houotte*, Asclepias Syriaca—*h.* *aux Mamelles*, Lapsana—*h.* *aux Mouches*, Conyza squarrosa—*h.* *au Pauvre homme*, Gratiola officinalis—*h.* *aux Perles*, Lithospermum officinale—*h.* *à Pisser*, Pyrola umbellata—*h.* *à la Poudre de Chypre*, Hibiscus abelmoschus—*h.* *aux Poues*, Delphinium staphisagria—*h.* *aux Puces commune*, Plantago psyllium—*h.* *à Robert*, Geranium Robertianum—*h.* *de Sainte Barbe*, Erysimum barbarea—*h.* *Sainte Christophe*, Actæa spicata—*h.* *de Saint Étienne*, Circeæ lutetiana—*h.* *de Saint Jean*, Artemisia vulgaris—*h.* *de Saint Roch*, Inula dysenterica—*h.* *aux Sorciers*, Circeæ lutetiana—*h.* *aux Verrues*, Heliotropium Europæum.

HERBIVOROUS, *Herbivorus*, from *herba*, 'grass,' and *voro*, 'I eat.' An epithet applied to animals which feed on herbs.

HERBORIST, *Herbarius*. One who deals in useful plants. An *Herbalist* or *Herbarist*.

HERBORIZATION, *Herbarum inquisitio*. An excursion, made with the view of collecting plants. Such excursions are directed by the Apothecaries' Company of London, for the use of their apprentices, &c.

HERBS, FIVE CAPILLARY, *Quinque herba capillares*, were, anciently, hart's tongue, black, white, and golden maiden-hair, and spleenwort.

HERBS, FIVE EMOLIENT, *Quinque herba emollientes*, were, anciently, beet, mallow, marsh-mallow, French mercury, and violet.

HERCULES ALLHEAL, *Pastinaca opopanax*.

HERCULEUS MORBUS, Epilepsy.

HEREDITARY, *Hereditarius*, *Hereditarius*, *Genititius*, *Symphytos*, *Syngenes*, from *heres*, 'an heir.' An epithet given to diseases, communicated from progenitors. Such diseases may exist at birth; or they may supervene at a more or less advanced period of existence.

HERMAPHRODITY, *Hermaphrodisia*, *Hermaphroditismus*, *Hermaphrodisimus*, *Fabrica androgynæ*, *Androgynia*, *Gynandria*, *Hermaphroditism*; from *Ἐρμης*, 'Mercury,' and *Ἀφροδίτη*, 'Venus.' Appertaining to Mercury and Venus. Union of the two sexes in the same individual.

HERMAPHRODISIA, Hermaphrocity.

HERMAPHRODITE. Same etymon. *Hermaphroditus*, *Gynida*, *Androgynus*. One who possesses the attributes of male and female: who unites in himself the two sexes. A term, applied to an animal or plant which is, at the same time, both male and female. True hermaphrodites are only met with in the lower degrees of the animal scale, amongst the zoophytes, mollusca, or gasteropodes. The individuals of the human species, regarded as hermaphrodites, owe this appearance to a vicious conformation of the genital organs; a kind of monstrosity, which renders them unfit for generation, although an attentive examination may exhibit the true sex. Hermaphrodites have, likewise, been described, who, instead of uniting the attributes of both sexes, cannot be considered male or female. These have been called *neutral hermaphrodites*.

HERMAPHRODITISMUS, Hermaphrocity.

HERMAPHRODITUS, Hermaphrodite.

HERMETICA DOCTRINA, *Hermetica ars*, (F.) *Hermetique*. The doctrine of Hermes, a celebrated Egyptian philosopher, who is considered the father of alchemy. That part of chymistry, whose object was the pretended transmutation of the metals.

HERMODACTYLUS, *Dactyletus*, *Anima articulosum*, from *Ἐρμης*, 'Mercury,' and *δακτύλος*, 'a finger;' or rather from *Hermus*, a river in Asia, upon whose banks it grows, and *δακτύλος*, 'a date;' or from *Ἐρμης*, 'Mercury,' and *δακτύλος*, 'a date;' (F.) *Hermodactyle*, *Hermodacte* or *Hermodate*. The root of the *Hermodactyl* was formerly used as a cathartic. By some, it is supposed to be identical with the *Iris tuberosa*. The best testimony seems to be in favour of its being a variety of the colchicum,—the *Colchicum Illyricum*.

HERMODATE, *Hermodactylus*.

HERMOPHILUS, from *Ἐρμης*, 'Mercury,' and *φίλος*, 'a lover.' One who is fond of mercury as a medicine.

HERNIA, *Romez*, *Ruptura*, *R. herniosa*, *Crepatura*, *Ectopia herniosa*, *Celt*, *Rupture*, (F.) *Hargne*, *Descante*, *Effort*, *Greveure*, *Rompure*. Any tumour, formed by the displacement of a viscus or a portion of a viscus, which has escaped from its natural cavity by some aperture and projects externally. *Herniæ* have been divided into,—1. *Hernia of the Brain*; *Encephalocèle*; 2. *Hernia of the Thorax*; *Pneumocèle*; 3. *Hernia of the Abdomen*.

*Abdominal Herniæ* are remarkable for their frequency, variety, and the danger attending them. They are produced by the protrusion of the viscera, contained in the abdomen, through the natural or accidental apertures in the parietes of that cavity. The organs, which form them most frequently, are the intestines and the epiploon. These *herniæ* have been divided, according to the aperture by which they escape, into:

1. *Inguinal* or *Supra-Pu'bian Herniæ*. These issue by the inguinal canal: they are called *Bubonocèle*, when small; and *Scrotal Hernia* or *Oschoocèle*, in man, when they descend into the scrotum;—*Vulvar Hernia* or *Puden'dal* or *La'bial Hernia*, *Epistocèle*, in women, when they extend to the labia majora. 2. *Crural* or *Femoral Hernia*, *Me'rocèle*, when they issue by the crural canal. 3. *Infra-Pu'bian Hernia*, (F.) *Hernia sous-pu'bienne*, *Oödocèle*, *Hernia*

*foram'inis ovalis*, where the viscera escape through the opening, which gives passage to the infra-pubic vessels. 4. *Ischiatic Hernia*; when it takes place through the sacro-sciatic notch. 5. *Umbilical Hernia*, *Exomphalos*, *Omphalocèle*; when it occurs at the umbilicus or near it. 6. *Epigastric Hernia*;—occurring through the linea alba, above the umbilicus. 7. *Hypogastric* or *Infra-umbilical Hernia*, *Calicèle*, *Hypogastrocèle*,—when it occurs through the linea alba below the umbilicus. 8. *Perineal Hernia*, *Mesocolocèle*, *Hernia perinæ*, *Perinocèle*, *Perinocèle*—when it takes place through the levator ani, and appears at the perineum. 9. *Vag'inal Hernia*, *Coleocèle* seu *Elytrocèle*—through the parietes of the vagina. 10. *Diaphragmatic Hernia*, *Diaphragmato-cèle*; when it passes through the diaphragm.

Herniæ are likewise distinguished,—according to the viscera forming them,—into *Enterocèle*, *Epiplocèle*, *Entero-epi-plocèle*, *Gastrocèle*, *Cystocèle*, *Hepato-cèle*, *Splenocèle*, &c.

When a hernia can be restored to its natural cavity, by the aid of pressure, &c., properly applied, it is said to be *reducible*. It is, on the contrary, *irreducible*, when adhesion, bulk, &c. oppose its return. When the aperture, which has given passage to the hernia, occasions more or less constriction on the protruded portion, the hernia is said to be *incarcerated* or *strangulated*: and, if the constriction be not removed, constipation, hiccough, vomiting, and all the signs of violent inflammation, followed by gangrene, supervene, with alteration of the features, small pulse, cold extremities, and death.

The therapeutical indications are,—1. *As regards reducible hernia*;—to replace the viscera in the abdomen by the taxis; and to retain them there by the use of a *truss*, which, if properly adapted, may effect a radical cure. 2. *As regards irreducible hernia*;—to support the tumour by an appropriate suspensory bandage. 3. *As regards strangulated hernia*;—to have recourse to the taxis; blood-letting; warm bath; tobacco glysters; ice to the tumour; and, if these should not succeed, to perform an operation, which consists in dividing the covering of the hernia, and cutting the aponeurotic ring, which causes the strangulation;—reducing the displaced viscera, unless their diseased condition should require them to be retained without;—dressing the wound appropriately; restoring the course of the fæces by means of gentle glysters;—preventing or combating inflammation of the abdominal viscera;—conducting the wound to cicatrization, by appropriate means; and afterwards supporting the cicatrix by a bandage.

**HERNIA, ANEURISMAL**, *Cirsomphalus*—h. *Arteriarius*, see *Aneurism*—h. of the Bladder, *Cystocele*—h. *Bronchialis*, *Bronchocele*—h. *Carnosa*, *Sarcocele*—h. of the *Cerebellum*, *Paracephalocèle*—h. *Cerebri*, *Encephalocèle*.

**HERNIA, CONGEN'ITAL**, *Hernia congen'ita*, is a protrusion of some of the contents of the abdomen into the *Tunica vaginalis testis*, owing to a want of adhesion between its sides, after the descent of the testicle.

**HERNIA CORNÆ**, *Ceratocele*—h. *Crural*, *Merocele*—h. *Epiplocèle*, *Epiplocèle*—h. *Femoral*, *Merocele*—h. *Foramini Ovalis*, see *Hernia*—h. *Gutturis*, *Bronchocele*—h. *Hepatica*, *Hepatocele*.

**HERNIA HUMORALIS**, *Empres'ma Orchit'is*,

*Didym'itis*, *Orchit'is*, *Orchidit'is*, *Inflammatio test'ium*, *Inflammation of the Testicle*, *Swelled Testicle*, *Hernia Ven'eriæ*, *Orchio-cèle*, *Orchidocèle*, *Orchidov'ous*, (F.) *Inflammation du testicule*, *Orchite*, *Chaudépièce tombée dans les Bourses*. Swelling and inflammation of the testicle is a common symptom of gonorrhœa; but it may arise from external injuries, or from other causes. It is a disease, which cannot be mistaken, and the treatment must obviously be strongly antiphlogistic, supporting the testicle during the treatment, and for some time afterwards: methodical compression has also been found useful. The disease is not generally of a serious character, going off as suddenly as it comes on. As it affects the epididymis more especially, when supervening on gonorrhœa or blennorrhœa, it is sometimes termed *blennorrhag'ic epididym'itis*.

**HERNIA INCARCERATA**, *Entero-peristole*—h. *Inguinalis*, *Bubonocèle*—h. *Intestinalis*, *Entero-cèle*—h. *Intestinalis omentalis*, *Entero-epi-plocèle*—h. *Iridis*, *Ptosis Iridis*—h. *Ischiatica*, *Ischio-cèle*—h. *Lienalis*, *Splenocèle*.

**HERNIA LIT'RICA**, *H. e Diverticulo Intesti'ni*. Hernia first described by Litre, in which the intestinal canal proper is not included in the hernial sac, the protruded portion of intestine consisting of a digital prolongation of the ileum, which Litre concluded was formed by the gradual extension of a knuckle of the bowel, that had been engaged in the inguinal canal.

**HERNIA OF THE LIVER**, *Hepatocele*—h. *Omental*, *Epiplocèle*—h. *Parorchido-enterica*, *Parorchido-enterocèle*—h. *Perinæ*, see *Hernia*—h. *Pharyngis*, *Pharyngocele*—h. *Phrenic*, *Diaphragmatic hernia*—h. *Pinguedinosæ Scroti*, *Liparocele*—h. of the *Pleura*, *Pleurocèle*—h. *Pleurica* et *pulmonalis*, *Pleurocèle*—h. *Pudendal*, *Pudendal hernia*—h. *Sacci lacrymalis*, *Lachrymal hernia*, *Mucocele*—h. *Scrotalis*, *Scrotocele*—h. *Seminalis scroti*, *Spermatocele*—h. of the *Stomach*, *Gastrocele*—h. *Suprapubic*, *H. inguinal*—h. of the *Tongue*, *Glossocèle*—h. *Umbilicalis*, *Epiplomphalon*, *Exomphalos*—h. *Umbilici Aquosa*, *Hydromphalon*—h. *Uteri*, *Hysterocele*—h. *Varicose*, *Cirsocele*—h. *Varicosa*, *Varicocele*—h. *Venarum*, *Varix*—h. *Veneris*, *Hernia humoralis*—h. *Ventosa*, *Physocèle*—h. *Ventral*, see *Ventral*—h. *Ventriculi*, *Gastrocele*—h. *Vesicæ Urinariæ*, *Cystocele*—h. *Zirbalis*, *Epiplocèle*.

**HERNIAIRE**, *Hernial*, *Herniaria glabra*.

**HERNIAL**, *Herniarius*, (F.) *Herniàire*. Belonging to, or concerning hernia;—as *Hernial Bandage*, *Hernial Sac*, &c.

The (F.) *Hernié*, is applied to a part enveloped in a hernial sac; *Hernieux*, *Colè'ta*, *Colè'tes*, *Ruptured*, means one affected with hernia; and *Chirurgien herniàire*, one who devotes himself to the treatment of hernia.

**HERNIA'RIA GLABRA**, *Milligra'na*, *Empetrum*, *Rupture-wort*; from *hernia*, 'rupture.' (F.) *Herniàire*, *Tarquette*, *Herniòle*. This plant, which, as its name imports, was formerly considered efficacious in the cure of hernia, seems destitute of all virtues.

**HERNARIUS**, *Hernial*.

**HERNIE CHARNUE**, *Sarcocele*—h. *de l'Epiloon*, *Epiplocèle*—h. *de l'Estomac*, *Gastrocele*—h. *Inguinale*, *Bubonocèle*—h. *du Nombril*, *Exomphalos*—h. *Ombilicale*, *Exomphalos*—h. *de la Vessie*, *Cystocele*.

**HERNIE**, Hernial.

**HERNIEMPHRAGMUS**, *Herniemphrax's*, from *Hernia*, and *μφραγμα*, 'obstruction.' The mechanical obstruction of a hernial canal for the radical cure of the hernia.

**HERNIEUX**, Hernial.**HERNIOLE**, *Herniaria glabra*.**HERNIOTOMY**, *Celotomia*.

**HERO'IC**, *Hero'icus*, *Hero'ius*, *Hero'us*, from *ἥρω*, 'a hero.' An epithet applied to remedies or practice of a violent character.

**HERPEDON**, Herpes.**HERPEN**, Herpes.

**HERPES**, *Erpes*, *Herpes'don*, *Herpen*, from *ἔρπει*, 'I creep;' because it creeps and spreads about the skin; *Ephly'sis Herpes*, *Cytis'ma Herpes*, *Zoster*, *Frot*, (F.) *Dartre*, *Olophlyctide*. A vesicular disease, which, in most of its forms, passes through a regular course of increase, maturation, decline, and termination in from 10 to 14 days. The vesicles arise in distinct, but irregular clusters, which commonly appear in quick succession, and near together, on an inflamed base; generally attended with heat, pain, and considerable constitutional disorder. The term, like all others which refer to cutaneous diseases, has not been accurately defined. The ancients had three varieties; the *miliary*, *κνυχεταιος*; *vesicular*, *φλυκταίνωδης*, and *eroding*, *εσθιομενος*. Bateman has the following varieties.

1. **HERPES PHLYCTENO'DES**, *Herpes miliaris*, *Ephly'sis Herpes Miliaris*, (F.) *Dartre phlyctenoïde*, in which the vesicles are millet-sized; pellucid; clusters commencing on an uncertain part of the body, and being progressively strewed over the rest of the surface; succeeded by fresh crops. 2. **HERPES ZOSTER**, *Zoster*, *Zona ignea*, *Z. serpygino'sa*, *Ignis Per'sicus*, *Cinzilla*, *Sacer ignis*, *Ephly'sis Herpes zoster*, *Herpes pers'celis*, *Erysi'pelas zoster*, *Erysi'pelas phlyctenoïdes*, *E. pustulo'sa*, *Zona*, *Cir'cinus*, *Parizo'ma*, (F.) *Cointure*, *C. dartreuso*, *Fou Perrique*, *Erysi'pelas pustuleux*, *Shingles*: in which the vesicles are pearl-sized; the clusters spreading round the body like a girdle; at times confluent, and occasionally preceded by constitutional irritation. 3. **HERPES CIRCI'NATUS**, *Formi'ca ambulato'ria*, *An'nulus repens*, *Herpes Serpi'go*, *Se'pi'go*, *Ephly'sis Herpes Circina'tus*, *Ringworm*, *Ven'icular Ringworm*, consisting of vesicles with a reddish base, uniting in rings: the area of the rings slightly discoloured, often followed by fresh crops. 4. **HERPES LABIA'LIS**, and 5. **HERPES PRÆPUTIA'LIS**, *Aphthæ præputii*, *Ulcus'cula præputii*, appearing, respectively, on the lips and prepuce:—6. **HERPES IRIS**, *Iris*, *Rainbow-worm*,—occurring in small circular patches, each of which is composed of concentric rings of different colours. To these may be added, **HERPES EX'DENS**, *Ephly'sis Herpes ex'dens*, *Herpes esthio'menus*, *H. dopaz'cens*, *H. ferus*, *H. esthio'menus*, *Lupus vorax*, *Formi'ca corrosi'va*, *Formix*, *Pap'ula fera*, *Ul'cerative Ringworm*, *Nir'las*, *Agria*, (F.) *Dartre ronglants*, in which the vesicles are hard; clusters thronged; fluid dense, yellow or reddish, hot, acrid, corroding the subjacent skin, and spreading in serpentine trails.

All the varieties demand simply an antiphlogistic treatment, when attended with febrile irritation. The *herpes circinatus*, alone, re-

quires the use of astringent applications, which have the power of repressing the eruption.

**HERPES DEFASCENS**, *H. exedens*—*h. Esthio'menus*, *H. exedens*—*h. Esthio'menus*, *H. exedens*—*h. Farinosis*, *Pityriasis*—*h. Ferus*, *H. exedens*—*h. Furfuraceus*, *Pityriasis*—*h. Furfuraceus circinatus*, *Lepra*, *H. exedens*—*h. Miliaris*, *H. phlyctænoïdes*—*h. Periscelis*, *H. zoster*—*h. Serpigo*, *H. circinatus*—*h. Tonsurans*, *Porri'go decalvana*.

**HERPET'IC**, *Herpet'icus*, (F.) *Dartreua*. Possessing the nature of herpes.

**HERPETOG'RAPHY**, *Herpetograph'ia*; from *ἔρπει*, 'herpes,' and *γραφειν*, 'a description.' A description of the different forms of herpes.

**HERPETON**, *Herpet'icon*, from *ἔρπειν*, 'to creep.' A creeping eruption or ulcer.—*Hippocrates*.

**HERPYLOS**, *Thymus serpyllum*.

**HERRENSCHWAND'S SPECIFIC**, see Specific of Herrenschwand.

**HESPERIS ALLIARIA**, *Alliaria*.

**HETEROCHRON'ICUS**, *Heteroch'ronus*, from *ἕτερος*, 'other,' and *χρονος*, 'time.' Relating to difference of time.

*Pulsus heterochron'icus*. A pulse of varying rhythm. An irregular or intermittent pulse.

**HETEROCHYMEU'SIS**; from *ἕτερος*, 'other,' and *χμεισις*, 'mixture.' A state of the blood in which it contains other matters than in health, as urea, bile, &c.

**HETEROCLITE**, see Homology, and Tissues.

**HETEROCRANIA**, *Hemicrania*.

**HETEROCRIN'IA**, from *ἕτερος*, 'other,' and *κρῖνον*, 'I separate.' Modification in the situation of secretions.—*Andral*.

**HETEROGENESIS**, see Generation.**HETEROLOGALIA**, *Heterophonía*.**HETEROLOGOUS TISSUES**, see Tissues.

**HETEROMORPH'ISM**, *Heteromorphi'smus*, from *ἕτερος*, 'other,' and *μορφη*, 'shape.' A deviation from the natural shape of parts.

**HETEROMORPHOUS**, see Homology.**HETEROPATHIC**, *Allopathic*.

**HETEROPHON'IA**, from *ἕτερος*, 'other,' and *φωνη*, 'voice.' A cracked or broken voice. A change of the voice or speech—*Heterologia*.

**HETEROPTHAL'MIA**, from *ἕτερος*, 'other,' and *οφθαλμος*, 'eye.' A difference in the two eyes,—as when one squints, or is of a different colour.

**HETEROPLASTY**, *Heteroplas'tic*, *Heteroplas'tia*, from *ἕτερος*, 'other,' and *πλασσω*, 'I form.' Irregular plastic or formative operations, that do not admit of exact classification.

**HETEROPROSP'US**; from *ἕτερος*, 'different,' and *προσωπειν*, 'countenance.' A monster having two faces.—*Gurlt*.

**HET'EROPUS**, from *ἕτερος*, 'other,' and *πους*, 'foot.' One who has one foot different from the other.

**HETEROPHAXIA**, *Malacia*.

**HETERORRHYTH'MUS**; from *ἕτερος*, 'other,' and *ρυθμος*, 'rhythm.' Having another rhythm. An epithet given to the pulse, when it is such, in any individual, as is usually felt at a different age.

**HETEROS**, from *ἕτερος*, 'the one of two,' 'the other.' Hence:

**HETEROSARCOSES**, from *σάρκωσ*, 'other,' and *σῶμα*, 'flesh.' A class of diseases which consist in the formation of accidental tissues.—Gendrin.

**HETEROTAXIA**, (F.) *Hétérotaxie*: from *σάρκωσ*, and *τάξις*, 'order.' A malformation, which consists in the general transposition of organs. A change in the relation of organs.

**HETEROTOPIA**, from *σάρκωσ*, 'other,' and *τόπος*, 'place.' A deviation from the natural position of parts.

**HËTRE**, *Fagus sylvatica*.

**HEUCHERA**, see *H. cortusa*—h. *Acerifolia*, *H. Cortusa*.

**HEUCHEA CORTUSA**, *H. Americana*, *H. Acerifolia*, *H. Visida*, *Cortusa Americana*, *Alum Root*, *American Saxifrage*, *Ground-maple*, *Cliff-weed*, *Split-rock*. The root *Heuchera*—(Ph. U. S.)—is a powerful astringent, and is the basis of a *cancer powder*. The American Indians apply the powdered root to wounds, ulcers, and cancers. It is said to have been sold for *colchicum*.

**HEUCHERA VISCIDA**, *H. Cortusa*.

**HEUDELLOTIA AFRICANA**, see *Ebellium*.

**HEVEA GUIANENSIS**, see *Caoutchouc*.

**HEXAGIUM**, *Sextula*.

**HEXIS**, *ἕξις*, habit, habit of body, constitution. Hence, *hæctic*, *cachectic*, &c.

**HIA'TUS**, from *hiare*, 'to gape,' 'to open.' A foramen or aperture. Mouth. The vulva. Also, yawning.

**HIATUS DIAPHRAGMATICUS AORTICUS**, *Semiscapulus excavatus*. The opening in the diaphragm for the passage of the abdominal aorta.

**HIATUS FALLOPII**, see *Aquæductus Fallopii*—h. *Occipito-pétréux*, *Lacerum posterius foramen*—h. *Sphéno-pétréux*, *Lacerum anterius foramen*.

**HIATUS OF WINSLOW**, *Foramen of Winslow*. An opening—situate behind the lesser omentum, and behind the vessels and nerves of the liver—which forms a communication between the peritoneal cavity and that of the omenta.

**HIBERNICUS LAPIS**, *Tegula Hibernica*, *Ardeisia Hibernica*, *Hardeisia*, *Irish Slate*. A kind of slate or very hard stone, found in different parts of Ireland, in masses of a bluish-black colour, which stains the hands. It has been taken, powdered, in spruce beer, against inward contusions.

**HIBISCUS**, *Althæa*.

**HIBISCUS ABELMOSCHUS**, *Abelmoschus moschatus*. The name of the plant, whose seeds are called *Grana Moschi* or *Muskseed*. It is the *Belmoschus*, *Abelmoschus*, *Granum Moschi*, *Ketmia Egyptiaca*, *Moschus Arabum*, *Egyptia moschata*, *Bamiz moschata*, *Alcoa*, *Alcoa Indica*, *Alcoa Egyptiaca Villosa*, *Abelmosch*, *Abelmusk*, *Musk-mallow*, (F.) *Grains de Musc*, *Herbe à la poudre de Chypre*, *Ambrette*, *Guismaus velouté*. It is indigenous in Egypt and the Indies. The seeds are chiefly used as perfumes; and especially in the formation of *Cyprus Powder*.

**HIBISCUS POPULEUS**, *Balimba'go*. A small Molucca tree. The fruit is full of a juice similar to camboge. The root is emetic. It is used in chronic diarrhoea, colic, dyspepsia, &c.

**HICCUGH**, *Singultus*.

**HICCUP**, *Singultus*.

**HIDRISCHEISIS**, *Hidroschesis*.

**HIDROA**, *Desudatio*, *Echouboutures*, *Hydroa*, *Sudamina*.

**HIDRONOSUS**, *Hidronosus*, from *ἰδρῶσ*, 'sweat,' and *νόσος*, 'a disease.' Accompanied by violent sweats. *Sudor Anglicus*.

**HIDRONUSUS**, *Hidronosus*.

**HIDROPEDESIS**, *Ephidrosis*.

**HIDROPHOROS**, *Sudoriferous*.

**HIDROPOETICUM**, *Sudorific*.

**HIDROPYRA**, *Sudor Anglicus*.

**HIDROPYRETOS**, *Sudor Anglicus*.

**HIDRORRHŒA**, *Ephidrosis*.

**HIDROS**, *ἰδρῶσ*, *Sudor*, 'sweat.' Hence—*Hidropyra*, *Hidrosis*, &c.

**HIDROSCHESIS**, *Hidrischesis*, *Retentio sudoris*, from *ἰδρῶσ*, 'sweat,' and *σχῆσις*, 'retention.' Suppression of perspiration.

**HIDROSIS**, *Hydrosis*, *Sudatio*, from *ἰδρῶσ*, 'sweat.' Sweating, *Ephidrosis*.

**HIDROTERION**, *Achicolum*.

**HIDROTERIUM**, *Sudorific*.

**HIDROTICUM**, *Sudorific*.

**HIDROTIUM**, Diminutive of *ἰδρῶσ*, 'sweat.' A gentle sweat or perspiration.

**HIDROTOPEÛM**, *Sudorific*.

**HIEBLE**, *Sambucus ebulus*.

**HIERA DIACOLOCYNTHIDOS**, from *ἱερός*, 'holy.' *Hiera of Colocynth*. An electuary, composed of 10 parts of *colocynth*, as much *agaric*, *germander*, *white horehound*, *stachas*:—5 parts of *opoponax*, as much *sagapenum*, *parsley*, *round birchwort root* and *white pepper*;—4 parts of *spikenard*, *cinnamon*, *myrrh*, and *saffron*; and 3 pounds, 3 ounces, and 5 drachms of *honey*.

**HIERA OF COLOCYNTH**, *H. Diacolocynthidos*—h. *Logadii*, *Hiera picra*.

**HIERA PICRA**, from *ἱερός*, 'holy,' and *πίρρωσ*, 'bitter.' *Holy bitter*, *Pulvis aloëticus*, formerly called *Hiera logadii*, when made into an electuary with honey. It is now kept in the form of dry powder;—prepared by mixing *socotrine aloes* one pound, with 3 ounces of *canella alba*. See *Pulvis aloes cum canella*.

**HIERA STRINX**, *Vertebral column*, *Epilepsy*.

**HIERACITES**, *ἱερακίτης*, from *ἱεραξ*, 'a hawk,' *Lapis Ascriptum*. The ancient name of a precious stone; believed to be capable of arresting the hemorrhoidal flux.—Pliny, Galen, Paulus.

**HIERACIUM MURO'RUM**, *Pulmonaria Gallica*, *Auricula muris major*, (F.) *Éperrière des murailles*, *Pulmonaire des Français*. A European plant, which is a slight tonic.

**HIERACIUM PILOSELLA**. The systematic name of the *Auricula Muris*, *Pilosella*, *Myosotis*, *Mousse-ear*, (F.) *Piloselle*, *Oreille de Souris*. This plant contains a bitter, lactescent juice: which has a slight degree of astringency. The roots are more powerful than the leaves.

**HIERANOSUS**, *Chorea*, *Epilepsy*.

**HIERAX**, *Accipiter*.

**HIEROBOTANE**, *Verbena officinalis*.

**HIEROGLYPHICA**, from *ἱερός*, 'holy,' and *γλυφῶν*, 'I carve.' A name given to the signs employed in medicine; and also to the folds in the hands, feet, and forehead, which afford chiromancy its pretended oracles.

**HIEROPYR**, *Erysipelas*.

**HILL'S BALSAM OF HONEY**, see *Balsam of Honey*, Hill's—h. *Essence of Bardana*, *Tinctura guaiaci ammoniata*.

**HILLBERRY**, *Gaultheria*.

**HILL FEVER**, see Fever, hill.

**HILON**, (F.) *Hilum*, improperly *Hilus*. A name given by some writers to a small blackish tumour, formed by the protrusion of the iris through an opening in the transparent cornea, so called from its comparison with the *hilo* or black mark presented by the vicia faba at one of its extremities. In Botany, the *Hilo* or *Hilum* is the cicatricula of a seed, which indicates the place by which it was attached in the cavity of the pericarp. It is the umbilicus of the seed. The fisure of the spleen, kidney, &c., is, also, sometimes called *Hilus*.

**HILUS**, *Hilum*.

**HILUS LIENALIS**, *Incisura lienalis*. The concave part of the spleen.

**HILUS RENALIS**, *Incisura renalis*. The concave part of the kidney.

**HIMANTOMA**, see Himas.

**HIMANTOSIS**, Himas.

**HIMAS**, 'μυς, 'a thong of leather.' The uvula; likewise, elongation and extenuation of the uvula. It is also called *Himantosis*, *Himantoma*. See Staphyloedema.

**HIMEROS**, Libido.

**HIP**, Haunch—h. Bone, Ischium—h. Disease; Coxarum morbus—h. Joint, Coxofemoral articulation—h. Tree, Rosa canina.

**HIPPACÉ**, 'ιππιων, from 'ιππος, 'a horse.' *Caseus Equinus*. A cheese prepared from mare's milk.

**HIPPANTHROPIA**, from 'ιππος, 'a horse,' and ανθρωπος, 'a man.' A variety of melancholy, in which the patient believes himself changed to a horse. The Greek word 'ιππανθρωπος, means the fabulous Centaur.

**HIPPASIA**, Equitation.

**HIPPEIA**, Equitation.

**HIPPEUSIS**, Equitation.

**HIPPIATER**, *Hippiatros*, *Medicus equarius*. A farrier. A horse doctor. Used also for one who treats the diseases of other domestic animals; *Veterinaris*, *Mulomedicus*, *Medicus Veterinaris*, *Zoiatrus*.

**HIPPIATRIA**, *Hippiatrica*, *Hippiatrica*, *Medicina equaria*, from 'ιππος, 'a horse,' and ιατρικη, 'medicine,' (F.) *Hippiatrica*. A science, whose object is the knowledge of the diseases of the horse. It is sometimes made to include other domestic animals. See Veterinary art.

**HIPPIATRQUE**, Hippiatria.

**HIPPIATRUS**, Hippiater.

**HIPPO**, Euphorbia corollata—h. Indian, *Gilenea trifoliata*.

**HIPPOCAMPE GRANDE**, *Cornu ammonis*.

**HIPPOCAMPUS MAJOR**, *Cornu ammonis*.

**HIPPOCAMPUS MINOR**, *Pes hippocampi minor*. *Pes hippocampi minor*, *Unguis*, *Unguis Halteri*, *O'orea*, *Colliculus cavæ posterioris ventriculo-rum lateralis*, *Calcæa avis*, *Uniform Emittance*, (F.) *Ergot*, *Éperon*. A medullary tubercle or projection, observed in the posterior cornu of the lateral ventricle of the brain.

**HIPPOCRAS**, Claret.

**HIPPOCRATES**, CAP OF, *Bonnet d'Hippocrate*—h. Sleeve, *Chaussé*.

**HIPPOCRATIC**, *Hippocraticus*. Relating to Hippocrates, or concerning his doctrine,—as *Hippocratic doctrine*, *Hippocratic face*, &c.

**HIPPOCRATIST**. A partisan of the Hippocratic doctrine.

**HIPPOGONYOLEPUS**, Crusta genu equine.

**HIPPOLAPATHUM**, *Rumex patientia*.

**HIPPOLITHUS**, Bezoard of the Horse.

**HIPPOMARATHRUM**, *Peucedanum silaus*.

**HIPPOPATHOL'OGY**, *Hippopatholog'ia*, from 'ιππος, 'a horse,' παθος, 'a disease,' and λογος, 'a discourse.' A knowledge of the diseases of the horse. Pathology of the horse.

**HIPPOPOPUS**, see Kylosia.

**HIPPOS**, Equus.

**HIPPOSELINUM**, *Smyrnum olusatrum*.

**HIPPOSTEOL'OGY**, *Hipposteolog'ia*, from 'ιππος, 'a horse,' στεον, 'a bone,' and λογος, 'a discourse.' Osteology of the horse.

**HIPPOT'OMY**, *Hippotomia*, from 'ιππος, 'a horse,' and τομη, 'to cut.' Anatomy of the horse.

**HIPPURIC ACID**, see Acid, hippuric.

**HIPPU'RIS VULGARIS**, from 'ιππος, 'a horse,' and ουρ, 'a tail.' The systematic name of the *Horse's Tail*, *Mare's Tail*, *Equisetum minus*, *Equisetum*, (F.) *Prêle*, *Presle*, *Asprêle*. It is an astringent, and frequently used, as tea, by the vulgar, in diarrhœa and hemorrhage. The same virtues are attributed to the *Equisetum arvense*, *fuciat'ile*, *limosum*, &c.

**HIPPUS**, *Equus*, *Nictatio*, from 'ιππος, 'a horse.' A disease of the eyes, in which, from birth, they perpetually twinkle, like those of a man on horseback. Also, a tremulous condition of the iris, which occasions repeated alternations of contraction and dilatation of the pupil; *Iridotromus*, *Tremor Iridis*.

**HIPS**, Sax. heopa. The fruit of the dog-rose, *Rosa Canina*: chiefly used as a confection. See Confectio Rosæ Caninæ.

**HIRCIS'MUS**, *Hircus*, *Hircus*, from *hircus*, 'a goat.' Stinking like a goat—applied especially to the odorous secretions of the axilla.

**HIRCUS**, Canthus (greater), *Hircismus*, *Tragus*—h. Alarum, *Cinabra*.

**HIRQUALITAS**, from *hircus*, 'a goat,' *paraphonia yuborum*. Goat's voice. See Ego-phony.

**HIRQUUS**, *Hircus*, *Canthus* (greater), *Hircismus*, *Tragus*.

**HIRSU'TIES**, *Dasychia*, *Dasychia*, *Trichosis*, *Hirsuties*, *Hairsiness*. Growth of hairs on extraneous parts, or, superfluous growth on parts; as in cases of bearded women.—Good.

**HIRU DO**, *The Leech*, *Sanguisuga*, *Bdella*.

In medicine, the *Hirudo Medicinalis*, *Bdella Medicinalis*, *Medicinal Leech*, (F.) *Sanguisuga*, is employed. In the United States *H. decora* is used. The leech lives in fresh water, and feeds on the blood of animals, which it sucks, after having pierced the skin with its three sharp teeth. This habit has been taken advantage of, to produce local blood letting. In applying the leech, the part must be wiped dry; and if there be difficulty in making it, a little milk or cream may be applied. When satiated, it will drop off, and by applying a little salt or vinegar to its head it will disgorge the blood. A good English leech will take about half an ounce of blood, including that which flows by fomenting the part subsequently. The American takes less.

**HIRUDO ARTIFICIALIS**, *Antlia sanguisuga*—

h. *Decora*, see *Hirudo*—h. *Medicinalis*. *Hirudo*.

**HIRUNDINARIA**, *Lysimachia nummularia*.

**HIRUNDO**, *Chel'idon*, from *haron'do*, 'sticking;' because it sticks its nests against the houses. (?) *The Swallow*. The nests of the swallow were once employed as rubefacients, boiled in vinegar.

**HISPANICUM VIRIDE**, *Cupri subacetatis*.

**HISPIDITAS**, *Dystecthiasis*, *Phalangosis*.

**HISPIDULA**, *Antennaria dioicum*.

**HISTODYALYSIS**, from *ἵστος*, 'organic texture,' and *δυσλύσις*, 'dissolution.' A morbid dissolution of the tissues.

**HISTOGEN'IA**, *Histog'eny*, from *ἵστος*, 'the organic texture,' and *γενεσις*, 'generation.' The formation and development of the organic textures.

**HISTOLOG'ICAL**; same etymon as the next. Relating to histology. Applied, also, at times, to the natural transformations that occur in the tissues in the embryo, in contradistinction to *morphological*, which applies to the alterations in the form of the several parts of the embryo.

**HISTOLOG'Y**, from *ἵστος*, 'the organic texture,' and *λόγος*, 'a description.' Anatomy (general.) The term is also more particularly appropriated to the minute anatomy of the tissues.

**HISTON'OMY**, *Histonom'ia*; from *ἵστος*, 'the organic texture,' and *νομός*, 'law.' The aggregate of laws, which preside over the formation and arrangement of the organic tissues.

**HISTORY, MEDICAL**, *Histo'ria Medici'næ*. A narration of the chief circumstances, and the persons connected with them, in the progress of medicine.

**HIST'OS**, *ἵστος*, 'the organic texture.' *Tex'tura seu Tela organ'ica*.

**HISTOT'OMY**, *Histotom'ia*, from *ἵστος*, 'organic texture,' and *τομή*, 'incision.' Dissection of the tissues.

**HIVE SYRUP**, *Syrupus scillæ compositus*.

**HIVES**, *Cynanche trachealis*, *Varicella*.

**HOARSENESS**, *Raucedo*.

**HOB-NAIL LIVER**, *Cirrhosis of the liver*, *Liver*, *nutmeg*.

**HOG-LICE**, *Onisci aselli*.

**HOGWORT**, *Heptallon graveolens*.

**HOLANENCEP'HALIA**; from *ἅλς*, 'entire,' and *anencephalia*, 'absence of brain.' Entire absence of brain,—the same as *Anencephalia*.—G. St. Hilaire.

**HOLARTHRTIS**, *Hamarthritis*.

**HOLCÉ**, *ῥάκη*, 'a dram.'—Galen.

**HOL'CIMOS**, *ἑλίμνος*, from *ἑλμνος*, 'a weight.' A tumour of the liver.

**HOLC'US SORGHUM**, *Panicum Italicum*.

**HOLERA**, *Cholera*.

**HOLLANDS**, *Gin*.

**HOLLY, AMERICAN**, *Ilex opaca*—h. *Common*, *Ilex aquifolium*—h. *Daboon*, *Ilex vomitoria*—h. *Ground*, *Pyrola maculata*—h. *Ground*, *Pyrola umbellata*—h. *Sea*, *Eryngium maritimum*.

**HOLLYHOCK, COMMON**, *Alcea rosea*.

**HOLMICOS**, *Alveolus*.

**HOLMOS**, *Mortar*.

**HOLOCYRON**, *Teucrium chamæpitys*.

**HOLONARCO'SIS**, from *ἅλς*, 'whole,' and *ἄρκασις*, 'stupor.' Narcosis of the whole body. *Torpefactio universalis*.

**HOLOPHLYCTIDES**, *Phlyctæna*.

**HOLOSTEUM ALSINE**, *Alsine media*.

**HOLOSTEUS**, *Osteocolla*.

**HOLOTETANUS**, see *Tetanus*.

**HOLOTONIA**, *Holotonicus*, *Tetanus*.

**HOLOTONICUS**, *ἅλς*, 'the whole,' and *τονος*, 'I stretch.' *Holoton'ia*. A spasm of the whole body. A variety of tetanus.—Sauvages.

**HOL'YWELL, MINERAL WATERS OF**. Holywell is a town in Wales; and takes its name from the famous well of St. Winifred. It is a simple cold water, remarkable for its purity.

**HOMAGRA**, *Omagra*.

**HOMEOPATHY**, *Homœopathy*.

**HOMERDA**, *Stercus humanum*.

**HOMESICKNESS**, *Nostalgia*.

**HOMILIA**, *Coition*.

**HOMIOSIS**, *Homœiosis*.

**HOMME**, *Homo*.

**HOMO**, (F.) *Homme*, *Man*,—the chief and most perfect of the mammalia; in Greek, *ἀνθρώπος*, *Anthro'pos*, from *ἄνω*, 'upwards,' and *τρέω*, 'I turn,' because man, alone, of all animals, possesses the natural power of standing erect. He is, also, the only animal whose incisor teeth, wedged in a projecting jaw, are absolutely vertical. Man is especially distinguished from other mammalia by the faculty, which he possesses, of classing his ideas; comparing them with each other; and connecting, representing and transmitting them by signs and articulate sounds. He possesses, in the highest degree, all the attributes of intelligence, memory, judgment, and imagination. He inhabits all countries,—the burning regions of the torrid zone, and the chilling atmosphere of the polar climes. In different situations, he presents, in his figure, colour, and stature, differences, which have caused the human race to be divided by naturalists into races or varieties. The number of such races can only be approximated. Cuvier admits but three, the *Caucasian*, *Negro*, *Mongolian*; to these may be added the *American*. Every division must necessarily be arbitrary, and the individuals composing each variety are far from being alike.

**HOMO ALATUS**, see *Alatus*—h. *Fatuus*, *Idiot*.

**HOMOË'DRUS**, from *ἄνω*, 'together,' and *ἴστος*, 'seat.' Having the same seat. *Morbi homœdri*:—Diseases that have the same seat.

**HOMŒOMORPHOUS**, see *Homology*.

**HOMŒOPATH**, *Homœopathist*.

**HOMŒOPATH'IC**, *Homœopath'icus*, *Homœopath'icus*. Relating to *Homœopathy*.

**HOMŒOP'ATHIST**, *Ho'mœopath*, *Homœopath'icus*, *Homœopath'ica*, *Homœopath'ist'us*. One who follows *Homœopathy*.

**HOMŒOP'ATHY**, *Homœopath'ia*, *Art' homœopath'ica*, *Homœop'athy*, from *ὅμοιος*, 'like,' and *πάθος*, 'affection.' A fanciful doctrine, which maintains, that disordered actions in the human body are to be cured by inducing other disordered actions of the same kind, and this to be accomplished by infinitesimally small doses, often of apparently inert agents; the decillionth part of a grain of charcoal, for example, is an authorized dose.

**HOMŒOZ'YGY**, from *ὅμοιος*, 'like,' and *ζυγος*, 'I join together.' (F.) *Soi-pour-soi*. The law of association of organs, by which like parts adhere to like parts.—Serres.

**HOMOËT'ONIA**, *Sympathy*.

**HOMOGENESIS**, see *Generation*.

**HOMŒOPATHIA**, *Sympathy*.

**HOMOIO'SIS**, *Homio'sis*, from *ὅμοιος*, 'I re-

semble,' 'I assimilate.' An elaboration of the nutritious juice, by which it becomes proper for assimilation.

**HOMOLINON**, see Apolinosis.

**HOMOLOGY**, from *ὁμοίος*, 'like,' and *λογος*, 'a description.' The doctrine of similar parts. Thus, the two sides of the body are said to be 'homologous.' *Homologous* or *homomorphous* tissues, are those that resemble others; in opposition to *heterologous*, *heterodite*, or *heteromorphous*, which are new formations.

**HOMONOPAGIA**, Cephalalgia.

**HOMOPH'AGUS**, from *ὄμος*, 'raw,' and *φαγος*, 'I eat.' One who eats raw flesh.

**HOMOPLASTY**. *Homoplasia*, from *ὁμοίος*, 'like,' and *πλασσω*, 'I form.' The formation of homologous tissues.

**HOMOPLATA**, Scapula.

**HOMOT'ONOS**, *Equalis*, from *ὄμος*, 'equal,' and *ἄνωσις*, 'tone.' That which has the same tone. A continued fever, whose symptoms have an equal intensity during the whole course of the disease, has been so called. See *Acnasticos* and *Synocha*.

**HONESTY**, Lunaria rediviva.

**HONEWORT**, FIELD, Sison amomum.

**HONEY**, Mel—h. Balsam of, Hill's, see Mel—h. Bloom, Apocynum androsæmifolium—h. of Borax, Mel boracis—h. Clarified, Mel despumatum—h. Prepared, Mel præparatum—h. of Roses, Mel rosa—h. of Squill, compound, Syrupus Scilla Compositus.

**HONEYCOMB BAG**, Reticulum.

**HONGLANE**, Coptis tecta.

**HONOR CAPITIS**, see Capillus.

**HONORARIUM**, Sostrum.

**HONTEUX**, Pudic.

**HOODWORT**, Scutellaria lateriflora.

**HOOK**, Sax. hocce, hooc, Dutch, h o e c k, *Unus, Unicus, Anc'gra*, (F.) *Erigna, Astringe* ou *Erina*. An instrument, consisting of a steel wire, flattened at the middle, and having the extremities crooked and pointed. Some hooks are furnished with a handle at one extremity—the other having one or two hooks;—constituting the *single* and *double hook*. The Hook is used by anatomists and surgeons to lay hold of, and raise up, certain parts, the dissection of which is delicate, or which would slip from the fingers.

The *Tenaculum* is a variety of the Hook.

**HOOK**, BLUNT, *Ich'thya, Ich'thyé, Onyx, Unguis ferreus*. An instrument which is passed over the flexures of the joints to assist in bringing down the fœtus in parturition.

**HOOP TREE**, Melia azedarach.

**HOOPER'S PILLS**, *Pilula Aloes et Myrrhæ*.

**HOOPING-COUGH**, Pertussis—h. Roche's Embrocation for the, see Roche.

**HÔPITAL**, Hospital.

**HOPLOCHRISMA**, from *ὄπλον*, 'a weapon,' and *χρῆσις*, 'salve.' *Unguentum armatorium, Armatory Unguent.* A salve which was supposed to cure wounds by sympathy,—the instrument with which the wound was inflicted being anointed with it.

**HÖPLOMOCH'LION**, *ὄπλομοχλον*, from *ὄπλον*, 'a weapon,' and *μοχλος*, 'a lever.' The name of an iron machine or apparatus, which embraced the whole body like armour. A figure of it is given by Fabricius ab Aquapendente.

**HOP PILLW**, see *Hamulus lupulus*—h. plant, *Hamulus lupulus*.

**HOQUET**, Singultus.

**HORÆA**, Menses.

**HORÆOTES**, Maturity.

**HORDEI MALTUM**, Malt.

**HORDE'OLUM**, diminutive of *Hordeum*, 'Barley.' *Orde'olum, Pod'chia, Sclerophthal'mia, Crithé, Crithid'ion, Crythé, a Styx, a Styxan.* (F.) *Orgelet, Orgeolet.* A small, inflammatory tumour, of the nature of a boil, which exhibits itself near the free edge of the eyelide, particularly near the inner angle of the eye.

**HOR'DEUM**, *Or'deum, Crithé.* The seeds of *Hordeum vulgare*, or *Scotch Barley*, are ranked amongst the *Cerealia*. (F.) *Orge.* They afford a mucilaginous decoction, which is employed as a diluent and antiphlogistic. The seeds of the *Hordeum distichon* and *H. hexastichon* possess similar properties. Barley is freed from its shells in mills; and, at times, is rubbed into small, round grains, somewhat like pearls, when it is called *Hordeum perlatum, Pearl Barley*, (F.) *Orge perlé*, and forms the *Horde sem'ina tun'icis nudata*, of the pharmacopœias,—*Hordeum* (Ph. U. S.)

**HORDEUM CAUSTIUM**, *Veratrum sabadilla*—h. *Galacticum, Oryza*.

**HOREHOUND**, *Marrubium*—h. Black, *Ballota fetida*—h. *Germander-leaved, Eupatorium teucrifolium*—h. *Stinking, Ballota fetida*—h. *Water, Lycopos Virginicus*—h. *Wild, Eupatorium teucrifolium*.

**HORME**, Instinct.

**HORMINUM**, *Salvia horminum*.

**HORMON**, Enormon.

**HORN**, Cornu.

**HORNSEED**, Ergot.

**HORN EXCRESCENCES**, *Lepido'sis, Ichthy'asia cornig'era, Cornua cutanea*, (F.) *Cornes de la peau*. Certain excrescences, which occasionally form on some part of the skin, and resemble in shape, the horns of an animal.

**HORRENTIA**, Horripilation.

**HOR'RIDA CUTIS**, *Goose-skin, Cutis asser'ina*. A state of the skin accompanying the rigor of an intermitent.

**HORRIPILATION**, *Horripilatio, Horror, Horrentia, Phricé, Phricas'mus, Phric'asis, Phr'icia, from horrere, 'to bristle up,' and pilus, 'hair.'* (F.) *Horripilation, Frissonnement.* General chilliness, preceding fever, and accompanied with bristling of the hairs over the body.

**HORROR**, Horripilation—h. *Ciborum, Digestus* for food.

**HORSE BALM**, *Collinsonia Canadensis*.

**HORSE CANE**, *Ambrosia trifida*.

**HORSE CHESTNUT**, *Æsculus hippocastanum*.

**HORSE CRUST**, *Crusta genu equinæ*.

**HORSEFLYWEED**, *Sophora tinctoria*.

**HORSEMINT**, *Ambrosia trifida, Monarda coccinea* and *M. punctata*—h. *Sweet, Cunila mariana*.

**HORSE RADISH**, *Cochlearia armoracia*.

**HORSE'S TAIL**, *Hippuris vulgaris*.

**HORSEWEED**, *Ambrosia trifida, Collinsonia Canadensis*.

**HORTULUS CUPIDINIS**, *Vulva*.

**HORTUS**, *Vulva*—h. *Siccus, Herbarium*.

**HOS'PITAL**, primarily from *hospes*, 'a guest.' *Nosocomium, Adynatocomium, Adynatodochium, Xenodochium, Xenodochium, Infirmary, Infirmarium, Infirmarium, Nosodochium, Valudina'rium*, (F.) *Hôpital.* An establish-

ment for the reception of the sick, in which they are maintained and treated medically. Hospitals were first instituted about the end of the 4th century; a period at which the word *nosocomium* was employed, for the first time, by St. Jerome. They may be *general*, receiving all cases; or *special*, admitting only the subjects of certain diseases.

**HOSPITAL GANGRENE, Phagedæna gangrenosa; Putrid or Malignant Ulcer, Gangræna Nosocomiorum, Hospital Sore, Gangræna contagiosa, Putredo, (F.) Pourriture ou Gangrène d'hôpital.** Gangrene, occurring in wounds or ulcers, in hospitals the air of which has been vitiated by the accumulation of patients, or some other circumstance. Hospital gangrene—many different varieties of which are met with, and always accompanied or preceded by fever—commonly commences with suppression of the suppuration of the wound, which becomes covered with a grayish and tenacious sanies. The gangrene then manifests itself. It extends from the centre of the ulcerated surface towards the edges; these become swollen, painful, and everted; and the patient dies with all the signs of typhus. The treatment must be varied according to circumstances. Sometimes, it requires the use of stimulating, acid, caustic, and antiseptic applications; with, occasionally, the actual cautery, aided by the exhibition of tonics, internally;—at others, the antiphlogistic regimen and emollient application may be necessary.

**HOSTIARIUS, Pylorus.**

**HOT SPRINGS, see Virginia, Mineral Waters of.**

**HOUBLON, Humulus lupulus.**

**HOUGH, Poples.**

**HOUNDS' TONGUE, Cynoglossum.**

**HOPPE NERVEUSE, see Papilla—h. du Menton, Depressor labii inferioris, Levator labii inferioris.**

**HUIT DE CHIFFRE.** Figure of 8. A bandage in which the turns are crossed in the form of the figure 8. Such is the bandage used after bleeding from the arm.

**HUITO, Genipa oblongifolia.**

**HUITTE, Ostrea.**

**HUM, VENOUS, Bruit de diable.**

**HUMBLE, Rectus inferior oculi.**

**HUMECTANTIA.** A name formerly given to drinks, which appeared to possess the property of augmenting the fluidity of the blood.

**HUMERAL, Humeralis.** That which belongs to, or is connected with, the arm or humerus.

**HUMERAL ARTERY, Arteria humeralis, see Brachial artery.**

**HUMÉRO-CUBITAL, Brachialis anterior—h. Sus-mitacarpie, see Radialis—h. Sus-radial, Supinator radii longus.**

**HUMERUS, Scapula, Omos, Armeus, (F.) Epauze.** The most elevated part of the arm. The bones, which concur in forming it, are;—the scapula, head of the humerus and the clavicle, united together by strong ligaments, and covered by numerous muscles.

**HUMÉRUS, Os Humeri, Os brachii, Os adjutorium, Os brachiale, Brachium, Laccrotus,** is the cylindrical, irregular bone of the arm; the upper extremity of which has a hemispherical head connected with the scapula; and two *tuberosities or tubercles, a greater and lesser*, for the attachment of muscles, between which is the *Bicipital groove or Fossa.* At the inferior extremity may be remarked—the *inner condyle, the outer condyle; the small head, which is articulated with the radius; the trochlea articulated with the ulna, &c.* The humerus is developed by seven points of ossification;—one for the body; one for the head; one for the greater tuberosity; one for the trochlea; one for the epitrochlea; one for the epicondyle; and another for the lesser head.

**HUMÉRUS SUPRUS, Acromion.**

**HUMEUR AQUEUSE, Aqueous humour—h. Hyaloïde, Corpus vitreum.**

**HUMEURS FROIDES, Scrofula.**

**HUMIDE RADICALE, Humidum radicale.**

**HUMIDUM NATIVUM, H. radicale—h.**

Nativum Articularum, Synovia—h. Primi-genium, H. radicale.

HUMIDUM RADICALĒ, *Hu'midum primige-nium* seu *Nativum* seu *Seminalē*; *Radical Moistens*, (F.) *Humida radicales*. Names formerly given to the liquid which was conceived to give flexibility and proper consistence to the different organic textures.

HUMIDUM SEMINALE, H. radicale.

HUMILIS, Rectus inferior oculi.

HUMILUS, Humulus lupulus.

HUMOR, Humour—h. Albugineous, Aqueous humour—h. Articularis, Synovia—h. Ceruminous, Cerumen—h. Doridis, Water, sea—h. Genitalis, Sperm—h. Glacialis, Crystalline, Corpus vitreum—h. Hyalinus seu Hyaloides, Corpus vitreum—h. Lacteus, Milk—h. Lachrymalis, Tear—h. Melancholicus, see Mercurialis—h. Mercurialis, see Mercurialis—h. Morgagnianus, Morgagni, humor of—h. Ovatus, Aqueous humour—h. Oviiformis, Aqueous humour—h. Pericardii, see Pericardium—h. Purulentus, Pus—h. Seminalis, Sperm—h. Venerus, Sperm—h. Vitreus, Corpus vitreum.

HUMORAL, *Humoralis*, from *humere*, 'to moisten.' Proceeding from, or connected with, the humours.

HUMORISM, *Hu'moral Pathology*, *Pathologia humoralis*. A medical theory, founded exclusively on the parts which the humours were considered to play in the production of disease. Although traces of this system may be found in the most remote antiquity, the creation, or, at all events, the arrangement of it may be attributed to Galen, who enveloped it in metaphysical subtleties relating to the union between the elements and the four cardinal humours.

HUMORISTS. The Galenical physicians, who attributed all diseases to the depraved state of the humours, or to vicious juices collected in the body.

HUMOUR, *Humor*, *Hygrasia*, *Hygredon*, *Hygrum*. Every fluid substance of an organized body;—as the blood, chyle, lymph, &c. The *Humours*, *χυμοι*, *Chymi*, *Humores*, differ considerably as to number and quality in the different species of organized beings; and even in the same species, according to the state of health or disease. The ancients reduced them to four; which they called *cardinal humours*;—the blood, phlegm, yellow bile, and atrabilis or black bile. A modern classification of the humours is given under Fluid.

HUMP. Perhaps from *umbo*, 'the boss of a buckler;' *Hunch*, *Gibber*, *Gibbus*, *Gibba*, *Tuber*, (F.) *Bosso*. A prominence, formed by a deviation of the bones of the trunk. Commonly, it is formed by the spine or sternum, and is seated at the posterior or anterior part of the trunk. It may, also, be produced by deviation of the ribs or pelvis. The spine may be curved in three principal directions. 1. *Backwards*, the most common case; this the ancients called *σφραξ*, *Cyphosis*, *Gibbositas*. 2. *Forwards*, *κατάσφραξ*, *Lordosis*, *Recurvatio*; and, 3. *Laterally*, *σκολιως*, *Scoliosis*, *Obstipatio*. Most *curvatures* occur at a very early age, and are caused by scrofula, rickets, &c.; and, not unfrequently they are accompanied by caries of the vertebrae. See Vertebral disease.

HUMULUS LUPULUS, *Humulus*, *Convolvulus perennis*; the *Hop-plant*. *Nat. Ord.*

Urticæ. (F.) *Houblon*, *Vigne du nord*. Its cones or strobiles, *Hu'muli strobili* (Ph. L.) *Humulus*, (Ph. U. S.) have a fragrant odour; and a bitter, aromatic taste, depending on a peculiar principle, named *Lupulin*, extractive and essential oil, which may be extracted, equally by water and spirit, from the dried strobiles. The Hop is employed as a tonic and hypnotic, and enters into the composition of ale and beer.

The *Hop pillow*, *Pulv'nar Hu'muli*, has long been used for producing sleep.

HUNCH, Hump.

HUNGARICA FEBRIS, Fever, Hungary.

HUNGER, Anglo-Saxon, *hunser*, *fames*, *Limos*, *Peinē*, *Paina*, *Esuriōs*, *Jaju'nium*, *Jeju'nitas*, *Esuri'tio*, *Esuri'go*, (F.) *Faim*. The necessity for taking food. Hunger is an internal sensation, which some authors have attributed to the friction between the sides of the stomach in its empty state; others to the compression of the nerves, when the organ is contracted; others, to the action of the gastric juice, &c. It is dictated by the wants of the system: farther we know not. See Appetite.

HUNGER-CURE, Limotherapeia.

HUNGRY, *Famelicus*, *Lāmicus*, *Limo'des*: same etymon. Affected with hunger.

HYACINTHUS MUSCARI, *Bulbus vomitorius*.

HYALEUS, Hyaline.

HYALINE, *Hyalinus*, *Hyalosus*, *Vitreus*, *Vitreous*. Glassy.

HYALINE SUBSTANCE, *Cytoplastema*.

HYALITIS, *Inflammatio tunica hyaloides*: from *Hyaloid* and *itis*, denoting inflammation: Inflammation of the hyaloid membrane of the eye.

HYALOID, *Hyalosus*, *Hyaloides*, from *υαλες*, 'glass,' and *ιδος*, 'resemblance.' Vitri-form; resembling glass.

HYALOID CANAL, see Hyaloid membrane.

HYALOID FOSSA, *Fossa Hyaloides*, is a cup-like excavation in the vitreous humour, in which the crystalline is imbedded.

HYALOID MEMBRANE, *Tunica Hyaloides*, *Membra'na Arachnoï'dea*, *T. vitrea*, is the extremely delicate membrane, which forms the exterior covering of the vitreous humour, and transmits within it prolongations, which divide it into cells. Fallopius discovered this membrane, and gave it the name *Hyaloid*. On a level with the entrance of the optic nerve into the eye, the hyaloid membrane has been described as forming, by reflection, a cylindrical canal, which pierces the vitreous humour from behind to before, as far as the posterior part of the crystalline. See Canal, hyaloid.

HYALONIXIS, see Cataract.

HYALONYXIS, see Cataract.

HYALOS, Vitrum.

HYANCHE, *Cynanche tonsillaris*.

HYBOMA, *Gibbositas*.

HYBRID, (F.) *Hybride*, from the Greek, *υβρις*, *υβριδος*, 'mongrel.' A being born of two different species,—as the mule. The term is applied to plants as well as to animals. It is often also used to designate words which are formed from two different languages,—as *uteritis*, for inflammation of the uterus, in place of *metritis*.

HYDARTHROSIS, *Hydrarthrus*.

HYDARTHURUS, *Hydrarthrus*.

**HYDATID**, *Hy'datis*, *Bulla*, *Aqu'ula*, *Hydro'a*, *Hydrocystis*, *Hygrocystis*, *Tania hydatig'ena*, *Echinococcus humanus*, from 'υδα, 'water.' This name was long given to every encysted tumour which contained an aqueous and transparent fluid. Many pathologists, subsequently, applied it to vesicles, softer than the tissue of membranes, more or less transparent, which are developed within organs, but without adhering to their tissue. It is by no means clear, that these formations are really entozoa. They have been found in various parts of the body; sometimes in the uterus, occasioning signs nearly similar to those of pregnancy, but being sooner or later expelled. The expulsion is generally attended with more or less hemorrhage. See *Acephalocystis*.

*Hydatis*, *Aqu'ula*, *Phlyctæ'nula*, *Verruca Palpebrarum*, *Milium*, also, meant small, transparent tumours of the eyelids.—Galen, C. Hofmann.

**HYDATIDES CERVICIS UTERI**, Nabothi glandule.

**HYDATIDOCELE**, *Hydatoc'ele*, from 'υδατις, 'hydatid,' and κηλη, 'a tumour.' Oscheocele containing hydatids; the *Oscheoc'ele hydatido'na*, *Hydatidoscheoc'ele* of Sauvages.

**HYDATIDOIDES**, Hydatoid.

**HYDATIDOMA**, from 'υδατις, 'hydatid.' A tumour caused by hydatids.

**HYDATIDOSCHEOCELE**, Hydatidocele.

**HYDATINUS**, Hydatoid.

**HYDATIS FINNA**, *Cysticercus cellulose*.

**HYDATISMUS**, from 'υδα, 'water.' The noise caused by the fluctuation of pus contained in an abscess.—Aurelian, Foësius.

**HYDATOCELE**, Hydatidocele, Hydrocele.

**HYDATOCH'OLOS**, from 'υδα, 'water,' and χολη, 'bile.' *Aquoso-bilius*. An epithet given to evacuated matters when mixed with water and bile.—Hippocrates, Foësius.

**HYDATODES**, Aqueous.

**HYDATOID**, *Hydatoid'as*, *A'queous*, *Aqu'ous*, *Hydat'as*, *Hydat'imus*, *Hydatido'as*, *Hydatido'as*, from 'υδα, 'water,' and υδα, 'resemblance.' Watery. Resembling water. This name has been given to the membrane of the aqueous humour; and, also, to the aqueous humour itself. *Vinum hydatoid'as*; wine and water.

**HYDATONCUS**, Anasarca, Oedema.

**HYDATOP'OSIA**, from 'υδα, 'water,' and ποσις, 'drinking.' Water-drinking;—hence

**HYDATOP'OTES**, A water-drinker.

**HYDERICUS**, Hydropic.

**HYDERODES**, Hydropic.

**HYDERONCUS**, Anasarca, Oedema.

**HYDEROS**, Anasarca, Hydrops.

**HYDOR**, 'υδα, and *Hydas*, 'υδα, 'genitive,' 'υδατος, 'water.' Hence:

**HYDRACHNIS**, see *Varicella*.

**HYDRADEN**, Conglobate gland.

**HYDRADENITIS**, *Inflammat'io glandularum lymphaticarum*, from *Hydraden*, 'a lymphatic gland,' and *itis*, denoting inflammation. Inflammation of a lymphatic gland.

**HYDRÆ'DUS**, from 'υδα, 'water,' and υδρα, 'genital organs.' Oedema of the female organs.

**HYDRÆMIA**, Hydroæmia.

**HYDRAGOGA**, Hydragogues.

**HYDRAGOGIA**, Hydragogues.

**HYDRAGOGICA**, Hydragogues.

**HYDRAGOGUES**, *Hydragoga*, *Hydragog'ia*, *Hydragog'ica*, *Hydrop'ica*, *Hydro'ica*, *Aquid'ua*, from 'υδα, 'water,' and αγω, 'I expel.' Medicines, believed to be capable of expelling serum effused into any part of the body. These are generally cathartics or diuretics.

**HYDRAGOGUM BOYLEI**, Argenti nitras.

**HYDRALLANTE**, False Waters.

**HYDRAMNIOS** from 'υδα, 'water,' and 'αμνιος.' An excessive quantity of the liquor amnii.

**HYDRANGEITIS**, Angeiolecucitis.

**HYDRANGIA**, Lymphatic vessels.

**HYDRANGIOGRAPHIA**, Angeiohydrography.

**HYDRANGIOTOMIA**, Angeiohydrotomy.

**HYDRARGYRANATRIP'SIS**, *Hydragyrentrip'sis*, from 'υδραργυρος, 'quicksilver,' and τριψις, 'rubbing in.' The rubbing in of a preparation of quicksilver:—*Hydragyrotrip'sis*.

**HYDRARGYRENTRIPSIS**, Hydragyranatrispsis.

**HYDRARGYRI ACETAS**, Hydragyrum acetatus—h. Bichloridum, H. oxycurias—h. Bicyanidum, H. cyanuretum—h. Binioididum, H. ioididum rubrum—h. Binoxidum, H. oxydum rubrum—h. Bisulphuretum, H. sulphuretum rubrum—h. Borussias, H. cyanuretum—h. Bromidum, see Bromine—h. Calx alba, Hydragyrum precipitatum—h. Chloridum, H. submurias—h. Chloridum corrosivum, H. oxycurias—h. Chloridum mite, H. submurias.

**HYDRÆGYRI CYANURETUM**, H. *Borussias*, H. *Bicyanidum*, *Hydragyrum Cyanogenatum*, H. *Hydrocyan'icum*, *Prussias Hydragyri*, *Cyanuret* or *Prussiate of Mercury*, (F.) *Cyanure de Mercure* (*Ferri Ferro-cyanuret*). ℥iv; *Hydrag. oxid. rubr.* ℥iij, vel q. s.; *Aque destillat.* Oij. Put the ferro-cyanuret and three ounces of the oxide of mercury, previously powdered and thoroughly mixed together, into a glass vessel, and pour on two pints of the distilled water. Boil the mixture, stirring constantly; and if, at the end of half an hour, the blue colour remains, add small portions of the oxide of mercury, continuing the ebullition until the mixture becomes of a yellowish colour; then filter through paper. Wash the residue in a pint of the distilled water, and filter. Mix the solution and evaporate till a pellicle appears, and set the liquor aside, that crystals may form. To purify the crystals, subject it to re-solution, evaporation, and crystallization.—Ph. U. S.) This preparation has been strongly recommended as a powerful antisiphilitic, and is admitted into the Parisian codex. Twelve to twenty-four grains may be dissolved in a quart of distilled water, and three or four spoonfuls of the solution be taken daily, in a glass of any appropriate liquid.

**HYDRARGYRI DEUTO-IODURETUM**, see Iodine

—h. Hyperoxodes, Hydragyri nitrico-oxydum.

**HYDRARGYRI IODIDUM**, *Iodide* or *Protiodide of Mercury*, (F.) *Protiodure de Mercure*, (*Hydrag. ℥j, Iodin. ℥v, Alcohol* q. s. Rub the Mercury and Iodine together, adding sufficient alcohol to form a soft paste, and continue the trituration till the globules disappear. Dry the Iodide in the dark, with a gentle heat, and keep it in a well stopped bottle, the light excluded.—Ph. U. S.) For properties and doses, see Iodine.

**HYDRARGYRI IODIDUM RUBRUM**, H. *Bimied'*

*idum, Red Iodide, Bism'iodide, Denti'iodide and Peri'iodide of Mercury, (F.) Dent'iodure de Mercure. (Hydrarg. corros. chlorid. ʒj; Potassii Iodid. ʒx, aqua destillat. Oij. Dissolve the chloride in a pint and a half, and the iodide of potassium in half a pint of distilled water, and mix the solutions. Collect the precipitate on a filter, and having washed it with distilled water, dry it with a moderate heat, and keep it in a well stopped bottle.—Ph. U. S.)* For properties and doses, see Iodine.

**HYDRARGYRI MURIAS BASI OXYDI IMPERFECTI, H. oxyurias**—h. *Murias corrosivum, H. oxyurias*—h. *Murias dulcis sublimatus, H. submuriat*—h. *Oxygenatus, H. Oxyurias*—h. *Murias spirituosus liquidus, Liquor hydrargyri oxyuriatis*—h. *Murias suboxygenatus* præcipitatione paratus, *Hydrargyrum precipitatum.*

**HYDRARGYRI NITRAS, Nitrus Hydrargyri in crystallos conortus, Nitrates of Mercury.** It is employed in syphilis; and, externally, in fungous, obstinate ulcers.

It is used in the formation of the *Soluble Mercury* of Hahnemann.

*Ward's White Drops,*—a once celebrated, antiscorbutic nostrum,—were prepared by dissolving mercury in nitric acid, and adding a solution of carbonate of ammonia; or, frequently, they consisted of a solution of sublimated with carbonate of ammonia.

**HYDRARGYRI NITRICO-OXYDUM, Hydrargyrus nitratus ruber, Mercurius corrosivus ruber, Mercurius precipitatus corrosivus, M. præcipitatus ruber, Arcænum corallinum, Mercurius corallinus, Pulvis prin'cipis, Præcipitatus ruber, Oxydum hydrargyri completum, O. hydrargyricum, Panacea mercurii rubra, Pulvis Joan'nis de Vigo, Oxydes hydrargyri rubrum, Hyperoxid des hydrargyri, Oxydum hydrargyri nitricum, Oxydum hydrargyri rubrum per ac'idum nitricum, Hydrargyri oxydum rubrum, (Ph. U. S.) Nitric oxide of mercury, Red precipitate, (F.) Oxide nitrique de mercure. (Hydrarg. ʒxxxvj; Acid. nitric. f. ʒxiv; Aqua Oij. Dissolve the mercury, with a gentle heat, in the acid and water previously mixed, and evaporate to dryness. Rub into powder, and heat in a very shallow vessel till red vapours cease to rise.—Ph. U. S.) It is a stimulant and escharotic, and used as such in foul ulcers, being sprinkled on the part in fine powder, or united with lard into an ointment.**

**HYDRARGYRI OXIDES RUBRUM, Hydrargyri nitrico-oxydum**—h. *Oxydi muriæ ammoniacalis Hydrargyrum precipitatum*—h. *Oxydulum nigrum, H. Oxydum cinereum.*

**HYDRARGYRI OXYDUM CINEREUM, Oxydum hydrargyri nigrum, Ethiops per se, Mercurius niger Moscati, Oxydum hydrargyrosum, Oxydum hydrargyricum precipitatum, Oxydulum hydrargyri nigrum, Pulvis mercurialis cinereus, Mercurius cinereus, Turpethum nigrum, Mercurius precipitatus niger, Gray or black oxide of Mercury, (F.) Oxide de mercure cendré, Oxide gris ou noir de mercure, Protoxide de mercure.** This oxide is made in various ways. It may be formed by boiling submuriate of mercury in lime water. The dose of this *Pulvis Hydrargyri cinereus* is from two to ten grains. There are four other preparations of it in estimation, viz:—*Plenk's solution*, made by rubbing mercury with mucilage. ʒ. By rubbing equal parts of sugar and mercury

together. 3. A compound of honey or liquorice and purified mercury. 4. The blue pill and ointment. All these possess the usual properties of mercury.

The *Hydrargyri Oxydum Nigrum* of the Ph. U. S. is made as follows:—*Hydrarg. Chlorid. mit., Potassæ ʒā, ʒiv, Aqua Oj.* Dissolve the Potassa in the water, allow the dregs to subside, and pour off the clear solution. To this add the chloride, and stir constantly till the black oxide is formed. Pour off the supernatant liquor, wash the black oxide with distilled water, and dry with a gentle heat.

The *Mercurius solubilis* of Hahnemann is formed from a black oxide of Mercury. It is the *Mercurius solubilis Hahnemann'si seu oxydum hydrargyri nigri medicante ammo'niæ ex protonitrate hydrargyri precipitatum.* It is used in the same cases as the *Hydrargyri oxydum cinereum.*

**HYDRARGYRI OXYDUM NIGRUM H. oxydum cinereum**—h. *Oxydum nigrum mediante ammoniæ et protonitrate hydrargyri precipitatum,* see *H. oxydum cinereum*—h. *Oxydum nitricum, Hydrargyri nitrico-oxydum.*

**HYDRARGYRI OXYDUM RUBRUM, H. Binætydum, Mercurius calcinatus, Hydrargyrus Calcinatus, (F.) Oxide de mercure rouge, Red oxide of mercury.** (Made by precipitation from a solution of bichloride of mercury by solution of potassa.)

It is stimulant and escharotic; and, in large doses emetic. Owing to the violence of its operation it is seldom given internally.

**HYDRARGYRI OXYDUM RUBRUM PER ACIDUM NITRICUM, Hydrargyri nitrico-oxydum**—h. *Oxydum saccharatum, Hydrargyrum saccharatum*—h. *Oxydum sulphuricum, Hydrargyrum vitriolatum.*

**HYDRARGYRI OXYMURIAS, H. Chloridum Corrosivum, H. Bichloridum, (Ph. U. S.) Hydrargyrus muriatus, Muriæ hydrargyri corrosivus, Muriæ hydrargyri oxygenatus, Sublimatus corrosivus, Mercurius corrosivus, Mercurius corrosivus sublimatus, Hydrargyri permuriæ, Supermuriæ hydrargyri, Muriæ hydrargyri basi oxydi imperfecti, Muriæ hydrargyri corrosivum, (F.) Dentochlorure de mercure, Bichloride de mercure, Muriate oxygéné de Mercure, Sublimé corrosif; Bichloride of mercury, Oxymuriate of mercury, Corrosive sublimate, Corrosive muriate of mercury. (Hydrarg. ʒiij. Acid. Sulphur. ʒiij. Sodii Chlorid. ʒiiss. Boil the mercury with the sulphuric acid until the sulphate of mercury is left dry. Rub this, when cold, with the chloride of sodium, in an earthenware mortar; then sublimate with a gradually increasing heat.—Ph. U. S.) It is used as an antisyphilitic stimulant in venereal complaints; old cutaneous affections, &c. Gr. iij to Oj of water is a good gargle in venereal sore throats, or an injection in gonorrhœa. Externally, it is applied in cases of tetter, and to destroy fungus, or stimulate old ulcers. Dose, gr. 1-16 to gr. 1-8 in pill, once in twenty-four hours. White of egg is the best antidote to it, when taken in an overdose.**

**HYDRARGYRI PERMURIAS, Hydrargyri oxyurias**—h. *Proto-ioduretum,* see *Iodine*—h. *Proto-tartras, H. tartras*—h. *Prussias, H. cyanuretum*—h. *Saccharum vermifugum, Hydrargyrum saccharatum.*

**HYDRARGYRI SUBMURIAS, H. Chloridum,**

*H. Chloridum mitis, Calom'elas, Calom'ei, Hydrar'gyrum auriat'icum mitis, C. Torqueti, Draco mirig'atus, Submur'rias hydrargyri mitis, Submur'rias Hydrargyri sublimat'um, Mercurius dulcis, M. dulcis sublimat'us;*—when precipitated, *M. dulcis precipitat'us*.—*Panacea Mercurialis* (when nine times sublimed,) *Murias hydrargyri dulcis sublimat'us, Mercurius sublimatus dulcis, Mercurius Zo'ticus Hartmanni, Aquila, Manna Metallo'rum, Panachymago'gum minera'le, P. Querceta'nus, mild Chloride of Mercury, Cal'omel, (F.) Mercure doux, Protochlorure de mercure.* Mild chloride of Mercury is thus directed to be prepared in the Pharmacopœia of the United States. *Mercury, Biv; Sulphuric Acid, Biiij; Chloride of Sodium, Biss; Distilled water,* a sufficient quantity. Boil two pounds of the mercury with the sulphuric acid, until the sulphate of mercury is left dry. Rub this, when cold, with the remainder of the mercury, in an earthenware mortar, until they are thoroughly mixed. Then add the chloride of sodium, and rub it with the other ingredients till all the globules disappear: afterwards sublime. Reduce the sublimed matter to a very fine powder, and wash it frequently with boiling distilled water, till the washings afford no precipitate upon the addition of liquid ammonia; then dry it. *Properties.* Antisyphilitic and sialagogue; in large doses, purgative. *Dose,* one or two grains given at night gradually excite ptyalism. Gr. v to xx, purge. Children bear larger doses than adults.

The BLACK WASH, *Lo'tio Hydrar'gyri nigra,* is formed of *calomel, ℥ij, Lime water, Oj.* Used for syphilitic sores.

HYDRARGYRI SUBMURIAS AMMONIATUM, Hydrargyrum precipitatum—h. Subsulphas flavus, Hydrargyrus vitriolatus—h. Subsulphas peroxidati, Hydrargyrus vitriolatus—h. Sulphas, Hydrargyrus vitriolatus, H. S. flavus, Hydrargyrus vitriolatus.

HYDRARGYRI SULPHURE'TUM NIGRUM, *H. sulphure'tum cum sulphure, Hydrargyrus vel mercurius cum sulphure, Æthiops minera'lis, Hydrargyrus e sulphure, Pulvis hypnot'icus, Æthiops narcot'icus, (F.) Sulfure de mercure noir, Black sulphuret of mercury, Sulphuret of mercury with sulphur, Æthiops mineral. (Hydrarg., Sulphur aa ℞j.* Rub together till the globules disappear.) Used chiefly in scrofulous and cutaneous affections. *Dose,* gr. x. to ℥ss.

HYDRARGYRI SULPHURE'TUM RUBRUM, *H. Bisulphure'tum, Hydrargyrus sulphura'tus ruber, Min'ium purum, Minium Græco'rum, Magnas Epilep'siæ, Ammon, Purpuris'rum, Cinnab'aris, Mercurius Cinnabari'nus, Cinab'aris, Cinab'arium, Bisulphuret or Red Sulphuret of Mercury, Cin'nabar, Vermilion, (F.) Sulfure de Mercure rouge, Cinabre. (Hydrarg. ℥xi; Sulphur, ℥viii.* Mix the mercury with the sulphur melted over the fire; and as soon as the mass begins to swell remove the vessel from the fire, and cover it with considerable force to prevent combustion. Rub the mass into powder and sublime. Ph. U. S.)

It is an antisyphilitic, but is chiefly used in fumigation against venereal ulcers of the nose, mouth and throat;—℥ss being thrown on a red-hot iron. This preparation is the basis of a nostrum, called *Boerhaave's Red Pill.*

HYDRARGYRI SUPERMURIAS, H. oxymurias.

HYDRARGYRI TARTRAS, *H. Proto-tartras, Tartrate of mercury.* Antisyphilitic. *Dose,* one or two grains twice a day.

HYDRARGYRI ET ARSENIOL IODIDUM, Arsenic and Mercury, iodide of.

HYDRARGYRI ET QUIN'LE PROTO-CHLO'RIDUM, *Protochloride of Mercury and Quinia.* A combination of mild chloride of mercury and quinia, lately administered in obstinate cutaneous diseases.

HYDRARGYRIA, Eczema mercuriale.

HYDRARGYRI'ASIS, *Hydrargyri'asis, Mercurialis'mus,* from *υδραργυρος,* 'mercury.' A disease induced by the use of mercury; *Morbus Mercurialis.* Poisoning by mercury. Eczema mercuriale.

HYDRARGYRICUM, Mercurial.

HYDRARGYRIUM, Mercurial.

HYDRARGYROSIS, Eczema mercuriale, Hydrargyriasis.

HYDRARGYRO-STOMATITIS, see Salivation, mercurial, and Stomatitis, mercurial.

HYDRARGYROTRIPSIS, Hydrargyranatripsis.

HYDRAR'GYRUM, *Hydrargyrus,* from *υδαρ,* 'water,' and *αργυρος,* 'silver;' *Mercurius, Argentum vivum, A. nobilit, A. fuscum, A. fugitivum, A. liquidum, Missadan, Fumus albus, Arca arseno'rum, Da'dalus, Mater metallo'rum, Mercury, Quicksilver, (F.) Mercure, M. cru, Vif Argent.* A fluid, brilliant metal; of a slightly bluish white colour; fluid above—39° of Fahr. and under 656°. S. g., when liquid, 13.568 (Cavendish); easily oxydized. Metallic quicksilver does not act on the body, even when taken into the stomach. When oxydized and combined with acids, it acts powerfully. It has been exhibited in cases of constriction of the bowels and in intussusception, from a notion that it must certainly pass through the bowels by its gravity. The water, in which mercury has been boiled, has been recommended as a vermifuge; but it probably enjoys no such property, as chemical tests do not exhibit the presence of the metal. When the crude metal is distilled in an iron retort, it forms the *Hydrar'gyrum purificat'um.*

HYDRARGYRUM AMMONIATO-MURIATICUM, H. precipitatum—h. Cyanogenatum, Hydrargyri cyanuretum.

HYDRARGYRUM CUM CRETA (Ph. U. S.), *Hydrargyrus cum creta, Mercurius alkalisat'us, Mercury with chalk, (F.) Mercure avec la craie, Æthiops alkalisat'us. (Hydrarg. ℥iiij; Creta preparat. ℥v.* Rub them together till the globules disappear. Ph. U. S.) A protoxide of mercury, formed by trituration with carbonate of lime. It is somewhat uncertain; and consequently not much employed as a mercurial. It possesses the properties of the black oxide of mercury, and may be advantageously exhibited in cases of diarrhœa in children, dependent upon acidity and vitiated secretions. *Dose,* gr. v to ℥ss, twice a day, in any viscid substance.

HYDRARGYRUM CUM MAGNE'SIA of the Dublin Pharmacopœia resembles it in properties.

HYDRARGYRUM HYDROCYANICUM, Hydrargyri cyanuretum—h. Iodatum, see Iodine—h. Iodatum flavum, see Iodine—h. Iodatum rubrum, see Iodine—h. Iodidatum, see Iodine—h. Muriaticum Mite, Hydrargyri submuriarum—h. Periodatum, see Iodine.

HYDRARGYRUM PRECIPITA'TUM, H. ammo-

*nia'tum.* (Ph. U. S.) *Hydrargyrum ammoniacomuriaticum, Hydrargyri ammo'nio-chloridum, Mercurius cosmeticus, Mercurius ozidi hydrargyri ammoniacalis, Submuriat ammoniacohydrargyricus, Calx Hydrargyri alba, Submuriat Hydrargyri ammoniatum, S. H. Precipitatum, Muriat hydrargyri sub-oxygenatus precipitatio'nt parat'us, Precipitatum album, Ammo'nio-chloride of Mercury, White precipitate of Mercury, White precipitate, Calcinatum majus Poterri,* (F.) *Sous-muriat de mercure précipité ou Précipité blanc.* (*Hydrarg. chlorid. corros. ʒvj, aquæ destillat. cong., Liguor ammoniac f. ʒviij.*) Dissolve the chloride in the water, with the aid of heat, and to the solution, when cold, add the solution of ammonia, frequently stirring. Wash the precipitate till it is tasteless, and dry it.—Ph. U. S.)

A peroxide, combined with muriatic acid and ammonia, forming a triple salt. It is used in powder, to destroy vermin; and, united with lard, for the same purpose, as well as in scabies and some other cutaneous affections.

**HYDRARGYRUM SACCHARATUM,** *Æthiops saccharatus, Mercurius saccharatus, Ox'idum hydrargyri saccharatum, Saccharum hydrargyri vermifugum.* A mild mercurial formula in several of the Pharmacopœias of continental Europe; formed by triturating one part of mercury with two of white sugar. It is used in the venereal affections of children.

**HYDRARGYRUS, Hydrargyrum.**

**HYDRARGYRUS ACETATUS,** *Sperma mercu'rii, Terra foliata mercurii, Morcurius acetatus, Hydrargyri Acetas, Acetas vel Proto-acetas Hydrargyri, Ad'etate of mercury.* This was the basis of *Keyser's pills*, and was once much celebrated in the cure of the venereal disease. The dose is from three to five grains, but it is not much used.

The formula for *Keyser's anti-venereal pills* was as follows: *Hydrarg. Acet. ʒiv, Manna ʒxxx, Amyl. ʒij, Muc. G. Trag. q. s.* into pills of gr. vj. each. Dose, two pills.

**HYDRARGYRUS CALCINATUS,** *Hydrargyri oxidum rubrum—h. cum Cretâ, Hydrargyrum cum cretâ—h. Muriatis, Hydrargyri oxymurias—h. Nitratus ruber, Hydrargyri nitrico-oxidum.*

**HYDRARGYRUS PHOSPHORATUS, Phosphuret'ed mercury.** This preparation has been recommended in cases of inveterate venereal ulcers, but is now scarcely used.

**HYDRARGYRUS SULPHURATUS RUBER,** *Hydrargyri sulphuretum rubrum—h. cum Sulphure, Hydrargyri sulphuretum nigrum—h. e Sulphure, Hydrargyri sulphuretum nigrum.*

**HYDRARGYRUS VITRIOLATUS,** *Turpe'thum minorale, Mercurius emat'icus flavus, Calx mercu'rii vitriolata, Mercurius caust'icus flavus, M. lu'teus, Hydrargyri sulphas, H. S. flavus* (Ph. U. S.), *Subsulphas Hydrargyri flavus, Oxidum hydrargyri sulphur'icum, Subsulphas hydrargyri peroxidati, Turbith min'erol,* (F.) *Sous-sulfate de mercure ou turbith min'eral.* (*Hydrarg. ʒiv, Acid. Sulph. ʒvj.*) Mix in a glass vessel and boil in a sand bath till a dry white mass remains. Rub this into powder, and throw it into boiling water. Pour off the liquor, and wash the yellow precipitated powder repeatedly with hot water; then dry it—Ph. U. S.) Two grains of this mercurial act on the stomach violently. It is sometimes recommended as an errhine in amaurosis.

**HYDRARTHRON, Hydrarthrus.**

**HYDRARTHROS, Hydrarthros.**

**HYDRARTHROSIS, Hydrarthros.**

**HYDRARTHROS, Hydrarthros, Hydrarthrus synovialis, Hydrops articulo'rum, Hydrarthron, Hydrarthros Melice'ria, Spina ventosa** of Rhazes and Avicenna, *Arthri'tis Hydrarthros, Hydrarthrosis, Hydrarthrosis, Emmy'rium articula're, Tumor albus;—White swelling;* from 'ὕδωρ, 'water,' and ἀρθρον, 'a joint.' (F.) *Tumeur blanche, T. lymphatique des articulations.* The French surgeons apply the term *Hydrarthros* to dropsy of the articulations. White swelling is an extremely formidable disease. It may attack any one of the joints; but is most commonly met with in the knee, the haunch, the foot, the elbow, and generally occurs in scrofulous children. It consists, at times, in tumefaction, and softening of the soft parts and ligaments, which surround the joints; at others, in swelling and caries of the articular extremities of bones; or both these states may exist at the same time. The treatment consists in the employment of counter-irritants; the use of iodine internally and externally, &c. Also, Synovia.

**HYDRAS'PIS EXPAN'SA,** *Great freshwater Tortoise.* On the sandy banks of rivers in Peru this animal buries its eggs, from which the Indians extract oil. Its flesh supplies well flavoured food.—Tachudi.

**HYDRASTIS, H. Canadensis.**

**HYDRAS'TIS CANADENSIS, Hydrastis, Warner'ra Canadensis, Hydrophyllum verum, Yellow Root, Orange Root, Yellow Puccoon, Ground Raspberry, Yellow Paint, Golden Seal, Indian paint, Eyebalm.** It is used in Kentucky as a "mouth water," and as an outward application in wounds and local inflammations.

**HYDRELÆ'ON, Hydrolæum,** from 'ὕδωρ, 'water,' and ελαιον, 'oil.' A mixture of water and oil.

**HYDRELYTRON,** see Hydrocele.

**HYDREMA, Œdema.**

**HYDRENCEPHALITIS, Hydrocephalus internus.**

**HYDRENCEPHALIUM, Hydrocephalus internus.**

**HYDRENCEPHALOCÈLÈ, Hydrocephalocèlè,** from 'ὕδωρ, 'water,' κεφαλαίος, 'the encephalon,' and κληη, 'rupture, protrusion.' A monstrosity in which there is a fissure of the cranium, the integument of the head being present, and forming a hernial sac in which the brain lies outside the skull—the sac containing a large quantity of serous fluid. Also, Hydrocephalus chronicus.

**HYDRENCEPH'ALOID,** from 'ὕδωρ, 'water,' ενκεφαλαίος, 'the brain,' and ἰδιος, 'resemblance.' Resembling hydrocephalus. *Hydrocephaloid disease, Spurious hydrocephalus, Pseudo-encephalitis.* Disorders of the bowels, and exhaustion in children, are at times attended with hydrocephaloid symptoms.

**HYDRENCEPHALUS, Hydrocephalus internus.**

**HYDRENTEROCE'LÈ,** from 'ὕδωρ, 'water,' εντερον, 'intestine,' and κληη, 'a tumour.' Intestinal hernia, the sac of which encloses fluid.

**HYDRENTEROMPHALOCÈLÈ, Hydrenteromphalus,** from 'ὕδωρ, 'water,' εντερον, 'intestine,' ομφαλός, 'umbilicus,' and κληη, 'rupture.' Umbilical hernia with intestine and water in the sac.

**HYDRENTEROMPHALUS**, *Hydrenteromphalocèle*.

**HYDREPIGASTRIUM**, see *Ascites*.

**HYDREPIPOCE'LE**, from *ὑδρῶς*, 'water,' *ἐπιπλοῦν*, 'omentum,' and *ῥαγή*, 'rupture.' **Omental hernia**, with water in the sac.

**HYDREPILOM PHALUS**, *Hydropip'omphalocèle*, from *ὑδρῶς*, 'water,' *ἐπιπλοῦν*, 'omentum,' and *ομφαλός*, 'umbilicus.' **Umbilical hernia**, with omentum and water in the sac.

**HYDRETRUM**, *Ascites*.

**HYDRIASIS**, *Hydrosudotherapeia*.

**HYDRIATER**, see *Hydropathic*.

**HYDRIATRIA**, *Hydrosudotherapeia*.

**HYDRIATRICA ARS**, *Hydrosudotherapeia*.

**HYDRIATRICUS**, see *Hydropathic*.

**HYDRIATRUS**, see *Hydropathic*.

**HYDRIODAS KALICUS**, see *Potassa hydriodas*.

**HYDRIODIC ACID**, see *Acid, hydriodic*.

**HYDRO'A**, *Hidro'a*, *Aqu'ula*, *Boa*, *Planta scotis*, from *ὑδρῶς*, 'water.' An affection, which consists in an accumulation of water or serous fluid under the epidermis. Some have used *hidro'a* synonymously with *sudamina*; others with *pemphigus*. In the first case, it has generally, however, been written *hidro'a*, from *ἵδρω*, 'sweat,' and in the latter *hidro'a*. See *Hydatid*.

**HYDROÆMIA**, *Hydræmia*; from *ὑδρῶς*, 'water,' and *αἷμα*, 'blood.' **Anæmia**. The state of the blood in which the watery constituents are in excess.

**HYDROAËROPLEURIE**, *Hydropneumothorax*.

**HYDROÁRION**, *Hydroöph'oron*, *Hydroö'rionum*, *Hydroöva'rionum*, *Hy'drops ova'rii*, *Ascites ovarii*, *A. sacca'tus*, (F.) *Hydropisis de l'ovaire*, from *ὑδρῶς*, 'water,' and *ωαριον*, 'ovarium.' **Dropsy of the ovary**.

**HYDROATA**, *Sudamina*.

**HYDROBLEPH'ARON**, *Hy'drops Pal'pebræ*, *Blepharadæ'ma aquo'sum*, *Edæ'ma palpebrarum*. An œdema or watery swelling of the eyelids; from *ὑδρῶς*, 'water,' and *βλεφαρον*, 'eyelid.'

**HYDROCARDIA**, *Hydropericardium*, see *Pericardium*.

**HYDROCATARRHOPHE'SIS**, *Hydrocatarrhoph'ia*, from *ὑδρῶς*, 'water,' and *καταρροῖν*, 'to sip up.' Absorption of water from without.

**HYDROCE'LE**, *Hydrops Scroti*, *H. testiculor'um*, *Hydroscotocèle*, *Hydatocèle*, *Hydrosc'ærum*, *Hydror'chis*, *Hydrosc'hionis*, (Alibert.) from *ὑδρῶς*, 'water,' and *κύλη*, 'a tumour.' A collection of serous fluid in the cellular texture of the scrotum or in some of the coverings, either of the testicle or spermatic cord. To the first of these varieties the names—*External Hydrocèle*, *H. adematodes*, (F.) *H. par infiltration* have been given; and to the second, those of *Hydrocèle interna*, *H. tunicæ vaginalis testis*, *Hydr'ytrom*, (F.) *H. par épanchement*. When the collection occurs in the envelope of the testicle, it is called *H. of the tunica vaginalis*; and the epithet *congenitalis* is added, when the interior of the membrane, in which it is situated, still communicates freely with the cavity of the abdomen. When it exists in the spermatic cord, it is called *encysted*, or *diffused Hydrocèle of the spermatic cord*, as the case may be. The tumour of the distended scrotum is

oblong: greater below than above; indolent and semi-transparent. When it becomes inconveniently large, the fluid may be evacuated by puncturing with a trocar, but, as the fluid collects again, this operation can only be considered palliative. The radical cure consists, usually, in injecting, through the canula of the trocar, which has been left in, after puncturing, some irritating liquid, as wine. This is kept in the tunica vaginalis for a few minutes, and then withdrawn. The coat inflames; adhesion takes place, and the cavity is obliterated.

**HYDROCELE PERITONÆI**, *Ascites*—*h. Spinalis*, *Hydrocrachis*.

**HYDROCENO'SIS**, from *ὑδρῶς*, 'water,' and *κένωσις*, 'evacuation.' The evacuation of water morbidly accumulated in the body.

**HYDROCEPHALE**, *Hydrocephalus*.

**HYDROCEPHALE AIGUË**, *Hydrocephalus internus*.

**HYDROCEPHALITIS**, *Hydrocephalus internus*.

**HYDROCEPHALUM**, *Hydrocephalus*.

**HYDROCEPHALOCÈLE**, *Hydrencephalocèle*.

**HYDROCEPHALOËCTASIE**, *Hydrocephalus chronicus*.

**HYDROCEPH'ALUS**, *Hydroceph'alum*, *Hydrocra'nia*, *Hydrocra'nium*, *Hydroceph'alium*, *Hydroceph'ale*, *Hydrops Cap'itis*, *H. Cer'ebr'i*, from *ὑδρῶς*, 'water,' and *κεφαλή*, 'the head.' *Water in the head*, *Dropsy of the head*, *Dropsy of the brain*. A collection of water within the head. It may be *internal* or *external*.

**HYDROCEPHALUS ACUTUS**, *H. internus*—*h. Acutus senum*, *Apoplexy*, *serous*—*h. Externus*, *H. chronicus*—*h. Meningeus*, *H. internus*.

**HYDROCEPHALUS CHRON'ICUS**, *Hydrencephalocèle*, *Hydrops Cap'itis*, *Hydrocephalus externus*, (F.) *Hydroceph'ale*, *Hydrocephaloëctasie*, of some, commonly commences at an early period of existence, and the accumulation of fluid gradually produces distension of the brain, and of the skull, with separation of the sutures. It commonly proves fatal before puberty.

**HYDROCEPHALUS EXTERNUS**, (*Edæ'ma cap'itis*, *Cephaladæ'ma*, of some is a mere infiltration into the subcutaneous cellular tissue of the cranium.

**HYDROCEPHALUS INTER'NUS**, *Hydroceph'alus acutus*, *H. meningeus*, *Hydrops cer'ebr'i*, *Encephalalg'ia hydroptica*, *Encephal'itis exsudator'ia*, *Encephal'itis seu Mening'itis Infantum*, *Morbis cerebr'al'is Wh'y't'is*, *Entero-cephalop'yyra Infantum*, *Hydrophlog'osis Ventrículo'rum cer'ebr'i*, *Encephaloc'h'ysis*, *Phrenic'ula hydroceph'alica*, *Hydrnceph'alus*, *Hydrencephal'itis*, *Hydrenceph'alium*, *Hydrocephal'itis*, *Hydromening'itis*, *Feb'ris Hydroceph'alica*, *Apople'gia hydroceph'alica*, *Carus hydroceph'alus*, *Water Brain Fever*, (F.) *Hydrocéphale aiguë*, *Fèvre cérébrale des Enfants*, is generally seated, according to modern observers, in the meninges and surface of the encephalon, and is a *tubercular mening'itis*, *Mening'itis tuberculosa*, *Encephalostrom'osis*, (F.) *Méningite tuberculeuse ou granuleuse*. It is observed particularly in childhood. Its march is extremely acute and often very rapid; admitting, generally, however, of division into three stages. The symptoms of the *first stage* are those of general febrile irritation, with head-ache, intolerance of

light and sound, delirium, &c. Those of the *second*, which generally denote that the inflammation has ended in effusion, are, great slowness of pulse, crying out as if in distress, moaning, dilated pupil, squinting, &c.; and lastly, in the *third* stage;—profound stupor, paralysis, convulsions, involuntary evacuations, quick pulse, and frequently death. The disease is of uncertain duration; sometimes, destroying in two or three days; at others, extending to two or three weeks. The prognosis is unfavourable. The treatment must be active during the stage of excitement,—precisely that which is necessary in phrenitis. In the second stage, the indication is;—to promote the absorption of the effused fluid. This must be done by counter-irritants, and mercury, chiefly. On dissection, water is generally found in the ventricles, or at the base of the brain; or there are evidences of previous vascular excitement, as effusions of coagulable lymph, &c.

**HYDROCEPHALUS SPURIUS**, Hydrecephaloid, (disease.)

**HYDROCHAMAIMELUM**, Infusum anthe-midis.

**HYDROCHEZIA**, Diarrhœa serosa.

**HYDROCHLORATE D'OR**, see Gold.

**HYDROCHLORINAS NATRICUS**, Soda, muriate of.

**HYDROCHOLECYSTIS**, Turgescientia vesiculae fellæ.

**HYDROCHYSES**, (G.) *Hydrochysen*, from *ὑδωρ*, 'water,' and *χυσίς*, 'effusion.' A family of diseases, according to the classification of Fuchs, in which there is a sudden effusion of serous fluid, as in serous apoplexy; hydrocephalus, &c.

**HYDROCIRSOCELE**, *Hydrocirsocele*, *Hygroscelle*, from *ὑδωρ*, 'water,' *κίρσις*, 'varix,' and *κύλη*, 'tumour.' A tumour, formed by the varicose distention of the veins of the spermatic cord, and by the accumulation of serous fluid in the cellular texture of the serotum.

**HYDROCELIA**, Ascites.

**HYDROCOTYLE UMBELLATUM**, *Acaricoba*.

**HYDROCRANIA**, Hydrocephalus.

**HYDROCRANUM**, Hydrocephalus.

**HYDROCRITHE**, Decoctum Hordei.

**HYDROCYANIC ACID**, *Ac'idum Hydrocyanicum*; from *ὑδωρ*, 'water,' and *κυανός*, 'blue.' *Prussic Acid*, *Ac'idum Prussicum*, *A. Borussicum*, *A. Zodi'icum*, *A. Zodi'nicum*, *Cyanohydric Acid*, *Cyanohydric Acid*, (F.) *Acido Hydrocyanique ou Prussique*. This acid exists in a great variety of native combinations in the vegetable kingdom, and imparts to them certain properties, which have been long known and esteemed; as in the *bitter almond*, *Cherry laural*, leaves of the *Peach tree*, *kernels of fruit*, *peps of apples*, &c. When *concentrated*, it is liquid, colourless, of a strong smell and taste, at first cool, afterwards burning. Its s. g. at 7° centigrade, is 0.7058. It is very volatile, and enters into ebullition at 80° Fahr. It speedily undergoes decomposition, sometimes in less than an hour, and consists of a peculiar gaseous and highly inflammable compound of carbon and azote, to which the name *Cyanogen* has been assigned; and of hydrogen, which acts as the acidifying principle; hence its name *Hydrocyanic acid*. In the Pharmacopœia of the United States, (1842,) two

formulas for its preparation are given,—the one from the Ferro-cyanuret of Potassium; the other from the Cyanuret of Silver. According to Magendie, the acid, prepared after Scheele's method—the one in common use—is of irregular medicinal power; he, therefore, recommends Gay Lussac's acid, diluted with 6 times its volume, or 8.5 times its weight of distilled water, for medicinal purposes, and this he calls *Medic'inal Prussic Acid*. Dr. Ure has proposed, that the specific gravity should indicate that which is proper for medicinal exhibition; and, after comparative experiments of the gravity of the acids, obtained by different processes, he states, that the acid, usually prescribed, is of s. g. 0.996 or 0.997. Great caution is, however, necessary. One drop of pure prussic acid may instantly destroy, and the animal show hardly any traces of irritability, a few moments after death. It has been advised in laryngeal phthisis, in pulmonary phthisis, pulmonary inflammation and irritation, dyspepsia, uterine affections, hectic cough, cancer, chronic rheumatism, and mania, and as a local remedy in impetiginous affections; but, although possessed of powerful sedative properties, it is so unmanageable and the preparation so uncertain, that it is not much used. The *Dosis* of Scheele's *Acid*, or of the *Medicinal Prussic Acid*, is from a quarter of a drop to two drops.

**HYDROCYSTIS**, from *ὑδωρ*, 'water,' and *κύστις*, 'a bladder.' A cyst containing a watery or serous fluid. An hydatid. Also, sacculated ascites.

**HYDRODERMA**, Anasarca.

**HYDRODES**, Aqueous.

**HYDRODIARRHŒEA**, Diarrhœa, serous.

**HYDROEDEMA**, Oedema.

**HYDRO-ENCEPHALORRHŒEA**, Apoplexy, serous.

**HYDRO-ENTERO-EPIPOCELE**, *Hydro-epiipo-entrocèle*; from *ὑδωρ*, 'water,' *έντερον*, 'intestine,' and *επιπόλη*, 'omentum.' Entero-epipocèle, the sac of which contains a serous fluid.

**HYDRO-ENTERO-EPILOMPHALUM**, from *ὑδωρ*, 'water,' *έντερον*, 'an intestine,' *επιπλάσιον*, 'the caul,' and *ομφαλός*, 'the navel.' Umbilical hernia, the sac of which contains intestine, epiploon, and serum.

**HYDRO-ENTEROMPHALUM**, *Hydroenteromphalum*; from *ὑδωρ*, 'water,' *έντερον*, 'an intestine,' and *ομφαλός*, 'the umbilicus.' Hernia umbilicalis, the sac of which contains intestine and serum.

**HYDRO-EPIPOCELE**, from *ὑδωρ*, 'water,' *έντερον*, 'omentum,' and *κύλη*, 'a tumour.' Hernia, formed by omentum, the sac of which contains serum.

**HYDRO-EPIPO-ENTEROCELE**, Hydro-entero-epipocèle.

**HYDRO-EPILOMPHALUM**, from *ὑδωρ*, 'water,' *έντερον*, 'the omentum,' and *ομφαλός*, 'the umbilicus.' Umbilical hernia, the sac of which contains epiploon and serum.

**HYDROG'ALA**, from *ὑδωρ*, 'water,' and *γάλα*, 'milk.' A mixture of water and milk.

**HYDROGASTER**, Ascites.

**HYDROGEN**, *Hydrogenium*, *Inflam'mable air*, *Phlogis'ton*, *Princip'ium hydrogenat'icum*, *P. hydrog'icum*, *Αμφ'itis inflam'mabil'is*, (F.) *Hydrog'æno*, from *ὑδωρ*, 'water,' and *γενναω*, 'I produce.' This gas, when breathed, proves

fatal from containing no oxygen. When diluted with two-thirds of atmospheric air, it occasions some diminution of muscular power and sensibility, and a reduction of the force of the circulation. It has been respired in catarrh, hæmoptysis, and phthisis.

**HYDROGEN, CARBURATED, Inflammable air, Fire damp, of miners**—obtained by passing the vapour of water over charcoal, at the temperature of ignition, in an iron tube—has been found possessed of similar properties, when diluted, and has been used in like cases.

**HYDROGEN, SULPHURETTED, Hydrosulphuric acid, Hydrothionic acid, Hydrothion, Gaz hepaticum, Gaz hydrogenium sulphuratum, Mephitica hepatica, (F.) Acide hydrosulfurique,** may be disengaged from any of the sulphurets by the addition of a strong acid. It is a violent poison, but has been recommended to be inhaled, diluted, to allay the increased irritability which occasionally exists after diseases of the lungs. See Hydro-sulphuretted Water.

**HYDROGÈNE, Hydrogen.**

**HYDROGÉNÈSES.** Baumes gives this name to diseases which he fancifully considers to depend upon disturbed *hydrogenation*. In it he includes intermittent and remittent fevers.

**HYDROGENO-SULPHURETUM AMMONIACÆ LIQUIDUM, Ammoniac sulphuretum.**

**HYDROGLOSSA, Ramula.**

**HYDROHÉMIE, Anæmia.**

**HYDROHYMENITIS, Orriohymenitis,** from *ὕδωρ*, 'water,' *ὑμην*, 'a membrane,' and *itis*, denoting inflammation. Inflammation of a serous membrane.

**HYDROLÆUM, Hydrelæon.**

**HYDROLAPATHUM, Ramez hydrolapatham.**

**HYDROLATA, Aquæ destillatæ.**

**HYDROLATS, Aquæ destillatæ.**

**HYDROLOGY, Hydrolog'ia,** from *ὕδωρ*, 'water,' and *λογος*, 'a discourse.' A treatise on water. By the term *Medical Hydrology* is meant that part of physics, whose object is the study of water, considered as it respects medicine; and consequently embracing that of mineral waters. *Medical Hydrography* comprises the study of the influence exerted by the sea or by navigation on the health of man.

**HYDROLOTIF, Lotion.**

**HYDROMANIA, from ὕδωρ**, 'water,' and *μανία*, 'mania.' A name given by Strambi to pellagra in which the patient has a strong propensity to drown himself.

**HYDRO-MEDIASTINUM, Hydrops mediastini.** Effusion of serous fluid into the mediastinum.

**HYDROMEL, Hydrom'eli,** from *ὕδωρ*, 'water,' and *μέλι*, 'honey.' *Aqua mulsa, Melititis, Mulsum, Melic'ratum, Mellic'ratum, Braggart, Medo.* A liquid medicine, prepared with an ounce and a half of honey and a pint of tepid water. It is used as a demulcent and laxative, and is generally known under the names *Simple hydromel, Vinous hydromel, Mead, Hydrom'eli vino'sum.* It is a drink made by fermenting honey and water, and is much used in some countries.

**HYDROMENINGITIS, Hydrocephalus internus.**

**HYDROMETER, Areometer.**

**HYDROMETRA, Hydrom'etria, Hyster'ites, Hysteradd'na, Hydrops uteri;** from *ὕδωρ*, 'wa-

ter,' and *μύτρα*, 'the womb.' *Dropsy of the womb.* A disease characterized by circumscribed protuberance in the hypogastrium, with obscure fluctuation, progressively enlarging, without ischury or pregnancy. If it ever occur, it must be a rare disease.

**HYDROMPHALUM, Hydrops umbilicalis, Exomphalus aquosus, Hernia umbilici aquosa,** from *ὕδωρ*, 'water,' and *μφαλος*, 'the navel.' A tumour, formed by the accumulation of serum in the sac of umbilical hernia; or simply by distension of the navel in cases of ascites.

**HYDROMYRIN'GA, Hydromyrina, Hydrops tympani,** from *ὕδωρ*, 'water,' and *myrina* or *myrinz*, 'the membrana tympani.' Dropsy of the drum of the ear; giving rise to difficulty of hearing.—*Dysac'ia hydrop'ica*

**HYDROMYRINX, Hydromyringa.**

**HYDRONCUS, Anasarca, Œdema.**

**HYDRONEPHROSIS; (F.) Hydronephross, Hydronephros distension,** from *ὕδωρ*, 'water,' and *νεφρος*, 'kidney.' An accumulation in the kidney, owing to the obstruction of the tubes of the papillæ.—Rayer.

**HYDRONOSUS, Hydrops.**

**HYDRONUSUS, Hydrops.**

**HYDROOPHORON, Hydroarion.**

**HYDROOVARIVM, Hydroarion.**

**HYDROPEDESIS, Hydropedesis.**

**HYDROPATH'IC, Hydropath'icus, Hydrat'ricus,** from *ὕδωρ*, 'water,' and *παθος*, 'disease.' Relating to hydropathy or the water cure,—as a hydropathic physician,—*Hydrat'er, Hydrat'rus.*

**HYDROPATHY, Hydrosudotherapia.**

**HYDROPEDESIS, Hydropede'is,** from *ὕδωρ*, 'water,' and *πηδα*, 'I break out.' *Ephidros'ia.* Excessive sweating.

**HYDROPEGE, Water, spring.**

**HYDROPERICARDIA, Hydropericardium.**

**HYDROPERICARDITIS, Hydropericardium.**

**HYDROPERICARDIVM, Hydropericar'dia, Hydropericard'itis,** from *ὕδωρ*, 'water,' and *pericardium*; *Hydrops Pericar'dii, Hydrocar'dia, Dropsy of the pericardium,* (F.) *Hydropisie du Péricarde.* This is not a common disease. Palpitations; irregular or intermitting pulse; excessive dyspnoea, amounting often to orthopnoea, and dullness over a large space on percussion, will cause the pericardium to be suspected. The treatment is that of dropsies in general. It is, usually, however, of the active kind.

**HYDROPÉRIONE, from ὕδωρ**, 'water,' *περι*, 'around,' and *ωνον*, 'an egg, or ovum.' The sero-albuminous substance secreted by the lining of the uterus, prior to the arrival of the impregnated ovum in that cavity.—Breschet.

**HYDROPÉRITONIE, Ascites.**

**HYDROPHAL'LUS, from ὕδωρ**, 'water,' and *φαλλος*, 'the male organ.' Œdema of the male organ.

**HYDROPHIMOSIS, Phimosis edematodes.**

**HYDROPHLEGMASIA TEXTŪS CELLULARIS, Phlegmasia alba.**

**HYDROPHLOGOSIS VENTRICULORUM CEREBRI, Hydrocephalus internus.**

**HYDROPHOBIA, Paraphob'ia, Parophob'ia, Phobodip'son, Phœgydron, Phœgophob'ia, Cynoly'ssa, Cynoly'ssum, Morbus hydrophobicus seu hydroph'obus, Lycan'obis, Lycan'chis, Atrophobia, Phren'itis latrans, Lytta, Lyssa,**

*Lyssa canina*, *Pantophobia*, *Rabies canina*, *Erethismus hydrophobia*, *Clonus hydrophobia*, *Hydrophobia*, *Canine madness*, (F.) *Rage*; from *ὕδωρ*, 'water,' and *φοβός*, 'dread.'

The term *Rabies* is more appropriate for the aggregate of symptoms resulting from the bite of rabid animals. *Hydrophobia* literally signifies, a 'dread of water;' and, consequently, ought to be applied to one of the symptoms of rabies, rather than to the disease itself. It is a symptom which appears occasionally in other nervous affections. Rabies is susceptible of spontaneous development in the dog, wolf, cat, and fox, which can thence transmit it to other quadrupeds or to man; but it has not been proved that it can supervene,—without their having been previously bitten,—in animals of other species; or that the latter can, when bitten, communicate it to others: Many facts induce the belief, that the saliva and bronchial mucus are the sole vehicles of the rabid virus; the effects of which upon the economy sometimes appear almost immediately after the bite, and are, at others, apparently dormant for a considerable period. The chief symptoms are—a sense of dryness and constriction of the throat; excessive thirst; difficult deglutition; aversion for, and horror at, the sight of liquids as well as of brilliant objects; red, animated countenance; great nervous irritability; frothy saliva; grinding of the teeth, &c. Death most commonly happens before the fifth day. *Hydrophobia* has hitherto resisted all therapeutical means. Those which allay irritation are obviously most called for. In the way of prevention, the bitten part should always be excised, where practicable; and cauterized.

In some cases, symptoms like those which follow the bite of a rabid animal are said to have come on spontaneously. This affection has been termed *nervous* or *spontaneous hydrophobia*.

HYDROPHOBUS, *Lyssodectus*.

HYDROPTHALMIA, from *ὕδωρ*, 'water,' and *ὀφθαλμικός*, 'the eye.' *Hydrophthalmus*, *Dropsy of the eye*, *Hydrops Oculi*, *Buphthalmus*, *Zoophthalmus*, *Oculus Bovinus*, *Oculus Bubulinus*, *Oculus Elephantinus*, *Ophthalmopotosis*, *Paropsis Staphyloma simplex*, (F.) *Hydrophthalmie*, *Hydropisie de l'œil*. This affection is caused, at times, by an increase in the quantity of the aqueous, at others, of the vitreous, humour. In the former case, the iris is concave anteriorly, and pushed backwards:—in the latter it is convex, and pushed forwards. Most commonly, the disease seems to depend on both humours at the same time. *Hydrophthalmia* sometimes affects both eyes; at others, only one. Children are more exposed to it than adults or old persons. The treatment must vary according to the cause; its longer or shorter duration; greater or less extent, &c. Hence, according to circumstances, hydragogue medicines, purgatives, general and local blood-letting, blisters, setons, moxa, cupping-glasses, fomentations, collyria, and fumigations of different kinds have been employed. When all means fail, and the disease continues to make progress, the fluid may be evacuated, by a puncture made with a cataract needle at the lower part of the transparent cornea.

HYDROPTHALMIA, CONICAL, *Staphyloma of the cornea*.

HYDROPTHALMION. Same etymon. An œdematous swelling of the conjunctiva in hydroptic persons.

HYDROPTHALMUS, *Hydrophthalmia*—*h. Cruentus*, *Hæmophthalmia*.

HYDROPHYLLUM VERUM, *Hydrastis Canadensis*.

HYDROPHYSOCÈLE, *Hydropneumatocèle*, from *ὕδωρ*, 'water,' *πνεῦμα*, 'wind,' and *κύλη*, 'a tumour.' *Hernia*, which contains a serous fluid and gas.

HYDROPHYSOMETRA; from *ὕδωρ*, 'water,' *πνέω*, 'I inflate,' and *μήτρα*, 'the womb.' A morbid condition of the womb, in which both fluid and air are contained in it.

HYDROPI'C, *Hydropicus*, *Hyphydras*, *Hydriscus*, *Hydroscus*, *Dropsical*, (F.) *Hydropicus*. One labouring under dropsy. Relating to dropsy. Also, an antihydrotic, and a hydragogue.

HYDROPIPER, *Polygonum hydropiper*.

HYDROPSIA, *Hydrops*.

HYDROPSIS, *Hydrops*—*h. du Bass-ventre*, *Ascites*—*h. Cérébrale suraigue*, *Apoplexy*, *Serous*—*h. de l'Œil*, *Hydrophthalmia*—*h. de l'Ovaire*, *Hydroarion*—*h. du Péricarde*, *Hydropericardium*—*h. des Plèvres*, *Hydrothorax*—*h. de Poitrine*, *Hydrothorax*—*h. de la Vésicule du Fiel*, *Turgescentia vesicæ fellæ*.

HYDROPSIS, *Hydrops*—*h. Vera*, *Anasarca*.

HYDROPSISMUS, *Hydrops*.

HYDROPLEURIE, *Hydrothorax*.

HYDROPNEUMATOÈLE, *Hydrophysocèle*.

HYDROPNEUMON, *Hydropneumonia*.

HYDROPNEUMONIA, *Hydropneumon*, *Œdème pulmonum chronicum*, *Hydrops pulmonum cellulosis*, *Anasarca pulmonum*, *Hydrops pulmonum*, from *ὕδωρ*, 'water,' and *πνεῦμα*, 'the lung.' Dropsical infiltration of the lungs. See *Œdema of the lungs*.

HYDROPNEUMOSARCA, from *ὕδωρ*, 'water,' *πνεῦμα*, 'wind, air,' and *σάρξ*, 'flesh.' An abscess, containing water, air, and matters similar to flesh.—*M. A. Severinus*.

HYDROPNEUMOTHORAX, *Hydroætopleuris*, from *ὕδωρ*, 'water,' *πνεῦμα*, 'the lung,' and *στήθος*, 'the chest.' *Pneumothorax* with effusion of blood into the chest. See *Pneumothorax*.

HYDROPOÏDES, from *ὕδωρ*, 'water,' and *ποιέω*, 'I make.' An epithet for watery excretions, such as sometimes take place in hydroptic.

HYDROPTA, *Hydroptotes*, *Potator Aqua*, from *ὕδωρ*, 'water,' and *ποτῆς*, 'a drinker.' A *Water Drinker*. One who drinks only water, or drinks it in an extraordinary quantity.

HYDROPS, from *ὕδωρ*, 'water,' *Phlegmatia*, *Hyderos*, *Affectus hyderodes*, *Hydropisis*, *Hydropisia*, *Hydropsismus*, *Hydropsia*, *Hydrorrhœa*, *Hydrorrhœot*, *Hydrorrhœus*, *Polyhydra*, *Hydrônosis*, *Hydrônosisus*, *Dropsy*, (F.) *Hydropisie*. A preternatural collection of a serous fluid in any cavity of the body, or in the cellular texture. When the cellular texture of the whole body is more or less filled with fluid, the disease is called *Anasarca* or *Leucophlegmatia*;—and when this variety is local or partial, it is called *Œdème*. The chief dropsies, designated from their seat, are—*Anasarca*, *Hydrocephalus*, *Hydrovachitis*, *Hydrothorax*, *Hydropericardium*, *Ascites*, *Hydrometra*, *Hydrocèle*, &c.

*Encysted Dropsy, Hydrops sacca'tus incarceratus vel cysticus*, is that variety in which the fluid is enclosed in a sac or cyst; so that it has no communication with the surrounding parts. *Dropsy of the Ovarium, Hydrops Ovarii, Ascites Ovarii, Ascites sacca'tus*, is an instance of this variety.

Dropsy may be active or passive. The former consists in an increased action of the exhalants, so that those vessels pour out much more fluid than is absorbed: the latter arises from a state of atony of the absorbent vessels, which allows of an accumulation of fluid. It may also be mechanical, or produced by obstructions to the circulation, as in cases of diseased liver. Active dropsy, occurring accidentally in a sound individual, generally ends favourably. That which supervenes on other diseases, or is symptomatic of some internal affection, is rarely curable.

The treatment consists in the use of all those remedies, which act on the various secretions: so that the demand being increased, the supply will have to be increased accordingly; and in this manner some of the collected fluid may be taken up by the absorbents. To this end, bleeding, if the dropsy be very active; purgatives, diuretics, sudorifics, sialagogues, &c., are the remedies chiefly depended upon.

HYDROPS ABDOMINIS, Ascites—h. Abdominis aereus, Tympanites—h. Abdominis sacca'tus, see Ascites—h. Anasarca, Anasarca—h. Anasarca acutus, see Anasarca—h. Articulorum, Hydrarthrus—h. HYDROPSIA, Hydrops.

HYDROPYRETOS, from *ὑδρῦς*, 'water,' and *πυρετός*, 'fever;' *Febris sudatoria*. Fever with sweating. *Hydropyretos* would be more proper; from *ἰδρῶς*, 'sweat.' See Sudor Anglicus.

HYDRORA'CHIS, from *ὑδρῶς*, 'water,' and *ραχίς*, 'the spine.' *Hydrorachis*, *H. drorachis*, *Hydrorachis*, *Myelorrhachis*, *Hydrops Cavities Columnæ Vertebralis*, *H. Spinæ vertebralis*, *Hydrops medullæ spinæ*, *H. d. o. e. l. spinæ*, *Hydrorachis spinosa*, *Hydrops*

*spinæ*. An effusion of serum, often owing to inflammation of the spinal membranes—*myelitis exsudativa*—and forming a soft, frequently transparent, tumour; constituted of the membranes of the spinal marrow, which are distended and projecting backwards from the vertebral canal, the posterior paries of which, when the affection is congenital, is wanting to a certain extent—*Spina bifida*, *Atelorachidia*, *Hydrorachis dehiscentis*, *Spinola*. The disease is often accompanied with paralysis of the lower extremities. It is congenital, and situate in the lumbar or sacral regions. It is almost always fatal:—the tumour rupturing, and death occurring instantaneously. On dissection, a simple separation or complete absence of the spinous processes of the vertebrae is perceived, with, at times, destruction or absence of spinal marrow. The treatment is the same as in *Hydrocephalus chronicus*; and, as in it, advantage seems occasionally to have been derived by puncturing with a fine needle.

HYDRORACHIS DEHISCENS, see Hydrorachis.

HYDRORACHITIS, Hydrorachis.

HYDRORCHIS, Hydrocele.

HYDRORÉNALE DISTENSION, Hydro-nephrosis.

HYDRORRHACHIA, Hydrorachis.

HYDRORRHACHIS, Hydrorachis.

HYDRORRHAGIE, Apoplexy, serous.

HYDRORRHŒ, Hydrops.

HYDRORRHŒA, Hydrops.

HYDRORRHŒUS, Hydrops.

HYDRORTHOPNŒA, from *ὑδρῶς*, 'water,' and *ὀρθοπνοία*, 'difficulty of breathing, except in the erect posture.' Orthopnœa, owing to a collection of water in the chest.

HYDROSACCHARUM, *Aqua saccharata*, (F.) *Eau sucrée*. Sugared water.

HYDROSALPINX, *Hydrops tubarum Fallopii*; from *ὑδρῶς*, 'water,' and *σαλπιγξ*, 'a tube.' Dropsy of the Fallopian tube.

HYDROSARCA, from *ὑδρῶς*, 'water,' and *σαρξ*, 'flesh.' A tumour, containing a fluid, as well as portions of flesh. Also, Anasarca.

HYDROSARCOLE, from *ὑδρῶς*, 'water,' *σαρξ*, 'flesh,' and *κύστις*, 'a tumour.' *Sarcocystocèle*. A tumour, formed by a sarcocele, complicated with dropsy of the tunica vaginalis.

HYDROSCHEOCE'LE, *Oschroscèle aquosa*, from *ὑδρῶς*, 'water,' *σχετόν*, 'the scrotum,' and *κύστις*, 'rupture.' A collection of water in the scrotum. Hydrocele.

HYDROSCHEONIE, Hydrocele.

HYDROSCHEUM, Hydrocele.

HYDROSIS, Hidrosis.

HYDROSTATIC TEST OF INFANTICIDE, see Docimasia.

HYDROSUDOPATHY, Hydrosudotherapia.

HYDROSUDOTHERAPEIA, *Hydrospathy*, *Hydropathia*, *Hydrosudopathy*, *Hydrisasia*, *As hydriatica*, *Hydriat'ia*, *Water cure*, (G.) *Wassercur*, from *ὑδρῶς*, 'water,' *ὑδρῶς*, 'I sweat,' and *ἰατρικόν*, 'I remedy.' A badly compounded word, formed to express the mode of treating diseases by cold water, sweating, &c.

HYDROSULPHURETTED WATER, *Aqua hydrosulphureta simplex*, *Aqua hepatica*, (F.) *Eau hydrosulphurée simple*. (*Sulphu et i* on 1000 parts, *anilhu et acid* 2000 parts, *distilled water* 4000 parts; add the water

to the acid, and put the sulphuret of iron into a retort, to which a Wolff's apparatus of 5 or 6 vessels is adapted; the last containing about an ounce of potassa, dissolved in a quart of water. Pour the diluted acid gradually on the sulphuret; and, ultimately, throw away the water in the last vessel. *Ph. P.*) It is stimulant, diaphoretic, and deobstruent, (?) and is used in rheumatism, diseases of the skin, &c.

It has been, also, called *Ad'idum Hydrothion-icium liquidum*.

**HYDROSULPHURETUM AMMONIACUM AQUOSUM**, Ammoniac sulphuretum—h. Ammoniacum, Ammoniac sulphuretum.

**HYDROTHION**, Hydrogen, sulphuretted.

**HYDROTHORAX**, from *ὑδωρ*, 'water,' and *θώραξ*, 'the chest.' *Hydrops Thoracis*, *Hydrops pectoris*, *Hydrops pulmonis*, *H. pleura*, *Stetho-lysis*, *Pleurorrhagia lymphatica*, *Pl. serosa*, *Dyspnœa et Orthopnœa hydrothoracica*, (F.) *Hydropisis de Poitrine*, *H. des Plevres*, *Dropsy of the Chest*. Idiopathic Hydrothorax, termed by Laënnec *Hydropisis des plevres*, *Dropsy of the Pleura*.—by Piorry, *Hydropleuris*, is a rare disease, and difficult of diagnosis. It generally exists only on one side which, if the fluid effused be considerable, projects more than the other. Dyspnœa, and fluctuation perceptible to the ear, are characteristic symptoms. When the chest is examined with the stethoscope, respiration is found to be wanting every where, except at the root of the lung. The sound is also dull on percussion.

Effusion into the chest, as a result of inflammation of some thoracic viscus, is as common as the other is rare. It is usually a fatal symptom. It has been called *symptomatic hydrothorax*.

In Hydrothorax, the course of treatment, proper in dropsies in general, must be adopted. Diuretics seem, here, to be especially useful; probably on account of the great activity of pulmonary absorption. Paracentesis can rarely be serviceable.

**HYDROTHORAX CARYLOSUS**, Chyllothorax—h. Purulentus, Empyema.

**HYDROTICA**, Hydragognes.

**HYDROTIS**, from *ὑδωρ*, 'water,' and *otic*, gen. *otic*, 'the ear.' Dropsy of the ear. Properly, an accumulation of mucous or mucopurulent matter in the middle ear.

**HYDRURESIS**, Diabetes.

**HYDRURIA**, Diabetes, see Urine.

**HYÈRES**. This small town, agreeably situated on the declivity of a hill, about 2 miles from the Mediterranean, and 12 from Toulon, is the least exceptionable residence in Provence for the pulmonary invalid. It is in some measure protected from the northerly winds; but not sufficiently so from the *mistral* to render it a very desirable residence for the phthisical.—Sir James Clark.

**HYGEA**, *Hygiène*, Sanitas.

**HYGELA**, Sanitas.

**HYGEISMUS**, Hygiene.

**HYGEOLOGY**, Hygiene.

**HYGIANSIS**, Sanitas.

**HYGIASIS**, Sanitas.

**HYGIASMA**, Medicament.

**HYGIASTICA DOCTRINA**. The doctrine of health. The doctrine of the restoration of health.

**HYGIASTICUS**, Salutary.

**HYGIEA**, Sanitas.

**HYGIEIA**, *Hygiène*, Sanitas.

**HYGIEINUS**, Salutary.

**HYGIEIOLOGIA**, *Hygiène*.

**HYGIÈNE** (F.), (generally Anglicised and pronounced *Hy'geen*.) from *ὑγίεια*, 'health.' *Hygeis'mus*, *Hygei'ne*, *Hygei'sis*, *Hygei'a*; *Hygei'a*, *Hyge'a*, *Hyge'ne*, *Hyge'ne'ics*, *Conservati'va medicina*, *Hygeolog'ia*, *Hygeiolog'ia*, *Hygeology*, *Hygiol'ogy*; from *ὑγιής*, 'healthy.' The part of medicine whose object is the preservation of health. It embraces a knowledge of healthy man, both in society, and individually, as well as of the objects used and employed by him, with their influence on his constitution and organs. See Regimen.

**HYGIENIC**, (F.) *Hygienicus*. Same etymon. Relating to Hygiene—as '*hygienic* precautions, '*hygienic* rules,' &c. &c.

**HYGIENICS**, *Hygiène*.

**HYGIÉNIQUE**, Hygienic.

**HYGIERUS**, Salutary.

**HYGIESIS**, *Hygiène*.

**HYGIOLOGY**, *Hygiène*.

**HYGRA**, from *ὑδωρ*, 'water,' or *ὑγρός*, 'humid.' Liquid plasters.—*Hygroplastra*.

**HYGRASIA**, Humour.

**HYGRECHE'MA**, from *ὑγρός*, 'humid,' and *ἦμα*, 'sound;' *Son'itus flu'id*. The sound of fluid, heard by auscultation, or otherwise.

**HYGREDON**, Humour.

**HYGREMPLASTRA**, Hygra.

**HYGROBLEPHARICI**, from *ὑγρός*, 'humid,' and *βλεφαρον*, 'eyelid;' *Hygrophthalmici*. The excretory ducts of the lachrymal gland have been so called.

**HYGROCATARACTA**; from *ὑγρός*, 'humid,' and *καταρακτης*, 'cataract;' *Cataracta lig'uida*. Liquid or fluid cataract.

**HYGROCELE**, Hydrocirocele.

**HYGROCOLLYRIA**, see Collyrium.

**HYGROCYSTIS**, Hydatid.

**HYGROLOGY**, *Hygrol'ogy*, from *ὑγρός*, 'humid,' and *λογος*, 'a discourse.' The anatomy of the fluids of the body.

**HYGROMA**, from *ὑγρός*, 'humid.' *Tumor cysticus serosus*, *Cystis serosa*. Dropsy of the bursa mucosa.

**HYGROMETRY**, *Hygromet'ria*, *Hygrosco'pia*; from *ὑγρός*, 'humid,' and *μετρον*, 'measure.' The part of physics which concerns the measurement of the dryness or humidity of the atmosphere. It is probable, that diseases are as frequently caused by the varying moisture of the atmosphere as by changes in its weight or temperature. The *Hygrometer* ought, consequently, to form part of every apparatus for medical meteorological observations.

**HYGRON**, Liqueur.

**HYGROPHOBIA**, Hydrophobia.

**HYGROPTHAL'MIA**, from *ὑγρός*, 'humid,' and *οφθαλμία*, 'inflammation of the eye.' Ophthalmia with much lachrymation.

**HYGROPTHALMICI**, Hygroblepharici.

**HYGROPISSOS**, see Pinus sylvestris.

**HYGROSCOPIA**, Hygrometry.

**HYGROTES**, Humour, Liqueur.

**HYGRUM**, Humour.

**HY'LE**, *ὑλη*, *Mate'ria*, 'Matter.' Wood. *Materia Medica*; also, the Philosopher's stone.

**HYLE IATRICE**, *Materia Medica*.

**HYLISIS**, Colatic.

**HYLLISMUS**, Colatic.

## HYLISTER, Colatorium.

**HYLOPH'AGOUS**, from 'υλη, 'wood,' and φάγω, 'I eat.' One that feeds upon the young shoots of trees, roots, &c. Hylophagous tribes yet exist in some parts of Africa.

**HYMASTATICS**, Hæmastaticæ.

**HYMEN**, 'υμηη, which signifies 'marriage,' nuptial song, 'membrane or pellicle.' *Claustrum* seu *Flos* seu *Stigid'ium* seu *Custo'dia* seu *Colum'na* seu *Zona virginita'tis*, *Flos virginal'is*, *Virgin'ia*, *Circulus membrano'sus*, *Bucton*, *Interseptum virginal'e*, *Centa virginal'is*, *Argumentum Integrita'tis*, *Munimentum* seu *Zona Castita'tis*, *Panniculus hymenæus* seu *virginal'is*, *Eugion*, *Val'vula vaginæ*, *Membran'ula luna'ta vaginæ*. The semilunar, parabolic, or circular fold, situate at the outer orifice of the vagina in virgins, especially during youth, and prior to menstruation. This membrane is ordinarily ruptured by the first venereal act, and is effaced by accouchement; some irregular flaps remaining, to which the name *Caruncula Myrtifor'mes* has been given by reason of their resemblance to the leaves of the myrtle. Many circumstances of an innocent character may occasion a rupture or destruction of this membrane. It is often, indeed, found absent in children soon after birth; whilst it may remain entire after copulation. Hence the presence of the hymen does not absolutely prove virginity; nor does its absence prove incontinence; although its presence would be *primâ facie* evidence of continence.

**HYMEN**, Membrane—h. Diaphragton, Mediastinum.

**HYMENÆA**, see Copal—h. Courbaril, see Anime.

**HYMEN'ICA AMENORRHŒ'A**. Amenorrhœa occasioned by closure of the hymen.

**HYMEN'ICUS**, *Hymenoides*, from 'υμηη, 'hymen,' &c. Relating to the hymen. Also, membranous.

**HYMENI'TIS**, from 'υμηη, 'a membrane,' and *itis*, denoting inflammation. Membranous inflammation. Inflammation of an internal membrane.

**HYMENIUM**, *Membran'ula*, diminutive of 'υμηη, 'a membrane.' A fine, delicate membrane.

**HYMENODES**, Hymenicus.**HYMENOGANGLIITIS**, Cholera.

**HYMENOG'RAPHY**, *Hymenogra'phia*, from 'υμηη, 'a membrane,' and γραφω, 'I describe.' That part of anatomy whose object is the description of the different membranes.

**HYMENOL'OGY**, *Hymenolog'ia*, from 'υμηη, 'a membrane,' and λογος, 'a description.' A treatise on the membranes.

**HYMENOR'RHAPHY**, *Hymenorrhæ'phia*; from 'υμηη, 'the hymen,' and ραφη, 'a suture.' A form of elytrorrhaphy, in which the operation is performed in the natural situation of the hymen.

**HYMENOT'OMY**, *Hymenotom'ia*, from 'υμηη, 'a membrane,' and τεμνω, 'I cut,' 'I dissect.' The part of anatomy which treats of the dissection of the membranes. The term has also been applied to the incision of the hymen, practised in certain cases of imperforation of the vagina, in order to give exit to the blood retained and accumulated in the cavity of the uterus.

**HYMIUM**, Amnios.

**HYO**: in composition, an abridgment of *Hyoides*, os.

**HYOBASIOGLOSSUS**, Basioglossus.

**HYOCHONDROGLOSSUS**, Hyoglossus.

**HYODEOGLOSSUS**, Hyoglossus.

**HYODEOTHYREODES**, Thyreohyoideus.

**HYODES**, Hyoides.

**HYO-EPIGLOT'TICUS**, *Hyodepiglot'ticus*.

Belonging to the os hyoides and epiglottis. Some anatomists have given the name *Hyo-epiglottic ligament* to a bundle of condensed cellular tissue, which passes from the posterior part of the body of the hyoid bone to the base of the epiglottic fibro-cartilage.

**HYO-GLOSSO-BASI-PHARYNGIEN**, Constrictor pharyngis.

**HYOGLOSSUS**, *Hyodeo-glossus*, *Hyo-chondro-glossus*, *Hypsiloglossus*, *Cer'ato-glossus* of Douglass and Cowper: *Basio-Cerato-Chondro-glossus*. A large, thin, quadrilateral muscle, situate at the anterior and superior part of the neck. Its insertions at three different points of the os hyoides permit it to be divided into three portions:—the *first*, (*Corato-glossus* of Albinus) is attached to the great cornu of the os hyoides: the *second*, (*Basio-glossus* of Albinus,) arises from the superior part of the body of the same bone; and the *third*, (*Chondro-glossus* of Albinus,) arises from the lesser cornu and the cartilage, situate between the body and the greater cornu. The fibres of these three bundles are inserted into the lateral and inferior parts of the tongue. This muscle depresses the base of the tongue, or raises the os hyoides, when the tongue is fixed.

**HYO-THYREOIDEUS**, Thyreo-hyoideus.

**HYO-THYROID**, Thyreo-hyoid.

**HYOID BONE**, Hyoides, os.

**HYOÏDES**, OS, *Os Bico'r'nè*, *Os hypseloï'des*, *Os Lambdoï'des*, *Os Gut'turis*, *Os Lingua*, *Os Lingua'le*, *Upsilonoï'des*, *Ypsiloï'des*. The *Hyoid Bone*; from the Greek υ, and *ειδος*, 'shape.' *Hyoi'deus*, *Hyoides*. The hyoid bone is a very movable, osseous arch; of a parabolic shape; convex before, and suspended horizontally in the substance of the soft parts of the neck, between the base of the tongue and the larynx. This bone, separated entirely from the rest of the skeleton, is composed of five distinct portions, susceptible of motion on each other. The first, and most central, is the *body of the hyoid*, *Ossic'ulum me'dium Hyoi'dis*, which affords attachment to several muscles; the two others are lateral, and bear the name of *branches* or *greater cornua*. The last two are smaller, situate above the other, and are known under the name *lesser cornua* and *styloid cornua*, the *Ossa piaziform'ia lingua'lia* of Sömmerring. The os hyoides is ossified from five points.

**HYODES PRIMUS**, Sterneo-hyoideus.

**HYOIDEUS**, Hyoides.

**HYOIDEIS QUARTUS MUSCULUS**, Omohyoideus.

**HYOSCY'AMUS**, from 'υς, 'a swine,' and κναιος, 'a bean.' *Faba suis'la*, *Bengi*, *Jusquiamus*, *Hyoscyamus niger*, *Apollina'ris*, *Alter'cum*, *Aq'onè*, *Alter'can'genon*, *Herbano*, *Poison Tobacco*, *Stinking nightshade*, (F.) *Jusquiasma*, *Fève a Cochon*, *Hannebans* *Poit'ées*. The leaves and seeds are the parts used in medicine. Their odour is narcotic and peculiar; taste insipid and mucilaginous. The virtues are yielded to proof spirit. *Hyoscy-*

mus is narcotic, anodyne, antispasmodic, and slightly stimulant. It is used as a substitute for opium, where the latter disagrees; and is applied, externally, as a cataplasm in cancer and glandular swellings. Dose, gr. iij to x of the powder.

**HYOSCYAMUS ALBUS**, *White Henbane*, possesses similar virtues.

**HYOSCYAMUS LUTEUS**, *Nicotiana rustica*—h. Peruvianus, *Nicotiana tabacum*.

**HYPACTICUS**, Cathartic.

**HYPÆMIA**, from *ὑπο*, 'beneath,' and *αἷμα*, 'blood;' *Oligæmia*, *Oligohæmia*, *Anæmia*. Deficiency of blood.—Andral. Also, extravasation of blood.

**HYPAGOGÉ**, Dejection.

**HYPAGOGUS**, Laxative.

**HYPALÉIMMA**, *Hypaléma*, *Hypaléiptum*, *Hypalipium*, from *ὑπαίψω*, 'I anoint.' An ointment or liniment to be rubbed or spread on a part.

**HYPALÉIPTRIS**, *Hypaleiptrum*.

**HYPALÉIPTRON**, *Hypaleiptrum*, *Hypaleiptris*, *Hypaliptrum*, *Spicilium*, *Spatha*. A sort of spatula for spreading ointments.—Hipp.

**HYPALÉIPTRUM**, *Hypaleiptron*.

**HYPALÉIPTUM**, *Hypaleimma*.

**HYPALIMMA**, *Hypaleimma*.

**HYPALIPTRUM**, *Hypaleiptron*.

**HYPAMAURO'SIS**, from *ὑπο*, 'under,' and *αμαurosis*; *Αμαυροσις imperfecta*. Imperfect amaurosis; *Μεταμαυροσις*.

**HYPAPOPLEXIA**, from *ὑπο*, 'under,' and *αποπλεξια*. An incomplete attack of apoplexy.

**HYPATMISMUS**, Fumigation.

**HYPATMUS**, Fumigation.

**HYPACHENIUM**, from *ὑπο*, 'under,' and *αυχνη*, 'the neck.' A pillow or cushion for the neck.

**HYPECCHORESIS**, Dejection.

**HYPECCHORETICUS**, Laxative.

**HYPELATUS**, Cathartic, Laxative.

**HYPENANTIOMA**, Allopathy.

**HYPENANTIOSIS**, Allopathy.

**HYPE'NÉ**, *ὑπηνη*. The beard, which grows under the chin, according to some. Also, the upper lip.—Vesalius. See *Mystax*.

**HYPER**, *ὑπερ*, 'above,' 'in excess.' Hence: **HYPERACU'SIS**, *Oxyecolia*, *Hyperacôd*, *Phihongodysphe'ria*, from *ὑπερ*, 'above,' and *ακη*, 'audition.' Excessive sensibility of the organ of hearing.

**HYPERADENO'SIS**, *Hyperadeno'ma*, *Hypertrophia glandularum*, from *ὑπερ*, 'in excess,' and *αδην*, 'a gland.' Hypertrophy of a gland.

**HYPERÆMIA**, *Hyperhæmia*, *Hæmormis*, (F.) *Hyperæmie*, *Angiohæmie*, from *ὑπερ*, 'above,' and *αἷμα*, 'blood.' Preternatural accumulation of blood in the capillary vessels, more especially local plethora. Congestion.—Andral. Various forms of hyperæmia are admitted by pathologists,—for example, the *activa* or *sthenic*; as in the various phlegmasiæ,—the *asthenic* or *passive*, from weakness of vessels; the *cadaveric*, or that which forms immediately before or after death; and the *hypostatic*, which occurs in depending parts.

**HYPERÆMIA ABDOMINIS**, *Cæliæmia*—h. *Activa*, Inflammation—h. *Capitis*, *Cephalæmia*—h. of the Brain, *Stethæmia*—h. *Cerebri*, *Cephalæmia*—h. *Pectoris*, *Stethæmia*—h. *Pulmonum*, *Stethæmia*—h. of the Lungs, *Stethæmia*—h. *Hepatic*, *Hepatohæmia*.

**HYPERÆSTHESIA**, *Hyperæsthesis*—h. *Lingue*, *Hypergeusia*—h. *Olfactoria*, *Hyperrosphresia*—h. *Plexus cardiaci*, *Angina pectoris*.

**HYPERÆSTHESIS**, *Hyperæsthesia*, *Oxyæsthesia*, (F.) *Hyperæsthesis*, from *ὑπερ*, 'above,' and *αισθησις*, 'the faculty of feeling.' Excessive sensibility.

**HYPERANTHRAXIS**, see *Cholera*.

**HYPERAPH'IA**, *Oxyaphê*, *Oxyaph'ia*, from *ὑπερ*, 'in excess,' and *αφη*, 'touch.' Excessive acuteness of touch.

**HYPERAPHRODIS'IA**, from *ὑπερ*, 'in excess,' and *Αφροδιτη*, 'Venus.' Excessive venereal desire.

**HYPERASTHEN'IA**, from *ὑπερ*, 'in excess,' and *ασθενια*, 'weakness.' Excessive debility.

**HYPERAUXE'SIS**, from *ὑπερ*, 'over,' 'above,' and *αυξησις*, 'augmentation.' *Hyperopid'osis*. Excessive increase or enlargement of a part;—as *Hyperæucæ'sis Ir'idis*, an excessive enlargement of the iris, so as to stop up the pupil.

**HYPERBOL'IC** (*attitude*) 'excessive,' (*ὑπερ*, 'above, over,' and *βαλλω*, 'I throw.') Galen, by this term, designates certain extraordinary attitudes, in which the limbs and vertebral column are in a state of complete extension or flexion.

**HYPERBO'REAN**, from *ὑπερ*, 'beyond,' and *βορæας*, 'the north wind.' A race of men found at the extreme north of the two continents, in the vicinity of the polar circle. It includes the Thibetans, Ostiaks, Kamtschadales, Laplanders, Samoïedes, Esquimaux, &c.

**HYPERCARDIA**, Heart, hypertrophy of the.

**HYPERCARDIOTROPH'IA**, Heart, hypertrophy of the.

**HYPERCATAPINO'SIS**, from *ὑπερ*, 'in excess,' and *καταπινω*, 'to sip up.' Excessive activity of absorption.

**HYPERCATHAR'SIS**, *Hyperinô'sis*, *Hyperinos*, *Superpurgatio*, *Efferensio*, from *ὑπερ*, 'in excess,' and *καθαρισ*, 'purgation.' Superpurgation.

**HYPERCENO'SIS**, from *ὑπερ*, 'in excess,' and *κινωσις*, 'evacuation.' Excessive evacuation, as of blood, bile, &c.

**HYPERCERASIS**, Staphyloma of the cornea.

**HYPERCERATOSIS**, Staphyloma of the cornea.

**HYPERCHOLIA**, Polycholia.

**HYPERCINE'SIA**, *Hypercinô'sis*, from *ὑπερ*, 'above, over,' and *κινωσις* (*κινω*, 'I move,') 'motion.' Excessive motion. Under the term *hypercinesis*, Romberg includes the spasmodic neuroses.

**HYPERCINESIA NERVOSA**, see Irritable—h. *Uterina*, *Hysteria*.

**HYPERCINESIS GASTRICA**, *Hypochondriasis*.

**HYPERCONJONCTIVITE**, see *Ophthalmia*.

**HYPERCORYPHOSIS**, from *ὑπερ*, 'above,' and *κορυφω*, 'the vertex;' the extreme point of any thing. The lobes of the liver and lungs.—Hippocrates.

**HYPERCRIN'IA**, *Hyperdiac'risis*, *Chymosæ'mia*, from *ὑπερ*, 'above,' and *κρνω*, 'I separate.' A morbid increase in the quantity of the secretions.

**HYPER'CRISIS**, same etymon. *Superæcretio*, *Superævacuatio*. An excessive crisis, or evacuation; a flux.—A very violent, critical

effort, or too copious critical evacuations.—Galen.

**HYPERCYESIS**, Superfætation.

**HYPERDERMATOSIS**, *Hyperdermato'ma*, *Hyperdermo'sis*, *Hyperdermo'ma*, from 'υπερ, 'in excess,' and δερμα, 'skin.' Hypertrophy of the skin.

**HYPERDIACRISIS**, Hypercrinia.

**HYPERDIURESIS**, Diabetes.

**HYPERDYNAMIA**, Hypersthenia.

**HYPERDYNAMIC**, *Hyperdynamic'us*, from 'υπερ, 'in excess,' and δυναμις, 'strength.' Appertaining to or having the characters of hyperdynamia, or excessive strength of the vital powers more especially.

**HYPERECHEMA**, see Exaggerated.

**HYPERECHESIS**, see Exaggerated.

**HYPEREMESIS**, *Hyperemasia*; *Vomitus profusus*, from 'υπερ, 'in excess,' and μιτω, 'I vomit.' Excessive vomiting after an emetic.

**HYPEREMIE**, Hyperæmia—*h. du Cerveau*, Cephalohæmia—*h. Cérébrale*, Cephalohæmia—*h. du Foie*, Hepatohæmia—*h. de la Moëlle épinière*, Hypermyelohæmia—*h. des Poumons*, Stethæmia.

**HYPERENCÉPHALOTROPHIE**; from 'υπερ, 'in excess,' εγκεφαλον, 'the encephalon,' and τροφη, 'nourishment.' Hypertrophy of the encephalon.—Piorry.

**HYPERENCEPHALUS**, from 'υπερ, 'above,' and κεφαλη, 'the head.' A monster whose brain is situate in the skull.—G. St. Hilaire.

**HYPERENDOSMOSE**, Inflammation.

**HYPERENERGIA**, from 'υπερ, 'in excess,' and ενεργια, 'activity.' Excessive activity, as of the nervous system.

**HYPEREPHIDROSIS**, Ephidrosis.

**HYPEREPIDOSIS**, Hyperæuzesis.

**HYPERERETHISIA**, from 'υπερ, 'in excess,' and ερεθισω, 'I excite.' Excessive irritability.

**HYPERESIA**, 'υπερεια, 'a ministry.' This word is sometimes applied to the organs;—when it means function.

**HYPERESTHÉSIE**, Hyperæsthesia.

**HYPERETRIA**, Midwife.

**HYPERGENESIS**, from 'υπερ, 'in excess,' and γενεσι, 'generation.' The excess of formative power, which gives occasion to monstrosities by excess of parts.

**HYPERGEUSTIA**, *Hypergeu'sis*, *Hyperæsthesia lingvæ*, *Oxygeu'sia*, from 'υπερ, 'above,' and γευσι, 'taste.' Excessive sensibility of the organ of taste.

**HYPERHÆMATOSIS**, Inflammation.

**HYPERHÆMIA**, Hyperæmia.

**HYPERHÉPATOTROPHIE**, *Hypertrophie du Foie*, from 'υπερ, 'in excess,' ηπαρ, 'the liver,' and τροφη, 'nourishment.' Hypertrophy of the liver.

**HYPERHIDROSIS**, Ephidrosis.

**HYPERHORA**, from 'υπερ, 'in excess,' and ωρα, 'time.' Premature development of the body, or of some part.

**HYPERICUM BACCIFERUM**, *Arbutus cula gemmifera Brasiliensis*, *Caa-opia*. A Brazilian tree, whose bark admits a juice, when wounded, which resembles gamboge.

**HYPERICUM PERFORATUM**, *Hypericum*, *Fuga dæmonum*, *Androsæmum*, *Corion*, *Perforated or Common St. John's Wort*, (F.) *Millepertuis ordinaire*. It is aromatic and astringent, and enters into a number of aromatic preparations; and, amongst others, into the *Falltranks*. The

*Oil of St. John's Wort*, *O'leum hyperici*, *Balsamum hyperici simplicia*, is made by infusing ʒiv. of the flowers in a quart of olive oil. It is vulnerary.

**HYPERIDROSIS**, Ephidrosis.

**HYPERINESIS**, Hypercatharsis.

**HYPERINOS**, Hypercatharsis.

**HYPERINOSIS**, from 'υπερ, 'above,' and ις, ινους, 'flesh.' The condition of the blood in which it contains an increase in the proportion of fibrin, a decrease of the capsules in proportion to the excess of fibrin, and an increase of the fat,—as in inflammation. In proportion to the increase of the fibrin and fat, and the decrease of the corpuscles, the whole solid residue will be diminished. Also, morbidly increased muscular activity.—Siebenhaar.

**HYPERLYMPHIA**, (F.) *Hyperlymphie*; from 'υπερ, 'in excess,' and λυμφα. Excessive formation or accumulation of lymph.

**HYPERMÉTROHÉMIE**, Metrohæmia.

**HYPERMYELOHÆMIA**, (F.) *Hypermie de la Moëlle Épinière*, *Congestion sanguine rachidienne*, from 'υπερ, 'in excess,' μυελος, 'marrow,' and αιμα, 'blood.' Hyperæmia of the spinal marrow.

**HYPERNÉPHROTROPHIE**, from 'υπερ, 'in excess,' νεφρος, 'kidney,' and τροφη, 'nourishment.' Hypertrophy of the kidney.

**HYPERNEURIA**, from 'υπερ, 'in excess,' and νευρον, 'a nerve.' Excessive nervous activity.

**HYPERNEUROMA**, same etymon. Morbid development of the neurine or nervous masses.

**HYPERO-PHARYNGEUS**, Palato-pharyngeus.

**HYPERO'A**, from 'υπερ, 'upon,' and ωρον, 'a high place.' The palatine arch,—the base of the cranium.

**HYPERO'A**, Palate.

**HYPEROÏTIS**, *Inflammati'o palati*, *Angina Palati'na*, (F.) *Inflammation du Palais*, from *hypero'a*, 'the palate,' and *itis*, a suffix denoting inflammation. Inflammation of the velum palati.

**HYPEROÏCHASMA**, from 'υπερo'a, 'the palate,' and χασμα, 'an opening;' *Lycos'toma*, *Palatum fissum*. Fissure of the palate.

**HYPEROPSIA**, Oxyopia.

**HYPEROS**, Pylum.

**HYPEROSMIA**, Hyperosphresia.

**HYPEROSPHERE'SIA**, *Hyperosmia*, *Hyperæsthesia olfactoria*, *Olfactus acutus*, from 'υπερ, and οσφρησις, 'smell.' Excessive acuteness of smell.

**HYPEROSTOSIS**, Exostosis.

**HYPERPATHIA**, from 'υπερ, 'in excess,' and παθος, 'suffering.' Excessive sensibility in disease.

**HYPERPHLEBOSIS**, from 'υπερ, 'in excess,' and φλεψ, 'a vein.' Too great development of the venous system—predominant venosity.

**HYPERPHLEGMASIA**, Hyperphlogosis.

**HYPERPHLOGOSIS**, *Epiiphlogosis*, *Hyperphlegmasia*, *Inflammati'o peracuta*, from 'υπερ, 'above,' and φλογωσις, 'inflammation.' A high degree of inflammation.

**HYPERPHRENIE**, Mania.

**HYPERPIMELE**, see Polysarcia.

**HYPERPLEXIE**, Ecstasy.

**HYPERPNEUSTIA**, Flatulence.  
**HYPERPRESBYTIA**, Presbyopia.  
**HYPERSARCHIDIOS**, Physconia.

**HYPERSARCOMA**, *Hypersarco'sis*, *Hyper-sar'cis*, from *ὑπερ*, 'above,' and *σαρξ*, 'flesh.' A soft fungous excrescence, especially such as appears upon ulcerated parts.—A fungosity.

**HYPERSARCOSIS**, Excrescence, Fungosity—h. Cordis, Heart, hypertrophy of the.

**HYPERSARKIS**, Hypersarcoma.

**HYPERSPADIAS**, Epispadias.

**HYPERSPASMIA**, Convulsion.

**HYPERSPLENOTROPHIE**, Splenoncus.

**HYPERSPONGIA**, Spina ventosa.

**HYPERSTHENIA**, *Hyperdyna'mia*, *Hyperzoddyna'mia*, *Status inflammatorius vorus*; from *ὑπερ*, 'beyond,' and *σθένος*, 'strength.' Super-excitement. A morbid condition, characterized by over-excitement of all the vital phenomena.

**HYPERSTHENICUS**, Active.

**HYPERTONIA**, *ὑπερ*, 'beyond,' and *τόνος*, 'tone.' Excess of tone in parts. It is opposed to atony.

**HYPERTROPHÆMIA**, from *ὑπερ*, 'above,' *τροφή*, 'nourishment,' and *αἷμα*, 'blood.' A state in which the plastic powers of the blood are increased.

**HYPERTROPHIA CORDIS**, Heart, hypertrophy of the—h. Glandularum, Hyperadenosis—h. Hepatis, *Hyperhepatotrophia*—h. Intestinorum, Enterhypertrophia—h. Lienis, Splenoncus—h. Splenis, Splenoncus.

**HYPERTROPHIE DU CŒUR**, Heart, hypertrophy of the—*h. du Foie*, *Hyperhepatotrophie*—*h. de la Rate*, Splenoncus—*h. du Corps Thyroïde*, Bronchocele.

**HYPERTROPHIED**, see Hypertrophy.

**HYPERTROPHY**, *Hypertroph'ia*, from *ὑπερ*, 'beyond,' and *τροφή*, 'nourishment.' The state of a part in which the nutrition is performed with greater activity; and which, on that account, at length acquires unusual bulk. The part thus affected is said to be *hypertrophied*.

**HYPERURESIS**, Enuresis—h. Aquea, Diabètes.

**HYPERURORRHÉE**, Diabetes—h. Saccharine, Diabetes (Mellitus.)

**HYPERZODYNAMIA**, Hypersthenia.

**HYPEXODOS**, *ὑπεξόδος*, from *ὑπο*, 'beneath,' and *εξόδος*, 'passing out.' An alvine discharge or flux.—Hippocrates.

**HYEZOCUS**, Diaphragm, Pleura.

**HYPHA**, Texture.

**HYPHÆMA**, Ecchymoma.

**HYPHÆMATOSIS**, from *ὑπο*, 'under,' and *αἷμα*, 'blood,' 'sanguification.' Morbidly diminished hæmatisation.—*Sanguificatio debilitior*.

**HYPHÆMOS**, Suberuentus.

**HYPHE**, Texture.

**HYPHYDROS**, Hydropic.

**HYPINO'SIS**, *Hypoplas'ma*, from *ὑπο*, 'under,' and *ινος*, 'flesh.' The condition of the blood in which the quantity of fibrin is frequently less than in health, or if it amounts to the usual quantity its proportion to the blood corpuscles is less than in health: the quantity of corpuscles is either absolutely increased or their proportion to the fibrin is larger than in healthy blood; the quantity of solid constituents is also frequently larger than in health. Such is the condition of the blood in fevers, hemorrhages, and polyæmia.—Simon.

**HYPNÆSTHESIS**, Somnolency.

**HYPNIA TER**, (F.) *Hypniatre*, from *ὑπνος*, 'sleep,' and *ιατρος*, 'a physician.' A name given to deluded or designing persons who have affirmed that they were able, during their 'magnetic sleep,' to diagnosticate disease and its appropriate treatment.

**HYPNOBATASIS**, Somnambulism.

**HYPNOBATES**, Somnambulist.

**HYPNOBATESIS**, Somnambulism.

**HYPNOBATIA**, Somnambulism.

**HYPNODÆS**, *ὑπνοδής*, from *ὑπο*, 'under,' and *ὑπνος*, 'sleep.' One in a state of slumber or somnolency.

**HYPNODIA**, Somnolency.

**HYPNOLOG'ICA**, *Hypnolog'icæ*. The part of hygiene which treats of sleep.

**HYPNOLOGY**, *Hypnolog'ia*, from *ὑπνος*, and *λογος*, 'a discourse.' Same etymon. A treatise on sleep. The doctrine of sleep.

**HYPNONERGIA**, Somnambulism.

**HYPNOPOEUS**, Somniferous.

**HYPNOS**, Sleep.

**HYPNOSIS BIOMAGNETICA**, Sleep, magnetic.

**HYPNOTICUS**, Somniferous.

**HYPNOTIZED**, Measurized.

**HYPO**, *ὑπο*, 'under,' 'sub.' In composition, *ὑπο*, Hypochondriasis.

**HYPOÆMA**, Ecchymoma.

**HYPOÆMIA**, Ecchymoma.

**HYPOBLEPH'ARUM**, from *ὑπο*, 'under,' and *βλεφαρον*, 'eyelid.' Tumefaction under one or both eyelids. Also, an artificial eye, placed under the eyelids.

**HYPOCAPNISMA**, Suffimentum.

**HYPOCAPNISMUS**, Fumigation.

**HYPOCARO'DES**, *Subsoporatus*, from *ὑπο*, 'under,' and *καρος*, 'a heavy sleep.' One who is in a state approaching carus.—Hippocrates.

**HYPOCATHAR'SIS**, from *ὑπο*, 'beneath,' and *καθαρσις*, 'purgation.' Too feeble purgation. A word opposed to hypercatharsis.

**HYPOCATHARTICUS**, Laxative.

**HYPOCAUSTUM**, from *ὑπο*, 'beneath,' and *καίω*, 'I burn.' A name given to a 'stove, or any such contrivance, to sweat in. Also, a furnace in any subterraneous place, used for heating baths:—*ὑποκαυστον*, *Balnea'trium*, *Vaporarium*.

**HYPOCEPHALÆ'UM**, from *ὑπο*, 'under,' and *κεφαλή*, 'head.' A pillow for the head.

**HYPOCERCHA'LEON**, from *ὑπο*, 'under,' and *κεχάλιος*, 'hoarse.' Roughness of the fauces affecting the voice.—Hippocrates.

**HYPOCHLOROM'ELAS**, *sub-pal'lidæ nigricans*, from *ὑπο*, *χλωρος*, 'green,' and *μαλακ*, 'black.' A term applied to one whose skin is pale, with a blackish hue.—Hippocr., Galen.

**HYPOCHOILION**, Abdomen.

**HYPOCHONDRE**, *Hypochondrium*, *Subcartilagin'eum*, *Regio Hypochondri'aca*, *Hypochondriac Region*, from *ὑπο*, 'under,' and *χόνδρος*, 'a cartilage.' Each lateral and superior region of the abdomen is so called, because it is bounded by the cartilaginous margin of the false ribs, which forms the base of the chest. There is a *right* and a *left* hypochondrium.

**HYPOCHON'DRIAC**, *Hypochondri'acus*; same etymon. Belonging to hypochondriasis. One labouring under hypochondriasis.

**HYPOCHONDR'ACISMUS**, Hypochondriasis.

**HYPOCHONDRIALGIA**, Hypochondriasis.

**HYPOCHONDRI'ASIS**. Same etymon. *Al'via hypochondriasis, Morbus hypochondriacus, M. Resiccato'rius, M. Ructo'sus, Malum hypochondriacum, Hallucina'tio hypochondriasis, Hypochondriaci' mus, Hypochondrici' mus, Dyspep'sia hypochondriasis, Pas'sio hypochondriaca, Affec'tio hypochondriaca, Anathym'asis, Hypercindi'sis gastrica, Splenes, Melancholia nervosa, M. statuo'sa, M. hypochondri'aca, Suffoca'tio hypochondri'aca, Morbus statuo'sus, M. erudio'rum, Fomes ventric'idi, Hypochondrism, Hypo, Spleen, the Vapours, the English Malady, Low Spirits, (F.) Hypochondrie, Maladie imaginaire, Maladie Anglaise, Affec'tion vapoureuse, Vapeurs.* This disease is probably so called, from the circumstance of some hypochondriacs having felt an uneasy sensation in the hypochondriac regions. The disease seems really to be, as Pinel has classed it, a species of neurosis, and of mental alienation, which is observed in persons who in other respects are of sound judgment, but who reason erroneously on whatever concerns their own health. Hypochondriasis is characterized by disordered digestion, without fever or local lesion; flatulence; borborygmi; extreme increase of sensibility; palpitations; illusions of the senses; a succession of morbid feelings, which appear to simulate the greater part of diseases; panics; exaggerated uneasiness of various kinds; chiefly in what regards the health, &c. Indigestion has usually been considered the cause of hypochondriasis. They are, unquestionably, much connected with each other; but there is every reason to believe, that the seat of the affection is really, though functionally, in the brain. The disease almost always appears at the adult age, most commonly in irritable individuals; and, in those exhausted, or rather in the habit of being exhausted, by mental labour, overwhelmed with domestic or public affairs, &c.

The treatment is almost entirely moral. The condition of the digestive function must, however, be accurately attended to.

**HYPOCHONDRICISMUS**, Hypochondriasis.

**HYPOCHONDRIsm**, Hypochondriasis.

**HYPOCHOREMA**, Excrement.

**HYPOCHORESIS**, Dejection, Defecation, Excrement.

**HYPOCHORETICUS**, Cathartic.

**HYPOCHYMA**, Cataract.

**HYPOCHYROSIS**, Baryecoa.

**HYPOCHYSIS HÆMATODES**, Hæmophthalmia.

**HYPOCISTUS**, Cytinus.

**HYPOCLEP'TICUM**, from *υπο*, 'beneath,' and *κλεπτο*, 'I steal.' A chymical vessel, formerly used for separating oil from water.

**HYPOCELIS**, Palpebra inferior.

**HYPOCÆLIUM**, Abdomen.

**HYPOCÆLUM**, Hypocoilon, Palpebra inferior.

**HYPOCOILON**, *Hypocœlon, Hypocœlum, Hypocylum*, from *υπο*, 'under,' and *κοιλον*, 'a cavity.' A cavity situate under the lower eyelid. The lower eyelid itself.

**HYPOCOPHOSIS**, Baryecoa, Deafness.

**HYPOCRANIUM** (*ΑΡΟΣΤΕΜΑ*), from *υπο*, 'under,' and *κρανον*, 'the cranium.' A collection of pus between the cranium and dura mater.

**HYPOCYLUM**, Hypocoilon, Palpebra inferior.

**HYPOCYSTECTOMIA**, see Lithotomy.

**HYPODERIS**, Epideris.

**HYPODERMAT'OMY**, *Hypodermatoma*: from *υπο*, 'under,' *δερμα*, 'the skin,' and *τομη*, 'incision.' The section of subcutaneous parts, as of tendons and muscles.

**HYPODERMIS**, Clitoris, Epidetis.

**HYPODERRHIS**, Epideris.

**HYPODESMA**, Bandage.

**HYPODESMIS**, Bandage.

**HYPODYNAMIC**, Adynamic.

**HYPODYN'IA**, from *υπο*, 'under,' and *δυνη*, 'pain.' *Dolor mitis seu lenis*. A slight pain.

**HYPOGALA**, Hypopyon.

**HYPOGASTRAL'GIA**, from *υπογαστριον*, 'the hypogastrium,' and *αλγος*, 'pain.' Pain in the hypogastrium.

**HYPOGASTRIC**, *Hypogastrius*. Relating or belonging to the hypogastrium.

**HYPOGASTRIC ARTERY**, *A. Ili'aca interna, A. Ili'aca post'erior, A. pelvienne*, (—Ch.) is the more internal of the two branches into which the primary iliac divides. It descends into the cavity of the pelvis, and gives off a considerable number of branches, which arise, at times, separately, at others, by common trunks. These branches are, 1. The *posterior*, i. e. the ilio-lumbar arteries, lateral, sacral, and gluteal. 2. The *anterior*, i. e. the umbilical, vesical, and obturator. 3. The *internal*, the middle hemorrhoidal arteries, uterine, and vaginal in women. 4. The *inferior*, i. e. the *ischiatric arteries*, and internal pudic.

**HYPOGASTRIC OPERATION OF LITHOTOMY**, (F.) *Taille hypogastrique*. The high operation, or that practised above the pubes.

**HYPOGASTRIC PLEXUS**, *Plexus sous-mesent'riqus* of Winslow, is situate at the lateral and posterior parts of the rectum and the *bas fond* of the bladder. It is formed by the sacral nerves and the inferior mesenteric plexus, and gives off numerous filaments, which accompany the arteries that pass to the rectum and genital organs.

**HYPOGASTRIC VEIN** furnishes nearly the same branches.

**HYPOGASTRION**, Abdomen.

**HYPOGASTRIUM**, *Hypogast'rium*, from *υπο*, 'under,' and *γαστερ*, 'the stomach or belly,' *Eiron*, *ητρον*, *Venter imus, V. parvus, Aqualiculus, Sumen, Rumen*. The lower part of the abdomen. The *Hypogastric region, Regio hypogast'rica seu hypogast'ria*, which extends as high as three fingers' breadth beneath the umbilicus, is divided into the three secondary regions—one *middle or pubic*, and two *lateral or inguinal*.

**HYPOGASTROCE'LE**, from *υπο*, 'under,' *γαστερ*, 'the stomach or belly,' and *κελη*, 'a tumour.' Hernia in the hypogastric region, occurring through the separated fibres of the lower part of the linea alba. See Hernia, hypogastric.

**HYPOGASTRODID'YMUS**, *Didymus Symphyohypogast'ricus, Ischiopagos*, from *υπο*, 'under,' *γαστερ*, 'the belly,' and *ιδυμορ*, 'a twin.' A monstrosity in which twins are united by the hypogastric.—Gurlt.

**HYPOGASTRORIXIS**, Eversionation.

**HYPOGLOSSA**, Hypoglottidis.

**HYPOGLOSSIA**, Hypoglottidis.

**HYPOGLOSSIADENITIS**, from *υπο*, 'under,'

*γλωσσα*, 'tongue,' *αδν*, 'a gland,' and *ιτις*, denoting inflammation. *Inflammati'o glandula'rum sublingualium*; Inflammation of the sublingual gland.

**HYPOGLOSSIDIA**, Hypoglotlides.

**HYPOGLOSSIS**, Ranula.

**HYPOGLOSSIUM**, Ranula.

**HYPOGLOSSUM**, *Ruscus hypoglossum*, Ranula.

**HYPOGLOS/SUS**, from *υπο*, 'under,' and *γλωσσα*, 'the tongue.' That which is under the tongue.

**HYPOGLOSSUS**, *Hypoglossal Nerve, Ners Hypoglossus* or *Grand Hypoglosse, Hypoglossien* (Ch.), *Lingual N., Gustatory N., Lingualis Medius*, is the ninth pair of nerves of many anatomists. It arises by ten or twelve very fine filaments from the grooves, which separate the corpora pyramidalia from the C. olivaria; issues from the cranium by the foramen condyloideum anterius; and divides, near the angle of the jaw, into two branches; the one the *cervicalis descendens* or *descendens noni*. It forms, with the cervical plexus, a large anastomotic arch, and furnishes branches to several of the muscles of the neck. The other, the *lingual branch*, is the continuation of the principal trunk, and gives its numerous filaments to the muscles of the tongue and pharynx. The ninth pair communicates motion to the muscles to which it is distributed.

**HYPOGLOTTIA**, Hypoglotlides.

**HYPOGLOTTIDES** (PILULÆ), *Hypoglossia, Hypoglot'tia, Hypoglossa, Hypoglot'ta, Hypoglossid'ia, Pif'ula sublingual'is*. Pills placed under the tongue to dissolve there.

**HYPOGLOTTIS**, Ranula.

**HYPOGLU'TIS**, from *υπο*, 'under,' and *γλωσσα*, 'the nates.' The lower and projecting part of the nates.—Gorræus.

**HYPOGNATHADEN**, Submaxillary gland.

**HYPOGNATHADENITIS**, *Hypoglossaladenitis*, from *υποgnathaden*, the submaxillary gland, and *ιτις*, denoting inflammation. Inflammation of the submaxillary gland.

**HYPOLEPSIOMANIA**, Melancholy.

**HYPO'MIA**, from *υπο*, 'under,' and *μωσις*, 'the shoulder.' The projecting part of the shoulder.—Castelli, Galen.

**HYPO'MIA**, Axilla.

**HYPOMNESIS**, Memory.

**HYPONARTHÉCIE**, *Hypomarthecia*, from *υπο*, 'under,' and *αρθηξ*, 'a splint.' A term used by M. Mayor for his mode of treating fractures by position only,—the limb resting upon a properly cushioned board or splint.

**HYPONEU'RIA**, from *υπο*, 'under,' and *νευρον*, 'a nerve.' Morbidly diminished nervous energy.

**HYPON'OMOS**, *Ulcus subtus depas'cente*, from *υπο*, 'under,' and *νομω*, 'I feed.' A deep fistula or ulcer.

**HYPON'YCHON**, from *υπο*, 'under,' and *ουξ*, the nail.' *Echymo'ma Hyponychon*. Effusion of blood under a nail.

**HYPOPATHI'A**, *Subaffectio*, from *υπο*, 'under,' and *παθις*, 'disease.' A disease of a slight character.

**HYPOPATUS**, Dejectio.

**HYPOPE'DIUM**, from *υπο*, 'under,' and *πεδ*, 'the foot.' A cataplasm for the sole of the foot.

**HYPOPH'ASIS**, from *υπο*, 'under,' and *φαιρω*, 'I appear.' That state of the eyes in

which the white only is seen through the opening of the eyelids.—Hippocrates.

**HYPOPHLEGMASIA**, Subinflammatio.

**HYPOPH'ORA**, from *υπο*, 'under,' and *ορω*, 'I carry;' *Ulcus sinu'sum seu fistulo'sum*. A fistulous ulcer.—Galen. A dejection.

**HYPOPH'THALMIA**, Hypopyon.

**HYPOPH'THALMION**, from *υπο*, 'under,' and *οφθαλμος*, 'the eye.' That part under the eye where edema generally commences in chronic diseases and in cachexia.—Hippocrates.

**HYPOPHYSIS**, Cataract, Epigone—h. Cerebri, Pituitary gland.

**HYPOPI'UM**, from *υπο*, 'under,' and *οψ*, 'eye.' The part of the face under the eye:—a black eye.

**HYPOPIUM OS**, Mals os.

**HYPOPLASMA**, Hypinosis.

**HYPOPLEURIUS**, Pleura.

**HYPOPO'DIA**, *Supplant'ia, Supped'nea*, from *υπο*, 'under,' and *πους*, 'the foot.' Remedies, as sinapisms, which are applied under the foot.

**HYPO'PYON**, *Hypopyum, Hypophthal'mia, Pyophthal'mia, Empy'sis seu Diapysis Oculi, Ophthalm'ia purulenta, Lunalla, Hypog'ala, Hypopyum lacteum, Pyo'sis, Abscessus Oculi, Parop'sis Staphylo'ma purulentum*; from *υπο*, 'under,' and *πυον*, 'pus,' because the pus is under the cornea. This name has been given to small abscesses between the laminae of the cornea, as well as to different purulent collections in the chambers of the eye; hence, some pathologists have distinguished *Hypo'pyon of the chambers*, from *Hypo'pyon of the Cornea*. In abscesses of the chambers, the purulent matter is mixed with the aqueous humour, which it renders turbid; and is deposited particularly at the lower part of the eye; forming behind the cornea a kind of whitish crescent, that rises more or less before the pupil, and closes it entirely or in part. It requires the use of local and general antiphlogistics, and sorbeficients. At times, it is necessary to puncture the cornea and evacuate the pus.

**HYPOPYUM LACTEUM**, Hypopyon.

**HYPORIN'ION**, *Hyporrhin'ium*, from *υπο*, 'under,' and *ριον*, 'the nose.' That part of the beard which grows beneath the nose. The mustaches. Also, the upper lip.

**HYPORRHYSIS**, Deffluxio, Prolapsus.

**HYPOSA'PRUS**, *Subputris, Putres'centis*. Growing putrid. Slightly putrid.

**HYPOSA'RCA**, from *υπο*, 'under,' and *σαρξ*, 'flesh.' *Hyposarcidios, Anasarca*. In Linné's and in Cullen's Nosology, it is synonymous with *Physconia*.

**HYPOSA'RCIDIUS**, Anasarca, Hyposarca.

**HYPOSA'RCOSIS**, from *υπο*, 'under,' and *σαρκωσις*, 'a fleshy growth.' A small fleshy growth:—a wart.

**HYPOSIAGONARTHRI'TIS**, from *υπο*, 'under,' *σιαγον*, 'the jawbone,' *αρθρον*, 'a joint,' and *ιτις*, denoting inflammation; *Inflammati'o artio'uli maxill'ae inferio'ris*. Inflammation of the joint of the lower jaw.

**HYPOSIALADENITIS**, Hypognathadenitis.

**HYPOSPA'DIA**, from *υπο*, 'under,' and *σπασω*, 'I draw.' A malformation, in which the canal of the urethra, instead of opening at the apex of the glans, terminates at its base, or beneath the penis, at a greater or less distance from the symphysis pubis. When the orifice

of the urethra is very near the root of the penis, the scrotum is divided, as it were, into two great labia; and this malformation has often been taken for a case of hermaphroditism. Hypospadias is ordinarily incurable; and an idea has been entertained that it is the cause of impotence. It is not exactly so; but it renders impregnation less probable.

**HYPOSPA'DIAS**, *Hypospadias*, *Hypospadiacus*. One affected with hypospadias.

**HYPOSPHAG'MA**, from *υπερ*, 'under,' and *σφατω*, 'I kill.' The coagulated blood, which is collected when an animal is killed and used for food. Also, an effusion of blood, especially under the conjunctiva.

**HYPOSPHAG'MA**, *Hæmophthalmia*.

**HYPOSTAPHYLE**, *Staphylœdema*.

**HYPOSTAPHYLITIS**, *Staphylœdema*.

**HYPOSTASES**, from *υπερ*, 'under,' and *στανει*, 'the act of placing.' Morbid depositions in the body.

**HYPOSTASIS**, *Sediment*.

**HYPOSTAT'IC**, *Hypostat'icus*, from *υπερ*, 'under,' and *στανει*, 'stagnation.' Relating to hypostases, sediments or depositions.

**HYPOSTATIC** *HYPERÆMIA*. A congestion of blood in the vessels of a part caused by its depending position.

**HYPOSTEMA**, *Sediment*.

**HYPOSTHENIC**, *Contrastimulant*.

**HYPOSTROPHE**, *υποστροφος*, 'change of position,' from *υπερ*, and *στροφω*, 'I turn.' Act of a patient turning himself. Also, a relapse or return of a disease.—*Hippoc.*, *Fœsius*.

**HYPOSPHYLILIS**, from *υπερ*, 'under,' and *Syphilis*. A mild form of syphilis.

**HYPOTHENAR**, *Sub'vola*, from *υπερ*, 'under,' and *θηναγ*, 'the palm of the hand or sole of the foot.'

**HYPOTHENAR EMINENCE** is the fleshy projection of the palmar surface of the hand, which corresponds with the little finger, and is supported by the fifth metacarpal bone. This eminence is formed of four muscles: the *Palmaris brevis*, *Adductor minimi digiti*, *Flexor brevis minimi digiti*, and *Opponens minimi digiti*. The name *Hypothenar* has also been given to different muscles of the hand. The *Hypothenar minimi digiti* of Riolan comprehended the *Abductor*, *Flexor brevis* and *Opponens minimi digiti*; and his muscle, *Hypothenar pollicis*, corresponded to the *Abductor*, and a portion of the *Flexor brevis pollicis*. Winslow called muscle *petit hypothenar* or *hypothenar du petit doigt*, the *Adductor minimi digiti*.

**HYPOTHENAR MINIMI DIGITI**, *Flexor parvus minimi digiti*—h. *Minor metacarpeus*, *Abductor minimi digiti*—h. *Riolani*, *Flexor parvus minimi digiti*.

**HYPOTHETON**, *Suppository*.

**HYPOTHYMIAMA**, *Fumigation*.

**HYPOTHYMIASIS**, *Fumigation*.

**HYPO'TIUM**, (*Emplastrum*;) from *υπερ*, 'under,' and *ωτ*, 'the ear.' *Emplastrum auricula'rè*; a plaster applied behind or under the ear.

**HYPOTROPE**, *Relapse*.

**HYPOTROPH'IA**, from *υπερ*, 'under,' and *τροφειν*, 'nourishment.' Scanty nourishment, or nutrition.

**HYPOTROPIASMUS**, *Relapse*.

**HYPOTRYGUS**, *Feculent*.

**HYPOUTRION**, *Abdomen*.

**HYPOZO'MA**, from *υπερ*, 'under,' and *ζωνωμι*, 'I bind round;' *Membrana succin'gens*. A membrane or septum, as the mediastinum, diaphragm, &c.

**HYPOCRAS**, *Claret*.

**HYPELOGLOSSUS**, *Basioglossus*.

**HYPSELODES**, *OS*, *Hyoides*, *os*.

**HYPSELOGOSSUS**, *Hyoglossus*.

**HYPSEPHONUS**, from *υψηος*, 'high,' and *φωνε*, 'voice.' One who has a clear loud voice.

**HYPSOSIS**, *Sublimation*.

**HYPTIASMA**, *Supination*.

**HYPTIAS'MOS**, from *υπτιαζω*, 'I lie with the face upwards.' Lying in a supine posture. Also, inversion of the stomach, as in nausea, regurgitation, or vomiting.—*Hippocr.*, *Galen*.

**HYPULUS**, from *υπερ*, and *ουλον*, 'cicatriz.' Imperfectly cicatrized.

*Ulcera Hypu'la*. Ulcers healed at the top, but not at the bottom.

**HYRTOCHELIDES**, *Labia pudendi*.

**HYSSOP**, *Hyssopus*—h. *Hedge*, *Gratiola officinalis*.

**HYSSOPITES**. Ancient name of a wine, of which hyssop was the chief ingredient, and which Dioscorides extolled in chronic inflammation of the chest. It was regarded as diuretic and emmenagogue.

**HYSSO'PUS**, from the Hebr. *Azob*, *Cassiala*, *Hyssopus officinalis*, *Common hyssop*. It has been chiefly used as an aromatic, stimulant, and pectoral, in the form of infusion.

**HYSTERA**, *υστειρα*, *υστειρη*, 'the uterus.' Hence:

**HYSTERA**, *Secundines*.

**HYSTERAL'GIA**, *Hysterodyn'ia*, (F.) *Fortraiture*, from *υστειρα*, 'the uterus,' and *αλγος*, 'pain.' Pain in the uterus. *Irritable uterus*, (F.) *Néuralgie de l'uterus*. Hippocrates uses the epithet *Hyster'al'gos*, *υστειραλ'γη*, for any thing that excites uterine pain; and, especially, for vinegar.

**HYSTERALGIA CATARRHALIS**, *Metrorrhœma*—h. *Galactica*, *Phlegmatia alba dolens*—h. *Lochialis*, *Dyslochia*—h. *Rheumatica*, *Metrorrhœma*.

**HYSTERATRE'SIA**, from *υστειρα*, 'the uterus,' and *αρητος*, 'imperforate.' Imperforation of the os uteri.

**HYSTERELCO'SIS**, from *υστειρα*, 'uterus,' and *αικος*, 'an ulcer.' *Uteri exulceratio*, *Uteri ulcus*. Ulceration of the uterus.

**HYSTERELOSIS**, *Hysteroloxia*.

**HYSTEREMPHYSEMA**, *Physometra*.

**HYSTER'IA**, *Hysteris'imus*, *Hysterismus*, *Hysterias*, *Hyster'iasis*, *Hysteropath'ia*, *Hypocarcin'ia uteri'na*, *H. hyster'ia*, *Uteri adæcens'us*, *Suffocatio hyster'ica*, *S. uteri'na*, *S. Muli'rum*, *Asthma uteri*, *Prafocatio matric'is seu uteri'na*, *Sypd'ia hyster'ia*, *Malum hyster'icum*, *M. hysterico'hypocondri'acum*, *Vapores uteri'ni*, *Affectio hyster'ica*, *Passio hyster'ica*, *Morb'us hyster'icus*, *Strangua'tio uteri'na*, *S. Vulvæ*, *Vapours*, *Hyster'ica*, *Hyster'ic fit*, (F.) *Hystérie*, *Mal de Mère*, *Maladie imaginai're*, *Passion hyster'ique*, *Suffocation utérine*, *Étranglement*, *Épilepsie utérine*, *Vapeurs*, *Maux de Nerfs*, from *υστειρα*, 'the uterus.' A species of neurosis, classed amongst the spasmi by Sauvages and Cullen, and in the *Névroses de la génération*, by Pinel. It received the name of *hysteria*, because it was reputed to have its seat in the uterus. It generally occurs in paroxysms; the

principal characters of which consist in alternate fits of laughing and crying, with a sensation as if a ball set out from the uterus and ascended towards the stomach, chest, and neck, producing a sense of strangulation. If the attack be violent, there is, sometimes, loss of consciousness (although the presence of consciousness generally distinguishes it from epilepsy) and convulsions. The duration of the attacks is very variable. It appears to be dependent upon irregularity of nervous distribution in very impressible persons, and is not confined to the female; for well marked cases of hysteria are occasionally met with in men. During the fit,—dashing cold water on the face; stimulants applied to the nose or exhibited internally, and antispasmodics form the therapeutical agents. Exercise, tranquillity of mind, amusing and agreeable occupations constitute the prophylactics. See Mania, dancing.

**HYSTERIA CATALEPTICA**, Catalepsy.

**HYSTERIAS**, Hysteria.

**HYSTERIASIS**, Hysteria.

**HYSTERICISMUS**, Hysteria.

**HYSTERICIS**, Hysteria.

**HYSTÉRIE**, Hysteria.

**HYSTERISMUS**, Hysteria.

**HYSTERITES**, Hydrometra.

**HYSTERITIS**, Metritis, Hydrometra.

**HYSTEROCARCINOMA**, Metrocarcinoma.

**HYSTEROCELE**, from *ὑστερα*, 'the womb,' and *κηλη*, 'hernia.' *Hernia uteri*, *Hernia of the womb*. This is a rare disease. The womb may protrude through the inguinal or the crural canal, or through the lower part of the linea alba.

**HYSTEROCELE NUDA**, Prolapsus uteri.

**HYSTEROCOLICA**, Colica uterina.

**HYSTEROCNESMUS**; from *ὑστερα*, 'uterus,' and *κνησμος*, 'itching.' Pruritus of the uterus or genitals.

**HYSTEROCYESIS**, Pregnancy.

**HYSTERO-CYSTIC**, *Hystero-cysticus*, from *ὑστερα*, 'the uterus,' and *κυστις*, 'the bladder.' Relating to the uterus and bladder. Some authors have called *Hystero-cystic Retention of urine*, that which is caused by the compression of the bladder by the uterus, during pregnancy.

**HYSTERO-CYSTOCELE**, from *ὑστερα*, 'the womb,' *κυστις*, 'the bladder,' and *κηλη*, 'a tumour.' Hernia of the uterus complicated with displacement of the bladder.

**HYSTEROODYNIA**, Hysteralgia.

**HYSTEROEDEMA**, Hydrometra.

**HYSTEROID**, *Hysteroïdes*, *Hysteroïdes*, from *hysteria*, and *ειδος*, 'resemblance.' Resembling hysteria;—as a hysteroid disease, symptom, &c.

**HYSTEROL'OGY**, *Hysterolog'ia*, from *ὑστερα*, 'the uterus,' and *λογος*, 'a description.' A treatise on the sound and morbid uterus.

**HYSTEROLOX'IA**, *Hysterolox'is*, *Obliguitas uteri*, *Situs obliquus uteri*, *Plectio seu versio incompleta uteri*, *Inclinatio uteri*, *Metrolox'ia*, *Metrocamps'is*, *Uterus obliquus*, *U. Inclinatus*; from *ὑστερα*, 'the uterus,' and *λοξος*, 'oblique.' An oblique position of the uterus, occurring during pregnancy. *Anteversio of the uterus*, *Hysterolox'ia anterior*, *Anteversio uteri*, *Promotio uteri*, *Venter propendens*; and *Retroversio of the uterus*, *Hysterolox'ia posterior*, *Retroversio uteri*, *Rectax'io uteri completa*, are varieties.

**HYSTEROMALAC'IA**, *Hysteromalaco'sis*, *Hysteromalaco'ma*, *Metromalaco'sis*, *Metromalaco'ma*, *Malaco'sis uteri*, *Emollit'io uteri morbose*, *Putrescentia uteri gravidi*, from *ὑστερα*, 'the uterus,' and *μαλακεια*, 'softness.' Softness of the uterus during pregnancy, which renders it liable to rupture in labour.

**HYSTEROMALACOMA**, *Hysteromalacia*,

**HYSTEROMANIA**, *Nymphomania*.

**HYSTEROMOCHLIUM**, *Lever*.

**HYSTEROM'CUS**, from *ὑστερα*, 'the uterus,' and *ογκος*, 'tumour.' *Tumor uteri*. A tumour of the uterus.

**HYSTERO-PARAL'YSIS**, from *ὑστερα*, 'the uterus,' and *παρالىσις*, 'paralysis.' Paralysis of the uterus.

**HYSTEROPATHI'A**, from *ὑστερα*, 'the uterus,' and *παθος*, 'suffering.' Disease or suffering in the uterus. Also, hysteria, and deutero-pathia.

**HYSTEROPHYSE**, *Physometra*.

**HYSTEROPH'YSIS**, from *ὑστερα*, 'the uterus,' and *πνευσις*, 'wind.' Distention of the uterus with air; *Emphysema uteri*.

**HYSTEROPLÉGIA**, *Hysteroparalysis*.

**HYSTEROPLYPUS**, *Metropolypus*.

**HYSTEROPSOPHIA**, *Physometra*.

**HYSTEROPTO'SIS**, from *ὑστερα*, 'the womb,' and *πτωσις*, 'fall'; *Prolapsus uteri*. Also *Inversio uteri*, *Anastrophé uteri*. In a general sense, a protrusion of any of the genital organs or of excrescences from them into the genital passages; *Edoposis*.

**HYSTEROPTOSIS**, *Prolapsus uteri*—*h. Vaginae prolapsus*, *Prolapsus vaginae*.

**HYSTERRRHAGIA SANGUINEA**, *Metrorrhagia*.

**HYSTERRRHEXIS**, *Uterus*, rupture of the

**HYSTERRRHEA**, *Metrorrhagia*—*h. Mucosa*, *Leucorrhœa*.

**HYSTEROSALPINX**, *Tube*, *Fallopian*.

**HYSTEROSCIRRHUS**, *Metrosclirrhus*.

**HYSTEROSCOPE**, from *ὑστερα*, 'the uterus,' and *σκοπος*, 'I view.' A metallic mirror used in inspecting the state of the os uteri, for throwing the rays of a taper to the bottom of the speculum uteri.—Colombat de l'Isère.

**HYSTEROSTOMA**, *Os uteri*.

**HYSTEROSTOMAT'OMUS**, from *ὑστερα*, 'the womb,' *στομα*, 'orifice,' and *τεμνειν*, 'to cut.' An instrument invented by Couteuly for dividing the os uteri, when it is important to deliver immediately, as in cases of convulsions.

**HYSTEROSTOMIUM**, *Os uteri*.

**HYSTEROTOM'IA**, *Hysterotomy*. Same etymon as *Hysterotomus*. Cæsarean section. Also, dissection of the uterus.

**HYSTEROTOMOTOCIA**, *Cæsarean section*.

**HYSTEROT'OMUS**, from *ὑστερα*, 'the womb,' and *τεμνειν*, 'to cut.' An instrument for dividing the womb through the vagina. It is a kind of *Bistouri caohé*, and is intended to divide the cervix uteri.

**HYSTREMPHYSEMA**, *Physometra*.

**HYSTRIASIS**, *Hystriacisias*.

**HYSTRICIASIS**, *Hystri'asis*, *Hystrix*, *Hystri'cus*, *Cerostro'sis*, *Tricho'sis setosa*, from *ὑστριξις*, 'a hedgehog or porcupine.' A disease of the hairs, in which they stand erect like the quills of the porcupine.

**HYSTRICISMUS**, *Hystriacisias*.

**HYSTRIX**, *Hystriacisias*.

## I.

IAMA, Medicament.  
 IAMATOLOGY, Materia medica.  
 IAMA TOSYNTAXIOLOGIA, see Prescription.  
 IAMATOSYNTAXIS, see Composition.  
 IAMATOTAXIOLOGIA, see Prescription.  
 IASIMOS, Curable.  
 IASIS, Curation.  
 IATERIA, Medicina.  
 IATERIUS, Medicinal.  
 IATRALEIPTICE, *Iatralipticē (Ars)*, *Iatraliptic method*; same etymon. The method of treating diseases adopted by the Iatraliptes, that is, by friction chiefly.  
 IATRALEPTES, *Iatraliptes*, *Iatralipta*, *Iatroleiptes*, *Medicus Unguentarius*; from *ιατρος*, 'a physician,' and *αισιμα*, 'I anoint.' One who treats diseases by unguents, frictions, and by external means generally. Prodicus, a disciple of Æsculapius, was the chief of the Iatraliptes.  
 IATRALIPTES, Iatraliptes.  
 IATRALIPTICE, Iatraliptice.  
 IATREUSIOLOG'IA, from *ιατροεισιον*, 'the exercise of the art of healing,' and *λογος*, 'a description.' The doctrine of the exercise of the healing art.—Reil.  
 IATREUSIS. The exercise of the healing art.  
 IATRIA, Medicina.  
 IATRICE, Medicina.  
 IATRINE, Medicina. Also, a female practitioner of medicine; a midwife.  
 IATRI'ON, *Iatrid'on*, *Iat'ron*. The house or office of a physician or surgeon. Also, the physician's fee or *honorarium*.  
 IATROCHEMIA, Chymistria.  
 IATROCHYMIA, Chymistria.  
 IATROGNOM'ICA, *Iatrognom'icē*; from *ιατρος*, 'a physician,' and *γνωσκω*, 'I know.' A knowledge of medical objects.—Hufeland.  
 IATROLEIPTES, Iatroleiptes.  
 IATROLOG'IA, *Iatrol'ogy*, from *ιατρος*, 'a physician,' and *λογος*, 'a description.' A treatise on physic and physicians.  
 IATRO-MATHEMATICAL PHYSICIANS, *Iatromathemat'ici*, Mechanical physicians.  
 IATROMECHANICI, Mechanical physicians.  
 IATRON, Iat'ron.  
 IATROPHYSICS, Physics, medical.  
 IATROSOPHIS'TA, from *ιατρος*, 'a physician,' and *σοφιστης*, 'one skilled in an art or science.' A learned, or theoretically educated physician.  
 IATROTECH'NA, *Iatrotech'nes*; from *ιατρος*, 'a physician,' and *τεχνη*, 'art.' A practical physician or surgeon.  
 IATROTECHNICE, Medicina, Therapeutica.  
 IATRUS, Physician; also, a surgeon.  
 IBERIS, *Lepidium iberis*—i. Sophia, *Cardamine pratensis*.  
 IBICUIBA, *Becubiba*, *Becubiba nux*. A species of nut from Brazil, the emulsive kernel of which is ranked amongst balsamic remedies.  
 IBIS, *ibis*. A bird held sacred by the Egyptians.

When sick, it is asserted, that it was wont to inject the water of the Nile into its fundament: whence, according to Langius, was learned the use of glysters.

IBISCHA MISMALVA, Althæa.

IBISCUS, Althæa.

IBIXUMA, Saponaria.

ICE, Sax. *ir*, *Gla'cies*, *Frozen water*, (F.) *Glacē*. Iced water is much used internally, as the best refrigerant in fever. It is, also, applied externally, in cases of external inflammation, as well as in phrenitic, and hernial affections, &c.

ICE-COLD, *Icy cold*, (F.) *Froid glacial*. A very strong morbid sensation of cold, compared by the patient to that which would be produced by the application of pieces of ice.

ICELAND, MINERAL WATERS OF. Hot springs are found in every part of Iceland. The most noted of these is one called Geyser, two days' journey from Hecla, and near Skálholt. The diameter of the basin is 59 feet; and the height to which the water is thrown, is often more than 100. The heat of the water is 212°.

ICE-PLANT, *Mesembryanthemum crystallinum*, *Monotropa uniflora*.

ICHNUS, *ιχρος*. The foot. The sole of the foot. The heel.

ICHOR, *ιχνη*, *Ichos*. The serum of the blood, *Sanis*, *Sordes*, *Virus*, *Pus malignum*, *Tabum*. A thin, aqueous, and acrid discharge.

ICHOROIDES, Ichorous.

ICH'OROUS. *Ichoro'sus*, *Ichoro'ides*, *Sanio'sus*, *Sanio'sus*. Belonging to or resembling ichor.

ICHTHYA, Hook, blunt.

ICHTHYOCOL'LA, from *ιχθυς*, 'a fish,' and *κολλη*, 'glue.' *Colla Piscium*, *Isinglass*, *Fish-gluē*, (F.) *Ichthyocolla*, *Colle de Poisson*. A name given to the dried fish bladder of the *Acipenser huso*, and other species of acipenser, which is almost wholly composed of gelatin, and is employed in medicine in the formation of nutritive jellies. It is, also, occasionally used in anatomical injections. The *English Court Plaster* is made with it.

ICHTHYOPHAGISTS, *Ichthyoph'agi*, from *ιχθυς*, 'a fish,' and *φαγω*, 'I eat.' People who feed habitually on fish;—generally the most uncivilized of mankind.

ICHTHYOPHAGOUS, Piscivorous.

ICHTHYOSE, Ichthyosis.

ICHTHYO'SIS, from *ιχθυς*, 'a fish,' from the resemblance of the scales to those of a fish. *Lepido'sis Ichthy'i'asis*, *Lep'ra Ichthy'o'sis*, *Lepido'sis Ichthy'o'sis*, *Alvaras nigra* (Arab.), *Impeti'go excoercati'oa*, (F.) *Ichthyosse*; *Fish-skin*, *Poreupine Disease*. A permanently harsh, dry, scaly, and in some cases, almost horny texture of the integuments of the body, unconnected with internal disorder. Willan and Bateman have two varieties, *I. simplex*, and *I. cornea*. Alibert has three, the *I. nacrée* or *pearly*, the *I. cornée*, and the *I. pellagre* or *pellagra*.

ICHTHYOSIS PELLAGRA, Pellagra.

ICHTHYOSIS SEBA'GRA, *Seba'ceous Ichthy'o'sis*.

A morbid incrustation of a concrete sebaceous substance upon the surface of the epidermis, confounded, according to Mr. E. Wilson, with ichthyosis, to which it bears a close resemblance. In many cases there is neither redness nor heat, nor is the affection often accompanied by constitutional symptoms.

ICHTHYOTOXICUM, from *ἰχθύς*, 'a fish,' and *τοξικόν*, 'a poison.' Fish poison.

ICICA ARACOUCHI'NI. *Aracouchini* is a balsam, extracted by incision, from this tree in Guyana. The Galibis use it for healing wounds.

ICICA ICICARIBA, see *Amyris elemifera*.

ICTÈRE, Icterus—*i. Bleu*, Cyanopathy—*i. des Nouveaux-nés*, Icterus infantum—*i. Noir*, Melæna.

ICTERICUS, Antiicteric. Also, relating to, or resembling Icterus,—*Ictero' des*.

ICTERITIA ALBA, Chlorosis—*i. Flava*, Icterus—*i. Rubra*, Erysipelas—*i. Rubra*, Erysipelas.

ICTERODES, Ictericus.

ICTERUS, *Icterus flavus*, *I. vorus*, from *ικτερις*, a species of weasel, whose eyes are yellow (?), *Morbus arcuatus* vel *arquatus*, *Aurigo*, *Aurigo*, *Morbus regius*, *Morbus luteolus*, *Cholelith'ia icterus*, *Cholihæmia*, *Choleplania*, *Chole'sis*, *Dermatocholo'sis*, *Suffu'sio aurigino'sa* seu *fellis* seu *bilis*, *Icteritia flava*, *Icterus flavus*, *I. Ictero'des*, *Cachex'ia icter'ica*, *Fellis suffu'sio*, *Fellis obstructio*, *F. Superfu'sio*, *Bilious Dyscrasy*, *Jaundice*, *Yellows*, (F.) *Ictère*, *Jaunisse*, *Bile répandue*. A disease, the principal symptom of which is yellowness of the skin and eyes, with white fæces, and high-coloured urine. It admits of various causes; in fact, any thing which can directly or indirectly obstruct the course of the bile, so that it is taken into the mass of blood and produces the yellowness of surface; the bile being separated by the kidneys, causes yellowness of urine, and its being prevented from reaching the intestine occasions the pale-coloured fæces. The prognosis, in ordinary cases, is favourable;—when complicated with hepatic disease, unfavourable. The treatment is simple—an emetic or purgative, given occasionally so as to elicit the return of the bile to its ordinary channels; light tonics; unirritating diet; cheerful company, &c.

ICTERUS ALEUS, Chlorosis.

ICTERUS INFANTUM, *I. Neonatorum*, *Pædi'cerus*, *Aurigo naophyto'rum*, *Yellow gum*, *Yellow gown*, (F.) *Ictère des nouveaux-nés*, is a common affection and frequently dependent upon obstruction of the choledoch duct, by the meconium. It requires time; and castor oil, occasionally.

ICTERUS MELAS, Melæna—*i. Neonatorum*, *I. infantum*—*i. Niger*, Melæna.

ICTODES FÆTIDUS, Dracontium fætidum.

ICTUS. 'A stroke or blow;' *Plegè*, *Plaga*. *Ictus solis*, a stroke of the sun. See *Coup de soleil*. *Ictus*, also, means the pulsation of an artery and the sting of a bee or other insect.

ICTUS, Blow—*i. Cordis et arteriarum*, Pulse—*i. Sanguinis*, Apoplexy—*i. Solis*, *Coup de soleil*.

IDE'A, *Idea*, *Ide'olum*, *Ideach* (? Paracelsus) (F.) *Idée*. The image or representation of an object in the mind; from *ιδεω*, 'I see.'

IDE'A, FIXED or PREDOMINANT, *Idea fixa*,

*Ideopeg'ma*. Tension of the mind on one notion; often observed in insanity.

IDEA MORBI. Knowledge or idea of a disease.

IDEACH, Idea.

IDE'AL, *Ide'al'is*. Mental, notional, fancied.

*Morbi ideales*. Ideal diseases. Diseases of the imagination.

IDÉE, Idea.

IDENTITY (PERSONAL), *Iden'titas*, from *idem*, 'the same.' *Sameness*. It is sometimes a question in legal medicine to decide upon personal identity: that is, whether an individual be the same he represents himself to be. Physical marks form the great criteria.

IDEOL'OGY, *Ideolog'ia*, from *ιδεω*, 'I see,' and *λογος*, 'a discourse.' The science of ideas. Intellectual philosophy.

IDEOPEGMA, Idea, fixed.

IDEOSYNCHYSIE, Delirium.

IDIOCRASIS, Idiosyncrasy.

IDIOCTONIA, Suicide.

IDIO-MIASMATA, see *Miasm*.

IDIOPATHI'A, *Idiopath'ia*, *Protopath'ia*, *Pro'prius affectus*, *Morbus idiopath'icus* seu *proprius* seu *prima'rius* seu *protopath'icus* seu *origin'al'is*, *Malum prima'rium*, from *ιδιος*, 'peculiar, proper,' and *πάθος*, 'an affection.' A primary disease; one not depending on any other.

IDIOPATHIC, *Pro'prio habitu*, *Constitutio'nè pro'pria pendens*, *Idiopath'icus*, *Idiopath'es*. Primary affections and their symptoms are so denominated.

IDIOPTCY, Achromatopsia.

IDIOSYNCRASIA, Idiosyncrasy—*i. Hæmorrhagica*, *Hæmatophilia*—*i. Olfactoria*, *Parosmia*.

IDIOSYNCRASY, *Idio'scrasy*, *Idiosyn'crasia*, *Idiosyn'crasia*, *Idiopath'ia*, *Idio'crasia*, *Idiosyn'crasia*, from *ιδιος*, 'peculiar,' *συρ*, 'with,' and *κρασις*, 'temperament.' A peculiarity of constitution, in which one person is affected by an agent, which, in numerous others, would produce no effect. Thus shell-fish, bitter almonds, produce urticaria in some, by virtue of their idiosyncrasies. Others faint at the sight of blood, &c.

ID'IOT, *Idio'ta*, 'foolish, stupid, ignorant.' Now used for one who is fatuous, or who does not possess sufficient intellectual faculties for the social condition, and for preserving himself from danger,—*Homo fat'us*.

IDIOTIA, Idiostism.

ID'IOTISM, *Idiotia'mus*, *Idiot'ia*, *Imbecill'itas mentis*; *Mo'ria demens Ana'a*, *Mo'ria*, *Moro'sia*, *Fatu'itas*, *Aman'tia*, *Stupid'itas*, *Voco'r'dia*, *Imbecill'itas Inge'nii*, *Id'io'cy*, *Id'iotcy*, *Fatu'ity*. (F.) *Démence innée*, *Idiotisme*. Same etymon. A species of unsound mind, characterized by more or less complete obliteration of the intellectual and moral faculties. It may supervene on mania and melancholia, when it is termed *Demen'tia*, but more commonly it depends upon original conformation. It may, also, be symptomatic of organic disease of the brain, which has come on after birth. Idiostism exists in various degrees. Some idiots are mere automata, exhibiting scarcely any sensibility to external impressions; others are capable of articulating a few words, and possess certain mental emotions to a limited extent. The physiognomy is usually vacant, step un-

steady, and articulation imperfect or broken. The affection is almost always incurable.

**IDYOTISME**, Idiostism.

**IDYTROPHIA**, Idiosyncrasy.

**IDOLUM**, Hallucination, Idea.

**IDROSIS**, Ephemeros.

**IF**, *Taxus baccata*.

**IFFIDES**, *Plumbi subcarbonas*.

**IGDE**, Mortar.

**IGDIS**, Mortar.

**IGNATIA AMARA**. The systematic name of the plant which affords *St. Ignatius's Bean*. *Faba Indica*, *Faba Sancti Ignatii*, *Faba febrifuga*, (F.) *Ignatio*, *Fève de Saint Ignace*. The seeds are bitter and poisonous, containing Strychnia; which see.

**IGNATIE**, *Ignatia amara*.

**IGNAVIA**, Inertia—i. seu Ignavitas partium genitalium, Impotence.

**IGNIS**, 'fire.' Hence:

**IGNIS ACTUALIS**, Cauterium—i. Animalis, Animal heat.

**IGNIS CALIDUS**. 'A hot fire.' A violent inflammation, about to degenerate into gangrene.

**IGNIS COLUMELLE**, Erysipelas.

**IGNIS FRIGIDUS**. 'A cold fire.' Sphacelus.

**IGNIS NATURALIS**, Animal heat.

**IGNIS PERSICUS**, Anthrax, Herpes zoster—i. *Philosophicus*, *Phosphorus*—i. Potentialis, see *Cauterium*—i. *Sacer*, *Erysipelas*, *Herpes zoster*—i. *Sancti Antonii*, *Erysipelas*.

**IGNIS SAPIENTIUM**. The ancient name for the heat of horses' dung.

**IGNIS SYLVATICUS**, *I. sylvestris*, *I. volaticus*, *I. volagrus*, *Strophulus sylvestris*, *S. volaticus*, (F.) *Feu sauvage*, *F. volage*, *Flamboise*. Probably, the *Porri-go larvaalis* or *crusta lactea* of infants. Also, a transient redness of the face and neck, sometimes observed in hysterical and chlorotic females.

**IGNIS SYLVESTRIS**, *I. sylvaticus*.

**IGNIS VITALIS**, Animal heat.

**IGNIS VOLAGRIUS**, *I. sylvaticus*—i. *Volaticus*, *I. sylvaticus*.

**IGNIVOROUS**, *Pyrophagus*.

**IGNYE**, *Poples*.

**IGNYS**, *Poples*.

**ILAPHIS**, *Arctium lappa*.

**ILEA**, *Flanks*.

**ILECH**, *Plech*, *Ileias*, *Ilias'ter*, *Yhã'ter*, *Elias'ter*, *Ilias'trum*, *Ileias'ados*, *Ileias'dos*, *Ileias'adum*, *Ileias'adus*. Terms used by Paracelsus to designate the first matter:—the beginning of every thing.

**ILEIADOS**, *Ilech*.

**ILEIADUM**, *Ilech*.

**ILEIAS**, *Ilech*.

**ILEIDOS**, *Ilech*.

**ILEITIS**; from *Ileum*, 'the intestine, ileum,' and *itis*, a suffix denoting inflammation. Inflammation of the ileum.

**ILEO-CHOLOSIS**, *Diarrhœa*, *bilious*.

**ILEO-COLIC**, *Ileo-colicus*. Relating to the ileum and colon:—as the ileo-colic valve or valve of Bauhin.

**ILEO-COLITIS**, *Enteritis*.

**ILEO-DICLIDITE**, see *Typhus*.

**ILEO-LUMBAR**, *Ileo-lumbalis*, *Ileo-lumbaria*. Belonging to the ilium and lumbar region.

**ILEO-LUMBAR ARTERY**, *Ileo-lumbar artery*, *Iliaco-muscular*, (Ch.), is given off by the hypogastric, opposite the base of the sacrum. It ascends behind the psoas muscle, and divides

into two branches;—an ascending and a transverse, which give off numerous ramifications to the neighbouring parts.

**ILEO-LUMBAR LIGAMENT**, *Ilio-lumbar Ligament*, *Ilio-lumbo-vertebral ligament*, *Vertebro-iliac ligament*, is a broad, membraniform, triangular ligament, extending horizontally from the transverse process of the 5th lumbar vertebra to the upper and posterior part of the iliac crest. It unites the vertebral column with the pelvis.

**ILEON**, *I'eum*, *Eil'oon*, *I'l'ium*, *Intesti'num circumvolu'tum*, from *inarc*, 'to turn,' 'to twist.' Anatomists have given this name to the longest portion of the small intestine, which extends from the jejunum to the cœcum. It was so called, from its forming a considerable number of convolutions.

**ILEOPYRA**, see *Typhus*.

**ILEOSIS**, *Ileus*.

**ILEO-TYPHUS**, see *Typhus*.

**ILES**, *Flanks*.

**ILEUS**, *Eil'ous*, from *eilow*, 'I twist or contract.' *Colica Ileus*, *Enterole'sia*, *Enterole'sis*, *Colica spasmodica*, *Ileus spasmodicus*, *Chordap'us*, *Passio Ili'aca*, *Iliac Passio*, *Vol'vulus*, *Ileo'sia*, *Miserere mei*, *Convul'sulus*, *Tormen'tum*, *Interceptio Intestino'rum*, (F.) *Colique de Misericorde*, *C. de Miserere*. A disease, characterized by deep-seated pain of the abdomen, stercoraceous vomiting, and obstinate constipation. It is often occasioned by hernia obstructing the passage of the fœces through a part of the intestinal canal. The term *Ileus* has been applied to various affections—to simple nervous colic, intussusception, and to strangulation of the small intestine, &c. Various remedies have been employed:—the majority for the purpose of procuring alvine evacuations,—as purgatives, in draught, pill, or glyster; suppositories, tobacco glysters; pure mercury; leaden bullets; antispasmodics and narcotics; blisters to the epigastrium; ice by the mouth or injected into the rectum. Some of these have, occasionally, succeeded,—especially the tobacco glyster, and ice to the tumour, where the disease has been occasioned by strangulated hernia. It is very dangerous.

**ILEUS FLAVUS**, *Icterus*—i. *Icteroides*, *Icterus*—i. *Inflammatorius*, *Enteritis*.

**ILEX AQUIFOLIUM**. The systematic name of the *Common Holly*, *Aquifolium*, *Agri-folium*, (F.) *Houz*, *H. communis* or *Chêne vert*. The leaves of this plant have been recommended as tonic, astringent, and antiseptic, and have been prescribed in atonic gout; intermittents; dyspepsia, &c. *Ilicine*, the active principle, has also been advised. It is obtained by dissolving the alcoholic extract of the leaves of the holly in water, and successively treating it with the subacetate of lead, sulphuric acid, and carbonate of lime. The filtered and evaporated product is then dissolved in alcohol; the mixture filtered and evaporated in shallow vessels.

**ILEX CASSINE**, *Ilex vomitoria*.

**ILEX MAJOR**. From the berries of this tree, called by the Spaniards *Bellotas*, a juice may be expressed, which forms a slightly astringent emulsion with water, and has been recommended by some Spanish physicians in humid cough, hæmoptysis, &c.

**ILEX MATE**, *Ilex paraguensis*.

**ILEX OPACA**, *American Holly*, grows throughout the Atlantic portion of the United States.

It is said to possess the same properties as the European variety.

**ILEX PARAGUENSIS**, *I. Maté*. A native of Paraguay, which affords the celebrated *Matter*, or *Maté*, drunk in place of the Chinese tea by the people of Paraguay.

**ILEX VOMITORIA**, *Ilex Cassi'ne*, *Cassi'na*, *Dahoon holly*, *Apalachinæ Gallis*, *South-Sea Tea*, *Ev'ergreen Cassi'næ*, *Cassé'na*, *Yasupon*, *Yopon*, (F.) *Thé des Apalaches*, *Hout Apalachine*, *Apalachine*, *Thé de la Mer du Sud*. A tree, indigenous in the southern parts of the United States. The leaves, when dried, are aromatic, stimulant, stomachic, and expectorant, and are used as a tea. When fresh they are emetic and cathartic.

**ILIA**, Flanks.

**ILIA**, *Ili'acus*, from *Ilia*, 'the flanks.' Relating to, or connected with, the flanks.

**ILIA** ARTERIES, *Arter'ia Iliaca*. This term has been given to several arteries. The *Primary Iliacs*, (F.) *A. Iliques primitivæ*,—*Pelvicurales*, (Ch.) arise from the bifurcation of the aorta, opposite the body of the 4th lumbar vertebra, and descend, in a divergent manner; until, opposite the sacro-iliac symphysis, they divide into two considerable trunks,—the *internal Iliac* or hypogastric (which see) and the *external Iliac*—*Portion Iliaque de la crurale*, (Ch.) This proceeds from the sacro-iliac juncture as far as the crural arch, when it assumes the name *Femoral Artery*. Before passing under the arch it gives off two pretty considerable branches,—the *Epigastric* and the *Circumflexa Ilii*. This last, which is called, also, *anterior Iliac* by some anatomists,—*Circumflexa de l'Ilium*; (Ch.) leaves the external iliac at the crural arch. It ascends along the outer edge of the iliac muscle, and divides into two branches,—an *internal* and an *external*.

The *Iliaca Interna Minor* vel *Ilio-lumbal'is* is a small artery, which sometimes arises from the hypogastric; at others, from the beginning of the gluteal. It is sent, chiefly, to the psoas and iliacus internus muscles.

**ILIA** CREST, *Crista Ilii*, is the upper margin of the ilium. (F.) *Crête Iliaque*. It is very thick, and curved like the Italic *S*. It affords attachment to the broad muscles of the abdomen.

**ILIA** FOSSE are two in number; the *internal*, the depression presented by the ilium on its interior, and at the upper part in which the *Iliacus internus* is lodged:—and the *external*, an excavation on the outer surface of the same bone, occupied by the *Glutæi muscles*.

**ILIA** MUSCLE, INTERNAL, *Ili'acus internus* Muscle, *Iliacus*, *Iliaco-trochantérien* (Ch.); *Femur moventium septimus*, *Iliac muscle*, is situate in the fossa iliaca, and at the anterior and superior part of the thigh. It is broad, radiated, triangular; and is attached, *above*, to the two upper thirds of the fossa iliaca, and to the internal part of the iliac crest:—*below*, it terminates by a tendon, which is common to it and the psoas magnus, and is fixed into the lesser trochanter. When this muscle contracts, it bends the pelvis on the thigh, and conversely. It is also a rotator of the thigh outwards, and prevents the trunk from falling backwards.

**ILIA** PASSION, Reus.

**ILIA** REGIONS, *Regio'nes ili'acæ*, *Inan'ia*, are

the sides of the abdomen between the ribs and the hips.

**ILIA** SPINES, *Spinous Proc'esses* of the *Ilium*, are four in number. They are distinguished into *anterior* and *posterior*. Of the *anterior*, one is *superior*. It bounds the *crista ilii* anteriorly, and affords origin to the sartorius muscle. The other is *inferior*, and receives the tendinous origin of the rectus femoris.

The two *Posterior Iliac Spines* are divided, like the anterior, into *superior* and *inferior*. They afford insertion to strong ligaments, which unite the ilium with the sacrum.

**ILIA**CO-TROCHANTÉRIEN, *Iliacus internus*.

**ILIA**CUS, I. internus—i. *Externus*, *Pyramidalis*.

**ILIADUS**, Ilech.

**ILIA**STER, Ilech.

**ILIA**STRUM, Ilech.

**ILINGOS**, Vertigo.

**ILIO-ABDOMINAL**, *Obliquus internus abdominis*—i. *Aponévrosi-fémoral*, *Fascia lata muscle*—i. *Costal*, *Quadratus lumborum*—i. *Cresti-tibial*, *Sartorius*—i. *Femoral*, *Coxo-femoral*—i. *Iscii-trochantérien*, *Glutæus minimus*—i. *Lombo-costo-abdominal*, *Obliquus internus abdominis*—i. *Lumbalis*, *Ileo-lumbar*, see *Iliac arteries*—i. *Lumbi-costal*, *Quadratus lumborum*—i. *Lumbo-vertebral ligament*, *Ileo-lumbar-ligament*.

**ILIO-PECTINEA**, belonging to the ilium and to the pecten or pubis.

**ILIO-PECTINEAL EMINENCE** is so called from being formed by the junction of the ramus of the ilium with that of the pubis. It affords attachment to the psoas minor.

**ILIO-PECTINEA LINEA**, or *Linea innominata*, is the projecting line or ridge of the ilium and pubis, which forms part of the brim of the pelvis.

**ILIO-PRÉTIBIAL**, *Sartorius*.

**ILIO-PSOITIS**, from *Ilium*, 'the ilion,' *psas*, 'the loins,' and *itis*, denoting inflammation. Inflammation of the ilium and psoas muscle.

**ILIO-PUBO-COSTO-ABDOMINAL**, *Obliquus externus abdominis*—i. *Rotulion*, *Rectus femoris*—i. *Sacral*, *Sacro-iliac*—i. *Sacral articulation*, *Sacro-iliac articulation*—i. *Sacro-femoral*, *Glutæus major*.

**ILIO-SCROTAL**, *Ilio-scrotal'is*. Professor Chaussier calls thus the external twig, furnished by the anterior branch of the first lumbar pair of nerves. It distributes its ramifications to the muscles of the abdomen, and to the integuments of the groin, pubes and scrotum.

**ILIO-TROCHANTÉRIEN**, *Glutæus medius*—i. *Trochantérien petit*, *Glutæus minimus*.

**IL'ION**, *Ili'um*, *Ili'eum*, *Haunch bone*. The largest of the three bones which constitute the os innominatum in the fetus and child. It was probably so called from its seeming to support the intestine ileon; or, perhaps, because its crest is curved upon itself, from *islon*, 'I twist,' 'I roll.' This portion of the os innominatum is usually so called in the adult. The posterior surface is called *Dorsum*, the internal *Venter*. The upper semicircular edge is the *Crista* or *Spine*: at the anterior part of which is the *anterior and superior spinous process*; and, below, the *anterior and inferior spinous process*. At the back part of the spine are two *spinous*

*processes, the posterior and superior, and posterior and inferior.* See *Iliac*.

**ILITHYIA**, *Ειλιθυία, Lucina, Juno Lucina*. The Goddess who presided over parturient females, with the Greeks and Romans.

**ILIUM**, *Ileum, Ilium*.

**ILKESTON, MINERAL WATERS OF**. Ilkeston is in Derbyshire, England, about eight miles from Nottingham. The water contains carbonates of lime and soda, chloride of calcium, sulphate of magnesia, sulphate of soda, carbonic acid, sulphohydric acid, and a little iron.

**ILLACHRYMATIO**, Epiphora.

**ILLECEBRA**, *Sedum*—i. Major, *Sedum telephium*.

**ILLEGITIMATE**, *Illegitimus*, from *in*, 'negation or opposition,' and *legitimus*, 'legitimate,' from *lex, legis*, 'law.' That which is contrary to law: which has not the conditions required by law,—as an illegitimate birth—one out of wedlock.

**ILLEGITIMATE OR BASTARD FEVERS** are those whose progress is anomalous.

**ILLIC'IUM ANISAT'UM**, *Yellow-flowered Anise, Aniseed Tree, Star Anise, Ani'rum stella'tum, Anisum Sinen'se, Semen Badian, (F.) Anis de la Chine, A. étoilé, Badiano. Fam. Magnoliacæ. Sez. Syst. Polyandria Polygynia*. The seeds are used like the aniseed. The same tree is supposed to furnish the aromatic bark, called *Cortex Ani'si Stella'ti, Cortex Lavola*.

*Illicium anisatum* is said to furnish much of the so called *Oil of Anise* used in the United States.

**ILLIC'ICUM FLORIDA'NUM**, *Florida Anise Tree, Star Anise, Sweet Laurel*. An evergreen shrub, the bark, leaves, &c., of which, have a spicy odour like anise, and might be used for it.

**ILLIC'ICUM PARVIFLO'RUM**, a shrub of the hilly regions of Georgia and Carolina, has a flavour closely resembling that of sassafras root.

**ILLINITIO**, Inunction.

**ILLITIO**, Inunction.

**ILLITUS**, Inunction.

**ILLOS**, Eye, see *Strabismus*.

**ILLO'SIS**, *Ilo'sis*, from *illo*, 'the eye.' Distortion of the eyes. *Strabismus*.

**ILLUSIO SENSÛS**, Hallucination.

**ILLUSION**, Hallucination.

**ILLUTAMENTUM**, see *Illutatio*.

**ILLUTATIO**, from *in*, 'upon,' and *lutum*, 'mud.' A word used, by the ancients, for the act of covering any part of the body with mud,—*illutamentum*—with therapeutical views.

**ILOSIS**, Illosis.

**IMAGINATION**, *Imaginatio, Figuratio, Phantasia, Dianô'ma*, from *imago*, 'image.' The faculty of forming in the mind an assemblage of images and combinations of ideas, which are not always in connexion with external objects.

**IMBALSAMATION**, Embalming.

**IMBECIL'ITY**, *Imbecillitas, Stupiditas, Hebetudo ani'mi*. Weakness, especially of the intellect; incoherency; *Imbecillitas mentis*.

**IMBECILLIS**, Infirm.

**IMBECILLITAS INGENII**, Idiostism, Imbecility—i. Mentis, Idiostism, Imbecility—i. Ventriculi, Gasterasthenia.

**IMBER'BIS**, *Imber'bus, Agenei'os, Apo'gon*. One devoid of beard.

**IMBIBITIO**, Absorption, Imbibition.

**IMBIBIT'ION**, *Imbibit'io, Emp'osis, Endosmose, Aspiration*, from *imbibere*, (*in*, and *bibere*), 'to drink, to imbibe.' The action, by which a body becomes penetrated by a liquid. See *Endosmose*. Many of the phenomena of absorption are owing to imbibition.

**IMBEX NARIUM**, *Septum narium*.

**IMMERSUS**, *Subscapularis muscle*.

**IMMINENCE**, *Imminen'tia*, from *im*, and *manere*, 'to stay.' Staying over, or upon; impending. Some authors have designated, by this term, the period which precedes the invasion of a disease; and when certain indications foretell its approach.

**IMMINENCE MORBIDE**, *Diathesis, Predisposition*.

**IMMISSO CATHETERIS**, *Catheterismus*.

**IMMISSOR**, Catheter.

**IMMOBILITAS**, *Acinesia*—i. Pupillæ, *Amaurosis*.

**IMMODERANTIA**, *Intemperance*.

**IMMODERATIO**, *Intemperance*.

**IMMOVABLE APPARATUS**, see *Apparatus*, *immovable*.

**IMMUTANS**, *Alterative*.

**IMPACT'ION**, *Impactio*, from *impingere*, (*im*, and *pangere*), 'to strike against.' A fracture of the cranium, ribs, or sternum, with depression of some of the fragments and projection of others externally. See *Eciesama*.

**IMPACTIENS BALSAMINA**, *Balsam weed, Touch-me-not*. This probably resembles the other species in its properties.

**IMPACTIENS FULVA** and **I. PAL'LIDA**, *Touch-me-not, Jewel weed, Balsam weed, Stippers, Col'andine, Quick-in-the-hand, Weath'ercocks*. Indigenous plants, having tender, juicy, almost transparent stems, and yellow flowers, which appear in July and August. It is found in low moist ground in every part of the Union. The properties are probably the same as those of **IMPACTIENS NOLI-ME-TANGERE** of Europe, which has an acrid taste, and acts as an emetic, cathartic, and diuretic.

**IMPEDIMENTUM**, *Emphragma*.

**IMPERATORIA**, *I. Ostruthium, Ostruthium, Astran'tia, Magistran'tia, Masterwort, (old F.) Austracho*. The roots of this plant were formerly considered *divinum remedium*. They are merely aromatic and bitter, and are not used.

**IMPERFORATE**, *Atretus*.

**IMPERFORATIO**, *Imperforation*—i. Ani, *Atresia ani adnata, Proctatresia*—i. Pupillæ, *Synezisis*—i. Uteri, *Metratresia*.

**IMPERFORATION**, from *im*, 'in,' *per*, 'through,' and *forare*, 'to bore.' *Imperforatio, Atr'esia, Atratis'mus, Cap'tetus*. Absence of a natural aperture; as, of the mouth, anus, vulva, nostrils, &c. It is congenital, being dependent upon faulty conformation.

**IMPERFORATION DE L'ANUS**, *Atresia ani adnata*.

**IMPETIGINOSITAS**, *Impetigo*.

**IMPETI'GO**, from *impeto*, 'I infest.' *Impetiginositas, Dart, Der'bia, Imp'etus, Peti'go, Ecpye'sis impeti'go, Phlysis impeti'go, Lepra squammosa, Running Scall or Tetter, Crusted Tetter, Pustular or Humid Tetter, Scall, Cow-rap, (F.) Dartra, D. crustacæ, D. erubescens, Lèpre humide, Mèlitagre*. A word used in various acceptations. In some writers it is synonymous with *itch*. In others, it means a variety of *herpes*. *Sauvages* employs it as a generic term,

under which he comprises syphilis, scorbutus, rachitis, elephantiasis, lepra, the itch, tinea, scrofula, &c. It forms, also, a genus in the class *Cachexia* of Cullen. In Bateman, it is the first genus of the 5th order, *Pustula*, and is defined—*the humid or running tetter*; consisting of small pustules, denominated *Psyracia*. It is unaccompanied by fever; not contagious, or communicable by inoculation. He has five species:—the *I. figurata*, *I. sparsa*, *I. erysipelato-des*, *I. scabida*, and *I. rodens*. See Psoriasis.

IMPETIGO EXCORIATIVA, Ichthyosis—i. Figurata, Porrigo lupinosa—i. Pellagra, Pellagra—i. Ulcerata, Zerna.

IMPETUM FACIENS, Enormon.

IMPETUS, Impetigo, Paroxysm.

IMPLICATIONES RETICULARES NERVORUM, Plexus nervorum.

IMPLICATI MORBI, *Implicati* seu *complecti* Morbi. Diseases, which exist in an organ; and produce, concurrently, disorders in other organs.

IMPLUVIUM, Embrocation, see Bath.

IMPOSTHUME, Abscess.

IMPOTENCE, *Acrati'a*, *Impotentia*, *I. generandi*, *Agenn'e'sia*, *Agen'nesis*, *Ignavia* seu *Ignavitas partium genitalium*, (F.) *Impu'ssance*, from *im*, 'priv,' and *potens*, 'able.' Loss of power over one or more of the members. Commonly, it means want of sexual vigour; incapacity for copulation; and chiefly on the part of the male. *Asty'sia*, *Astyph'ia*, *Asyno'dia*, *Adynamia viri'lis*. It has, also, been used synonymously with sterility. Impotence may be *absolute* or *relative*, *constitutional* or *local*, *direct* or *indirect*, *permanent* or *temporary*.

IMPOTENTIA, Adynamia, Impotence—i. Generandi, Impotence.

IMPOVERISHED, *Effe'tus*, *Depauperatus*, (F.) *Appauvri*. 'Having become poor;' originally from (L.) *pauper*, 'poor.' The Humorists applied this epithet to a humour, deprived of a part of its constituents, and particularly to the blood. This fluid was considered to be impoverished when it was pale, without the proper consistence, and abounding in serum. It was, on the contrary, rich, in their opinion, when of a scarlet colour; possessing consistence; when it coagulated promptly, and the quantity of serum, compared with that of the clot, was by no means considerable.

IMPRÆGNATIO, Fecundation, Pregnancy.

IMPREGNATION, Fecundation.

IMPRES'SION, *Impres'sio* (*in*, and *premere*, *pressum*, 'to press,') *Pros'bolé*, (F.) *Empreinte*. A more or less deep indentation which certain organs seem to make on others. The inequalities observable on the bones, which appear to be made by the superjacent organs.

IMPRES'SIONS DIGITAL, *Impressio'nes digital'ta cran'ii*, *Fossa digital'es*, are the depressions of various forms, observable at the inner surface of the cranium, which look, at first view, as if they were made with the fingers.

IMPUBER, *Impu'bes*, *Impu'bis*, *Ans'bus*, *Capilla'tus*, from *in*, 'negation,' and *pubertas*, 'puberty.' (F.) *Impubère*. One who has not attained the age of puberty.

IMPUBES, Impuber.

IMPUDICUS, see Digitus.

IMPUISSANCE, Impotence.

IMPULSE, DIASTOLIC, *Back stroke of the heart*. A jog or stroke which has been termed the 'back stroke,' felt at the end of each pulsation, and which would seem to be owing to the refilling of the ventricles.

IMPULSE OF THE HEART, see Heart.

IMPURITATES ALVINÆ, Fæces.

INANIA, Iliac regions.

INANITIATED, see Inanitation.

INANITIATION, *Inanitiatio*, same etymon. The act of being exhausted for want of nourishment. One so exhausted is said to be *inanitiated*.

INANIT'ION, *Inanit'io*, *Inanit'itas*, from *inanire*, 'to empty;' *cenosis*. Exhaustion for want of nourishment. To die from inanition is to die from exhaustion.

INAPPETENTIA, Anorexia, Dysorexia.

INARTICULATIO, Enarthrosis.

INAURA'TION, *Inaura'tio*, from *in*, and *aurum*, 'gold.' The gilding of pills or boluses.

INCANTAMENTUM, Charm.

INCANTATION, *Incantatio*, *Incantamentum*, *Epodé*, from *in*, and *cantare*, 'to sing,'—for example, a magical song. A mode of curing diseases by charms, &c., defended by Paracelsus, Van Helmont, and others.

INCARCERATIO, *Chatonnement*, *Incarceration*—i. *Intestinorum interna*, *Enteremphraxis*—i. *Intestinorum*, *Enteroperistole*.

INCARCERATION, *Incarceratio*, from *in*, 'in,' and *carcer*, 'prison.' A hernia is said to be *incarcerated*, *Hernia incarcerata*, when, owing to constriction about the neck of the hernial sac or elsewhere, it cannot be reduced with facility. Incarceration is sometimes used in the same sense as strangulation.

INCARNANS, *Incarnativus*, *Sarco'ticus*, *Stal'ticus*, *Plero'ticus*, *Anaplero'ticus*, from *in*, and *caro*, *carnis*, 'flesh.' Medicines which were fancied to promote the regeneration of the flesh. Certain bandages and sutures have, also, been so called.

INCARNATIO, Incarnation—i. Unguium, Onychogryphosis.

INCARNATION, *Incarnatio*, same etymon. Growth of flesh or granulations.

INCARNATUS, Carneous.

INCENDIUM, from *incendere*, (*in*, and *cardo*,) 'to burn.' *Pyrea'a*, *πυραια*, *Causis*, *Phlogo'sis*. A burning fever or any burning heat.—*Incendium febrile*, *Incens'io*.—Willis. Inflammation, Phlegmon.

INCENDIUM SPONTANEUM, Combustion, human.

INCENSIO, Incendium.

INCENTIVUM, Stimulant.

INCERATION, *Incera'tio*, *Encero'sis*, from *cera*, 'wax.' The act of incorporating wax with some other body; or, rather, that operation whose object is to communicate to a dry substance the consistence of wax.

INCERNI'ULUM, from *incernere*, (*in* and *cernere*,) 'to sift.' A strainer or sieve.

INCESSIO, Bath, half, Semicupium.

INCESSUS, Walking.

INCIDENTIA, from *incidere*, (*in*, and *cardo*,) 'to cut.' (F.) *Incisifs*. This name was formerly given to medicines to which was attributed the property of cutting thick or coagulated humours. The fixed alkalis, hydrosulphurets of alkalis, sulphurous water, &c., were considered to belong to this class.

INCISIFS, Incidentia.

**INCISIO**, Cut, Incision—i. Simplex, Haplotomia.

**INCISION**, *Incis'io*, *En'copē*, *Incisu'ra*, *Incisi'vus*, *Tomé*, (F.) *Taillade*. A methodical division of soft parts with a cutting instrument.

**INCISIVE**, *Incisi'vus*, *Incisi'rius*, *Fossa incisi'va*, *F. myrtifor'nis*, is a depression in the superior maxillary bone, above the incisor teeth.

**INCISIVE BONE**, Intermaxillary bone—i. Canal, see Palatine canal.

**INCISIVE TEETH**, *Incisor Teeth*, *Dentes incisores*, *tom'ici*, *ctenes*, *dichasteres*, *gelasi'ni*, *primoras*, *raso'rii*. The teeth which occupy the anterior part of the upper and lower jaws are so called, because they are used for cutting the food in the manner of cutting instruments.

**INCISIVUS**, **MUSCULUS**, Levator labii superioris proprius—i. Inferior, Levator labii inferioris—i. Lateralis et pyramidalis, Levator labii superioris alæque nasi—i. Medius, Depressor alæ nasi.

**INCISOR TEETH**, Incisive teeth.

**INCISORIUM**, *Tom'on*. An operating table. A scalpel.

**INCISORIUS**, Incisive.

**INCISURA**, *Echanuro*, Incision—i. Crucialis, Crucial Incision—i. Ischiadica Major, Sciatic notch, greater—i. Ischiadica Minor, Sciatic notch, lesser—i. Lienalis, Hilus lienalis—i. Renalis, Hilus renalis—i. Scapularis, Notch, scapular.

**INCISURA TRAGICA**, *Notch of the Concha*. A wide deep and rounded notch, which separates the tragus from the antitragus.

**INCISURES DE SANTORINI**, Santorini, fissures of.

**INCISUS**, Incision.

**INCITABILITY**, Irritability.

**INCITAMENTUM**, Stimulus.

**INCITANS**, Stimulant.

**INCITATIO**, Stimulation.

**INCLAVATIO**, Gomphosis, see Wedged.

**INCLINATIO**, Decline—i. Cæli, Climate.

**INCLUSION**, **MONSTROSITY BY**, *Emboltement*.

**INCLUSUS**, Wedged.

**INCOCTUS**, see Crudity.

**INCOHERENCE**, *Incohe'rancey*, (F.) *Anacolutis*, *Révasorie*; from *in*, negative, *co*, *con*, *cum*, 'with,' and *herere*, 'to stick.' Want of dependence of one part on another. The condition of the mental manifestations in dementia, &c.

**INCOMPATIBLE**, from *in*, 'negation,' and *competere*, 'to agree.' A substance, which cannot be prescribed with another, without interfering with its chemical composition or medicinal activity.

**INCONTINENTIA**, from *in*, 'negation,' and *contineo*, 'I contain;' *Anepsi'chesis*. 'Incontinence.' 'Inability to retain the natural evacuation.' Abuse of the pleasures of love.

**INCONTINENTIA ALVI**, Diarrhœa—i. Urinæ, Enuresis, Scoracrasia.

**INCORPORATION**, *Incorporatio*, *Corp'oratio*, *Ensomato'sis*, *Metensomato'sis*, from *in*, and *corpus*, 'a body.' An operation, by which medicines are mixed with soft or liquid bodies, in order to give them a certain consistence. Also, the thorough admixture of various substances.

**INCRASSANTIA**, *Incrassati'va*, *Inviscant'ia*, *Spissant'ia*, *Egyptica*, *Condensant'ia*, *Pa-*

*chyn'tica*, *Pycnot'ica*, *Pycnicmas'tica*, from *in*, and *crassus*, 'thick.' Medicines which were formerly believed to possess the power of thickening the humours, when too thin. All mucilaginous substances were so regarded.

**INCRASSATIVA**, *Incrassantia*.

**INCREASE**, *Incrementum*, *Auzis*, *Auzo'sis*, from *in*, and *crescere*, 'to grow.' (F.) *Accroissement*. Augmentation of the size or weight of a body, by the application of new molecules around those which already exist.

**INCREMENTUM**, Augmentation, Increase.

**INCRUCIATIO**, Decussation.

**INCRUSTATION**, *Incrusta'tio*, from *in*, and *crusta*, 'a crust;' *Con'asis*. The act of forming a crust on the surface of a body, as well as the crust itself. Also, the calcareous deposits or cartilaginous plates, which sometimes form in organs.

**INCUBATION**, *Incuba'tio*, *Incubit'io*, *Incubitus*, from *incubare*, (*in*, and *cubare*), 'to lie upon.' This word, which is used in natural history for the sitting of birds upon their eggs, is employed, figuratively, in medicine, for the period that elapses between the introduction of a morbid principle into the animal economy and the invasion of the disease.

**INCUBITIO**, Incubation.

**INCUBITUS**, Incubation.

**INCUBO**, Incubus.

**INCUBUS**. Same etymon. *In'cubo*, *Ephial'tes*, *Ephial'tes nocturnus*, *Ephial'tes*, *Epilep'tia nocturna*, *Asthma nocturnum*, *Pnigal'ion*, *Suc'cubus*, *Oneirodyn'ia gravans*, *Brethis'mus onirodyn'ia*, *Noctur'na oppres'sio*, *Epi'olé*, *Babuzio'rius*, *Nightmare*, (F.) *Couchemar*, *Caucheville*, *Cochemar*, *Oneirodynie gravative*. Same etymon. A sensation of a distressing weight at the epigastrium during sleep, and of impossibility of motion, speech or respiration; the patient at length awaking in terror, after extreme anxiety. The nightmare is often the effect of difficult digestion or of an uneasy position of the body. At other times, it occurs in consequence of severe emotions. The sensation of suffocation was formerly ascribed to the person's being possessed, and the male spirits were called *incubes*—the female *succubes*. The disease requires no particular treatment. The causes must be avoided.

**INCUBUS VIGILANTIUM**, *Ephial'tes vigilanti-um*, *E. hypochondri'aca*, *Daymare*. This is produced during wakefulness; the sense of pressure being severe and extending over the abdomen; respiration frequent, laborious, and constricted; eyes fixed; sighing, deep and violent; intellect undisturbed.

**INCUNABULA**, Swathing clothes.

**INCUNEATIO**, see Wedged.

**INCURABLE**, *Incurab'ilis*, *Insanab'ilis*, *Analthes*, *Anaces'tos*, *Atherapeut'us*, from *in*, negative, and *cura*, cure. That which is not susceptible of cure;—applied to both patients and diseases.

**INCURIA**, Acedia.

**INCURSUS ARTERIARUM**, Pulse.

**INCURVATIO**, Gryposis.

**INCUS**, (*in*, and *cudo*, 'I hammer,') 'an anvil.' *Aemon*, *Os incul'di sim'ile*, *Ossiculum Incul'di seu mola'ri denti comparat'um*, (F.) *Enclume*. One of the small bones of the ear, so called from its fancied resemblance to a smith's anvil. It is situate in the cavity of the

tympanum, between the malleus and orbicular. Its body is articulated with the malleus; its *horizontal ramus*, which is the shortest, corresponds with the entrance of the mastoid cells; and its *vertical ramus* is articulated with the os orbicular. The incus is composed of a compact tissue, and is developed from a single point of ossification.

INDEX, *Dig'itus index seu secundus seu salutatorius, Demonstrator, Indicator, Indicatorius, Lich'anos, Deicticos, from indicare, 'to point out.'* The forefinger, index finger. See *Digitus*.

INDIAN ARROW WOOD, see *Eunonymus*—i. *Paint, Hydrastis Canadensis*—i. *Physic, Gillenia trifoliata*—i. *Physic, small-flowered, Gillenia stipulacea*.

INDIANA, MINERAL WATERS OF. A medicinal spring, near Jeffersonville, is much frequented. Its waters are strongly impregnated with sulphur and iron.

INDICANT, *In'dicans, Endeicticos, (F.) Indicatif.* Same etymon as *index*. Any thing which, in the course of a disease or in what precedes or accompanies it, concurs in pointing out the means to be used for its cure.

INDICATIF, *Dicant.*

INDICATING DAYS, *Dies Indicas, D. Indicato'ris seu Indican'tes, D. contemplan'tes, (F.) Jours indicateurs.* Hippocrates and others have thus called the middle day of the septenary; because they imagined, that indications were sometimes given then of the crisis which would occur in the last day of the septenary.

INDICA'TION, *Indica'tio, Accusa'tio, Dela'tio, Endeiz'is, Endex'is, Bothematicum Semo'ion.* The object proposed in the employment of any means which are had recourse to for the cure of disease. It may also be defined—the manifestation afforded by the disease itself of what is proper to be done for its removal.

INDICATOR, *Extensor proprius indicis, see Digitus, and Index.*

INDICUM, *Indigo.*

INDICUS COLOR, *Indigo.*

INDIGENCE, *Want.*

INDIG'ENOUS, *Indig'ena.* Whatever is native in a country, in opposition to *exotic*; as an *indigenous remedy, indigenous disease, &c.*

INDIGESTION, *Dyspepsia*—i. *Alkaline, see Dyspepsia*—i. *Neutral, see Dyspepsia.*

INDIGITATIO, *Intussusceptio.*

INDIGNABUNDUS, *Rectus externus oculi.*

INDIGNATORIUS, *Rectus externus oculi.*

INDIGO, *Indigum, In'dicum, Indicus color, Pimentum Indicum.* A dye-stuff, in small solid masses, of a deep azure blue colour, and devoid of smell and taste. It is obtained, by a fermentative process, from *Indigofera anil, I. argentea, and I. tinctoria*, and is sometimes used by the apothecary for colouring certain preparations. It has likewise been administered internally, of late, in spasmodic diseases, especially in epilepsy. The dose may be at first grains, but it may be elevated to drachms.

INDIGO, *FAUX, Galega officinalis*—i. *Weed, Sophora tinctoria*—i. *Wild, Sophora tinctoria*—i. *Yellow, Sophora tinctoria.*

INDIGOFERA, *Sophora tinctoria*—i. *Anil, see Indigo*—i. *Argentea, see Indigo*—i. *Tinctoria, see Indigo.*

INDIGUM, *Indigo.*

INDISPOSIT'ION, *Mala disposit'io, Dysphoria, (F.) Malaise.* A slight functional disturbance, which may scarcely bear the name of disease. A feeling of sickness—*sensus agnitus/dinis.*

INDOLENT, *Indolens, from in, privative, and dolere, 'to be in pain.'* Exhibiting little or no pain. An epithet particularly applied to certain tumours.

INDOLENTIA, *Anodynia.*

INDOLES. A natural disposition or character.

INDOLES AN'IMI. The natural disposition or character of mind.

INDOLES MORBI. The nature or character of a disease.

INDOSYNCLONUS, *Berberi.*

INDUC'TIO, *Apago'ge, from inducere, (in, and ducere, 'to lead.')* A word used especially for the action of extending a plaster upon linen.

INDUCULA, *Waiscoat, strait.*

INDUMENTUM CORDIS, *Pericardium*—i. *Nervorum, Neurilema.*

INDU'RANS, *(in and durus), Scleroticus, Sclerunticus, Sclerunticus.* A medicine which hardens the parts to which it is applied.

INDURATIO, *Induration*—i. *Intestinorum, Enteropathia cancerosa*—i. *Maligna, Scirrhus*—i. *Renum, Nephroscleria*—i. *Tela cellulosa neonatorum, see Induration*—i. *Ventriculi scirrhosa, Gastroscirrus.*

INDURA'TION, *Indura'tio, Sclerys'ma, Sclerys'mus, Callor'itas, Indurescentia, Poroma, Porosis, (F.) Endurossement.* The hardness which supervenes, occasionally, in an inflamed part. It is one of the terminations of inflammation, and is owing to a change in the nutrition of the part.

INDURATION OF THE CELLULAR TISSUE, *Indura'tio seu Oppila'tio tela cellulosa neonatorum, Ethmyphytylosis, Compact Edema of Infants, Cat oculus Infantum, Induratio cellulosa, Sclero'sma, Sclero'sma, Sclero'ma, Sclero'der'ma, Cutis tensa chron'ica, Dermatopisclerosis, Dermatopisclerysmus, Ethmyphytylosis, Halonit'is, Phlegmama cellul'ris, Scirrhosar'ca neonatorum, Scler'asis neonatorum, Sclero'sis, Sti'pa'tio tela cellulosa Infantum, Skinbound Disease, (F.) Endurissement du tissu cellulaire; E'dème du tissu cellulaire des nouveau-nés, Asphyxie lente des nouveau-nés, is a disease which attacks infants a few days after birth, and which Chaussier proposed to call *Sclerème; from scler'is, 'hard.'**

The Induration of the cellular tissue of the adult, *Sclerostenosis cutanea*, has been regarded as the result of inflammation of the corium, *Chorionitis.*

INDURATION OF THE BRAIN, *Sclerencephalia*—i. *Grise, see Hepatization.*

INDURESCENTIA, *Induration.*

INDU'SIUM, *Chitonis'cos.* Strictly, 'a shirt;' 'a small tunic;' but some have so called the amnion.

INEDIA, *Fasting.*

INERTIA, *(from in, 'privative,' and ars, artis, 'art,') Ignavia, Ener'vitas.* Sluggishness, inactivity.

INERTIA OF THE WOMB, *(F.) Inertie de la matrice.* The diminution and even total cessation of the contractions of the uterus during labour; as well as the species of languor into

which it sometimes falls after the expulsion of the fœtus.

**INERTIE DE LA MATRICE**, Inertia of the womb.

**INESIS**, Cenosis.

**INETHMOS**, Cenosis.

**IN FANCY**, *Infantia*, from *in*, 'negation,' and *fans*, from *fari*, 'to speak.' Early childhood. Childhood; *Nepiotes*, *Paid'ia*, (F.) *Enfanco*. It generally includes the age from birth till the seventh year. See Age.

**INFANS**, *Paid'ion*, *Nepion*, (F.) *Enfant*. An infant; a child; one in infancy.

**INFANS RECENS NATUS**, *Nouveau-né*.

**INFANTIA**, Infancy.

**INFANTICIDE**, *Infanticidium*, *Tönooton'ia*, from *infans*, 'a child,' and *caedere*, 'to kill.' The murder of a child newly born, or on the point of being born. It may be perpetrated by the mother, or by some other person,—either by *commission*, that is, in consequence of a direct, voluntary act;—or by *omission* of those cares which are necessary for the preservation of the new-born.

**INFARCTUS**, *Emphraxis*—i. *Intestinorum*, Enteremphraxis—i. *Lactei extremitatum*, *Phegmata dolens*—i. *Lienis*, *Spleanoncus*—i. *Uteri*, *Metremphraxis*.

**INFECTION**, see *Contagion*.

**INFECUNDITY**, Sterility.

**INFECUNDUS**, Sterile.

**INFERNAL**, *Infernalis*; 'relating to hell.'

A name applied to caustic—*Lapis Infernalis*—on account of its strong, burning properties.

**INFIBULATIO**, *Fibulatio*, *Infibulation*, *Anterias'mus*; from *fibula*, 'a clasp.' (F.) *Bouclément*. An operation, formerly practised, which consisted in passing a ring through the prepuce, after having drawn it over the glans;—in order to prevent coition. The ancients employed infibulation with their gladiators, to preserve all their strength by depriving them of venery. In the women, to preserve their chastity, the ring was passed through the labia majora.

**INFILTRATION**, *Infiltratio*, from *filtrare*, 'to filter.' Effusion. The accumulation of a fluid in the areolæ of any texture, and particularly of the cellular membrane. The fluid effused is ordinarily serous;—sometimes blood or pus, fœces or urine. When infiltration of serum is general, it constitutes *anasarca*; when local, *œdema*.

**INFILTRATION PURULENTE**, see *Hepatitis*.

**INFIRM**, *Infirmus*, *Imbecillus*, *Deb'ilis*, *Asthemus*, from *in*, negative, and *firmus*, 'firm.' Not firm or sound; weak; feeble.

**INFIRMARIUM**, Hospital.

**INFIRMARY**, Hospital.

**INFIRMATORIUM**, Hospital.

**INFIRMIER** (F.), from *infirmus*, (*in*, negative, and *firmus*.) *Infirmarius*, *Nosocomus*, *Curator infirmorum*. One employed in an hospital or infirmary to take care of the sick.

**INFIRMITY**, *Infirmitas*, *Asthenia*, *Asthos'ia*, *Invalutudo*. Any disease which has become habitual, either owing to its chronic character, or its numerous relapses.

**INFLAMED**, *Inflammat'us*, (F.) *Enflammd*, *phlogosad*, according to some. Same etymon as inflammation. Affected with inflammation.

**INFLAMMABLE AIR**, Hydrogen, carburetted.

**INFLAMMATIO**, Inflammation, Phlegmon—i. *Abdominalis*, *Encelclitis*—i. *Articuli Maxillæ Inferioris*, *Hyposiagonarthritus*—i. *Auris*, *Otitis*—i. *Bronchiorum*, *Bronchitis*—i. *Cæci*, *Typhlo-enteritis*—i. *Capsulæ lentis*, *Phacohymenitis*—i. *Cerebelli*, *Cerebellitis*—i. *Clitoridis*, *Nymphitis*—i. *Conjunctivæ*, see *Ophthalmia*—i. *Cornææ*, *Ceratitis*—i. *Coxæ*, *Oophytis*—i. *Cystidis fellææ*, *Cholecystitis*—i. *Epiplottidis*, *Epiplottitis*—i. *Erysipelatoss*, *Erysipelatous inflammation*—i. *Faucium*, *Cynanche*, *Isthmitis*—i. *Gastritis*, *Gastritis*—i. *Genæ*, *Gnathitis*—i. *Genarum*, *Melitis*—i. *Gingivæ*, *Ulitis*—i. *Glandularum lymphaticarum*, *Hydradenitis*—i. *Glandularum lymphaticarum*, *Lymphadenitis*—i. *Glandularium sublingualium*, *Hypoglossadenitis*—i. *Gulæ*, *Œsophagitis*—i. *Hepatis*, *Hepatitis*—i. *Hepatis lenta*, *Hepatitis (chronic)*—i. *Internæ*, *Empresma*—i. *Intestinorum*, *Enteritis*—i. *Iridis*, *Iritis*—i. *Jecoris*, *Hepatitis*—i. *Laryngis*, *Laryngitis*—i. *Lienis*, *Splenitis*—i. *Ligamentorum*, *Syndesmitis*—i. *Lingvæ*, *Glossitis*—i. *Mediastini*, *Mesodmitis*—i. *Medullæ Spinalis*, *Myelitis*—i. *Musculi psoas*, *Psoitis*—i. *Musculorum*, *Myositis*—i. *Musculorum abdominalium*, *Myoceliitis*—i. *Nervorum*, *Neuritis*—i. *Oculorum*, *Ophthalmia*—i. *Œsophagi*, *Œsophagitis*—i. *Omenti*, *Epiplottis*—i. *Ossis*, *Ostalgitis*—i. *Ovarii*, *Oaritis*—i. *Palati*, *Hyperoitis*—i. *Pancreatis*, *Pancreatitis*—i. *Parenchymatica*, *Parenchymatitis*—i. *Parotidum*, *Parotitis*, *Cynanche parotidæa*—i. *Pectoris acuta*, *Pneumonia*—i. *Peracuta*, *Hyperphlogosis*, *Hyperphlegmasia*—i. *Pericardii*, *Pericarditis*—i. *Perioste*, *Periostitis*—i. *Perioste orbitæ*, *Periorbitis*—i. *Peritonæi*, *Peritonitis*—i. *Pharyngis*, *Cynanche pharyngæa*—i. *Phrenitis*, *Phrenitis*—i. *Pleuræ*, *Pleuritis*—i. *Pneumonia*, *Pneumonia*—i. *Pulmonum*, *Pneumonia*—i. *Renum*, *Nephritis*—i. *Renum succenturiatorum*, *Paranephritis*—i. *Retinæ*, *Dictyitis*, *Retinitis*—i. *Scleroticæ*, *Sclerotitis*—i. *Scroti*, *Oschitis*—i. *Septi transversi*, *Diaphragmitis*—i. *Sinum frontaliæ*, *Metopantritis*—i. *Stomachi*, *Gastritis*—i. *Superficiæ internæ cordis*, *Endocarditis*—i. *Tellæ cellulosæ*, *Ethmyphytis*—i. *Tellæ fibrosæ*, *Inohymenitis*—i. *Testium*, *Hernia humoralis*—i. *Tonsillarum*, *Cynanche tonsillaræ*—i. *Tunicæ hyaloideæ*, *Hyalitis*—i. *Tympani*, *Tympanitis*—i. *Urethræ*, *Gonorrhœa*—i. *Uteri*, *Metritis*—i. *Uteri catarrhalis*, see *Metritis*—i. *Uteri et Peritonæi*, *Metropertonitis*—i. *Uvulæ*, *Uvulitis*—i. *Vasorum*, *Anguitis*—i. *Vasorum lymphaticorum*, *Angeioleucitis*—i. *Ventriculi*, *Gastritis*—i. *Ventriculi et intestinorum*, *Gastro-enteritis*—i. *Vesicæ*, *Cystitis*—i. *Vesicæ fellææ*, *Cholecystitis*.

**INFLAMMATION**, *Inflammat'io*, from *in*, 'within,' and *flamma*, 'flame,' 'fire,' *Phlog'monê*, *Phlog'osis*, *Ephlog'osis*, *Epi'phlog'ia*, *Ezap'osis*, *Phlegma'osis*, *Causo'ma*, *Empres'ma*, *Phlog'ia*, *Hyperendosmos* (Dutrochet,) *Incoen'dum*, *Hyperarmato'osis*, *Hyperæ'mia act'iva*, *Phlog'olero'osis cephræ'tica*, *Angitis*, is so called in consequence of the acute or burning pain, felt in a part affected with it. An irritation in a part of the body is occasioned by some stimulus;—owing to which the blood flows into the capillary vessels in greater abundance than natural, and those vessels become over-dilated and enfeebled; whence result pain, redness, heat, ten-

sion, and swelling; symptoms which appear in greater or less severity, according to the structure, vital properties, and functions of the part affected, and its connexion with other parts, as well as according to the constitution of the individual. The inflammations of the cellular and serous membranes greatly agree;—and those of the mucus and skin; the former being more active, and constituting the *phlegmonous* variety;—the latter, the *erythematic* or *erysipelatosus*. Inflammation may end by resolution, suppuration, gangrene, adhesion, effusion, or induration. Each of the inflammations of internal organs has received a name according to the organ affected;—as, *gastritis, cephalitis, enteritis, hepatitis, &c.* Besides the above inflammations, there is considered to be an instinctive kind established for the union of parts which have been divided, whether the union takes place *immediately*, or by the aid of an intermediate body. This is the *adhesive inflammation*. See Adhesion, Callus, Cicatrix. Broussais considered that the term *inflammation* should include every local exaltation of the organic movements which is sufficiently great to disturb the harmony of the functions, and disorganize the texture in which it is situate. He farther extended the name *inflammation* to irritations which do not induce disorganization of the textures, and which had been previously, and are still, called *fevers*.

Examination of the blood drawn always exhibits an increase of the fibrinous element—the average proportion of which, in healthy blood, is about 3 in the thousand. In inflammation, it at times rises as high as 10. In fevers unaccompanied with inflammation, the proportion is natural, or below the average; but whenever inflammation supervenes, it immediately rises.

*External inflammation* is easily detected by the characters already mentioned:—*internal*, by disturbance of function and pain upon pressure; but the last sign is often not available. Both forms require the removal of all irritation, and the reduction of vascular excitement and nervous irritability; hence, blood-letting—local and general—sedatives, refrigerants, and counter-irritants become valuable remedies in almost all cases of inflammation.

**INFLAMMATION DES AMYGDALÆS,** Cynanche tonsillarum—*i. des Artères, Arteritis*—*i. of the Bladder, Cystitis*—*i. de la Bouche, Stomatitis*—*i. des Bronches, Bronchitis*—*i. du Cæcum, Typhlo-enteritis*—*i. du Cerveau et du Cervelet, Phrenitis*—*i. du Cœur, Carditis*—*i. du Colon, Colitis*—*i. de la Conjonctive, see Ophthalmia*—*i. of the Diaphragm, Diaphragmitis*—*i. **INFLAMMATION' CULA, Subinflammatio.** A superficial and often insignificant inflammation of the skin, as in many cutaneous affections.

**INFLAMMATORY, Inflammatorius;** *Phlog'icus, Phlog'os, Phlogisticus,* belonging to inflammation;—as, *inflammatory tumour, inflammatory fever, &c.* The blood is said to be *inflammatory* when cupped or buffy.

**INFLATIO, Emphysema, Puffiness, Colica flatulenta**—*i. Parotidum, Cynanche parotidæa*—*i. Uteri, Physometra.*

**INFLEXIO, Campsis.**

**INFLUENCE, Influenza.**

**INFLUENTIA, Influenza.**

**INFLUENZA.** The Italian for 'Influence.'

*Influenza Europæa, Influentia, Catar'hus epidem'icus, Febris catarrhalis epidem'ica, Catar'hus à contagio, Rheuma epidem'icum, Morbus Vervecinus, M. Catarrhalis, Synochus catarrhalis, Defusio catarrhalis, M. Arie'tis, Cephalalgia contagiosa* (epidemics of the 16th and 17th centuries): (F.) *Tac, Laddo, Quinte, Florion, Coqueluche, Baraquette, Générale, Grippe, Follette, Grenade, Coquette, Cocote, Petite Poste, Petit Courier, Allure, Fièvre catarrhale épidémique, Influence, Epidemie catarrh.* A severe form of catarrh occurring epidemically, and generally affecting a number of persons in a community. See Catarrh, epidemic. Gluge, from his investigations, considers, that the following is the chronological order of the return of the influenza:—14th century, 1323, 1326—15th century, 1410, 1411, 1414—16th century, 1510, 1557, 1562, 1574, 1580, and 1593—17th century, 1658, 1669, 1675, 1693—18th century, 1708, 1712, 1729, 1732, 1733, 1742, 1743, 1761, 1762, and 1775—19th century, 1800, 1803, 1831, and 1833. To these may be added 1837, and 1843.

**INFLUENZA EUROPÆA, Influenza.**

**INFORMITAS, Deformation.**

**INFORTUNUM, Contrafessura.**

**INFRA-ATLOIDÆUS, Sub-atloidæum.**

**INFRA-AXOIDÆUS, Sub-axoidæus.**

**INFRA-COSTALES,** see Intercostal muscles.

INFRA-MAXILLARIS, Sub-maxillary.

INFRA-ORBITAR, Sub-orbital.

INFRAPUBIAN LIGAMENT, Triangular ligament.

INFRA-SCAPULARIS, Subscapularis.

INFRA-SPINALIS, Infra-spinatus.

INFRA-SPINATUS, *Infraspinatus*, from *infra*, 'beneath,' and *spina*, 'a spine.' Situate beneath the spine of the scapula;—*Infra Spinalis*.

INFRA-SPINA'TA FOSSA, (F.) *Fosse sous-épineuse*. A large excavation on the posterior surface of the scapula, beneath its spine. It is filled by the

INFRA-SPINATUS Muscle, *Grand Scapulo-trahitérien*, *Superscapularis inferior* (Ch.), (F.) *Sous-épineux*, which is broad, flat, and triangular. It is attached, by its base, to the three inner quarters of the fossa; and is inserted, by a long tendon, into the middle part of the great tuberosity of the os humeri, (*Trochiter*.) It turns the arm outwards, and, when the arm is elevated, carries it backwards.

INFRINGENS, Corrigent.

INFUNDIBULUM, (in and *fundero*, 'to pour out.') A Latin word signifying a *Funnel*:—*Chœna*, *Chonos*, (F.) *Entonnoir*. A name, given to many parts which, more or less, resemble a funnel. It is particularly appropriated to the following organs:—

INFUNDIBULUM OF THE BRAIN, *Infundibulum* seu *Pelvis* seu *Chœna*'s seu *Cyathus* seu *Scyphus* seu *Concha* seu *Lacuna* seu *Embololum* seu *Aquæductus* seu *Labrum* seu *Conœvitas conghularis* seu *Processus orbicularis Cerebri*, (F.) *Entonnoir du ventricule moyen du cerveau*, *Tige Pituitaire*, *Tige sus-sphénoïdale*. A depression in the inferior paries of the middle ventricle, above the pituitary gland. It was, anciently, regarded as a canal by which the fluid collected in the ventricles of the brain was evacuated, and poured into the nasal fossæ.

INFUNDIBULUM CEREBRI, I. of the Brain.

INFUNDIBULUM OF THE COCHLEA, I. *Coch'lea*, *Scyphus Viëussenii*, *S. auditorius*, *Cucullus*, *Canalis Scalærum communis*. This, with the modiolus, forms the nucleus around which the gyri of the cochlea pass. It is an imperfect funnel, the apex of which is common with that of the modiolus; and the base is covered with the apex of the cochlea, termed *Cu'pola*.

In *Surgery*, infundibula are used to direct steam or vapours; to conduct the actual cautery to certain morbid parts, &c.

INFUNDIBULUM OF THE ETHMOID BONE, OR OF THE NASAL FOSSÆ. One of the anterior cells of that bone, which is broad and expanded above, and narrow below; opening, above, into the frontal sinus; below, into the anterior part of the middle meatus of the nasal fossæ.

INFUNDIBULUM OF THE HEART, *Conus arteriosus*—i. of the Kidney, see *Calix*—i. *Lachrymale*, *Lachrymal Sac*—i. *Tubarum Fallopii*, see *Tube*, *Falloppian*—i. *Ventriculi*, *Æsophagus*.

INFUSION, *Infusio*, *Enchyasis*, from *infundero*, (in, and *fundero*), 'to pour in,' 'to introduce.' A pharmaceutical operation, which consists in pouring a hot or cold fluid upon a substance whose medical virtues it is desired to extract. *Infusion* is, also, used for the product of this operation. In *Surgery*, infusion—*Chirurgia infusoria*, *Ars elyptica nova*—is the act of introducing into the veins medicinal

substances, by aid of an instrument called *Infusor*. This mode of introducing medicines was called *Ars infusoria*.

INFUSION OF ANGSTURA, *Infusum Cuspariæ*—i. of Buchu, *Infusum Diosmæ*—i. of Calumba, *Infusum calumbæ*—i. of Cascarilla, *Infusum cascarillæ*—i. of Catechu, *Infusum catechu compositum*—i. of Chamomile, *Infusum anthemidis*—i. of Cinchona, *Infusum cinchonæ*—i. of Cloves, *Infusum caryophyllorum*—i. of Cusparia, *Infusum cuspariæ*—i. of Fox-glove, *Infusum digitalis*—i. of Gentian, compound, *Infusum gentianæ compositum*—i. of Hops, *Infusum humuli*—i. of Horseradish, compound, *Infusum armoraciæ compositum*—i. of Linseed, *Infusum lini compositum*—i. of Mint, compound, *Infusum menthæ compositum*—i. of Orange-peel, compound, *Infusum aurantii compositum*—i. of Pinkroot, *Infusum apigeliæ*—i. of Quassia, *Infusum quassiæ*—i. of Rhatany, *Infusum Krameriæ*—i. of Rhubarb, *Infusum rhei*—i. of the Rose, *Infusum rosæ compositum*—i. of Sarsaparilla, *Infusum sarsaparillæ*—i. of Senna, *Infusum sennæ compositum*—i. of Simarouba, *Infusum simaroubæ*—i. of Slippery elm, *Infusum ulmi*—i. of Thoroughwort, *Infusum eupatorii*—i. of Tobacco, *Infusum tabaci*—i. of Valerian, *Infusum valerianæ*—i. of Virginia snakeroot, *Infusum serpentariæ*—i. of Wild cherry, *Infusum pruni Virginianæ*.

INFUSOIR (F.), same etymon. An instrument for injecting medical substances into the veins. It was a kind of funnel, the elongated apex of which was stopped by a metallic rod, which could be withdrawn when the apex was introduced into a vein.

INFUSUM, *Enchyma*. The product of an infusion.

INFUSUM ACACIÆ CATECHU, I. *catechu compositum*—i. *Amarum vinosum*, *Vinum gentianæ compositum*—i. of *Angstura*, I. *cuspariæ*.

INFUSUM ANTHEMIDIS, *Hydrochamæmolum*, *Infusion of Chamomile*. (*Anthemid. flor.* ℞ss. *aq. fervent.* Oj. Macerate for ten minutes in a covered vessel, and strain. *Ph. L.*) Dose, f. ʒj to f. ʒiiss.

INFUSUM ARMORACIÆ COMPOSITUM, *Compound infusion of Horseradish*. (*Armorac. rad. concis. sinapis* cont. sing. ʒj, *aq. fervent.* Oj. Macerate for two hours and strain.) Dose, f. ʒj to f. ʒiiij.

INFUSUM AURANTII COMPOSITUM, *Compound Infusion of Orange Peel*. (*Aurant. cort. sicc.* ʒij. *limon. cort. recent.* ʒj, *caryoph.* cont. ʒss. *aq. fervent.* Oss. Macerate for 15 minutes, and strain. *Ph. L.*) Dose, f. ʒiiss to f. ʒij.

INFUSUM BRASII, Wort—i. *Bynes*, Wort.  
INFUSUM CALUMBÆ, I. *Calombæ*, I. *Colombæ*, *Infusion of Calumba*. (*Calumb. rad. concis.* ʒss. *aq. fervent.* Oj. Macerate for two hours, and strain. *Ph. U. S.*) Dose, f. ʒiiss to f. ʒiiij.

INFUSUM CARYOPHYLLI, *Infusion of Cloves*. (*Caryoph. contus.* ʒij. *aq. fervent.* Oj. Macerate for two hours, and strain.) Dose, f. ʒiiss to f. ʒij.

INFUSUM CASCARILLÆ, *Infusion of Cascarilla*. (*Cascarill. contus.* ʒj. *aq. fervent.* Oj. Macerate for two hours, and strain.) Dose, f. ʒiiss to f. ʒij.

INFUSUM CASSIÆ SENNÆ, I. *sennæ compositum*.

INFUSUM CATECHU COMPOSITUM, *Infusum Catechu*, I. *Acaciæ Catechu*; *Infusion of Ca-*

*tochu.* (*Catechu*, in pulv.  $\mathfrak{zss}$ . *cinnam.* cont.  $\mathfrak{zj}$ . *aq. ferv.* Oj. Macerate for an hour, and strain.) Dose, f.  $\mathfrak{ziss}$  to f.  $\mathfrak{zij}$ .

INFUSUM CINCHO'NE, *I. Cinchona lancifolia*, *Infusion of Cinchona.* (*Cinch. contus.*  $\mathfrak{zj}$ . *aq. fervent.* Oj. Macerate for two hours, and strain.) This infusion may also be made from the same quantity of bark in coarse powder by the process of displacement with hot or cold water. Dose, f.  $\mathfrak{zj}$  to f.  $\mathfrak{zij}$ . The Pharmacopœia of the United States has an *Infusum Cincho'ne Compositum*, which is made as follows, (*Cinchon.* in pulv.  $\mathfrak{zj}$ . *Acid. Sulph. aromat.* f.  $\mathfrak{zj}$ . *agua* Oj. Macerate for twelve hours, occasionally shaking, and strain.) Dose same as the last.

INFUSUM COLOMBÆ, *I. calumbæ.*

INFUSUM CUSPA'RIÆ, *I. Angustura*, *Infusion of Cusparia.* (*Cuspar. cort. contus.*  $\mathfrak{zss}$ . *aq. ferv.* Oj. Macerate for two hours, and strain.) Dose, f.  $\mathfrak{zj}$  to f.  $\mathfrak{zij}$ .

INFUSUM DIGITA'LIS, *I. Digitalis purpurea*; *Infusion of Foxglove.* (*Digital.*  $\mathfrak{zj}$ . *aq. ferv.* Oss. Macerate, and add *sp. cinnam.* f.  $\mathfrak{zj}$ .) Dose, f.  $\mathfrak{zj}$ .

INFUSUM DIOS'MÆ, *Infusion of Buchu.* (*Diosm.*  $\mathfrak{zj}$ ; *aq. bullient.* Oj. Macerate for four hours in a covered vessel, and strain.—Ph. U. S.) Dose f.  $\mathfrak{ziss}$ .

INFUSUM EUPATO'RII, *Infusion of Thoroughwort.* (*Eupator.*  $\mathfrak{zj}$ ; *aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f.  $\mathfrak{zij}$ .

INFUSUM GENTIA'NÆ COMPOS'ITUM, *Compound Infusion of Gentian.* (*Gentian. contus.*  $\mathfrak{zss}$ , *Aurant. cort.*, *Coriandr. contus.*  $\mathfrak{ss}$   $\mathfrak{zj}$ ; *Alcohol. dilut.* f.  $\mathfrak{ziv}$ ., *Agua* f.  $\mathfrak{zxiij}$ . First pour on the alcohol, and three hours afterwards, the water; then macerate for twelve hours, and strain.—Ph. U. S.) Dose, f.  $\mathfrak{zj}$ . to f.  $\mathfrak{zij}$ .

*Marsden's Antiscorbutic Drops*, an empirical preparation, consist of a solution of *corrosive sublimate* in an *infusion of gentian*.

INFUSUM HU'MULLI, *Infusion of Hops.* (*Humul.*  $\mathfrak{zss}$ ; *Aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f.  $\mathfrak{ziss}$  to  $\mathfrak{zij}$ .

INFUSUM KRAME'RIÆ, *Infusion of Rhat'any* (*Kramer. contus.*  $\mathfrak{zj}$ ; *Aq. bullient.* Oj. Macerate for four hours, and strain.—Ph. U. S.) Dose, f.  $\mathfrak{ziss}$ .

INFUSUM LINI, *I. L. compositum.*

INFUSUM LINI COMPOS'ITUM, *I. Lini.* (Ph. U. S.) *I. Lini usitatis/simi*; *Infusion of Linseed.* (*Lini sem.* cont.  $\mathfrak{zss}$ . *glycyrrh. rad.* cont.  $\mathfrak{zj}$ , *aguz fervent.* Oj. Macerate for four hours, and strain.) Dose, a teacupful, *ad libitum*.

INFUSUM MALTI, Wort.

INFUSUM MENTHÆ COMPOS'ITUM, *Compound Infusion of Mint.* (*Fol. menth. sat. sicc.*  $\mathfrak{zij}$ , *aq. fervent.* q. s. ut. *colentur.* f.  $\mathfrak{zvj}$ . Macerate for half an hour; and, when cold, strain: then add—*sacch. alb.*  $\mathfrak{zij}$ , *ol. menth. sat.* gtt.  $\mathfrak{ij}$ , dissolved in *tinct. card. c.* f.  $\mathfrak{zss}$ . *Ph. D.*) Dose, f.  $\mathfrak{zj}$  to f.  $\mathfrak{zij}$ .

INFUSUM PICIS EMPYREUMATICÆ LIQUIDÆ, see *Pinus sylvestris*—*i. Picis liquidum*, see *Pinus sylvestris*.

INFUSUM PRUNI VIRGINI'NÆ, *Infusion of Wild Cherry Bark.* (*Prun. Virginian. cont.*,  $\mathfrak{zss}$ , *Aguz.* Oj. Macerate for two hours, and strain. Ph. U. S.)

INFUSUM QUASSIÆ, *I. Quassia excol'ea*; *Infusion of Quassia.* (*Quassia lign. conc.*,  $\mathfrak{zij}$ , *aq. ferv.* Oj. Macerate for two hours and strain.) Dose, f.  $\mathfrak{zj}$ . to f.  $\mathfrak{ziv}$ .

INFUSUM RHEI, *An'ima Rhei*, *Infusion of Rhubarb.* (*Rhei cont.*  $\mathfrak{zj}$ . *aq. ferv.* Oss. Macerate for two hours and strain.) Dose, f.  $\mathfrak{zj}$  to f.  $\mathfrak{ziv}$ .

INFUSUM ROSÆ COMPOS'ITUM, *I. Rosæ Gallicæ*; *Infusion of the Rose.* (*Ros. Gallic petal exsicc.*  $\mathfrak{ziv}$ , *aq. fervent.* Oiiiss, *acid. sulph. d. f.*  $\mathfrak{zij}$ , *sacch. purif.*  $\mathfrak{ziss}$ . Add the water, and afterwards the acid;—macerate for half an hour; strain, and add the sugar.) Dose, f.  $\mathfrak{ziss}$  to Oss.

INFUSUM SARSAPARIL'LIÆ, *Infusion of Sarsaparilla.* (*Sarsaparill. contus.*  $\mathfrak{zj}$ , *agua bullient.* Oj. Digest for two hours in a covered vessel, and strain.—Ph. U. S.) It may also be prepared by displacement. Dose, f.  $\mathfrak{zij}$  to f.  $\mathfrak{ziv}$ .

INFUSUM SENNÆ, *I. S. Compositum*, *I. Cassiæ Sennæ*, *I. Sennæ simplex*, *Infusion of Senna.* (*Sennæ  $\mathfrak{zj}$ , coriandr. contus.*  $\mathfrak{zj}$ , *aq. ferv.* Oj. Macerate for an hour, and strain.) Dose, f.  $\mathfrak{zj}$  to f.  $\mathfrak{ziv}$ .

The *Black Draught*, *Black Doss*, *Haustus niger*, is usually formed of this infusion. It may be made of *infus. sennæ* f.  $\mathfrak{zvj}$ , *aq. cinnam.* f.  $\mathfrak{zj}$ , *manna  $\mathfrak{ziv}$ , magnæs. sulph.*  $\mathfrak{zvj}$ . Dose, a wine-glassful.

*Selway's Prepared Essence of Senna* is a concentrated infusion of the leaves, in combination with an alkali.

INFUSUM SENNÆ COMPOSITUM, *I. sennæ.*

INFUSUM SERPENTA'RIÆ, *Infusion of Virginia Snakeroot.* (*Serpentar.  $\mathfrak{zss}$ , aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f.  $\mathfrak{ziss}$ .

INFUSUM SIMAROU'BIÆ, *Infusion of Simarouba.* (*Simaroub. cort. cont.*  $\mathfrak{zss}$ . *aq. fervent.* Oss. Macerate for two hours, and strain. *Ph. L.*) Dose, f.  $\mathfrak{zj}$ .

INFUSUM SPIGE'LIÆ, *Infusion of Pinkroot.* (*Spigel.  $\mathfrak{zss}$ , aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f.  $\mathfrak{ziv}$  to Oss.

INFUSUM TAB'ACI, *Infusion of Tobacco.* (*Tabaci. fol.  $\mathfrak{zj}$ , aq. ferv.* Oj. Macerate for an hour, and strain.)

INFUSUM ULMI, *Infusion of Slippery Elm.* This preparation, in the Pharmacopœia of the United States, is made by infusing one ounce of *slippery elm bark* in a pint of *boiling water*.

INFUSUM VALERIA'NÆ, *Infusion of Valerian.* (*Rad. valerian.* in crass. pulv.  $\mathfrak{zss}$ , *aq. fervent.* Oj. Macerate for an hour, and strain. *Ph. D.*) Dose,  $\mathfrak{ziss}$  to  $\mathfrak{zij}$ .

INGENIUM, (*Morb*). The genius of a disease. This word is employed, especially by the French, synonymously with *nature*. They speak, for instance, of *Génie inflammatoire*, *bilioux*, &c. Some, also, use *génie* in the place of *type* of an intermittent.

INGESTA, from *in*, and *gerere*, *gestum*, 'to bear or carry into.' Substances, introduced into the body by the digestive passages; as food, condiments, drinks, &c.

INGLUVIES, *Aplasia*, *Victus intemperantia*:—Gluttony, insatiableness; also, the *Crop* or *Craw* of Birds, (*F.*) *Jabot*, and the first stomach or *pouch* of ruminant animals—*Pen'ula*, *Lumen*, *Venter magnus*. Also, the *Pharynx*.

**INGRASSIAS, APOPHYSES OF.** The lesser axis of the sphenoid bone.

**INGRAVIDATIO,** Fecondation.

**INGRESSUS SUPERIOR,** Cardia.

**INGUEN,** *Bubon, Bubo,* 'the groin.' *Æda-on, αδοιν, He'patis emunctoria,* (F.) *Ains.* The oblique fold or depression which separates the abdomen from the thigh. It is only, properly speaking, a line that extends from the anterior and superior spinous process of the ilium to the middle part of the horizontal ramus of the pubis.

**INGUINAL,** *Inguinalis,* from *inguen,* 'the groin.' Belonging or relating to the groin. This epithet has been given to various parts met with in the region of the groin or inguinal region.

**INGUINAL ARTERY** is that portion of the femoral artery situate immediately beneath the crural arch in the inguinal region.

**INGUINAL CANAL** is a canal, about two inches in length, proceeding obliquely downwards, inwards and forwards at the lower part of the abdomen; through which passes the spermatic cord, in men, and the round ligament of the uterus in women. This canal is formed, inferiorly and anteriorly, by the aponeurosis of the greater oblique muscle; posteriorly by the *fascia transversalis*, which is joined to the preceding aponeurosis, and forms with it a deep channel, into which are received the lesser oblique and transversalis muscles. The inguinal canal has two apertures; the one, the *lower* and *inner*, is called the *inguinal* or *abdominal ring*. It is bounded by two strong tendinous rings, which fix it—the innermost to the symphysis, the outermost to the spine of the pubis. The *upper and outer aperture* is formed by the *fascia transversalis*. From the edge of this aperture arises a membranous funnel,—a prolongation of the *fascia transversalis*,—which receives the spermatic vessels; forms their proper sheath, and accompanies them as far as the testicle. On its inside lies the epigastric artery. Above it, is the lower edge of the transversalis muscle: and, below, it is bounded by the channel of the greater oblique. By following the oblique direction of this canal, and passing, consequently, on the outside of the epigastric artery, the viscera are displaced, so as to constitute internal inguinal hernia.

**INGUINAL REGION,** *Regio inguinalis, Bubo, Inguen.* The region of the groin.

**INGUINAL RING,** *Abdominal Ring, Anulus abdominis,* (F.) *Anneau Inguinal,* is the inferior aperture of the inguinal canal.

**INGUINO-CUTANEUS.** A name given by Professor Chaussier to the middle ramus of the anterior branch of the first lumbar nerve; because it sends its numerous filaments to the groin, scrotum, and to the skin of the superior part of the thigh.

**INHÆRENS,** Inherent.

**INHALATIO,** Absorption, Inhalation—i. Cutis, see Absorption.

**INHALATION,** *Inhalatio;* from *in* and *halare,* 'to breathe.' The act of drawing air into the lungs—*Inhalatio pulmonalis.* Also, absorption.

**INHALER, MUDGE'S.** An apparatus for inhaling the steam of hot water, in affections of the air-passages. It consists of a pewter tankard provided with a lid, into which a flexible

tube is inserted. Through this, the vapour is inhaled.

**INHÆRENT,** *Inhærens,* (*in,* and *hærens.*) That which adheres, or which is joined or united to any thing.

**INHERENT CAUTERY,** (F.) *Cautère inhérent,* is the actual cautery, left in contact with a part until it is reduced to the state of a deep eschar.

**INHUMATION,** *Inhumatio,* from *inhumo,* (*in,* and *humus,*) 'I put into the ground.' *Inhumatio.* The sepulture of the dead. This belongs to the subject of medical police.

**INIODYMUS,** Diprosopus.

**INION,** *ινιον.* Some of the Greek physicians gave this name to the occiput: others to the back part of the neck, and the muscles of the occiput. Blanchard says it is the commencement of the spinal marrow.

**INT'IS,** *Inohymenitis,* from *ic,* *gen. voc,* 'a fibre,' and *itis,* a suffix denoting inflammation. Fibrous inflammation.

**INITIUM,** Arche—i. *Asperæ arteriæ, Larynx*—i. *Extuberans Coli, Cæcum.*

**INIUM,** *ινιον.* The nucha. Also, the muscles at the back of the neck.

**INJACULATIO.** A term employed by Van Helmont to designate an acute pain of the stomach, with rigidity and immobility of the body.

**INJECTED,** *Injectus,* from *injicere,* (*in,* and *jacere,*) 'to throw into.' The face and other parts are said to be *injected,* when the accumulation of blood in the capillary vessels gives them an evident red colour. A subject or part of a subject, is also said to be *injected,* when its vessels have been filled, by the anatomist, with an appropriate composition.

**INJECTION,** *Injectio, Eis'bolt;* same etymon. The act of introducing, by means of a syringe or other instrument, a liquid into a cavity of the body. The liquid injected is also called an *injection.* Anatomists use injections—*Injectiones anatomicae*—for filling the cavities of vessels, in order that they may be rendered more apparent, and their dissection be facilitated. For this purpose, they employ syringes of different dimensions, and various materials. The most common injections are made of soot, wax, and turpentine, coloured with lamp-black, vermilion, &c. There are three kinds chiefly used by anatomists,—the *coarse,* the *fine,* and the *minute.* The following are formulæ for each.

#### COARSE INJECTION.

No. 1.

Pure yellow wax, oz. xvj.

Bleached rosin, oz. viij.

Turpentine varnish, by measure, oz. vj.

No. 2.

Yellow rosin, lb. ij.

Yellow wax, lb. j.

Turpentine varnish, a sufficient quantity to make the mixture flexible when cold.

No. 3.

Tallow, lb. ij.

White wax, oz. x.

Common oil, oz. vj.

Venice turpentine, oz. iv.

Mix and liquefy over a slow fire or over boiling water.

To make any of these mixtures

- Red—add *vermilion*, oz. iij.  
 Yellow—*King's yellow*, oz. iiss.  
 White—*best flake white*, oz. vss.  
 Pale-blue { *best flake white*, oz. iiiss.  
               *fine blue smalt*, oz. iiiss.  
 Dark-blue—*blue verditer*, oz. xss.  
 Black—*lamp-black*, oz. j.  
 Green { *powdered verdigris*, oz. ivss.  
           *best flake white*, oz. iss.  
           *powdered gamboge*, oz. j.

## FINE INJECTION.

- Brown spirit varnish*, oz. v.  
*White spirit varnish*, oz. iv.  
*Turpentine varnish*, oz. j.

To make this mixture

- Red—add *vermilion*, oz. j.  
 Yellow—*King's yellow*, oz. j½.  
 White—*best flake white*, oz. ij.  
 Light-blue { *fine blue smalt*, oz. iss.  
               *best flake white*, oz. j½.  
 Dark-blue—*blue verditer*, oz. iv.  
 Black—*lamp-black*, oz. ss.

## MINUTE INJECTION.

- Take of *transparent size*, broken to pieces, or  
*Isinglass*, oz. viij.  
*Water*, lb. iss. Dissolve.

To make this mixture

- Red—add *vermilion*, oz. v.  
 Yellow—*King's yellow*, oz. iv.  
 White—*best flake white*, oz. v.  
 Blue—*fine blue smalt*, oz. viij.  
 Green { *powdered verdigris*, oz. iij.  
           *best flake white*, dr. ij.  
           *powdered gamboge*, dr. j.  
 Black—*lamp-black*, oz. j.

## COLD INJECTION.

*White lead* and *red lead*, each oz. iv; *linseed oil*, enough to form a thick paste when they are rubbed well together. Liquefy this paste with *turpentine varnish*, oz. viij.

The advantage of this mixture is, that the subject need not be heated.

In order to inject the arteries, the injection must be forced from the great trunks towards their ultimate ramifications. To inject the veins, on the contrary, it is indispensable, on account of their valves, to send the injection from the smaller divisions towards the greater. The lymphatics are usually injected with mercury. The practitioner injects, by forcing with a syringe, liquids, such as emollient, narcotic, stimulant, and other decoctions or infusions, into different hollow organs, as the rectum, vagina, nasal fossæ, urethra, tunica vaginalis, auditory canal, &c., to fulfil various therapeutical indications.

The following injection has been strongly recommended by Dr. Horner to preserve the dead body.

- Take of *Liverpool, St. Ubs,*  
 or *Turk's Island Salt*, oz. 36 avoidr.  
*Nitrate of potassa*, " 19  
*Carbonate of soda*, " 8  
*Molasses (Sugar-house)*, " 4 by meas.  
*Water*, six pints.

The saline constituents to be dissolved first of all in boiling hot water; the molasses to be afterwards stirred in: the starch to be mixed

well with half a pint of cold water, and then to be stirred in with the other articles. As soon as it begins to boil, the whole mass swells up, when it must be removed from the fire. On the proper reduction of temperature it is fit for use.

INJECTION, MATTHEW'S, see *Tinctura catharidis*.

INJECTIONES ANATOMIÆ, see *Injection*.

INK, Atramentum.

IN-KNEED, Entogonyankon.

IN'NATE, from *in*, and *natus*, 'born.' In-born.

INNATE DISEASES, *Morbi connati*, *M. congeniti*, (F.) *Maladies innées*. Diseases with which the infant is born. They are not always hereditary, as hereditary diseases are not always innate.

INNERLEITHEN, MINERAL WATERS OF. These springs, situate near the Tweed, and supposed to be the scene of "St. Ronan's Well," contain chlorides of sodium and calcium, and carbonate of magnesia.

INNERVATION, *Innervatio*, from *in*, 'in,' and *nervus*, 'a nerve.' By this term is meant—the nervous influence, necessary for the maintenance of life and the functions of the various organs;—an influence of whose character and source we are ignorant. It seems to resemble the galvanic or electric actions. See *Nerves*.

INNOMINATUM, *Anonymum*, from *in*, priv. and *nomen*, 'a name.' (F.) *Anonyms*. Having no name.

INNOMINATA ARTERIA, *Brachio-cephalic artery*, *A. brachio-céphalique* (Ch.)—*Arteria anonyma*, *Right Subclavian*, (F.) *Artère innominée*, is the trunk common to the right primitive carotid and to the subclavian. It arises from the anterior part of the arch of the aorta, ascends obliquely to the right, along the trachea; and, after a course of about an inch in length, divides into two trunks, which go off at right angles. The one is *external*—the *right subclavian proper*; the other *superior*—the *primitive carotid*, of the same side.

INNOMINATA CARTILAGO, Cricoid.

INNOMINATA CAVITAS. A cavity of the outer ear, between the *helix* and *anthelix*.

INNOMINATUM FORAMEN. A foramen, near the middle of the anterior surface of the pars petrosa of the temporal bone, leading backwards for the passage of the Vidian nerve, reflected from the 2d branch of the 5th to the portio dura of the 7th pair.

INNOMINATA LINEA, see *Ilio-pectinea Linea*.

INNOMINATI vel ANONYMI, NERVI. Some anatomists have thus called the nerves of the fifth pair.

INNOMINATUM OS, *Os Cozen'dicis*, *Os Cozæ*, *Os anonymum*, *Os pelvis laterale*, (F.) *Os innominé*, *Os Cozal*, *Os anonyms*, &c. A very large, flat bone, which forms the anterior and lateral paries of the pelvis. It is curved upon itself in two opposite directions. In the first periods of life, it is composed of three portions;—the *ilium*, *ischium*, and *pubis*, which join each other in the acetabulum. It is articulated before with its fellow,—behind, with the sacrum; and laterally with the femur.

INNOMINATA MINORA OSSA,—*Lesser Ossa innominata*, *Ossicula innominata*. Some anatomists have given this name to the three cuneiform bones of the tarsus.

INNOMINATA OSSICULA, Innominata *minora* ossa—i. Tunica Oculi, Sclerotic.

INNOMINATÆ VENÆ OF VIRUSSENS. Vieussens has given this name to two or three veins, which arise on the anterior surface and right margin of the heart; and open into the auricle towards its right margin. The term VENÆ INNOMINATÆ OF MECKEL is given to the *brachio-cephalic* veins, which are generally included in the description of the subclavian vein, and correspond to the arteriæ innominate, being formed by the union of the internal jugular vein and the subclavian properly so called, which correspond to the common carotid and subclavian arteries.

INNOMINATUS, Anonymous.

INNUTRITIO OSSIUM, Rachitis.

INOCULATION, *Inocula'tio, Insi'tio, Insi'tio variolærum*, from *inoculare, (in, and oculus, 'an eye,')* 'to ingraft.' Any operation by which small-pox, for example, may be artificially communicated, by introducing the virus of the particular disease into the economy, by means of a puncture or scratch made in the skin. When the word inoculation is used alone, it usually means that for the small-pox.—*Variolation.*

INOCULATION, Cowpox, Vaccination—i. Jennerian, Vaccination.

INOCULATOR, Same etymon. *In'sitor.* One who practises inoculation.

INODULAR TISSUE, see Tissue, inodular.

INODULE, Tissue, inodular.

INOHYLOMA, Tumor, fibrous.

INOHYMENTIS: from *ι, gen. voc, 'a fibre,')* 'υμηρ, 'a membrane,' and *itis, denoting inflammation.* *Inflamma'tio tela fibro'sa.* Inflammation of the fibrous tissue.

INOPOLYPUS, see Polypus.

INORGANIC, *Inorgan'icus*; from *in, priv.* and *organum, 'an organ.'* A term applied to bodies which have no organs;—such as minerals. At the present day naturalists admit of but two classes of bodies,—the *organized* and *inorganic.* Parts of the body, which, like the epidermis are devoid of blood-vessels and nerves, have been called *anorganic.*

INOSCLEROMA, from *ι, gen. voc, 'a fibre,')* and *σκληρωμα, 'induration.'* Induration of the fibrous tissue.

INOSCULATIO, Anastomosis.

INQUIES, Inquietude.

INQUIETATIO, Inquietude.

INQUIETUDE, *Inquietu'do, In'quies, Inquietat'io, Jactita'tio*, from *in, priv.* and *quies, 'rest.'* Agitation or trouble, caused by indisposition. Restlessness.

INQUINAMENTUM, Miasm.

INQUISITIO MEDICO-LEGALIS, see Medico-legal.

INSALIVATION, *Insaliva'tio*, from *in, and saliva.* The mixture of the food with the saliva and other secretions of the mouth.

INSALUBRIOUS, *Insalu'bris, Nos'tros, No's'tros.* That which is unhealthy,—which injures the health.

INSANABILIS, Incurable.

INSANIA, Mania—i. Cadiva, Epilepsy—i. Lupina, Lycanthropia —i. Puerperarum, Mania, puerperal.

INSANITY, *Insa'nia*; from *in, privative,* and *sanus, 'sound;'* *Mental alienation, Abalienat'io* seu *Aliena'tio Mentis, Arreptio, Unsound Mind, Derangement, Deranged intel-*

*lect, Cra'ziness, Aphros'ynê, Ecp'hro'nia, Ecp'hros'ynê, Paral'lagê, Parallax'is, Delir'ia, Vesa'nia, Delir'ium, (Crichton,) Insipion'tia, (F.) Folie, Egarement d'Esprit, Paraphrénie.* This term includes all the varieties of unsound mind,—Mania, Melancholia, moral Insanity, Dementia, and Idiocy, which see.

INSANITY, INCOHERENT, Dementia—i. Moral, Pathomania—i. Puerperal, Mania, puerperal—i. Senile, Delirium senile—i. Suicidal, see Suicide.

INSCRIPTIO NESTENDINÆ MUSCULO' RUM, *Intersectio' nes* seu *Eneruatio' nes tendin' æ musculo' rum, Interme'dia ligamenta' lia* seu *ner'osa.* The tendinous portions which cross several muscles, and especially the straight muscles of the abdomen.

INSENESCENTIA, Agerasia.

INSENSIBILITY, *Anæsthe'sia, Insensibilit' as.* Loss or absence of sensibility. It is very common in cerebral affections, and may extend to every part, or be limited to one or more. Some organs are much more sensible than others. The bones, cartilages, ligaments, &c., are insensible in health, but acutely sensible in disease.

INSENSIBLE, *Sensibilita'te carens.* That which is devoid of sensibility. This word is applied, also, to phenomena which cease to be appreciable to the senses. Thus, we say, the pulse becomes *insensible.*

INSERTION, *Inser'tio, Symph'ysis, Eno'sis*, from *inserere, (in, and serere, 'to join or knit,')* 'to ingraft.' (F.) *Attache.* The attachment of one part to another. Insertions occur chiefly on bones, cartilages, and fibrous organs; thus, we speak of the insertion of muscular fibres into a tendon or aponeurosis; the insertion of a tendon, aponeurosis, or ligament, into a cartilage or bone. The word *insertion* has likewise been used by pathologists, for the act of inoculating or introducing a virus into the body.

INSESIO, from *insidere, (in, and sedere, 'to sit in,')* This term is, sometimes, applied to a vapour bath, the person being seated in a perforated chair, beneath which a vessel, filled with hot water, or the hot decoction of some plant is placed. See Semicupium.

INSESSUS, Bath, half.

INSIDENTIA, *Epi'stasis.* Anything which swims on or in the urine. It is opposed to the *Hypo'stasis* or *subsidentia.*

INSIPIENTIA, Insanity.

INSISIO CILIORUM, Blepharoplastice.

INSITIO, Inoculation—i. Dentis, Transplantation Dentis—i. Variolarum, Inoculation.

INSOLATION, *Insola'tio*, from *in, and sol, 'the sun;'* *Aprica'tio, Heli'o'sis, Heli'asis, Siri'asis.* Exposure to the sun. Exposure of a patient to the rays of the sun is, sometimes, had recourse to, with the view of rousing the vital forces, when languishing, or of producing irritation of the skin. Insolation is occasionally used in the same sense as *coup de soleil.*

In Pharmacy, *insolation* means the drying of chemical and pharmaceutical substances.

INSOLAZIONE DE PRIMIVERA, Pelagra.

INSOMNIA, *Insom'nitas, Sahara, Zaara, Peruigil'ium, Pernocita'tio, Ayp'nia, Agryp'nia, Ahy'nia, Any'nia, Typhoma'nia, Sleeplessness, Vig'ilance*, from *in, privative,* and *somnus, 'sleep,')* 'absence of sleep.' This may exist alone, and constitute a true disease; or it may be connected with another affection. It

is an unequivocal sign of suffering in some organ; even when the patient experiences no pain.

INSOMNIUM, Somnium.

INSPECTIO MEDICO-LEGALIS, see Medico-legal.

INSPIRATEUR, Inspiratory.

INSPIRATION, *Inspiratio, Empneumatosis, Eispnoë, Adspiratio, Aspiratio*, from *in*, 'in,' and *spiro*, 'I breathe.' The action by which the air penetrates into the interior of the lungs. A movement opposed to that of expiration. As regards the average quantity of air received into the lungs at each inspiration, there is much discrepancy amongst observers. The following table sufficiently exhibits this.

Cubic inches at each inspiration.

Reil, .....	42 to 100
Menzies, Sauvages, Hales, Haller, Ellis, Sprengel, Sommering, Thomson, Postock, Jurin, .....	} .....40
Fontana, .....	
Richerand, .....	35
Dalton, .....	30 to 40
Herholdt, .....	30
Jurine, .....	20 to 29
Allen and Pepsy, .....	20
J. Borelli, .....	16½
Goodwyn, .....	15 to 40
Sir H. Davy, .....	14
Abernethy and Mojon, .....	13 to 17
Keutsch, .....	12
	6 to 12

INSPIRATION OF VENOUS BLOOD. By this is meant the aspiration of blood towards the heart, occasioned by the approach to a vacuum produced by the dilatation of the thorax during inspiration.

INSPIRATORY. Same etymon. *Inspiratio ni insorviens*, (F.) *Inspirateur*. A name given to muscles, which, by their contraction, augment the size of the chest, and thus produce inspiration. The diaphragm and intercostal muscles are the chief agents of inspiration. In cases where deep inspirations are necessary, the action of these muscles is aided by the contraction of the pectoralis major and pectoralis minor, subclavius, serratus major anticus, scapularis, serratus posticus superior, &c. Most of these muscles become inspiratory, by taking their fixed point at the part which they ordinarily move, and elevating the ribs.

INSPISSATIO, *Pyonosis*, from *in*, and *spissare*, 'to thicken.' The act of rendering thick; as in the formation of an extract—*Succus Insipissatus*.

INSTEP, *Callum pedis*, (F.) *Coude-pied, Cou du pied*. The projection at the upper part of the foot, near its articulation with the leg—the *tarsus*.

INSTILLATIO, Instillation.

INSTILLATION, *Instalatio, Instillatio*, from *in*, 'into,' and *stilla*, 'a drop.' The act of pouring a liquid drop by drop.

INSTINCT, (L.) *Instinctus*, 'inwardly moved.' *Brutia, Hormæ*. The action of the living principle, whenever manifestly direct-

ing its operations to the health, preservation, or reproduction of a living frame or any part of such frame—*Molimen natura salutarium*. The law of instinct is, consequently, the law of the living principle, and instinctive actions are the actions of the living principle. Instinct is natural. Reason is acquired.

INSTINCTIVE, *Instinctus*. Same etymon. Relating to or caused by instinct; as *instinctive* actions. See Emotional. Those instinctive actions of animals which are owing to impressions made on the sensory ganglia, exciting respondent motor influences that are propagated to the various muscles of the body, are termed by Dr. Carpenter *consensual*.

INSTITUTES OF MEDICINE, see Theory of medicine.

INSTITUTUM ORTHOPÆDICUM, Orthopedic institution.

INSTRUMENT, *Instrumen'tum, Organum*. A tool, an agent.

INSTRUMENTUM CHIRURGICUM. A surgical tool or instrument.

INSTRUMENTUM DIGESTIONIS. The digestive apparatus.

INSTRUMENTUM INSTRUMENTORUM, Manus.

INSUFFICIENCY, from *in*, and *sufficiens*. Inadequateness to any end or purpose,—as *insufficiency of the valves of the heart*; (F.) *Insuffisance des valvules du Cœur*;—a condition in which they are not adapted, as in health, to properly close the apertures.

INSUFFICIENCY DES VALVULES DU CŒUR, Insufficiency of the valves of the heart.

INSUFFLATION, *Insuperflatio*, from *in*, *sub*, and *flare*, 'to blow.' The act of blowing a gas or vapour into some cavity of the body; as when tobacco smoke is injected into the rectum; or when air is blown into the mouths of newborn children to excite the respiratory functions.

INSULA CEREBRI, OF REIL. The intermediate lobe of the brain. *Lobus intermedium cer'ebri*. A remarkable group of convolutions within the fissure of Sylvius. It is called, by Cruveilhier, *Lobule of the Fissure of Sylvius, Lobule of the corpus striatum*.

INSULA SANGUINIS, see Blood.

INSULTUS, Attack, Paroxysm.

INTEGRITAS, Sanitas.

INTEGUMENT, *Integumen'tum, Tegumen'tum, Teg'umen, Tegmen, Involu'crum seu Velamen'tum corporis commu'nt; Vela'men seu Velamentum nativum*, from *in* and *tegere*, 'to cover.' (F.) *Tégument*. Any thing which serves to cover, to envelop. The *skin*, including the cuticle, rete mucosum, and cutis vera is the common integument or tegument of the body.

INTEGUMENTA FETÛS. The membranes surrounding the fetus in utero.

INTELLECT, *Intellectus, Nons, Mens, Gnome, Noos, Nus, Nos'sis, Syn'osis*, from *intelligere*, (*inter*, 'between,' and *legere*, 'to choose;') 'to understand;,' 'conceive;,' 'know.' (F.) *Entendement, Intelligence*. The aggregate of the intellectual faculties—perception, formation of ideas, memory, and judgment.

INTELLECT, DERANGED, Insanity.

INTELLIGENCE, Intellect.

INTEMPERANCE, *Intemperantia; Immoderantia, Immoderatio, Acorantia, Acolantia, Ples'mont, Amat'ria, Apletia*, from *in*, 'negation;,' and *temperans*, 'to temper.' Immoderate

use of food and drink, especially the latter;—a fruitful source of disease.

**INTEMPERIES.** Same etymon. *Dyscrasia.* Derangement in the constitution of the atmosphere and of the seasons; bad constitution; derangement, or disorder in the humours of the body.

**INTENSIVUS, Entaticos.**

**INTENTION, Inten'tio,** from *in,* and *tendere,* 'to stretch.' *Propos'itum.* The object which one proposes. In *surgery,* a wound is said to heal by the first intention, *Rou'nio per primam intentio'nem,* when cicatrization occurs without suppuration; union by the second intention, *Rou'nio per secundam intentio'nem,* being that, which does not occur until the surfaces have suppurated. To obtain union by the first intention, the edges of a recent wound must be brought in apposition and kept together by means of adhesive plasters and a proper bandage. Delpech has substituted for those expressions, *Réunion primitive,* and *Réunion secondaire.*

**INTERANEA, Entrails.**

**INTERARTICULAR, Interarticula'ris.** Parts situate between the articulations are so called; as *interarticular cartilages, interarticular ligaments, &c.*

**INTERCADENCE, Intercaden'tia, Interciden'tia,** from *inter,* 'between,' and *cadere,* 'to fall.' Disorder of the arterial pulsations, so that, every now and then, a supernumerary pulsation occurs. The pulse, in such case, is said to be *intercurrent.*

**INTERCALARY, Intercala'ris, Intercidens,** from *intercalare,* 'to insert.' *Embol'imos, Interpol'atus, Provocato'rius.* The days which occur between those that are critical. The term has, also, been applied to the days of apyrexia in intermittent fevers.

**INTERCELLULAR SUBSTANCE, see** Cytoblastema.

**INTERCEPTIO, Interc'ptio,** from *inter,* 'between,' and *capere,* 'to take.' A bandage, by the aid of which the ancients proposed to arrest the progress of the material cause of gout and rheumatism; and which consisted in covering the affected limbs with carded wool; surrounding them, afterwards, with broad bandages, applied from the fingers to the axilla, or from the toes to the groin.

**INTERCEPTIO INTESTINORUM, Ileus.**

**INTERCERVICAUX, Interspinales colli.**

**INTERCIDENS, Intercalary.**

**INTERCIDENTIA, Intercadence.**

**INTERCILIIUM, Mesophryon.**

**INTERCLAVICULAR, Interclavicula'ris,** from *inter,* 'between,' and *clavicula,* 'a clavicle.' That which is placed between the clavicles.

**INTERCLAVICULAR LIGAMENT** is a fibrous bundle, placed transversely above the extremity of the sternum, between the heads of the two clavicles. This ligament is flat. Its fibres, which are always longer above than below, are separated by small apertures, which are traversed by vessels. It prevents the separation of the two clavicles in the forced depression of the shoulder.

**INTERCOSTAL, Intercosta'lis,** from *inter,* 'between,' and *costa,* 'a rib.' *Mesopleu'rium, Mesopleu'rius.* That which is situate between the ribs. (F.) *Sous-costal.*

**INTERCOSTAL ARTERIES** vary in number. There is constantly, however, a *superior, Ar'téria Intercosta'lis superior* vel *Intercosta'lis subclavia,* which is given off from the posterior part of the subclavian, and which sends branches into the first two or three intercostal spaces; and, generally, eight or nine *inferior* or *aortic intercostals.* These arise from the lateral and posterior parts of the pectoral aorta, and ascend obliquely in front of the vertebral column, to gain the intercostal spaces, where they divide into a *dorsal* branch and an *intercostal,* properly so called.

**INTERCOSTAL MUSCLES** are distinguished into *internal,*—*inter-plévrocostaux* of Dumas,—and *external.* The former are inserted into the inner lip, the latter into the outer lip of the edge of the ribs. The fibres of the *external intercostals* are directed obliquely downwards and forwards; and those of the *internal* downwards and backwards. Both are inspiratory or expiratory muscles, according as they take their origin on the upper or lower rib. Some small, fleshy fibres, seen occasionally at the inner surface of the thorax, descending obliquely from one rib to another, have been called *Infracostales.*

**INTERCOSTAL NERVE, Trisplanchnic nerve.**

**INTERCOSTAL NERVES, Branches souscostales,** (Ch.) *Costal* or *Dorsal nerves,* proceed from the anterior branches of the dorsal nerves. They are twelve in number, and are distributed especially to the muscles of the parietes of the chest and abdomen.

**INTERCOSTAL SPACE, Interval'lum** seti *Intersit'ium intercostale, Mesopleu'rium, Mesopleu'rium,* is the interval which separates one rib from that immediately above or below it.

**INTERCOSTAL VEINS** are distinguished like the arteries. The *right superior intercostal vein* is often wanting. When it exists, it opens into the back part of the subclavian. The same vein of the left side is very large. It communicates with the demi-azygos, receives the left bronchial vein, and opens into the corresponding subclavian. The *right inferior intercostal veins* open into the vena azygos; and those of the left into the demi-azygos.

**INTERCURRENT, Intercur'rens,** from *inter,* 'between,' and *currere,* 'to run.' Diseases are so called which supervene at different seasons of the year, or which cannot be considered as belonging to any particular season.—Sydenham. A disease is likewise so called which occurs in the course of another disease, as *Intercurrent Pneumonia.*

**INTERCUTANEUS, Subcutaneous.**

**INTERDENT'IUM,** from *inter,* 'between,' and *dens,* 'a tooth.' The interval between teeth of the same order.—Linden.

**INTERDIGITAIRE, Interdigital.**

**INTERDIGITAL, Interdigita'lis,** (F.) *Interdigitaire,* same etymon as the next. That which relates to the spaces between the fingers. *Interdigital space,* (F.) *Espace interdigitaire,* is used, also, for the commissure between the fingers.

**INTERDIGIT'IUM,** from *inter,* 'between,' and *digitus,* 'a finger.' A corn or wart, which grows between the fingers and toes, especially between the latter.—Pliny.

**INTERPINEUX CERVICAUX, Interspinales colli.**

INTERFEMINEUM, Perinæum, Vulva, Genital organs.

INTERFINIUM NARIUM, Septum narium.

INTERFORAMINEUM, Perinæum.

INTERITUS, Death.

INTERLOB'ULAR, *Interlobularis*, from *inter*, 'between,' and *lobulus*, 'a small lobe.' That which is between lobes,—as of the lungs.

INTERLOB'ULAR TISSUE, *Tectum interlobularé*, *Ligamenta interlobularia pulmonum*. The cellular tissue between the pulmonary lobules.

INTERMAX'ILLARY, *Intermaxilla'ris*,—from *inter*, 'between,' and *maxilla*, 'a jaw.' That which is situate between the maxillary bones.

INTERMAXILLARY BONE, *Inci'sive*, *Pal'atine*, or *Labial bone*, is a bony portion, wedged in between the two superior maxillary bones, which supports the upper incisors. This bone is found in the mammalia; and, also, in the human fœtus.

INTERMÈDE, Excipient.

INTERMEDIA LIGAMENTALIA SEU NERVA, Inscriptiones tendinæ musculorum.

INTERMEDIATE VASCULAR SYSTEM, Capillary system.

INTERMIS'SION, *Intermis'sio*, *Dialoip'sis*, *Dialoip'sis*, *Tempus intercalare*, *Interval'um*, from *inter*, 'between,' and *mittere*, 'to put or send.' (F.) *Intermittence*. The interval which occurs between two paroxysms of an intermittent or other disease—during which the patient is almost in his natural-state. There is said to be *intermission* of the pulse, when, in a given number of pulsations, one or more may be wanting.

INTERMITTENCE, Intermis'sion.

INTERMIT'TENT, *Intermit'tens*. Same etymon. That which has intermissions.

INTERMITTENT FEVER, *Febris intermit'tens*, *Dialoip'pyra*, *Intermittens*, *An'etus*, *Ague*, *Ague and Fever*, *Palu'dal Fever*, *Period'ic Fever*, (F.) *Fèvre intermittente*, *F. d'Accès*, *F. des marais*, *F. Périodique*, is a fever chiefly produced by marshy miasms, and consisting of paroxysms, with a complete state of apyrexia in the intervals. The chief types are the *Quotidian*, *Tertian*, and *Quartan*. The symptoms of intermittents are those of a decided and completely marked *cold stage*: (F.) *Stade de froid*, attended with paleness; collapse; impaired sensibility; and coldness, more or less diffused, followed by general rigors. After this occurs the *hot stage*: *Stade de la Chaleur*, the heat returning partially and irregularly, and at length, becoming universal, and much above the standard of health. The pulse is now hard and strong; tongue white; urine high-coloured; thirst considerable. At length, the *sweating stage* (F.) *Stade de Sueur*, makes its appearance; the moisture usually beginning on the forehead, face, and neck, and soon extending universally; the heat abating; thirst ceasing; the urine throwing down a sediment, and the functions being gradually restored to their wonted state. The tertian type is the most common, and the quartan the most severe. The quotidian more readily changes into a remittent and continued fever. The quartan has, generally, the longest cold stage, the tertian the longest hot. The *exciting causes* are marsh miasmata. Ague, also, occurs in districts where there are no marshy emanations. Such districts are, generally, of a volcanic na-

ture; further we know not. When the disease has once attacked an individual it is apt to recur. The *prognosis* is, in general, favourable, as far as regards life; but long protracted intermittents are apt to induce visceral obstructions and engorgements, which may end in dropsy. In some countries, the disease is of a very pernicious character. The indications of treatment are, 1. To abate the violence of the paroxysm; and 2. To prevent its return. The first indication requires the adoption of the general principles and remedies required in ordinary fever. The *second* is the most important. The period of apyrexia is that for action. The means for fulfilling this indication are:—the use of emetics, purgatives, cinchona, quinia, &c., arsenic, and forcible impressions made on the mind of the patient.

INTERMUS'CLULAR, *Intermuscula'ris*, from *inter*, 'between,' and *musculus*, 'a muscle.' That which is placed between muscles.

INTERMUS'CLULAR APONEURO'SSES are aponeurotic laminae or septa, situate between muscles, to which they often give attachment.

INTERNAL, *Inn'us*, *Inter'nus*. That which is located on the inside. This epithet is given to parts that look towards an imaginary central plane, which divides the body into two equal and symmetrical portions, as well as to those which correspond with a cavity. Thus, we say the *inner surface of the arm or thigh*—the *inner surface of the skull*, &c.

INTERNAL DISEASES, *Morbi inter'ni*, are those which occupy the inner parts of the body. Their investigation belongs to the physician; *external* diseases falling under the management of the surgeon.

INTERNODIA DIGITORUM MANUS, Phalanges of the fingers—i. *Digitum pedis*, Phalanges of the toes.

INTERNO'DIUM, *Mesogon'ium*, from *inter*, 'between,' and *nodus*, 'a knot.' The part of the fingers between the joints. A phalanx.

INTERNUNTII DIES, Critical days.

INTERNUS AURIS, Tensor tympani—i. *Mallei*, Tensor tympani.

INTEROSSEI PEDIS, *Métatarso-phalangien-latéral*, (Cb.) The number, arrangement, shape, and uses of these are the same as in the case of the preceding muscles. Four are *dorsal*, and three *plantar*; six belong to the three middle toes and one to the little toe. The great toe is devoid of them. As in the hand, they are distinguished, in each toe, into abductor and adductor.

INTEROSSEOUS, *Interos'seus*. That which is situate between the bones; from *inter*, 'between,' and *os*, 'a bone.'

INTEROSSEOUS AR'TERIES OF THE FOREARM AND HAND. Of these there are several. 1. The *common interosseous artery* arises from the posterior part of the ulnar, a little below the bicipital tuberosity of the radius; passes backwards and divides into two branches: the one called *anterior interosseous* descends vertically, anterior to the interosseous ligament; the other, called *posterior interosseous*, passes above that ligament, appears at its posterior part and divides into two great branches,—the *posterior recurrent radial* and the *posterior interosseous*, properly so called. In the hand,—1. The *dorsal metacarpal interosseous arteries* are given off by the *dorsalis carpi*, a division of the radial

artery. 2. The *Palmar interosseous arteries*, which arise from the convexity of the deep palmar arch, and give off the *middle interosseous arteries*. 3. The *dorsal interosseous of the index*, proceeding directly from the radial artery. In the foot, are distinguished—1. The *dorsal interosseous arteries*, three in number, which arise from the artery of the metatarsus, a branch of the dorsalis tarsi. 2. The *plantar interosseous arteries*, which are, also, three in number, and arise from the plantar arch.

**INTEROSSEOUS LIG'AMENTS.** Ligaments seated between certain bones, which they unite; such are the ligaments between the radius and ulna, and between the tibia and fibula.

**INTEROSSEOUS MUSCLES.** These occupy the spaces between the bones of the metacarpus and metatarsus; and, consequently, belong,—some to the hand, others to the foot.

**INTEROSSEOUS NERVE** is a branch, given off by the median nerve, which descends before the interosseous ligament, accompanying the artery of the same name.

**INTEROSSEUS MANÛS, (F.)** *Muscle interosseus de la main.—Métacarpo-phalangien-latéral suspalmaire et métacarpo-phalangien latéral, (Ch.)* These muscles are seven in number; two for each of the three middle fingers, and one for the little finger. Four are situate on the back of the hand, and three only in the palm. They are inserted into the metacarpal bones, and send a tendon to the tendon of the extensor communis. According to their office, they are, to each finger an *adductor* and an *abductor*. The *index* has a dorsal abductor and a palmar one. The *middle finger* has two dorsal muscles for adductor and abductor; the *ring finger* has a dorsal adductor and a palmar abductor; and the *little finger* has only one interosseous abductor, which is palmar. These muscles produce abduction and adduction of the fingers, which they can also extend, owing to their connexion with the extensor tendons.

**INTEROSSEUS SECUNDUS, Prior medii digiti—i. Quartus, Prior annularis.**

**INTEROSSEOUS VEINS** have the same arrangement as the arteries.

**INTEROSSEUX DE LA MAIN, Interosseus manûs.**

**INTERPELLA'TUS, (Morbus,)** from *interpello*, 'I interrupt.' A term, by which Paracelsus designated those diseases whose progress is unequal, and paroxysms irregular.

**INTERPLEVRO-COSTAUX, Intercostal muscles.**

**INTERPOLATUS, Intercalary.**

**INTERRUPTIO MENSTRUATIONIS, Amenorrhœa.**

**INTERSCAPULAR, Interscapularis, (inter, and scapula.)** That which is between the shoulders; as the *interscapular region*. The *interscapular cavities, Cavitates interscapulares*, are the depressions between the scapulae and spinous processes of the vertebræ.

**INTERSCAPULIUM.** The spine of the scapula.

**INTERSECTIO, Decussation, Intersection.**

**INTERSECTION, Intersectio, Diacopt,** from *inter*, 'between,' and *seco*, 'I cut.' The point where two lines meet and cut each other. The name, *aponeurotic intersection*, is given to fibrous bands, which certain muscles present in

their length, and by which they seem interrupted. Aponeurotic intersections are found in the recti muscles of the abdomen; in the semi-membranosus, complexus, sterno-thyroides, &c.

**INTERSECTIONS TENDINEÆ MUSCULORUM, Inscriptioes tendineæ musculorum.**

**INTERSEPIMENTUM THORACIS, Mediastinum.**

**INTERSEPTA HORIZONTALIA PACHIONI, Tentorium.**

**INTERSEPTUM,** from *inter*, 'between,' and *septum*, 'a partition.' *Cion, κίων.* The uvula; also, the septum narium. The diaphragm.

**INTERSEPTUM NARIUM, Septum narium—i. Virginale, Hymen.**

**INTERSPINAL, Interspinalis,** from *inter*, 'between,' and *spina*, 'the spine.' That which is seated between the spinous processes.

**INTERSPINAL LIG'AMENT, Membrana interspinalis, (F.) Ligament interspinozæ.** These occupy the intervals between the spinous processes in the back and loins. In the neck, they are replaced by the muscles of the same name. They prevent the too great flexion of the spine, and keep the spinous processes *in situ*.

**INTERSPINALES COLLI, Spinales Colli minores, Spinalis, (F.) Interspinozæ-cervicæ, Intercervicæ, (Ch.)** These are twelve in number, and occupy, in two parallel rows, the intervals between the spinous processes of the cervical vertebræ; from that of the atlas and vertebra dentata, to that between the last cervical and first dorsal vertebræ. They are flat, thin, and quadrilateral. These muscles contribute to the extension of the neck and to throwing the head backwards.

**INTERSPINALES DORSI ET LUMBORUM;** portions of the *Transversaire-épineux*, of Boyer, and the *sacro-spinal* of Chaussier. These muscles are of two kinds. The one (*Muscle grand épineux du dos*, of Winslow) representing fleshy bundles of different lengths, applied upon the lateral surfaces of the spinous processes, from the third dorsal vertebra to the second lumbar. The other (*Muscle petit épineux du dos*, of Winslow) covered by the preceding. They are situate on each side of the interspinal ligament, in the form of small, short flat bundles, which pass from one spinous process to the second, third or fourth above it. These muscles aid in extending the vertebral column; and incline it a little to one side, when they act on one side only.

**INTERSTICE, Interstitium, Aræoma,** from *inter*, 'between,' and *sto*, 'I stand.' *Dias-te-ma, Intervalum.* Anatomists have given this name to the intervals between organs. The *iliac crest, crista ilii*, for example, has two *lips* and an interstice between them, which affords attachment to the lesser oblique muscle of the abdomen.

**INTERSTICE, Pore.**

**INTERSTITIAL, Interstitialis,** same etymon. Applied to that which occurs in the interstices of an organ,—as "*interstitial absorption*," "*interstitial pregnancy*," &c.

**INTERSTITIUM, Interstice—i. Ciliare, Ciliary ligament—i. Intercostale, Intercostal space—i. Jugulare, Throat.**

**INTERTINCTUS, Discreet.**

**INTERTRACHÉLIENS**, *Intertransversales colli*.

**INTERTRANSVERSAIRES DES LOMBES**, *Intertransversales lumborum*.

**INTERTRANSVERSALIS**, *Intertransversarius*. That which is placed between the transverse process of the vertebrae.

**INTERTRANSVERSALES COLLI**, (F.) *Intertransversaires cervicæ*, *Intertrachéliens*, (Ch.) These are small, muscular bundles; quadrilateral; thin and flat; situate, in pairs, in the intervals between the transverse processes of the neck, except between the first and second, where there is only one. They are distinguished into *anterior* and *posterior*. The former are six in number; the latter five. These muscles bring the transverse processes of the neck nearer each other, and contribute to the lateral flexion of the neck.

**INTERTRANSVERSALES LUMBOËRUM**, *Musculi intertransversi lumborum*, (F.) *Intertransversaires des lombes*. These are almost entirely fleshy, and ten in number; five on each side. They are similar to the preceding in general arrangement; except that they are more marked, and not placed in two rows. Each intertransverse space contains only one. They are quadrilateral, and flat. The first occupies the space between the transverse processes of the first lumbar and last dorsal vertebra; and the last is between that of the fourth and fifth lumbar vertebrae. These muscles incline the lumbar region laterally; and straighten it when inclined to one side.

**INTERTRIGO**, Chafing—i. *Podicis*, Chafing.

**INTERVAL**, *Lucid*, see *Lucid*.

**INTERVALLUM**, *Intermission*, *Interstice*—i. *Intercostal*, *Intercostal space*.

**INTERVENIUM**, *Mesophlebium*.

**INTERVERTEBRAL**, *Intervertebralis*, (*inter*, and *vertebra*.) That which is situate between the vertebrae.

**INTERVERTEBRAL. CAR'TILAGES**, *Intervertebral fibro-cartilages*, *Ligamenta intervertebralia*. These organs are of a fibro-cartilaginous nature; sections of a cylinder; flexible; whitish; resisting; and situate between the bodies of the vertebrae,—from the space between the second and third as far as that between the last vertebra and sacrum. Their form is accommodated to that of the vertebra with which they are in connexion; so that, in the neck and loins, they are oval, whilst in the dorsal region they are nearly circular.

**INTESTABILIS**, *Castratus*.

**INTESTATUS**, *Castratus*.

**INTESTIN**, *Intestine*.

**INTESTINAL**, *Intestinalis*, from *intus*, 'within.' That which belongs to the intestines,—as *intestinal canal*, &c. *Bordeu* uses the term *Pouls intestinal* for a pulse, which he conceived to announce an approaching crisis by the intestines.

**INTESTINAL JUICE**, *Succus entericus*.

**INTESTINAL TUBE OF TRACT**, *Cana'lis seu Tractus intestinalis*. The canal formed by the intestines from the pyloric orifice of the stomach to the anus.

**INTES'TINE**, *Intestinum*, *Enteron*, *Chorda*, *Gut*, *Nedyia* (pl.), *Pan'tices* (pl.) *Boellii* (pl.), *Bowel*, (F.) *Intestin*, *Boyaou*. A musculo-membranous canal, variously convoluted, which extends from the stomach to the anus, and is

situate in the abdominal cavity; the greater part of which it fills. In man, its length is six or eight times that of the body. It is divided into two principal portions, called *small intestine* and *large intestine*. The former, *Intestinum tenue*, I. *gracile*, (F.) *Intestin grêle*, constituting nearly four-fifths of the whole length, begins at the stomach and terminates in the right iliac region. It is divided into *duodenum*, *jejunum* and *ileum*. Some anatomists give the name *small intestine* to the two latter only; which are kept in place by the mesentery, and form a large *paquet*, occupying the umbilical and hypogastric regions, a part of the flanks, of the iliac regions, and of the cavity of the pelvis. It is composed of, 1. A serous membrane, which is peritoneal. 2. Of a muscular coat, whose fibres are very pale, and are placed, in part, longitudinally; but the greater part transversely. 3. Of a whitish, mucous membrane; villous, and forming folds or valves—*valvula conniventes*—at its inner surface, and furnished with a considerable number of mucous follicles, called *glands of Lieberkühn*, (*Crypts* or *Follicles of Lieberkühn*), and *Brunner*, and, perhaps, those of *Peyer* may be added. The arteries of the small intestine proceed from the superior mesenteric; its veins open into the vena porta. Its nerves proceed from the superior mesenteric plexus. The great intestine, *Intestinum crassum*, *Megalocolia*, (F.) *Gros intestin*, forms a sequence to the small. It is much shorter, and is solidly attached in the regions of the abdomen which it occupies. It begins in the right iliac region; ascends along the right flank, till beneath the liver, when it crosses the upper part of the abdomen, descends into the left iliac fossa, and plunges into the pelvic cavity, to gain the anus. The great intestine is usually divided into three portions,—the *cæcum*, *colon* and *rectum*. It receives its arteries from the superior and inferior mesenterics. Its veins open into the vena porta. Its nerves are furnished by the mesenteric plexuses. Its lymphatic vessels, which are much less numerous than those of the small intestine, pass into the ganglions or glands seated between the different reflections of the peritoneum, which fix it to the abdominal parietes. The use of the intestines is,—in the *upper* part, to effect the chylification of the food and the absorption of the chyle;—in the *lower*, to serve as a reservoir, where the excrementitious portion of the food collects; and, also, as an excretory duct, which effects its expulsion.

**INTESTINORUM LÆVITAS**, *Lientery*.

**INTESTINULA CEREBRI**, *Anfractuosities* (cerebral)—i. *Meibomii*, *Meibomius*, glands of.

**INTESTINULUM**, *Funiculus umbilicalis*.

**INTESTINUM CELLULATUM**, *Colon*—i. *Circumvolutum*, *Ileon*—i. *Crassum*, *Colon*, see *Intestine*—i. *Gracile*, see *Intestine*—i. *Grande*, *Colon*—i. *Laxum*, *Colon*—i. *Majus*, *Colon*—i. *Medium*, *Mesentery*—i. *Plenum*, *Colon*—i. *Rectum*, *Rectum*—i. *Tenne*, see *Intestine*.

**INTIMUM UNGUIS**, *Nail*, root of the.

**INTONATIO INTESTINALIS**, *Bozborgygmus*.

**INTORSIO**, *Distortion*.

**INTOXICATIO**, *Poisoning*—i. *Arsenicalis*,

Arsenicismus—i. Opiaca, Meconismus—i. Saturnina, Saturnismus.

INTOXICATION, Poisoning—i. *des Miasis*, see Miasm.

INTOXICATION SATURNINE. Lead poisoning. The aggregate of symptoms which present themselves prior to an attack of lead colic.—Tanquerel des Planches.

INTRA-PELVIO-TROCHANTÉRIEN, Obturator internus.

INTRICATURA, Decussation.

INTRINSIC, *Intrinsecus*; from *intra*, 'within,' and *secus*, 'towards.' Applied to the internal muscles of certain organs; as those of the ear, tongue, and larynx. Linnaeus gave the name *Intrinseci* to internal diseases.

INTROITUS PELVIS, see Pelvis—i. Vaginae, Rima vulvae.

INTROMISSION, *Intromissio*; from *intro*, 'within,' and *mitto*, 'I send.' The act of introducing one body into another, as *Intromissio Penis*, (F.) *Intromission de la Vergé*.

INTROSUSCEPTIO, Intussusceptio—i. Entropion, Entropion.

INTUBUM, Cichorium endivia—i. Erraticum, Cichorium intybus.

INTUMESCENCE, *Intumescencia*, *Oncosis*, *Dioncosis*, from *intumescere*, (in and *tumescere*), 'to swell.' Augmentation of size in a part or in the whole of the body. Sauvages uses the word *Intumescencia* for an order of diseases, in which he comprehends polysarcia, pneumatosis, anasarca, cedema, physconia, and pregnancy.

INTUMESCENTIA GANGLIFORMIS, Ganglion of Gasser—i. Lactea Mammarum, Sparganosis—i. Lienis, Splenoncus—i. Semilunaris, Ganglion of Gasser.

INTUSSUSCEPTIO, from *intus*, 'within,' and *suscipio*, 'I receive.' *Introsusceptio*. In physiology:—the mode of increase peculiar to organized bodies. In pathology, like *Convolutulus*, *Volvulus intestino'rum*, *Susceptio Intestino'rum*, *Chordap'us*, *Enteroparisago'ge*, *Parisago'ge intestino'rum*, *Indigitatio*, *Tormentum* and *Invaginatio*, it means the introduction of one part of the intestinal canal into another, which serves it as a sort of *vagina* or sheath. Generally, it is the upper part of the small intestine, which is received into the lower, when the intussusception is said to be *progressive*. At times, however, it is *retrograde*. As the disease cannot be positively detected by the symptoms, it must be treated upon general principles. At times, the invaginated portion has separated and been voided per anum,—the patient recovering. The disease is, however, of a very dangerous character.

INTYBUM, Cichorium endivia.

INTYBUS HORTENSIS, Cichorium endivia.

INULA, see Inula helenium—i. Common, Inula helenium.

IN'ULA DYSENTERICA. The systematic name of the Lesser Inula, *Cony'sa me'dia*, *Arnica Sueden'sis*, *Arnica spu'ria*, *Cuni'la mac'cula*, *Cony'sa*, *Cumila'go*, (F.) *Aun's antidy'senterique*, *Herbe de Saint Roch*. Nat. Ord. Compositæ. This plant was once considered to possess great antidy'senteric virtues. The whole plant is acrid and somewhat aromatic.

INULA HELLENICUM. The systematic name of the *El'campane*, *En'ula camp'ana*, *Ele'nium*,

*Necta'rium*, *Helinium*, *Common Inula*, (F.) *Aun's*. The root, *Inula* (Ph. U. S.) was formerly in high esteem in dyspepsia, cachexia, pulmonary affections, &c. It is now scarcely used.

INULA, LÆSÆ, Inula dysenterica.

INUNCTIO, Inunction, Liniment.

INUNCTION, *Inunctio*, *Perunctio*, *Illit'io*, *Illitus*, *Illinit'io*, *Oblinit'io*, *Christis*, *Catach'risis*, *Diach'risis*, *Epich'risis*, *Unctio*. A liniment. Also, the act of rubbing in. (F.) *Oncion*.

INUNDATIO, Depuration.

INUSTIO, Canterization, Cauterium.

INUSTORIUM, Cauterium.

INVAGINATED, *Invaginatus*, from *in*, and *vagina*, 'a sheath.' Applied to a part, which is received into another, as into a sheath.

The *invaginated* or *slit and tail bandage* is one in which strips or tails pass through appropriate slits or button holes.

INVAGINATIO, Intussusceptio.

INVALETUDO, Infirmary.

INVALID, Valetudinary.

INVALIDUS, Valetudinary.

INVASIO, Arche, Attack, Paroxysm.

INVERMINATIO, Helminthiasis.

INVERSIO PALPEBRARUM, Entropion—i. Uteri, Hysteroptosis, Uterus, inversion of the

*INVERSION DE LA MATRICE*, Uterus, inversion of the.

INVERTENTIA, Absorbents, Antacids.

INVESTITURA FUNICULI UMBILICALIS, see Funiculus umbilicalis.

INVETERATUS, Chronic.

INVISANTIA, Incrassantia.

INVISCATIO OCULI. A morbid adhesion of the eyelids to each other, or to the globe of the eye. Also, gluing together of the eyelids by a viscid secretion.

INVOLUCRUM, *Involumen'tum*, from *involvere*, 'to fold in.' A covering; hence *Involut'ra cer'e'br'i*, the membranes of the brain. *Involut'ra nerv'orum*, the sheaths of the nerves.

INVOLUCRUM CORDIS, Pericardium—i. Corporis commune, Integument—i. Linguae, see Tongue—i. Membranaceum, Decidua reflexa—i. Nervorum, Neurilema—i. Reti comparatum, Retina.

INVOLUMENTUM, Involucrum.

INVOLVENTIA, Demulcents.

IODE, Iodine.

IODES, Æruginous.

IODIDE OF AMMONIUM, see Iodine—i. of Arsenic, see Iodine—i. of Iron, see Iodine—i. of Lead, see Iodine—i. of Potassium, see Iodine—i. of Quinine, see Iodine—i. of Starch, see Iodine—i. of Sulphur, see Iodine—i. of Zinc, see Iodine.

IODIDUM AMYLI, see Iodine—i. Hydrargyricum, see Iodine—i. Hydrargyrosium, see Iodine—i. Plumbi, see Iodine—i. Sulphuris, see Iodine.

IODINE, *Io'dina*, *Io'dinum*, *Iodini'um*, *Io'dum*, *Io'dium*, *Io'nium*, *Io'num*, (F.) *Iode*; from *iodis*, *viola'ceus*, 'of a violet colour,' so called from the violet flavour it exhales when volatilized. It is contained in the mother waters of certain fuci, and is obtained by pouring an excess of concentrated sulphuric acid on the water obtained by burning different fuci, lixiviating the ashes and concentrating the liquor. The mixture is placed

in a retort to which a receiver is attached, and is boiled. The iodine passes over and is condensed. It is solid, in the form of plates; of a bluish gray colour, of a metallic brightness, and small similar to that of the chloride of sulphur. Its sp. gr. is, 4.946. When heated, it becomes volatilized, and affords the vapour which characterizes it. With oxygen it forms the *iodic acid*, and with hydrogen the *Hydriodic*. The tincture of iodine and the iodides have been employed with great success in the treatment of goitre and of some scrofulous affections. It must be administered in a very small dose and for a long period. It is said to be apt, however, to induce cholera morbus, signs of great nervous irritability and emaciation of the mammae. When these symptoms, collectively termed *Iodism*, *Iodo'sis*, and *Iodina*, are urgent, the dose may be diminished, or it may be wholly discontinued, and afterwards resumed.

Various preparations of iodine are employed in medicine; as the *Iodide of Iron* (*Ferri Iodidum*, *F. Ioduretum*, (F.) *Iodura du fer*, which is sorbafecient and tonic, in the dose of 3 or 4 grains; the *Protoiodide of Mercury*, (*Hydrargyri Proto-Ioduretum*, *H. Iodidum*, *Hydrargyrum Iodatum flavum*, *H. Iodulatum*, *H. Iodatum*, *Iodidum Hydrargyrosum*, *Hydrargyri Proto-Iodidum*), sorbafecient and antisyphilitic in the dose of 1-12th of a grain; the *Deutiodide of Mercury*, (*Hydrargyri Deutioduretum*, *H. Iodidum rubrum*, *Hydrargyrum Iodatum rubrum*, *H. Periodide of Mercury*, *Iodidum Hydrargyricum*, *Binioidide of Mercury*), with similar virtues, in the dose of 1.16th of a grain; the *Iodide of Starch*, (*Iodidum vel Ioduretum Amyli*, *Amylum Iodatum*), a weaker preparation than the usual forms of iodine; the *Iodide of Quinine*, (*Iodidum Quiniae*), used in scrofulous cases, where iodine and tonics are indicated; the *Iodide of Lead*, (*Plumbi Iodidum*, *P. Ioduretum*, (F.) *Iodure de plomb*), used externally in strumous swellings; the *Iodide of Potassium*, (in solution *Hydriodate of Potassa*), see *Potassum Hydriodas*;—the *Iodo-hydrargyrate of Potassium*, (*Potassii Iodo-hydrargyras*, *P. Hydrargyro-iodidum*), made by adding 8 grains of iodide of potassium, dissolved in 10 or 15 minims of water, to 11 grains of the deutiodide of mercury,—the properties of which are like those of the iodides of mercury; the *Iodide of Sulphur*, (*Ioduretum Sulphuris*, *Sulphuris Iodidum*, *Sulphur Iodatum*), used externally in cutaneous diseases, (gr. x. to cerate ℥j.) and the *Iodide of Zinc*, (*Zinci Iodidum*, *Z. Iodatum*), externally (℥j. to lard ℥j.); the *Iodide of Ammonium*, (*Iodidum*, see *Ioduretum Ammoniac*, *Hydriodate of Ammonia*, used in lepra, psoriasis, &c., in the form of ointment, (℞j—℥j ad adipis ℥j); and the *Iodide of Arsenic*, (*Arsenici Iodidum*), given internally in similar affections, gr. 1-10th three times a day; or used externally, (gr. iij ad adipis ℥j.)

IODINIA, see Iodine.

IODINIUM, Iodine.

IODINUM, Iodine.

IODISM, see Iodine.

IODIUM, Iodine.

IODOFORM, *Iodoform*, (F.) *Iodoforme*, so called from its analogy to chloroform. It is obtained by the reaction on each other of iodine, bicarbonate of potassa, water and alcohol.

It is in crystalline plates of a beautiful citrine colour; and may be given in the same cases as the other preparations of iodine. Dose, one grain three times a day.

IODOHYDRARGYRATE OF POTASSIUM, see Iodine.

IODOSIS, see Iodine.

IODUM, Iodine.

IODURETUM AMMONIÆ, see Iodine—i. Amyli, see Iodine—i. Sulphuris, see Iodine.

IODYMUS, Dicephalus.

ION, Viola.

IONIA, *Teucrium chamaepitys*.

IONIDIUM MARCUCCI, *Cinchunchulli*—a South American plant. *See Syst.* Pentandria Monogynia; *Nat. Ord.* Violariæ; said to be extremely efficacious in the Mal de San Lazaro of Columbia.

IONIUM, Iodine.

IONTA, see Excretion.

IONTHUS, *Varus*, *Violet Eruption*, from *ion*, 'the violet,' and *thos*, 'a flower,' or *ortho*, 'soundness.' An unsuppurative, tubercular tumour; stationary; chiefly on the face. A genus in the class *Hæmatica*, order *Phlogotica* of Good.

IONTHUS CORYMBIFER, *Gutta rosea*—i. *Varus*, *Acne*.

IONUM, Iodine.

IOTACISMUS, from the Greek letter *Iota*. Defective articulation,—the patient not being able to pronounce the palatals *j* and *g* soft.

IPECAC, Apocynum androsæmifolium, *Euphorbia corollata*, *Gillenia trifoliata*, *Ipecacuanha*, *Triosteum*.

IPECACUANHA. In common parlance, often abridged to *Ipecac*. The pharmacopœial name of the *Cephaelis ipecacuanha*, *Calli-cocca ipecacuanha*, *Cagosanga*, *Ipecacuanha root*, *Ipecacuanha radix*, *Radix Brazilian'sis*. *Nat. Ord.* Cinchonaceæ. It is also obtained from the *Psychotria emetica* of Peru. The odour of the root—*Ipecacuanha*, (Ph. U. S.)—is faint and peculiar; taste bitter, subacid and mucilaginous; both water and alcohol extract its virtues, which depend on a peculiar principle, called *Emetica*. It is emetic in large doses; sudorific in smaller. *Dose*, as an emetic, gr. xx to xxx,—alone, or united with tartarized antimony, gr. i to ij.

IPECACUANHA, *Euphorbia corollata*—i. *Bastard*, *Triosteum perfoliatum*—i. *Blanc de l'Île de France*, *Asclepias asthmatica*—i. *Blanc de St. Domingue*, *Asclepias curassavica*—i. of the Isle of France, *Cynanchum vomitoria*.

IPECACUANHA, WHITE, is obtained from different species of *Richardsonia* and *Ionidium*. *Viola ipecacuanha* also affords it. It is weaker than the gray.

IPO, *Upas*.

IPOMŒA JALAPA, *Convolvulus jalapa*.

IRA, Rage.

IRACUNDUS, *Rectus externus oculi*.

IRALGIA, *Irealgia*, *Iridal'gia*, from *iris*, 'the iris,' and *algos*, 'pain.' Pain in the iris.

IRASCIBLE, *Rectus externus oculi*.

IREALGIA, *Irealgia*.

IREONCION, *Iriancistrion*.

IRIANCISTRON, *Iridancistrion*, *Ireoncistrion*, from *iris*, and *αγκιστρον*, 'a hook.' A hooked instrument, used by Schlagintweit in the formation of an artificial pupil.

IRIDÆA EDULIS. One of the Algae, eaten in Scotland and the south-west of England.

**IRIDALGIA, Iralgia.**

IRIDANCISTRON, Iriancistron.

IRIDAUXE'SIS, from *Iris*, *I'ridis*, and αυξησις, 'augmentation;' *Staphylo'ma I'ridis*, *Staphylo'ma U'vae*, *Iridonco'sis*, *Lymphon'cus I'ridis*. Exudation of fibrin into the tissue of the iris.

IRIDECTOMEDIALYSIS, see Coretomia.

IRIDECTOMIA, Coretomia.

IRIDENCLEISIS, see Coretomia.

IRIDENCLEISMUS, see Coretomia.

IRIDEREM'IA, from ἴρις, and ἔρημος, 'deprived of;' *Iridoster'sis*. Absence of iris, either apparent or real.

IRIDOCELE, Ptoxis iridis.

IRIDOCOLOBOMA, Coloboma iridis.

IRIDODIALYSIS, Coretomia.

IRIDOMALAC'IA, from ἴρις, 'the iris,' and μαλακσις, 'softness.' Mollescence or softening of the iris.

IRIDOMELANO'MA, *Iridomelano'sis*, from ἴρις, 'the iris,' and μελανσις, 'to colour black.' The deposition of black matter on the tissue of the iris.IRIDONCO'SIS, *Iridon'cus*, *Hyperonco'sis Iridis*, from ἴρις, 'the iris,' and οὖχος, 'a swelling.' Tumefaction or thickening of the iris. Also, Iridauxesis.

IRIDONCUS, Iridoncosis.

IRIDOPERIPHAKITIS; from ἴρις, 'the iris,' περί, 'around,' and phacitis, inflammation of the lens. Inflammation of the anterior hemisphere of the capsule of the lens.

IRIDOPTOSIS, Ptoxis iridis.

IRIDORRHAGAS, *Iridorrh'o'ge*, *Iridorrh'o'z*, *Iridoschis'ma*, *Fissu'ra I'ridis*, from ἴρις, 'iris,' and γασσις, 'a fissure.' Fissure of the iris.

IRIDORRHOGE, Iridorrhagas.

IRIDORRHOX, Iridorrhagas.

IRIDOSCHISMA, Iridorrhagas.

IRIDOSTERESIS, Irideremia.

IRIDOTENCLEISIS, Coretomia.

IRIDOTOMIA, Coretomia.

IRIDOTROMUS, Hippus.

**IRIS**, ἴρις, *Grammè*. So called from its resembling the rainbow in variety of colours. A membrane, stretched vertically at the anterior part of the eye, in the midst of the aqueous humour, in which it forms a kind of circular, flat partition, separating the anterior from the posterior chamber. It is perforated by a circular opening called the *pupil*, which is constantly varying its dimensions, owing to the varying contractions of the fibres of the iris. Its posterior surface has been called *uvosa*, from the thick, black varnish which covers it. The greater circumference of the iris is adherent to the ciliary processes and circle. It has an external plane of radiated fibres and an internal one of circular fibres, which serve—the one to dilate, the other to contract the aperture of the pupil. The iris receives the irian nerves. Its arteries are furnished by the long ciliary arteries, which form two circles by their anastomoses; the one very broad, near the great circumference; the other, smaller, and seated around the circumference of the pupil. The veins of the iris empty themselves into the *Vasa vorticosa*, and into the long ciliary veins. The use of the iris seems to be,—to regulate by its dilatation or contraction, the quantity of luminous rays necessary for distinct vision. The different colours of the iris occasion the variety in the colours of the human eye.

**IRIS**, see Herpes Iris—i. Common, I. Germanica—i. Commun, I. Germanica—i. de Florence, I. Florentina.

**IRIS FLORENTINA**, *Florentina iris* or *orris*, (F.) *Iris de Florence*. The rhizoma of this plant is extremely acrid in its recent state; and, when chewed, excites a pungent heat in the mouth, that continues for several hours. When dried, the acrimony is lost, or nearly so, and the smell is very agreeable. It is indebted to its agreeable flavour for its retention in the pharmacopœias, although it is ranked as an expectorant.

**IRIS FÆTIDIS'SIMA**, *Spath'ula fæ'tida*, *Xyris*, *Stinking iris*, (F.) *Iris puant*, *Glayeul puant*. The root has been esteemed antispasmodic and narcotic.

**IRIS GERMANICA**. The systematic name of the *Flower-de-Luce*, *Iris nostras*, *Asie'na*, *Iris vulg'aris*, *Common iris* or *orris*, *Gladi'olus caruleus*, (F.) *Iris commun*, *Flambo*. The fresh roots have a disagreeable smell and an acrid, nauseous taste. They are powerfully cathartic, and are given in dropsies, where such remedies are indicated.

**IRIS DES MARAIS**, I. pseudacorus—i. Nostras, I. Germanica—i. Palustris, I. pseudacorus.

**IRIS PSEUDACORUS**. The systematic name of the *Yellow water-flag*, *Iris palustris*, *Gladi'olus lit'atus*, *Acorus vulg'aris*, *Acorus adu'ter'nis*, *Pseudacorus*, *Bu'tomon*, *Acorus palustris*, (F.) *Iris des marais*, *Faux acore*, *Flambe bâtarde*, *Acore bâtarde*. The root has an acrid, styptic taste. It is an errhine, sialogogue, and acrid astringent. The expressed juice is diuretic, and said to be a useful application to serpiginous and other cutaneous affections. Rubbed on the gums, or chewed, it is said to cure toothache.

**IRIS PUANT**, I. fœtidissima—i. Stinking, I. fœtidissima.

**IRIS VERSICOLOR**, *Blue flag*. The rhizoma of this is an active cathartic, and has been much used, as such, by the American Indians. It is reputed to be diuretic.

**IRIS VULGARIS**, I. Germanica.

**IRISITIS**, Iritis.

**IRITIS**, *Inflammation of the iris*, *Inflammatio Iridis*, *Iris'itis*. The chief symptoms are;—change in the colour of the iris; fibres less movable; tooth-like processes shooting into the pupil; pupil irregularly contracted, with the ordinary signs of inflammation of the eye. If the inflammation do not yield, suppuration takes place; and, although the matter may be absorbed, the iris remains immovable. It is often caused by syphilis. The general principles of treatment are, to deplete largely and exhibit mercury freely; along with attention to other means advisable in ophthalmia. The free use of quinia is sometimes serviceable. When the inflammation is seated in the serous covering of the iris, it is termed *Iritis serosa*.

**IRON**, Ferrum—i. Acetate of, *Ferri acetas*—i. Ammoniated, *Ferrum ammoniatum*—i. Ammonio-citrate of, *Ferri ammonio-citras*—i. Ammonio-chloride of, *Ferrum ammoniatum*—i. Ammonio-tartrate of, *Ferri ammonio-tartas*—i. and *Ammonia*, citrate of, *Ferri ammonio-citras*—i. Bromide of, see *Bromine*—i. Carbonate of, saccharine, *Ferri proto-carbonas*—i. Carburet of, *Graphites*—i. Black oxide of, *Oxydum ferri*

nigrum—i. Citrate of, Ferri citras—i. Ferrocyanuret of, Prussian blue—i. Ferroproussiade of, Prussian blue—i. Filings, purified, Ferri limatura purificata—i. Hydrated oxide of, Ferrum oxydatum hydratum—i. Hydrated peroxide of, Ferrum oxydatum hydratum—i. Hydrated tritoxide of, Ferrum oxydatum hydratum—i. Hydriodate of, Ferri iodidum—i. Hydro-oxide of, Ferrum oxydatum hydratum—i. Iodide of, see Iodine—i. Iodide of, Ferri iodidum—i. Ioduret of, Ferri iodidum—i. Lactate of, Ferri lactas—i. Liquor, Ferri acetas—i. Peroxide of, Ferri subcarbonas—i. Phosphate of, Ferri phosphas—i. Pills of, compound, Pilulas ferri compositas—i. Protocarbonate of, Ferri protocarbonas—i. Protoxide of, lactate of, Ferri lactas—i. Pyrites, Ferri sulphuretum—i. and Quinia, citrate of, Ferri et Quinias citras—i. Sesquinitrate of, Solution of, see Tinctura ferri muriatis—i. Sesquioxide of, Ferri subcarbonas—i. Sulphate of, Ferri sulphas—i. Sulphuret of, Ferri sulphuretum—i. Tartarized, Ferrum tartarizatum—i. Tritro-hydro-ferrocyanate of, Prussian blue—i. and Potass, tartrate of, Ferrum tartarizatum.

**IRREDUCIBLE, (F.) Irreducible.** An epithet given to fractures, luxations, hernia, &c., when they cannot be reduced.

**IRREDUCIBLE, Irreducible.**

**IRREGULAR, Irregularis, Anomalous;** from *im*, 'privative,' and *regula*, 'a rule.' A term chiefly applied to the types of a disease; and, also, to the pulse, when its beats are separated by unequal intervals.

**IRREPTIO, Attack.**

**IRRIGATION, Irrigatio, Embrosatio, Irroratio:** 'the act of watering or moistening.' The methodical application of water to an affected part, to keep it constantly wet.

**IRRITABILITAS, Irritability—i.** Morbosa, see *Subsultus tendinum*—i. Vesicae, *Cystere-thismus*.

**IRRITABILITY, Irritabilitas, from irrita, (in, 'privative,' and ritus, 'the usual manner,') (?) 'I provoke.' Vis irritabilitatis, Vis Vita, Vis in'icia of Haller, Vis vitalis, of Gorter, Oscillatio of Boerhaave, Tonic power of Stahl, Vita propria, Inherent power, Contractility, Excitability, Incontability, &c.** A power, possessed by all living, organized bodies, of being acted upon by certain stimuli, and of moving responsive to stimulation. It is the ultimate vital property.

**IRRITABLE, Irritabilis.** That which is endowed with irritability. Every living organized tissue is irritable; that is, capable of feeling an appropriate stimulus, and of moving responsive to such stimulus. Irritable is often used in the same sense as *impressible*, as when we speak of an irritable person, or habit, or temper. This last condition has been variously termed—*Debilitas nervosa, D. Erethis'ica, Hypercinsia nervosa, Neurasthenia, Neurosthenia, Sensibilitas anomala, S. Morbosa, S. aucta.*

**IRRITAMEN, Irritant, Stimulus.**

**IRRITAMENTUM, Erethism, Irritant, Stimulus—i.** Metallicum, Galvanism.

**IRRITANT, Irritans, Irritamentum, Irritamentum.** That which causes irritation or pain, heat and tension; either *mechanically*, as punctures, acupuncture, or scarification; *chemically*,

as the alkalies, acids, &c.; or in a *specific manner*, as cantharides, &c.

Irritants are of great use in the treatment of disease.

**IRRITATING POISON, see Poison.**

**IRRITATIO, Erethism, Gargale, Irritation.**

**IRRITATION, Irritatio, Erethis'mus.** The state of a tissue or organ, in which there is excess of vital movement; commonly manifested by increase of the circulation and sensibility. Broussais defines irritation to be;—the condition of an organ, the excitation of which is carried to so high a degree, that the equilibrium resulting from the balance of all the functions is broken. In this signification, he also uses the word *sur-irritation*, which he considered as a higher degree, and as the essential cause of fever. Irritation is the precursor of inflammation.

**IRRITATION, MORBID, Constitutional irritation,** is that excitement which occurs after injuries done to the body, or to any part thereof;—constituting cases of *diseased sympathy*.

**IRRORATIO, Irrigation.**

**IS, Fibre.**

**ISA'TIS TINCTORIA, Wood, Pastel.** A European plant, whose leaves have a fugitive pungent smell, and an acrid durable taste. They are not used, however, in medicine at the present day; but are the source of the dye-stuff, *wood*.

**ISCA, Boletus ignarius.**

**ISCHÆMIA, from ισχυω, 'I retain,' and αιμα, 'blood.'** Morbid retention or suppression of an habitual flux of blood, as of the hemorrhoidal or menstrual flux or of epistaxis. See *Hæmatostatica*.

**ISCHÆMON, Ischæ'mum.** Same etymon. A medicine which restrains or stops bleeding.

**IS'CHESIS, from ισχυω, 'to retain.'** Suppression or retention of a discharge or secretion.

**ISCHIA, MINERAL WATERS OF.** In this volcanic isle, five miles from Naples, there are several thermal waters, one of which—that of Gurgitello—raises the thermometer of Fahr. to 167°.

**ISCHIACUS, Ischiatic.**

**ISCHIADICUS MORBUS, Neuralgia femoropoplitea—i.** Nervus, Sciatic nerve.

**ISCHIADOCELE, Ischiocele.**

**ISCHIAGRA, Is'chias, Ischial'gia, from ισχυω, 'the haunch,' and αγρα, 'a seizure.'** A name given to ischiatic gout. *Femoro-popliteal neuralgia* has, also, been so called.

**ISCHIALGIA, Ischiagra—i.** Neuralgia femoropoplitea.

**ISCHIAS, Ischiagra—i.** Nervosa Antica, Neuralgia femoro-pretibialis—i. Nervosa Cotunnii, Neuralgia femoro-poplitea—i. Nervosa digitalis, Neuralgia cubito-digitalis—i. Nervosa postica, Neuralgia femoro-poplitea—i. à Sparganosi, Phlegmatia dolens.

**ISCHIAT'IC, Ischiad'ic, Ischiat'icus, Ischiad'icus, Ischiacus, Sciatic, from ισχυω, 'the haunch;'** whence the word *Sciatic*. An epithet given to parts connected with the ischium. The **SCIATIC NOTCHES, (F.) Échanerures Ischiatiques,** are formed by this bone; the **ISCHIATIC SPINE** belongs to it, and gives attachment to the small sacrosciatic ligament. The **TUBEROSITY OF THE ISCHIUM, Os sedentarium, Tuber Is'chii, (F.) Tuberosité sciatisque,** is formed by it. It receives the insertions of different muscles of

the thigh, and forms the projection on which the bone rests when seated.

**ISCHIATIC ARTERY, Sciatic Artery, (F.) Artère Fémoro-Poplitee** (Ch.) arises singly from the hypogastric, or with the gluteal; and seems to be really a continuation of the trunk of the hypogastric. It issues from the pelvis, at the lower part of the great sciatic notch; and, afterwards, divides into a considerable number of branches, which are distributed particularly to the posterior and superior region of the thigh.

**ISCHIATIC REGION, Sciatic region; Regio ischiadica.** The region of the hip.

**ISCHIATIC VEIN** presents the same arrangement.

**ISCHIATICUS, Sciatic.**

**ISCHIATOCELE, Ischiocele.**

**ISCHIDROSIS, Sudor'is suppressio, Oligid'ria,** from  $\iota\chi\omega$ , 'I restrain,' and  $\dot{\iota}\delta\rho\acute{o}s$ , 'sweat.' Suppression of perspiration.

**ISCHIOBLENNIA, Ischioblen'nia,** from  $\iota\chi\omega$ , 'I restrain,' and  $\beta\lambda\epsilon\nu\nu\alpha$ , 'mucus.' The suppression of a morbid but habitual discharge of mucus.

**ISCHIO-CAVERNOSUS.** Belonging to the ischium and corpus cavernosum.

**ISCHIO-CAVERNOSUS muscle, Collatoralis, Director penis, Erector penis, Sustentator Penis, Ischio-urethral** (Ch.) is a small, long, flat muscle, which surrounds the origin of the corpus cavernosum. It is fixed below to the inner side of the tuberosity of the ischium, and above to the root of the penis, where it is confounded with the fibrous membrane of the corpus cavernosum. It draws the root of the penis downwards and backwards.

**ISCHIO-CAVERNOSUS of the female, Erector clitoridis, Sustentator clitoridis, Superior rotundus clitoridis, (F.) Ischio-clitoridian, Ischio-sous-clitorien, (Ch.),** is arranged nearly as in the male, but is less bulky. It arises, by aponeurosis, from the tuberosity of the ischium, and terminates by embracing the corpus cavernosum of the clitoris, to the erection of which it appears to contribute.

**ISCHIOCELE, Ischiatocele, Ischiadocèle, Hernia ischiatica;** from  $\iota\chi\omega$ , 'the ischium,' and  $\kappa\eta\lambda\eta$ , 'tumour.' *Ischiatic hernia.* One in which the viscera issue by the great sciatic notch. It is a rare disease. The protruded parts must be reduced—the patient being placed in a favourable position, and they must be retained by a bandage.

**ISCHIO-CLITORIANUS.** That which is connected with the ischium and clitoris.

**ISCHIO-CLITORIAN ARTERY** of Chaussier is a division of the internal pudic, which furnishes the two arteries of the clitoris—the *superficial and deep-seated*.

**ISCHIO-CLITORIAN NERVE,** of the same professor, is the superior branch of the pudic nerve, which is distributed to the clitoris.

**ISCHIO-CLITORIDIEN, Ischio-cavernosus**—i. Coccygeus, Coccygeus—i. Cræti-tibialis, Semi-tendinosus—i. Femoralis, Adductor magnus—i. Femoro-péronier, Biceps flexor cruris—i. Péroneal, Transversus perinæi—i. Popliti-femoral, Semi-membranosus—i. Popliti-tibialis, Semi-membranosus—i. Prætibialis, Semi-tendinosus—i. Sous-Clitorien, Ischio-cavernosus—i. Sous-trochantérien, Quadratus femoris—i. Spini-trochantérien, Ischio-trochanterianus—i. Uréthral, Ischio-cavernosus.

**IS'CHION, Ischium, Os ischii, Os coxarum dicitur, Hip bone, Seat bone, (F.) Os de l'assiette.** The lowermost of the three portions which compose the os innominatum in the fœtus and young individual. The inferior region of the same bone has, also, been called *ischium*, in the adult. According to Hesychius, the ancients designated by the word *ischion*, the capsular ligament of the coxo-femoral articulation, as well as the articulation itself. Some derive the word from  $\iota\chi\iota\varsigma$ , the lumbar region; others from the verb  $\iota\chi\omega$ , 'I arrest,' 'I retain;'—because that bone serves as a base or support for the trunk, when we are seated.

**ISCHION, Haunch.**

**ISCHIOPAGES, from Ischion, and παγω, 'I fasten.'** A monstrous union of two fœtuses, in which they are attached to each other by the ischia.—Geoffroy St. Hilaire. See Hypogastrodidymus.

**ISCHIOPTHYSIS, Tabes coxar'ia, Pthisis ischiadica,** from  $\iota\chi\omega$ , 'ischium,' and  $\phi\theta\iota\sigma\iota\varsigma$ . Pthisis in consequence of suppuration of the hip joint.

**ISCHIO-PROSTATICUS.** Winslow, Santorini, Albinus, and Sömmerring, have given this name to the fibres of the transversus perinæi muscle, which go towards the prostate.

**ISCHIO-RECTAL FOSSA, Perineal fossa.**

**ISCHIOSIS, Neuralgia femoro-poplitæa.**

**ISCHIO-TROCHANTERIANUS, Gemelli, Gemelli.** Part of the *Marsupialis* of Cowper; *Car'neum Marsupium, Ischio-spini-trochanterien, Securus* et *tertius quadrigenus, (F.) Musculo canellé, Accessoire à l'obturateur interne.* Two small, fleshy bundles, long and flat, which arise,—the superior on the outside of the sciatic spine; the inferior behind the tuberosity of the ischium. Both pass horizontally outwards, and are attached to the tendon of the obturator internus, which they accompany into the fossa of the trochanter. These muscles are rotators of the lower limb outwards. They can, also, turn the pelvis on the femur, in standing on one foot.

**ISCHL, MINERAL WATERS OF.** These springs, which are in Upper Austria, contain iodine and bromine.

**ISCHNOPHONIA, from  $\iota\chi\omega$ , 'slender,' and φωνη, 'voice.' Slenderness of voice.—Hippocrates, Galen.**

**ISCHNOTES, Emaciation.**

**ISCHO,  $\iota\chi\omega$ , 'I keep back,' 'I restrain,' 'I hold firm.'** Hence:

**ISCHOBLENNIA, Ischioblen'nia.**

**ISCHOCENOSIS, from  $\iota\chi\omega$ , 'I arrest,' and κενωσις, 'evacuation.' Retention or suppression of a natural evacuation—as of the menses.**

**ISCHOCOLIA, from  $\iota\chi\omega$ , 'I arrest,' and χολη, 'bile.' Retentio bilis.** Retention or suppression of the biliary secretion.

**ISCHOCOILIA, Constipation.**

**ISCHOCOPRIA, Constipation.**

**ISCHOGALACTIA, Retentio lactis, from  $\iota\chi\omega$ , and γαλα, 'milk.' Want of milk in the mamma.**

**ISCHOLOCHIA, or Ischoloche'a, Lochios'chisis, Suppressio lochio'rum, from  $\iota\chi\omega$ , 'I restrain,' and λοχεια, 'the lochial discharge.' Retentio lochio'rum.** Suppression of the lochial discharge.

**ISCHOMENIA, Amenorrhæa.**

**ISCHONEURALGIA**, Neuralgia femoro-poplitæa.

**ISCHOPHONIA**, Balbuties.

**ISCHOSPERMIA**, from *ἴσχω*, 'I retain,' and *σπέρμα*, 'sperm.' *Sem'inis retentio*. Retention or suppression of the spermatic secretion.

**ISCHURÆTIC**, *Ischuræticum*. Same etymon as the next. A medicine for relieving suppression of urine. A diuretic.

**ISCHURIA**, *Urinæ suppressio*, *Stoppage of urine*, *Suppressio lotii*, *Paruria retentio'nis*; from *ἴσχω*, 'I arrest,' 'I retain,' and *οὐρῶν*, 'urine.' Impossibility of discharging the urine. Generally restricted to suppression of the secretion, or to renal Ischuria or *Anuria*, *Anuresis*.

*Ischuria Vera* is that in which the urine having accumulated in the bladder, the patient is unable to pass it, notwithstanding the inclination which constantly distresses him. In *Falsa ischuria*, *Paruria inops*, *Paruria retentio'nis renalis*, *Ischuria notha* seu *spuria*, of some, (F.) *Suppression d'Urine*, owing to some disease of the kidney or uterus, the urine cannot reach the bladder.

Ischuria has likewise received various other names, according to the seat and character of the obstacle which opposes the exit of the urine: hence the expressions—*Renal*, *Uretoric*, *Vesical*, *Urethral*, and *Calculous Ischuria*. *Vesical Ischuria* is synonymous with Retention of urine, which see.

**ISCHURIA CYSTO-PHEGOMATICA**, Cystirrhœa—i. Phimosica, see Phimosicus—i. Spasmodica, Cystospasmus—i. Spuria, see Ischuria—i. Urethralis à phimosi, see Phimosicus—i. Vera, see Ischuria—i. Vesicalis, Retention of urine.

**ISINGLASS**, Ichthyocolla.

**ISIR**, Elixir.

**ISIS NOBILIS**, see Coral.

**ISLE OF WIGHT, CLIMATE OF**. This beautiful island is a favourable summer retreat for invalids. Undercliff is the situation chosen as a winter residence for phthisical valetudinarians. Cowes, Niton, Sandown, Shanklin, and Ryde, are delightful summer residences.

**ISOCHRONOUS**, *Isochronus*, *Isochron'ius*, *Isodromus*, from *ἴσος*, 'equal,' *χρόνος*, 'time.' That which takes place in the same time, or in equal times. The pulsations of the arteries, in various parts of the body, are nearly isochronous.

**ISOCHRYSON**, *Auro compar*; from *ἴσος*, 'equal,' and *χρῶσος*, 'gold.' A collyrium, described by Galen as worth its weight in gold. Libavius has also given this name to an amalgam, made with equal parts of antimony and mercury.

**ISOC'RATES**; from *ἴσος*, 'equal,' and *ἡσχυρῶν*, 'I mix.' A mixture of equal parts of wine and water.—Hippocrates.

**ISODROMUS**, Isochronous.

**ISOLUSINE**, see Polygala senega.

**ISOMERIC**, *Isomer'icus*, *Isom'erus*, *Isoma'rus*, *Isom'orus*, from *ἴσος*, 'equal,' and *μέρος*, 'part.' An epithet applied to different bodies which agree in composition, but differ in properties. The condition is termed *Isomer'ism*.

**ISOMERISM**, see Isomeric.

**ISOMORPHISM**, see Isomorphous.

**ISOMORPHOUS**, *Isomorph'us*, *Isomorph'icus*, from *ἴσος*, 'equal,' and *μορφή*, 'form.' An epithet applied to different bodies which

have the same crystalline form. The condition is called *Isomorphism*.

**ISOPATHIA**, from *ἴσος*, 'equal,' and *πάθος*, 'disease.' This term has been used by some of the German writers to signify the cure of diseases by the disease itself, or its products;—under the hypothesis, that every contagious disease contains in its contagious matter the means for its cure;—thus, that variola may be cured by homœopathic doses of variolous matter; syphilis, with venereal matter, &c., &c.

Isopathia has been used by an American writer—Dr. J. M. B. Harden, of Georgia—to mean "*Parallelism of Diseases*;" "the disposition of diseases to 'anastomose with each other,' or to wear each other's livery."

**ISSUE**, Fungiculus—i. Peas, Aurantia curassaventia, see Fungiculus.

**ISTHME DU GOSIER**, Isthmus of the fauces.

**ISTHMION**, Isthmus, Pharynx.

**ISTHMITIS**, *Inflammatio Fau'cium*, *I. palati*, *Angi'na simplex*, *Cynan'che simplex*, *Angi'na mitis*, *A. faucium*, *Angor fau'cium*, (F.) *Angina simpl.* Inflammation of the fauces. See Cynanche pharyngea, and Angina.

**ISTHMOCATARRHUS**; from *ἴσθμος*, 'the fauces,' and *καταρροῦς*, 'catarrh.' Catarrh of the fauces.

**ISTHMODYN'IA**, from *ἴσθμος*, 'the fauces,' and *δύνη*, 'pain.' Pain in the fauces.

**ISTHMOPL'EGIA**; from *ἴσθμος*, 'the fauces,' and *πληγή*, 'a stroke.' Paralysis of the fauces.

**ISTHMOS**, Pharynx.

**ISTHMOTYPHUS**, Cynanche maligna.

**ISTHMUS**, *Isth'mion*. A tongue of land joining a peninsula to a continent, or which separates two seas. Anatomists have given the name *Fauces*, *Isthmus of the Fauces*, *Isthmus Fau'cium*, *Clastrum Gut'turis*, (F.) *Isthme du gosier*, to the strait which separates the mouth from the pharynx. It is formed above by the velum palati and uvula; at the sides, by the pillars of the fauces and the tonsils; and below, by the base of the tongue.

**ISTHMUS OF THE FOSSA OVA'LIS**; *Isthmus Viussenii*, *Striga cartilaginea cordis*, is the prominent arch formed above the fossa ovalis by the union of the two pillars which bound the cavity.

**ISTHMUS OF THE THYROID GLAND** is a narrow band that unites the two chief lobules composing the thyroid gland.

**ISTHMUS HEPATIS**, see Lobulus anonymus—i. Urethræ, see Urethra—i. Viussenii, Isthmus of the fossa ovalis—i. Viussenii, see Ovalis fossa.

**ITALICUS MORBUS**, Syphilis.

**ITCH**, *Pora*—i. Bakers', see Psoriasis—i. Barbers', *Sycosis*—i. Grocers', see Psoriasis—i. Weed, *Veratrum viride*.

**ITCHING**, *Parap'is pruritus*, *Au'talgia pruriginosa*, *Pruritus*, *Prurigo*, *Cnesmos*, *Cnesma*, (F.) *Pruriti*, *Demangeason*. A sensation, more inconvenient than painful; seated especially at the surface of the body, and which provokes the patient to scratch the part. It may be either an external or an internal sensation; that is, produced by an external body, or by some modification in the organic actions of the part to which it is referred.

**ITEA**, Salix.

**ITER DENTIS**, see *Gubernaculum dentis*—*i.* Femineum, Perinæum—*i.* ad Infundibulum, Vulva—*i.* a Palato ad Aures, Eustachian tube—*i.* ad Quartum ventriculum, Aquæductus Sylvii—*i.* ad Tertium ventriculum, Vulva—*i.* Urinæ, Urethra—*i.* Urinarium, Urethra.

**ITHYPHAL'LUS**, from ἴθυς, 'straight,' and φάλλος, 'penis.' An amulet, in the form of a penis, anciently worn round the neck, to which were attributed alexiterial properties.

**ITINERARIUM**, Conductor, Director.

**ITIS**; from ἴτις, 'bold,' 'rash.' A suffix denoting inflammation;—as *encephalitis*, inflammation of the encephalon;—*Pleuritis*, inflammation of the pleura.

**IVA**, Teucrium *iva*—*i.* Arthritica, Teucrium *chamæpitys*—*i.* Moschata Monspelienisium, Teucrium *iva*—*i.* Pecanga, Smilax sarsaparilla.

**IVETTE MUSQUÉE**, Teucrium *iva*—*i.* *Pesite*, Teucrium *chamæpitys*.

**IVOIRE**, Ivory.

**IVORY**; *Ebur*, *El'èphas*, (F.) *Ivoira*. The tusk of the elephant. It is chiefly composed

of phosphate of lime, and is used for the fabrication of pessaries, artificial teeth, handles of instruments, &c. Formerly, it entered into some pharmaceutical preparations, when calcined to whiteness. It was regarded as astringent and anthelmintic, and was called *Spodidium*.

**IVRESSE**, Temulentia.

**IVY**, *Hedera helix*, *Kalmia angustifolia*—*i.* Big, *Kalmia latifolia*—*i.* Ground, *Glecoma heteracea*.

**IXIA**, *Varix*, *Viscum album*.

**IXINE**, *Atractylus gummifera*.

**IXIR**, Elixir.

**IXOS**, *Viscum album*.

**IXUS**, *Galium aparine*.

**IXYOMYELI'TIS**; from ἰξύς, 'the lumbar region,' μυελός, 'marrow,' and ἴτις, denoting inflammation. Inflammation of the spinal marrow in the lumbar region.

**IXYS**, *I'ya*, *I'yè*. Used by different authors for the ilia, flanks, and loins; most frequently for the last.—Hippocrates.

## J.

**JABOT**, Ingluvies.

**JACA INDICA**, *Thymus mastichina*.

**JACEA**, *Viola Tricolor*—*j.* *Ramosissima*, *Centaurea calcitrapa*.

**JACENS**, Sick.

**JACK IN THE HEDGE**, *Alliaria*.

**JACKSON'S BATHING SPIRITS**, Lini-mentum saponis compositum.

**JACOBÆA**, *Senecio Jacobæa*.

**JACOBÉE**, *Senecio Jacobæa*.

**JACOBSON'S ANASTOMOSIS**, see *Petro-sal ganglion*.

**JACTATION**, *Jactitation*, *Jactatio*, *Jactatus*, *Rhaptasmos*, *Jactatio*, from *jactare*, 'to toss about.' Extreme anxiety; excessive restlessness;—a symptom observed in serious diseases.

**JACTITATIO**, Inquietude.

**JADE NÉPHRITE** ou **ORIENTALE**, *Nephreticus lapis*.

**JAGRE**, see *Tari*.

**JALAP**, *Convolvulus jalapa*, *Phytolacca decandra*—*j.* Cancer root, *Phytolacca decandra*—*j.* Wild, *Convolvulus panduratus*.

**JALAPA**, *Convolvulus jalapa*.

**JALAPINE**, see *Convolvulus jalapa*.

**JALAPIUM**, see *Convolvulus jalapa*.

**JALAPPA**, *Convolvulus jalapa*—*j.* Alba, *Convolvulus mechoacan*.

**JALEYRAC**, MINERAL WATERS OF. These waters are situate two leagues from Mauriac in France, on the road from Clermont in Auvergne. The waters contain lime and carbonate of soda, and are esteemed to be tonic, aperient, &c.

**JAMAICA**, see *West Indies*—*j.* Bark tree, *Bursera gummifera*.

**JAMACINE**, see *Geoffræa inermis*.

**JAMBES DE BARBADE**, see *Elephantiasis*—*j.* *du Cervelat*, *Corpora testiformia*.

**JAMBIEE**, Tibial—*j.* *Antérieur*, *Tibialis anticus*—*j.* *Grêle*, *Plantar muscle*—*j.* *Postérieur*, *Tibialis posticus*.

**JAMES'S ANALEPTIC PILLS**, see *Analeptica*.

**JAMESTOWN WEED**, *Datura stramonium*.

**JANAMUNDA**, *Geum urbanum*.

**JANIFHA MANIHOT**, *Jatropha manihot*.

**JANITOR**, *Pylorus*.

**JANITRIX**, *Porta vena*.

**JANON-TARENTISME**, *Tarantismus*.

**JANUS**, *Dicephalus*.

**JAQUIER**, *Artocarpus*.

**JARRET**, *Poples*.

**JARRETIÈRE**, *Poplites muscle*.

**JARRETIÈRE** (F.), *Perisæolis*, a garter, from *garsetum* or *garretum*, in low Latin, the *ham*. A kind of furfuraceous herpes, which occupies the part of the leg where the garter is worn.

**JASMIN**, *Jasminum officinale*.

**JASMINUM ARABICUM**, *Coffea Arabum*.

**JASMINUM OFFICINALE**, *Jasminum*, *Jasminum*; the *Jos' samine*, (F.) *Jasmin*. The flowers of this beautiful plant have a very fragrant smell, and a bitter taste. They afford, by distillation, an essential oil; which is much esteemed in Italy, for rubbing paralytic limbs, and in the cure of rheumatic pains.

**JASPER**, *Jaspis*.

**JASPIS**, *Jasper*. A precious stone, supposed by the ancients to be capable of arresting hemorrhage when worn as an amulet.

**JATROPHA CURCAS**, *Ricinus major*, *Ricinus*; *Pineus purgans*, *Pinho'nes Ind'ici*, *Faba cathartica*, *Avella'na cathartica*, *Nux cathartica America'na*, *Nux Barbaden'sis*; *Physic Nut*, (F.) *Pignon d'Inde*, *Médecinier cathartique*, *Grand haricot de Pérou*, *Pignon de Barbade*, *Noix cathartique*, *N. Americains* ou *des Barbades*. *Nat. Order*, *Euphorbiacem*. The seeds of this plant afford a quantity of oil, given, in many places, like the castor oil; to which, indeed, it is nearly allied. They contain a peculiar acid, the *Jatrophic* or *Igusuric*.

The seeds of *JATROPHA MULTIVIDA* are called *Purging Nuts*, and give out a similar oil.

*JATROPHA ELASTICA*, see *Caoutchouc*.

*JATROPHA MAN'IHOT*, *Jan'ipha Man'ihot*.

The plant affording the *Cassa'da* or *Cassa'va* Root, *Caca'vi*, *Cassa'vt*, *Caza'bi*, *Pain de Madagascar*, *Ric'inus minor*, *Man'ioe*, *Magnoe*, *Maniot*, *Yucca*, *Maniibar*, *Aipi*, *Aipima cozera*, *Aipipoca*, *Janipha*. The juice of the root is extremely acrid and poisonous. What remains, after expressing it, is made into cakes or meal; of which the cassada or cassava bread is formed. This bread constitutes a principal food of the inhabitants of those parts where it grows.

The fecula of the root forms *Tapioca*, *Cipipa*, *Fec'ula Tapio'ka*, which is very nutritious.

A factitious *Tapioca* is met with in the shops, which is in very small, smooth, spherical grains, and is supposed to be prepared from potato starch. It is sold under the name *pearl tapioca*.

**JAUNDICE**, *Icterus*—*j.* Black, *Melæna*—*j.* Red, *Phenigmus*.

*JAUNE*, Yellow—*j.* *Œuf*, see *Ovum*.

*JAUNESSE*, *Icterus*.

**JAW BONE**, *Maxillary Bone*.

**JEAN-DE-GLAINES**, *ST.*, **MINERAL WATERS OF**. These waters are situate two leagues from Billom in Auvergne. They contain chloride of calcium, and carbonate of magnesia; dissolved in an excess of carbonic acid.

*JECINUS*, *Liver*.

**JECORARIA**, *Marchantia polymorpha*.

**JECORARIUS**, *Hepateros*, *Hepatic*.

**JECORIS VOMICA**, see *Hepatitis*.

**JECTIGATIO**. A word used by Van Helmont for a species of epilepsy or convulsion.

**JECUR**, *Liver*—*j.* *Uterinum*, *Placenta*.

**JEFFERSONIA BARTONI**, *Common Twin-leaf*, *Yellow root*, *Helmet pod*, *Ground Squirrel Pea*. An indigenous plant, belonging to *Nat. Ord.* *Berberideæ*, *Sex. Syst.* *Octandria Monogynia*; which possesses medical properties analogous to those of *hydrastis*.

**JEJUNITAS**, *Hunger*.

**JEJUNITIS**; a term of hybrid formation,—from *Jejunum*, 'the intestine jejunum,' and *itis*, a suffix denoting inflammation. Inflammation of the jejunum.

**JEJUNIUM**, *Hunger*, *Fasting*.

**JEJUNUM**, from *jejunus*, 'empty;' *Nesti*, *νεστι*, *Nesti'a*. The part of the small intestine comprised between the duodenum and ileum. It has been so called, because it is almost always found empty in the dead body.

**JELLY**, *Gelly*—*j.* of the *Cord*, *Gelatin* of *Wharton*—*j.* *Water*, *Brasenia hydropeltis*.

**JERKON**, see *Arrow-poison*.

**JERKING RESPIRATION**, *Respiration*, *jerking*.

**JERKS**, see *Mania*, *dancing*.

**JERSEY**, **CLIMATE OF**. *Jersey* is the largest of the islands of the British Channel, and is most frequented by invalids. Its climate closely resembles that of the south-west coast of England; and especially of *Penzance*, and it is adapted to the same class of invalids.

**JERUSALEM OAK OF AMERICA**, *Chenopodium anthelminticum*.

**JESEMINUM**, *Jasminum officinale*.

**JESSAMINE**, *Jasminum officinale*—*j.* *Yellow*, *Gelseminum nitidum*.

**JEVNESSE**, *Adolescence*.

**JEWEL WEED**, *Impatiens balsamina*.

**JEW'S EAR**, *Peziza auricula*—*j.* *Harp*, *Trillium latifolium*.

**JIMSTON WEED**, *Datura stramonium*.

**JOANNESIA PRINCEPS**, *Anda*.

**JOANNETTE**, **MINERAL WATERS OF**.

Several springs are found at *Joannette*, about five leagues from *Angers*, in *France*. The waters are both cold and warm, and contain sulphate of lime; subcarbonate of soda, chloride of sodium; some iron; chloride of calcium, and, sometimes, a kind of saponaceous matter. They are chiefly used as a tonic in chlorosis, leucorrhœa, &c.

**JOE PYE**, *Eupatorium perfoliatum*.

**JOHNE**, **MINERAL WATERS OF**. *Johne* is a village near *Dol* in *France-Comté*, *France*, where is a mineral spring, which contains subcarbonate of soda, and subcarbonates of magnesia and iron. It is used chiefly as a bath in certain diseases of the skin, and in atonic affections.

**JOINT**, *Articulation*—*j.* *Ball and socket*, *Enarthrosis*—*j.* *Dove-tail*, *Suture*—*j.* *Stiff*, *Ankylosis*.

**JONAS**, **MINERAL WATERS OF**. This spring is situate to the south-west of *Bourbon-l'Archambault*, in *France*. The waters contain chloride of calcium and sulphate of lime; chloride of sodium, and sulphate of soda; carbonate of iron and carbonic acid gas. They are tonic and aperient.

**JOUAN**, *ST.*, **MINERAL WATERS OF**. *St. Joan* is a village, near *Saint-Malo*, in *France*. The water is a cold chalybeate.

**JOUBARBE ACRE**, *Sedum*—*j.* *des Trois*, *Sempervivum tectorum*—*j.* *des Vignes*, *Sedum telephium*.

**JOUE**, *Genus*.

**JOULOS**, *Julus*.

**JOUR**, *Dies*.

**JOURS CANICULAIRES**, *Dog days*—*j.* *Critiques*, *Critical days*—*j.* *Indicateurs*, *Indicating days*.

**JOVIS FLOS**, *Crocus*—*j.* *Glans*, *Juglans*.

**JUCATO CALLELOE**, *Phytolacca decandra*.

**JUDE'US**, *Juda'icus* (*Lapis*), *Phanici'us*, *Lapis*, *Tecol'ithos*, (*F.*) *Pierre Judaïque*. A stone, found in *Judæa*, *Palestine*, &c. Called, also, *Lapis Syriacus*. It was formerly esteemed to be diuretic and lithontriptic.

**JUDGMENT**, *Judic'ium*, (*F.*) *Jugement*. The faculty of the intellect, by which ideas are compared with each other, and their relative worth appreciated.

**JUDICATORII DIES**, *Critical days*.

**JUDICIUM**, *Judgment*.

**JUGAL**, *Zygomatic*—*j.* *Process*, *Zygomatic process*.

**JUGAL REGION**, *Re'gio jugal'is*. The region of the cheek bone.

**JUGALE OS**, *Malæ os*.

**JUGALIS**, *Zygomatic*.

**JUGALIS SUTURA**, from *υγρον*, 'a yoke.' The suture which unites the *Os Mala* or *Os Jugal'e* with the superior maxillary bone. Also, the sagittal suture.

**JUGEMENT**, *Judgment*.

**JUGLANS CINEREA** (*Jovis glans*), *Butter Nut*, *Oil Nut*, *White Walnut*. The inner bark of the root of this tree, *Juglans* (*Ph. U. S.*), which is abundant in the United States, is used in medicine, in the form of extract, as an efficacious and mild laxative, in doses of from 10 to

20 grains. It is in the secondary list of the Pharmacopœia of the United States.

**JUGLANS REGIA**, *Juglans*, *Nux Juglans*, *Carya basilica*, *nuxca*, *Carya*. The Walnut, (F.) *Noyer*, (the tree;) *Noix*, (the nut.) The unripe fruit, in the state in which it is pickled, was formerly esteemed to be anthelmintic. The *putamen* or green rind of the walnut has been celebrated as a powerful antisyphilitic, and used as a sort of diet drink. The *kernal* is an agreeable article of dessert; but, like all nuts, is difficult of digestion. The expressed oil, *Huile de Noix*, is used in France as an aliment, and, like other fixed oils, is laxative.

Various preparations of the leaves have been recommended in serofulous affections.

**JUGULAR**, *Jugularis*, from *jugulum*, 'the throat.' Relating to the throat.

**JUGULAR FOSSA**, *Fossa Jugularis*, is a cavity in the *petro-occipital* suture. It is formed by the petrous portion of the temporal bone, and by the occipital bone, and lodges the origin of the internal jugular vein. It is, sometimes, called *thimble-like cavity*.

**JUGULAR VEINS**, *Vena Jugularis*, *V. sphenoides*, *V. apoplectica*, *V. soporalis*. These are situated at the lateral and anterior parts of the neck. They are two on each side; one *external*, the other *internal*. 1. The *External Jugular Vein*, *Trachilo-sous-cutanea*, (Ch.) is of less size than the internal. It descends, almost vertically, along the anterior and lateral part of the neck, from the cervix of the lower jaw to the subclavian vein, into which it opens, a little above the internal jugular. It is formed by the *internal maxillary, superficial temporal, and posterior auricular veins*. It is this vein, which is commonly opened in bleeding in the neck. 2. The *Internal Jugular Vein*, *V. Céphalique* (Ch.) *Vena apoplectica*, is much larger and more deeply seated than the preceding. It descends, vertically, along the anterior and lateral part of the neck, from the posterior part of the foramen lacernum posterius as far as the subclavian vein. It commences at the *sinus* of the *jugular vein*, (F.) *Golfe de la veine jugulaire*, and receives the blood, which returns by the *sinus* of the *dura mater*, and that of the *facial, lingual, pharyngeal, superior thyroid, occipital, and diploic veins*.

**JUGULUM**, Clavicle, Throat—j. Uteri, Collum uteri.

**JUGUM PENIS**, *Præse-uræthra*.

**JUICE**, EXPRESSED, see Succus.

**JUJUBE**, *Jujuba*, *Zizyphum*. The fruit of *Rhamnus Zizyphus*, *Zizyphus vulgaris*, a native of the south of Europe. It was formerly ranked amongst the pectoral fruits. It has an agreeable sweet taste. The fruits of two other species of *Zizyphus*—*Z. jujuba*, a native of the East Indies, and *Z. lotus*, growing in North Africa, possess similar properties to *Zizyphus vulgaris*.

**JUJUBE PASTE**, Paste of jujubes.

**JULAPIUM**, Julep—j. Camphoræ, Mistura camphoræ.

**JULEB**, Julep.

**JULEP**, *Jula'pium*, *Jule'pus*, *Zula'pium*; *Juleb* of the Persians. A sweet drink. A demulcent, acidulous or mucilaginous mixture.

**JULEP**, CAMPHOR, Mistura camphoræ—j. Camphoræ, Mistura camphoræ.

**JULUS**, *Julos*, *Ioulos*, *ιουλος*. The first

down that appears upon the chin.—Rufus of Ephesus.

**JUMEAU**, Gemellus.

**JUMEAU DE LA JAMBE**, Gastrocnemii.

**JUMELLE**, Gemellus.

**JUMENTOUS URINE**, *Urina jumentouse*.

**JUNCTURA**, Articulation.

**JUNCUS ODORATUS**, *Andropogon schananthus*, *Panum camelo'rum*, *Juncus aromaticus*, *Camel's hay*, *Sweet rush*, *Schakan'thus*, *Schakan'thum*, *Scaman'thum*, *Calamus odoratus*, *Squinan'thus*, *Gramen orientale*, (F.) *Juncus odorans*. The dried plant, which is generally procured from Turkey and Arabia, has an agreeable smell, and a warm, bitterish taste. It was formerly used as a stomachic and deobstruent.

**JUNGLE FEVER**. A variety of remittent occurring in the jungle districts of India.

**JUNIPER TREE**, *Juniperus communis*.

**JUNIPERUM VINUM**. Wine impregnated with juniper berries.

**JUNIPERUS COMMUNIS**, *Arceuthos*, *Juniper tres*; *Akat'alis*, *Akat'ara*. Family, Coniferae. Sex. Syst. Diœcia Monadelphia. The tops and berries, *Juniperus* (Ph. U. S.), are ordered in the pharmacopœias. Their odour is strong, but not unpleasant. Taste warm, pungent. Properties dependent upon essential oil, which they yield to both water and alcohol. Dose, ℥j, to ʒss, rubbed with sugar. In Holland, juniper berries are used for flavouring the gin. The oil, *O'leum juniperi*, possesses the virtues of the plant. It is called, by Ruland, *Targar*. (F.) *Genévrier* (the plant,) *Genévère* (the berry.)

**JUNIPERUS LYCIA**. This plant—*Thu'ra*, *Th. virga*, *Arbor thuris'ara*, has been supposed to afford the *trus frankincense*, *Cedrus Olibanum*, *Thus Libano'tos*, *Libano'tum*, *Lib'anos*, *Thus mas'culum*, *Thus verum*, (F.) *Enceus*. By some, however, it is supposed to be the produce of an *Amyris*, and by others of *Boaue'l'ia serrata*. The odour of olibanum is peculiar and aromatic: taste bitterish and slightly pungent; partly soluble in alcohol, and forming a milky emulsion, when triturated with water. It was formerly used in dysentery and hæmoptysis, but is now never employed except as a perfume in a sick room.

**JUNIPERUS SABI'NA**, *Sabi'na*, *Savi'na*, *Sabi'na sterilis*, *Bruta*, *Cedrus baccif'era*, *Common* or *barren savin*; *Brathu*, *Brathys*, *Bo'rathron*, *Bo'rathron*, (F.) *Sabine*, *Savinier*. The odour of savin leaves is strong and disagreeable. Taste hot, acrid, and bitter, depending on an essential oil. Their operation is stimulant, emmenagogue, anthelmintic, and abortive; externally, escharotic. Dose, internally, gr. v to x of the powder. As an escharotic, they are applied in powder or formed into a cerate. The essential oil, *O'leum Sabi'na* (Ph. U. S.), has the virtues of the savine. Dose two to five drops.

**JUNIPERUS VIRGINIA'NA**, *Red cedar*. This tree is known throughout the United States by the name of *savine*, and is often used for the same purposes.

**JUNK**, Pad.

**JUNO LUCINA**, *Ilithyia*.

**JUPITER**, Tin.

**JURIBALI**, *Euribali*. A tree in the forests of Pomerania. Fam. Meliaceæ. Class, Octan-

dria. *Nat. Order*, Monogynia. The bark is febrifuge, and may be given in powder or infusion, (½j ad *aq. bulliant.* Oij.)

**JURISPRUDENCE, MEDICAL.** from *jus*, *juris*, 'law,' and *prudencia*, 'knowledge.' *Jurisprudencia Medica*. This word is often used synonymously with *Legal Medicines*. It is now, as frequently perhaps, employed for the imbodied laws and regulations that relate to the teaching and practice of medicine.

**JUS**, *Zomas*, *Zomid'ium*, *Sorbi'tio*, *Sorb'itum*. Soup, broth, or *bouillon*—j. *Coagulum*, Gelly.

**JUS D'HERBES**, (F.) The juice of certain vegetables administered as depuratives; as that of fumitory, burdock, water trefoil, &c.

**JUS JELATUM**, Gelly—j. *de Réglisse*, see *Glycyrrhiza*—j. *de Viande*, see *Bouillon*.

**JUSQUIAMUS**, *Hyoscyamus*.

**JUSQUIAUMB**, *Hyoscyamus*.

**JUSTICIA BIVALVIS**, *Adulasso*—j. *Adhatoda*, *Adhatoda*.

**JUSTICIA ECBOL'ITUM**, *Carim curini*. A Malabar plant, the root of which, and the leaves, in decoction, are considered in the country to be lithontriptic.

**JUSTICIA PECTORA' LIS**. A West India plant, which is slightly astringent. (F.) *Carmantine*, *C. Pectorale*, *Herbe aux Charpentiers*.

**JUVANS**, *Anasil'ium*, *Remed'ium*. A medicine or substance of any kind, which relieves a disorder. An adjuvant.

**JUVENIS**, Adolescens.

**JUVENTUS**, Adollescens.

**JUXTAPOSIT'ION**, *Juxtapositi'io*, from *juata*, 'near to,' and *ponere, positum*, 'to place.' The mode of increase proper to minerals; which consists in the successive application of new molecules upon those that form the primitive nucleus. It is opposed to *intussusception*.

K.

*N. B.—Most of the terms derived from the Greek are found under the letter G.*

**K.** This letter was formerly used to designate a compound of gold.

**KAATH**, Catechu.

**KAAWY**. Ancient name of an Indian drink, prepared from maize.

**KABALA**, Cabal.

**KÆMPFERIA GALANGA**, see *Maranta galanga*.

**KÆMPFERIA ROTUN'DA**. Called after *Kæmpfer*, the naturalist; *Zedo'ria*, *Z. rotun'da*, *Amo'mum zedo'ria*, *Col'chicum Zeylan'icum*, *Zedo'ary*, (F.) *Zidoarys rond*. The roots of this Ceylonese plant have a fragrant smell, and warm, bitterish, aromatic taste. They are in wrinkled, gray, ash-coloured, heavy, firm, short pieces; of a brownish-red colour within; and are stimulant and carminative. Dose, ʒj to ʒj of the powder.

According to some, *round zedoary* is furnished by *Curcuma xerumbet*;—the *long, Zedo'ria longa*, by *Curcuma zedo'ria*.

**KAHINCÆ RADIX**, *Caincæ radix*.

**KAIB**, *Kayl*. A word employed by the alchemists for sour and coagulated milk.

**KAJEPUT**, *Cajeput*.

**KAKOCHYMIA**, *Cacoachymia*.

**KALI**, Potash—k. *Acetas*, Potassæ *acetas*—k. *Aeratum*, Potassæ *carbonas*—k. *Causticum*, Potassa *fusa*—k. *Causticum cum calce*, Potassa *cum calce*—k. *Chloricum*, Potassæ *urias hyperoxygenatus*—k. *Hydriodinicum*, see Potassæ *hydriodas*—k. *Nitricum*, Potassæ *nitras*—k. *Oxalicum acidulum*, Potassæ *oxalate of*—k. *Præparatum*, Potassæ *subcarbonas*—k. *Præparatum e tartaro*, see Potash—k. *Purum*, Potassa *fusa*—k. *Spinosum cochleatum*, *Salsola kali*—k. *Subcarbonas*, Potassæ *subcarbonas*—k. *Sulphas*, Potassæ *sulphas*—k. *Sulphuricum*, Potassæ *sulphas*—k. *Sulphuretum*, Potassæ *sulphuretum*—k. *Tartarizatum*, Potassæ *tartras*—k. *e Tartaro*, see Potash—k. *Vitriolatum*, Potassæ *sulphas*.

**KALICUM HYDRAS**, Potassa *fusa*.

**KALIIUM IODATUM**, see Potassæ *hydriodas*.

**KALMIA ANGUSTIFOLIA**. Called after Kalm, the botanist. *Ivy*, *Narrow-leaved Kalmia* or *Laurel*, *Dwarf Laurel*, *Sheep Laurel*. This plant has the same virtues as *K. latifolia*. So also has

**KALMIA GLAUCA**, *Swamp Laurel*.

**KALMIA BROAD-LEAVED**, *K. latifolia*.

**KALMIA LATIFOLIA**, *Broad-leaved Kalmia*, *Cal'ico bush*, *Laurel*, *Mountain Laurel*, *Rose Laurel*, *Big Ivy*, *Spoonwood*, *Lambkill*, *Sheep-poison*, *Broad-leaved Laurel*. This plant kills sheep and other animals. The Indians use it as a poison. The powdered leaves have been applied successfully in tinea capitis; and a decoction of it has been used for the itch. The powder, mixed with lard, has been applied in herpes.

**KALMIA NARROW-LEAVED**, *K. angustifolia*.

**KALO**, *Arum esculentum*.

**KAMPHUR**, *Camphor*.

**KAPHUR**, *Camphor*.

**KARABE**, *Asphaltum*.

**KARABITIS**, *Phrenitis*.

**KARCINOSEN**, *Carcinoses*.

**KARENA**, *Carena*.

**KASSADER**, *Convolvulus panduratus*.

**KASSAUDEUR**, *Convolvulus panduratus*.

**KATASARCA**, *Anasarca*.

**KATASTALTICA**, *Astringents*.

**KAVA**, *Ava*.

**KAVIAC**, *Caviare*.

**KAYL**, *Kaib*.

**KELOID**, *Canceroid*.

**KELOTOMIA**, *Celotomia*.

**KELP**, *Varec*. The impure mineral alkali, obtained by burning certain marine plants. See *Soda*.

**KENNELWORT**, *Scrophularia nodosa*.

**KENTUCKY, MINERAL WATERS OF**. The Olympian springs in this state are near the sources of Licking river. There are three different kinds, in the space of half a mile.

One of these is saline, impregnated with sulphur;—another is chalybeate, and a third a sulphureous spring. In various parts of Kentucky, there are saline waters, which are frequented by invalids. The *Salines* at Bigbone, formerly employed in the manufacture of salt, are now resorted to by invalids. A spring, near Harrodsburg in Mercer county, is strongly impregnated with sulphate of magnesia.

KERATITIS, Ceratitis.

KERATO-GLOSSUS, Cerato-glossus.

KERATO-IRITIS, Aquo-membranitis.

KERATONYXIS, Ceratonyxis.

KERATO-PHARYNGEUS, Cerato-pharyngus.

KERATO-STAPHYLINUS, Cerato-staphylinus.

KERATOTOMUS, Ceratotomus, Knife, cataract.

KERMES, *Chermes, Alkermes*. One of the species of the genus *kermes* lives on a green oak, and is called *Coccus ilicis, Kermes animal, Coccum, Cocci granum, Coccum baphiticum seu infectivum, tinctorium, scarlatinum, &c.* The oak, to which allusion has been made, is known by botanists under the name *Quercus coccifera*, and grows abundantly in the uncultivated lands of southern France, Spain, and in the islands of the Grecian Archipelago. The *kermes*, inhabiting it, has the appearance of a small, spherical, inanimate shell. Its colour is reddish-brown, and it is covered with a slightly ash-coloured dust. This is the *kermes* of the shops. It is now only used in dyeing; but was formerly reputed to possess aphrodisiac, analectic, anti-abortive, and other virtues.

KERMES, MINERAL, see Antimonii sulphuretum precipitatum.

KERNEL, Tubercle.

KERNELS, WAXING, see Waxing kernels.

KERUA, *Ricinus communis*.

KETCHUP, *Catchup*. A pickle prepared from the liquor of the mushroom, walnut, tomato, &c.

KETMIA ÆGYPTIACA, *Hibiscus abelmoschus*.

KEY, Sax. *cæg, Clavis, Clois, Clavis Anglica, (F.) Clef de Garangoet*. An instrument, used for extracting teeth. It consists of a firm handle, with a claw at right angles to it, and moving upon a pivot. This claw embraces the tooth. It has undergone several modifications; and hence various instruments are used under this denomination. The French have the *Clef à pompe, Clef à pivot, and Clef à noix*.

KEYRI CHEIRI, *Cheiranthus cheiri*.

KHALA MIMUC, Bit noben.

KIASTER, *Chiaster*, from *χιαστω*, 'to cross.'

A species of bandage, having the form of the Greek letter,  $\chi$ , which the ancients used for approximating, and maintaining in contact, the fragments of the patella, in cases of fracture of that bone. It was applied in the form of the figure 8.

KIBISTITOME, *Cystitome*.

KIDNEY. Its etymology is uncertain. Senenius derives it fancifully from Su. Goth. *qued*, the belly; and *nigh*, (quasi, *kidney*.) *Ren, Nephros, Protomesis, (F.) Rein*. The kidneys are the secretory organs of the urine. They are two glands, situate deeply,—the one on the right, and the other on the left side,—in the

hypocondres: at the sides of the lumbar vertebræ; behind the peritoneum; and in the midst of an abundant, fatty cellular tissue, *Tu'nica adiposa*. The kidney is of a reddish-brown colour; oval form; and flattened on two surfaces. It has, at its internal margin, a deep fissure, by which the renal vessels and nerves enter or quit the organ, and the ureter issues. It resembles pretty accurately, the haricot or kidney-bean. Two substances are readily distinguishable in it;—the outer, *scarring or cortical, Substantia corticalis, S. glandulosa*, which secretes the urine; and the inner, *tubular, medullary or uriferous, Substantia medullaris, S. Tubulosa, S. Fibrosa*, which appears under the form of small cones or unequal papillæ, each resulting from the union of small capillary tubes, adherent by one of their extremities to the cortical substance; and opening, by the other, at the summit of the cone, into *calices*, a species of membranous tubes, more or less numerous, which transmit the urine of the papillæ to the *pelvis*. By this (*pelvis*) is meant a small, membranous sac, of an irregularly oval shape, at the base of which are the orifices of the calices, and the other extremity of which is continuous with the ureter. The kidney is surrounded by a fibrous membrane proper to it, *Perinephrus*. It has been affirmed, of late, by Mr. Bowman, that the renal artery is distributed to the corpora Malpighiana, where the watery portion of the urine is separated. The blood then becomes venous, and is distributed by different vessels to the convoluted tubes through which the proper urine is secreted. Hence the blood passes into the renal vein. The intermediate vessels between the Malpighian bodies and the convoluted tubes, have been termed the *Portal System of the Kidney*.

KIDNEY, BRIGHT'S DISEASE OF THE, *Morbus Brightii, M. albuminensis, Nephritis albuminosa, Nephria, Uroemia albuminosa, Cachectica nephritis, Nephritis sociata, Associated nephritis, Inflammation of the Malpighian corpuscles, Disease of Bright, Granular Degeneration or Disorganization of the Kidney, Granular Kidney, of Bright, (F.) Maladie de Bright, Néphrite albumineuse, État Granuleux ou Dégénérescence granuleuse du Rein, Albuminorrhée*. A granular disease of the cortical part of the kidney, which gives occasion to the secretion of urine that contains albumen, and is of less specific gravity than natural, and which destroys by inducing other diseases. It was first described by Dr. Bright of London, about twenty years ago.

KIDNEY, GRANULAR, OF BRIGHT, *Kidney, Bright's disease of the*.

KIESTEINE, *Ki'estein*, properly *Ky'esteine, Ky'estein, Kystein, Cy'esteine* or *Cy'estein*, from *κυστιν*, 'to be pregnant,' and *σθηξ*, 'a garment or pellicle.' A peculiar substance, which forms a pellicle on the urine of a pregnant female when allowed to stand for a few days. It is whitish, opalescent, slightly granular, and may be compared to the fatty substance that swims on the surface of soups, after they have been allowed to cool. When taken in conjunction with other phenomena, it is a valuable aid in the diagnosis of early pregnancy.

KILBURN, MINERAL WATERS OF. These springs contain carbonic acid, sulpho-

dric acid; carbonates of lime, magnesia, and iron; sulphates of soda, lime, and magnesia, and chloride of sodium.

**KILOGRAMME**, *Κιλιόγραμμα*, from *χιλιοι*, 'a thousand,' and *γραμμα*, 'a gramme.' The weight of a thousand grammes;—two pounds, eight ounces, one drachm, and twenty-four grains, Troy.

**KILOLITRE**, from *χιλιοι*, 'a thousand,' and *λιτρα*, 'a litre.' A measure containing a thousand litres.

**KINA KINA**, Cinchona.

**KINANCIE**, Cynanche.

**KINCOUGH**, Pertussis.

**KINDCOUGH**, Pertussis.

**KINGCURE**, *Pyrola maculata*.

**KING'S EVIL**, Scrofula.

**KINICI ACETAS**, Quinia, acetate of.

**KININUM**, Quinia.

**KINKINA**, Cinchona.

**KINO**, *Gummi Gambien'st*, *Gummi rubrum adstringens Gambien'st*, *African kino*, *East India kino*, *Amboy'na kino*, *Gummi adstringens Pothergill'i*. The trees, whence one variety of this resin is obtained, are not botanically ascertained. The London college ascribe it to *Pterocarpus erinacea*; the Edinburgh to *Eucalyptus resinifera*, and the Dublin to *Butea frondosa*. The Pharmacopœia of the United States, (1842,) defines it to be "an extract obtained from an uncertain plant." On wounding the bark, the kino flows drop by drop. A West India variety is said to be derived from *Coccoloba uvifera* or *Sea-side Grape*; and a Botany Bay kino is said to be the concrete juice of *Eucalyptus resinifera* or *brown gum-tree* of New Holland. *See Syst. Icosandria Monogynia. Nat. Ord. Myrtaceæ*. Kino consists chiefly of tannin, gallic acid, oxide of iron, and colouring matter. It is inodorous; the taste a sweetish bitter; and it is sometimes gritty between the teeth. It comes to us in fragments of a dark ruby red colour, and is easily pulverized. Its properties are powerfully astringent. Dose, gr. x to gr. xx in powder.

**KIONORRHAPHIA**, Staphylophary.

**KI'OTOME**, *Kiot'omus*, from *κιω*, 'a pillar,' 'support,' and *τομειν*, 'to cut.' (F.) *Coupebride*. An instrument invented by Desault, to cut any accidental *brides* or filaments in the rectum and bladder; and which he afterwards used for the removal of the tonsils. It is composed of a flat, silver sheath, open at one edge. This sheath is provided with a cutting blade, which can be forced through the opening, and thus all the parts can be divided with which it comes in contact.

**KIPPERNUT**, *Bunium bulbocastanum*.

**KIRATE**. A weight of four grains, according to Blancard.

**KIRKLAND'S NEUTRAL CERATE**, see Cerate, Kirkland's Neutral.

**KIRRHONOSIS**, *Cirrhonosis*.

**KIRRHOSIS**, *Cirrhonosis*.

**KIRSCHWASSER** (G.), 'Cherry water.'

An alcoholic liquor, obtained from cherries bruised with their stones, by subjecting them to distillation, after having caused them to ferment. See Spirit.

**KISSINGEN, MINERAL WATERS OF**.

These springs, in Bavaria, contain carbonic acid and chloride of sodium.

**KIST**. A weight of 14 grains.—*Paracelsus*.

**KLAPROTHII SULPHAS**, *Cadmii sulphas*.

**KLAPROTHIUM SULPHURICUM**, see *Cadmii sulphas*.

**KLEPTOMANIA**; from *κλεπτω*, 'I steal,' and *μανια*. Insanity, with an irresistible propensity to steal.

**KLOPEMANIA**, *Clopeomania*, from *κλοπη*, 'theft,' and *μανια*, 'mania.' Monomania, with an irresistible desire to steal.

**KNARESBOROUGH, MINERAL WATERS OF**, see Harrogate, mineral waters of.

**KNEADING**, Shampooing.

**KNEE, HOUSEMAID'S**. An inflammation of the bursa, which in most individuals is in front of the patella, and is apt to inflame and enlarge from effusion in those in whom it is subjected to much pressure. Hence its name. It is a form of capsular rheumatism.

**KNEE SCAB**, *Crusta genu equinæ*—k. Encircled hoof, *Crusta genu equinæ*.

**KNIFE**. *Sax. cnir. Swed. Knif. Dan. Kniv. (F.) Canif, Cutler, Smilè, Caltell'us, Tomo'on, Tomo'us, Machæra, Machæ'ron, Machæ'ris; (F.) Couteau*. A cutting instrument, used in surgery to divide the soft parts, and which only differs from the bistouri or scalpel in being commonly larger.

The most common knives are the following:

**KNIFE, AMPUTA'TION**, (F.) *Couteau à amputation, C. droit, Cutler rectus*. This is the largest of the knives used in surgery. Formerly, they were curved; now they are straight, and provided with one or two edges.

**KNIFE, CAT'ARACT**, *Cerat'omus, Kerat'omus, (F.) Couteau à cataracts*. The cataract knives of Richter, Wenzel, Ward, and others, being intended to perform the section of the transparent cornea, are so shaped as to exactly fill the small wound made by them; and thus to prevent the discharge of the aqueous humour, until the section is completed. The blade of the knives of Wenzel and Ward resembles a very narrow lancet, blunt in the posterior five-sixths of one of its edges. The blade of that of Richter is pyramidal, cutting through the whole length of its inferior edge, and also blunt in the five-sixths of the upper.

**KNIFE, CHESLDEN'S**. A knife with a fixed handle; very convex on its edge, concave on the back, which was used by Cheselden in *lithotomy*.

**KNIFE, CROOKED**, *Cultor falcat'us, Cultor curvus, (F.) Couteau courbe*. A knife, which is crooked and concave on its cutting edge. It was formerly employed in amputation of the limbs.

**KNIFE, CROTCHET**, *Cultell'us uncus, (F.) Couteau à crochet*. A steel instrument, composed of a round staff, furnished with a handle at one extremity, and at the other with a curved knife. It was formerly used to cut to pieces monstrous fetuses in utero, and to open the head when necessary.

**KNIFE, DOUBLE-EDGED**, *Anceps cultell'us, Amphis'mela, Amphis'milè, Catling, (F.) Couteau à deux tranchans, Couteau désarticulateur, C. interosseus*. A knife, the blade of which is straight and sharp on both sides. It is used for disarticulating bones; and for cutting the soft parts situate between the bones, in amputation of the leg and forearm.

**KNIFE EN SERPETTE (F.),** *Couteau en serpette*. A sort of knife, of the shape of a *serpette* or pruning-knife, invented by Desault for dividing the bony paries of the maxillary sinus, for the purpose of extracting fungi from it.

**KNIFE, LENTICULAR, *Cutter lenticularis*, (F.)** *Couteau lenticulaire*. An instrument, used in the operation of trepanning, for removing inequalities in the inner table of the skull, which may have been left by the crown of the trephine around the opening made by it. It is formed of a lenticular button, fixed at the extremity of an iron staff, which is convex on one side, flat on the other; sharp at both edges, and mounted on an ebony handle.

**KNIFE, ЛИТОТОМЪ, (F.)** *Couteau lithotome*. A name, given by Foubert to a large knife, the narrow blade of which, four and a half inches in length, was sharp in its whole extent, and made an obtuse angle with the handle. He used it in the lateral operation.

**KNOCK-KNEED, Entogonyancon.**

**KNOT, Tubercle.**

**KNOT, ПАКЕБЪ, (F.)** *Naud d'emballeur*.

A compressive bandage, used for arresting hemorrhage from the temporal artery or its branches. The *naud d'emballeur* is made with a double-headed roller, five ells long. A graduated compress is placed over the opening in the artery, and the bandage is applied over it; the balls of the roller being carried horizontally round to the opposite temple, where they are crossed obliquely and carried back to the part where the compress is situate. The hands are then changed with the rollers, crossing them so as to form a knot, and taking one above the head; the other beneath the chin. They are then crossed again, so as to form several knots, one above the other. This bandage is called, by some surgeons, *Solar* or *oblique thevestre*, or *capistrum*.

**KNOT, СУЗОНЪ, Nodus chirurgicus, (F.)** *Nœud du chirurgien*. A double knot made by passing the thread twice through the same noose. This knot is used frequently in the ligation of arteries, the umbilical cord, &c.

**KNOTBERRIEN, Rubus chamaemorus.**

**KNOTGRASS, Polygonum aviculare.**

**KNOTROOT, Collinsonia Canadensis.**

**KNOTWEED, Collinsonia Canadensis, Polygonum aviculare.**

**KOINO-MIASMATA, see Miasm.**

**KOLERUS, a name given by Paracelsus to a dry ulcer.**

**KOLPORRHAPHY, Elytrorrhaphy.**

**KOLTO, Plica.**

**KOOCHLA TREE, Strychnos nux vomica.**

**KOPYOPIA, see Copyopia.**

**KORIS, Cimex**

**KOSSO, Hagenia Abyssinica.**

**KOUMIS, Kumyss.**

**KRAME'RIA, Ratan'kia, Rhatan'ia, Rat'-anky, (F.) Ratanhia.** *Krameria, Krameria triandra*,—*Sec. Syst.* *Tetrandria Monogynia. Nat. Ord.* Polygalæ,—is a native of Java. The root has a bitter taste; and is astringent, diuretic, and detergent. Dose, ℞j to ℞j.

**KRAME'RIA ИХ'И'НА, or Ratan'ky of the Antilles,** has similar virtues.

**KREOSOTON, Creosote.**

**KUA KAH, Curcuma longa.**

**KUMYSS, Koumyss, Koumis.** A beverage used in families by the people of Yakutz.

It resembles sour buttermilk, without being greasy. According to Sir George Simpson, it is prepared in a very simple way from mare's milk, which is merely allowed to stand for some days in a leathern churn till it becomes sour. It is then bottled for use. This drink is rather nutritious than exhilarating; but from the same material the Burats and the Kirghez prepare an intoxicating spirit in which they indulge to excess.

**KUSSAUDER, Convolvulus panduratus.**

**KUTKULEJA, Cæsalpinia bonducella.**

**KUTOOKURUNJA, Cæsalpinia bonducella.**

**KUTUBUTH.** An Arabic name for a species of melancholy in which the patient is never quiet at any one place, but wanders about here and there. Also, the name of an insect, which lives at the surface of stagnant waters, and is in a constant state of agitation. Some lexicographers imagine that it is on account of this last circumstance, that the name of the insect has been given to the disease.

**KYANOSIS, Cyanopathy.**

**KYAPUTTY, Caieput.**

**KYESTEINE, Kiesteine.**

**KYLLO'SIS, from κυλλος, 'crooked,' 'lame.'** *Cyllo'sis.* Professor Chaussier so calls congenital distortion of the feet, *Clubfoot, Talipes*, (F.) *Pied bot.* Of this there are many varieties. In one, the foot, instead of resting on the soil, by the whole plantar surface, touches it only with the metatarsophalangean articulations. It seems as if turned backwards and broken upon the leg, (*Pes Equinus, Hippopus, Orypodia.*) In other persons the foot is twisted inwards, (*Varus, Blæsiopodes, Blæsiopus, Cyllopus, Cyllopoda, Cyllopodion, Lori'pes,* (F.) *Cagneux,*) so that it rests only on the ground on its outer edge; or it may be twisted outwards, (*Valgus,*) or rest only on its inner edge. In the *flatfoot* or *splayfoot, Sar'apus, Platypus, Platypodia,* (F.) *Pied plat,* the plantar surface of the foot is flattened instead of being concave.

These deformities are rarely accidental. They are almost always congenital, and may be rectified, at an early period, by proper mechanical means to strengthen the foot gradually and restore it to its proper shape and direction; and if these means fail, the tendons and muscles concerned in the deformity may be divided.

**KYNA, Pastinaca opeponax.**

**KYPHOSIS, see Cyphosis—k. Inflammatoria, Vertebral disease—k. Paralytica, Vertebral disease.**

**KYST, Cyst, Kystis, Cystis, from κυστις, 'a bladder,' 'pouch.' (F.) Kysts.** This term is generally applied to pouches or sacs, without opening, and commonly of a membranous nature, which are accidentally developed in one of the natural cavities, or in the substance of organs. Many theories have been successively emitted to explain the formation of cysts, but none are entirely satisfactory. Some are formed by a thin, translucent membrane; having scarcely the thickness of the arachnoid; others of a whitish, fibro-cellular membrane, more or less thick. Some contain cartilaginous or bony flakes. The greater part have but one cavity; others, on the contrary, have several, separated by complete or imperfect septa, as is frequently seen in those developed in the ovaries. The matter contained in cysts is sometimes limpid,

serous, yellowish white, reddish, and, at others, more or less thick, albuminous, adipous, or caseous. The tumour, formed by them, is called Encysted, which see.

**KYSTE**, Kyst—*k. Aneurysmal, Aneurismal sac.*

**KYSTEIN**, Kiesteine.

**KYSTITIS**, *Cystitis*, from *κυστις*, 'the

vagina.' Inflammation of the vulva and of the mucous membrane of the vagina.

**KYSTHOPTOSIS**, from *κυστις*, 'the vagina,' and *πτωσις*, 'I fall.' Prolapsus or inversion of the vagina.

**KYTTARRHAGIA**, from *κυστις*, 'an alveolus,' and *ρρηξις*, 'I break forth.' Discharge of blood from an alveolus.

L.

**LABARIUM**, from *labi*, 'to fall.' Loose-ness of the teeth.

**LABDACISMUS**, Lallation.

**LABDAMEN**, *Cistus creticus*.

**LABDANUM**, see *Cistus creticus*.

**LABE**, *λαμβάνω*, 'I seize,' 'I take,' 'the act of grasping.' Invasion. Also, employed to denote the first paroxysm of fevers.—Galen, Hippocrates.

**LABEO**, Chilon.

**LABES**, Chilon, Macula.

**LABIA INTERNA** sen **MINORA**, *Nymphæ*—*l. Pudendi*, Lips of the vulva—*l. Pudendi minora*, *Nymphæ*.

**LABIAL**, *Labia'lis*, from *labium*, 'a lip.'

**LABIAL**, *Orbicularis oris*.

**LABIAL ARTERY**. Haller and Sabatier call thus the *facial artery* of the majority of anatomists. The *labial arteries*, properly so called, *coronary arteries of the lips*, (*F. Coronaires des lèvres*), are two in number. The *superior* arises from the facial, above, and very close to, the commissure of the lips. It is large and tortuous, and is distributed to the upper lip. The *lower* arises from the facial, at a considerable distance from the commissure, and proceeds in a serpentine course, into the substance of the lower lip, to which it is distributed.

**LABIAL GLANDS**. This name is given to a multitude of muciparous follicles, of some size, round, prominent, and separate from each other, which are found on the inner surface of the lips, below the mucous membrane.

**LABIAL VEINS** are distinguished, like the arteries, into *superior* and *inferior*. They open into the facial vein;—a division of the internal jugular.

**LABIALIS**, *Orbicularis oris*.

**LABIDOMETER**, *Labimeter*.

**LABIOMETER**, (*F. Labimètre* on *Labidomètre*, from *λαβίς*, *labides*, 'forceps,' and *μέτρον*, 'measure.' A scale adapted to the handles of the forceps, which indicates the distance of the blades from each other, when applied to the head of the child in *utero*.

**LABIS**, Forceps.

**LABIUM**, Lip—*l. Leporinum*, Harelip—*l. Uteri*, Amphideum.

**LABLAB**, *Dolichos lablab*.

**LABORANS**, Sick.

**LABORATOIRE**, Laboratory.

**LABORATORIUM**, Laboratory—*l. Chymicum* sen *pharmaceuticum*, *Pharmacopœia*.

**LABORATORY**, *Laboratorium*, *Ergasterion*, (*F. Laboratoire*, from *laborare*, 'to work.' A name given to any place for preparing chemical or pharmaceutical products, &c.

**LABORIOSUS**, Sick.

**LABORIOUS**. Delivery is said to be laborious, *Partus laboriosus*, *Megastocia*, (*F. Accouchement laborieux*, when attended with more difficulty and suffering than usual. With some, *laborious labour* means one that requires the use of instruments. See *Dystocia*.

**LABOUR**, Parturition—*l. Difficult*, *Dystocia*—*l. Morbid*, *Dystocia*—*l. Pains*, see *Pains*—*l. Premature*, Parturition, (premature)—*l. Preternatural*, *Metastocia*, see Parturition—*l. Show*, see Parturition.

**LABRISULCIUM**, *Cheilocace*, *Stomacace*.

**LABRUM**, Lip—*l. Cerebri*, *Infundibulum of the brain*.

**LABRUSCA**, *Bryonia alba*.

**LABYRINTH**, *Labyrinthus*, *Antrum buccino'sum*. A place, full of turnings, the exit of which is not easily discoverable. Anatomists have given this name to the aggregate of parts, constituting the internal ear, *Labyrinthus auris intima*, *Intima pars organi auditus*. The Labyrinth is situate between the tympanum and meatus auditorius internus. It is composed of several cavities, which communicate with each other in the dried bone; as the *vestibule*, *cochlea*, *semicircular canals*, &c. It is lined by periosteum, and also by a *pulpy membrane*, constituting the *membranous labyrinth*, on which the auditory nerve is regularly dispersed. This membrane forms two sacs in the vestibule, called *sacculus vestibuli* and *sacculus*, (q. v.) respectively, which resemble in shape that of the bony cavities containing them. Each sac contains calcareous matter, constituting the *Otolithes* and *Otoconies*. When the sac is laid open, upon the upper and outer part, a partition appears, partaking of the nature of the sac, and called by Meckel, *Septum vestibuli nervo'so-membranaceum*.

**LABYRINTH**, *Membranaceum*, see *Labyrinth*.

**LABYRINTHUS**, Labyrinth—*l. Auris Intima*, see *Labyrinth*.

**LAC**, Milk, *Lacca*—*l. Ammoniaci*, *Mistura ammoniaci*—*l. Amygdalæ*, *Emulsio amygdalæ*—*l. Asafœtidæ*, *Mistura asafœtidæ*—*l. Avis*, *Albumen ovi*—*l. Guaiaci*, *Mistura Guaiaci*—*l. Gum*, *Lacca*—*l. Lunæ*, *Marga candida*—*l. Maris*, *Sperm*—*l. Primum Puerperæ*, *Colostrum*—*l. Seed*, *Lacca*—*l. Shell*, *Lacca*—*l. Stick*, *Lacca*—*l. Sulphuris*, *Sulphur præcipitatum*—*l. Terræ*, *Magnesiæ carbonas*—*l. Virginis*, *Virgin's milk*.

**LACCA**, from *lakah*, Arab. *Gummi lacca*, *Stick-lac*, *Gum-lac*, *Seed-lac*, *Shell-lac*, (*F. Laque*). Lac is a substance formed by an insect, and deposited on different species of trees, chiefly in the East Indies,—for example, on *Croton lacciferrum*, and two species of *Ficus*,—*Ficus religiosa*, and *F. Indica*. The various kinds,

distinguished in commerce, are *stick-lac*, which is the substance in its natural state, investing the small twigs of the tree; and *seed-lac*, which is the same broken off. When melted, it is called *shell-lac*.

Lac was, at one time, used in the form of tincture, as a tonic and astringent; and it still forms part of particular dentifrices.

**LACERATION**, *Lacera'tio*, *Rhegē*, *Rheg'mus*, *Rhegma*, *Ruptu'ra*, *Rupture*, from *lacerare*, 'to tear':—*Dilacera'tio*, *Sparag'ma*, (F.) *Arrachement*, *Déchirement*, *Dilaceration*. The act of tearing or rending. The breach made by tearing or rending; as a *lacerated wound*, *Tressis vulnus lacera'tum*, *Lacera'ti'ra*, *Vulnus lacera'tum*.

**LACERATURA**, see *Laceration*.

**LACERTA**, Lizard.

**LACERTI CORDIS**, *Columnæ carnes*—1. Musculorum, Muscular fasciculi.

**LACERTULI CORDIS**, *Columnæ carnes*.

**LACERTUS**, Brachium, Muscle.

**LAC'ERUM**. Same etymon. Any thing torn, or appearing as if torn.

**LAC'ERUM FORA'MEN ANTE'RIS**, (F.) *Trou déchiré antérieur*, *Hiatus sphenopétreux*, (Ch.) is an irregular opening, formed by the sphenoid and petrous portion of the temporal bone. This foramen transmits the third, fourth, and sixth pairs of nerves and the first branch of the fifth pair to the eye and its appendages.

**LACERUM FORA'MEN POSTE'RIS**, *Foramen jugula'ri*, *F. lacereum in Basi Crani*, (F.) *Trou déchiré postérieur*, *Hiatus occipitopétreux*, (Ch.) is formed by the occipital bone, and the inferior edge of the petrous portion of the temporal bone. Through it, the internal jugular vein, the eighth pair of nerves, and accessory nerve pass out of the cranium.

**LACHESIS PICTA**, see *Arrow-poison*.

**LACHESIS RHOMBEE'ATA**, *Flammon*. A poisonous serpent common in the lower forests of Peru.

**LACHRYMA**, Tear; see, also, *Vitis vinifera*.

**LACHRYMAL**, *Lacryma'lis*, from *lacryma*, 'a tear.' Belonging to the tears. This epithet is given to various parts.

**LACHRYMAL ARTERY** proceeds from the ophthalmic; and distributes its principal branches to the lachrymal gland.

**LACHRYMAL CANAL OF DUCT**, *Nasal Canal or duct*, *Canalis lacryma'lis*, *Canalis orbitæ nasalis*, *Ductus nasalis orbitæ*, *Canalis sacci lacryma'lis*, *Ductus ad Nasum*, is formed by the superior maxillary bone, os unguis, and os turbinatum inferius; and is seated in the outer paries of the nasal fossæ. It is lined by a prolongation of the mucous membrane of the lachrymal sac; and its inferior orifice is furnished with a valvular duplicature. This duct transmits the tears, which have been absorbed at the great angle of the eye by the puncta lacrymalia, into the nasal fossæ.

**LACHRYMAL CARUNCLE**, see *Caruncula lacrymalis*.

**LACHRYMAL FOSSA**, *Fossa seu Fovea lacryma'lis*, is a slight depression at the upper part of the orbit, which lodges the lachrymal gland.

**LACHRYMAL GLAND**, *Glandula lacryma'lis* seu *anomina'ta Gale'ni*, is seated in a depression of the frontal bone at the upper, anterior, and outer part of that orbit. It is of about the size of an almond; and of an oval

shape, flattened above and below:—its great diameter being the antero-posterior. It is composed of several small lobules, united by cellular tissue, and separated by it as well as by vessels and nerves which creep in the intervals. This gland has seven or eight excretory ducts, which open behind the upper eyelid. Its use is to secrete the tears, and pour them on the globe of the eye by the excretory ducts.

**LACHRYMAL GROOVE**, (F.) *Gouttière lacrymale*, is the bony channel, which lodges the lachrymal sac. It is seated at the anterior and inner part of the orbit, and is formed by the os unguis and the ascending process of the upper jaw bone.

**LACHRYMAL HERNIA**, *Lachrymal Tumour*, *Hernia Sacci Lacryma'lis*, is when the tears enter the puncta, but cannot pass to the nose, and accumulate. By Anel, this was called *Dropsy of the Lachrymal Sac*.

**LACHRYMAL NERVE** is the smallest of the three branches formed by the ophthalmic nerve. It is distributed, particularly to the lachrymal gland and to the upper eyelid. In its course it gives off a *spheno-maxillary* and a *malar* filament.

**LACHRYMAL PAPILLA**, see *Lachrymal Puncta*.

**LACHRYMAL PASSAGES**, *Via lacryma'les*, (F.) *Voies lacrymales*. The organs concerned in the secretion of tears, in spreading them over the eye, and taking them up again to transmit them into the nasal fossæ. The lachrymal passages are composed of the *lachrymal gland*, *caruncle*, *puncta*, *ducts*, *lachrymal sac*, and *nasal duct*.

**LACHRYMAL PUNCTA**, *Puncta Lacryma'lis*, *Spiram'ina Palpebra'rum*, (F.) *Points lacrymaux*, are two small, round, and contractile openings, situate in the centre of a tubercle or papilla, *Papilla lacryma'lis*, *Tuberculum lacryma'le*, about a line and a half distant from the inner commissure of the eyelids, and continuous with the *lachrymal ducts*. These ducts, *Lacryma'les Canaliculi*, *Canales seu Ductus lacryma'les*, *Ductus lacrymales laterales*, *D. puncto'rum lacryma'lium*, *Cor'nea lacryma'lis* seu *lima'cum*, *Collic'ia puncto'rum lacryma'lium*, *Canaliculi lima'cum*, *Cor'nea Lima'cum*, (F.) *Conduits lacrymaux*, are two in number—a *superior* and an *inferior*—which extend from the puncta to the lachrymal sac. They seem formed by a very delicate prolongation of the conjunctiva, which is continuous with the mucous membrane of the *lachrymal sac*, (F.) *Reservoir des larmes*:—the *Saccus* seu *Sinus* seu *Lacus lacryma'lis*, *Dacryocyst'is*, *Infundibulum lacryma'le*, *Saccus lacryma'lis*.

**LACHRYMAL TUBERCLE**, see *Lachrymal puncta*.

**LACHRYMAL VEINS** accompany the artery of the same name, and open into the ophthalmic and palpebral veins.

**LACHRYMATIO**, *Epiphora*. Also, a profuse secretion of tears from any cause:—weeping, *Flatus*, *Ploratio*, *Ploratus*.

**LACINIÆ TUBARUM FALLOPII**, see *Tube*, Fallopiian.

**LACIS**, Plexus.

**LACMUS TINCTORIUS**, *Lichen roccella*.

**LACONICUM**, *Vaporarium*, see *Stove*.

**LACQ**, *Laqueus*.

**LACRUMA**, Tear.

**LACTYMA**, Tear.

**LACTANS**, Nurse.

**LACTATION**, *Lactatio*, *Thelasia*. *Thelasmus*, from *lacteo*, (*lac*, 'milk,') 'I suckle,' 'I give milk.' *Suckling*:—the giving of suck, (F.) *Allaitement*. The French have four varieties of lactation. 1. *Allaitement maternel*—*Maternal Lactation*, when the mother suckles the child. 2. *A. étranger mercenaire*,—when another suckles it. 3. *A. artificiel*, when the child is brought up by hand. 4. *A. animal*, when the child is suckled by an animal.

**LACTEALS**, Chyliferous vessels.

**LACTENS**, Sucking child.

**LACTES**, Mesentery, Pancreas.

**LACTEUS**, Lactie.

**LACTIC**, *Lacteus*, *Galacticus*, *Galactinus*, *milky*, from *lac*, 'milk.' Appertaining to milk.

**LACTIC ACID**, *Ac'idum Lacticum*, *Acid of milk*, *Acidum Lacticum*, (F.) *Acido Lactique*. This has been recommended as a therapeutical agent in atonic dyspepsia, owing to its being presumed to be one of the gastric acids secreted in health. It is given either in the form of lemonade or of lozenges. The acid is obtained either from milk or from the juice of the red beet.

**LACTICA**, Typhoid.

**LACTICANIA**, Nurse.

**LACTICINIA**, Parotid.

**LACTIFERE**, Lactiferous.

**LACTIFEROUS**, *Galactoph'orous*, *Lactifer*, (F.) *Lactifers*, from *lac*, 'milk,' and *fero*, 'I carry.' Milk-conveying.

**LACTIFEROUS VESSELS**, *Lactiferous Ducts*, *Tubuli lactiferi* vel *Ductus lactiferi* seu *lactea*, (F.) *Vaisseaux ou conduits lactifères*, are the excretory ducts of the mammary gland.

**LACTIFEROUS OR LACTEAL SWELLING**. A tumefaction of the breast, supposed by Sir Astley Cooper to arise from a large collection of milk in one of the lactiferous tubes, the result of chronic inflammation of the tube near the nipple, with closure of its aperture, and obliteration of the canal for an inch or more. The tube requires to be punctured.

**LACTIFUGA**, *Lactifuge*, from *lac*, 'milk,' and *fugo*, 'I drive away.' Medicines which dispel milk.

**LACTIGO**, Porrigo larvalis.

**LACTINIA**, from *lac*, 'milk.' Food prepared with milk.

**LACTIPOTOR**, Galactopotes.

**LACTIS REDUNDANTIA**, Galactia—1. Retentio, Galactischesis—1. Sanguinolenti Excretio, Galactohæmia.

**LACTISUGIUM**, Antlia lactea.

**LACTIVORUS**, Galactophagous.

**LACTOMETER**, Galactometer.

**LACTUCA**, from *lac*, 'milk;' so called, from its milky juice. *Lactuca Sat'iva*, *Lettuce*, *Garden Lettuce*, *Eunu'chium Meco'nis*, *Thridax*, *Cherbas*, (F.) *Laitus ordinaire*, is used as a wholesome salad. The seeds possess a quantity of oil, which, when formed into an emulsion, has been advised in ardor urinae, &c.

The inspissated juice, *Lactuca'rium*, *Thridacæ*, resembles, in odour and appearance, that of opium, and is, like it, narcotic, but uncertain. Dose, gr. j to x and more.

**LACTUCA ELONGATA**, see *L. virosa*—1. *Grævolens*, *L. virosa*—1. *Sylvestris*, *L. scariola*.

**LACTUCA SCAR'OLA**, *L. Sylvestris*, *Scar'ola*, (F.) *Laitus Scariola*, *L. Savage*, possesses a

stronger degree of bitterness than *L. sativa*. It has similar virtues with the next.

**LACTUCA VIRO'SA**, *L. graveolens*, *Strong-scented Lettuce*, (F.) *Laitus virose*. The odour of this plant, the leaves of which are used in medicine, is strongly narcotic, and the taste bitter. They are narcotic, diuretic, and aperient; and have been used in dropsies. *Lactuca elongata*, or *Wild Lettuce* of the United States, has been employed for *L. virosa*.

**LACTUCIMEN**, Aphthæ.

**LACTUCIMINA**, Aphthæ.

**LACTUMEN**, Porrigo larvalis.

**LACTUMINA**, Aphthæ.

**LACUNA**, from *lacus*, 'a lake or deep ditch.' *A Fossa or Ditch*. Anatomists have given this name to small cavities in the mucous membranes, the parietes of which secrete a viscid humour. Certain lacunæ are but the excretory orifices of mucous crypts. They are very visible in the rectum, vagina, urethra, &c. Sometimes lacuna is used synonymously with *crypt*.

**LACUNA**, *Crypta*, *Fontanella*—1. *Cerebri*, *Infundibulum* of the brain, *Pituitary gland*.

**LACUNA seu SULCUS seu SULCULUS LABII SUPERIORIS**, *Amab'ille*, *Amato'rium*, *Philtrum*, *Phil'trum*. The hollow of the upper lip under the nose.

**LACUNÆ GRAAFIANÆ**, *L. mucosæ vulvæ*. The mucous follicles of the vagina.

**LACUNÆ MUCOSÆ VULVÆ**, *L. Graafianæ*—1. *Palpebrarum*, *Meibomium*, glands of.

**LACUNAR**, *La'quear*, 'an arched roof.' The roof of a chamber. Hence,

**LACUNAR OR'BITÆ**. The roof of the orbit.

**LACUNAR VENTRICULI QUARTI SUPERIOR**, *Valvula Viensennii*.

**LACUNE DE LA LANGUE**, *Cæcum foramen*.

**LACUS LACRYMALIS**, *Lachrymal sac*.

**LACUS LACRYM'ARUM**. A small space in the inner angle of the eye between the lids, towards which the tears flow, and at which the triangular canal formed between the closed lids terminates.

**LADA**, *Piper nigrum*.

**LADANUM**, see *Cistus creticus*.

**LADENDO**, *Influenza*.

**LADIES' MANTLE**, *Alchemilla*.

**LADIES' SLIPPER, YELLOW**, *Cypripedium leuteum*.

**LADIES' SMOCK**, *Cardamine pratensis*.

**LADDERIE** (F.), from *ladder*, 'deformed.' (F.) *Liproserie*, *Maladzerie*. A vulgar name for elephantiasis, or lepra. Also, an hospital for the reception of the leprous, *Leprosarium*, *Domus leprosar'ia*.

**LADYBIRD**, *Coccinella septempunctata*.

**LADYBOW**, *Coccinella septempunctata*.

**LADYDOG**, *Coccinella septempunctata*.

**LADY CRESPIGNY'S PILLS**, see *Pilule Aloes et Kinæ Kinæ*.

**LADY HESKETH'S PILLS**, see *Pilule Aloes et Kinæ Kinæ*.

**LADY WEBSTER'S PILLS**, see *Pilule Aloes et Kinæ Kinæ*.

**LÆMOS**, *Pharynx*.

**LÆMOSCI'R'HUS**, *Cancer pharyng'is et œsoph'agi*, *Læmosteno'sis* seu *Dysph'agia scirr'ho'sa*; from *læmos*, 'the pharynx or œsophagus.' *Cancer of the pharynx or œsophagus*.

**LÆMOSTENOSIS SCIRRHOSEA**, *Læmo-scirrhus*.

**LÆSIO**, Lesion.  
**LÆTIFICANTIA**, from *latifico*, (*latus*, and *facio*), 'I make glad.' Medicines formerly used as cordials, in depression of spirits, &c.

**LÆVIGATIO**, Levigation.

**LÆVITAS INTESTINORUM**, Lientery.

**LAGENTOMUM**, Harelip.

**LAGNEA**, Coition, Satyriasis, Sperm.

**LAGNEIA**, Coition, Satyriasis, Sperm.

**LAGNESIS**, Furor Femininus, Nymphomania—*l. Furor masculinus, Satyriasis*—*l. Salacitas, Satyriasis*.

**LAGNEUMA**, Coition, Sperm.

**LAGNIA**, Satyriasis.

**LAGNOSIS**, Satyriasis.

**LAGOCHEILUS**, Harelip.

**LAGONES**, Flanks.

**LAGONOPONOS**, Pleurodynia.

**LAGONTOMUM**, Harelip.

**LAGOPHTHALMIA**, from *λεγος*, 'a hare,' and *οφθαλμος*, 'an eye.' *Lagophtalmus, Hare's Eye; Leporinus Oculus*, (F.) *Ceil de Lièvre*. A vicious arrangement of the upper eyelid, which is so retracted that it cannot cover the globe of the eye during sleep. It has been asserted that this condition of the eye is natural in the hare when asleep.

**LAGOPHTHALMUS**, Lagopthalmia, Genum urbanum.

**LAGOSTOMA**, Harelip.

**LAICHE**, Sarsaparilla Germanica—*l. des Sables, Sarsaparilla Germanica*.

**LAIT**, Milk—*l. Adoucissant, Looch ex ovo*—*l. d'Anesse, Milk, asses'*—*l. d'Amandes, Emulsion amygdalæ*—*l. d'Asafetida, Mistura asafetidae*—*l. de Beurres, Buttermilk*—*l. de Brebis, Milk, ewes'*—*l. Caillé, Curds*—*l. de Chèvre, Milk, goats'*—*l. Épanché, L. répandu*—*l. de Femme, Milk, human*—*l. de Jument, Milk, mares'*—*l. de Poule, see Ovum*.

**LAIT RÉPANDU**, (F.) *Lait épanché*. A popular expression in France, under which is comprehended every kind of disease (and particularly vague pains) occurring after delivery; all being ascribed to diffusion or deposition of milk.

**LAIT DE VACHE**, Milk of the cow—*l. Virginale, Virgin's milk*.

**LAITERON DOUX**, *Sonchus oleraceus*.

**LAITIAT**, (F.) Sour whey, in which different wild fruits have been macerated. Said to be much used in the Jura as a refreshing drink.

**LAITUE ORDINAIRE**, Lettuce—*l. Sauvage, Lactuca scariola*—*l. Scariole, Lactuca scariola*—*l. Vireuse, Lactuca virosa*.

**LAKEWEED**, *Polygonum hydropiper*.

**LALIA**, Voice, articulated.

**LALLATION**, *Lallatio, Lambdacismus, Labdacismus*, *Lullaby speech*. Sauvages uses this term for a vicious pronunciation, in which the letter L. is improperly doubled, or softened, or substituted for R.

**LAMAC**, *Acacia gummi*.

**LAMBACISMUS**, Lallation.

**LAMBDOID**, *Lambdoïdal, Lambdoïdes, Lambdoïdes, Lambdoïdeus*, from the Greek letter Λ, λυβδζ, and ἰδος 'shape,' 'resemblance.' Anatomists have given the name **LAMBDOIDAL SUTURE**, *Sutura Lambdoïdalis seu lambdoïdes seu lambdoïdea, S. Præa* to the suture, formed by the parietal bones and the occipital, because it resembles the letter Λ, *lambda*, of the

Greeks. It is the *Occipito-parietal suture—Sutura occipitalis*, (Ch.) In this suture, the ossa Wormiana are most frequently met with; and the denticulations are most distinctly marked.

**LAMBEAU**, (F.) A flap of flesh:—hence *Plaies à lambeaux, Flap-wounds, Amputation à lambeaux*.—Flap operation of amputation.

**LAMBIVIVUM**, Eclectos.

**LAMBKILL**, *Kalmia latifolia*.

**LAME**, Lamina—*l. Cornée, Tænia semicircularis*—*l. Ruyschienne, Ruyschiana tunica*.

**LAMELLA**, Lamina.

**LAMEL'LAR**, *Lamello'sus, Lam'inated*, (F.) *Lamellosez, Lamineux*, composed of thin laminae or leaves—as the *Lamellar* or *laminated tissue*; *l. e. the cellular tissue*.

**LAMELLEUX**, Lamellar.

**LAMENESS**, Claudication.

**LAM'INA**, *Lamella*, (F.) *Lame*. A thin, flat part of a bone; a plate or table, as the cribriform lamina or plate of the ethmoid bone. *Lamina* and *Lamella* are generally used synonymously; although the latter is properly a diminutive of the former.

**LAMINA CRIBROSA OSSIS ETHMOIDÆI**, see *Criblé*—*l. Medullaris triangularis cerebri, Lyra*—*l. Prima cutis, Epidermis*.

**LAMINA PERITONÆI EXTERNA**. The outer lamina or fold of the peritonæum.

**LAMINA SPIR'ALIS**, *Septum scalæ, Septum cochleæ auditivæ*. A partition between the scalæ of the cochlea. The largest part of this next the modiolus is formed of bone. The remainder, or that part next the opposite side of the scalæ, is composed of a cartilaginous membrane, called, by Valsalva, *Zona Cochleæ*. By some anatomists, the lamina is divided into a *Zona os'sea*, and *Z. mollis*. By others, it is considered to consist of four laminae, when examined with a strong glass: a *Zona os'sea*, next to the modiolus—a *Zona coriæ'cea*, on the outer side of this: a *Zona vesiculæ'ris*—and a *Zona membrana'cea*, which is, perhaps, the lining membrane of the cochlea.

**LAMINÆ SPONGIOSÆ NASI**, Turbinated bones.

**LAMIN'ARIA DIGITA'TA**, *Tangle*. One of the Algæ eaten in Scotland, and hawked about the streets with the Pepper-dulse.

The leaf of a sea-weed—a species of *Laminaria* is employed in the Himalayas under the name of *gôitre leaf*, so called because chewed by the inhabitants where gôitre prevails.

**LAMINATED**, Lamellar.

**LAMINEUX**, Lamellar.

**LAMIUM ALBUM**, *Urtica mortua, Galeopsis Archangelica, Dead Nettles, White Archangel Nettle*, (F.) *Ortis blanche, Ortis morte*. Infusions of this plant have been recommended in uterine hemorrhage, and leucorrhœa. It is not used.

**LAMIUM MONTANUM**, *Melittis melissophyllum*—*l. Rubrum, Galeopsis*.

**LAMOTTE**, MINERAL WATERS OF, These thermal springs are in the department of Isère, France. Temperature, 164°.

**LAMPOURDE**, Xanthium.

**LAMPROPHONUS**, from λυμπος, 'clear,' and φωνη, 'voice.' One who has a clear voice.

**LAMPANA**, Lapsana.

**LAMPYRIS**, Cicindela.

**LANA PHILOSOPHORUM**, *Zinci oxydum*.

**LANARIA**, *Saponaria, Verbascum nigrum*.

**LANCE DE MAURICEAU**, (F.) An in-

strument invented by Mauriceau for perforating the head of the fœtus. A perforator.

LANCEOLA, Lancet.

LANCET, *Lance'ola, Lancet'ta, Schast'ri'on, Scalprum chirur'gicum*, (F.) *Lancette*,—diminutive of *lancea*, 'a lance.' A surgical instrument, used in the operation of phlebotomy. It is composed of two parts, the handle, (F.) *Chasse*, and the blade, (F.) *Lame*. The former is made of two small plates of ivory, bone, or shell, moveable on the blade for whose preservation they are intended. The blade is formed of well polished steel. Lancets are made of different shapes; some being *broad-shouldered*—others, *spear-pointed*. The French distinguish three kinds: 1. *Lancette à grain d'orge*, which on account of the almost oval shape of its point makes a large opening. 2. The *L. à langua de serpent*, which is very narrow towards the point; and, 3. The *L. à grain d'avoine*, which holds a medium station between the two former, and is generally preferred.

The *Abscess Lancet* is merely a large lancet for the purpose of opening abscesses.

LANCETTA, Lancet.

LANCETTE, Lancet.

LANCETIER, (F.) A lancet case.

LANCINANT, Lancing.

LANCINATING, *Lan'cinans*, from *lancinare*, (*lancea*, 'a lance,') 'to strike or thrust through.' (F.) *Lancinant*, (substantive *Élancessment*.) A species of pain, which consists in lancements or shootings, similar to those that would be produced by the introduction of a sharp instrument into the suffering part. It is especially in cancer that this kind of pain is felt.

LAND'S END, CLIMATE OF. The climate of the Land's End, in England, resembles that of the south of Devonshire, but is more relaxing. It is considered to be most likely to prove beneficial in consumptive cases, in which the disease is accompanied by an irritated state of the pulmonary mucous membrane, producing a dry cough. Where the system is relaxed, and the secretion from the lungs considerable, the climate, it is conceived, will generally prove injurious. As a brumal retreat, the southern coast of Devonshire would seem to be preferable to it.

LANGEAC, MINERAL WATERS OF.—Acidulous, mineral waters at Langeac, in the department of Haute-Loire, France. They are employed as refrigerant, aperient, and diuretic. They contain carbonic acid, carbonates of soda and magnesia, and a little iron.

LAN'GII AQUA EPILEP'TICA, *Epilep'tic Water of Langius*, formerly employed against epilepsy. It was composed of the flowers of *convallaria* and *lavender*, *Spanish wine*, *cinnamon*, *nutmeg*, *mistletoe*, *peony* and *dittany roots*, *long pepper*, *cubbs*, and *rosemary flowers*.

LANGUE, Tongue.—*Abassisur de la*, *Glossocotichus*—*l. de Carpe*, see *Lever*—*l. de Corf*, *Asplenium scolopendrium*—*l. de Chien*, *Cynoglossum*—*l. de Serpent*, *Ophioglossum vulgatum*.

LANGUEUR, Languor.

LANGUOR, *Aph'esis*, (F.) *Languor*. A species of atony, depression, or debility, which generally comes on slowly.

LANTA'NA, *Sage Tree*, *Blueberry*, (F.) *Cail-leau*. The leaves of this indigenous plant form a

fine-scented tea like *L. Comara* or *Bahama Tea*; and *L. Psudoth'a* or *Brasil Tea*. The tea is used as a diaphoretic.

LANU'GO, *Pili cutis*, *Pluma*, from *Lana*, 'wool.' The soft fine hair on different parts of the body, especially of the young.

LANUGO PRIMA, *Geneas*—*l. Pudendorum*, *Pubes*—*l. Siliquæ hirsutæ*, see *Dolichos pruriens*.

LANUVIUM, *Vulva*.

LAONICA CURATIO seu CURA. A mode of treating the gout, which consisted in the employment of local applications, proper for evacuating the morbid matter. (?)

LAOS, Tin.

LAPACTICUS, Cathartic, Laxative.

LAPARA, Abdomen, Flanks, Lumbi.

LAPAROCLE, from *λαπαρη*, 'the lumbar region,' and *κλιη*, 'rupture.' *Lumbar Hernia*, through a separation of the fibres of the quadratus lumborum, and a protrusion of the aponeurosis of the transverse muscle, on the outside of the mass common to the sacro-lumbalis and longissimus dorsi.—Cloquet.

LAPAROCYSTOTOMIA, see *Lithotomy*.

LAPARO-ELYTROTOMIA, *Cæsarean Section*.

LAPARO-ENTEROT'OMY, *Lap'aro-enterotom'ia*; from *λαραρη*, the 'lumbar region,' the 'abdomen;' *εντερον*, 'intestine,' and *τομη*, 'incision.' The operation of opening the abdomen and intestinal canal, for the removal of disease.

LAPAROSCOPIA, *Abdominoscopia*.

LAPAROTOMY, see *Gastroscopy*.

LAPATHOS, *Rumex acutus*—*l. Aquaticum*, *Rumex hydrolapathum*—*l. Chinense*, *Rheum*—*l. Orientale*, *Rheum*—*l. Sanguineum*, *Rumex sanguineus*—*l. Unctuosum*, *Chenopodium bonum* *Henricus*.

LAPE, Mucus.

LAPIDIL'LUM, from *Lapis*, 'a stone.' *Blasius* has given this name to a kind of scoop, used, in his time, for extracting stone from the bladder.

LAPILLATIO, *Lithia*.

LAPILLI GLANDULÆ PINEALIS, see *Pineal gland*.

LAPIL'LUS, diminutive of *Lapis*, 'a stone.' A small stone; gravel; a grain of sand.

LAPIS, *Calculus*—*l. Accipitrum*, *Hieracites*—*l. Aerosus*, *Calamina*—*l. Ammoniaci*, see *Ammoniac gum*—*l. Animalis*, *Blood*—*l. Armenius*, *Melochites*—*l. Aureus*, *Urine*—*l. Bezoardicus*, *Bezoar*—*l. Cereuleus*, *Cupri sulphas*—*l. Calaminarius*, *Calamina*—*l. Carneolus*, *Cornelian*—*l. Causticus*, *Potassa cum calce*—*l. Causticus*, *Potassa fusa*—*l. Collymus*, *Ætites*—*l. Contrayervæ*, *Pulvis contrayervæ compositus*—*l. Cyanus*, *L. lazuli*.

LAPIS DIVI'NUS, *L. Ophthal'micus* seu *Ophthal'micus St. Ivesii*. (*Cupri sulphat.*, *alumin. Potassa nitrat.* aa ʒj. Melt together, adding at the end *Camphor* ʒjss.) Employed to make an eye-water, ʒij ad *Aqua* ʒiv.

LAPIS FULMINENS, *Ceraunium*—*l. Hematites*, *Hæmatites*—*l. Heracleus*, *Magnet*—*l. Infernalis*, *Argentii nitras*—*l. Infernalis alkalinus*, *Potassa cum calce*—*l. Judaicus*, *Judæus* (*lapis*.)

LAPIS LAZ'ULI, *Lapis Cy'anus*, *Asulci*, *Laz'ulite*, (F.) *Pierre d'azur*, *Outremor*. A stone, of a beautiful blue colour: opaque and close-grained; fracture, dull. It is composed of silex;

alumine; carbonate and sulphate of lime; oxide of iron, and water. It was formerly looked upon as a purgative and emetic, and given in epilepsy.

**LAPIS MALUCENSIS**, Bezoard of the Indian porcupine—*l. Nauticus*, Magnet—*l. Ophthalmicus*, *l. Divinus*—*l. Ophthalmicus St. Ivesii*, *l. Divinus*—*l. Phœnicites*, *Judeus (lapis)*—*l. Porcinus*, Bezoard of the Indian porcupine—*l. Prunellæ*, *Potasse nitras fusus sulphatis paucillo mixtus*—*l. Sardinus*, *Cornelian*—*l. Septicus*, *Causticum commune*—*l. Septicus*, *Potassa fusa*—*l. Specularis*, *S. lucidum*—*l. Syderitis*, *Magnet*—*l. Syriacus*, *Judeus (lapis)*—*l. Vini*, *Potassa supertartas impurus*.

**LAPPA**, *Arctium lappa*, *Galium aparine*, *Lip-pitudo*—*l. Minor*, *Xanthium*.

**LAPPULA HEPATICA**, *Agrimony*.

**LAPSA'NA**, *Lampsa'na*, *Na'gium*, *Papilla-ris herba*, *Dock-cresses*, *Nipple-Wort*, (*F.*) *Lampsans*, *Herbe aux Mamelles*. This plant is a lactescent bitter. It has been chiefly employed, however, as an external application to sore nipples, &c.

**LAPSUS PILORUM**, *Alopecia*.

**LAQ**, *Laqueus*.

**LAQUE**, *Lacca*.

**LAQUEAR**, *Lacunar*.

**LA'QUEAR VAGI'NE**, *Fundus Vaginae*. The part of the vagina in which the cervix uteri terminates.

**LA'QUEUS**, *Funis*. A cord, ligature or bandage, with running knots;—a *Noose*, a *loop*, *Brochos*, *Pach'etos*, (*F.*) *Loq* ou *Laq*. The term is applied to a bandage or fillet of any kind, attached by means of a loop upon any part, with the view of fixing it; as in certain cases of labour, where a hand or foot presents; or to facilitate extension in luxations and fractures.

**LAQUEUS GUT'TURIS**, 'Noose of the throat.' Violent inflammation of the tonsils, in which the patient appears as if suffocated by a noose. According to some, gangrenous cyananche.

**LARCH**, *Pinus larix*.

**LARD**, *Adeps suilla*.

**LARDACE**, *Lardaceous*.

**LARDA'CEOUS**, *Larda'ceus*, *Lar'deus*, *Lardiform*, *Lardiformis*, (*F.*) *Lardacé*; from *lardum*, 'lard,' the fat of bacon. An epithet given to certain organic alterations in the textures, whose aspect and consistence resemble lard.

**LARDEUS**, *Lardaceous*.

**LARDIFORM**, *Lardaceous*.

**LARGE**, *Broad*.

**LARIX**, *Pinus larix*.

**LARKSPUR**, **BRANCHING**, *Delphinium consolida*.

**LARME**, *Tear*.

**LARMOIEMENT**, *Epiphora*.

**LA-ROCHE POSAY**, **MINERAL WATERS OF**. Simple sulphurous waters in the department of Vienne, France.

**LARVA**, *Mask*.

**LARYNGE**, *Laryngeal*.

**LARYNGE'AL**, *Larynge'us*, (*F.*) *Laryngé*, *Laryngien*. Same etymon as **LARYNX**. That which belongs to the larynx.

**LARYNGEAL ARTERIES** are given off from the thyroid arteries.

**LARYNGEAL NERVES**, (*F.*) *Nerfs Laryngés*, are two in number;—a *superior* and *inferior*.

The *superior laryngeal nerve* is given off from the trunk of the pneumogastric, at the upper and deep part of the neck. It passes downwards and inwards, behind the internal carotid artery, and divides into two secondary branches; the one, *external*, which distributes its filaments, on the outside of the larynx, to the sterno-thyroid, hyo-thyroid, constrictor inferior, crico-thyroid muscles, &c. The other, the *internal*, which crosses the thyro-hyoid membrane, and gives filaments to the epiglottis, the mucous membranes of the pharynx and larynx, to the arytenoid gland, the arytenoid and crico-thyroid muscles, and ultimately anastomoses with the inferior laryngeal nerve. The *inferior laryngeal nerves* or *recurrents*, *Nerfs reversi'vi*, *Rameaux Trachéaux* (*Chaus.*), arise from the trunk of the pneumogastric within the thorax. They ascend in the furrow, which separates the trachea from the œsophagus, to be distributed on the neck, after having been reflected;—the left around the arch of the aorta; the right, around the corresponding subclavian. They send off filaments to the cardiac plexuses; to the plexuses of the œsophagus, and trachea; to the thyroid gland: to the inferior constrictor of the pharynx; the posterior and lateral crico-arytenoid and thyro-arytenoid muscles; and to the mucous membrane of the pharynx and larynx.

**LARYNGEAL PHTHISIS**, *Phtisis laryngeal*—*l. Sound*, *Laryngeche*.

**LARYNGEAL VEINS** open into the internal jugular. Winslow gives the name *laryngeal* to the *superior thyroid artery*.

**LARYNGEAL VOICE**, see *Voice*.

**LARYNGE'CHE**, from *λαρυγέ*, 'the larynx,' and *ἡχη* or *ἄχος*, 'sound.' The *laryngeal sound* heard by the stethoscope during breathing and speaking.

**LARYNGIEN**, *Laryngeal*.

**LARYNGISMUS STRIDULUS**, *Asthma thymicum*.

**LARYNGITE**, *Laryngitis*—*l. Muqueuse*, *Laryngitis* (simple)—*l. Œdémateuse*, *Œdema of the glottis*—*l. Œdémateuse et séro-purulente*, *Œdema of the glottis*—*l. avec Production de Faussez membranes*, *Cyananche trachealis*—*l. Pseudo-membraneuse*, *Cyananche trachealis*—*l. avec Stérétion de Pus*, *Phtisis laryngea*—*l. Sus-glottique*, *Œdema of the glottis*—*l. Striduleuse*, *Asthma thymicum*—*l. Sous-muqueuse*, *Œdema of the glottis*.

**LARYNGITIS**, from *Larynx*, and *itis*, a suffix denoting inflammation; *Inflammati'o Laryngis*, *Cyananchè laryngé'a*, *Angi'na laryngé'a*, (*F.*) *Laryngitis*, *Catarrhe laryngien*, *Angine laryngé*, *Inflammation of the Larynx*. This disease, in some measure, resembles croup; but is usually devoid of that peculiar sonorous inspiration, which attends the latter. There is, also, pain upon pressing the larynx; and, whilst laryngitis is a disease of more advanced life, croup attacks children. The membraniform exudation is, also, absent; probably, because the inflammation, being seated above the glottis, the coagulable lymph is readily expectorated. It requires the most active treatment.

Simple *Laryngitis* is called by some *muco-sus Laryngitis*, *Laryngitis acuta*, *l. mucosa acuta*, (*F.*) *Laryngitis muqueuse*, to distinguish it from *submuco-sus Laryngitis* or *Œdema of the glottis*.

*Chronic Laryngitis* is generally regarded as synonymous with laryngeal phthisis; but it may exist independently.

**LARYNGITIS ACUTA, Laryngitis**—1. Chronic, see Phthisis Laryngea—1. Mucosa acuta, Laryngitis—1. Mucosa, Laryngitis (simple)—1. Edematous, (Edema of the glottis)—1. Seropurulent, (Edema glottidis)—1. Submucous, (Edema of the glottis)—1. et Tracheitis chronica, see Phthisis laryngea—1. et Tracheitis infantilis, Cynanche trachealis.

**LARYNGOCACE, Cy anche trachealis.**

**LARYNGO-CATARRHUS, Catarrhus Laryngous et trachealis.** Catarrh affecting the larynx and trachea more especially, as indicated by alteration of the voice—hoarseness—itching and sensation of burning in those parts; short cough and expectoration, &c.

**LARYNGO-ET-TRACHEO-PHTHISIS, Phtthisis laryngea.**

**LARYNGOG'RAPHY, Laryngogra'phia;** from λαρυξ, 'the larynx,' and γραφή, 'a description.' An anatomical description of the larynx.

**LARYNGOL'OGY, from λαρυξ, 'the larynx,' and λογος, 'treatise.'** A treatise on the larynx.

**LARYNGOPH'ONY, Tracheoph'ony, Larynge'al voice, Tracheal voice;** from Larynx, and φωνη, 'voice.' The sound heard in health, when the stethoscope is placed over the larynx or trachea, at the time a person speaks. The voice appears to pass immediately up to the ear of the auscultator. A similar physical sign exists when there is a cavity in the lungs, and the instrument is placed over it whilst the patient speaks. See Pectoriloquy.

**LARYNGOPHTHISIS, Phtthisis laryngea.**

**LARYNGOSTASIS, Cynanche trachealis.**

**LARYNGOSTENO'SIS;** from λαρυξ, 'the larynx,' and στενωσις, 'contraction.' Contraction or narrowness of the larynx.

**LARYNGOT'OMY, Laryngotom'ia, from λαρυξ, 'the larynx,' and τέμνω, 'to cut.'** A surgical operation, which consists in opening the larynx, either to extract a foreign body, or to remedy an obstruction of the glottis. The operation is, sometimes, erroneously called *Bronchotomy* and *Tracheotomy*.

**LARYNGO-TRACHEITIS, Cynanche trachealis**—1. Tracheitis with Diphtheritic exudation, Cynanche trachealis.

**LARYNX, λαρυξ, ('a whistle.')** *Caput seu Operculum seu Initium seu Finitis superior seu Terminus superior seu Pars primi asperæ art'riae.* The apparatus of voice is situate at the superior and anterior part of the neck; and at the top of the trachea, with which it communicates. It is composed of four cartilages,—the thyroid, cricoid, and two arytenoid; is moved by a number of muscles, and lined by a mucous membrane, having certain membranous reflections, constituting the *superior ligaments of the glottis*, &c.

**PARTS COMPOSING THE LARYNX.**

1. *Cartilages, . . . . .* { Thyroid.  
Cricoid.  
Two Arytenoid.  
Epiglottic.

The vessels and nerves of the larynx are called *laryngeal*.

The larynx is destined to give passage to the air, in the act of respiration, and to impress upon it certain modifications, which constitute voice. Its dimensions vary in different individuals. In men, it is always larger, and situate lower than in women.

**LARYNX, PELLICULAR OF PLASTIC INFLAMMATION OF THE, Cynanche trachealis.**

**LAS'ANUM, Sella familiar'ica, (F.) Chaise percée.** A close stool.

**LASCIVIA, Satyriasis.**

**LASCIVITAS, Satyriasis.**

**LASCIVUS, Libidinous.**

**LASER, Laserpitium**—1. à *Largez feuilles, Laserpitium latifolium.*

**LASERPIT'IUM, Laser, Sil'phium, σιλοφιπιον.** A term applied, anciently, both to a plant and its juice, with the nature of neither of which we possess any precise information. Bentley, Laurence, Geoffroi, &c., regard it to have been the same as asafetida—Theophrastus, Dioscorides, and the ancient scholiast of Aristophanes, however, by assigning a sweet and agreeable flavour to the laserpitium, discountenance the idea. From whatever plant obtained, it was so rare, and consequently so costly, that the Romans deposited it in the public treasury. It was obtained from Cyrene—*Succus Cyrenaicus*—and likewise from Persia—the latter being the most valuable. The Laserpitium is called by Avicenna, *Alkhit*.

**LASERPITIUM LATIFOLIUM, Gontia'na alba, White Gentian, Cervad'ria alba;** (F.) *Laser à larges feuilles.* The root of this plant is bitter and tonic.

**LASERPITIUM SILER, Ses'eli, Silermonta'nium; Heart-wort, Sermountain.** The seeds and roots are possessed of aromatic properties.

**LASSITUDE OCULAIRE, Copyopia.**

**LASSITUDO, Copos.**

**LATENS IN ORE, Pterygoideus internus.**

**LATENT, Latens, from latere, 'to lie hid.'** 'Lying hid,' 'concealed.' An epithet applied to certain diseases or states of disease, in which the symptoms are so concealed and obscure, *morbi occulti*, as to escape the observation of the physician. Thus, we say *latent inflammation, latent period of small-pox.*

**LATERIT'IOUS, Laterit'ius, Lateric'inx, from later, 'a brick.'** An epithet applied to the brick-like sediment, occasionally deposited

in the urine of people afflicted with fever. *Sedimentum urinae laterid'ium.*

LATESCENTIS CHORDÆ (Musculus),  
Palmaris longus.

LATEX NIVEUS, Milk.

LATHYRIS, Euphorbia lathyris.

LATIBULUM, from *latco*, 'I lie hid.' The  
*foyer* of a febrile poison; whence it spreads to  
every part to induce a paroxysm. See *Clapier*.

LATICA. Same etymon. *Amphimerina*  
*lat'ica* of Sauvages. A species of quotidian re-  
mittent, whose paroxysms are very long, and  
which is accompanied with latent heat (?)  
whence its name.

LATICES LACTEI, Receptaculum chyli.

LATISSIMUS COLLI, *Platyama myoides*.

LATISSIMUS DORSI, *Anscalptor*, *Brachium*  
*movens quartus*, (F.) *Lombo-humeral*, (Ch.)  
*Dorsi-lombo-sacro-humeral*, *Muscle grand dor-*  
*sal*, *M. très large du dos*. A flat muscle;  
broad, especially below; thin; quadrilateral;  
and situate at the posterior, lateral and inferior  
region of the trunk. It is attached to the pos-  
terior half of the outer lip to the crest of the  
ilium; to the posterior surface of the sacrum;  
to the spinous processes of the six or seven last  
dorsal vertebrae; to all those of the loins, and  
to the last four false ribs, and is inserted by a  
strong tendon at the posterior edge of the bi-  
capital groove of the humerus. Its upper fibres  
are almost horizontal: the middle very long and  
oblique upwards and outwards: and the anterior  
almost vertical. This muscle carries the arm  
backwards, depressing it, and making it turn  
on its axis. It also draws backwards and down-  
wards the prominence of the shoulder. When,  
suspended by an arm, we make an effort to raise  
ourselves, it draws the trunk towards the arm.  
It can, also, raise the ribs by assuming its fixed  
point on the humerus, and become an inspira-  
tory muscle.

LATITUDO HUMERI, Scapula.

LATTICE WORK, Cancelli.

LATUS, Broad.—I. Ani, Levator ani.

LAU, see Spirit.

LAUCANIA, *Leuca'nia*, *Lau'chané*, from  
*lauro*, 'I enjoy,' 'I take.' The fauces and  
oesophagus. Also, the chin.—Gorræus.

LAUCHANE, Laucina.

LAUDANUM or LAUDANUM. Perhaps  
from *laus*, 'praise;' *lauda'tum*, 'praised.'  
Every preparation of opium, solid or liquid,  
but more particularly the extract and tincture,  
and especially the latter.

LAUDANUM ABBA'TIS ROUSSEAU, *Gutta Ab-*  
*batis Rousseau*, *Vinumopia'tum fermentatio'ne*  
*parat'um*, *Abbe Rousseau's Drops*. (*Mel. Nar-*  
*bonnens*,  $\text{℥xij}$ , *aqua calida* Oijj. Set in a warm  
place, and, as soon as the mixture ferments,  
add opium  $\text{℥iv}$ , dissolved in water, f.  $\text{℥xij}$ . Let  
it ferment for a month, and evaporate to f.  $\text{℥x}$ :  
strain, and add rectified spirit of wine  $\text{℥ivss}$ .)

LAUDANUM, FORD'S, Vinum opii—1. Liquid,  
Tinctura opii—1. Liquidum Hoffmanni, Vinum  
opii—1. Liquidum Sydenhami, Vinum opii—1.  
Opiatum, Extractum opii—1. Simplex, Extrac-  
tum opii.

LAUGH, Risus—1. Sardonic, Canine laugh.

LAUGHING, Risus.

LAUGHTER, Risus.

LAUREL, *Kalmia latifolia*, *Magnolia macro-*  
*phylla*—1. Broad-leaved, *Kalmia latifolia*—1.

Cherry, *Prunus lauro-cerasus*—1. Common,  
*Prunus lauro-cerasus*—1. Dwarf, *Kalmia angus-*  
*tifolia*—1. Mountain, *Kalmia latifolia*, *Rhodo-*  
*dendron*—1. Narrow-leaved, *Kalmia angustifo-*  
*lia*—1. Poison, *Prunus lauro-cerasus*—1. Rose,  
*Kalmia latifolia*—1. Sheep, *Kalmia angustifo-*  
*lia*—1. Swamp, *Kalmia glauca*—1. Sweet, Illi-  
cium Floridanum—1. Water, see *Prunus lauro-*  
*cerasus*—1. White, *Magnolia glauca*.

LAURENT, SAINTE, MINERAL WA-  
TERS OF. A thermal spring, five leagues  
from Joyeuse in France. Temp. 127° Fahr.

LAURENTIA PINNATIFIDA, *Pepper-*  
*dulse*. One of the Algae, eaten in Scotland,  
and hawked about the streets of Edinburgh  
along with *Lamina'ria digitata* or Tangle.

LAUREOLA, *Daphne laureola*.

LAURIEE, Laurus—1. *Alexandrin*, *Ruscus*  
*hypoglossum*—1. *Amandier*, *Prunus lauro-cera-*  
*sus*—1. *Cérisé*, *Prunus lauro-cerasus*—1. *Rose*,  
*Nerium oleander*.

LAURO-CERASUS, *Prunus lauro-cerasus*.

LAURUS, *Laurus nob'ilis*, *Daph'ne*, *Sweet*  
*Bay*. *Nat. Oid.* Laurinæm. (F.) *Laurier*.  
The leaves and berries have a sweet, fra-  
grant smell, and an aromatic, astringent taste.  
Sweet bay has been advised as a stomachic and  
carminative, but is now rarely used. It is,  
sometimes, employed as a fomentation and in  
glysters; and the berries are an ingredient in  
the *Emplastrum Cumini*.

LAURUS ALEXANDRINA ANGUSTIFOLIA, *Rus-*  
*cus hypoglossum*—1. Camphora, see Camphor.

LAURUS BENZOIN, *Benzoin odoriferum*, *Laur-*  
*us Pseudo-benzoin*, *Spice wood*, *Spice bush*,  
*Allspice bush*, *Wild allspice*, *Spice berry*, *Fever*  
*wood*, *Fever bush*. An indigenous shrub, grow-  
ing in moist, shady places in all parts of the  
United States; flowering early in spring. All  
parts of the shrub have a spicy, agreeable fla-  
vour, which is strongest in the bark and ber-  
ries. An infusion or decoction of the small  
branches is used in popular practice as a ver-  
mifuge, and agreeable drink in low fevers. The  
bark has been used in intermittents; the ber-  
ries, dried and powdered, for allspice. The  
oil of the berries is used as an excitant.

LAURUS CAS'IA. The species of Laurus which  
yields the *Cassia lign'ea*, *Casia*, *Cassia cinna-*  
*mo'mea*, *Cortex Canel'la Malabar'ica*, *Cassia*  
*lign'ea Malabar'ica*, *Xylo-cassia*, *Canel'la Ma-*  
*labar'ica et Javen'sis*, *Canella Camb'ana*, *Arbor*  
*Juda'ica*, *Cassia Canel'la*, *Canellifera Mala-*  
*bar'ica*, *Cortex cras'sior*, *Cinnamo'mum Mala-*  
*bar'icum*, *C. Indicum*, *C. Sinen'se*, *Calihao's*  
*canel'la*, *Wild Cinnamon*, *Malabar Cinnamon*,  
*Cassia*. (F.) *Cannelle de Malabar ou de Java*  
*ou de la Chine ou des Indes ou de Coromandel*,  
*C. fausse*, *C. matte*, *Casse en bois*, *Casse aro-*  
*matique*. The bark and leaves abound with  
the flavour of cinnamon, for which they may be  
substituted; but they are much weaker. The  
unopened flower buds are used in the same  
manner.

LAURUS CINNAMOMUM, *Cinnamo'mum*, *C.*  
*Zeylan'icum*, *Darce'ni*, *Darce'ni*, *Cinnamon*,  
*Xylo-cinnamomum*, *Cœurdo Canel'la*. (F.)  
*Cannelle*, *Baume de Cannelle*, *Cannelle offic-*  
*inale*. Cinnamon bark, which is obtained also  
from the *Cinnamo'mum aromati'cum*, is stimu-  
lant and carminative, and is employed, chiefly,  
as a grateful aromatic, to cover the taste of nau-  
seous remedies. Dose, gr. x. to  $\text{ʒj}$ . The Flow-

ers, called *Cassia Flores* in the shops, possess aromatic and astringent virtues, and may be used wherever cinnamon is required. The volatile oil of the bark—*Oleum Cinnamomi*—Oil of Cinnamon, is official in the Pharm. U. S.

**LAURUS CULILAWAN**, *Cinnamomum Culilawan*. The tree that affords the *Cortex Culilawan*, *Culilawan*, *Culilawan*, *Cortex caryophylloides*, *C. Caryophylloides Amboinensis*. This bark resembles the sassafras in appearance and properties, and is used in Java as a condiment.

**LAURUS MALABATHERUM**, see *Malabathrum*—*L. Nobilis*, *Laurus*—*L. Pseudobosain*, *L. Benzoin*.

**LAURUS SASSAFRAS**, *Sassafras*, *Cornus mas odorata*, *Anahida*, *Agnes-free*. Indigenous in the United States. Sassafras wood and root, and especially the bark of the root, *Sassafras Radicis Cortex* (Ph. U. S.) have been considered stimulant, sudorific and diuretic. The virtues depend upon essential oil, *Oleum Sassafras*, the odour of which is not unlike that of fennel. It has been used in cutaneous diseases, chronic rheumatism, &c.

The pith of the stems, *Sassafras medulla*, abounds in gummy matter, which it readily imparts to water, forming a limpid mucilage, which is much employed as a collyrium in ophthalmia, and as a drink in dysentery, catarrh, &c., (one dram of the pith to a pint of boiling water.)

**LAUTISSIMA VINA**. Wines were formerly so called, which were strongly impregnated with myrrh.

**LAVAMENTUM**, Clyster, Enema.

**LAVANDE**, *Lavendula*.

**LAVANDULA**, *Lavendula*.

**LAVEMENT**, Clyster, Enema—*L. Antispasmodicus*, *Enema fistidum*.

**LAVENDER, COMMON**, *Lavendula*—*L. Sea*, *Static limonium*, *Static Caroliniana*.

**LAVENDULA**, from *lavo*, 'I wash;' so called from being used in baths. *Lavendula spica*, *L. vera*, *Lavan'dula*, (Ph. U. S.) *Common Lavender*, (F.) *Lavande*, *Aspic*, *Spic*. The odour of lavender flowers is fragrant and agreeable; taste warm and bitterish—depending upon an essential oil. It has been used as a stimulant; particularly in the form of the oil,—*Oleum lavendulae*. The dried leaves have been employed as an errhine.

The French use the *Lavendula stachas*, *Stachas et Stichas Arabica*, *French Lavender*, of which they have a compound syrup, *Syrupus de stach'adé compos'itus*: given as a pectoral.

**LAVER GERMANICUM**, *Veronica beccabunga*—*L. Odoratum*, *Sisymbrium nasturtium*.

**LAVIPEDIUM**, *Pediluvium*.

**LAW MEDICINE**, *Medicine*, legal.

**LAWSONIA INERMIS**, *Acan'na vera*, *A. Orientalis*, *Cyprus antiquorum*, *Ligustrum Egyptianum*, *Smooth Lawsonia*; (F.) *Henné*. An East Indian and African plant, the root of which is slightly astringent.

In India, the root of the *Lawsonia spinosa* is employed in lepra and other cutaneous affections.

**LAX**, *Diarrhea*.

**LAXANS**, *Laxative*, *Relaxant*.

**LAX'ATIVE**, *Laxati'vus*, *Laxans*, *Le'miens*, from *laxare*, 'to loosen;' *Minorati'vus*, *Solu-*

*tivus*, *Alvid'vus*, *Hypocchoroticus*, *Hypago'gus*, *Hypel'atus*, *Hypocathar'ticus*, *Lapacticus*. A medicine which generally opens the bowels; such as tamarinds, manna, &c.

**LAXATIVUS INDICUS**, *Cambogia*.

**LAXATOR AURIS INTERNUS**, *L. tympani*.

**LAXATOR MINOR TYMPANI**. A very small muscle which extends from the upper part of the external auditory canal, and is inserted at the inferior part of the process of the handle of the malleus. Its existence is denied by most anatomists.

**LAXATOR TYMPANI**, *L. major tympani*, *Extor'vus mallei*, *Anterior mallei*, *Obli'queus auris*, *Externus auris* vel *Laxator inter'nus*, *Eustachii musculus*, (F.) *Antérieur du marteau*, *Sphéni-sapingo-malleus*. A muscle which arises from the spine of the sphenoid bone and from the cartilage of the Eustachian tube, and is inserted, by a tendon, into the apophysis of Rau. It relaxes the membrana tympani.

**LAXITAS**, *Atony*—*L. Alvi*, *Diarrhea*—*L. Ingestorum*, *Lientery*—*L. Intestinorum*, *Lientery*—*L. Scroti*, *Rhachosis*—*L. Ventriculi*, *Gasterathesia*.

**LAXITY**, *Lax'itas*, *Laxness*. Condition of a tissue, when loose or relaxed; or of one which wants tone. We say *laxity of fibre*, *laxity of skin*, to express, that those parts have lost some of the tenseness proper to them.

**LAZARETTO**, *Lazaret*, *Lazar-house*, from (I.) *lazzero*, 'a leper.' A solitary edifice in most seaports of magnitude, intended for the disinfection of men and goods, proceeding from places where contagious diseases are prevailing.

**LAZULITE**, *Lapis lazuli*.

**LEAD**, *Plumbum*—*L. Black*, *Graphites*—*L. Chloride of Plumbi chloridum*—*L. Iodide of*,—see *Iodine*—*L. Oxyd of*, semi-vitrified, *Plumbi oxydum semivitreum*—*L. Red*, *Plumbi oxydum rubrum*—*L. Subcarbonate of*, *Plumbi superacetates*—*L. Superacetate of*, *Plumbi superacetates*—*L. Tannate of*, see *Tannin*—*L. White*, *Plumbi subcarbonates*.

**LEAD-POISONING**, *Molybdo'sis*, *Morbus plum'beus*, *Cacoethym'ia plum'bea*, (F.) *Intoxication saturnina*. Morbid phenomena induced by lead received into the system.

**LEADWORT**, *Plumbago Europaea*.

**LEAF, SOUR**, *Andromeda arborea*.

**LEAMINGTON, MINERAL WATERS OF**. Saline waters at Leamington, about two miles east of Warwick, England, which contain chloride of sodium, sulphate of soda, and chlorides of calcium and magnesium.

**LEANNESS**, *Emaciation*.

**LEAP**, *Sax. hlespan*, *Saltus*, *Salt'io*, *Evul'sis*, (F.) *Saut*; *Bound*, *Jump*,—the act of leaping. Muscular movement or movements, by which the body is detached from the soil by the forcible and sudden extension of the lower limbs, previously flexed upon the pelvis.

**LEAPING AGUE**. This disease is said by the Scotch writers to be characterized by increased efficiency, but depraved direction of the will, producing an irresistible propensity to dance, tumble, and move about in a fantastic manner, and often with far more than the natural vigour, activity and precision! See *Mania*, *dancing*.

**LEATHER FLOWER**, *Clematis viorna*—*L. Wood*, *Dirca palustris*.

**LEBANON, MINERAL WATERS OF.** The spring at Lebanon, 26 miles east of Albany, New York, is an almost pure thermal. Temp. 72° Fahr.

**LECHENEION**, Torcular Herophilli.

**LECHO**, Puerpera.

**LECHOPYRA**, Puerperal fever.

**LE CRAN**, Cochlearia armoracia.

**LECTISTERNIUM**, from *lectus*, 'a bed,' and *sternere*, 'to spread.' The arrangement of a bed so as to adapt it to a particular disease. Also, a supplication, with the Romans, in times of public danger, when beds or couches were spread for the gods, as if they were about to feast, and their images were taken down from their pedestals and placed upon these couches around the altars. The lectisternium was first introduced in the time of a pestilence.—Livy.

**LECTUALIS**, from *lectus*, 'a bed.' An epithet applied to a protracted disease.

**LECTULUS**, Stramineus, *Fanon*.

**LEDE SAUVAGE**, *Ledum sylvestris*.

**LEDOYEN'S DISINFECTING LIQUID.**

A solution of nitrate of lead, used as an antiseptic and antibromic.

**LEDUM LATIFOLIUM**, *Labrador Tea*, grows in damp places, in Canada and the United States. The leaves have a pleasant odour and taste, and have been used as tea. They have also been esteemed pectoral and tonic.

**LEDUM PALUSTRE**, *Rosmarinus sylvestris*, *Anthos sylvestris*, *Marsh Tea*, (F.) *Lède* ou *Rosmarin sauvage*. *Nat. Ord.* Ericinæ. *Sec. Syst.* Decandria Monogynia. This plant has a bitter, subastringent taste, and was formerly used in Switzerland in place of hops: the virtues are equivocal.

**LEE**, Feculence, Lixivium, *Ley*, *Lye*.

**LEECH**, Hirudo.

**LEEK**, *Allium porrum*.

**LEES, SOAP**, Liqueur potasse.

**LEG**, (Danish), *Crus*, *Scalos*, *Onomd*. The portion of the lower extremity, which extends from the knee to the foot. It consists of three bones; *Tibia*, *Fibula*, and *Patella*, and, also of a great number of muscles, vessels, and nerves. The projection, formed by the muscles at the back part of the leg, has received the name of *Calf of the leg*. It is the special attribute of man, and proves that he is destined to be biped.

**LEG, SWELLED**, Phlegmatia dolens—1. Cobain, see Elephantiasis.

**LEGITIMATE**, *Legitimus*, from *lex*, *legis*, 'law;' *Genuinus*, *Gnosios*. An epithet applied to things which are according to rule. A *legitimate child*, (F.) *Enfant légitime*, is one conceived or born during marriage. *Legitimate diseases*, (F.) *Maladies légitimes*, are those which follow a regular march.

**LEGNA**, from *αλενος*, 'a fringed edge.' The orifice of the pudendum muliebre, or of the uterus.

**LÉGUME**, Legumen.

**LEGUMEN**, from *lego*, 'I gather:' (F.) *Légume*, *Gousse*. So called because it is usually gathered by the hand, instead of being reaped. All kinds of *pulse*, as peas, beans, &c., are thus termed.

**LEGUMIN**, Casein.

**LEICHEN**, Lichen.

**LEIOPUS**, *Liopus*, *Planicus*, *Plantus*, *Plo-*

*sus*, from *λειος*, 'smooth,' and *ποις*, 'a foot.' One who is affected with *flat-footedness*, *splay-footedness*, *Leiopodia*, *Liopodia*. One, the soles of whose feet are flat, instead of having the concavity which they commonly present.

**LEIOSIS**, Comminution.

**LEIPHÆMIA**, *Liphæmia*: same etymon as *Leiphæmos*. Poverty or paucity of blood.

**LEIPHÆMOI**, Achroi.

**LEIPHÆMOS**, *Liphæmos*, (F.) *Leiphæmos*, from *λειος*, 'I want,' and *αίμα*, 'blood.' A word sometimes used adjectively; at others, substantively, either for a vicious state of the blood—or rather for a sort of anæmia—or for the patient who labours under this condition.

**LEIPHÆME**, *Leiphæmos*.

**LEIPO**, Lipo.

**LEIPODERMIA**, *Aposthia*.

**LEIPODERMOS**, *Lipodermos*, from *λειος*, 'I want,' and *δέρμα*, 'skin.' One who wants a part of his skin. It is especially applied to one who wants the prepuce. See *Apalla* and *Aposthia*.

**LEIPOMERIA**, *Lipomeria*.

**LEIPOPSYCHIA**, *Syncope*.

**LEIPOTHYMIA**, *Syncope*.

**LEIPYRIAS**, from *λειος*, 'I want,' and *πυρ*, 'fire' or 'heat.' A species of continued fever, referred to by the Greek physicians, in which there is burning heat of the internal parts and coldness of the extremities. Avicenna described, under this name, a kind of hemitritæa.

**LEMA**, *Chassie*.

**LEME**, Lippitudo.

**LEMTHOCORTON**, *Corallina Corsicana*.

**LEMMA**, Cortex, Feculence, Furfur, Seditmentum.

**LEMNISCUS**, Pessary, Tent.

**LEMON GROUND**, *Podophyllum montanum*—1. Juice, artificial, see *Citrus medica*—1. Peel, see *Citrus medica*—1. Tree, *Citrus medica*—1. Wild, *Podophyllum montanum*.

**LEMONADE**, *Limona'da*, (F.) *Limonade*. Lemon juice diluted with water and sweetened. See *Citrus medica*.

**LEMONADE, DRY**, (F.) *Limonade sèche*. Citric or tartaric acid reduced to powder and mixed with sugar. *Lemonade Powders* may be made as follows:—Pound  $3\frac{1}{2}$  of *citric acid*, with a few drops of essence of lemon-peel and  $\frac{3}{4}$  or more of lump sugar. Divide into six papers, each of which will make a glass of lemonade. See *Citric acid*.

**Lemonade Gazeuse**, (F.), is an agreeable drink prepared by adding syrup of lemons, raspberry, &c., to water saturated with carbonic acid.

**LEMONADE, NITRIC**. Nitric acid considerably diluted with water, and sweetened.

**LEMONADE, SULPHURIC**, and **LEMONADE, TARTARIC**, are made with the sulphuric and tartaric acids.

**LEMOSITAS**, *Chassie*, Lippitudo.

**LENIENS**, Laxative, Lenitive.

**LENIS**, Lenitive.

**LENITIVE**, *Lenitivus*, *Lemis*, *Leniens*, *Epicoma*, *Mitigans*, from *lenio*, 'I assuage.' A medicine, which allays irritation or palliates disease; also, a laxative medicine. A *lenitive electuary* is one that purges gently.

**LENOS**, Torcular Herophilli.

LENS, *Ervum lens*—1. Crystalline, Crystalline.

LENTICULA. Dim. of *lens*, 'a lentil.' A freckle. Also, the eruption of lenticular fever. See *Ephelides*.

LENTICULAR GANGLION, Ophthalmic G.

LENTICULA RES GLAN'DULÆ, *Lenticular glands*. Mucous follicles, having the shape of a lentil, which are observed especially towards the base of the tongue.

LENTIGO, *Ephelides*.

LENTIL, *Ervum lens*.

LENTILLE, *Ervum lens*—1. *Crystalline, Crystalline*—1. *Ers, Ervum ervilia*.

LENTIS'CINUM VINUM. Wine impregnated with mastich; from *Lentiscus*, 'the mastich tree.'

LENTISCUS VULGARIS, *Pistacia lentiscus*.

LENTITIA, *Lentor*.

LENTITIS, Phacitis.

LENTITUDO, *Lentor*.

LENTOR, *Lentitia, Lentitudo*, from *lentus*, 'clammy.' A viscosity or sizziness of any fluid. See *Gluten*.

LENUM, *Torcular Herophili*.

LEONTIASIS, *Leontion*, from *leōn*, 'a lion.'

A name given to lepra of the face, from some fancied resemblance between the countenance of those labouring under it and that of the lion. To this kind of lepra the epithets *leontine* and *leontine* have been given.

LEONTICE THALICTROIDES, *Caulophyllum thalictroides*.

LEONTION, *Leontiasis*.

LEONTODON TARAXACUM, *Urina'ria, Caput Mor'achi, Dens leo'nis, Dandelion, Piss-a-bed, Puffball*, (F.) *Pissenlit, Liondent. Order Compositae*. The young leaves are sometimes eaten as salad. The roots are, also, roasted and used as a substitute for coffee. The root, *Taraxacum*, (Ph. U. S.) is, moreover, reputed to be aperient and diuretic; hence its vulgar name. Its efficacy is doubtful.

LEONTOPODIUM, *Alchemilla*.

LEONURUS, from *leōn*, 'a lion,' and *oura*, 'a tail.' *Lion's Tail*.

LEONURUS CARDIACA, *Agripal'ma Gallie, Mar'u'bium, Cardi'aca crisp'a, Herba cardiaca, H. Pata lapi'na, Motherwort, Throatwort*, (F.) *Agripaum's*. Its properties are those of a nauseous bitter; and hence it has been used in hysteria and other nervous affections.

LEONURUS LANATUS, *Ballota lanata*.

LEOPARD'S BANE, ROMAN, *Araica montana, Doronicum pardalanchae*.

LEPAS, *Lepis, λεπας*, gen. *λεπιδος*; *λεπιδος*, 'a scale.'

LEPER, see *Leprous*.

LEPIDIUM, from *λεπιδος*, 'a scale;' so called from its supposed usefulness in cleansing the skin from scales and impurities. *Pepperwort*.

LEPIDIUM IBERIS, *Iberis, Cardamantica, Sciat'ica cresses*. This plant possesses a warm, penetrating, pungent taste, like other cresses, and is recommended as an antiscorbutic, antiseptic, and stomachic.

LEPIDIUM SATIVUM, *Nasturtium horten'se, Garden cress, Dittander*, (F.) *Cresson alénois, Cresson des Jardins*. This plant possesses warm, stimulating properties, and is used like the last.

LEPIDODES, *Squamous*.

LEPIDOIDES, *Squamous*.

LEPIDOSARCO MA, *Tumor squamiformis carnosus*. A fleshy tumour, covered with scales; from *λεπιδος*, 'a scale,' and *σαρξωμα*, 'a fleshy tumour.' Marcus Aurelius Severinus describes tumours of this kind in the interior of the mouth.

LEPIDOSIS, *Scaly diseases*.

LEPIDOSIS ICHTHYIASIS, *Ichthyosis*—

1. *Ichthyiasis cornigera*, Horny excrescences—  
1. *Lepriasis, Lepra*—1. *Pityriasis, Pityriasis*—  
1. *Psoriasis, Psoriasis*.

LEPIRA, *Lepra*.

LEPIS, *Scale*.

LEPORINUM LABIUM, *Harelip*—1. *Rostrium, Harelip*.

LEPORINUS OCLUSUS, *Lagophthalmia*.

LEPRA, *Lepira*, from *λεπιδος*, 'a scale.' *Lepido'sis Lepri'asis, Lepro'sis, Lepro'sitas, Vitili'go, Lepra Graco'rum, Herpes furfuraceus circina'tus, Leprosy*, (F.) *Lèpre, Mal Saint-Main, Dartre furfuracis arrondis*. This term has been applied to various affections, very different in character. 1. To the *Leprosy of the Jews, Leuch, Lepido'sis Lepriasis canas'cens, Lepra Mosai'ca seu Hebrao'rum*,—a variety of the *Alphos* or *Lepra alphi'des*. The leuce was, generally, not scaly, but consisted of smooth, shining patches, on which the hair turned white and silky, and the skin, with the muscular flesh, lost its sensibility. It was incurable. 2. To the *Elephantiasis* or *Lepra of the Arabs*, see *Elephantiasis*; and 3. To the *Lepra of the Greeks*, which includes all the varieties met with at the present day. It is characterized by scaly patches of different sizes, but having always nearly a circular form. Bateman and Willan describe three chief varieties of this lepra.

1. *Lepra alphi'des, Lepido'sis Lepri'asis albida, Alphos, Morph'a' alba, Vitili'go alphas, Al'baras alba, Albaras, Albaros, Lèpre écailleuse* of Alibert, *White leprosy*. An affection, characterized by white patches, surrounded by a rose-coloured areola, which appears here and there on the surface; depressed in the middle.

2. *Lepra nigricans, Lepra melas, Vitili'go melas, V. Nigra, Morph'a' nigra, Lepra maculosa nigra, Al'baras nigra, Melas, Lepido'sis lepri'asis nigricans, Black leprosy*; in which the scales are livid; the size of half a dollar; and diffused over the body, but less widely than in the *Alphi'des*. The French pathologists usually admit three species of lepra, to which they give the epithets *scaly, (squamous), crustaceous, (crustaceis),* and tubercular, (*tuberculense*), according as the skin may be covered with scales, crusts, or tubercles.

3. *Lepra vulgaris, Lepido'sis lepri'asis vulgaris, Dartre furfuracis arrondis*, of Alibert, characterized as follows: scales glabrous, whitish, size of a crown piece; preceded by smaller reddish and glossy elevations of the skin, encircled by a dry, red, and slightly elevated border; often confluent; sometimes covering the whole of the body except the face.

Lepra appears to be endemic in Egypt, in Java, and certain parts of Norway and Sweden. Imperfect and faulty nutriment appears to contribute to its development. The means, best adapted for its removal, are:—a mild, unirritating diet, emollient fomentations—sulphureous

baths, fumigations, &c.; but, often, all remedial agents will be found ineffectual.

LEPRA ARABUM, Elephantiasis Arabica—l. Borealis, Radzyge—l. Fungifera, Frambœsia—l. Græcorum, Lepra—l. Hebræorum, see Lepra—l. Ichthyosis, Ichthyosis—l. Lombardica, Pellagra—l. Maculosa nigra, L. Nigricans—l. Mediolanensis, Pellagra—l. Mercurial, Eczema mercuriale—l. Mossica, see Lepra—l. Norvegica, Radzyge—l. Squamosa, Impetigo—l. Taurica, *Mal de Crimée*.

LEPÉE, Lepra—l. *des Cosaques*, *Mal de Crimée*—l. *Scailleuse*, Lepra alphoides—l. *Humide*, Impetigo.

LEPRICUS, Leprous.

LEPROSARIUM, *Ladroris*.

LEPROSERIE, *Ladroris*.

LEPROSIS, Lepra.

LEPROSITAS, Lepra.

LEPROSY, Lepra—l. Black, Lepra nigricans—l. Norwegian, see Radzyge—l. White, Lepra alphoides.

LEPROUS, *Lepro'sus*, *Leprot'icus*, *Lep'ricus*, *Lepro'des*. Relating to or resembling or affected with leprosy; a *leper*.

LEPSIS, Attack.

LEPTANDRIA VIRGINICA, *Veronica Virginia'ca*, *Calver's physic*. An indigenous plant, which grows throughout the United States, and flowers in August. The flowers are white, and terminate the stem in a long spike. A variety with purple flowers has been described, as

LEPTANDRIA PURPUREA, *Physic root*, *Black root*, *Whorlywort*, *Culvert root*, *Brinton root*, *Bowman root*. The root is bitter and nauseous, and when fresh is emetic and cathartic. In the dried state it is more uncertain. Dose of the powder gr. xx to ʒi.

LEPTO, LEPTOS, λεπτος, 'thin,' 'light.' Hence:

LEPTOCHRO'A, *Leptochros*, from λεπτος, 'thin, fine,' and χροα, χροια, 'the colour of the skin: the skin.' Fineness, thinness of skin.

LEPTOCHYMIA, from λεπτος, 'thin,' and χυμος, 'a juice.' Morbid thinness of the juices.

LEPTOCHYME'NIA, from λεπτος, 'thin,' and μεμη, 'a membrane.' Thinness, delicacy of membrane.

LEPTOMERIA, from λεπτος, 'thin, fine,' and μέρος, 'a part.' Fineness, delicacy of bodily formation.

LEPTONTIQUES, Attenuants.

LEPTOPHONIA, Oxyphonia.

LEPTOTHRIX, Leptotrichus.

LEPTOTRICHUS, *Leptotrichis*, from λεπτος, 'fine,' and θριξ, 'hair.' One who has fine hair.

LEPTOTROPHIA, *Microtroph'ia*, *Microtroph'ia*, from λεπτος, 'light,' and τροφη, 'nourishment.' Light nutrition.

LEPTYNSIS, Emaciation.

LEPTYNTICA, Attenuants.

LEPTYSMOS, Emaciation.

LEREMA, see Dementia.

LERESIS, see Dementia.

LERUS, Delirium, see Dementia.

LE'SION, *Læsio*, from læsus, 'hurt,' 'injured.' Derangement, disorder; any morbid change, either in the exercise of functions or in the texture of organs. *Organic lesion* is synonymous with *organic disease*.

LESSIVE, Lixivium.

LESSIVE DES SAVONNIERS, Liquor

potasse. Also, a solution of caustic soda in water, containing about 3 parts of soda to 8 of water.

LESSIVE DE TARTRE, Liquor potasse subcarbonatis.

LETALITAS, Mortality.

LETHALIS, Lethiferous, Mortal.

LETHALITAS, Mortality.

LETHARGIC, *Lethargicus*, *Veterno'sus*, (F.) *Léthargique*. Relating to lethargy; affected with lethargy.

LETHARGIQUE, Lethargic.

LETH'ARGY, *Lethar'gia*, *Lethar'gus*, *Carus lethargus*, *Veter'nus*, *Oblio'io iners*, from ληθη, 'oblivion,' and αργια, 'idleness.' A constant state of stupor from which it is almost impossible to arouse the individual; and, if aroused, he speedily relapses into his former condition.

LE'THEON, from ληθη, 'oblivion.' A name given by some to sulphuric ether, when inhaled as an anæsthetic agent.

LETHIFEROUS, *Léthifer*, *Letho'lis*, *Léthif'icus*, *Mort'ifer*, from ληθη, 'death,' and φεγε, 'I bear.' Death-bearing; deadly.

LETHUM, Death.

LETTUCE, Lactuca—l. Indian, see Calumba—l. Strong-scented, Lactuca virosa—l. Wild, Lactuca elongata.

LETUM, Death.

LEUCADES, see Sclerotic.

LEUCÆTHIOPIA, see Albino.

LEUCÆTHIOPS, Albino.

LEUCANIA, Laucania.

LEUCANTHEMUM, *Anthemis nobilis*, *Matricaria chamomilla*—l. *Vulgare*, *Chrysanthemum leucanthemum*.

LEUCE, Lepra (of the Jews.)

LEUCELECTRUM, Succinum (album.)

LEUCITIS, Sclerotitis.

LEUCODENDRON, *Melaleuca cajapute*.

LEUCENUS, see Wine.

LEUCOIUM, *Lunaria rediviva*—l. *Luteum*, *Cheiranthus cheiri*.

LEUCOMA, from λευκος, 'white.' *Oculo'rum albu'go*, *Leucoma*, *Leuco'sis*, *Albu'go*, *Al'bulas*, *Ceratoleuco'ma*, *Ephal'otes*. *Leucoma* and *Albu'go* are often used synonymously to denote a white opacity of the cornea. Both are essentially different from nebula of the cornea; nebula being usually the result of chronic ophthalmia and an effusion of a milky serum into the texture of the delicate continuation of the conjunctiva over the cornea;—the others are the result of violent, acute ophthalmia. In this state, a thick, coagulable lymph is extravasated from the arteries, sometimes superficially, at other times deeply into the substance of the cornea. On other occasions, the disease consists of a firm, callous cicatrix on this membrane,—the effect of a wound or ulcer with loss of substance. The affection is more difficult of cure in proportion to its duration and to the age of the individual; the activity of the absorbents being greater in youth. If inflammation still exist, antiphlogistics must be persevered in, and, afterwards, gentle stimulants be used to excite absorption; along with the internal use of mercury or iodine.

LEUCOMA, Albumen—l. *Margaritaceum*, see *Margaritaceus*.

LEUCOMMA, Leucoma.

LEUCOMERIA, Cutubuth.

LEUCONECROSIS, from λευκος, 'white,'

and *gangrenæ*, 'death.' A form of dry gangrene, —the opposite in appearance to anthraconecrosis.

LEUCONYMPHÆA, *Nymphæa alba*.

LEUCOPATHIA, see Albino, Chlorosis.

LEUCOPHAGIUM, *Blano-manger*.

LEUCOPHLEGMASIA, Leucophlegmatia

—1. Dolens puerperarum, Plegmatia dolens.

LEUCOPHLEGMATIA, *Leucophlegmasia*, *Hydrops leucophlegmatis*, *Tumescensitis pituitosa*, from λευκός, 'white,' and φλέγμα, 'phlegm.' A dropsical habit. Some writers use the word synonymously with *anasarca* and *adema*; others with *emphysema*.

LEUCOPHLEGMATIA ÆTHIOPUM, *Chthonophagia*.

LEUCOPIPER, Piper album.

LEUCOPYRIA, Hæctic fever.

LEUCORRHÆE, Leucorrhœa.

LEUCORRHŒA, *Fluor vel Fluor mulieris*, *Profluuium mulieris*, *Curvus matricis*, *Fluor matricis*, *Elytritis*, *Colositis*, *Colpitis*, *Distillatio uteri*, *Fluor alba*, *F. Vulvæ*, *Ulcus uteri*, *Catarhus genitium*, *Hysterorrhœa amosa*, *Catamenia alba*, *Menses albi*, *Menstrua alba*, *Menorrhœgia alba*, *Fluor mulieris non Gallicus*, *Blennorrhœa*, *Gonorrhœa benigna natha invertebra*, *Purgatio mulieris alba*, *Alba purgantia*, *Cachexia uterina*, *Rheuma uteri*, *Uteri Coryza*, *Medorrhœa feminarum insons*, *Blennorrhœa seu Blennorrhœgia genitium*, *Edo-blennorrhœa seu Madoblennorrhœa feminarum*; *The whites*; (F.) *Flours* ou *Fluors blanches*, *Portes blanches*, *Écoulement blanc*, *Catarhe utérine*, *Porte utérine blanche*, from λευκός, 'white,' and ροή, 'I flow.' A more or less abundant discharge of a white, yellowish, or greenish mucus; resulting from acute or chronic inflammation or from irritation of the membrane lining the genital organs of the female. *Vaginal Leucorrhœa* has been termed *Blennorrhœa seu Fluor albus vaginæ*, *Leucorrhœa*, *Medorrhœa vagina*, *Vaginitis*, *Elytrobennorrhœa*, *Colporrhœa*:—*Uterine Leucorrhœa* has received the names *Fluor albus uteri*, *Leucorrhœa seu Medorrhœa uteri*, *Metroblennorrhœa*, (F.) *Leucorrhœa utérine*, *Catarhe utérine*. It is often attended with pain and a sense of heaviness in the loins, abdomen and thighs; disordered digestive functions, &c., so that, at times, the health suffers largely, although there are few females, who are not occasionally subject to moderate leucorrhœa. Attention to the general health, change of air, keeping up a perspirable state of the surface by flannel worn next the skin, the horizontal posture, &c., do more than pharmaceutical agents; which are almost entirely confined to astringent injections. These may be employed, when the discharge is so great as to require them.

LEUCORRHŒA ANALIS, see Hæmorrhœis—1. Nabothi, see Parturition.

LEUCORRHŒIS, see Hæmorrhœis.

LEUCOSES; from λευκός, 'white.' In the nosology of M. Alibert, all the diseases of the lymphatic apparatus. The 7th family in his *Nosologie*. In that of Fuchs, it is a family of diseases, (G.) *Leukosom*, which includes the various forms of œmëmia.

LEUCOSSES, Leucoma, Paleness.

LEUK or LOCHE, MINERAL WATERS OF. Saline, chalybeate waters, about six leagues distant from Sion. They contain chloride of

sodium, with a little sulphate of magnesia; sulphate of lime, carbonate of magnesia, carbonic acid, and protoxide of iron.

LEVAÏN, Ferment.

LEVATOR ANGULI ORIS, *Abduens labiorum*, *Elevator labiorum communis*, *Caninus*, (F.) *Sus maxillo-labial*, *Petit sus-maxillo-labial* (Ch.), *Muscle canin*. A small, flat, long, quadrilateral muscle, which arises from the fossa canina, and is inserted at the commissure of the lips, where it is confounded with the triangularis. It raises the corner of the mouth, and draws it towards the ear.

LEVATOR ANI, *Levator magnus seu internus*, *Latus ani*, *Elevator ani*, *Sedem attollens*, (F.) *Pubio-coccygion annulaire*, *Sous pubio-coccygion* (Ch.), *Relèveur de l'anus*. A muscle, situate at the lower part of the pelvis. It is broad, flat, quadrilateral, and broader above than below. It represents a kind of membranous partition, which closes the outlet of the pelvis, and the upper concavity of which is opposed to that of the diaphragm. It is attached, above, to the posterior surface of the body of the pubis, to the upper part of the obturator foramen, and to the spine of the ischium; and is inserted into the coccyx, into an aponeurotic line common to it and its fellow, and into the lateral parts of the rectum. This muscle supports the rectum; raises it, and carries it upwards during the evacuation of the excrement. It can, also, compress the bladder and vesiculae seminales, and thus favour the expulsion of the urine and sperm.

LEVATOR ANI PARVUS, *Transversus perinæi*—1. *Auris*, *Attollens aurem*—1. *Coccygis*, *Coccygeus*—1. *Menti*, *Levator labii inferioris*—1. *Oculi*, *Rectus superior oculi*—1. *Proprius scapulae*, *L. scapulae*.

LEVATOR LABII INFERIORIS, *Levator menti*, *Elevator labii inferioris*, *Incisivus inferior*, *Levator labii inferioris proprius*, *Musculus penicillatus*, (F.) *Houppis du menton*, *Relèveur de la lèvre inférieure*, *Relèveur du menton*. A portion of the *mento-labial* of Chaussier. A small muscle situate before the symphysis menti. It is thick, conical; and attached by its apex to a fessette at the side of the symphysis in the inferior maxillary bone. Its fibres proceed diverging and vanishing in the manner of a *rust*, (F.) *Houppis*, on the skin of the chin. This muscle raises the chin, and pushes upwards the lower lip.

LEVATOR LABII SUPERIORIS ALIQUO NASI, *Incisivus lateralis et pyramidalis*, (F.) *Grand sus-maxillo-labial*, (Ch.), *Elevateur commun de l'aile du nez et de la lèvre supérieure*. This muscle is a fleshy, thin, triangular bundle, situate at the sides of the nose. It arises from the ascending process of the superior maxillary bone: thence its fibres descend in a diverging manner, a part being inserted into the ala of the nose, and a part losing themselves in the upper lip. This muscle raises the upper lip and ala nasi, which it draws a little outwards.

LEVATOR LABII SUPERIORIS PROPRIUS, *Musculus incisivus*, *Elevator labii superioris proprius*, (F.) *Moyen sus-maxillo-labial*, (Ch.), *Orbito-maxillo-labial*. This thin, flat, quadrilateral muscle is situate at the middle and inner part of the face. It arises from the os maxilla and the os maxillare superius, and is inserted into the

upper lip, which it raises, at the same time carrying it a little outwards.

**LEVATOR PALATI**, *Levator Palati Mollis*, *Petroalpingo-staphylinus*, *Salpingo Staphylinus internus*, *Salpingo-staphylinus*, *Pterigo-staphylinus externus*, *Spheno-staphylinus*, *Spheno-palatinus*, *Peristaphylinus internus superior*, *Péto-staphylin*, (Ch.) This muscle is long, narrow and almost round above; broader and flatter inferiorly. It arises from the lower surface of the *pars petrosa*; from the cartilage of the Eustachian tube; and is inserted into the substance of the velum palati. Its use is to raise the velum palati.

**LEVATOR PALPEBRÆ SUPERIORIS**, *Palpebra superioris primus*, *Apartor Oculi*, *Aperiens Palpebrarum rectus*, *Reclisor palpebrarum*, (F.) *Orbito-palpebralis* (Ch.), *Orbito-sus-palpebralis*, *Élévateur de la paupière supérieure*. A long, small, thin muscle, situate at the upper part of the orbital cavity. By its posterior extremity it is inserted into the little ala of the sphenoid bone, immediately in front of the foramen opticum, and, by its anterior extremity, which is expanded, it terminates at the upper margin of the tarsal cartilage of the eyelid. This muscle raises the upper eyelid; draws it backwards, and sinks it in the orbit.

**LEVATOR PROSTATÆ**, (F.) *Relouveur de la prostate*. Santorini has given this name to the anterior fibres of the levator ani, which embrace the prostate.

**LEVATOR SCAPULÆ**, *Elevator Scapulæ*, *Elevator seu Musculus Patientia*, *Angularis vulgo Levator pro'prius*,—(F.) *Trachelo-scapularis* (Ch.) *Angulaire de l'omoplate*, *Relouveur de l'omoplate*. This muscle is so called, because it is attached to the upper and internal angle of the scapula. It is situate at the posterior and lateral part of the neck, and at the upper part of the back. It is long, flat, and broader above than below. In this latter direction, it is inserted into the superior internal angle of the scapula; and, in the former, into the tops of the transverse processes of the first four cervical vertebra. It depresses the prominence of the shoulder, by raising the posterior angle of the scapula, on which it impresses a kind of rotary motion. It can, also, draw the head to one side.

**LEVATOR URETHRÆ**, (F.) *Relouveur de l'Urethre*. Santorini describes under this name a portion of the transversus perinei muscle.

**LEVATORES COSTARUM**, *Supracostales*.  
**LEVEN**, Ferment.

**LEVER**, from *levars*, 'to lift up.' *Vectis*, *Mochlus*, *Porrectum*. An inflexible rod, moving round a fixed point, and used for moving bodies, bearing burdens, or raising them. The point on which the lever moves is called the *Fulcrum*, *Hypomochlion*. The force which moves the lever is called the *power*; and the weight to be moved, the *resistance*. There are three kinds of levers. A *lever of the first kind* has the *fulcrum* between the *power* and *resistance*. A *lever of the second kind* has the *resistance* between the *fulcrum* and *power*; whilst a *lever of the third kind* has the *power* between the *fulcrum* and *resistance*. In the locomotive system of the human body, we have examples of all the three kinds. The bones represent *levers*; the muscles of locomotion are *powers*; the weight of parts to be moved constitutes the *resistance*. The *fulcra* are, at times, the joints; at others,

the ground, &c. The head moves on the neck as a lever of the first kind; the first cervical vertebra forming the fulcrum. We rise on tip-toe by a lever of the second kind, the fulcrum being the ground under the toes; and we have examples of a lever of the third kind in the flexion of the fore-arm on the arm, in the elevation of the arm, &c.

**LEVER**, *Hystero-mochlium*, *Mochlious*, *Vectis obstetricius*, *Vectis*, (F.) *Levier*, is an instrument, curved at the extremity, and having a fenestra. It is used to assist the extraction of the child's head, when instrumental aid is necessary. Levers are, also, used by the dentist for extracting stumps, &c. The *Lievier de l'Écluse*, *Langus de Carpe*, *Trivelin* or *Punch*, is employed for extracting the molar teeth.

**LEVIATHAN PENIS**, *Priapus Ceti*, *Baleenas*. The penis of the whale. This singular medicine was, at one time, given, in powder, in cases of dysentery and leucorrhœa.

**LEVIER**, Lever—*l. de l'Écluse*, see Lever.

**LEVIGATION**, *Lavigatio*, from *lavigare*, (*lavis*, 'smooth,') 'to polish.' *Porphyzation*. An operation, by which bodies are reduced to very fine powder. It is performed by putting substances, already pulverized, into water; the coarser parts are not long in being deposited, whilst the finer molecules remain suspended in the water. The liquor is decanted into another vessel, and suffered to remain at rest, until the fine particles are collected at the bottom. The fluid part is then separated by decantation.

**LEVISTICUM**, *Ligusticum levisticum*.

**LÈVRE**, Lip.

**LÈVRES GRANDES**, *Labia pudendi*—*l. Petites*, *Nymphæ*—*l. de la Vulve*, *Labia pudendi*.

**LEVURE**, Yest—*l. de la Bière*, Yest.

**LEXIPHARMACUS**, *Alexipharmic*.

**LEXIPYRETICUS**, *Febrifuge*.

**LEY**, *Lixivium*, Lye—*l. Soap*, *Liquor potassæ*.

**LÉZARD**, Lizard.

**LIA TRIS SPICATA**, *Gayfeather*, *Button snake's root*. An indigenous plant, growing in meadows and moist grounds in the middle and southern states. Its beautiful purple compound flowers are in a spike. They appear in August. The root has been considered diuretic.

**LIA TRIS SCARIO'SA** and **L. SQUARRO'SA**, *Throstwort*, *Sow-wort*, *Backache root*, *Devilsbite*, *Blazing star*, *Prairie pines*, *Rough root*, are called, from their reputed powers in bites from the rattlesnake, *Rattlesnake's master*. The roots, bruised, are applied to the wound, and the decoction, in milk, is given internally.

**LIBANOTIS CORONARIA**, *Rosmarinus*.

**LIBANOTUS**, see *Juniperus lycia*.

**LIBANUS**, *Juniperus lycia*.

**LIBER PHARMACEÛTICUS**, *Dispensatorium*.

**LIBIDINIS SEDES**, *Clitoris*.

**LIBIDINOSUS**, *Libidinosus*.

**LIBIDINOUS**, *Libidinosus*; *Lascivus*, *Venerivagus*; from *libido*, 'lust.' Lewd; lustful.

**LIBIDO**. Desire, necessity. Authors speak of *Libido urinæ*, *Libido intestini*. Some employ it synonymously with *Prurigo*; others, with *Salacitas*, *Lubi'do*, *Himerus*.

**LIBOS**, from *λεβος*, 'I distil.' A defluxion from the eyes.—Galen.

**LIBRA**, Pound.

LICHANOS, Index, see Digitus.

LICHEN, ΛΙΧΗΨ or ΛΙΧΨ, (pronounced *Lé'ken*.) *Exor'mia Lichen*, *Lichen*, *Serpi'go*, *Volat'ica*, *Pap'ula*, *P. sicca*, *Peti'go*, *Pus'tula sicca*, *Scab'ies sicca*, *S. a'gr'ia*, *Licho'n'asis adultor'um*, *L'ichenous rash*, (F.) *Gale s'che*, *Dartre furfuracée volante*, *Poussis*. The cutaneous affection, described under this name by the Greek writers, is not clearly defined. Some have believed it to be the *Impetigo*, but this is doubtful. The name is, now, generally applied to a diffuse eruption of red pimples, accompanied by a troublesome sense of tingling or pricking. Drs. Willan and Bate-man define it,—“an extensive eruption of papulæ affecting adults, connected with internal disorder, usually terminating in scurf; recurrent, not contagious.” One of their varieties, however, the *Lichen Tropicus*, does not accord well with this definition; for it affects children as well as adults, and is unconnected with internal disorder.

*Lichen A'gr'ius*, *Exor'mia Lichen ferus*, *Lichen agr'ius*, *Pap'ula a'gr'ia*, is distinguished by pimples in clusters or patches, surrounded by a red halo; the cuticle growing gradually harsh, thickened, and chappy, often preceded by general irritation. In addition to antiphlogistics, a cooling ointment may be used, to allay itching.

*Lichen Circumscriptus* is characterized by clusters or patches of papulæ, having a well defined margin, and an irregularly circular form: continuing for six or eight weeks. These varieties require but little medicinal treatment. The antiphlogistic plan is all that is necessary.

*Lichen Liv'idus*. The papulæ have a dark red or livid hue, without any fever. The papulæ are more permanent in this variety. It requires the mineral acids and bark.

*Lichen Pila'ris*, *Exor'mia Lichen pilaris*, is merely a modification of the preceding; the papulæ appearing at the roots of the hair.

*Lichen Simplex*, *Exor'mia Lichen simplex*, consists of an eruption of red papulæ, appearing first on the face or arms, and afterwards extending over the body; preceded for a few days by slight febrile irritation which usually ceases when the eruption appears,—with an unpleasant sense of tingling during the night. It generally dies away in ten days or a fortnight.

*Lichen Tropicus*, *Exor'mia Lichen tropicus*, *Exer'ma*, *Es'sera*, (?) *Sudam'ina*, (?) *Prickly Heat*, *Summer Rash*. The pimples are bright red, and of the size of a small pin's head; with heat, itching, and pricking, as if by needles. It is local; produced by excessive heat; and disappears when the weather becomes cooler, or the individual is inured to the climate.

*Lichen Urticatus*, *Exor'mia Lichen urticatus*, is another variety. The *Nettle Lichen* consists of papulæ, accompanied by wheals like those of nettle rash.

LICHEN ARBORUM, *Lichen pulmonarius*—*J. Blanc de Neige*, *L. caninus*—*J. Boit'ier*, *L. pyxidatus*.

LICHEN CANINUS, *Lichen cinereus terrestris*, *Muscus caninus*, *Phys'cia nivalis*, *Peltig'era canina*, Ash-coloured Ground Liverwort, (F.) *Lichen contre-rage*, *Lichen blanc de neige*. This cryptogamous plant was, for a long time, considered capable of preventing and curing *Rabies canina*. It has, also, been used in mania and in spasmodic asthma.

LICHEN CINEREUS TERRESTRIS, *L. caninus*—*J. Carrageen*, *Fucus crispus*—*J. Cocciferus*, *L. pyxidatus*—*J. Conus Rage*, *L. caninus*—*J. Entonnoir*, *L. pyxidatus*.

LICHEN ISLANDICUS, *Muscus Islandicus*, *M. catharticus*, *Cladonia Islandica*, *Phys'cia Islandica*, *Cetraria Islandica*; *Parmelia Islandica*, *Island Lichen* or *Liverwort* or *Moss*, (F.) *Lichen d'Islande*. This plant is inodorous, with a bitter and mucilaginous taste. It is esteemed to be tonic, demulcent, and nutrient. Dose, ℥j to ℥iv, being first steeped in water holding in solution some carbonate of potass to extract the bitter, and then boiled in milk. A bitter principle has been extracted from it, termed *Cetrarin*, which has been given in intermittents.

LICHEN PLICATUS, *Muscus arbo'reus* seu *Quercini Herba*. This plant is applied, by the Laplanders, as an astringent, to bleeding vessels; and to parts which are excoriated after long journeys.

LICHEN PULMONARIUS, *Muscus pulmonarius quercinus*, *Pulmonaria arbo'rea*, *Lobaria pulmonaria*, *Lichen arborum*, *Suaeda pulmonaria*, *Oak Lungs*, *Trees Lungwort*, *Hazel Crostles*, (F.) *Lichen pulmonaire*. This plant is sub-astringent, and rather acid. It was once in high repute for curing diseases of the lungs.

LICHEN PYXIDATUS, *Muscus Pyxidatus*, *Scyphophorus pyxidatus*, *Musculus pyxidatus terrestris*, *Lichen pyxidatus major*, *Lichen cocciferus*, *Herba Ignis*, *Cup Moss*, (F.) *Lichen entonnoir*, *Lichen Boit'ier*, *L. Pyxide*. This plant is sub-astringent, and has been used in decoction in hooping-cough.

LICHEN ROCCEL'IA, *Rocella*, *Litmus*, *Laemus tinctorius*, *Orchill*, *Candy Archell*, *Chinney Weed*, *Herb Archell*, (F.) *Orosille*. The chief use of this plant is as a blue dye. It has been employed to allay cough in phthisis, &c.

LICHEN SAXATILIS, *Muscus Crani humani*, *Us'nea*. This moss, when found growing on a human skull, was formerly in high estimation against head affections, &c.

LICHEN STELLATUM, *Marchantia polymorpha*.

LICHENIASIS ADULTORUM, *Lichen*—*J. Strophulus*, *Strophulus*.

LIEBERKUEHN'S GLANDS or FOLLICLES, so called from their first describer, are fine, capillary, blind sacs, the openings of which are from 1-20th to 1-30th of a line in diameter, so closely placed over the whole of the small intestine as to give the mucous membrane a general sieve-like or perforated appearance. They secrete the *succus entericus*.

LIEBERSCHÉ AUSZEHRUNG'S KRAUTER, see *Galeopsis grandiflora*—*J. Brustkrauter*, see *Galeopsis grandiflora*.

LIEGE, Suber.

LIEN (F.), *Vin'culum*. A band, strap or garter, used in certain operations; as to tie patients during the operation of lithotomy: to fix the apparatus in fracture, &c. Also, the spleen.

LIEN ACCESSORIUS, *Lienculus*—*J. Succenturiatus*, *Lienculus*.

LIEN'CVLUS, diminutive of *lien*, ‘spleen.’ *Lien succenturiatus* seu *accessorius*. A supernumerary spleen.

LIENOSUS, Splenic.

LIENTERY, *Lienteria*, from λΙΗΨ, ‘smooth,’ and εντερον, ‘intestine.’ *La'vitas* seu *Lax'itas intestinorum*, *Diarrhœa Lienteria*, *Fluvus*

*Lidnter'icus, Chymorra'h'a seu Las'itas ingestorum, Bromatoe'crisis, Diarrha'a dyspep'tica, D. cum apopsid'a, D. Ingestorum, Slip'poriness of the Guts.* Frequent liquid evacuations, the food only half digested. This condition is always symptomatic of great irritation in the intestinal canal; the sensibility of which is so much augmented that it cannot bear the sojourn of the food in it.

**LIERRE**, *Hedera helix*—*l. Terrestris*, *Glecoma hederacea*.

**LIFE**, Sax. lif, lyf, *Vita, Bios, Bioll, Zoë, Pneuma, Spir'itus*, (F.) *Vie*. The state of organized beings, during which, owing to the union of an unknown principle with matter, they are capable of performing functions different from those that regulate other natural bodies; all of which functions, however numerous and diversified, work to one end. Life has only a limited duration; beyond which,—the organic functions ceasing to be executed,—the body is given up to the agency of chemical affinity. Hence Bichat has defined life to be—the aggregate of the functions which resist death. On account of the difference that exists among the vital functions, he has applied the term *Organic Life* to the functions inservient to composition and decomposition;—as digestion, respiration, circulation, calorification, absorption, secretion, and nutrition; and *Animal Life*, to the functions which connect man and animals with external bodies; as the understanding, sensations, locomotion, and voice.

**LIFE EVERLASTING**, *Gnaphalium margaritaceum*—*l. Everlasting, sweet-scented, Gnaphalium polycephalum*.

**LIFE'S BLOOD**, Cillo.

**LIGAMENT**, *Ligamentum*; from *ligars*, "to bind;" *Dnsmos, Synodes mos, Colliga'men, Copula*. A name given to fibrous structures, which serve to unite bones, and to form articulations; hence the division into *interosseous* and *articular* ligaments. They are of a white, close texture; are but little extensible, and difficult to break. The name *ligament* has, also, been given to any membranous fold, which retains an organ in its situation.

**TABLE OF THE PRINCIPAL LIGAMENTS.**

- |  |   |
|--|---|
| 1. <i>Of the Lower Jaw.</i>  | Capular ligament.<br>Suspensory ligament of the stylo-glossus.<br>Lateral ligament.<br>Two capsular ligaments between atlas and head.   |
| 2. <i>Connecting the Head with the first and second Vertebra, and these with each other.</i> | Circular ligament.<br>Two capsular between atlas and axis.<br>Perpendicular ligament.<br>Two lateral or moderator ligaments.<br>Transverse ligament and its appendices.<br>Anterior common.<br>Crucial intervertebral.<br>Ligaments running from the edge of the bony arch and spinous process of one vertebra to that of the next. |
| 3. <i>Of the other Vertebrae.</i>  | Interspinous ligament.<br>Ligamentum nuchae.<br>Intertransverse.<br>Capsular.<br>Posterior or internal common.  |

4. *Of the Ribs, Sternum, &c.*

- Capular of the heads of ribs.
- Capular of the tubercles.
- Ligamenta transversaria interna.
- Ligamenta transversaria externa.
- Ligamenta cervicis costarum externa.
- Ligamentous fibres running from the margins of the extremities of the ribs to the corresponding cartilages.
- Radiated ligaments from cartilage of ribs to the sternum.
- Capular ligaments of the cartilages of the ribs.
- Proper membrane of sternum.
- L. of cartilago-eniformis.
- Tendinous expansions over the intercostales, &c.

5. *Of the Pelvis.*

- Two transverse,—one superior, one inferior.
- Ilio-sacral.
- Capular of the sacro-iliac synchondrosia.
- Two sacro ischiatic, — posterior and anterior, with the superior and inferior appendices.
- Longitudinal of os coccygia.
- Inguinal ligament.
- Capular of symphysis pubis.
- Ligament of foramen thyroideum.

6. *Of the Clavicle.*

- Radiated ligament.
- Capular.
- Interclavicular.
- Ligamentum rhomboideum.
- Claviculo-acromial.
- Conoid.
- Trapezoid.

7. *Of the Scapula.*

- Anterior triangular.
- Proper posterior.

8. *Of the Shoulder Joint.*

- Capular.

9. *Of the Elbow Joint.*

- Capular.
- Brachio-ulnar.
- Brachio-radial.
- Coronary of the radius.
- Anterior and posterior accessory.
- Intermuscular of the os humeri.

10. *Carpal Extremity of Radius and Ulna, and between those bones.*

- Interosseous ligament.
- Oblique or chorda transversalis cubiti.
- Capular.

11. *Between Fore-arm and Wrist.*

- Capular.
- Two lateral.
- Mucous.

12. *Of Carpus.*

- Annular.
- Capular.
- Short ligaments, — oblique, transverse, capsular, and proper.

13. *Between Carpal and Metacarpal Bones.*

- Articular lateral.
- Straight, perpendicular, &c.

14. *Between the extremities of the Metacarpal bones.*

- Interosseous, at the bases and heads,—dorsal, lateral, palmar.

15. *At the base of the Metacarpal bone of the Thumb, and at the first joint of the Fingers.* } Capsular.  
Lateral.
16. *Of the first and second joints of the Thumb, and second and third joints of the Fingers.* } Capsular.  
Lateral.
17. *Retaining the Tendons of the Muscles of the Hand and Fingers in situ.* } Annular.  
Vaginal or flexor tendons.  
Vaginal or crucial of the phalanges.  
Accessory of the flexor tendons.  
Posterior annular.  
Vaginal of extensors.  
Transverse of extensors.  
Capsular and accessory slips.  
Round or teres ligament.  
Cartilaginous ligament.  
Double cartilaginous ligament.  
Ligamenta mucosa.  
Lateral,—internal and external.  
External short lateral ligament.  
Posterior ligament.  
Ligament of the patella.
18. *Connecting the Os Femoris with the Os innominatum.* } Capsular.  
Ligamentum alare,—majus et minus.  
Ligamentum mucosum.  
Two crucial,—anterior and posterior.  
Transverse.  
Capsular.
19. *Of the Knee-Joint.* } Interosseous.  
Anterior superior.  
Posterior superior.  
Anterior ligament of the fibula.  
Posterior of fibula.  
Deltoides of tibia.  
Capsular.  
Capsular.  
Short ligaments.  
Capsular, broad superior, and lateral ligaments, connecting astragalus and naviculare.  
Superior, lateral, and inferior, fixing os calcis to os cuboïdes.  
Long, oblique, and rhomboid, forming the inferior ligaments.
20. *Connecting Fibula and Tibia.* } Superior superficial, interosseous and inferior transverse ligaments, fixing the os naviculare and os cuboïdes.  
Superior lateral, and plantar, which fix the os naviculare and cuneiform  
Superior superficial and plantar, connecting the os cuboïdes, and os cuneiforme externum.  
Dorsal and plantar, uniting the ossa cuneiformia.  
The proper capsular of each bone.
21. *Connecting the Tarsal with the Leg Bones.* } Superior superficial, interosseous and inferior transverse ligaments, fixing the os naviculare and os cuboïdes.  
Superior lateral, and plantar, which fix the os naviculare and cuneiform  
Superior superficial and plantar, connecting the os cuboïdes, and os cuneiforme externum.  
Dorsal and plantar, uniting the ossa cuneiformia.  
The proper capsular of each bone.
22. *Ligaments of the Tarsus.* } Capsular.  
Lateral.
23. *Ligaments between Tarsus and Metatarsus.* } Capsular.  
Dorsal, plantar, lateral, straight, oblique, and transverse.
24. *Connecting the Metatarsal Bones.* } Dorsal, plantar, and lateral, connecting the metatarsal bones.  
Transverse ligaments.
25. *Of the Phalanges of the Toes.* } Capsular.  
Lateral.  
Annular.  
Vaginal of the tendons of the peronei.  
Laciniated.
26. *Retaining the Tendons of the Muscles of the Foot and Toes in situ.* } Vaginal of the tendon of the flexor longus pollicis.  
Vaginal and crucial of the tendons of the flexors of the toes.  
Accessory of the flexor tendons of the toes.  
Transverse of the extensor tendons.

LIGAMENT, ANTERIOR, OF THE BLADDER. A name given by the older anatomists to a portion of the superior pelvic aponeurosis, which becomes attached to the front of the neck of the bladder.

LIGAMENT ARTÉRIEL, Arterial ligament—1. Cervical suprascapular, see Suprascapular ligaments—1. *Ciliaire*, Ciliary ligament.

LIGAMENT, CORONARY, OF THE LIVER, is a reflection formed by the peritoneum, between the posterior margin of the liver, and the lower surface of the diaphragm. See Falx.

LIGAMENT, COSTO-XIPHOID, Xiphoid ligament—1. Dorsal-lumbo-suprascapular, see Suprascapular ligaments—1. of Fallopius, Crural arch—1. Gimbernat's, see Gimbernat's ligament—1. Gloss-epiglottic, see Glossepiglottic—1. Infra-pubian, Triangular ligament—1. *Interépineux*, Interspinous ligament—1. Palmar inferior, Metacarpal ligament—1. Poupert's, Crural arch—1. *Rond*, Ligamentum teres—1. *Sur-épineux cervical*, see Supra-spinosa ligaments—1. *Sur-épineux dorso-lombaire*, see Suprascapular ligaments.

LIGAMENT, SUSPENSORY, OF THE LIVER, *Ligamentum latum, Suspensorium Hepatis*, is a large triangular reflection, formed by the peritoneum between the superior surface of the liver and the diaphragm. It is constituted of two layers, and is continuous, below, with another reflection, called the *Falx of the Umbilical Vein*. See Falx.

LIGAMENTA INTERLOBULARIA PULMONUM, Interlobular tissue—1. Intervertebralia, Intervertebral cartilages—1. Lata uteri, see Uterus—1. Rotunda uteri, Round ligaments of the uterus.

LIGAMENTOSUS, Ligamentous.

LIGAMENTOUS, *Ligamento'sus*. Having the character, or relating to, a ligament.

LIGAMENTS, BROAD, OF THE UTERUS, see Uterus—1. *Croisés*, Crucial ligaments—1. *Cruciformes*, Crucial ligaments—1. *Jaunes*, Yellow ligaments—1. *Larges de l'utérus*, see Uterus—1. of the Larynx, inferior, Thyreo-arytenoid ligaments—1. *Ronds de l'utérus*, Round ligaments of the uterus.

LIGAMENTUM IRIDIS, Ciliary ligament—1. Nucha, Cervical ligament—1. Suspensorium hepatis, Suspensory ligament of the liver—1. Suspensorium testis, Gubernaculum testis.

**LIGATIO, Fascia, Ligature**—1. Linguae, Aphonia.

**LIGATION, see Ligature.**

**LIGATURA, Ligature, Fascia**—1. Glandis, Phimosis.

**LIGATURE, Ligatura, Ligatio, Alligatura, Deligatio, Vincitura, Fascia, Epid'osis, from ligo, 'I bind.'** This word has various acceptations. It means, 1. The thread with which an artery or vein is tied, to prevent or arrest hemorrhage. 2. The cord, or thread, or wire, used for removing tumours, &c. 3. The bandage used for phlebotomy. *Ligature* is, also, sometimes applied to the act of tying an artery or considerable vessel—*Ligation*. When the artery alone is tied, the ligature is said to be *immediate*; when any of the surrounding parts are included, it is said to be *mediate*. The ligature occasions obliteration or adhesion of the arterial parietes, by cutting through the middle and internal coats; the adhesion being favoured by the formation of a coagulum, which acts, in some degree, as a barrier against the impulse of the blood, and subsequently disappears by absorption.

**LIGHT, Sax. leohc, lihc, (G.) Licht—Lux, Lumen, Phos, (F.) Lumière.** An extremely rare fluid, diffused over the universe; emanating from the sun and fixed stars; traversing more than four millions of leagues in a minute; passing through transparent bodies, which refract it according to their density and combustibility; and arrested by opaque bodies, by which it is reflected at an angle equal to the angle of incidence. It is the cause of colour in all bodies; being entirely reflected by white surfaces and absorbed by black. It is decomposed in passing through a transparent prism into seven rays—red, orange, yellow, green, blue, purple, and violet.

Light acts upon the body as a gentle and salutary stimulus. It urges to exercise, whilst privation of it induces sleep and inactivity, and disposes to obesity. Hence it is, that, in rural economy, animals, which are undergoing the process of fattening, are kept in obscurity. When vegetables are deprived of light, their nutrition is interfered with, and they become *stiolated*. To a certain extent this applies to animals, and there is every reason to believe, that want of light prevents the due development of organized bodies. It has been found, that when tadpoles were deprived of light, they did not undergo the perfect metamorphosis into the frog, but that monstrosities from arrest of development were induced.

**LIGHTNING, Astrape.**

**LIGHTS, RISING OF THE, Cynanche trachealis.**

**LIGNE, Line**—1. *Aspe*, Linea aspera—1. *Blanca*, Linea alba—1. *Courbe*, Curved line—1. *Médiane de l'abdomen*, Linea alba—1. *Sous-trochantérienne*, Linea aspera.

**LIGNIN, from Lignum, 'wood.'** Ligneous or woody fibre; the fibrous structure of vegetable substances.

**LIGNUM ALOES, Agallochum**—1. *Aspalathi*, Agallochum—1. *Benedictum*, Guaiacum—1. *Brasilianum rubrum*, Hæmatoxyloa campechianum—1. *Cæruleum*, Hæmatoxyloa campechianum—1. *Campechense*, Hæmatoxyloa campechianum—1. *Campechianum*, Hæmatoxyloa campechianum—1. *Campechanum*, Hæmatoxy-

loa campechianum—1. *Colubrinum*, see Strychnos—1. *Febrifugum*, Quassia—1. *Hæmatoxyli*, Hæmatoxyloa campechianum—1. *Indicum*, Guaiacum, Hæmatoxyloa campechianum—1. *Infelix*, Sambucus—1. *Nephriticum*, Guilandina Moringa (the wood)—1. *Pavana*, Croton tiglium—1. *Quassia*, see Quassia—1. *Sanctum*, Guaiacum—1. *Sandalinum*, see Pterocarpus santalinus—1. *Sappan*, Hæmatoxyloa campechianum—1. *Serpentum*, Ophioxylum serpentinum—1. *Vitæ*, Guaiacum.

**LIGNYODES, Fuliginous.**

**LIGNYS, Fuligo.**

**LIGULA, Lin'gula.** The clavicle, also, the glottis and epiglottis. A measure containing 3 drachms and a scruple, or about half an ounce. Also, a species of bandage or ligature.—Scribonius.

**LIGUSTICUM FENICULUM, Anethum.**

**LIGUSTICUM LEVISITICUM, from Λιγυστεικος, appertaining to Liguria. Levisiticum, Laserpitium Germanicum, Ligusticum, Lovage, (F.) Livèche, Ache des montagnes.** The properties of this plant are said to be stimulant, carminative, emmenagogue, &c.

**LIGUSTICUM PODAGRA'RIA, Podagra'ria, Ego-podium podagraria, Ses'eli egopodium, Angelica sylvestris, Gout weed.** A British plant, once considered useful in cases of gout.

**LIGUSTRUM ÆGYPTIACUM, Lawsonia inermis.**

**LIGUSTRUM VULGARÈ, Privet, Privy, (F.) Troène.** A shrub, which grows wild both in Europe and the United States, usually in hedges. The leaves are astringent and bitter; and the flowers, which are snow white, and of an agreeable odour, have been employed in decoction in sore throat, and ulcerous stomatitis. The berries are said to be cathartic.

**LIGYSMA, Distortion.**

**LILAC, COMMON, Syringa vulgaris.**

**LILI, Liliium Paracelsi.**

**LILIA'GO.** Dim. of *Lilium*, the lily; *Spyderwort; Liliastrum*. This plant was formerly said to be alexipharmic and carminative.

**LILIASTRUM, Liliago.**

**LILIUM CANDIDUM, L. album, Crinon.** The white lily. (F.) *Lis blanc*. The infusion of the flowers of the lily in olive oil is emollient, and often applied externally, under the name of *Lily oil*, (F.) *Huile de lis*. The scales of the bulb, roasted, are sometimes employed as maturatives.

**LILIUM CONVALLIUM, Convallaria maialis.**

**LILIUM PARACELSI, Tinctura Metallorum, Lili.** A medicine employed by Paracelsus. It was prepared by melting in a crucible four ounces of each of the following alloys: *Antimony and iron, antimony and tin, antimony and copper*, previously mixed with eighteen ounces of nitrate of potass and as much salt of tartar. The melted mass, when pulverized, was treated with rectified alcohol, which really dissolved only the potass set at liberty by the decomposition experienced by the nitre and salt of tartar. The *Lilium Paracelsi* was used as a cordial. It entered into the composition of the theriacal elixir, &c.

**LILY, GROUND, Trillium latifolium**—1. *May, Convallaria maialis*—1. *Pond, Nelumbium luteum*—1. *Pond, White, Nymphaea odorata*—1. *Toad, Nymphaea odorata*—1. of the Valley, *Convallaria maialis*—1. *Water, Little, Bra-*

senia hydropeltis—l. Water, Sweet, Nymphæa odorata—l. Water, sweet-scented, Nymphæa odorata—l. Water, white, Nymphæa alba—l. Water, yellow, Nymphæa lutea—l. White, Lilium candidum, Nelumbium luteum.

**LIMA, (CLIMATE OF.)** The climate of Peru does not appear to be favourable to the generation of consumption; and Lima would seem to be a good residence for the phthisical valetudinarian. Many have been benefited by a residence there; but when they have gone farther south, as to Chili, the effect, according to Dr. M. Burrough, has generally been fatal.

**LIMA DENTARIA, Scalprum dentarium.**

**LIMACIEN (F.),** from *limacon*, the cochlea of the ear. A branch of the acoustic or labyrinthic nerve sent to the cochlea.

**LIMACON, Cochlea Limax—l. Rampus dn,** see Cochlea.

**LIMACUM CORNUA, see Lachrymal puncta.**

**LIMANCHIA, Abstinence.**

**LIMATIO, from lima, 'a file.'** Filing: an operation employed by the dentist more especially to prevent immediate contact of the teeth with each other.

**LIMATURA FERRI, Ferri Limatura.**

**LIMAX, Helix, the Slug or Snail. (F.) Limaçon, Colimaçon, Escargot.** A syrup has been prepared from these animals, which has been given in phthisis, &c. The raw snails have also been taken in consumption. They have been used as food.

**LIMB, Membrum.**

**LIMBUS ALVEOLARIS, Alveolar border—l. Luteus retinae, see Foramen centrale—l. Posterior corporis striati, Tænia semicircularis.**

**LIME.** A fruit like a small lemon, the juice of which is strongly acid, and much used for making punch. It is, also, used in long voyages as an antiscorbutic, &c. It is a species of lemon, the fruit of *Citrus a'cida*.

**LIME, Calx—l. Carbonate of, Creta—l. Chloride of, Calcis chloridum—l. Chlorite of, Calcis chloridum—l. Chloruret of, Calcis chloridum—l. Hydrate of, see Calx—l. Hypochlorite of, Calcis chloridum—l. Muriate of, solution of, see Calcis murias—l. Oxymuriate of, Calcis chloridum—l. Slaked, see Calx—l. Sulphuret of, Calcis sulphuretum—l. Tree, Tilia—l. Water, Liqueur calcis—l. Water, compound, Liqueur calcis compositus.**

**LIMICUS, Hungry.**

**LIMITROPHES, see Trisplanchnic nerve.**

**LIMNE, Marsh.**

**LIMNE'MIC, Limnæ'mic, Limnæ'mic, Limnæ'micus, Limnæ'micus, from λιμνη, 'a marsh,' and αἷμα, 'blood.'** An epithet given to affections induced by paludal emanations; (F.) *Affectiones limnæmiquæ.*

**LIMOCTONIA, Abstinence. Abstinence to death. Death from hunger; from λιμός, 'hunger,' and κρονος, 'death.' Suicide by hunger.**

**LIMODES, Hungry.**

**LIMON, see Citrus medica.**

**LIMONADA, Lemonade.**

**LIMONADE, Lemonade—l. Gassoux, see Lemonade—l. Sèche, Lemonade, dry; see Citric acid.**

**LIMONIUM, Statice limonium—l. Malum, see Citrus medica.**

**LIMONUM BACCA, see Citrus medica.**

**LIMOS, λιμός, 'hunger.' Hence:**

**LIMOSIS, Stomach disease, Morbid appetitu.** A genus in the class *Celiaca*, order *Enterica*, of Good.

**LIMOSIS CARDIALGIA MORDENS, Cardialgia—l. Cardialgia sputatoria, Pyrosis—l. Dyspepsia, Dyspepsia—l. Expers, Anorexia—l. Expers protracta, Fasting—l. Flatus, Flatulence—l. Heliunom, Gluttony—l. Pica, Malacia.**

**LIMOTHERAPEIA, Nestitherapeia, Nestotherapeia, Nestiatri'a, Peinotherapeia, Curatio morbi per ins'diam, from λιμός, 'hunger,' and θεραπεία, 'treatment.' Hunger-cure. Cure by fasting.**

**LIMUS, Limos.**

**LIN, Linum usitatissimum—l. Graines de, see Linum usitatissimum—l. Purgatif, Linum catharticum.**

**LINAIRE, Antirrhinum linaria.**

**LINAMENTUM, Lintum.**

**LINARIA, Antirrhinum linaria—l. Vulgaris, Antirrhinum linaria.**

**LINCTUARIUM, Eclectos.**

**LINCTUS, Eclectos—l. Albus, Looch album—l. Amygdalinus, Looch album—l. ad Aphthas, Mel boracis—l. de Borace, Mel boracis—l. Communis, Looch album.**

**LINDEN TREE, Tilia.**

**LINE, Lin'ea, Gramme, (F.) Ligne.** Extent in length, considered without regard to breadth or thickness. As a measure, it means the 12th part of an inch.

**MEDIAN LINE OF THE BODY** is an imaginary line supposed to set out from the top of the head and to fall between the feet, so as to divide the body vertically in two equal and symmetrical parts.

**LINEA, Line.**

**LINEA ALBA, L. A. Abdom'inis, (F.) Ligne blanche, Ligne médiane de l'abdomen, (Ch.) Candid'ula abdom'inis lin'ea, Lin'ea contra'lis.** A tendinous, strong, and highly resisting cord; extending from the ensiform cartilage of the sternum to the symphysis pubis, with the umbilicus near its middle. The linea alba is formed by the decussation of the aponeurosis of the abdominal muscles; and its use is to limit the movement of the chest backwards; to prevent it from separating too far from the pelvis, and to furnish a fixed point for the muscles of the abdomen, in their contraction.

**LINEA ASPERA, (F.) Ligne ép'ra, Ragged ridge, Ligne sous-trochantérienne, (Ch.)** A rough projection at the posterior surface of the femur, which gives attachment to muscles.

**LINEA CANDIDULA ABDOMINIS, L. alba—l. Centralis, L. alba—l. Innominata, Ilio-pectinea Linea.**

**LINEÆ SEMILUNARES** are the lines, which bound the outer margin of the recti muscles of the abdomen. They are formed by the union of the abdominal tendons. The lines which cross these muscles are called *Lineæ transversæ.*

**LINEÆ TIBIÆ, An'guli tibi'æ.** Sharp lines on the tibia.

**LINEÆ TRANSVERSÆ, see L. semilunares.**

**LINÉAIRE, Linear.**

**LINEAMENT, Lineamen'tum, from linea, 'a line.'** A delicate trait observed on the countenance, which constitutes its special character, enables us to preserve its image, and is the cause of resemblance to others. *A feature.* Bonnet gave the name *Lineament* to the first

traces of organization in the embryo of man and animals.

**LINEAR**, *Linea'ris*, *Linea'rius*. Same etymon. (F.) *Lineaire*. Pathologists apply the epithet *linear* to fractures which are very narrow, and in which the fragments are scarcely separated.

**LINE'OLA**; a diminutive of *Linea*, 'a line.' A small line.

**LINE'OLÆ MAMMÆRUM**. The white lines on the breasts.

**LINGUA**, Tongue—*l. Bovis*, *Anchusa officinalis*—*l. Canina*, *Cynoglossum*—*l. Cervina*, *Asplenium scolopendrium*—*l. Exigua*, *Epiglottis*—*l. Prognosis ex*, *Glossomantia*—*l. Serpentina*, *Ophioglossum vulgatum*.

**LINGUÆ AVIS**, see *Fraxinus excelsior*—*l. Detentor*, *Glossocatochus*—*l. Exoncosis*, *Glossococcus*—*l. Scalpium*, *Curo-langue*.

**LIN'GUAL**, *Lingua'lis*, from *lingua*, 'the tongue.' Relating or belonging to the tongue.

**LINGUAL ARTERY**, *Arte'ria lingua'lis*, arises from the external carotid; and, after several tortuosities, reaches the base of the tongue, becomes horizontal, and, under the name *Ranina*, advances to the tip, where it anastomoses with its fellow. In its course, it gives off the *Dorsalis lingua* and *sublingual*.

**LINGUAL MUSCLE**, *Lingua'lis*, *Basio-glossus*, (Cowper), *Glossia'nus*, is a small, long, fasciculus of fibres, hidden beneath the sides of the tongue, between the hyoglossus and styloglossus muscles, which are on the outside, and the genioglossus, within. This muscle passes from the base to the tip of the tongue; and, at its sides, is confounded with the muscles just referred to. It shortens the tongue, depresses its point, and can carry it to the right or left side.

**LINGUAL NERVE** is a name which has been given to the ninth pair or hypoglossus; which see. *Lingual nerve* is, also, a term applied to a branch given off from the *Inferior maxillary*, or third branch of the fifth pair. Near its origin it anastomoses with, or simply runs close to, the chorda tympani. It afterwards gives off a considerable number of filaments, which are distributed to the tongue, and some of which are said to have been even traced as far as the papilla;—a distribution which has occasioned it to be regarded as the *Gustatory nerves*, (F.) *Nerv gustatif*.

**LINGUAL VEIN** follows nearly the same distribution as the artery. It opens into the internal jugular.

**LINGUALIS**, Lingual muscle.

**LINGULA**, *Ligula*—*l. Fistula*, *Epiglottis*.

**LINI USITATISSIMI SEMINA**, see *Linum usitatissimum*.

**LINIMENT**, *Linimen'tum*, *Laius*, *Enchris'ton*, *Catuchris'ton*, *Perich'risis*, *Perichris'ton*, *Aleiph'a*, *Aleim'ma*, *Enchris'ti*, *Fric'tum*, *Fricato'rium*, *Inunctio*, from *linire*, 'to anoint gently,' 'to anoint.' An unctuous medicine, containing usually oil or lard, which is used externally in the form of friction.

**LINIMENT AMMONIACAL**, *Linimen'tum ammoniæ*—*l. de Carbonate d'Ammoniaque*, *Linimentum ammoniæ carbonatis*.

**LINIMENT ANTIHÆMORRHOÏDALE DE SIEUR ANDRY**, (F.) This is formed of *Narbonne honey*, *Olive oil* and *Turpentine*.

**LINIMENT ANTIPARALYTIQUE**, (F.)

Composed of *subcarbonate of ammonia*, *alcoholized oil*; *black soap*, and *oil of rosemary*.

**LINIMENT, ANTISCROFULOUS, OF HUFELAND**. It is composed of *fresh ox gall*, *White Soap*, *Unguentum althææ*, *Voluvis oil of petroleum*, *Carbonate of ammonia*, and *Cumpher*.

**LINIMENT CALCAIRE**, *Linimentum aquæ calcis*—*l. Camphor*, *Linimentum camphoræ*—*l. Camphré*, *Linimentum camphoræ*—*l. of Cantharides*, camphorated, *Linimentum e cantharidibus camphoratum*—*l. Cantharido camphoratum*—*l. d'Eau de chaux*, *Linimentum aquæ calcis*—*l. of Lime water*, *Linimentum aquæ calcis*—*l. de Mercure*, *Linimentum hydrargyri*—*l. Mercurial*, *Linimentum hydrargyri*—*l. Oldo-calcaire*, *Linimentum aquæ calcis*.

**LINIMENT RÉSOLUTIF DE POTT**, composed of *oil of turpentine* and *muritic acid*. Used in rheumatism, swellings, &c.

**LINIMENT, SAINT JOHN LONG'S**. A liniment used by a celebrated empiric at the commencement of the second quarter of the 19th century. It is said to have consisted of *oil of turpentine*, and *acetic acid*, held in suspension by yolk of egg. It was a powerful counterirritant.

**LINIMENT DE SAVON**, *Linimentum saponis compositum*—*l. de Savon opiacé*, *Linimentum saponis et opii*.

**LINIMENT SAVONNEUX HYDROSULFURE DE JADELLOT**. Composed of *sulphuret of potass*, ℥vj; *white soap* ℥ij; *oil of poppy* ℥iv; *oil of thyme* ℥ij; used in itch.

**LINIMENT, SIMPLE**, *Linimentum simplex*—*l. Soap*, *Linimentum saponis*—*l. Soap and opium*, *Linimentum saponis et opii*—*l. Soap compound*, *Linimentum saponis compos.*—*l. Turpentine*, *Linimentum terebinthinæ*—*l. of Verdigris*, *Linimentum æruginis*—*l. de Vert-de-gris*, *Linimentum æruginis*—*l. Volatil*, *Linimentum ammoniæ fortius*.

**LINIMENTUM**, *Liniment*.

**LINIMENTUM ÆRUGINIS**, *Ox'ymel Æruginis*, *Unguentum Ægyptiacum*, *Mell'itum de acetate cupri*, *Liniment of verdigris*, (F.) *Liniment de Vert-de-gris*, *Miel d'acetate de cuivre*. (*Æruginis*. cont. ℥j; *acet.* ℥vij; *mellis despum.* pond. ℥xiv. Liquefied, strained, and inspissated by boiling. *Ph. L.*) It is used as an escharotic and detergent;—diluted, as a gargle in venereal ulcerations and in foul ulcers.

**LINIMENTUM ALBUM**, *Ceratum cetacei*, *Unguentum cetacei*—*l. ad Ambustiones*, *L. aquæ calcis*.

**LINIMENTUM AMMONIÆ**, *Sapo ammoniacalis*, *Linimentum ammoniacum seu ammonicum seu Anglicanum*, *Sapo ammoniæ oleæ olivæ*, *Unguentum album resolvens*, *Oleum ammoniacum*, *Linimentum ammoniæ*, *Strong liniment of ammonia*, (F.) *Liniment volatil ou ammoniacal*, *Savon ammoniacal*. (*Liq. ammon.* f. ℥j; *olei olivæ*, f. ℥ij. *Mix. Ph. U. S.*) A stimulating and rubefacient soap.

**LINIMENTUM AMMONIÆ CARBONATIS**, *Liniment of subcarbonate of ammonia*, *Linimentum ammoniæ*, *Linimentum volatilè*; *Harts-horn and oil*, (F.) *Liniment de carbonate d'ammoniaque*. (*Solut. subcarb. ammon.* f. ℥j; *olei olivæ* f. ℥ij. Shake till they unite.) A stimulating liniment, mostly used to relieve rheumatic pains, bruises, &c.

**LINIMENTUM AMMONIATUM SEU AMMONICUM**,

L. ammoniæ fortis—1. Anglicanum, L. Ammonia fortis—1. ad Aphthas, Mel boracis.

LINIMENTUM AQUÆ CALCIS, *Linimentum Calcis*, (Ph. U. S.) *Oleum lini cum calce, Sapo calcarius, Linimentum ad ambustio'nes, Liniment of lime water*, (F.) *Liniment d'eau de chaux, Savon calcaire, Liniment calcaire, Liniment oléo-calcaire*. (*Olei lini; aquæ calcis, sâ partes æquales*. Misce.) A cooling and emollient application to burns and scalds.

LINIMENTUM ARÇEI, Unguentum elemi compositum—1. de Borate, Mel boracis—1. Calcis, L. aquæ calcis.

LINIMENTUM CAMPHORÆ, *Oleum camphoratum, Solutio camphora oleosa, Camphor liniment*, (F.) *Liniment Camphré*. (*Camphora* ℥iv, *olei olivæ*, f. ℥ij. Dissolve.) It is used as a stimulant and discutient.

LINIMENTUM CAMPHORÆ COMPOSITUM, *Ward's essence for the headache, Compound camphor liniment* (*Camphor* ℥ij, *liq. ammoniac* f. ℥ij, *spirit. lavand.* f. Oj. Ph. L.) It is stimulant and anodyne.

LINIMENTUM E CANTHARIDIBUS CAMPHORATUM, *Camphorated liniment of cantharides*, (F.) *L. cantharide camphré*, (*Tinct. cantharid.* ℥ss, *ol. amygd. dulc.* ℥iv, *sapon. amygd.* ℥j, *camphor.* ℥ss. Dissolve the camphor in the oil, and add this mixture to the tincture and soap. Ph. P.) Rubefacient, and discutient.

LINIMENTUM CANTHARIDIS, *Liniment of Spanish Flies, Cantharid.* in pulv. ℥j: *Ol. Terabinth.* Oss. Digest for three hours by means of a water bath, and strain. Ph. U. S.) Used as an excitant liniment in typhus, &c.

LINIMENTUM HYDRARGYRI, *Mercurial liniment*, (F.) *L. de mercuria*, (*Ung. Hyd. fort.*, *adip. præp.* sâ ℥iv, *camphora* ℥j, *sp. rect.* g' xv, *liquor ammon.* f. ℥iv. Rub the camphor with the spirit; add the ointment and lard; and, lastly, gradually add the solution. Ph. L.) It is used as a stimulant and discutient to venereal swellings, &c.

LINIMENTUM PLUMBATUM, Unguentum plumbi superacetatis—1. Saponaceum opiatum, L. saponis et opii.

LINIMENTUM SAPONACEUM HYDROSULPHURATUM, (*Common Soap*, 500 p. Liquefy in a water bath in an earthen vessel; and add *white poppy oil*, 250 p. Mix intimately, and add *dry sulphuret of potass*, 100 p. Beat together, and add *oil of poppy-seed*, 750 p. Ph. P.) In cutaneous affections, as psora, herpes, &c.

LINIMENTUM SAPONATO-CAMPHORATUM, L. Saponis camphoratum.

LINIMENTUM SAPONIS, *Tinctura saponis camphorata* (Ph. U. S.) *Camphorated Tincture of Soap, Soap Liniment*. (*Saponis cœncis.* ℥iv: *camphor.* ℥ij, *Ol. Rosmarin.* f. ℥ss. *alcohol.* Oij. Digest the soap and alcohol in a water bath, until the former is dissolved; filter, and add the camphor and oil—Ph. U. S.) Used in sprains, bruises, and as an embrocation.

LINIMENTUM SAPONIS CAMPHORATUM, L. S. compositum, L. *Saponato-camphoratum, Balsamum opodal' doc, Tinctura saponis camphorata, Opodal'doch, Steer's opodal'doch*, (F.) *L. de Savon. Compound soap Liniment*. (*Sapon. vulgar.* ℥ij, *Camphor.* ℥j, *Ol. Rosmarini, Ol. Origan.* sâ f. ℥j, *Alcohol* Oj. Digest the soap with the alcohol in a sand bath, until it is dissolved; then add the camphor and oils, and when they are dissolved, pour the liquor into

broad-mouthed bottles.—Ph. U. S.) Stimulant and anodyne; in bruises, local pains, &c.

*Freeman's Bathing Spirits* consist of *lin. sapon comp.* coloured with *Daffy's elixir*.

*Jackson's Bathing Spirits* differ from *Freeman's* in the addition of some essential oils.

LINIMENTUM SAPONIS ET OPII, L. *saponaceum opiatum, Soap and opium liniment, Bates's anodyne balsam, Balsamum anodynum, Tinctura saponis et opii*, (F.) *L. de Savon opiacé*. (*Saponis duri* ℥iv, *opii* ℥j, *camphoræ* ℥ij, *olei rosmarin.* f. ℥ss, *alcohol* Oij. Ph. E.) Anodyne; in chronic rheumatism and local pains in general.

LINIMENTUM SIMPLEX, *Simple liniment*, (*Ol. oliv.* 4 p. *cera alba* 1 p. fat linimentum. Ph. E.) Emollient, used in chaps, &c.

LINIMENTUM SIMPLEX, Unguentum cerae.

LINIMENTUM TEREBINTHINÆ, *Turpentine liniment*. (*Cerat. resinæ*, ℞j, *ol. terabinth.* Oss. Melt the cerate and stir in the oil.) A stimulant; applied to burns, &c.

LINIMENTUM VOLATILE, L. ammoniæ carbonatis.

LINNÆA BOREALIS. This plant, called after Linnaeus, has a bitter, subastringent taste; and is used, in some places, in the form of fomentation, in rheumatic pains. An infusion in milk is used in Switzerland for the cure of sciatica.

LINOSPERMUM, see *Linum usitatissimum*.  
LINSÉED, see *Linum usitatissimum*.

LINT, Carbasus, Linteam.

LINTEAMEN, Linteam, Pledget.

LINTEUM, L. *carpum seu rasum, Lintea'men, Oth'oné, Oth'onion, Carbasus, Carbaso, Carpia, Motos, Moté, Motum, Linamen'tum, Tylima, Xystos, Xysma, Achné, Lint*, (F.) *Charpis*. A soft, flocculent substance, made by scraping old linen cloth, (F.) *Charpis rapée*, or by unravelling old linen cut into small pieces—(F.) *Charpis brute*; and employed in surgery as a dressing to wounds, ulcers, &c., either simply or covered with ointment.

LINTUM CARPTUM, see *Linteam*—1. *Rasum*, see *Linteam*.

LINUM, see *Linum usitatissimum*.

LINUM CATHARTICUM, L. *min'issum, Chamali'num, Purging flax, or Mill mountain*, (F.) *Lin purgatif*. This plant is possessed of cathartic properties, and has a bitterish, disagreeable taste. Dose, ℥j in substance.

LINUM CEUDUM, see *Apolinosis*—1. *Minimum, L. Catharticum*.

LINUM USITATISSIMUM, *Common flax*, (F.) *Lin*. The seed *Linum* (Ph. U. S.), *Semina lini usitat'isimi, Linospermum, Linseed, Flaxseed*, (F.) *Grains de lin*, are inodorous, and almost tasteless; yielding mucilage to warm water, and oil by expression. They are demulcent and emollient. Linseed, when ground into powder, forms a good emollient poultice. It is only necessary to stir the powder into boiling water. The oil, *Oleum lini, Flaxseed oil*, is emollient and demulcent.

LIONDENT, *Leontodon taraxacum*.

LION'S FOOT, *Prenanthes*—1. *Tail, Leonurus*.

LIOPODIA, *Leiopodes*.

LIOPIUS, *Leipus*.

LIP, Sax. and Germ. *Lippe, Chélos, Le'bium, Labrum*, (F.) *Lèvre*. The lips are composed of different muscular fasciculi, nerves

and vessels, covered by the skin and mucous membrane of the mouth. They circumscribe the anterior aperture of that cavity; and are inservient to mastication, pronunciation, &c. They are distinguished into *upper* and *lower*—*Anochei'lon*, and *Catochei'lon*—and are placed in front of each jaw, forming the anterior aperture of the mouth between them. They unite at each side, and form what are called the *angles* or *commissures* of the mouth—*Chalvini*. Their free edge is covered with a mucous membrane, of a more or less vivid red, according to the individual. They receive their arteries from the external carotid. Their veins open into the two jugulars. Their lymphatic vessels descend into the ganglions situate beneath the chin. Their nerves are derived from the infra-orbital, mental, and facial.

**LIPS**, *La'bia*, (F.) *Lèvres de la vulve*, are folds belonging to the genital organs of the female, and distinguished into—1. *Labia pudend'ia*, *Labia majora*, *Episi'a*, *Ala pudend'ia muliebris*, *Hyrtochei'rides*, *Eupes*, *Ala majora*, *Crem'noi*, (F.) *Grandes Lèvres*. These are two membranous folds, thicker above than below, which limit the vulva laterally, and extend from the inferior part of the mons veneris to the perineum. They unite anteriorly and posteriorly, forming commissures; the posterior of which is called *Fourchette*. Their outer surface is convex; formed of skin and covered with hair. The inner surface is red and covered by a mucous membrane, continuous with that lining the other parts of the vulva. The space between the skin and mucous membrane is filled with a fatty tissue and fibrous bands, some fibres of the constrictor vaginæ muscle, vessels, and nerves.

We speak, also, of the *lips of a wound*, *ulcer*, &c., when alluding to the edges of these solutions of continuity.

**LIPA**, *λίπα*, fat; also, Lippitudo.

**LIPARA**, from *λίπαρος*, 'fatty,' and *λίπα*, 'fat.' Plasters, containing much oil or fat.

**LIPARIA**, see Polysarcia.

**LIPAROC'LE**, *Λίπαρόκλη*, from *λίπαρος*, 'fatty,' and *κλήη*, 'tumour.' A *Lipo'ma*, or fatty tumour of the scrotum, *Her'nia pinguedino'sa scroti*.

**LIPAROLÉ**, Pomatum, Pommade.

**LIPAROTES**, see Polysarcia.

**LIPAROTRICH'IA**, from *λίπαρος*, 'fat,' and *τριχ'*, 'hair.' Too great oiliness of the hair.

**LIPASMA**, see Polysarcia.

**LIPEMANIA**, Melancholy, see Lypemania.

**LIPHÆMIA**, Leiphæmia.

**LIPHÆMOS**, Leiphæmos.

**LIPO** or **LEIPO**, *λίπο*, 'I leave,' 'I forsake.'

Hence, *Leipopsychia*, *Leipothymia*.

**LIPOCELE**, Liparoccele.

**LIPODERMIA**, Aposthia.

**LIPODERMOS**, Leipodermos.

**LIPOMA**, *Lypo'ma*, from *λίπος*, 'fat,' 'a fatty tumour.' A fatty tumour of an encysted or other character.

**LIPOMERIA**, *Leipome'ria*, from *λίπος*, 'I leave,' and *με'ρος*, a part.' Monstrosity from arrest of development, or from defect. Deficiency of one or more of the parts of the body; for example, where a person only has four fingers.

**LIPOPSYCHIA**, Syncope.

**LIPOS**, Pinguedo.

**LIPOSIS**, see Polysarcia.

**LIPOTHYMIA**, Syncope.

**LIPPA**, *Chassie*.

**LIPP'IA**, Adali.

**LIPPITU'DO**, *Ophthalm'ia chron'ica* of some. *Lippitudo*, *Blear-eye*, *Lappa*, *Lipa*, *Xerophthal'mia*, *Loma*, *Lemé*, *Lemos'itas*, *Glomé*, *Glama*, *Gra'mia*. A copious secretion of the sebaceous humour of the eyelids, which renders them gummy. It is owing to a state of chronic inflammation of the tarsal margins; the eyelids being generally red, tumefied, and painful.

**LIPPITUDO NEONATORUM**, see Ophthalmia.

**LIPPUS**, *Chassieuus*.

**LIPSIS ANIMI**, Syncope.

**LIPSOTRICH'IA**, Alopecia, Calvities.

**LIQUAMU'MIA**, *Adops h'uma'nus*. Human fat—Ruland and Johnson.

**LIQUARIUM**, Syrupus simplex.

**LIQUATIO**, Liquefaction.

**LIQUEFACIENT**, *Liquifa'ciens*, from *liquidus*, 'liquid,' and *facere*, 'to make.' A medicinal agent, which seems to have the power of liquefying solid depositions. To this class mercury, iodine, &c. have been referred by some.

**LIQUEFACTION**, *Liqua'tio*, *Liquefactio*; (same etymon.) Transformation of a solid substance into a liquid. It is used particularly in speaking of metals and fatty bodies.

**LIQUEUR D'ALUMINE COMPOSÉE**, Liquor aluminis compos. — 1. *Arsenicale*, Liquor arsenicalis—1. *Fumans de Boyle*, Ammonia sulphuretum—1. *Fumans de Boyle*, Liquor fumans Boylii—1. *Volatilis de corne de cerf*, Liquor volatilis cornu cervi—1. *de Cuiere ammoniacal*, Liquor cupri ammoniati—1. *de Fer acaolins*, Liquor ferri alkalmi—1. *de Sous-acétate de plomb*, Liquor plumbi subacetatis—1. *de Potasse*, Liquor potasse—1. *de Sous-carbonate de potasse*, Liquor potasse subcarbonatis.

**LIQUID**, DISINFECTING, BARRETT'S, see Barrett's disinfecting liquid—1. Disinfecting, Labarraque's. Liquor sodæ chlorinata—1. Disinfecting, Ledoyen's, see Ledoyen's disinfecting liquid.

**LIQUIDAMBAR ASPLENIFOLIA**, Comptonia asplenifolia—1. *Officinalis*, see Styraç—1. *Peregrina*, Comptonia asplenifolia.

**LIQUIDAM'BAR STYRACIF'LUA**, *Liquidam'bra*, *Sweet gum*. The name of the tree which affords the *Liquid amber* and *Storax liquida*, *Styraç liquida* or *Liquid storax*. Liquid amber is a resinous juice of a yellow colour, inclining to red; at first of about the consistence of turpentine; by age, hardening into a solid, brittle mass. It is not used medicinally.

*Styraç Liquida* is obtained from this plant by boiling. There are two sorts:—one more pure than the other. It is used, occasionally, as a stomachic, in the form of plaster.

**LIQUIDUM NERVEUM**, Nervous fluid.

**LIQUIRITIA**, Glycyrrhiza.

**LIQUOR**, *Liqua'men*, *Hygrom*, *Hygrotes*. (F.) *Liquor*. A name given to many compound liquids, and especially to those the bases of which are water and alcohol.

**LIQUOR ACIDUS HALLERI**, Elixir acidum Halleri—1. *Ethereus*, Ether—1. *Ethereus sulphuricus*, Spiritus ætheris sulphurici.

**LIQUOR ALU'MINIS COMPOSITUS**, *Aqua alu'minis compos'ita*, *Aqua alumin'o'sa Bates'na*, *Compound solution of Alum*, (F.) *Liquor d'alumina compos'te*. (*Aluminiis*, *sinci sulphat*.

sing. ℥ss, *agua fervent*. Oij. Dissolve and filter through paper.) Detergent and stimulant. Used as a collyrium, when properly diluted, in ophthalmia; as an injection in gleet, leucorrhœa, &c.

**LIQUOR AMMONIÆ**, *Liq. ammonia puræ*, *Alcali ammoniacum fluidum*, *Ammoniu liquidum*, *A. caustica liquidum*, *A. pura liquidum*, *Lixivium ammoniacale*, *Spiritus salis ammoniaci aquosus*, *Aqua ammoniæ*, *Aqua ammoniæ caustica*, *Liquid ammonia*, *Solution of ammonia*, (F.) *Ammoniaque liquidæ*. (Directed to be made in the Pharm. U. S. from *muriate of Ammonia*, in fine powder; and *Lime*, each a pound; *distilled water* a pint; *water*, nine fluidounces. The water is employed to slake the lime; this is mixed with the muriate of ammonia and put into a glass retort in a sand bath. Heat is applied so as to drive off the ammonia, which is made to pass into a quart bottle containing the distilled water. To every ounce of the product three and a half fluidrachms of distilled water are added, or as much as may be necessary to raise its s. g. to 0.96. This *Liquor Ammonia* may also be made by mixing one part of liquor ammonia fortior with two parts of distilled water. (Ph. U. S. 1842.) The *Liquor Ammonia fortior*, or *stronger solution of ammonia* (Ph. U. S.) is an aqueous solution of ammonia of the s. g. 0.882. It is stimulant, antacid, and rubefacient. Dose gtt. to xx, in water or milk.

**LIQUOR AMMONIÆ ACETATIS**, *Alcali ammoniacum acetatum*, *Alcali volatilis acetatum*, *Aqua acetatis ammoniæ*, *Solution of acetate of ammonia*, *Aqua ammoniæ acetata*, *Acetas ammonia*, *Spiritus Mindererus*, *Sal ammoniacum vegetabile*, *Spiritus ophthalmicus Mindereri*, *Sal acetosus ammoniacalis*. (*Ammon. carbon.* ℥ij, *acid. acet. dil.* ℥iv; or add the salt till the acid is saturated. A sudorific: externally, cooling. Dose, f. ℥ij to f. ℥iss.

**LIQUOR AMMONIÆ SUBCARBONATIS**, *Solutio subcarbonatis ammonia*, *Aqua carbonatis ammonia*, *Solution of subcarbonate of ammonia*. (*Ammonia carbon.* ℥viii, *agua destillat.* Oj. Dissolve and filter through paper.) *Uss*;—the same as that of the carbonate of ammonia, (q. v.)

**LIQUOR AMMONIÆ HYDROTHIODIS**, *Ammonia sulphuretum*—l. ex *Ammonia* et oleo succini, *Spiritus ammonia succinatus*.

**LIQUOR AMNII**, *Aqua amnii*. The liquor of the amnios. (F.) *Eaux de l'amnios*. The fluid exhaled by the amnios, and which envelops the fœtus during the whole period of utero-gestation. It is often simply called the *waters*, (F.) *Les Eaux*. Its relative quantity diminishes as pregnancy advances, although its absolute quantity continues to increase till the period of delivery. In some women only five or six ounces are met with; in others, it amounts to pints. It is limpid, yellowish, or whitish; exhales a faint smell, and has a slightly saline taste. It contains water in considerable quantity; albumen; chloride of sodium; phosphate of lime; an alkaline substance; and a particular acid. It facilitates the dilatation of the uterus, and aids delivery by acting as a soft wedge enclosed in its membranes, &c. It is probably inervient to useful purposes in the nutrition of the fœtus.

**LIQUOR, ANODYNE**, *HOFFMANN'S*, *Spiritus ætheris sulphurici compositus*—l. *Anodynus martialis*, *Alcohol sulphurico-æthereus ferri*.

**LIQUOR ARSENICALIS**, *L. potassæ arsenicæ* (Ph. U. S.), *Solutio arsenicalis*, *S. arsenicata*, *S. arsenitis kalica*, *Arsenical solution*, *Mineral solvent*, *Arsenis potassæ liquidus*, *Arsenis potassæ aquosus*, *Fowler's solution of arsenic*, *Solvens minerali*, *Italian poison*, *Aqua Toffana*, (?) *Aqua Toffania*, *Acqua della Toffana*, *Acqua di Napoli*, *Acquetta*, *Tasteless ague drop*, (F.) *Liquor arsenicale*. (*Acid. Arsenios* in pulverem subtilem triti, *potassa carbonatis pur.*, sing. gr. lxxiv., *agua destillat.* q. s. Boil together the arsenious acid and carbonate of potassa with twelve fluidounces of distilled water, in a glass vessel, until the arsenic is dissolved. When the solution is cold, add *Tinct. lavand. c. f.* ℥iv, and as much *distilled water* as will make the whole one pint. *Ph. U. S.*) f. ℥j, contains gr. ss. of the arsenious acid. Dose, gr. xx.

**LIQUOR ARSENICI ET HYDRARGYRI IODIDI**, see *Arsenic* and *Mercury*, iodide of—l. *Barii chloridi*, *Baryta*, *muriate*, *solution of*—l. *Bellusti*, *L. Hydrargyri nitrici*—l. *Calcii chloridi*, see *Calcis murias*.

**LIQUOR CALCIS**, *Solutio calcis*, *Aqua calcis*, *Aqua benedicta*, *Calcaria pura liquidum*, *Aqua calcaria usta*, *Solution of Lime*, *Lime Water*, (F.) *Eau de chaux*. (*Calcis* ℥iv. *aq. destill.* cong. Pour the water on the lime, and stir. Let it stand in a covered vessel three hours; bottle the lime and water in stopped bottles, and use the clear solution.) It is astringent, tonic, and antacid; and is used in diarrhœa, diabetes, heartburn, &c., and as a lotion to foul and cancerous ulcers, &c. Dose, ℥ij, to Oss, in milk.

**LIQUOR CALCIS COMPOSITUS**, *Aqua calcis composita*, *Compound lime water*, *Aqua benedicta composita*, (F.) *Eau de chaux composit.* (*Lign. guaiac. ras. Res. rad. glycyrrh. ℥j, cort. sassafras, ℥ss; semin. coriand. ℥ij, liquor calcis*, Ovj.) Macerate for two days, and filter.) It is stimulant, diaphoretic, and astringent, and is used in cutaneous affections.

**LIQUOR CALCIS MURIATIS**, see *Calcis murias*—l. *Cereris*, *Cerevisia*—l. *Chloreti natri*, *L. sodæ chlorinatæ*—l. *Chlorini*, see *Chlorine*—l. *Chlorureti natri*, *L. Sodæ chlorinatæ*—l. *Chlorureti sodæ*, *L. sodæ chlorinatæ*.

**LIQUOR CUPRI AMMONIATI**, *Aqua cupri ammoniati*, *Aqua saphyrina*, *Blue eyewater*, *Solution of ammoniated copper*; (F.) *Liquor ou Eau de cuivre ammoniacal.* (*Cupri ammoniat.* ℥j, *agua destill.* Oj. Dissolve and filter the solution through paper. *Ph. L.*) Corrosive and detergent. Used externally to foul ulcers; and diluted with an equal part of distilled water, it is applied by means of a hair pencil to specks and films on the eye.

**LIQUOR CUPRI SULPHATIS COMPOSITUS**, *Aqua cupri vitriolati composita*. (*Cupri sulphat.*, *alumin. sulphat.* aa ℥ij, *agua pura* Oij, *acid sulph.* ℥ij. Boil the salts in the water until they are dissolved; then filter the liquor, and add the acid.) Used as an astringent in epistaxis, &c. It was also called *Aqua Styptica*.

**LIQUOR CYRENIACUS**, *Benjamin*—l. *Excitans*, *Spiritus ammonia succinatus*.

**LIQUOR FERRI ALKALINI**, *Solution of Alkaline Iron*, (F.) *Liquor de fer alcalinis.* (*Ferri ziiss, acid. nitric.* ℥ij, *agua destillat.* f. ℥vj, *liq. potass. subcarb.* f. ℥vj.) To the acid and water mixed, add the iron; and, after the effe-

vescence, add the clear solution, gradually, to the *liq. potassa subcarb.*; shaking it occasionally till it assumes a deep brown-red colour, and the effervescence stops. After six hours' settling, pour off the clear solution. *Ph. L.*) It is tonic, like other preparations of iron. Dose, f. ʒss to f. ʒiiss.

LIQUOR FERRI IO'DIDI, *Solution of Iodide of Iron, Syrupus Ferri io'didi, Syrup of Iodide of Iron.* (Iodin. ʒij, Ferri ꝑament. ʒj, *Mel. depumat.* f. ʒv, *Aquæ destillat.* q. s. Mix the iodine with f. ʒx of the distilled water, in a porcelain or glass vessel, and gradually add the iron filings, constantly stirring. Heat the mixture gently until the liquor acquires a light greenish colour; then, having added the honey, continue the heat a short time, and filter. Lastly, pour distilled water upon the filter, and allow it to pass until the whole of the filtered liquor measures twenty fluidounces. Keep the solution in closely stopped bottles.—*Ph. U. S.*) Dose, 10 to 30 drops.

LIQUOR FERRI MURIATIS, *Tinctura ferri muriatis*—*I. Ferri Nitrat.*, see *Tinctura ferri muriatis*—*I. Ferri Sesquinitrat.*, see *Tinctura ferri muriatis*.

LIQUOR FUMANS BOYLLII, *Sulphure'tum Ammoniac Hydrogenat'um, Hydrosulphure'tum Ammoniac, Tinctura Sulphuris Volat'is, Aqua Sulphure'ti Ammoniac, Boyle's Fuming liquor, (F.) Liqueur fumante de Boyle.* It is possessed of nauseating and emetic properties, and has been given in diabetes and diseases of excitement as a deoxygenizer!

LIQUOR FUMING, BOYLE'S, *Liquor fumans Boyllii*—*I. Fuming, of Libavius, Tin, muriate of*—*I. Genital, Sperm*—*I. of Hartshorn, volatile, Liquor volatilis cornu cervi.*

LIQUOR HYDRAR'GYRI NITRICI, *L. Bellosti, (F.) Eau mercurielle, Eau contre la gangrène, Remède du Duc d'Antin, R. du Capucin, (Hydragr. 120 p., acid nitr. (33°) 150 p.* Dissolve, and add to the solution, *distilled water, 900 p. Ph. P.*) Dose, two or three drops in a glass of water. Not much used.

LIQUOR HYDRAR'GYRI OXYMURIATIS, *Solution of Oxymuriate of Mercury, Liquor Swietenis, L. Syphiliticus Turnerii, Murius hydrargyri spirituosus liq'uidus, Solutio Muriatis hydrargyri oxygenatis, Liquor or Solution of Corrosive Sublimato* or of *Van Swieten.* (*Hyd. oxyg.* gr. viij, *aquæ destill.* f. ʒxv, *sp. rect.* f. ʒj. Dissolve in the water and add the spirit. *Ph. L.*) Dose, f. ʒss, or f. ʒj.

*Norton's Drops, Green's Drops, and Solomon's Anti-Impetig'enas*—all nostrums—seem to be disguised solutions of *Corrosive Sublimato*.

LIQUOR HYDRIODATIS ARSENICI ET HYDRAR'GYRI, *Arsenic and mercury, iodide of.*

LIQUOR IO'DINI COMPOSITUS, *Solutio Potassii Io'didi Iodur'ata, Compound Solution of Iodine, Lugol's Solution.* (Iodin. ʒvj, *Potass. iodid.* ʒiiss, *Aquæ destillat.* Oj. Dissolve the iodine and iodide of potassium in the water.—*Ph. U. S.*) Dose, gtt. vj. ad xij, in sugared water.

LIQUOR LITHAR'GYRI SUBACETATIS, *L. plumbi subacetatis*—*I. Lithargyri subacetatis compositus, Liquor plumbi subacetatis dilutus.*

LIQUOR OF MONRO, *Solution of Monro.* A solution, used by Monro for the preservation of anatomical preparations. It was composed of

alcohol at 22° or 24°, with a drachm of nitric acid to each pint.

LIQUOR MORPHINE SEU MORPHIE ACETATIS, *Solution of Acetate of Morphia, Anodyne Drops. (Acetate of morphia, gr. xvj, distilled water, f. ʒvi, dilute acetic acid, f. ʒij.)* Dose, from six to twenty-four drops.

LIQUOR MORPHINE SEU MORPHIE SULPHATIS, *Solution of Sulphate of Morphia. (Morphia sulphat. gr. viij, aquæ destillat. Oss.* Dissolve the sulphate of morphia in the water. *Ph. U. S.*) Dose, f. ʒj to f. ʒij—containing from an eighth to a quarter of a grain.

LIQUOR NATRI OXYMURIATICI, *L. Sodæ chlorinatæ*—*I. Nervinus Bangii, Tinctura æthere camphorata*—*I. Oleosus Sylvii, Spiritus ammoniac aromaticus*—*I. Opii sedativus, (Haden's),* see *Tinctura opii.*

LIQUOR OPII SEDATIVUS. An empirical preparation by a London druggist of the name of Battley. It is presumed to be a solution of acetate of morphia, or of opium, in some form in vinegar. It is devoid of many of the narcotic effects of opium.

LIQUOR OVI ALBUS, *Albumen ovi*—*I. Pancreaticus, see Pancreas*—*I. Pericardii, see Pericardium*—*I. Plumbi acetatis, L. P. subacetatis*—*I. Plumbi diacetatis, Liquor Plumbi subacetatis.*

LIQUOR PLUMBI SUBACETATIS, *Liquor Subacetatis Lithargyri, Solution of Subacetate of Lead, Liquor Plumbi Acetatis, L. P. Diacetatis, Goulard's Extractum Satar'ni, Lithargyri Acetum, (F.) Liqueur de sous-acetate de Plomb. (Plumb. acet. ʒxvj, Plumb. oxid. semivitr. in pulv. subtil. ʒiixss, ag. destillat. Oiv.* Boil together in a glass or porcelain vessel, for half an hour, occasionally adding distilled water, so as to preserve the measure. Filter through paper, and keep the solution in closely stopped bottles.—*Ph. U. S.*) It is used externally as a cooling astringent, and discutient, when diluted with distilled water.

LIQUOR PLUMBI SUBACETATIS DILUTUS, *Liquor Subacetatis Lithargyri Compositus, Aqua Satar'ni, Acetas Plumbi dilutum alcoholicum, Diluted Solution of Subacetate of Lead, Aqua veg'eto-mineralis, Tinctura plumbosa, Aqua Lithargyri Acetatis composita, Liquor Plumbi Acetatis dilutus, Goulard water, (F.) Eau blanche, Eau de Goulard, Eau végétominérale, White Wash, Royal Preventive. (Liq. plumbi subacet. f. ʒij, aquæ destillat. Oj. Ph. U. S.)* Properties the same as the last, but feebler.

LIQUOR POTASSÆ, *Aqua Potassæ, Aqua Kali Caustici, Solution of Potash, Lixivium magistrale, L. Saponarium, Soap Less, Aqua Kali puri, Soap Ley, Lixivium causticum, Potassæ liquida, (F.) Eau, Solution ou liqueur de Potasse, Potasse liquide, Lessive des Savonniers. (Potassæ carb. B), calcis Bss, aquæ destill. fervent. congiunt.* Dissolve the alkali in Oij of the water, and add the remainder of the lime. Mix the whole: set aside in a close vessel, and, when cold, filter through calico. *Ph. L.*) It is antilithic in cases of uric acid calculi, and antacid. Externally, stimulant and escharotic. Dose, gtt. x to xx.

LIQUOR POTASSÆ ARSENITIS, *L. arsenicalis*—*I. Potassæ Carbonatis, L. P. Subcarbonatis.*

LIQUOR POTASSÆ CITRATIS, *Solution of Citrate of Potassa, Neutral Mixture, Saline*

*Mixture.* (Succ. Limon. Oss. Potass. Carbonat. q. s.) saturate by the carbonate of potassa, and filter; or, *Acid. Citric* ℥ss; *Ol. Limon.* ℥j. ij; *Aquæ Oss. Potass. Carbonat.* q. s.; dissolve, saturate by the carbonate of potassa, and filter. Ph. U. S.) Used in fever, but probably of little or no efficacy.

LIQUOR POTASSÆ SUBCARBONATIS, L. P. Carbonatis (Ph. U. S.), *Aqua Subcarbonatis Kali, O'leum Tartari per deliquium, Aqua Kali, Lævisum Tartari, Aqua Kali preparati, Oil of Tartar, Saline oil of Tartar, Solution of Subcarbonate of Potass.* (F.) *Liquueur de sous-carbonate de Potasse, Lessive de Tartre* (Potass. subcarb. ℥ij, *aquæ destillat.* f. ℥xij. Dissolve and filter through paper.) Dose, gr. x to xxx.

LIQUOR POTASSII IODIDI seu POTASSÆ HYDRIODATIS, *Solution of Iodide of Potassium or of Hydriodate of Potass.* (Potassii iodid. gr. 36, *aquæ destillat.* f. ℥j.) Dose, gr. xx, three times a day.

LIQUOR, PROPAGATORY, Sperm—l. Prostaticus, Prostatic liquor—l. Puris, see Pus.

LIQUOR SANGUINIS. This term has been given by Dr. Babington to one of the constituents of the blood, the other being the red particles. He considers, from his experiments, that fibrin and serum do not exist as such in circulating blood, but that the *Liquor Sanguinis—Plasma*, of Schultz, *Coagulable or plastic Lymph*—when removed from the circulation and no longer subjected to the laws of life, has then, and not before, the property of separating into fibrin and serum. It is the oxyprotein of the liquor sanguinis, after the red particles have subsided, which, according to Mulder, forms the buffy coat of inflammatory blood.

LIQUOR OF SCARPA, *Vitrine auditiva.*

LIQUOR SEMINIS. The homogeneous, transparent fluid, in which the spermatozoa and seminal granules are suspended.—Wagner.

LIQUOR SODÆ CHLORIDI, L. sodæ chlorinatæ.

LIQUOR SODÆ CHLORINATÆ, L. sodæ chloridi, L. sodæ oxymuriaticæ, L. chloræti natri, L. chloruretæ natri, L. chloræti sodæ, L. chloruretæ sodæ, *Natrum chloratum liquidum, L. natri oxymuriaticæ, Aqua natri oxymuriaticæ, Labarraque's Disinfecting Liquid, Solution of Chlorinated Soda.* (Calciis Chlorinat. ℥ij; *Sodæ Carbonat.* ℥ij; *Aquæ cong. ias.* Dissolve the carbonate of soda in three pints of the water, with the aid of heat. To the remainder of the water add, by small portions at a time, the chlorinated lime, previously well triturated, stirring the mixture after each addition. Set the mixture by for several hours, that the dregs may subside; decant the clear liquid, and mix it with the solution of carbonate of soda. Lastly, decant the clear liquor from the precipitated carbonate of lime, pass it through a linen cloth, and keep it in bottles secluded from the light; Ph. U. S.) Used in the same cases as the chloride of lime. Internally, 10 drops to a fluidrachm, for a dose. Diluted with water, it is an exciting and disinfectant in various morbi æterni.

LIQUOR SODÆ EFFERVESCENS, Acidulous water, simple—l. Sodæ Oxymuriaticæ, L. sodæ chlorinatæ—l. Sulphuricus Acidulissatus, Spiritus ætheris sulphurici—l. Swietenii, L. hydrargyri oxymuriatis—l. Syphiliticus Turneri, L. hydrargyri oxymuriatis—l. Tartari emetici,

Vinum antimonii tartarizati—l. of Van Swieten, l. hydrargyri oxymuriatis.

LIQUOR VOLATILIS CORNU CERVI, L. volatilis Cornu Cervi nati, *Volatile Liquor of Hartshorn, Spiritus Lumbricorum, Spiritus Millepedarum, Spiritus Cornu Cervi, Liquor volatilis osium; Hartshorn, Spirit of Hartshorn, Bone Spirit, (F.) Liquueur volatile de Corne de cerf.* This is a solution of subcarbonate of ammonia, impregnated with empyreumatic oil. It possesses the same virtues as the subcarbonate of ammonia. It is in common use to smell at, in faintings, &c.

LIQUOR VOLATILIS OSSIIUM, L. Volatilis cornu cervi.

LIQUOR ZINCI SULPHATIS CUM CAMPHORÆ, *Aqua Zinci vitriolati cum Camphorâ, Aqua vitriolica camphorata, Aqua ophthalmica, Common Eye Water.* (Zinci sulph. ʒss, camphor, ʒij, *aq. bullient.* Oij; dissolve and filter.) Used as a lotion for ulcers; or, diluted with water, as a collyrium.

LIQUORICE, Glycyrrhiza—l. Bush, Abrus precatorius—l. Juice, see Glycyrrhiza—l. Refined, Extractum glycyrrhiza—l. Spanish, see Glycyrrhiza—l. Wild, Aralia nudicaulis.

LIQUORITIA, Glycyrrhiza.

LIRIODENDRON, *Liriodendron tulipifera, Tulipifera Liriodendron, Old wife's shirt, Tulip Tree, Poplar Tree, Tulip-bearing Poplar, American Poplar, White Wood, Cypress Tree, (New England,) (F.) Tulipier.* The bark—*Liriodendron* (Ph. U. S.)—especially of the root, of this noble forest tree, which is indigenous in the United States, is a strong aromatic bitter, and has been employed advantageously as a tonic. An active principle was separated from it by Professor J. P. Emmet of the University of Virginia, and has been called *Liriodendrin*. It is not used in medicine.

LIS BLANC, *Lilium candidum—l. Asphodelæ, Asphodelus ramosus.*

LISERON, GRAND, *Convolvulus sepium—l. des Haies, Convolvulus sepium—l. Meckameck, Convolvulus panduratus.*

LISTON'S ISINGLASS PLASTER, see Sparadrapum adhaesivum.

LITE, LITH. A plaster, formerly made of verdigris, wax, and resin.—Galen.

LITHAGO'GUM, from *λίθος*, 'a stone,' and *αγος*, 'I expel.' A remedy which was supposed to possess the power of expelling calculi. Also, a lithotomy forceps.

LITHANTHRAX, Carbo fossilis.

LITHARGE, Plumbi oxydum semivitreum—l. of Gold, see Plumbi oxydum semivitreum—l. of Silver, see Plumbi oxydum semivitreum.

LITHARGYRI ACETUM, Liquor plumbi subacetatis.

LITHARGYRUM, Plumbi oxydum semivitreum.

LITHARGYRUS, Plumbi oxydum semivitreum.

LITHAS, Uratæ.

LITHATE, Uratæ—l. of Soda, Uratæ of soda. LITHECTASY, from *λίθος*, 'a stone,' and *εκτασις*, 'dilatation;' *Cystectasy*. An operation which consists in extracting stone from the bladder by dilating the neck of the organ, after making an incision in the perineum, and opening the membranous portion of the urethra.

LITHIA, *Lithi'asis, Lithogen'ia, Uri'asis,*

*Urolithiasis, Cachexia calculosa, Calculi Morbus, Lapillatio, Generatio calculi*, from *λίθος*, 'a stone.' The formation of stone, gravel, or concretions in the human body. Also, an affection in which the eyelids are edged with small, hard, and stone-like concretions.

**LITHIA, CARBONATE OF, Lithia Carbonas**, (F.) *Carbonate de Lithine*. A salt found in certain mineral waters, which have been serviceable in lithuria. Hence, it has been suggested in that morbid condition.

**LITHIA RENALIS ARENOSA, Gravel**—**L. Renalis, Nephrolithiasis**—**L. Vesicalis, Calculi, vesical.**

**LITHIÆ CARBONAS, Lithia, carbonate of.**

**LITHIASIS, Lithia**—**L. Cystica, Calculi, vesical**—**L. Nephretica, Gravel, Nephrolithiasis.**

**LITHIASIS PULMONUM, Pulmo nes tartarizatis.** The formation of concretions in the lungs, occasioning at times the *Phthisis calculosa, Phthisis calculeuse*, of Bayle.

**LITHIASIS RENALIS ARENOSA, Gravel**—**L. Renalis, Nephrolithiasis**—**L. Vesicalis, Calculi, vesical.**

**LITHIC, Lithicus.** Same etymon. Belonging to lithic or uric acid, or to stone: hence *Lithio Diathesis*: the habit of body which favours the deposition of lithic acid and the lithates from the urine.

**LITHIC ACID, Uric acid.**

**LITHINE, CARBONATE DE, Lithia, carbonate of.**

**LITHOCENOSIS, Lithotritry.**

**LITHOCYSTOTOMY, Lithotomy.**

**LITHODIALYSIS, Lithotritry.**

**LITHODRAS'SIC, Lithodras'sicus**, (F.) *Lithodras'sique*, from *λίθος*, 'a stone,' and *δρασσις*, 'to seize hold of.' An epithet given to a form of stone forces—*Pince lithodras'sique*—used in the operation of lithotritry, by MM. Meirieu and Tanchou.

**LITHOGENIA, Lithia.**

**LITHOID, Lithoides, Lithoides**; from *λίθος*, 'stone,' and *ειδος*, 'resemblance.' Of the nature of stone, or resembling stone: as

**LITHOÏDES OS, see Temporal bone.**

**LITHOLABE (F.), Lithol'abum.** An instrument employed for laying hold of a stone in the bladder, and keeping it fixed, so that lithotritic instruments can act upon it.

**LITHOLABON, Forceps, (Lithotomy.)**

**LITHOL'ABUM, from λίθος, 'a stone,' and *λαμβάνω*, 'I seize.' An instrument concerned in extracting stone from the bladder. It had various shapes.—Fabricius ab Aquapendente, Hildanus. See *Litholabe*.**

**LITHOMETRA, from λίθος, 'a stone,' and *μητρα*, 'the uterus.' Osseous, or other concretions of the uterus.**

**LITHONTRIPTIC, Lithontrip'ticus, Lithontrip'tic, Calculifragus, Saxifragus**, from *λίθος*, 'a stone,' and *δισπρω*, 'I break in pieces.' A remedy believed to be capable of dissolving calculi in the urinary passages. There is not much reliance to be placed upon such remedies. By *antilithics*, exhibited according to the chemical character of the calculus (see *Calculi, urinary*), the disease may be prevented from increasing; but most of the vaunted lithontrip'tics for dissolving the calculus already formed have been found unworthy of the high encomiums which have accompanied their introduction.

**LITHOPÆDION, Infans lapideus, Osteopædion**, from *λίθος*, 'a stone,' and *παις*, 'a child.' A fœtus, petrified in the body of the mother.

**LITHOPRINIE, Lithotritry.**

**LITHOPRIONE, from λίθος, 'a stone,' and *πριον*, 'a saw.' An instrument proposed by M. Leroy for preventing the fragments of a callus, when subjected to lithotritry, from falling into the bladder. It is a variety of *litholabe*.**

**LITHORINEUR, from λίθος, 'a stone,' and *σφυρ*, 'to file.' An instrument, proposed by MM. Meirieu and Tanchou for filing down calculi in the bladder.**

**LITHOS, Calculus.**

**LITHOSPERMUM OFFICINALE, Mirium Solis, Egon'ychon, Gromwell, Bastard Alkanet**, (F.) *Grimel officinal, Herbe aux Perles*. The seeds of this plant were formerly supposed, from their stony hardness, (*λίθος*, 'a stone,' and *σπέρμα*, 'seed,') to be efficacious in calculous affections. They have, also, been considered diuretic.

**LITHOSPERMUM VILLOSUM, Anchusa tinctoria.**

**LITHOTERE'THRUM, from λίθος, 'stone,' and *τρεψω*, 'to rub.' A lithotritor.**

**LITHOTHRYP'SIS, Lithotritry.**

**LITHOTHRYPTORS, see Lithotritry.**

**LITHOTOME, Lithot'omus**, from *λίθος*, 'a stone,' and *τομω*, 'I cut.' This name has been given to a number of instruments of different shapes and sizes, which are used in the operation for the stone, to cut the neck or body of the bladder. They ought, with more propriety, to be called *Cystotomes*.

The *Lithotome Caché* of Frère Côme is the most known, and is still occasionally used. It is composed of a handle, and a flattened sheath, slightly curved: in this there is a cutting blade, which can be forced out, by pressing upon a *bascule* or liver, to any extent that may be wished by the operator.

A *Double Lithotome* was used by Dupuytren in his bilateral operation. See *Lithotomy*.

**LITHOT'OMIST.** Same etymon. *Lithot'omus*. One who devotes himself entirely to operating for the stone. One who practises lithotomy.

**LITHOT'OMY, Lithotom'ia, Cystotom'ia, Urolithotom'ia, Sectio vesicæ'lis, Lithocystot'omy**, same etymon. (F.) *Taille*. The operation by which a stone is extracted from the bladder. The different methods, according to which this operation may be practised, are reducible to five principal; each of which has experienced numerous modifications.

1. The *Method of Celsus, Meth'odus Celsiana, Cystotom'ia cum apparatu parvo, Apparatus Minor, Cutting on the Grips*. This consisted in cutting upon the stone, after having made it project at the perinæum by means of the fingers introduced into the rectum. This method was attended with several inconveniences; such as the difficulty of dividing the part, injury done to the bladder, as well as the impossibility of drawing down the stone in many persons. It is sometimes, also, called *Meth'odus Guytonid'na*; from Guy de Chauliac having endeavoured to remove from it the discredit into which it had fallen in his time. It was termed *Apparatus Minor*, (F.) *Le petit appareil*, from the small number of instruments required in it.

2. *Apparatus Major*. This method was invented, in 1520, by John de Romani, a surgeon of Cremona, and communicated by him to Mariano-Santo-di-Barletta, whence it was long called *Mariano's Method, Sectio Maria'na*. It was called *Apparatus Major*, and *Cystotomia vel Meth'odus cum apparatu magno*, (F.) *Le grand appareil*, from the number of instruments required in it. An incision was made on the median line; but the neck of the bladder was not comprehended in it. It was merely dilated. The greater apparatus was liable to many inconveniences, such as ecchymoses; contusion; inflammation of the neck of the bladder; abscesses; urinary fistulae; incontinence of urine; impotence, &c.

3. The *High Operation, Apparatus altus, Cystotomia cum apparatu alto, C. hypogastrica, Epicystotomia, Laparocystotomia, Sectio seu Meth'odus Franconia'na, S. Hypogastrica, S. alta*, (F.) *Haut appareil, Taille Hypogastrique, Taille sus-pubienne*, was first practised by Peter Franco, about the middle of the 16th century. It consisted in pushing the stone above the pubis by the fingers introduced into the rectum. Rousset afterwards proposed to make the bladder rise above the pubis by injecting it. The method had fallen into discredit, when Frère Côme revived it. It is used when the calculus is very large. It was practised by opening first the membranous part of the urethra upon the catheter passed into the canal. Through this incision, the *Sonde à dard*—a species of catheter, having a spear-pointed stilet—was introduced into the bladder. An incision was then made into the linea alba, above the symphysis pubis, of about four or five fingers' breadth, and the peritoneum detached to avoid wounding it. The stilet was pushed through the bladder, and used as a director for the knife, with which the bladder was divided anteriorly, as far as the neck; and the stone extracted. It was performed in England by Douglass, in 1719, and since by others with various modifications.

4. The *Lateral Operation, Hypocystotomia, Cystotomia lateralis, Sectio lateralis, Apparatus lateralis*, (F.) *Appareil lateralisé*, so named from the prostate gland and neck of the bladder being cut laterally, was probably invented by Peter Franco. It was introduced into France by Frère Jacques de Beaulieu. He performed it with rude instruments, invented by himself, and improved by the suggestions of some of the Parisian surgeons. In England, it received its earliest and most important improvements from the celebrated Cheselden. It is the method practised at the present day, according to different modes of procedure. In this method, the patient is placed upon a table; his legs and thighs are bent and separated; the hands being tied to the feet. The perineum is then shaved, and a staff is introduced into the bladder; the handle being turned towards the right groin of the patient. An oblique incision is now made from the raphe to the middle of a line drawn from the anus to the tuberosity of the ischium of the left side; and taking the staff for a guide, the integuments, cellular tissue of the perineum, membranous portion of the urethra, transversus perinæ muscle, bulbo-cavernosus, some fibres of the levator ani, the prostate and neck of the bladder,

are successively divided. For this latter part of the operation, the knife, the beaked bistoury. *Bistouri ou Lithotome Caché*, cutting gorget, &c., are used according to the particular preference. The forceps is now introduced into the bladder, and the stone extracted. In the operation care must be taken not to injure the rectum, or the great arterial vessels, distributed to the perineum.

A variety of the *Lateral Apparatus*, called by the French *Appareil latéral*, consisted in cutting into the *bas-fond* of the bladder, without touching the neck of that organ; but it was soon abandoned on account of its inconveniences.

The *Bilateral Operation* is founded on that of Celsus. It consists in making an incision posterior to the bulb of the urethra, and anterior to the anus, involving both sides of the perineum by crossing the raphe at right angles: an incision is then made through the membranous part of the urethra, and the prostate may be cut bilaterally, either with the double lithotome of Dupuytren, or the prostatic bisector of Dr. Stevens, of New York.

5. *Lithotomy by the Rectum, Proctocystotomia, Sectio recto-vesica'lis*, (F.) *Taille par la Rectum, Taille postérieure, T. Recto-vésicale*. This was proposed by Vegetius in the 16th century; but it was never noticed until M. Sanson, in the year 1817, attracted attention to it; since which time it has been successfully performed in many instances. It consists in penetrating the bladder through the paries corresponding with the rectum, by first cutting the sphincter ani and rectum about the root of the penis, and penetrating the bladder by the neck of that organ, dividing the prostate, or by its *bas-fond*.

Lithotomy in women, from the shortness of the urethra, is a comparatively insignificant operation.

LITHOTOMY BY THE RECTUM, see Lithotomy

—I. by the Vagina, see Lithotomy.

LITHOTRESIS, Lithotriety.

LITHOTRIPSIS, Lithotriety.

LITHOTRIPSY, Lithotriety.

LITHOTRIPTORS, see Lithotriety.

LITHOTRITES, see Lithotriety.

LITHOTRITEURS, see Lithotriety.

LITHOTRITOR, see Lithotriety.

LITHOTRITY, *Lithotri'ria, Lithotrypsy,*

*Lithotripsy, Lithotripsy, Lithotrypsis, Lithotri'sis, Lithotripsy, Lithoceno'sis, Lithodial'ysis, Lithopriniæ*, from *λίθος*, 'a stone,' and *τριβω*, 'I break.' The operation of breaking or bruising the stone in the bladder. It has been performed, of late years, with success, by French, and, after them, by English and American surgeons. The instruments employed for this purpose are called in the abstract, *Lithotrites, Lithotriteurs, Lithotritors, Lithotriptors* and *Lithotryptors*. The most celebrated are those of Civiale, Jacobson, Heurteloup and Weiss. See *Brise-Pierre articulé* and *Percuteur à Marteau*.

LITHOXIDURIA, from *λίθος*, 'a stone,' *οξίς*, and *ουρον*, 'urine.' The discharge of urine containing lithic or xanthic oxide.

LITHURIA, *Lithourrhæa* (Piorry;) from *λίθος*, 'a stone,' and *ουρον*, 'urine.' The condition of the system in which deposits of lithic acid and the lithates take place from the urine. See Urine.

LITHUS, Calculus.

LITMUS, Lichen roccella.

LITRA, Pound.

LITRE, *Litra*. A measure containing a cubed decimetre, which is equal nearly to 2.1135 pints. The ancients gave the name *litra*, *λίτρα*, to a measure capable of containing 16 ounces of liquid.

LITUS, Liniment.

LIVÈCHE, Ligisticum levisticum.

LIVER, Sax. *lifer*, *Hepar*, *Jecur*, *Jec'imus*, (F.) *Fois*. The liver is the largest gland in the body. It is an azymous organ; unsymmetrical; very heavy; and of a brownish-red colour; occupying the whole of the right hypochondrium, and a part of the epigastrium. *Above*, it corresponds to the diaphragm; *below*, to the stomach, transverse colon, and right kidney; *behind*, to the vertebral column, aorta, and vena cava; and *before*, to the base of the chest. Its upper surface is convex; the lower, irregularly convex and concave, so that anatomists have divided the organ into three lobes,—a *large* or *right* or *colic* lobe;—a *lesser* lobe, *lobule*, or *inferior* lobe, the *Lobulus Spigelii*;—and a *middle* or *left* lobe. At its inferior surface, are observed;—1. A *Sulcus* or *Furrow* or *Fissure*, called *horizontal* or *longitudinal*, *Great fissure*, *Fossa Umbilicalis*, (F.) *Sillon horizontal*, *longitudinal*, *S. de la veine ombilicale*; *Sulcus antero-posterior* *Jec'oris*, *S. horizontalis Jec'oris*, *S. longitudinalis Jec'oris*, *S. sinister Jec'oris*, *S. Umbilicalis*, which lodges, in the fœtus, the umbilical vein and ductus venosus. 2. The *Principal Fissure*, termed *Sulcus Transversus* vel *Sinus Porta'rum*, *Fissure of the Vena porta*, *Portal Fissure*, (F.) *Sillon transversal* ou *de la veine porte*, which receives the sinus of the vena porta. 3. The *Fissure of the Vena Cava inferior*, *Sillon de la veine cava inférieure*, situate at the posterior margin of the organ, and lodging the vena cava inferior. 4. The *Lobulus Spigelii*, or *posterior portal eminence*. 5. The *anterior portal eminence*, *Auriga* vel *Lobulus anonymus*. 6. Depressions corresponding to the upper surface of the stomach, gall-bladder, arch of the colon, right-kidney, &c. Continued from the fossa umbilicalis is a small fossa, called *Fossa Ductus Veno'si*, between the left lobe and Lobulus Spigelii. The posterior margin of the liver is very thick; much more so than the anterior. The liver is surrounded by a serous or peritoneal covering, which forms for it a *suspensory* or *broad ligament* and two *lateral* and *triangular* ligaments. See *Falx*. The blood-vessels of the liver are very numerous. The hepatic artery and vena porta furnish it with the blood necessary for its nutrition and the secretion of bile. The hepatic veins convey away the blood, which has served those purposes. The lymphatic vessels are very numerous; some being superficial; others deep-seated. The nerves are, also, numerous, and proceed from the pneumogastric, diaphragmatic, and from the hepatic plexuses.

The intimate structure of the parenchyma of the liver is not understood. When cut, it presents a porous appearance, owing to the division of a multitude of small vessels. When torn, it seems formed of granulations;—the intimate structure of which has given rise to many hypotheses. In these granulations are contained the radicles of the excretory ducts of the bile; the union of which constitutes the

hepatic duct. According to M. Kiernan, the intimate structure consists of a number of lobules composed of *intralobular* or hepatic veins, which convey the blood back that has been inservient to the secretion of bile. The interlobular plexus of veins is formed by branches of the vena porta, which contain both the blood of the vena porta and of the hepatic artery; both of which, according to Mr. Kiernan, furnish the pabulum of the biliary secretion. The biliary ducts form likewise an interlobular plexus, having an arrangement similar to that of the interlobular veins. Mr. Kiernan's views are embraced by many anatomists; but are denied by some.

The liver is the only organ, which, independently of the red blood carried to it by the hepatic artery, receives black blood by the vena porta. The general opinion is, that the vena porta is the fluid which furnishes bile, whilst that of the artery affords blood for the nutrition of the liver. It is probable, however, that bile is secreted by the latter vessel.

The liver is liable to a number of diseases. The principal are—*Hepatitis* or *inflammation*, *cancer*, *biliary calculi*, *encysted* and other *tumours* or *tubercles*, *hydatids*, &c., and it has, at times, been the *fashion* to refer to it as the cause of symptoms with which it is in no wise connected.

LIVER, *Hepar*. Under this name the ancients designated several substances, having a brownish colour, analogous to that of the liver; and composed of sulphur and some other body. See Potassæ Sulphuretum, *Liver of Sulphur*.

LIVER of Antimony is the semi-vitreous sulphuret, &c.

LIVER, GRANULATED, Cirrhosis of the liver—1. Gin-drinkers', Liver, Nutmeg—1. Granular, Cirrhosis of the liver.

LIVER-GROWN, *Tumido jec'orè præditus*. Having a large liver.

LIVER, HOBNAIL, Cirrhosis of the liver—1. Mammillated, Cirrhosis of the liver.

LIVER, NUTMEG. An appearance of the liver when cut across, resembling that of the section of a nutmeg; supposed by some to be the result of intemperance in the use of alcoholic drinks; but occurring under other causes. The terms *whisky liver*, and *gin-drinkers' liver*, occasionally applied to it, are, consequently, not distinctive.

LIVER SPOT, Chloasma—1. Tuberculated, Cirrhosis of the liver—1. Weed, Hepatica triloba—1. Whisky, Liver, nutmeg—1. Wort, Hepatica triloba, *Marchantia polymorpha*—1. Wort, ground, ash-coloured, Lichen caninus—1. Wort, Iceland, Lichen Islandicus—1. Wort, noble, Hepatica triloba.

LIVIDUS MUSCULUS, Pectinalia.

LIVOR, Suggillation—1. Sanguineus, see Ecchymoma.

LIVRE, Pound.

LIXIVIA TARTARIZATA, Potassæ tartas—1. Vitriolata, Potassæ sulphas—1. Vitriolata sulphurea, Potassæ sulphas cum sulphure.

LIXIVLE seu KALICUM ACETAS, Potassæ acetas.

LIXIVIAL, *Lixiviosus*; from *lixivium*, 'lee.' (F.) *Lixivial*, *Lixiviosus*. An ancient term for salts obtained by washing vegetable ashes,—such as the fixed alkalis.

LIXIVIA'TION, *Elxiviation*, *Lixiviat'io*,

same etymon. An operation which consists in washing wood ashes with water, so as to dissolve the soluble parts. The filtered liquor is the *lee*.

**LIXIVIUM**, *Lixiv'ia*, *Con'ia*, *Lee*, *Ley*, *Lye*, (F.) *Lessive*. Any solution containing potass or soda—*Sal lixivio'sum*—in excess; from *lix*, 'potash.'

**LIXIVIUM AMMONIACALE**, *Liquor ammoniac*—1. Ammoniacale aromaticum, Spiritus ammoniac aromaticus—1. Causticum, *Liquor potassæ*—1. Magistrale, *Liquor potassæ*—1. Saponarium, *Liquor potassæ*—1. Tartari, *Liquor potassæ subcarbonatis*.

**LIZARD**, *Lacer'ta*, *Lacer'tus*, said to be so called in consequence of its limbs resembling the arms (*lacerti*) of man (?). *Saura*, *Sauros*, (F.) *Lizard*. Lizards were formerly employed in medicine as sudorifics; and were, at one time, extolled in syphilis, cutaneous affections and in cancer.

**LOADSTONE**, *Magnet*.

**LOATHING**, *Disguat*.

**LOBARIA PULMONARIA**; *Lichen pulmonarius*.

**LOBE**, *Lobus*. A round, projecting part of an organ. The liver, lungs and brain, for example, have lobes.

**LOBE OF THE EAR**, *Lob'ule of the Ear*, is a soft rounded prominence, which terminates the circumference of the pavilion inferiorly, and which is pierced in those who wear rings.

The under surface of the brain is divided into *two anterior*, *two lateral*, *two posterior*, and two intermediate *lobes* or *processes*. These Chaussier calls *lobules* of the brain: the cerebral hemispheres he terms *lobes*.

**LOBE**, *BIVENTRAL*. A wedge-shaped lobe of the cerebellum, situate behind the amygdala.

**LOBE DUODENAL**, *Lobulus Spigelii*—1. *Pancréatique*, *Lobulus Spigelii*—1. *Petit du foie*, *Lobulus Spigelii*—1. *de Spigel*, *Lobulus Spigelii*. **LOBELIA**, *BLUE*, *L. syphilitica*.

**LOBELIA CARDINALIS**, *Lobelia coccin'ea*, *Trachelium Americ'anum*, *Cardinal Plant*, *Cardinal Flower*, *Scarlet Lobelia*. This species is also indigenous in the United States. It blooms in autumn, having beautiful carmine flowers. The root is a reputed anthelmintic with the Indians.

**LOBELIA COCCINEA**, *L. Cardinalis*.

**LOBELIA INFLATA**, *Indian Tobacco*, *Wild Tobacco*, *Puke Weed*, *Asthma Weed*, *Eyebright*, *Emetic Weed*, *Lobelia* (Ph. U. S.) The prominent virtues of this American plant are those of an emetic. In smaller doses it is sedative, and has been given as a pectoral in croup, asthma, &c. It is, also, sudorific and cathartic, and is an acronarcotic poison. Twenty grains act as an emetic.

**LOBELIA SCARLET**, *L. Cardinalis*.

**LOBELIA SYPHILITICA**, *Lobelia reflex'a*, *Raman'culus Virginia'nus*, *Blue Lobelia*, *Blue Cardinal Flower*. The root of this plant which is indigenous in the United States, is an emetic and drastic cathartic. It has been used against syphilis; hence its name. The mode of preparing it is to boil  $\frac{3}{4}$ ss of the *dried root* in Oxij of water, until the fluid is reduced to Oviij. Dose, Oss.

**LOBES, CEREBRAL**, see *Lobe*.

**LOBES OF THE LIVER**, *Pinnæ seu Lob' seu Pin'nule Hæpatis*. See *Lobule*.

**LOBES, OPTIC**, *Quadrifemina tubercula*.

**LOBI HEPATIS**, *Lobes of the liver*—1. *Pulmonum*, see *Pulmo*.

**LOBULAR**, *Lobula'ris*. Same etymon as *Lobule*. Relating to or belonging to a lobule:—as *lobular pneumonia*, (F.) *Pneumonia lobul'aire*, *P. mamelonée*, *P. disséminée*; pneumonia anatomically characterized by nuclei of red or gray hepatization disseminated in variable numbers in one or both lungs.

**LOBULE**, *Lob'ulus*, diminutive of *Lobus*. A little lobe. Mr. Kiernan uses the term *lobule* for the *acinus* of the liver of many anatomists.

**LOBULE OF THE CORPUS STRIATUM**, *Insula cerebri*—1. of the Ear, *Lobe of the Ear*—1. of the Fissure of Sylvius, *Insula cerebri*.

**LOBULE DU FOIE**, *Lobulus Spigelii*.

**LOBULUS ACCESSORIUS ANTERIOR QUADRATUS**, *L. anonymus*.

**LOBULUS ANONYMUS**, *L. accessorius anterior quadratus*, *L. quadratus*, (F.) *Eminence porte antérieure*. This is situate in the liver between the passage for the round ligament and the gall-bladder, and is less prominent, but broader than the *Lobulus caudatus*. From the lobulus anonymus a bridge runs across the passage for the round ligament. It is called *Pons vel Isthmus hæpatis*.

**LOBULUS CAUDATUS**, *Processus caudatus*. This is merely the root or one of the angles of the lobulus Spigelii, advancing towards the middle of the lower side of the great lobe, and representing a kind of tail.

**LOBULUS POSTERIOR**, *L. Spigelii*—1. *Posticus papillatus*, *L. Spigelii*—1. *Quadratus*, *L. anonymus*.

**LOBULUS SPIGELII**, *L. posterior*, *L. posticus papillatus*, (F.) *Eminence porte postérieure*, *Lobule ou Petit lobe du foie*, *Lobe de Spiegel*, *Lobe duodénal*, *L. pancréatique*, is situate near the spine, upon the left side of the great lobe of the liver, and is of a pyramidal shape, projecting, like a nipple, between the cardia and vena cava, at the small curvature of the stomach.

**LOBUS**, *Lobe*.

**LOCAL**, *Local'is*, *Top'icus*, *Mor'icus*, *Partia'lis*, *Top'ical*, (F.) *Locale*, *Topique*. An affection is called local—*Morbus Local'is*,—when confined to a part, without implicating the general system; or, at all events, only secondarily. *Local* is thus opposed to *general*. A *local* or *topical application* is one used externally. See *Topical*.

**LOCH**, *Looch*.

**LOCHADES**, see *Sclerotic*.

**LOCHIA** or **LOCHIA**, *Purgament'a Puerper'is seu Uteri*, *Purgatio puerper'is*, *Lyma*, from  $\lambda\omicron\chi\epsilon\iota\varsigma$ , ('a woman in childbed') (F.) *Suites de couches*, *Vidanges*. The *cleansings*. A serous and sanguineous discharge following delivery. During the first two or three days, it is bloody, but afterwards becomes green-coloured, and exhales a disagreeable and peculiar odour. The duration, quantity and character of the discharge vary according to numerous circumstances. It flows from the part of the uterus which formed a medium of communication between the mother and fetus, and continues, usually, from 14 to 21 days. See *Parturition*.

**LOCHIOCELITIS**, *Puerperal fever*.

**LOCHIODOCHIUM**, *Lochodochium*.

**LOCHIOPYRA**, *Puerperal fever*.

**LOCHIORRAGIA**, from  $\lambda\omicron\chi\epsilon\iota\varsigma$ , and,

ἄγρυμμι, 'I make an irruption.' An immoderate flow of the lochia. Hemorrhage from the uterus in the childbed state.

LOCHIORRHEA, from λοχία, 'the lochia,' and ῥεω, 'I flow.' The discharge of the lochia.

LOCHIORUS RETENTIO, Ischolochia.

LOCHIOSCHESIS, Ischolochia.

LOCHOSCH, Looch.

LOCHODOCHYUM, *Lochiodochium*, from λυγός, 'a female in childbed,' and δειγμαί, 'I receive.' An institution for the reception of pregnant and childbed females. A *Lying-in hospital*.

LOCHOS, Puerpera.

LOCI, Uterus—*l. Muliebres*, Uterus, Vulva.

LOCKED JAW, Trismus.

LOCOMOTILITY, see Locomotion.

LOCOMOTION, *Locomotio*, from *locus*, 'a place,' and *movere*, 'to move.' An action peculiar to animal bodies, by which they transport themselves from place to place. The faculty is sometimes called *Locomotivity* and *Locomotility*.

LOCOMOTION OF AN ARTERY, is the movement produced in a vessel with a curvature, by the impulse of the blood sent from the heart, which tends to straighten the artery, and causes the movement in question.

LOCOMOTIVITY, see Locomotion.

LOCUS NIGER, see Peduncles of the Brain.

LOCUS PERFORATUS ANTIQVUS. A triangular flat surface of the brain, which corresponds to the posterior extremity of each olfactory process.

LOCUS PERFORATUS POSTICUS, Tarini pons.

LOCUST EATERS, Acridophagi—*l. Plant*, Cassia Marilandica—*l. Tree*, Robinia Pseudo-acacia—*l. Yellow*, Cladrastis tinctoria.

LODOICEA, see Coco of the Maldives.

LOECHE, MINERAL WATERS OF, Leuk, mineral waters of.

LOEME, Plague.

LOEMIA, Plague.

LOEMICUM, see Læmology.

LOEMOCHOLYSIS, Fever, yellow.

LOEMOGRAPHY, Loimography.

LOEMOLOGIUM, see Læmology.

LOEMOLOGY, *Læmolog'ia*, from λοιμός, 'plague,' and λογός, 'a description.' The doctrine of plague and pestilential diseases. A treatise on the same.—*Læmicum*, *Læmolog'ium*.

LOEMOPHTHALMIA, see Ophthalmia.

LOEMOPYRA, Plague.

LOEMOS, Plague.

LOGADES, Sclerotic.

LOGADITIS, Sclerotitis.

LOGIATROS, *Logiater*; from λογός, 'a word,' and ιατρός, 'a physician.' In the bad sense, a physician without experience; a mere theorist. In the good sense, a rational physician; one who treats disease according to theoretical or scientific principles.

LOGOS, Reason.

LOGWOOD, *Hæmatoxyton Campechianum*.

LOG'Y, λογός, 'a description.' A suffix denoting 'a treatise or description.' Hence, *Angiology* and *Neurology*, &c.

LOHOCH, Looch.

LOIMOCHOLYSIS, Fever, yellow.

LOIMOGRAPHY, *Loimograph'ia*, *Læmography*, from λοιμός, 'plague,' and γραφή, 'I describe.' A description of the plague and pestilential diseases.

LOIMOLOGY, Læmology.

LOIMOS, Plague.

LOINS, Lumbi.

LOLIACEUM RADICE REPENTE, *Triticum repens*.

LOMBAIRE, Lumbar.

LOMBO-ABDOMINAL, *Transversalis abdominalis*—*l. Costal*, *Serratus posticus inferior*—*l. Costo-trachélien*, *Sacro-lumbalis*—*l. Dorso-spinal*, *Transversalis dorsi*—*l. Dorso-trachélien*, *Longissimus dorsi*—*l. Humeral*, *Latissimus dorsi*—*l. Sacri*, *Lumbo-sacral*.

LOMBRIC, *Ascaris lumbricoides*.

LOMBRICOÏDE, *Ascaris lumbricoides*.

LONCHADES, see Sclerotic.

LONCHADITIS, Sclerotitis.

LONCHITIS, *Polypodium filix mas*.

LONG, *Longus*, *Macros*. That which is much greater in length than in breadth; as the *long bones*. The epithet is, also, applied to several muscles, to distinguish them from others of similar function, when the latter are shorter. We say, for instance, *long flexors*, and *long extensors*, in opposition to *short flexors*, and *short extensors*.

LONG DU COU, *Longus colli*—*l. du Dos*, *Longissimus dorsi*.

LONGÆVUS, Macrobiotic.

LONGANON, Rectum.

LONGAON, Rectum.

LONGAS, Rectum.

LONGEVITY, *Longævitas*, *Macrobi'osis*, *Macrobi'otes*. The prolongation of existence to an advanced age. Haller collected examples of more than one thousand centenarians. He had knowledge of sixty-two persons aged from 110 to 120 years; of twenty-nine, from 120 to 130 years; and of fifteen, who had attained from 130 to 140 years. Beyond this advanced age, examples of longevity are much more rare and less sufficiently attested.

The following list of instances of very advanced ages has been given:

	Lived.	Age.
Apollonius of Tyana, A. D.	99	130
St. Patrick, . . . . .	491	122
Attila, . . . . .	500	124
Llywarch Hên, . . . . .	500	150
St. Coemgene, . . . . .	618	120
Piastus, King of Poland, . . . . .	861	120
Thomas Parr, . . . . .	1635	152
Henry Jenkins, . . . . .	1670	169
Countess of Desmond, . . . . .	1612	145
Thomas Damme, . . . . .	1648	154
Peter Torten, . . . . .	1724	185
Margaret Patten, . . . . .	1739	137
John Rovin and wife, . . . . .	1741	172 and 164
St. Monagh or Kentigen, . . . . .	1781	185

LONGISSIMUS DORSI, *Semi-spina'tus*, (*F. Lombo-dorso-trachélien*, *Portion costo-trachélienne du sacro-spinal*, (Ch.) *Long dorsal*, *Long du dos*, is situate vertically at the posterior part of the trunk, and fills, in a great measure, the vertebral furrows. It is thick and almost square below; thin and pointed above. It is attached to the posterior surface of the sacrum, to the transverse processes of all the lumbar and dorsal vertebrae, and to the inferior margin of the last 7 or 8 ribs. It maintains the vertebral column in a straight position; straightens it when bent forwards, and can even carry it back. It also assists in the rotatory motion of the trunk.

LONGISSIMUS FEMORIS, Sartorius—l. Oculi, Obliquus superior oculi.

LONG-SIGHTEDNESS, Presbytia.

LONGUS COLLI, (F.) *Pré-dorso-cervical*, *Pré-dorso-atloïdien*, (Ch.) *Long du cou*. This muscle is situate at the anterior and superior part of the vertebral column. It is long, flat, and broader at its middle than at its extremities, which are pointed. It is attached to the anterior surface of the bodies of the first three dorsal and last six cervical vertebrae; to the intervertebral ligaments; to the anterior edge of the transverse processes of the last five cervical vertebrae; and to the tubercle on the anterior arch of the first. This muscle bends the cervical vertebrae upon each other and upon the dorsal vertebrae. If the upper portion acts on one side only, it occasions the rotation of the atlas on the vertebra dentata; and, consequently, of the head on the neck.

LONGICE'RA PERICLYM'ENUM, *Peryclim'enum*, *Caprifolium*, *Common Woodbine*, (F.) *Chevre-feuille*. This common plant is slightly astringent and tonic, and was formerly much used in gargles.

LOOCH, *Lokoch*, *Loch*, *Lochoch*, *Look*. A linctus. See Eclegma and Eclectos.

LOOCH ABSQUÉ EMULSIONÉ PARA'TUM, *Loch préparé sans émulsion*; *Looch prepared without emulsion*. (Pulv. g. trag. gr. xvj—gr. xxx, ol. amygd. dulc. ℥ss. sacchar. ℥j, aqua ℥ij, aqua flor. aurant. ℥ij. Mix by rubbing in a marble mortar.) Demulcent.

LOOCH ALBUM, *Looch amygdal'num*, *Linctus albus*, *L. amygdalinus*, *L. coman'nis*, *Eclegma album*, *Eclegma gummo'so-oleo'sum*, (F.) *Looch blanc*, *L. b. amygdal'is*, *L. b. pectoral*. (*Amygd. dulc. ℥ss*, *amygd. amar. No. ij*, *sacchar. alb. ℥iv*. Make an emulsion by gradually adding ℥iv of water. Then take pulv. tragacanth. gr. xvj, ol. amygd. dulc. recent. ℥ss, sacch. ℥ij. Add the almond milk gradually to this, and afterwards *aq. flor. aurant. ℥ij*, *Ph. P.*) It is demulcent and pectoral.

LOOCH AMYGDALINUM, *L. album*—l. *Blanc*, *L. album*—l. cum Croco et pistaciis, *L. viride*—l. of Egg, *L. ex Ovo*.

LOOCH EX OVO, *Potio seu emul'sio seu mistu'ra leniens seu oleo'sa*, *Looch pectoral'is leniens*, *Looch of Egg*, (F.) *Looch d'œuf*, *Looch rouge*, *Emulsion huileuse*, *Mixture calmante*, *Potion pectorale*, *Lait adoucissant*. (*Vitell. ovi. recent. ℥ss*, *ol. amygd. dulc. ℥ias*, *syrup. althææ, ℥j*. Rub in a mortar, and add by degrees, *aq. flor. aurant. ℥j*, *aq. papav. rhoad. ℥ij*, *Ph. P.*) Virtues the same as the preceding.

LOOCH ROUGE, *L. ex Ovo*—l. *Vert*, *L. viride*.

LOOCH VIR'IDÈ, *Looch cum crocè et pista'ciis*, (F.) *Looch vert*. (*Syrup. Violar. ℥j*, *tinct. croci gr. xx*, *aqua ℥iv*. Mix, and add *pistacia semin. sicc. ℥vj*, *Ph. P.*) Virtues like the last.

LOOK, *Looch*—l. *d'œuf*, *Looch ex ovo*—l. *Préparé sans émulsion*, *Looch absque emulsiōe paratum*.

LOOSE STRIFE, CREEPING, *Lysimachia nummularia*.

LOOSENESS, Diarrhœa—l. of the Teeth, Odontoseisis.

LOPEZ RADIX, *Radix lopezia'na*, *Radix Indica lopezia'na*. The root of an unknown Indian tree, not possessed of any remarkable

smell or taste, or of any appearance of resinous matter. It has been extolled, notwithstanding, in cases of colliquative diarrhœa. Gaubius compares its action to that of simarouba, but thinks it more efficacious.

LOPHADIA, *Lophia*.

LOPHIA, *Lophadia*. The first vertebra of the back,—*Vertebra dorsi prima*.—Gorræus.

LOPIMA, *Fagus castanea*.

LOQUAC'ITY, *Garrulitas*, from *loquer*, 'I speak.' (F.) *Babillement*. The act of speaking with volubility. It is sometimes a symptom of disease, and is observable in hysteria, &c.

LOQUELA, Voice, articulated—l. *Abolita*, *Aphonia*—l. *Blassa*, *Balbuties*—l. *Impedita*, *Baryphonia*.

LORDO'SIS, *Lordo'ma*, from *λορδός*, 'curved,' 'bent;' *Rependa'tio*, *Repan'ditas*. A name given to curvatures of the bones in general; and particularly to that of the vertebral column forwards; *Spina dorsi intror'sum flexa*, *Emprosthocyrto'ma*. This gives rise to the projection of the sternum called *chicken-breasted*.

LORIND MATRI'CIS, *Epilepsia uteri'ma*, *Convulsivus uteri morbus*. A barbarous name given to a pretended epilepsy of the womb.

LOT, Urine.

LOTIO, Enema, Lotion—l. *Saponacea*, see Sapo.

LOT'ION, *Lo'tio*, *Lotu'ra*, from *lavare*, *lotum*, 'to wash.' (F.) *Hydrolotif*. A fluid external application. Lotions are ordinarily applied by wetting linen in them and keeping it on the part affected.

LOTION, GOWLAND'S. An empirical preparation. (*Bitter almonds, ℥j*, *sugar, ℥ij*, *distilled water, ℞ij*. Grind together, strain, and add *corrosive sublimate, ℞ij*, previously ground with *sp. vini rect. ℞ij*.) Used in obstinate eruptions.

LOTION, GRANVILLE'S COUNTER IRRITANT, *Granville's Lotion*, *Granville's antid'gmous lotion*. Of this lotion, Dr. Granville gives two forms—a milder, and a stronger. The milder is made, as follows: *Liq. ammon. fort. f. ℥j*, *Sp. Rosmarin. f. ℥vj*, *Tinct. camphor. f. ℥ij*, *M. The stronger is made as follows: Liq. ammon. fort. f. ℥x*, *Spir. Rosmar. f. ℥ss*, *Tinct. camphor. f. ℥ij*, *M.*

The stronger lotion vesicates rapidly. A piece of cotton or linen folded six or seven times, or a piece of thick flannel may be imbued with them, and laid on the part to be irritated for a few minutes.

LOTION, HANNAY'S, *Preventive wash*. This famous nostrum, for the prevention of venereal infection, was nothing more than a solution of caustic potass.

LOTION, HYDROCYAN'IC, *Lotio Ac'idi Hydrocyan'ici*. (*Hydrocyanic acid, f. ℥iv*, *rectified spirit of wine, f. ℥j*, *distilled water, f. ℥ss*.) Used with much success in impetigo, &c.

LOTION, STRUVE'S, FOR HOOPING-COUGH. (*Antim. et Potass. tart. ℥j*, *Aqua, ℥ij*. Add *tinct. cantharid. ℥j*.)

LOTIUM, Urine.

LOTURA, Lotion.

LOTUS SYLVESTRIS, *Trifolium melilotus*—l. *Virginiana*, *Diospyros Virginiana*.

LOUCHEMENT, *Strabismus*.

LOUGHES, see *Strabismus*.

LOUPE, Wen.

LOUSE, Pediculus.  
 LOUSINESS, Phtheiriasis.  
 LOUSY DISEASE, Phtheiriasis.  
 LOUTRON, Bath.  
 LOVEAGE, Ligusticum levisticum.  
 LOVE, *Eros, amor*, from Sax. *lupian*, (G.) *lieben*, 'to love.' (F.) *Amour*. A tender and elevated feeling, which attracts one sex to the other. Love is occasionally a cause of disease, especially of insanity.  
 LOVE APPLE PLANT, *Solanum lycopersicum*—1. Pea, *Abrus precatorius*.  
 LOW SPIRITS, Hypochondriasis.  
 LOWER, TUBERCLE OF, *Tuber culum Loweri*. Anatomists have given this name to a small projection, the existence of which is by no means constant, and which is found in the sinus venosus, between the superior and inferior cava.  
 LOXAR'THRUS, *Lozar'thrum*, from *λοξος*, 'oblique,' and *ἄρθρον*, 'articulation;' (F.) *Perversion de la tête des os et des muscles*. A vicious deviation or direction of the joints, without spasm or luxation,—as in *clubfoot*.  
 LOXIAS, Torticollis.  
 LOXOPHTHALMUS, Strabismus.  
 LOZANGIA, Lozenge.  
 LOZENGE, Tabella.  
 LOZENGES, BARK, *Tabellæ cinchonæ*—1. of Catechu and magnesia, *Tabellæ antimonialis Kunckelii*—1. Faustinus's, Faustini pastilli—1. for the Heart-burn, *Trochisci carbonatis calcis*—1. Magnesia, *Tabellæ de magnesiâ*—1. of Marshmallows, *Tabellæ de althæâ*—1. of Oxalic acid, *Tabellæ acidi oxalici*—1. Pectoral, black, *Trochisci glycyrrhizæ glabræ*—1. Pectoral, of emetine, *Trochisci emetinæ pectorales*—1. Rhubarb, *Tabellæ de rheo*—1. of Scammony and senna, compound, *Tabellæ de scammonio et sennâ*—1. Spitta's, see *Trochisci glycyrrhizæ cum opio*—1. Steel, *Tabellæ de ferro*—1. of Steel, aromatic, see *Tabellæ de ferro*—1. Sulphur, simple, *Tabellæ de sulphure simplicis*—1. Sulphur, compound, *Tabellæ de sulphure compositæ*—1. of Sulphuret of antimony, *Tabellæ antimonialis Kunckelii*—1. Worm, Ching's, see *Worm lozenges*, (Ching's.)  
 LUBIDO, Libido—1. *Intestini*, *Voluntas sedendi*.  
 LUBRICANTIA, Demulcents, Emollients.  
 LUBRICUM CAPUT, Penis.  
 LUCCA, MINERAL WATERS AND CLIMATE OF. The baths and waters, near this ancient Italian city, have been long celebrated. They are thermal, and resemble, in properties, those of Plombières in France, and of Bath in England. They contain carbonic acid, sulphates of alumina, soda, magnesia, and iron. There are ten different sources, the temperature of which varies from 94° to 130° Fahr.  
 Lucca is much frequented in summer; partly on account of its mineral waters, but more on account of the coolness of the situation.  
 LUCID, *Lucidus*. In medicine, the word *lucid* is particularly applied to the *intervals*, *Intervalia lucida*, of apparent reason, which occur in mental alienation.  
 LUCIFUGUS, from *lux, lucis*, 'light,' and 'fugere,' 'to shun;' *Photophobus*, *Photophobia*. Dreading or avoiding the light.  
 LUCINA, Ilithia.  
 LUCOMANIA, Lycanthropia.  
 LUCUMA, (S.) A fruit which grows in

the southern provinces of the coast of Peru, and the north of Chili. It is round; and the gray-brown husk encloses a fibrous, dry, yellow-colored fruit with its kernel.—Tschudi.  
 LUCUMORIANUS; probably from *Lux*, 'light,' and *morari*, 'to tarry.' Continuing for several days; hence, *Dormitio lucumoriâna*. A morbid sleep persisting for several days,  
 LUDUS HELMONTII, *L. Paracel'si, Fel terre*. A calcareous stone, the precise nature not known, which was used by the ancients in calculous affections. The term was also applied to every species of calculous concretion occurring in the animal body.  
 LUDUS PARACELSI, *L. Helmontii*.  
 LUES, Disease, Plague, Syphilis—1. Divina, Epilepsy—1. Dysenterica, Dysentery—1. Gonorrhœica, Gonorrhœa impura—1. Gutturia epidemica, Gynanche maligna—1. Indica, Frambœsia—1. Inguinaria, Plague—1. Polonica, Plica—1. Sarmatica, Plica—1. Syphilis, Syphilis—1. Syphilodes, Syphilis pseudo-syphilis—1. Trichomatia, Plica—1. Venerea, Syphilis—1. Scorbutica, see *Purpura*.  
 LUETTE, *Uvula*—1. *Vésicale*, see *Urinary bladder*.  
 LUGDUS, Erysipelas.  
 LUJULA, *Oxalis acetosella*.  
 LULLABY SPEECH, Lallation.  
 LUMBA'GO, from *Lumbi*, 'the loins,' *Arthro'sia lumborum, Lumbago rheumatica, Nephral'gia rheumatica, Rhachirrhœma, Rachiorrhœma, Rheumaticus mus dorsalis, Osphyrhœma*. Rheumatism affecting the lumbar region.  
*Lumbago psoad'ica, L. apostomato'sa, L. ab arthro' acb.*—Pain in the loins from abscess. See *Psoitis*.  
 LUMBAGO A NISU, see *Effort*.  
 LUMBAR, *Lumbaris vel Lumbalis*, (F.) *Lombairs*. Belonging or having reference to the loins.  
 LUMBAR ABSCESS, *Psoas abscess, Apostoma psoad'icum, Abscessus lumborum, Morbus psoad'icus*. This abscess is so called from the matter being found on the side of the psoas muscle, or betwixt that and the iliacus internus. Between these muscles is a quantity of loose, cellular substance; and, when an abscess takes place there, it can find no outlet except by a distant course. Generally, it descends along the psoas muscle, forming a swelling immediately beneath Poupart's ligament; at times, however, it extends down the thigh under the fascia. Severe hectic follows the bursting of the abscess, and often death. Its causes are,—scrofula, injury to the loins, &c.  
 When, from the pain of the back continuing for some time, with other symptoms, the disease is suspected, caustics, or the moxa, applied opposite the transverse processes of the lumbar vertebræ, must be recommended; and, when the abscess is ready for opening, it may be emptied by repeated discharges of the matter, through a small opening, made with a lancet, or small lancet-pointed trocar. The medical treatment will consist in supporting the system, under the great restorative efforts required of it.  
 LUMBAR ARTERIES are four or five in number on each side. They arise from the sides of the abdominal aorta, and pass behind the muscles situate in front of the lumbar portion of the spine, to gain the broad muscles of the abdomen.

They give off, 1. Spinal branches. 2. Anterior, posterior, and external muscular branches.

**LUMBAR NERVES** are five in number, and issue from the vertebral column by the spinal foramina of the loins. The first lumbar nerve gives off three branches:—the *external* or *ilio-scrotal*; the *middle* or *inguino-cantaneous*, and the *internal* or *infra-pubian*. Along with the three pairs below it, it forms the lumbar plexus.

**LUMBAR PLEXUS**, *Portion lombaire du plexus crural* (Ch.), *Plexus Lombo-abdominal*. This plexus is formed by the union of the *Rami communicantes* of the anterior branches of the first four lumbar nerves. It is situate behind the *psaos* muscle, and before the transverse processes of the lumbar vertebræ. It furnishes, besides the branches which proceed from the first pair, several filaments, that are distributed to the *psaos* muscle, to the *iliacus*, the integuments, and glands of the groin; and three great branches—the *crural*, *obdurator*, and *lumbo-sacral*.

**LUMBAR REGION**, *Lumbi*.

**LUMBAR VEINS** have an arrangement analogous to that of the arteries of the same name. They communicate with the vertebral sinuses, azygous veins, &c., and pass into the *vena cava inferior*.

**LUMBARIS EXTERNUS**, *Quadratus lumborum*—1. *Internus*, *Psoas magnus*.

**LUMBI**, *The loins, the lumbar region, Regio lumbalis, Lap'ara, Psoa, Osphys*. The posterior regions of the abdomen, comprised between the base of the chest and the pelvis. The parts which enter into the formation of the lumbar region, are—the skin; a considerable quantity of cellular texture; broad and strong aponeuroses;—the *Latissimus Dorsi*, *Obliquus externus*, and *Obliquus internus abdominis*, *Transversalis abdominis*, *Quadratus lumborum*, and the mass common to the *Sacro-lumbalis*, *Longissimus dorsi* and *Multifidus spinae*. These muscles surround the lumbar region of the vertebral column. The vessels, nerves, &c., of the loins, are called *lumbar*.

**LUMBO-SACRAL**. Belonging to the lumbar and sacral regions. (F.) *Lombo-sacré*. Bichat calls thus a very large nerve, given off from the anterior branch of the fifth lumbar pair, which descends into the pelvis before the sacrum to join the sciatic plexus.

**LUMBRICALIS**, *Vermicularis*. Resembling a *lumbricus*, or 'earthworm.' A name given to small muscles, met with in the palm of the hand and sole of the foot.

**LUMBRICALES MANUS**, *Fidicind'les, Flexor primi internodii digitorum manûs vel perforatus lumbroca'lis*, (F.) *Annuli-tendino-phalangiens*, *Palmi-phalangiens*. Four small, fleshy, thin, round, long, fusiform fasciculi, situate in the palm of the hand, and distinguished into first, second, third, and fourth, counting from without to within. They arise from the tendons of the *flexor communis digitorum*, and are inserted at the outer and posterior side of the superior extremity of the first phalanges of the last four fingers. These muscles bend the fingers on the metacarpus, and fix the tendons of the *flexor digitorum communis*.

**LUMBRICALES PEDIS**, (F.) *Planti-tendino-phalangiens*, *Planti-sous-phalangiens*, (Ch.) They are analogous to those of the hand in form,

number, and arrangement. They increase the flexion of the toes, and draw them inwards.

**LUMBRICUS**, *Ascaris lumbricoides*—1. *Latus*, *Bothriocephalus latus*, *Tænia solium*—1. *Teres hominis*; *Ascaris lumbricoides*.

**LUMBUS VENERIS**, *Achillea millefolium*.  
**LUMEN**, Light, Pupil—1. *Constans*, *Phosphorus*.

**LUMIÈRE**, Light.

**LUNA**, Argentum, Moon—1. *Albini*, *Sciatic notch*, lesser—1. *Potabilis*, *Argenti nitras*.

**LUNAR**, Lunatic.

**LUNARÉ OS**, *Os semilunare*. The second bone in the upper row of the carpus.

**LUNARIA**, Menses.

**LUNARIA REDIVI'VA**, *Leucoium*, *Bulbonach*, *Satin*, *Honesty*. Said, by Ray, to be a warm diuretic.

**LUNARIS**, Lunatic.

**LUNATIC**, *Lunaticus*, *Lunaris*, *Lunarius*, *Lunar*, from *Luna*, 'the moon.' Relating to the moon. An epithet given to diseases which are supposed to appear at certain phases of the moon, or to those who are affected by them. The term *lunatic* is restricted to one labouring under lunacy, or mental alienation;—*Moonstruck*, *Selenobolus*.

**LUNATICUS**, Epileptic, Lunatic, Somnambulist.

**LUNATISMUS**, Somnambulism.

**LUNE**, Moon.

**LUNELLA**, Hypopyon.

**LUNES**, Menses.

**LUNETTES ORDINAIRES**, Spectacles.

**LUNG**, Pulmo—1. Black, of coal miners, *Anthraxosis*—1. Cancer of the Phthisis, cancerous—1. Fever, *Catarrh*, *Pneumonia*.

**LUNG**, PERFORATING ABSCESS OF THE. A purulent collection, which forms exterior to the lung, and afterwards perforates its tissue, so that it is evacuated through the bronchial tubes.

**LUNG** PROOF, *Docimasia pulmonum*—1. Wort, *Pulmonaria*—1. Wort, cow's, *Verbascum nigrum*—1. Wort, tree, *Lichen pulmonarius*.

**LUNULA UNGUIUM**, see Nail—1. Scapula; Notch, scapular.

**LUPIA**, Encystis, Wen—1. *Junctura*, *Spina ventosa*.

**LUPINUS**. Under this term the *white lupins*, *Lupinus albus*, is meant, in some pharmacopœias. The seeds, which were much eaten in the days of Pliny and of Galen, are now neglected. The meal is, however, occasionally used as an anthelmintic, and as a cataplasm.

**LUPULINA**, *Lupulin*, *Lupulinic glande*. A substance which exists in the *humulus lupulus* or hop. It is in the form of small, shining, yellowish grains, which cover the base of the scales of the hop; is pulverulent, and of an aromatic odour. When analyzed, it is found to contain resin, volatile oil in small quantity, and a bitter principle. It is aromatic and tonic, and—according to Dr. Ives—narcotic.

**LUPULINIC GLANDS**, *Lupulina*.

**LUPUS**, 'the wolf.' So named from its rapacity. *Ulcus Tuberculosum*, *Cancer lupus*, *Noli me tangere*, *Phymatosis lupus*. Tubercular excrescences, with ragged, spreading ulcerations, chiefly about the *ala nasi*, where they destroy the skin, &c., for some depth. Sometimes they appear in the cheek, circularly, or in the shape of a sort of ringworm, destroying

the substance and leaving a deep and deformed cicatrix. The knife or caustic should be used to separate the sound from the morbid parts. Arsenic has been given internally with advantage. See, also, *Lycoides*.

**LUPUS CANCROBUS**, Cancer—1. *Varicosus*, *Nævi*—1. *Vorax*, *Herpes exedens*.

**LURCO**, Glutton.

**LURID**, *Lu'ridus*. Pale, yellow, sallow;—applied to the complexion.

**LUROR**, Paleness.

**LUSCIOSITAS**, *Luscitas*, Myopia.

**LUSCIOSUS**, *Borgne*, Myops.

**LUSCITAS**, *Luscior'itas*, *Luscit'ias*. Strabismus. The term has also been given to all those cases of obliquity in which the eye is fixed in an unnatural position.—Beer.

**LUSCITIES**, *Luscitas*.

**LUSTRAMENTUM**, Cathartic.

**LUSCUS**, *Borgne*.

**LUTE**, Lute.

**LUTE**, *Lutum*, ('mud,') *Cæmentum*. (F.)

**Lut.** A composition employed either for closing apertures in a pharmaceutical instrument, or for covering the surface of retorts, tubes, &c., which have to support a great degree of heat. Lutes are composed differently, according to the object to be accomplished. Commonly they are made of linseed meal and starch. The *fat lute* is formed of clay and drying oil. Sometimes, the white of egg and lime are used; and that which is employed for covering vessels, intended to be strongly heated, is made of clay, sifted sand, and water.

**LUTEUS**, Yellow.

**LUTRON**, *Λουτρον*. A bath. Also, an ophthalmic medicine.—Galen.

**LUX**, Light.

**LUXATIO**, *Luxation*—1. Imperfecta, Sprain.

**LUXATION**, *Eluzation*, from *luxare*, 'to put out of place.' *Dislocation*, *Olisth'ema*, *Apops'asis*, *Luxatio*, *Dislocatio*, *Ec'clisis*, *Strem'ma*, *Luzatu'ra*, *Ectop'ia*, *Septo'is*, *Elop'sas*, *Lygis'mus*, *Emo'tio*, *Ec'stasis*, *Exarthr'ema*, *Exarthro'ma*, *Exarthro'ma luxatio*, *Exarthro'is*, *Ezo'nis*, *Exoth'esis*, *Paratop'ia*, *Streblo'is*, *Delocatio*, *Ezarticulatio*, (F.) *Luzation*, *Dislocation*, *Déboîtement*. A displacement of a part from its proper situation. A putting out of joint. A displacement of two or more bones, whose articular surfaces have lost, wholly, or in part, their natural connexion; either owing to external violence, (*accidental luxation*), or to disease of some of the parts about the joint (*spontaneous luxation*.) *Luxation* is *complete* when the bones have entirely lost their natural connexion; *incomplete*, when they partly preserve it; and *compound*, when a wound communicates with the luxated joint. The general indications of treatment, are;—1. To reduce the protruded bone to its original place. 2. To retain it *in situ*. 3. To obviate any attendant or consequent symptoms.

To reduce requires extension, counter-extension, and coaptation.

**LUXEUIL**, MINERAL WATERS OF. Saline waters, at the town of Luxeuil, at the foot of the Vosges, in the department of Haute Saône. Five springs are thermal, and two cpld. They seem to contain carbonic acid, carbonates of iron and lime, and chloride of sodium; and are employed as aperient, tonic, and stimulant.

**LYCAN'CHÈ**, *Lycan'chis*, from *λυκος*, 'a wolf,' and *αχ'ω*, 'I strangle.' *Wolf quinsey*, *Wolf choak*;—as *Cynanche* means *Dog choak*. Also, hydrophobia. See *Lycoides*.

**LYCANCHIS**, *Lycanche*.

**LYCANTHROPÈ**, see *Lycanthropia*.

**LYCANTHROPIA**, from *λυκος*, 'a wolf,' and *αν'θρωπος*, 'a man;' *Lycan'on*, *Insania lup'ina*, *Lycoman'ia*. A variety of melancholy, in which the person believes himself to be changed into a wolf, and imitates the voice and habits of that animal. One so circumstanced is called a *Lycanthrops*, *Lycanthropus*.

**LYCANTHROPUS**, see *Lycanthropia*.

**LYCAON**, *Lycanthropia*.

**LYCHNIDIUM**, *Biolychnium*.

**LYCHNIS SYLVESTRIS**, *Saponaria*.

**LYCHNIUM**, *Biolychnium*.

**LYCÔIDES**, *Lycoides*, from *λυκος*, 'a wolf,' and *ειδης*, 'form.' *Lupo similis*. An epithet for a species of cynanche, called, also, *Lupus*, and *Srangulato'r*, and absurdly attributed to excessive retention of sperm in its reservoirs and its passage into the blood (?).—Galen.

**LYCOPE DE VIRGINIE**, *Lycopus Virginicus*.

**LYCOPERDON**, from *λυκος*, 'a wolf,' and *πεδον*, 'I break wind;' *L. Bovis'ta*, *Crepit'us Lupi*, *Puff-ball*, *Bull Fists*, *Mol'lipuffs*, *Bovis'ta*, (F.) *Vessaloup*. The puff ball dries into a very fine, light brownish dust, which is sometimes used as a mechanical styptic to arrest hemorrhage.

**LYCOPERDON TUBER**, *Tuber Agriocostanum*, *Trubs*, *Tuber cibari'um*, *T. Guloso'rum*, *Tuber'era Terra*, *Truffe*, *Tuckaho*, (F.) *Truffe*. A fleshy, firm body, unknown in its mode of reproduction, which is found under ground, especially in different parts of France, Italy, &c., and is much esteemed as an aliment. It seems to belong to the champignons, and has a particular perfume. Aphrodisiac virtues have been ascribed to it.

**LYCOPIDIUM**, from *λυκος*, 'a wolf,' and *πους*, 'a foot.' *L. Clavatum*, *Cingul'aria*, *Muscus clavatus*, *Club-moss*, *Wolf's-claw*. This is the largest of the European mosses. The dust, which fills the capsules of its spikes, is very inflammable, and hence has been called *Vegetable Sulphur*;—and, also, *Farina* seu *Pulvis* seu *Semen* seu *Sulphur Lycopidii*. It is used in France to roll pills and boluses in; and in medicine is a desiccative, in the excoriations to which infants are liable. It is collected chiefly in Switzerland and Germany for commerce.

**LYCOPONIUM SELI'GO**, *Muscus erectus*, *Upright Club-moss*, *Fir Club-moss*, *Upright Firmoss*. The decoction of this plant acts violently as an emetic and purgative; and was formerly, on this account, used as an abortive. It is also employed to kill vermin.

**LYCOPUS**, *L. Virgin'icus*, *Bugleweed*, *Water Bugle*, *Water Horehound*, *Gypsy Weed*, *Paul's Bet'ony*, (F.) *Lycops de Virginie*. This indigenous herb, *Sex. Syst.* *Dianthia Monogynia*, *Nat. Ord.* *Labiata*, grows throughout the greater part of the United States. The whole herb is said to be slightly narcotic. It is given in infusion, (*Lycop. ʒj; ad fervent. Oj.*)

**LYCOPUS VIRGINICUS**, *Lycopus*.

**LYCOREXIS**, *Fames lupina*.

**LYCOSA TARENTULA**, see *Tarantula*.

LYCOSTOMA, Hyperoëchasma.

LYE, Lixivium, Ley.—l. Dyspeptic, see Fuligokali.—l. Medical, see Fuligokali.

LYGISMUS, Luxation.

LYGODES, Singultuous.

LYGMUS, Singultus.

LYGODES, Singultuous.

LYING-IN STATE, Parturient state.

LYMA, Lochia.

LYMPH, *Lympha*, from *λύπη*, 'water,' by changing *ν* into *λ*. *White Blood*, *Lympha Nutritiva*. A name given to the fluid contained in the lymphatic vessels and thoracic duct of animals, which have been made to fast for 24 hours. According to Chevreul, the lymph of the dog contains water, fibrin, albumen, common salt, subcarbonate of soda, phosphates of lime and magnesia, and carbonate of lime. The properties and composition of lymph vary somewhat according to the part whence the lymphatic vessels obtain it. Generally, it is under the form of a transparent, slightly alkaline fluid, sometimes of a madder-red or yellowish colour,—of a spermatic odour, and saline taste; soluble in water,—the solution becoming turbid, when mixed with alcohol. When left to itself, it coagulates. The clot or solid portion becomes of a scarlet red, if put in contact with oxygen; and of a purple red, if placed in carbonic acid.

Like the blood, the lymph consists of a fluid in which *lymph corpuscles* are suspended.

The lymph is probably the product of internal absorption in different parts of the body; it then flows along the lymphatic vessels, uniting with the chyle, and is poured with it into the veins; thus becoming one of the materials of the blood. According to others, the blood, when it reaches the arterial radicles, is divided into two portions,—the one red, which is carried to the heart,—the other serous or white, which is absorbed by the lymphatic vessels, and constitutes the lymph. By others, again, the lymphatics are considered to be the vessels of return for the white blood sent to certain tissues. White blood, however, has probably no existence.

LYMPH, COAGULABLE, *Liquor sanguinis*—l. *Corpuscles*, see Lymph—l. *Hearts*, *Lymphatic hearts*—l. *Plastic*, *Liquor sanguinis*.

LYMPHA, Lymph—l. *Muculenta narium*, *Nasal mucus*—l. *Nutritia*, Lymph—l. *Pancreatis*, see *Pancreas*—l. *Pericardii*, see *Pericardium*—l. *Plastica*, *Fibrin*.

LYMPHADENITIS, from *lympha*, 'lymph,' and *adenitis*, 'inflammation of a gland.' *Inflammatio glandularum lymphaticarum*, *Adenitis lymphatica*, (F.) *Adenitis lymphaticus*. Inflammation of a lymphatic gland or ganglion.

LYMPHÆDUCTUS, Lymphatic vessels.

LYMPHANGEITIS, Angioloecitis.

LYMPHANGIA, Lymphatic vessels.

LYMPHANGIECTASIS, *Lymphœury'sma*; from *lymph*, *αγγιον*, 'a vessel,' and *εκτασις*, 'dilatation.' Dilatation of lymphatic vessels.

LYMPHANGITIS, Angioloecitis.

LYMPHANGIOGRAPHY, *Lymphangiographia*; from *lymph*, *αγγιον*, 'a vessel,' and *γραφειν*, 'a description.' A description of the lymphatic vessels.

LYMPHANGIOTIS, Angioloecitis.

LYMPHANGIOLOGY, from *Lymphangion*, 'a lymphatic,' and *λογος*, 'a description.' A treatise on the lymphatics.

LYMPHANGIOTOMY, *Lymphangiotomy*; from *lymph*, *αγγιον*, 'a vessel,' and *τομη*, 'incision.' The anatomy or dissection of the lymphatic vessels.

LYMPHANGIONCUS, *Lymphoncus*; from *lymph*, *αγγιον*, 'a vessel,' and *ογκος*, 'a tumour.' Tumefaction of the lymphatics.

LYMPHATIC, *Lymphaticus*. That which relates to lymph.

LYMPHATIC HEARTS, *Lymph Hearts*. The frog and several other animals are provided with large receptacles for the lymph immediately underneath the skin, which exhibit distinct and regular pulsations like the sanguiferous heart. Their use appears to be—to propel the lymph.

LYMPHATIC SYSTEM is that particular system of organs which is inservient to the formation and circulation of lymph. These organs are:

1. LYMPHATIC GANGLIONS OR GLANDS, see *Conglobate*.

2. LYMPHATIC VESSELS, *Lymphæductus*, *Lymphangi'a*, *Lymphangio'a*, *Vena lymphatica*, *Ductus serosi*, *Vasa lymphatica*, *V. resorbentia*, *Vasa hydrago'a*, *Hydrangi'a*. These are very numerous. Arising at the surface of membranes and in the tissue of the organs, they carry into the veins the lymph from those parts. Lymphatic vessels are found in every part of the body. Wherever they are met with, however, they form two orders,—one *superficial*, the other *deep-seated*;—the two orders frequently communicating with each other. Lymphatic vessels are generally smaller than arteries and veins. They are very thin, diaphanous, and cylindrical; but present, here and there, more or less considerable dilatations, caused by valves in their interior. They are slightly tortuous in their course; their anastomoses are very numerous, and they often cross each other, forming successive plexuses. Of the arrangement of the extreme radicles we are ignorant. All the branches, before joining the principal trunks, pass through lymphatic ganglions, in which they are convoluted, or subdivide almost *ad infinitum*. They are formed of an outer cellular membrane and an internal coat, similar to that of the veins; of the latter, the valves are formed. All the lymphatics of the body ultimately discharge themselves into the subclavian and internal jugular veins. Two of these trunks are considerably larger than the others,—the *thoracic duct*, and the great trunk of the right side, (F.) *La grande veine lymphatique droite*. The former receives the lymphatics of the abdomen, of the lower extremities, the left side of the thorax, the left upper extremity, and the corresponding side of the head and neck; the latter receives those of the right upper extremity, and of the right side of the head, neck and thorax.

LYMPHATITIS, Angioloecitis.

LYMPHE DE COTUGNO, *Cotunnus*, liquor of.

LYMPHEURYSMA, *Lymphangiectasis*.

LYMPHITIS, Angioloecitis.

LYMPHIZATION. A term used by Professor Gross to signify effusion of coagulable lymph. It is not a happy word, inasmuch as lymph has another meaning, whilst the term 'coagulable lymph' is now almost abandoned.

LYMPHOECHEZIA, from *lympha*, 'lymph,' and *χεως*, 'I go to stool.' Serous diarrhœa.

LYMPHONCUS, Lymphangoncus—*I. Iridis, Iridaurexis.*

LYMPHOPYRA, Fever, adeno-meningeal.

LYMPHO'SIS. The preparation or elaboration of lymph.

LYMPHOTO'MY, from *lymphā*, 'lymph,' and *τομή*, 'I cut.' Dissection of the lymphatics.

LYNCH'S EMBROCA TION. An emollient nostrum, formed of *olive oil* impregnated with *bergamot* and other essences, and coloured with *alkanet root*.

LYNGO'DES, Singultous—*I. Febris, Fever, singultous.*

LYNGYODES, Singultous.

LYNN WAHOO, *Ulmus alata.*

LYNX, Singultus.

LYPE, Athymia.

LYPEMANIA, Melancholy.

LYPEROPHRENIE, Melancholy.

LYPOMA, Lipoma.

LYPOTHY'MIA, from *λυπή*, 'sadness,' and *θυμός*, 'heart, courage.' Very great sadness or despondency.

LYRA, *λυρα*, 'the lyre.' *Psalter, Psalterium, Corpus Psalterii, Lyra Davidis, Lamina medullaris triangularis cerebri.* The under surface of the posterior part of the body of the fornix is impressed with numerous transverse and oblique lines, which have been so called from some resemblance they bear to the ancient lyre.

LYRINGIUM, *Eryngium campestre.*

LYSIA, *Lysis.*

LYSIMA'CHIA NUMMULA'RIA, *Nummularia, Hirundinaria, Centimorbia, Creeping Loose Strife, Money Wort, (F.) Herbe aux écus.* This plant was formerly accounted vulnerary. It has been considered to possess antiscorbatic and astringent qualities, and has been used in leucorrhœa.

LYSIMACHIA PURPUREA, *Lythrum salicaria.*

LYSIS, *Lysis*, from *λυω*, 'I dissolve.' Solution. A common suffix; also, a name given to crises which are operated insensibly; that is, gradually and without critical symptoms.

LYSSA, Hydrophobia—*I. Canina, Hydrophobia.*

LYSSAS, Maniodes.

LYSSETER, Maniodes.

LYSSEDEC'TUS, from *λυσσα*, 'canine madness,' and *δακνω*, 'I bite.' *Hydrophobus; Canis rabido morsus.* One who has been bitten by a mad dog, or is actually labouring under hydrophobia.

LYSSEDEGMA, *Lyssodegmus, Lyssodemis*, same etymon. The bite of a mad dog.

LYSSEDEXIS, *Lyssodegma.*

LYTE'RIOS, *λυτηριος*, (from *λυω*, 'I dissolve,') 'solving.' An epithet given to those signs which announce the solution of a very violent disease.

LYTHRUM SALICA'RIA, *Lysimachia purpurea, Salicaria*:—the *Common or Purple Willow Herb.* The herb, root, and flowers possess a considerable degree of astringency, and are used, occasionally, in the cure of diarrhœa and dysentery, leucorrhœa, hæmoptysis, &c.

LYTTA VESICATORIA, *Cantharis.*

LYTTA RUFIPES. A variety of *Lytta*, peculiar to Chili, which is more active as a vesicant than the *cantharis*, or the *lytta* next described.

LYTTA VITTA'TA, *Cantharis vittata, Potato Fly, (F.) Cantharide tachetée.* Four species of meloe that blister are found in the United States. The *lytta vittata* feeds principally upon the potato plant, and, at the proper season of the year, may be collected in immense numbers. The potato fly resembles the *cantharides* in every property, and is fully equal to them.

## M.

M. This letter signifies, in prescriptions, *manipulus*, 'a handful.' Also, *misce*, 'mix.' See Abbreviation.

MACAPATLI, *Smilax sarsaparilla.*

MACARONI. An alimentary paste, moulded of a cylindrical shape, and formed of rice or wheat flour. It is eaten—when boiled—in soup—prepared with cheese, &c.

Also, a name formerly given to a pulverulent compound of sugar and glass of antimony, carried into France by the Italian monks, and employed at the hospital *La Charité* in the treatment of painters' colic.

MACÊ, see *Myristica moschata.*

MACEDONISUM, *Smyrnum olusatrum.*

MACER, *Gracilis.*

MACERA'TION, *Maceratio*, from *macero*, 'I soften by water.' An operation which consists in infusing, usually without heat, a solid substance in a liquid, so as to extract its virtues.

MACERONA, *Smyrnum olusatrum.*

MACES, see *Myristica moschata.*

MACHERA, *Culter, Knife, Penis.*

MACHÆRIDION, *Machæron.*

MACHÆRION, *Machæris, Machæridion, Gladiolus.* A knife. An amputating knife. Rufus of Ephesus asserts, that the Aruspices gave this name to a part of the liver of animals.

MACHÆRIS, *Knife, Novacula.*

MACHA'ON, from *μαχων*, 'I desire to fight.' The son of *Æsculapius*, and a celebrated physician. Hence:

MACHAONIA seu MACHAONICA ARS. *Medicine. The Healing Art*:—so called after Machaon, the son of *Æsculapius*.

MACHINAL, *Mechanicus.* This epithet is added especially by French writers to the word *movement*, to express that the will takes no part in it.

MACHINE', *Mach'ina, Machinamen'tum, Mech'anè, Mechani'ma.* A more or less compound instrument, used in physics and chemistry to put a body in motion, or to produce any action whatever. Physiologists sometimes use it for the *animal body*;—as the *machine* or *animal machine*.

MACHLOSYNE, *Nymphomania.*

MACHOIRE, *Maxillary bone—m. Discre-*

*nienne*, Maxillary bone, lower—*m. Syncranionne*, Maxillary bone, superior.

MACIES, Atrophy, Emaciation—*m. Infantum*, Tabes mesenterica.

MACILENTUS, Gracilis.

MACIS, see *Myristica moschata*.

MACRAU'CHEN, from *μακρος*, 'long,' and *αυχην*, 'the neck.' *Longo collo præditus*.—One who has a long neck.—Galen.

MACRE FLOTTANTE, Trapa natans.

MACRITUDO, Emaciation.

MACROBIOSIS, Longevity.

MACROBIOTES, Longevity.

MACROBIOTIC, *Macrobiot'icus*, *Macrobiotus*, *Macrobius*, *Longævus*, from *μακρος*, 'great,' 'long,' and *βιος*, 'life.' That which lives a long time. The *macrobiotic art* is the art of living a long time.

MACROBIOTUS, Macrobiotic.

MACROBIUS, Macrobiotic.

MACROCEPH'ALUS, from *μακρος*, 'great,' 'long,' and *κεφαλη*, 'head.' *Qui magnum habet caput*. 'One who has a large head.' This epithet is given to children born with heads so large that they seem to be hydrocephalic; but in which the unusual development is owing to a large size of the brain. Such are supposed to be more than ordinarily liable to convulsions. (?) The term has also been applied by Hippocrates to certain Asiatics who had long heads. See *Capitones*.

MACROCOLIA, from *μακρος*, 'great,' and *κωλον*, 'a limb.' Great length of limbs in general, and of the lower limbs in particular.

MACRODACTYLUS, from *μακρος*, 'great,' and *δακτυλος*, 'a finger.' Having long fingers.

MACROGLOSSA, see *Macrogllossus*.

MACROGLOS'SUS, from *μακρος*, 'large,' and *γλωσσα*, 'tongue.' One who has a very large or prolapsed tongue. See *Paraglossa*.

MACRONOSIÆ, Chronic diseases.

MACROPHAL'LUS, from *μακρος*, 'large,' and *φαλλος*, 'the male organ.' A large size of the male organ.

MACROPHON'US, from *μακρος*, 'great,' and *φωνη*, 'voice.' One who has a strong voice.

MACROPHYSOCEPH'ALUS, from *μακρος*, 'long,' *φυσσα*, 'air,' and *κεφαλη*, 'head.' A word used by Ambrose Paré to designate an augmentation of the head of the fetus, produced by a sort of emphysema, which retards delivery.

MACROPIPER, Piper longum.

MACROPNE'A, from *μακρος*, 'long,' and *πνεο*, 'I breathe.' A long and deep respiration.

MACROP'NUS, *Macrop'noos*. One who breathes slowly:—a word met with in some authors.—Hippocrates.

MACROP'ODUS, *Macrop'opus*, from *μακρος*, 'great,' and *πους*, 'foot.' One who has a large foot.

MACROR, Emaciation.

MACROR'RHIS, from *μακρος*, 'great,' and *ρς* or *ερ*, 'nose.' One who has a long nose.

MACROS, Long.

MACROSCELES, *Crura longa habens*; from *μακρος*, 'long,' and *σκελος*, 'the leg.' One who has long legs.

MACROSIÆ, Chronic diseases.

MACROT'ES, from *μακρος*, 'great,' and *ως*, 'an ear.' One who has long ears.

MACROTRYS RACEMOSA, see *Actæa racemosa*.

MAC'ULA. A spot. *Dyschro'a*, *Celis*,

*Labe*, (F.) *Tacho*. A permanent discoloration of some portion of the skin, often with a change of its texture. *Ephelis*, *Nævus*, *Spilus*, &c., belong to *Maculæ*.

MACULA, Molecule—*m. Carneæ*, *Caligo*—*m. Corneæ arcuata*, *Gerotoxon*—*m. Corneæ margaritaceæ*, *Paralampsis*—*m. Cribrosa*, see *Auditory canal*, internal—*m. Fusca*, *Ephelides*—*m. Germinativa*, see *Molecule*—*m. Hepatica*, *Chloasma materna*, *Nævus*—*m. Lenticularis*, *Ephelides*—*m. Lutea retinae*, see *Foramen centrale*—*m. Matricalis*, *Nævus*—*m. Matricis*, *Nævus*—*m. Solaris*, *Ephelides*.

MACULÆ ANTE OCULOS VOLITANTES, *Metamorphopsia*.

MACULOSUS, *Sablé*.

MADAR, Mudar.

MADAROSIS, from *μαδος*, 'bald.' *Madaroma*, *Mads'sis*, *Madarotes*, *Mads'ma*, *Mads'isis*, *Deplumatio*, *Milpha*, *Milphosis*, *Prilosis*, *Calvities*. Loss of the hair, particularly of the eyelashes.

MADAROTES, Madarosis.

MADDER, DYERS', Rubia.

MADEIRA, CLIMATE OF. This island is much frequented by pulmonary invalids, on account of the mildness and equability of its climate. Owing, indeed, to the mildness of the winter, and the coolness of the summer, together with the remarkable equality of the temperature during day and night, as well as throughout the year, it has been considered, that the climate of Madeira is the finest in the northern hemisphere. Sir James Clark is of opinion that there is no place on the continent of Europe, with which he is acquainted, where the pulmonary invalid could reside with so much advantage, during the whole year, as in Madeira.

MADELEON, Bdellium.

MADEMA, Madarosis.

MADESIS, Depilation, Madarosis.

MADISIS, Depilation, Madarosis.

MADISTE'RIMUM, *Madiste'rion*, *Tricholabium*, *Tricholabis*, *Voisell'a*. Tweezers. An instrument for extracting hairs.

MADNESS, CANINE, Hydrophobia—*m. Raving* or *furious*, *Mania*.

MADOR, Moisture. A cold sweat.

MADREPORA OCULATA, see *Coral*.

MADWEED, *Scutellaria lateriflora*.

MAEA, Midwife.

MAEIA, Obstetrics.

MAEIA, Obstetrics.

MAEUTRIA, Midwife.

MAGDA'LIA, *Magdaleon*, *Magdalis*. Crumb of bread. Any medicine, as a pill, formed of crumb of bread. A roll of plaster.

MAGEIRICE, Culinary art.

MAGGOT PIMPLE, see *Acne*.

MAGIS, *μαγίς*, 'a cake.' A sort of cake, composed of cloves, garlic and cheese beaten together.—Hippocrates.

MAGISTERIUM, Magistry—*m. Bismuthi*, *Bismuth subnitrate*—*m. Jalapæ*, *Resin of Jalap*—*m. Marcasitæ*, *Bismuth*, *subnitrate* of—*m. Plumbi*, *Plumbi subcarbonas*—*m. Sulphuris*, *Sulphur lotum*—*m. Tartari purgans*, *Potassæ acetæ*.

MAG'ISTERY, *Magiste'rium*, from *magister*, 'a master.' Certain precipitates from saline solutions were formerly so called; as well as other medicines, the preparation of which was kept secret.

**MAGISTERY OF BISMUTH**, Bismuth, subnitrate of.

**MAG'ISTRAL**, *Magistra'lis*. Same etymon. *Extemporaneous*. Medicines are so called which are prepared extemporaneously. *Official* medicines are such as have been prepared for some time before they are prescribed.

**MAGISTRANTIA**, Imperatoria.

**MAGMA**, μαγμα, (F.) *Marc*. The thick residuum, obtained after expressing certain substances to extract the fluid parts from them. The grounds which remain after treating a substance with water, alcohol, or any other menstruum. Also, a salve of a certain consistence.

**MAGMA OF MARO OF OLIVES** is the residuum after the greatest possible quantity of oil has been extracted from olives by making them ferment. It was formerly employed as a stimulant, under the form of a *bath*—to which the name *Bain de Marc* was given by the French.

**MAGMA OF MARO OF GRAPE**, *Bry'tia*, was once employed for the same purposes.

**MAGNES**, Magnet.

**MAGNES ARSENICALIS**. (*Sulphur, white arsenic*, and *common antimony*, of each equal parts. Mix by fusion.) It is corrosive. See *Magnetic plaster*.

**MAGNES EPILEPSIE**, Hydrargyri sulphuretum rubrum.

**MAGNE'SIA**, *Abarnokas*, *Chambar*, *Terra amara*, *Magnesia terra*, *Miccarth*; from *magnes*, 'the magnet'; because it was supposed to have the power of attracting substances from the air. Its metallic base is *magnesium*.

**MAGNESIA**, *M. usta*, *M. calcinata*, *Cul'cinada*, *Magnesia*, *Oxide of magnesium*, (F.) *Magnésie brulée*, *Magnésie*, *M. Causticus*. This is obtained by exposing carbonate of magnesia to a strong heat. It is inodorous; taste very slightly bitter; in the form of a white, light, spongy, soft powder. S. g. 2.3; requiring 2000 times its weight of water for its solution. It is antacid, and laxative when it meets with acid in the stomach. Dose, gr. x. to ℥j in water or milk.

**MAGNESIA AERATA**, *Magnesiæ carbonas—m. Alba*, *M. carbonas—m. Calcinata*, *M. usta—m. Edinburgensis*, *Magnesiæ carbonas*.

**MAGNESIA, EFFERVESCING**, *MOXON'S*. (*Magnesiæ carb.*; *M. sulphat.*; *Sodæ bicarbon.*, *Acid tartaric.* æ partes æquales; to be pulverized, well dried, mixed and enclosed in bottles hermetically sealed.)

**MAGNESIA, FLUID**. Under this name a preparation is designated, which consists of a solution of carbonate of magnesia in carbonated water. It is also termed *carbonated magnesia water*, *abrated magnesia water*, and *condensed solution of magnesia*, (F.) *Eau magnésienne*.

**MAGNESIA, HENRY'S**, *Magnesiæ carbonas—m. Mitis*, *Magnesiæ carbonas—m. Muriate* of, *Magnesiæ chloridum—m. Nigra*, *Manganese*, *black oxide* of.

**MAGNESIA OPALINA**. A name given by Lémery to a mixture of equal parts of *antimony*, *nitrate of potass*, and *chloride of sodium*, (decrepitated.) It has emetic properties, but is not used.

**MAGNESIA SALIS AMARI**, *Magnesiæ carbonas—m. Salis Ebsdamensis*, *Magnesiæ carbonas—m. Saturni*, *Antimonium—m. Solution* of, *condensed*, *M. fluid—m. Terra*, *Magnesia—m. Vitriolata*, *Magnesiæ sulphas—m. and Soda*, sul-

phate of, see *Soda*, sulphate of—*m. Usta*, *Magnesia*.

**MAGNESIÆ CAR'ONAS**, *M. Subcarbonas*, *Magnesia*, (Dublin), *M. aëra'ta*, *M. carbon'ica*, *M. alba*, *Subcarbonate of Magnesia*, *Henry's Magnesia*, *M. Subcarbon'ica*, *M. Mitis*, *M. Edinburgen'sis*, *M. Salis Ebsdamensis*, *M. Salis amari*, *Carbonas magnesi'cum*, *Lac terra*, *Hypocarbonas magnesi'ca*, *T. amara aëra'ta*, *T. absorbens mineralis*, *T. Talco'sa oxyanthracodes*, (F.) *Sous-carbonate ou carbonate de Magnésie*, *Magnésie aërée*, *M. blanche*, *M. crayeuse*, *M. douce*, *M. effervescente*, *M. moyenne*, *Poudre de Sentinelli*, *P. de Valenciens*, *P. du Comte de Palmes*. Prepared from sulphate of magnesia by subcarbonate of potass. It is inodorous; insipid; light; white; spongy; opaque; effervescing with acids; insoluble in water. Properties the same as the last; but the carbonic acid, when set free, sometimes causes unpleasant distension.

**MAGNESIÆ HYPOCARONAS**. *M. carbonas—m. Subcarbonas*, *M. carbonas—m. Vitriolicum*, *Magnesiæ sulphas*.

**MAGNESIÆ SULPHAS**, *Sulphas Magnesiæ purificata*, *Magnesia vitriolata*, *Sal catharticus amar'us*, *Sal catharticum amarum*, *Sal am'rum*, *S. Anglica'num*, *Sulphate of Magnesia*, *Sal Epsomensis*, *Sal catharticus Anglica'nus*, *Sal Sedlicensis*, *Sal Ebsdamensis*, *S. Seydschutzen'se*, *Terra amara sulphurica*, *Vitriolicum Magnesi'cum*, *Epsom Salt*, *Bitter purging Salt*, (F.) *Sulfate de magnésie*, *Sel admirable de Lémery*, *Sel d'Egra*. Generally obtained from sea water. Its taste is bitter and disagreeable. It is soluble in an equal quantity of water at 60°. It is purgative and diuretic. Dose, as a cathartic, ℥ss to ℥ij.

**MAGNESIÆ AERÉE**, *Magnesiæ carbonas—m. Blanche*, *Magnesiæ carbonas—m. Brulée*, *Magnesia usta—m. Carbonate de*, *Magnesiæ carbonas—m. Causticus*, *Magnesia usta—m. Crayeuse*, *Magnesiæ carbonas—m. Douce*, *Magnesiæ carbonas—m. Moyenne*, *Magnesiæ carbonas—m. Souscarbonate de*, *Magnesiæ carbonas—m. Sulfate de*, *Magnesiæ sulphas*.

**MAGNE'SII CHLORIDUM**, *Chloride of Magnesium*, *Muriate of Magnesia*. This bitter deliquescent salt has been given as a mild and effective cholagogue cathartic, in the dose of half an ounce to the adult. Being deliquescent, it may be kept dissolved in its weight of water.

**MAGNESIUM**, see *Magnesia—m. Chloride* of, *Magnesiæ chloridum—m. Oxide* of, *Magnesia usta*.

**MAGNET**, *Magnès*, *Magnètes*, *Ferrum magnes attractorium*, *Siderites*, *Sideritis*, *Lapis heracleus*, *L. Syderitis*, *L. nauticus*, *Magnitis*, so called from *Magnes*, its discoverer, or from *Magnesia*, whence it was obtained; (F.) *Aimant*; *The magnet or loadstone*. An amorphous, oxydulated ore of iron, which exerts an attraction on unmagnetized iron, and has the property of exhibiting poles; that is, of pointing by one of its extremities to the north. This ore, by constant or long rubbing, communicates its properties to iron; and thus artificial magnets are formed. Magnetic ore is found in many countries, and particularly in the island of Elba. The magnet is sometimes used to extract spicula of iron from

the eye or from wounds. It has been employed as an antispasmodic; but acts only through the imagination. The powder has been given as a tonic. In *Pharmacy*, it is used to purify iron filings. It attracts the iron, and the impurities remain behind. It formerly entered, as an ingredient, into several plasters, to draw bullets and heads of arrows from the body—as the *Emplastrum divinum Nicolai*, the *Emplastrum nigrum* of Augsburg, the *Opodoloch*, and *Attractivum* of Paracelsus, &c.

**MAGNETES, Magnet.**

**MAGNET'IC, Magnet'icous.** Same etymon. That which belongs or relates to magnetism;—mineral or animal.

**MAGNETIC FLUID.** A name given to the impalpable fluid to which the magnet owes its virtues. By analogy it is applied to a particular principle, supposed to be the source of organic actions, which affects, it is conceived, the nervous system principally, and is susceptible of being transmitted from one living body to another, by contact or simple approximation, and especially under the influence of fixed volition. See *Magnetism, Animal*.

**MAGNETIC PASTER.** A plaster, at present, not used. It had for its base a mixture, called *Magnes arsenicalis*; formed of equal parts of antimony, sulphur and arsenic melted together in a glass cucurbit. The name *Magnetic plaster* was, likewise, given to such as contained powdered magnet.

**MAGNETINUS, Potassæ supertartas impurus.**

**MAGNETISM, ANIMAL, Mes'morism, Neurog'mia, Bioga'mia, Biomagnetis'mus, Zoomagnetis'mus, Eazo'nurism,** (proposed by Mr. H. Mayo), *Telluris'mus, Anthropomagnetis'mus, Gargalé, Gargalis'mus Gargalus.* Properties attributed to the influence of a particular principle, which has been compared to that which characterizes the magnet. It is supposed to be transmitted from one person to another, and to impress peculiar modifications on organic action, especially on that of the nerves. The discussions, to which this strange belief has given rise, are by no means terminated. There is no evidence whatever of the existence of such a fluid. Highly impressible persons can be thrown into a kind of hysterical sleep and somnambulism, but farther than this, the efforts of the magnetizer cannot reach. It is a mode of action upon the nerves through the medium of the senses.

**MAGNETIS, Magnet.**

**MAGNITUDO CORPORIS, Stature.**

**MAGNOC, Jatropha manihot.**

**MAGNOLIA GLAUCOA, Small Magnolia, Magnolia, Swamp Sas'safra, Elk Bark, Indian Bark, White Laurel, Sweet Bay, Beaver Wood, White Bay, Cinchona of Virginia, Castor Bay, Sweet magnolia.** The bark is possessed of tonic properties, resembling those of cascarrilla, canella, &c. The same may be said of the *Magnolia tripet'ala* or *Umbrel'la tree*; the *M. acuminata* or *Cucumber tree*, the *M. grandiflora* and *M. macrophylla*, *Laurel, Elk wood, Silverleaf, Big leaf, White bay, Beaver Tree, Elk bark, Big bloom.*

**MAGNUM DEI DONUM, Cinchona.**

**MAGNUM OS.** The third bone of the lower row of the carpus, reckoning from the thumb.

It is the largest bone of the carpus; and is, also, called *Os capitatum*; (F.) *Grand Os.*

**MAGRUMS.** A popular name in the state of New York for a singular convulsive affection, which resembles chorea. It rarely, however, occurs before the adult age; never ceases spontaneously, and when fully developed, is devoid of any paroxysmal character.

**MAGUEY, Agave Americana.**

**MAHMOUDY, Convolvulus scammonia.**

**MAHOGAN FEBRIFUGE, Swietenia febrifuga.**

**MAHOGANY, Gynocladus Canadensis—m. Mountain, Betula lenta—m. Tree, Swietenia mahogani.**

**MAIANthemum, Convallaria maialis.**

**MAIDENHAIR, Adiantum capillus veneris—m. American, Adiantum pedatum—m. Canada, Adiantum pedatum—m. Common, Asplenium trichomanoides—m. Golden, Polytrichum—m. White, Asplenium ruta muraria.**

**MAIEIA, Obstetrics.**

**MAIEUSIS, Parturition.**

**MAIEUTA, see Parturition.**

**MAIEUTER, Accoucheur.**

**MAIEUTES, Accoucheur.**

**MAIEUTICA ARS, Obstetrics.**

**MAIGREUR, Emaciation.**

**MAILLET, Mallet.**

**MAILLOT, Swathing clothes.**

**MAIN, Manus.**

**MAÏS, Zea mays.**

**MAJORANA, Origanum majorana—m. Syriaca, Teucrium marum.**

**MAL D'AMOUR, Odontalgia.**

**MAL DES ARDENS.** A name given to a species of pestilential erysipelas or *Saint Anthony's fire*, which reigned epidemically in France, in 1130.

**MAL D'ADVENTURE, Paronychia—m. di Breno, Scherlievo—m. Caduc, Epilepsy.**

**MAL DE CRIMÉE (F.), Lépre des Cosaques, Lepre Tau'rica.** A variety of lepra in the Crimea.

**MAL DE DENT, Odontalgia—m. d'Estomac, Chthonophagia—m. Divin, Epilepsy—m. d'Enfant, Pains (Labour)—m. di Fiume, Scherlievo—m. Français, Syphilis—m. de Gorge, Cynanche—m. Haut, Epilepsy—m. de Macheire, Trismus—m. de Mer, Nausea marina—m. de Mère, Hysteria—m. de Misère, Pellagra—m. de Naples, Syphilis—m. Petit, Epilepsy—m. du Roi, Scrofula—m. Rouge de Cayenne, Elephantiasis of Cayenne—m. Saint Antoine, Erysipelas—m. Saint Jean, Epilepsy—m. Saint Main, Lepre, Psora—m. di Scherlievo, Scherlievo—m. de Siam, Fever, yellow.**

**MAL DE SAN LAZARO, Cocobay.** A leprous disease common in Columbia, S. America, and said to be cured by the Cuichunchulli.

**MAL DEL SÔLE, Pellagra—m. de Solagne, Ergotism—m. de Terra, Epilepsy—m. à Tête, Cephalalgia—m. del Valle, Proctocace—m. Vat, see Anthrax.**

**MALA, Gena—m. Aurea, see Citrus aurantium.**

**MALABATH'RINUM.** Ancient name of an ointment and a wine, into which the *mala-bathrum* entered.

**MALABATHRUM, Cadeji-Indi.** The leaves of a tree of the East Indies. These leaves entered into the theriac, mithridate, and other ancient electuaries. They are believed

to be from a species of laurel—*Laurus Cassia*; but, according to others, from *Laurus Malabathrum*. The *Oleum Malabathri* is obtained from it.

**MALACCÆ RADIX**, *Sagittarium alexipharmacum*.

**MALACHE**, *Malva rotundifolia*.

**MALACIA**, from *μαλακία*, 'softness.' A depravation of taste, in which an almost universal loathing is combined with an exclusive longing for some particular article of food. If the patient desires substances that are not eatable or noxious, it constitutes *Pica*, *Pisso'sis*, *Pitto'sis*, *Heterorexia*, *Heterorrhœia*, *Cissa*, *Citto'sis*, *Citta*, *Lémo'sis*, *Pica*, *Allotriophagia*, *Picacismus*, *Pica'tio*, *Deprav'd appetite*, (F.) *Ewëis*. These symptoms accompany several nervous affections,—those of females in particular. In pregnancy it is common, and is termed *Longing*.

**MALACIA AFRICANORUM**, *Chthonophagia*—*m. Cordis*, *Cardiomalacia*.

**MALACISMUS**, *Mollities*.

**MALACOGASTER**, *Gastromalaxia*.

**MALACOPHONUS**, from *μαλακία*, 'softness,' and *φωνή*, 'voice.' One who has a soft voice.

**MALACOPOEA**, *Emollients*.

**MALACORIUM**, see *Punica granatum*.

**MALACOSARCOS**, from *μαλακός*, 'soft,' and *σαρξ*, 'flesh.' One of a soft constitution: *hab'itū cor'poris molli'ri præ'ditus*.—*Galen*.

**MALACOSIS**, *Mollities*—*m. Cerebri*, *Mollities cerebri*—*m. Cordis*, *Cardiomalacia*—*m. Hepatis*, *Hepatomalacia*—*m. Uteri*, *Hysteromalacia*.

**MALACOSTEON**, *Mollities ossium*.

**MALACTICA**, *Emollients*.

**MALACTICUM**, *Relaxant*.

**MALADE**, *Sick*.

**MALADIE**, *Disease*—*m. Angloise*, *Hypochondriasis*—*m. Bleue*, *Cyanopathy*—*m. de Bright*, *Kidney*, *Bright's disease of the*—*m. de Cruveilhier*, see *Brash*, *weaning*—*m. Cuculaire*, *Pertussis*—*m. Glandulaire*, *Elephantiasis Arabica*—*m. Imaginaire*, *Hypochondriasis*, *Hysteria*.

**MALADIE DES MINEURS**. *Anæmia* occurring in the workers in mines.

**MALADIE NOIRE**, *Melena*—*m. du Pays*, *Nostalgia*—*m. Pédiculaire*, *Phtheiriases*—*m. de Pott*, *Vertebral disease*—*m. Typhoïde*, see *Typhus*—*m. Vénéérienne*, *Syphilis*—*m. de Venus*, *Syphilis*—*m. de Werthof*, *Purpura hæmorrhagica*.

**MALADIES ACQUISES**, *Acquired diseases*—*m. Annuelles*, *Annual diseases*—*m. Chroniques*, *Chronic diseases*—*m. Connées*, *Connate diseases*—*m. Dissimulées*, *Feigned diseases*—*m. Externes*, *External diseases*—*m. Feintes*, *Feigned diseases*—*m. Innées*, *Innate diseases*—*m. Légitimes*, see *Legitimate*—*m. Nervieuses*, *Nervous diseases*—*m. Simulées*, *Feigned diseases*—*m. Supposées*, *Feigned diseases*—*m. Ventouses*, *Pneumatosis*.

**MALADIE**, *Sickly*.

**MALADRERIE**, *Ladrerie*.

**MALADY**, *ENGLISH*, *Hypochondriasis*.

**MALÆ**, *OS*, from *malum*, 'an apple;' so called from its roundness. *Os mala'rè*, *Os Jugale*, *Os Jugumen'tum*, *Os Gome*, *Zygo'ma*, *Os Zygomat'icum*, *Os Hypo'pium*, *Os Subocula'rè*, *Os Pu'dicum*, (F.) *Os Malairo*, *Os Zygomatique*, *Os de la Pommette*. The cheek or malar bone. This bone is situate at the lateral and superior

part of the face; and constitutes the zygomatic region of the cheek. It is irregularly quadrilateral. Its outer surface is convex, covered by muscles and skin, and pierced with canals, called *malar*, through which vessels and nerves pass. Its upper surface is concave, and forms part of the orbit. Its posterior surface is concave, and enters into the composition of the temporal fossa. This bone is thick and cellular. It is articulated with the frontal, temporal, sphenoid, and superior maxillary bones, and is developed by a single point of ossification.

The part of the face rendered prominent by this bone, the French call *Pommette*.

**MALAG'MA**, from *μαλακός*, 'I soften.' An emollient cataplasm, and, in general, every local application which enjoys the property of softening organic tissues.

**MALAISE**, *Indisposition*.

**MALAKIEN**, *Mollities*.

**MALAMBO BARK**, *Matias*.

**MALANDRIA**. A species of lepra or elephantiasis.—*Marcellus Empiricus*.

**MALANDRIO'SUS**, *Leprosus*. Affected with a species of lepra.

**MALAR**, *Mala'ris*, from *mala*, 'the cheek.' Belonging to the cheek,—as the *malar* bone.

**MALÆ** *Process*, *Zygomat'ic process*.

**MALÆRE OS**, *Mala' os*.

**MALARIA**, *Miasm*.

**MALARIOUS**, *Mala'rial*. Owing to, or connected with *Malaria*,—as a *malarious soil*, *malarious disease*, &c.

**TO MAL'AXATE**, *Molli're*, *Subig'ere*, *Malacis's're*, (F.) *Malacer*, from *μαλακός*, 'I soften.' To produce softening of drugs, by kneading them. The process is called *Malaxation*, *Malaxa'tio*.

**MALAXATION**, see *To malaxate*.

**MALAXIA VENTRICULI**, *Gastromalaxia*.

**MALAXIS**, *Mollities*—*m. Cordis*, *Cardiomalacia*.

**MALAZISSATUS**. One in whom the testicles have not descended. It has, also, been used synonymously with *emasculatus* and *mullieratus*.—*Castelli*.

**MALCE**, *Chilblain*.

**MALE**, *Mas*, *Masculus*. Of the sex that begets young. Not female. What belongs to the male sex; as the *male organs of generation*.

**MALE**, *Axilla*—*m. Organ*, *Fenis*.

**MALEFICIUM**, *Poisoning*.

**MALIA**, see *Equinia*.

**MALIASMUS**, *Malis*, see *Equinia*.

**MALICHORUM**, see *Punica granatum*.

**MALICORIUM**, see *Punica granatum*.

**MALIE**, *Equinia*.

**MALIGNANT**, *Malignus*, (F.) *Malin*. A term applied to any disease whose symptoms are so aggravated as to threaten the destruction of the patient. A disease of a very serious character, although it may be mild in appearance;—*Morbus malignus*.

**MALIN**, *Malignant*.

**MALING'ERER**; from (F.) *Malingre*, 'sickly.' A simulator of disease, so termed in the British military service.

**MALIS**, *Malia'smos*, *Cutaneous vermination*. The cuticle or skin infested with animalcules.—*Phthiri'asis*, *Parasitismus superficialis*. In Persia, this affection is produced by the Guinea worm; in South America, by the

Chigre; and in Europe, occasionally by the Louse. See Equinia, and Phtheiriaria.

MALIS DRACUNCULUS, Dracunculus—m. Gordii, Dracunculus—m. Pediculi, Phtheiriaria.

MALLEOLAR, *Malleolaris*, from *malleolus*, 'the ankle.' Belonging or relating to the ankles.

MALLEOLAR ARTERIES are two branches furnished by the *anterior tibial* about the instep; the one—the *internal*—passes transversely behind the tendon of the *tibialis anticus* to be distributed in the vicinity of the *malleolus internus*—the other—the *external*—glides behind the tendons of the *extensor communis digitorum pedis* and the *peroneus brevis*, and sends its branches to the parts which surround the outer ankle, as well as to the outer region of the tarsus.

MALLEOLUS. Diminutive of *malleus*, 'a mallet, or hammer;' *Rascetta*, *Rastista*, *Rascha*, *Rasetta*, *Rasista*, *Sphyræ*, *Talus*, *Diabobos*, *Taleolus*, *Pesa*; the *Ankle*, (F.) *Malléole*, *Cherville du Pied*. The two projections formed by the bones of the leg at their inferior part. The *inner* belongs to the tibia; the *outer* to the fibula. The ankles afford attachment to ligaments, and each has a sort of gutter, in which certain tendons slide. See *Malleus*.

MALLET, *Malleolus*, (F.) *Maillet*. A kind of hammer, used with a gouge, for removing or cutting bones, in certain surgical and anatomical operations.

MALLEUS, *Malleolus*, *Ossiculum Malleole assimilatam*, (F.) *Marteau*. The longest and outermost of the four small bones of the ear. It is situate at the outer part of the tympanum, and is united to the *membrana tympani*. It has, 1. An ovoid head, which is articulated behind with the *incus*, and is supported by a narrow part called the neck: this has, anteriorly, a *long apophysis*, which is engaged in the *glenoid fissure*, and is called the *Apophysis* or *Processus*, *Processus gracilis*, of *Rau*. It affords attachment to the *anterior mallei* muscle. 2. A *handle*, which forms an obtuse angle with the neck, and corresponds to the membrane of the tympanum, which it seems to draw inwards. It is furnished at its upper extremity with a process—the *processus brevis*, to which the *internus mallei* is attached. This bone is developed by a single point of ossification.

MALLEUS, *Equinia*—m. Slender Process of the, *Grêle apophyse du marteau*.

MALLOW, COMMON, *Malva*—m. Compound decoction of, *Decoctum malvæ compositum*—m. Yellow, *Abutilon cordatum*.

MALO DI SCARLIEVO, *Scherliovo*.

MALOGNANUM, *Punica granatum*.

MALPIGHL ACINI OF, *Corpora Malpighiana*.

MALPIGHIA MOURELLA, (F.) *Mourevillier*, *Simarouba faux*. The bark of this shrub—a native of Cayenne—is reputed to be febrifuge, and useful in diarrhœa.

MALPIGHIAN BODIES, *Corpora Malpighiana*—m. b. Inflammation of the, *Kidney*, *Bright's disease* of the.

MALT, *Sax. mealt*, *Dutch mout*, *Teut. malt*; from *μαλαττω*, 'I soften'; *Bynè*, *Maltum*, *Hordei maltum*, *Bra'sium*, (F.) *Drêche*. Barley made to germinate, for the purpose of forming beer. It has been recommended in medicine, as antiscorbutic, antiscrofulous, &c.

MALT SPIRIT. A spirit distilled from malt. It is the basis of most of the spirituous cordials.

MALTA; CLIMATE OF. The climate of Malta is pretty equable, the range of temperature in the twenty-four hours being rarely more than 6°. The air is almost always dry and clear. The most disagreeable wind is the *sirocco*, which is the source of more or less suffering to the pulmonary invalid. The winter climate is favourable. Dr. Liddell thinks that no place which he has seen in the south of Europe can compete with Malta, for a mild, dry, bracing air in November, December, and part of January; and during the other winter and spring months, he thinks it is equal to any of them.

MALTHA, *Maltæ*, from *μαλαττω*, 'I soften.' Wax, particularly soft wax.

MALTHACTICA, Emollientia.

MALTHAXIS, Mollities.

MALUM, Disease, *Melum*—m. *Articulorum*, *Gout*—m. *Caducum*, *Epilepsy*—m. *Caducum pulmonum*, *Asthma*—m. *Canum*, see *Pyrus cydonia*—m. *Coense*, *Avorrhœa carambola*—m. *Cotoneum*, see *Pyrus cydonia*—m. *Hypochondriacum*, *Hypochondriasis*—m. *Hysterica*, *Hysteria*—m. *Insanum*, see *Solanum Melongena*—m. *Ischiadicum*, *Neuralgia femoro-poplitea*—m. *Lazari*, *Elephantiasis*.

MALUM MOETUUM. A species of lepra, in which the affected portions of skin seem to be struck with death.

MALUM PILARÆ, *Trichosis*—m. *Pottii*, *Vertebral disease*—m. *Primarium*, *Idiopathia*—m. *Spinosum*, *Datura stramonium*—m. *Terrestre*, *Atropa Mandragora*—m. *Venerum*, *Syphilis*.

MALUS AURANTIA MAJOR, *Citrus aurantium*.

MALUS INDICA, *Bilumbi biring-bing* of *Bontius*. The juice of this East India tree is cooling, and is drunk as a cure for fevers. The leaves, boiled and made into a cataplasm with rice, are famed in all sorts of tumours. The juice, mixed with arrack, is drunk for the cure of diarrhœa. The ripe fruit is eaten as a delicacy; and the unripe is made into a pickle for the use of the table.

MALUS LIMONIA ACIDA, see *Citrus medica*—m. *Medica*, see *Citrus medica*.

MALVA, *Malva sylvestris*, *M. vulgaris*, *Common Mallow*, (F.) *Mauve sauvage*. The leaves and flowers are chiefly used in fomentations, cataplasms, and emollient enemata. Its properties are demulcent.

*Malva rotundifolia*, *Mal'acht*, *Mol'oché*, has like virtues; as well as the other varieties.

MALVAVISCUM, *Althæa*.

MALVERN, WATERS OF. The village of Great Malvern, (pronounced *Maw'vern*.) in Worcestershire, England, has for many years been celebrated for a spring of remarkable purity, which has acquired the name of the *Holy well*. It is a carbonated water; containing carbonates of soda and iron, sulphate of soda, and chloride of sodium, and is chiefly used externally, in cutaneous affections.

MAMA-PIAN. An ulcer of a bad aspect, which is the commencement of the *psia*; and which, after having destroyed the flesh, extends to the bones. It is also called the *Mother of Psians*;—*La mère des psians*.

MAMEI, *Mamos*, *Momin* or *Toddy Tree*. From incisions made in the branches of this West Indian tree, a copious discharge of pellucid liquor occurs, which is called *momin* or

*Toddy wine.* It is very diuretic, and is esteemed to be a good antilithic and lithonriptic.

**MAMELLE**, Mamma.

**MAMELON**, Nipple.

**MAMELONNE**, Mammillated.

**MAMELONS DU REIN**, Papillæ of the kidney.

**MAMILLA**, see Mamma.

**MAMMA**, from *mamma*, one of the earliest cries of the infant, ascribed to a desire for food. *Masthos, Mastus, Mazos, Thalt, Titthos, Ru-ma, Uber.* The female breast, (*Mammilla*, *Mamilla* being the male breast,) (F.) *Mamelle*. A glandular organ, proper to a class of animals—the *mammalia*—and intended for the secretion of milk. The mamms exist in both sexes, but they acquire a much greater size in the female; especially during pregnancy and lactation. In women, before the age of puberty, the breasts are but little developed. At this period, however, towards the central part of each breast, the skin suddenly changes colour, and assumes a rosy tint. It is of a reddish brown in women who have suckled several children. This circle has a rugous appearance, owing to the presence of sebaceous glands, and is called *Aureola* or *Aureola*. These glands furnish an unctuous fluid for defending the nipple from the action of the saliva of the sucking infant. In the midst of the aureola is the nipple, a conoidal eminence, of a rosy tint, susceptible of erection, and at the surface of which the galactophorous ducts open. Besides the skin covering them, the breasts are, also, composed of a layer of fatty cellular tissue, more or less thick; of a large gland; excretory ducts; vessels, nerves, &c. See Mammary.

The breasts are called the *bosom*, (F.) *Sein*.

**MAMMARY**, *Mamma'rius*, from *mamma*, 'the breast.' Relating to the breasts.

**MAMMARY ABSCESS**, Mastodynia apostematosa.

**MAMMARY ARTERIES** are three in number. They are distinguished into—1. The *Internal Mammary*, *Arteria sternalis*, 1. *Sous-sternal* (Ch.) *Internal thorac'ic*. It arises from the subclavian and descends obliquely inwards, from its origin to the cartilage of the third rib. Below the diaphragm it divides into two branches; the one *external*, the other *internal*. From its origin until its bifurcation, it gives branches to the muscles and glands of the neck, to the thymus, mediastinum, pericardium, and œsophagus. In each intercostal space, it gives off *internal* and *external musculo-cutaneous* branches, and also, on each side, the *superior diaphragmatic*. Its two ultimate branches are distributed on the parietes of the abdomen, and anastomose with the external mammary, intercostal, lumbar, circumflexa ilii, and epigastric arteries. 2. The *External Mammary Arteries* are two in number, and are distinguished into *superior* and *inferior*. The *superior external mammary*, *First of the thoracics* (Ch.,) *Superior external thoracic*, *Superior thoracic*, is furnished by the axillary artery. It descends obliquely forwards between the pectoralis major and pectoralis minor, to which it is distributed by a considerable number of branches. The *inferior external mammary*, the *second of the thoracics* (Ch.,) *Long or inferior thoracic*, arises from the axillary artery, a little below the preceding.

It descends vertically over the lateral part of the thorax; curves, afterwards, inwards; becomes subcutaneous and divides into a number of branches, which surround the breast. It gives branches to the pectoralis major, serratus major anticus, the intercostal muscles, the glands of the axilla and the integuments of the breast.

**MAMMARY GLAND** is the secretory organ of the milk. It is situate in the substance of the breast, to which it gives shape and size. The tissue of this gland results from the assemblage of lobes of different size, united intimately by a dense cellular tissue. Each of these is composed of several lobules, formed of round granulations, of a rosy white colour, and of the size of a poppy seed. The glandular grains give rise to the radicles of the excretory canals of the mamma, which are called *galactophorous* or *lactiferous*. These excretory vessels unite in ramusculi, rami, and in trunks of greater or less size; collect towards the centre of the gland; are tortuous, very extensible and semi-transparent. All terminate in sinuses, situate near the base of the nipple, which are commonly from 15 to 18 in number. These sinuses are very short, conical, and united by cellular tissue. From their summits, a fasciculus of new ducts sets out, which occupy the centre of the nipple and open separately at its surface. The arteries of the mammary gland come from the thoracic, axillary, intercostal, and internal mammary. The veins accompany the arteries; the nerves are furnished by the intercostals, and brachial plexus; the lymphatic vessels are very numerous, and form two layers. They communicate with those of the thorax, and pass into the axillary ganglions.

**MAMMARY SARCOMA**, *Mastoid sarcoma* of Abernethy, *Empy'ma sarcoma mamma'rum*. A tumour, of the colour and texture of the mammary gland; dense and whitish; sometimes softer and brownish; often producing, on excitation, a malignant ulcer with indurated edges. Found in various parts of the body and limbs.

**MAMMARY VEINS** follow the same course as the arteries, and have received the same denominations. The *internal mammary vein*, of the right side, opens into the superior cava; that of the left, into the corresponding subclavian vein. The *external mammary veins* open into the axillary vein.

**MAMME'A AMERICANA**. The systematic name of the tree on which the *mammeæ* fruit grows. This fruit has a delightful flavour when ripe; and is much cultivated in Jamaica, where it is generally sold in the markets as one of the best fruits of the island.

**MAMMELLA**, Nipple.

**MAMMIFORM**, Mastoid.

**MAMMILLA**, Mamma (male,) Nipple.

**MAMMILLÆ MEDULLARES**, see Mam-millary.

**MAMMILLARIS**, Mastoid.

**MAMMILLARY**, *Mammilla'ris*, from *Mammilla*, 'a small breast, a nipple.' See Mastoid.

**MAMMILLARY EM'INENCE** is a name given, 1. To more or less marked prominences on the inner surface of the bones of the cranium, which correspond to the anfractuosities of the cranium. 2. To white, round, medullary tubercles, of the size of a pea, situate at the base of

the brain, behind the gray substance from which the *Tige pituitaire*, of the French anatomists, arises. These *Mammillary Tubercles*, *Corpora albican'tia*, *C. Candican'tia*, *C. Mammilla'ria*, *Mammilla' medulla' res*, *Prominentia albican'tes*, *Processus mammilla' res cerebri*, *Protuberans glandula' res*, *Eminentia candican'tes*, *Pro'rum arurum for'nici bulbi*, *Willis's Glands*, (F.) *Bulbes de la vo'lte à trois piliers*, *Tubercles piriformes*, (Ch.) are united to each other by a small grayish band, which corresponds with the third ventricle. They receive the anterior prolongations of the fornix. Some ancient anatomists, taking the nervous trunks, to which Willis first gave the name of *olfactory nerves*, for simple appendages of the brain, called them, on account of their shape, *Caruncula' mammilla' res*. Vesalius, Fallopius, Columbus, and several others, termed them *Processus mammilla' res cerebri ad nases*.

**MAM' MLLATED**, (F.) *Mamelonné*, from *mamma*, 'the female breast.' That which has mammiform projections on its surface.

**MAMMILLATED LIVER**, Cirrhosis.

**MAMMO'SUS**, from *Mamma*, 'breast.' Having large breasts.

**MAMOE**, Mamei.

**MAN**, Aner, Anthropos, Homo.

**MAN-IN-THE-GROUND**, *Convolvulus panduratus*.

**MANCHE D'HIPPOCRATE**, *Chaussé*.

**MANCURANA**, Origanum.

**MANDIBULA**, Maxillary bone.

**MANDIBULARIS MUSCULUS**, *Masseter*.

**MANDO**, Glutton.

**MANDRAGORA**, *Atropa mandragora*.

**MANDRAGORITES**, from *mandragora*, the *Atropa mandragora* or mandrake. Wine in which the roots of mandrake have been infused.

**MANDRAKE**, *Atropa mandragora*, *Podophyllum peltatum*, *P. montanum*.

**MANDUCATIO**, Mastication—*m. Difficilis*, *Bradymasesis*.

**MANDUCATORY NERVE**, see Trigemini.

**MANGANESE, BLACK OXIDE OF**, *Mangan'esii oxidum*, *M. Binox'idum*, *Tetroxide of manganese*, *Magne'sia nigra*, *Mangan'sium vitriario'rum*, *M. oxyda'tum nativ'um* seu *nigrum*, *Mangan'sium ochra'ceum nigrum*, *M. oxyda'tum nativ'um*, *Mangan'um oxyda'tum nativ'um*, *Molybda'num magne'sii*, *Oxo'des mangani nativ'a*, *Peroxy'dum mangan'esii nigrum nativum*, *Superoxy'dum mangan'icum*, (F.) *Oxyde noir de manganese*. This oxide is not much used in medicine. It has been advised to dust the affected parts, in tinea capitis, with the powder.

**MANGANESE, OXYDE NOIR DE**, *Manganese*, black oxide of.

**MANGANESE, SULPHATE OF**, *Mangan'esii Sulphas*, *M. Protox'idii Sulphas*, *Sulphate of Protoxide of Manganese*. A rose-coloured and very soluble salt, isomorphous with sulphate of magnesia. It is prepared on a large scale for the use of the dyer, by heating in a close vessel, peroxide of manganese and coal, and dissolving the impure protoxide thus obtained in sulphuric acid, with the addition of a little chlorohydric acid towards the end of the process. The solution is evaporated to dryness, and again exposed to a red heat, by which the persulphate of iron is decomposed. Water

then dissolves the pure sulphate of manganese, leaving the oxide of iron behind.

This salt has been recently recommended as a cholagogue, in doses of a drachm or two.

**MANGANESE, TETROXIDE OF**, *M. Black oxide of*.

**MANGANESEII BINOXIDUM**, *Manganese*, black oxide of—*m. Oxidum*, *Manganese*, black oxide of—*m. Peroxydum nigrum nativum*, *Manganese*, black oxide of—*m. Protoxidi sulphas*, *Manganese*, sulphate of—*m. Sulphas*, *Manganese*, sulphate of.

**MANGANESIUM OCHRACEUM NIGRUM**, *Manganese*, black oxide of—*m. Oxydatum nativum seu nigrum*, *Manganese*, Black oxide of—*m. Vitriariorum*, *Manganese*, black oxide of.

**MANGANI OXODES NATIVA**, *Manganese*, black oxide of.

**MANGANICUM SUPEROXIDUM**, *Manganese*, black oxide of.

**MANGANUM OXYDATUM NATIVUM**, *Manganese*, black oxide of.

**MANGIFERA INDICA**. The *Mango tree*, (F.) *Manguier*. A tree cultivated over Asia, and in South America. Mangos, when ripe, are juicy; of a good flavour; and so fragrant as to perfume the air to a considerable distance. They are eaten, either raw or preserved with sugar. From the expressed juice a wine is prepared; and the remainder of the kernel can be reduced to an excellent flour for bread.

**MANGO TREE**, *Mangifera Indica*.

**MANGONISATIO**, Falsification.

**MANGONIUM**, Falsification.

**MANGOSTAN**, *Garcinia mangostana*.

**MANGOSTANA**, *Garcinia mangostana*.

**MANGOUSTAN**, *Garcinia mangostana*.

**MANGUIER**, *Mangifera Indica*.

**MANI**, *Arachis hypogea*.

**MANIA**, *Furor*, *Hemianthro'pia*, *Furor mania*, *Insa'nia*, *Delir'ium mani'acum*, *Ephro'nia mania*, *Delir'ium mania*, *D. furio'sum*, *Mania univo'ralis*, *Vesa'nia mania*, (F.) *Manie*, *Hyperphrenis*, *Raving* or *furious madness*; from *manuati*, 'I am furious.' With some, it means *insanity*. Disorder of the intellect, in which there is erroneous judgment or hallucination, which impels to acts of fury. If the raving be not directed to a single object, it is mania properly so called; if to one object, it constitutes *monomania*, which term is, however, usually given to melancholy. Mania attacks adults chiefly; and women more frequently than men. The prognosis is unfavourable. About one-third never recover; and they who do are apt to relapse. Separation is one of the most effective means of treatment, with attention to the corporeal condition and every thing that can add to the mental comfort of the patient, and turn his thoughts away from the subjects of his delusion. In the violence of the paroxysms, recourse must be had to the strait waistcoat, the shower bath, &c. Separation should be continued for some weeks during convalescence, with the view of preventing a relapse.

**MANIA, DANCING**. *Dancing plague*. A form of convulsion, which has appeared, at various times, epidemically under the name of St. Vitus's dance, St. John's dance, Tarantism, Hysteria, Tigretier (in Abyssinia), and diseased

sympathy; and which has been fully described by Hecker in his 'Epidemics of the Middle Ages.' See *Convulsionnaires*.

A form of convulsion, induced by religious phrenzy, has been vulgarly called the *Jerks*.

MANIA EPILEPTICA, see Epilepsy—m. Erotica, Erotomania—m. Lactea, M. puerperal—m. Melancholica, Melancholy—m. a Pathemate, Empathema—m. a Potù, Delirium tremens.

MANIA, PUERPERAL, *Mania puerperarum acuta*, M. puerperalis, M. lactea, *Insanitia puerperarum*, *Encephalopathia puerperalis*, *Puerperal Insanity*. Mania which supervenes in the childbed state.

MANIA PUERPERARUM ACUTA, M. puerperal—m. sine Delirio, Pathomania—m. a Temulentia, Delirium tremens—m. Pellagria, Pellagra.

MANIACUS, Maniodes.

MANICA HIPPOCRATIS, *Chaussé*.

MANIE, Mania—m. Sans délire, Empathema.

MANIGUETTA, *Amomum grana paradisi*.

MANIIBAR, *Jatropha manihot*.

MANILUVIUM, *Manuluvium*, from *manus*, 'the hand,' and *lavo*, 'I wash.' A bath for the hands. It may be rendered stimulating by means of muriatic acid, mustard, &c.

MANIOC, *Jatropha manihot*.

MANIODES, *Maniacus*, *Maniacal*. One labouring under mania; *Hemianthropus*, *Puriorus*, *Puribundus*, *Lyssas*, *Lyssoter*.

MANIPULATION, from *manus*, 'a hand.' Mode of working in the arts.

MANIPULUS, (F.) *Poigné*. The quantity of a substance capable of filling the hand. A handful. See *Fasciculus*.

MAN-MIDWIFE, *Accoucheur*.

MANNA, see *Fraxinus ornus*—m. Briangon, see *Pinus larix*—m. Calabrina; see *Fraxinus ornus*—m. Croup, *Semolina*—m. *Metallosum*, *Hydrargyri submurias*.

MANNEQUIN, *Fantom*.

MANNIKIN, *Fantom*.

MANNIN, see *Fraxinus ornus*.

MANNITE, see *Fraxinus ornus*.

MANŒUVRE (F.), from *main*, 'the hand,' and *œuvre*, 'work.' *Operatio chirurgica vel obstetrica*. The practice of surgical or obstetrical operations on the dead body or phantom.

MANSFORD'S PLATES, see *Galvanism*.

MANSORIUS, *Buccinator*.

MANSTUPRATIO, *Masturbation*.

MANTELE, *Bandage (body)*.

MANTIA, *Mantica*, *Manties*, in English, *mancy*; a common suffix, denoting 'divination'; *Divinatio*, *Prædivinatio*, *Præaugium*.

MANTILE, *Bandage (body)*.

MANTLE, *Panniculus carnosus*.

MANUBRIUM, from *manus*, 'a hand.' The handle of any thing:—as *manubrium mallœi*, *petiolus mallœi*, 'the handle of the malleus.'

MANUBRIUM, *Chasso*—m. *Manûs*, *Radius*.

MANUBRIUM STERNI. The uppermost broad part of the sternum.

MANULUVIUM, *Bath, hand, Maniluvium*.

MANUS, *Choir*, *Chir*, *Instrumentum Instructorum*, (F.) *Main*. The hand. The part which terminates the upper extremity in man, and which is inservient to prehension and touch. It extends from the fold of the wrist to the extremity of the fingers. The hand is sustained by a bony skeleton, composed of a number of

pieces, movable on each other; of muscles, tendons, cartilages, ligaments, vessels, nerves, &c. It is divided into three parts—the *carpus* or wrist, the *metacarpus*, and *ingers*. Its concave surface is called the *palm*; the convex surface the *back of the hand*. The facility of being able to oppose the thumb to the fingers in order to seize objects forms one of the distinctive characters of the human hand.

MANUS CHRISTI PERLATA. A name anciently given to troches, prepared of pearls and sugar of roses. They were called *Manus Christi simplicis*, when pearls were not employed.

MANUS DEI. An ancient plaster, prepared of wax, myrrh, *frankincense*, *mastic*, *Gum ammoniac*, *Galbanum*, oil, &c. See *Opium*.

MANUS HEPATIS, *Porta vena*—m. *Jecoris*, *Porta vena*—m. *Parva majori adjutrix*, see *Digitus*.

MANUSTUPRATIO, *Masturbation*.

MANUSTUPRATOR, *Masturbator*.

MANYPLIES, *Omasum*.

MAPLE, *Acér saccharinum*—m. *Ground*, *Heuchera cortusa*.

MARAIS, *Marsh*.

MARANTA ARUNDINACEA, *Arrow root*.

MARANTA GALANGA, *Alpinia galanga*, *Amomum galanga*, *Galanga*. The smaller *galangal*. Two kinds of galangal are mentioned in the pharmacopœias;—the greater obtained from *Kampferia galanga*, and the smaller, from the root of *Maranta galanga*. The dried root is brought from China, in pieces, from one to two inches in length, but scarcely half as thick; branched; full of knots and joints, with several circular rings, of a reddish brown colour, on the outside, and brownish within. It was formerly much used as a warm stomachic bitter; and generally ordered in bitter infusions.

MARASCHINO, see *Spirit*.

MARASMOPIRA, *Febbris marasmodes*, from *μαρasmus*, 'marasmus,' and *πυρ*, 'fever.' Fever of emaciation in general. Hectic fever.

MARASMUS, *Atrophy*—m. *Phthisis*, *Phthisis pulmonalis*.

MARASMUS SENILIS, *Tabes senum*. Progressive atrophy of the aged.

MARASMUS TABES, *Tabes*—m. *Tabes dorsalis*, *Tabes dorsalis*.

MARATHRYTES; from *μαραθρυς*, 'fennel.' Wine impregnated with fennel.

MARATHROPHYLLUM, *Peucedanum*.

MARATHRUM, *Aethum*—m. *Sylvestre*, *Peucedanum*.

MARAUGIA, *Metamorphopsia*.

MARBLE, *Marmor*.

MARBRE, *Marmor*.

MARC, *Magma*.

MARCASITA, *Bismuth*—m. *Alba*, *Bismuth*, *subnitrate of*—m. *Plumbea*, *Antimonium*.

MARCASITÆ MAGISTERIUM, *Bismuth*, *subnitrate of*.

MARCHANTIA POLYMORPHA, *Hepatica fontana*, *Lichen stellatus*, *Jecora'ria*, *Liv'erwort*, (F.) *Hépatique des fontaines*. This plant is mildly pungent and bitter. It is recommended as aperient, resolvent; and antiscorbutic; and is used in diseased liver, &c.

MARCHE LA, *Walking*.

MARCHIONIS PULVIS, *Powder of the*

*Marquis*. A powder, formerly considered to be anti-epileptic; and composed of *Male peony root*, *Mistletoe*, *Ivory shavings*, *Horn of the hoof of the stag*, *Spodium*, *Tooth of the monodon*, *coral*, &c.

MARCORES, Atrophy, Emaciation.

MARCORY, *Stillingia*.

MARÉCAGEUX, *Elodes*.

MAREO, *Puna*.

MARE'S TAIL, *Hippuris vulgaris*.

MARGA CAN'DIDA, *Lac luna*. An ancient name for a variety of spongy, white, friable marl, which was employed as an astringent and refrigerant.

MARGARETTA, *Scherlievo*.

MARGARITA, *Pearl*.

MARGARITA'CEOUS, *Margarita'ceus*, (F.) *Nacré*; from *Margarita*, 'pearl, mother of pearl.' Resembling, or of the nature of, mother of pearl,—as *Leuco'ma Margarita'ceum*; Pearl-like leucoma.

MARGARON, *Pearl*.

MARGELIS, *Pearl*.

MARGELLIUM, *Pearl*.

MARGINI-SUS-SCAPULO-TROCHITÉRIEN, *Terres minor*.

MARGO, *Bord*—m. *Dentatus*, see *Retina*—m. *Orbitalis*, see *Orbit*.

MARGUÉRITE, *PETITE*, *Bellis*—m. *des Prés*, *grande*, *Chrysanthemum leucanthemum*.

MARIENBAD, MINERAL WATERS OF. Celebrated springs in Bohemia. The Kreuzbrunn contains sulphate of soda, carbonate of iron, and carbonic acid.

MARIGOLD, DIAMOND FIG, *Mesembryanthemum crystallinum*—m. *Garden*, *Calendula officinalis*—m. *Single*, *Calendula officinalis*—m. *Wild*, *Calendula arvensis*.

MARIS, *meas.* Ancient name of a measure, containing 83 pints and 4 ounces.

MARISCA, *Ficus*, *Hæmorrhoidis*.

MARJOLAINE, *Origanum majorana*.

MARJORAM COMMON, *Origanum*—m. *Wild*, *Origanum*—m. *Sweet*, *Origanum majorana*.

MARJORANA, *Origanum majorana*—m. *Mancrana*, *Origanum*.

MARMALADE, *Marmelade*.

MARMARYGE, see *Metamorphopsia*.

MARMARYGO'DES, 'brilliant.' An epithet, joined particularly to the word *οφθαλμος*, to indicate a brilliant eye, a flashing eye. An eye which transmits the image of imaginary objects. See *Metamorphopsia*.

MAR-MELADE, *Marmela'da*, *Marmela'ta*, *Marmalade*, *Miva*. Parts of vegetables, connected with sugar, and reduced to a pulaceous consistence.

MARMELADE OF APRICOTS. A marmelade, prepared with two parts of ripe apricots deprived of their stones, and one part of white sugar.

MARMELADE OF FERNEL, *M.* of *Tronchin*.

MARMELADE OF TRONCHIN, or OF FERNEL. A kind of thick looch, of an agreeable taste, prepared with two ounces of oil of sweet almonds, as much syrup of violets, manna in tears, very fresh pulp of cassia, 16 grains of gum tragacanth, and two drachms of orange flower water. It is used as a laxative, demulcent, and pectoral.

MARMELATA, *Marmelade*.

MARMOR, *Marble*, *Calcis Carbonas durus*,

(F.) *Marbrs*. White granular carbonate of lime. Used in pharmacy for the preparation of a pure lime, and the disengagement of carbonic acid.

MARMORATA AURIUM, *Cerumen*.

MARMORYGE, see *Metamorphopsia*—m. *Hippocratis*, *Hemiopia*.

MAROUTE, *Anthemis cotula*.

MARRIOTT, DRY VOMIT OF. This once celebrated emetic, called *dry*, from its being exhibited without drink, consisted of equal portions of tartarized antimony and sulphate of copper.

MARRONIER D'INDE, *Æsculus Hippocastanum*.

MARROW, *My'elos*, *Medul'la*, *Medullary Juice*, *Axungia de Mum'ia*, *Sax. merz*, (F.) *Moëlle*, *Suc midullaire*. The oily, inflammable, whitish or yellowish juice, which fills the medullary canal of the long bones, the cancellated structure at the extremities of those bones, the diploë of flat bones, and the interior of short bones. The marrow is furnished by the exhalation of the medullary membrane. It is fluid during life, and appears under the form of small points or brilliant grains after death. It is enveloped in the medullary membrane.

MARROW, SPINAL, *Medulla spinalis*—m. *Vertebral*, *Medulla spinalis*.

MARRUBE BLANC, *Marrubium*—m. *Noir*, *Ballota fetida*.

MARRUBIUM, *Marrubium vulgare*, *M. album*, *Præ'sium*, *Pharsum*, *Horshound*, (F.) *Marrube blanc*. The leaves have a moderately strong, aromatic smell; and a very bitter, penetrating, diffusive, and durable taste. It has often been given in coughs and asthma, united with sugar. Dose, ℥ss to ℥j, in infusion; dose, of extract, gr. x. to ℥ss.

FORD'S BALM OF HORSHOUND is made as follows:—*horshound*; *liquorice root*, *aa* ℥iij and ℥viij; *water*, *q. s.* to strain ℥vj. Infuse. To the strained liquor add:—*proof spirit or brandy*, ℥l9; *camphor*, ℥j and ℥ij; *opium and benjamin*, *aa* ℥j; *dried squills*, ℥ij; *oil of aniseed*, ℥i; *honey*, ℥iij and ℥viij—*Gray*. It is pectoral.

MARRUBIUM, *Leonurus cardiaca*—m. *Nigrum*, *Ballota fetida*.

MARS, *Ferrum*—m. *Solubilis*, *Ferrum tartarizatum*.

MARSEILLES, (CLIMATE OF.) The remarks made upon the climate of Montpellier apply even in greater force to that of Marseilles. It possesses all the objectionable qualities of the climate of south-eastern France.

MARSH, *Linné*, *Holos*, *Palus*, *Sax. merz*, (F.) *Marass*. Marshy districts give off emanations, which are the fruitful source of disease and the cause of great insalubrity in many countries. The chief disease, occasioned by the malaria or miasm, is intermittent fever. Hence it becomes important to drain such regions, if practicable. Some marshy countries are not so liable to phthisis pulmonalis, and it has been found, that where intermittents have been got rid of by draining, consumption has, at times, become frequent. The most unhealthy periods for residence in a marshy district are during the existence of the summer and autumnal heats; at which times the water becomes evaporated, and the marshy bottom is more or less exposed to the sun's rays. This postulatam seems necessary for the

production of the miasmata: for whilst the marsh is well covered with water, no miasm is given off.

**MARSH POISON**, Miasm (marsh)—*m.* Mallow, *Althæa*—*m.* Root, *Statice Caroliniana*—*m.* Tea, *Ledum palustre*.

**MARSHALL'S CERATE**, see Cerate, Marshall's.

**MARSHY**, Elodes.

**MARSIPIUM**, Marsupion.

**MARSUM**, *Marsium*, *Marsicum*. An ancient wine of Marsia, in Italy, which was used as an astringent in certain diseases of the mouth.

**MARSUPIAL**, see Marsupion.

**MARSUPIALIS**, Ischio-trochanterianus, Ob-turator internus.

**MARSUPIATE**, see Marsupion.

**MARSUPION**, *Marsypion*, *Marsippon*, *Marsupium*, *Marsip'um*, *Suc'culus*. A sac or bag, with which any part is fomented. Also, the abdominal pouch in the kangaroo, opossum, &c., into which the young, born at a very early stage of development, are received and nourished with milk secreted from glands contained within the pouches. Such animals are termed *Marsu'pial*, *Marsu'pials*, *Marsupia'lia*. See Generation.

**MARSUPIUM**, Scrotum—*m.* Musculosum, Dartos.

**MARSYPION**, Marsupion.

**MARTEAU**, Malleus.

**MARTIAL**, Chalybeate.

**MARTIALIS**, Chalybeate.

**MARTIANA POMA**, see Citrus aurantium.

**MARTIANUM UNGUENTUM**, (F.) *Onguent de Soldat*, *Soldier's ointment*. This was composed of bay berries, rue, marjoram, mint, sage, wormwood, basil, olive oil, yellow wax, and Malaga wine. It was invented by Martian; and was employed by soldiers as a preservative against cold.

**MARTIS LIMATURA**, Ferri limatura.

**MARUM CORTUSI**, Teucurium marum—*m.* Creticum, Teucurium marum—*m.* Syriacum, Teucurium marum—*m.* Verum, Teucurium marum—*m.* Vulgare, Thymus mastichina.

**MAS**, Male, Modiolus.

**MASCHALE**, Axilla.

**MASCHALÆUS**, Axillary.

**MASCHALIS**, Axilla.

**MASCHALISTER**, Axis.

**MASCHALONCUS**, *Maschalop'anus*, from *μασχαλις*, 'the axilla,' and *εγκος*, 'a tumour.' A tumour or bubo or swelling in the axilla.

**MASCHALOPANUS**, Maschaloncus.

**MASCULA**, Tribade.

**MASCULUS**, Male.

**MASESIS**, Mastication.

**MASHUA**, (S.) A tuberous root, of a flat pyramidal shape, which is cultivated and cooked like the potatoe by the Serranos of Peru. It is watery and isapid, but nevertheless is much eaten by them. The Indians use the mashua as a medicine in dropsy, dyspepsia, and dysentery. The plant is unknown to botanists.—Tschudi.

**MASK**, *Larva*, (F.) *Masque*. A bandage applied over the face, as a sort of mask, in cases of burns, scalds, or erysipelas. It serves to preserve the parts from the contact of air, and to retain topical applications *in situ*. It is made of a piece of linen, of the size of the face, in which apertures are made corresponding to

the eyes, nose, and mouth, and which is fixed by means of strings stitched to the four angles.

**MASLACH**, *Moslich*, *Am'phion*, *An'fon*. A medicine much used by the Turks, and into the composition of which opium enters. It is excitant.

**MASQUE**, Mask.

**MASS**, *μαζα*, *Maza*, *Massa*, from *μαζωω*, 'I mix.' The compound, from which pills have to be formed.

**MASSA**, Mass—*m.* Carnea Jacobi Sylvii, see Flexor longus digitorum pedis profundus perforans—*m.* de Dactylis, Paste, date—*m.* de Extracto glycyrrhizæ, Pasta glycyrrhizæ, &c.—*m.* de Gummi Arabico, Paste, marshmallow—*m.* de Zizyphorum fructa, Paste of jujubes.

**MASSAGE**, Shampooing.

**MASSEMA**, Mastication.

**MASSEMENT**, Shampooing.

**MASSES APOPHYSAIRES**, see Vertebrae.

**MASSESSIS**, Mastication.

**MASSETER**, from *μασσωω*, 'I eat,' 'I chew.' *Musculus mandibularis*, (F.) *Zygomato-maxillaire*. A muscle situate at the posterior part of the cheek, and lying upon the ramus of the lower jaw-bone. It is long, quadrilateral, and is attached, *above*, to the inferior edge and to the inner surface of the zygomatic arch; *below*, it terminates at the angle of the jaw, and at the outer surface and inferior margin of the ramus of that bone. It is composed of an intermixture of fleshy and aponeurotic fibres. Its office is to raise the lower jaw, and to act in mastication.

**MASSETER INTERNUS**, Pterygoideus internus.

**MASSETERIC**, *Mas'seterine*, *Mas'seter'icus*, *Mas'seter'us*. Relating or belonging to the masseter muscle.

**MASSETERINE ARTERY** arises from the trunk of the internal maxillary or temporalis profunda posterior, and is distributed to the masseter muscle, after having passed, horizontally, through the sigmoid notch of the lower jaw-bone.

**MASSETERINE NERVE** is given off from the inferior maxillary branch of the fifth pair. It passes through the sigmoid notch, and is distributed on the inner surface of the masseter. In luxation of the lower jaw, this nerve is strongly stretched, and considerable pain, consequently, produced.

**MASSETERINE VEIN** has the same distribution as the artery. It opens into the internal maxillary vein.

**MASSETERINUS**, Masseteric.

**MASSICOT**, Plumbi oxydum semivitreum.

**MASSING**, Shampooing.

**MASSULA**, Molecule.

**MASTADENITIS**, Mastitis.

**MASTALGIA**, Mastodynia.

**MASTAX**, Mystax.

**MASTEMA**, Masticatory.

**MASTERWORT**, *Heracleum lanatum*, *Imperatoria*, *Angelica atropurpurea*.

**MASTESIS**, Mastication.

**MASTHELICOSIS**, Mastodynia apostematosa.

**MASTHOS**, Mamma.

**MASTICATION**, *Masticatio*, *Mas'sis*, *Mas'se'is*, *Mas'se'ma*, *Mas'te'is*, *Manduca'tio*, *Commanduca'tio*, from *μαστωω*, 'I chew.' The action of chewing or bruising food, to prepare it for the digestion it has to undergo in the stomach. This is executed by the joint action

of the tongue, cheeks, and lips, which push the alimentary substance between the teeth; and by the motions of the lower jaw it is cut, torn, or bruised.

**MASTICATORY**, *Masticator'ium*, *Maste'ma*, *Diamaste'ma*. Same etymon. A substance, chewed with the intention of exciting the secretion of saliva.

**MASTICATORY NERVE**, see Trigemini.

**MASTICH**, see *Pistacia lentiscus*—m. Herb, common, *Thymus mastichina*—m. Herb, Syrian, *Teucrium marum*—m. Tree, *Pistacia lentiscus*.

**MASTICHINA GALLORUM**, *Thymus mastichina*.

**MASTIGODES HOMINIS**, *Trichocephalus*.

**MASTIGOSIS**, *Flagella'tio*. Flagellation, scourging; employed by the ancients as a remedy in many diseases.

**MASTITIS**, *Masto'itis*, *Inflamma'tio Mam'ma*, *Mastademi'tis*, (F.) *Inflammati'o des Mammelles*, from *μαστος*, 'the breast,' and *itis*, denoting inflammation. Inflammation of the breast.

**MASTITIS APOSTEMATOSA**, *Mastodynia apostematosa*.

**MASTIX**, see *Pistacia lentiscus*.

**MASTODES**, Mastoid.

**MASTODYN'IA**, *Mastal'gia*, from *μαστος*, 'the breast,' and *δύνη*, 'pain.' Pain in the breasts; a form of neuralgia.

**MASTODYN'IA APOSTEMATOSA**, *Phleg'moné Mamma*, *Mastilo'is*, *Masti'tis apostematosa*, *Galactoposte'ma*, *Galactomastoparseto'ma*, *Abscess'us Mamma*, *A. lac'teus*, *Phleg'moné Mastodyn'ia*, *Abscess of the Breast*, *Mam'mary Abscess*, *Weed in the Breast*. Phlegmonous inflammation of the breasts, running on to suppuration. It is one of the best examples of acute phlegmonous inflammation, and requires the active use of appropriate treatment.

**MASTODYNIA POLYGALA**, *Sparganosis*—m. Polygala, *Mastopargosis*.

**MASTOID**, *Masto'idés*, *Masto'des*, *Mastoidéus*, *Mammillaris*, *Papilli's-aut-mammilli-formis*, *Mammiform'is*, *Mam'miform*, from *μαστος*, 'a breast,' and *ειδος*, 'form, resemblance.' Having the form of a nipple. Also, that which relates to the mastoid process, *Masto'idéus*.

**MASTOID APERTURE**:—the opening of communication between the cavity of the tympanum and the mastoid cells.

**MASTOID CELLS**, *Antrum mastoideum*, *Mastoid Sinus*. These are situate in the mastoid process; communicate with each other, and open into the cavity of the tympanum. Their use seems to be to increase the intensity of sound.

**MASTOID FORAMEN** is situate behind the mastoid process, and gives passage to a small artery of the dura mater, as well as to a vein which opens into the lateral sinus.

**MASTOID FOSSA**, (F.) *Gouitière mastoïdiéenne*, is a depression at the inner surface of the mastoid portion of the temporal bone, which forms part of the lateral sinus.

**MASTOID OR DIGASTRIC GROOVE**, (F.) *Rai-nure mastoïdiéenne ou digastrique*, is a groove, situate at the inner side of the mastoid process, which affords attachment to the posterior belly of the digastric muscle.

**MASTOID MUSCLE, POSTERIOR**, *Splenius*.

**MASTOID OF MAM'MIFORM OR MAM'MILLARY**

**Process**, *Pars mastoïdea*, is situate at the inferior and posterior part of the temporal bone, and gives attachment to the digastric and mastoid muscles.

**MASTOIDEUS**, *Sterno-cleido-mastoïdeus*—m. Lateralis, *Complexus minor*.

**MASTOÏDO-CONCHINIEN**, *Retrahens auris*—m. *Génion*, *Digastricus*—m. *Hyogénien*, *Digastricus*—m. *Oriculaire*, *Retrahens auris*.

**MASTON'CUS**, *Thelon'cus*, from *μαστος*, 'the breast,' and *εγχος*, 'a tumour.' A tumefaction of the nipple, or of the breast itself.

**MASTONCUS POLYGALACTICUS**, *Mastospargosis*.

**MASTOPATH'IA**, from *μαστος*, 'the breast,' and *παθος*, 'disease.' An affection of the breast.

**MASTORRHA'GIA**, from *μαστος*, 'the breast,' and *ρρρρρρρρ*, 'to flow.' An unusual flow of milk.

**MASTOS**, *Mamma*.

**MASTOSPARGOSIS**, *Mastodyn'ia polygala*, *Maston'cus polygalacticus*, from *μαστος*, 'the breast,' and *εργαζω*, 'I am full to bursting.' Fulness of the breasts with milk, so that they are ready to burst.

**MASTRUPATIO**, *Masturbation*.

**MASTURBATION**, *Cina'dia*, *Garg'ale*, *Gargalus*, *Gargalis'mus*, *Mastupra'tio*, *Manustupra'tio*, *Manustupra'tio*, from *manus*, 'the hand,' and *stupro*, 'I ravish;' *Ona'mia*, *On'anism*, *Edaogargaris'mus*, *Edaogargal'us*, *Anaplas'mus*, *Gaudia fada*, *Voluntary Pollu'tion*, *Self Pollution*, (F.) *Abus de soi-même*, *Attouchement*. Excitement of the genital organs by the hand.

**MASTURBA'TOR**, *Mastupra'tor*, *Manustupra'tor*: same etymon. One given to masturbation.

**MASTUS**, *Mamma*.

**MAT** (F.), Dull.

**MATSON**, (F.) *A dull sound*. The obscure noise, afforded in certain diseases when any part, as the chest, is percussed. It has been compared to that produced when the thigh is struck. It is opposed to the *Son clair*, or 'clear sound.'

**MATE**, see *Hex Paraguenis*.

**MATER**, *Uterus*—m. *Dura*, *Dura mater*—m. *Herbarum*, *Artemisia vulgaris*—m. *Metal-lorum*, *Hydrargyrum*—m. *Mollis*, *Pia mater*—m. *Perlarum*, see *Pearl*—m. *Pia*, *Pia mater*—m. *Secalis*, *Ergot*—m. *Tenuis*, *Pia mater*.

**MATERIA**, *Matter*—m. *Fibrosa*, *Fibrin*.

**MATERIA MED'ICA**, *Pharmacolog'ia*, *Pharmacology*, *Acol'ogy* or *Akol'ogy* or *Areeolog'ia*, *Hylé Iatrie*, *Iamatolog'ia*, *Iumatol'ogy*, (F.) *Matère Médicale*. The division of medical science which treats of the knowledge of medicines; their action on the animal economy, and mode of administration. The study of the *Materia Medica* is one of great importance;—it is a study of the tools with which the practitioner has to work in the cure of disease. Much labour has been spent in contriving classifications of the *Materia Medica*. Some have arranged the articles according to their natural resemblances: others, according to their real or presumed virtues: others according to their active constituent principles. The *Pharmacopœias* place them alphabetically. Perhaps the best classification would be one founded on the agency exerted by the articles on the different tissues; but this arrangement, in the present state of science, is by no means easy: and moreover,

Ideas in regard to the action of medicines are so associated with certain terms,—as narcotics, tonics, sedatives, &c., employed to denote certain operations, which they are esteemed capable of producing, that, to abandon them, would be to throw obstacles in the way of the student, without the ultimate advantage accruing to him of possessing a better knowledge of the *modus operandi* of medicines than when a classification, somewhat resembling those usually embraced, is adopted.

The following is the classification given by the Author, in his "General Therapeutics," (Philadelphia, 1836.)

CLASSIFICATION OF THERAPEUTICAL AGENTS.

I. VITAL AGENTS.	Excitants.	Increasing action generally, or locally, or both.	Excitants proper,
			Tonics,
	Sedatives.	Diminishing action directly or indirectly.	Anthelmintics,
			Astringents,
II. CHEMICAL AGENTS.			Emetics,
			Cathartics,
III. MECHANICAL AGENTS.			Emmenagogues,
			Abortives,
			Diaphoretics,
			Errhines,
			Sialogogues,
			Diuretics,
			Expectorants,
			Sorbeficients,
			Revellents,
			Antispasmodics.
			Sedatives proper,
			Narcotics,
			Refrigerants.
			Nauseants.
			Antacids,
			Antalkalics,
			Antilithics,
			Disinfectants.
			Demulcents,
			Diluents.
			Emetics,
			Cathartics,
			Anthelmintics.
			Expectorants.
			Errhines,
			Sialogogues,
			Diuretics,
			Antilithics,
			Diaphoretics.
			Narcotics,
			Tetanic,
			Antispasmodics.
			Emmenagogues,
			Parturificants.
			Excitants,
			Tonics,
			Astringents,
			Sedatives,
			Refrigerants,
			Revellents,
			Eutrophics.
			Antacids,
			Antalkalics,
			Disinfectants.

In his "General Therapeutics and Materia Medica," however, he has adopted the following classification, to harmonize more with the arrangement in his Practice of Medicine.

1. Agents that affect prominently the alimentary canal or its contents,
2. Agents that affect prominently the respiratory organs,
3. Agents that affect prominently the follicular or glandular organs,
4. Agents that affect prominently the nervous system,
5. Agents that affect prominently the organs of reproduction,
6. Agents that affect various organs,
7. Agents whose action is prominently chemical,

8. Agents whose action is { Demulcents,  
prominently mechanical, } Diluents.

Of old, the Materia Medica consisted of more articles than at present. The tendency, indeed, is, and must be, to diminish it still farther; to get rid of those articles which possess no advantages over others equally common, or whose properties are doubtful. In a dictionary, it becomes necessary to insert all that have been reputed to possess virtues; but the majority are unnecessary. The catalogue might be largely reduced, with impunity.

MATERIA MORBOSA, *M. Peccans*, *Materies Morbi*. Morbid matter. The matter or material which is the cause of disease.

MATERIA OSSEA, Terra Ossea—*m. Peccans*, *M. Morbosa*—*m. Salina*, see *Saliva*—*m. Testacea dentium*, see *Tooth*—*m. Urinosa*, *Urea*.

MATERIALISTA, Druggist.

MATERIAUX IMMEDIATS, Principles, immediates.

MATERIES, Matter—*m. Morbi*, *Materia morbosa*.

MATHEW'S PILLS, *Pilulæ ex helleboro et myrrha*.

MATIAS. The bark of a South American tree, not yet determined. It is used in its native country in intermittents, and as a tonic generally. Its principal characteristic constituent is a bitter resinous matter. It is probably the same as the *Malambo bark*.

MATICO, *Yerba del Soldado* or *Soldier's weed*. A South American herb—*Piper angustifolium* or *Artanthe elongata*—which is possessed of astringent virtues, and is used both internally and externally. It is given in infusion made of one ounce of the leaves to a pint of boiling water, of which the dose is *f. ʒiiss*, or in tincture, made of ʒiiss of the leaves to a pint of dilute alcohol.

MATIERE, Matter—*m. Cerebriformis*, *Encephaloid*—*m. Extractivæ du Bouillon*, *Osma-zome*—*m. Médicale*, *Materia Medica*—*m. Perle de Korring*, *Antimonium diaphoreticum*—*m. Pulmonaire noire*, see *Pulmo*.

MATLOCK, MINERAL WATERS OF. Matlock is a village in Derbyshire, England, to which there is a mineral spring of the acidulous class. Temperature 66°. It differs but little, except in temperature, from good spring water. It is generally used as a tepid bath.

MATONIA CARDAMOMUM, *Amomum cardamomum*.

MATORIUM, *Ammoniac*, gum. MATRACIUM, *Matras*, *Urial*.

MATRASS, *Matra-cium*. A glass vessel with a long neck; and a round, and sometimes oval, body. It may be furnished with tubules or not. It is used in Pharmacy for distillation, digestion, &c.

MATRES CEREBRI, *Meninges*.

MATRICAIRE, *Matricaria*.

MATRICALIS, *Matricarius*, from *matriz*, 'the uterus.' Relating to the uterus.

*Matricalia* are remedies for diseases of the uterus.

MATRICARIA, from *matriz*, 'the womb;' so called from its reputed virtues in affections of that organ; *Matricaria Parthenium*, *Parthenium febrifugum*, *Pyrethrum parthenium*, —*Chrysanthemum parthenium*, *Argyrochaeta*, *Chrysocalis*, *Fever-few*, *Feather-few*, *Motherwort*, (*F.*) *Matricaria*. It resembles, in its

properties, chamomile and tansy; and, like them, has been esteemed tonic, stomachic, resolvent, emmenagogue, vermifuge, &c. It is not much used.

**MATRICA'RIA CHAMOMIL'LA**, *Chamomelum Vulgar'e*, *Chamomil'la nostrae*. *Leucanthemum* of Dioscorides; *Wild Corn*, *Dog's Chamomile*, *German Chamomile*, (F.) *Camomille vulgaire*. It resembles the *Matricaria* in properties.

**MATRICARIA**, *Anthemis nobilis*.

**MATRICE**, Uterus—*m. Col de la*, *Collum uteri*.

**MATRISYLVA**, *Asperula odorata*.

**MATRIX**, *Cyrtoblastema*, Uterus—*m. Unguis*, see *Nail*.

**MATRONA**, *Midwife*.

**MATRONALIS**, *Viola*.

**MATTEE**, see *Ilex Paraguensis*.

**MATTER**, *Mate'ria*, *Hyle*, *Mate'ries*, (F.) *Matière*. Any substance which enters into the composition of a body. In *Medicine*, it is sometimes applied to the substance of evacuations; and is also used synonymously with *pus*.

**MATTING OF PARTS**, *Hæpantismus*.

**MATULA**, *Urinal*.

**MATURA'TION**, *Maturatio*, from *maturare*, 'to ripen;' *Pepas'mos*, *Pepan'sis*. Progression of an abscess towards maturity. The state of maturity. Coction.

**MATURATIVE**, *Maturative*.

**MATURATIVE**, *Maturans*, *Pepanticos*, (F.) *Maturatif*. A medicine which favours the maturation of an inflammatory tumour.

**MATURATUS**, *Concocted*.

**MATURITY**, *Maturitas*, *Horæ'otes*. The state of fruits and seeds, when comparatively developed. State of an abscess, in which the *pus* is completely formed.

**MATURITY**, *Præcocious*, *Præotia*.

**MAUDLIN**, *Achillea ageratum*—*m. Tansey*, *Achillea ageratum*—*m. Wort*, *Chrysanthemum leucanthemum*.

**MAUVE SAUVAGE**, *Malva*.

**MAUX DE NERFS**, *Hysteria*.

**MAXILLA**, *Maxillary Bone*.

**MAXILLARY**, *Maxilla'ris*, (F.) *Maxillaire*, from *maxilla*, 'a jaw.' Relating or belonging to the jaws; from *massas*, 'I chew.'

**MAXILLARY ARTERIES** are three in number.

1. *External maxillary*. See *Facial*. 2. *Internal maxillary*—*A. Gutturæ-maxillaire*, (Ch.) This arises from the external carotid with the temporal. It is remarkable for its complex course, and for the number of branches which it transmits to the deep-seated parts of the face. Immediately after its origin, it buries itself under the neck of the lower jaw, curving inwards and downwards. It then advances directly inwards; proceeding in the space between the two pterygoid muscles towards the *maxillary tuberosity*. It turns again, becomes vertical, and ascends into the bottom of the zygomatic fossa, until, having arrived at the floor of the orbit, it takes a horizontal and transverse direction; enters the sphenomaxillary fossa, and divides into several branches. See *Artery*. (Table.)

**MAXILLARY BONE**, *Maxil'la*, *Mandib'ula*, *Gam'phelè*, *Gnathus*, *Mola*, *Siagon*, 'jaw.' (F.) *Machoirs*. A name given to two bones, which support the teeth, and, by means of them, are inservient to the cutting, bruising, and tearing of alimentary substances.

The maxillary bones are two in number.

**MAXILLARY BONE, INFERIOR**, *Lower jaw-bone*, *Os Maxilla'rè inferius*, *Machoirs diacranienno*, *Maxil'la inferior*, (F.) *Os maxillaire*, (Ch.) is a symmetrical, nearly parabolic bone, the middle portion of which is horizontal, and called the *body*; and the posterior is vertical, the angular portions being termed *Rami* or *branches*. There have behind a *perotidean edge*, which forms—by uniting with the base—the *angle of the jaw*. The branches terminate above by two processes, separated by the *sigmoid notch* or *fossa*; the anterior of which is called the *coronoid*; the posterior, the *condyloid process* or *maxillary condyle*, supported by a *Cervix*, *Collum* or *Neck*. The chief parts observed on the lower jaw are—1. *Externally*,—the *Symphysis menti*, *Apophysis menti*, *Mental foramen*, and the *external oblique line*.—2. *Internally*,—the *Geniapophysis*, the *internal* or *Mylloid oblique lines*, and the *entrances of the dental canal*. The lower jaw has, also, an *alveolar edge*, which contains alveoli for the reception of the teeth. The lower jaw-bone is developed by two points of ossification, which unite at the symphysis of the chin. It is articulated with the temporal bone and with the teeth.

**MAXILLARY BONE, SUPERIOR**, *Upper jaw-bone*, *Maxilla superior*, *Os maxilla'rè superius*, *Maxil'la syncran'nia*, (F.) *Os sus-maxillaire*, (Ch.) *Machoirs syncranienno*. The upper jaw-bones are to the face what the sphenoid bone is to the cranium. They are articulated with all the portions composing it. They determine, almost alone, the shape of the face, and give it solidity. Their size is considerable; form unequal. They occupy the middle and anterior part of the face, and enter into the composition of the nasal fossa, orbit, and mouth. The chief parts observable in the upper jaw, are, 1. *Externally*—The *Nasal process*, (F.) *Apophyse montante*, the *Foramen infra-orbitarium*, *Zygomatic process*, *Canine fossa*, *Myrtiform fossa*. 2. *Internally*—The *Palatine process*, *Anterior palatine canal*, and the *Antrum of Highmore*. Its circumference is very unequal, and it has behind a round, unequal prominence called the *Maxillary tuberosity*, which is pierced by the *posterior dental canal*. Anteriorly, there is a notch, which forms part of the anterior aperture of the nasal fossa, and beneath an eminence called the *anterior nasal spine*. The lower part of this circumference forms the *alveolar margin*. Each superior maxillary bone is articulated with the ethmoid, frontal, nasal, lachrymal, palatine, inferior, spongy, vomer, its fellow, the teeth of the upper jaw, and sometimes the sphenoid bone. It is developed by four or five points of ossification.

**MAXILLARY NERVES** are two in number, and formed of the second and third branches of the fifth pair. The **SUPERIOR MAXILLARY NERVE**, *Nervus-maxillaire*, (Ch.) arises from the middle of the gangliform enlargement of the fifth pair; passes forwards and issues from the cranium through the foramen rotundum of the sphenoid bone; enters the sphenomaxillary fossa, which it crosses horizontally; passes into the infra-orbital canal, which it traverses; and makes its exit to vanish on the cheek. It gives off the following branches,—the *orbital*, a branch which goes to the *spheno-palatine ganglion*; *posterior dental branches*; the *anterior dental*,—and terminates in the *infra-orbital nerves*, which

are divided into *superior*, *inferior*, and *internal*. The *inferior maxillary nerve*, *Nerv. maxillaris*, (Ch.) is the largest of the three branches furnished by the fifth pair. It issues from the cranium by the foramen ovale of the sphenoid. Having reached the zygomatic fossa, it divides into two trunks; the one *superior* and *external*, which gives off the *temporales profundi*, *masseterius*, *buccal* and *pterygoids*;—the other—*inferior* and *internal*—the larger of the two, which furnishes the *inferior dental*, *lingual*, and *auricular*.

**MAXILLARY VEINS** present the same arrangement as the arteries they accompany.

**MAXILLO-ALVEOLI-NASAL**, Depressor alae nasi—*m. Labialis*, Depressor anguli oris—*m. Nasalis*, Compressor naris—*m. Palpebralis*, Orbicularis palpebrarum—*m. Scleroticius*, Obliquus inferior oculi.

**MAYAPPLE**, *Podophyllum peltatum*—*m. a. Mountain*, *Podophyllum montanum*—*m. Weed*, *Anthemis cotula*.

**MAYELLA**, *Curcuma longa*.

**MAYFLOWER**, *Anthemis cotula*.

**MAZA**, *Massa*, *Placenta*.

**MAZICUS**, from *masa*, 'placenta.' Relating to the placenta.

**MAZISCHESIS**, from *masa*, 'the placenta,' and *σχέσις*, 'holding,' 'retention.' Retention of the placenta.

**MAZOLYSIS**, from *masa*, 'placenta,' and *λύσις*, 'solution.' Separation of the placenta.

**MAZOPATHIA**, from *masa*, 'placenta,' and *πάθος*, 'disease.' A disease of the placenta. One originating from the placenta.

**MAZOS**, *Mamma*.

**MEAD**, *Hydromeli*, *Melizomum*.

**MEADOW BLOOM**, *Ranunculus acris*—*m. Fern*, *Comptonia asplenifolia*—*m. Pride*, see *Calumba*—*m. Rue*, *Thalictrum*—*m. Saffron*, *Vinegar of*, *Acetum colchici*—*m. Sweet*, *Gillettia trifoliata*, *Spiraea ulmaria*—*m. Sweet*, red, *Spiraea tomentosa*.

**MEASLES**, *Rubeola*—*m. Black*, see *Rubeola*—*m. False*, *Roseolæ*—*m. French*, *Roseolæ*.

**MEASLY**, *Morbillosus*.

**MEAT**, **EXTRACTIVE OF**, *Osmazome*.

**MEAT**, *Meatus*.

**MEATUS**, *Ductus*, *Canalis*, *Porus*, (F.) *Méat*. A passage or canal.

**MEATUS AUDITORIUS EXTERNUS**, *Auditory canal*, external—*m. Auditorius internus*, *Auditory canal*, internal—*m. Cæcus*, *Eustachian tube*—*m. Narium*, see *Nasal fossæ*—*m. Seminales uteri*, *Tubæ Fallopianæ*—*m. Seminarius*, *Corpus Highmori*—*m. Urinarius*, *Urethra*.

**MECHAMECK**, *Convolvulus panduratus*—*m. Bindweed*, *Convolvulus panduratus*.

**MECHANÉ**, *Machine*.

**MECHANEMA**, *Machine*.

**MECHANICAL**, *Mechanicus*, from *μηχανή*, 'a machine.' An epithet given to irritating bodies, which do not act chymically—as a *mechanical irritant*.

**MECHANICAL OF IATRO-MATHEMATICAL PHYSICIANS**, *iätro-mechan'ici* seu *Iätromathemat'ici*, are such as refer every function, healthy or morbid, to mechanical or mathematical principles;—*Medic'na mechan'ica*.

**MECHANICS**, **ANIMAL**. That part of physiology whose objects are to investigate the laws of equilibrium and motion of the animal body.

**MECHANISM**. The structure of a body; the collection or aggregate of the parts of a machine; the mode in which forces produce any effect, &c.

**MÈCHE**, *Tent*. This term is usually employed in French surgery to a collection of threads of charpie, cotton or raw silk united together, which are used for detaching sinuous or fistulous ulcers; or to keep open or enlarge natural or artificial apertures. They are generally applied by means of an instrument called *Porte-mèche*.

**MECHOACANA NIGRA**, *Convolvulus jalapa*.

**MECHOACANÆ RADIX**, *Convolvulus mechoacan*.

**MECHOACHAN DU CANADA**, *Phytolacca decandra*.

**MECOMETER**, (F.) *Mécomètre*; from *μετρος*, 'length,' and *μετρον*, 'measure.' A kind of graduated compass,—*compas de proportion*,—used at the Hospice de Maternité of Paris, to measure the length of new-born infants.

**MECON**, *Meconium*, *Opium*, *Papaver*.

**MECONIS MUS**, *Intoxicatio opio'ca*; from *μετρος*, 'the poppy.' Poisoning by opium.

**MECONIUM**, from *μετρον*, 'a poppy.' *Poppy juice*, *Papaver culum*, *Purgomen'ta Infantis*, *Mecon*. The excrement passed by the infant a short time after birth, which had accumulated in the intestines during pregnancy. It is of a greenish or deep black colour, and very viscid. It seems formed of the mucous secretions of the intestines mixed with bile. See *Opium*.

**MECONOLOG'IA**, *Opiolog'ia*; from *μετρον*, 'a poppy,' and *λεγος*, 'a description.' A treatise on opium.

**MEDEA**, *Genital organs*.

**MÉDECIN**, *Physician*—*m. Consultant*, *Consulting physician*.

**MÉDECINE**, *Medicina*—*m. Expectans*, *Expectation*—*m. Légalé*, *Medicine*, *legal*—*m. Perturbatrix*, *Perturbatrix (Medicina)*.

**MEDELA**, *Curation*.

**MEDEOLA VERTICILLIFOLIA**, *M. Virginica*.

**MEDEOLA VIRGIN'ICA**, *M. verticillifolia*, *Gyro'msa Virgin'ica*, *Indian cucumber*. An indigenous herb, growing in every part of the United States, the root of which resembles a small cucumber. It has been thought to be diuretic.

**MEDIAN**, *Medi'anus*; from *medius*, 'the middle.' That which is situate in the middle.

**MEDIAN LINE**. A vertical line, supposed to divide a body longitudinally into two equal parts; the one right, the other left. Chaussier calls the *linea alba* the *ligne médiane* of the abdomen.

**MEDIAN NERVE**, *Médian digital*, (Ch.) This nerve arises chiefly from the anterior branches of the last two cervical nerves and first dorsal. The fifth and sixth cervical pairs also send it a branch, which separates from the musculo-cutaneous nerve. The median nerve descends along the inner part of the arm along the biceps muscle. Opposite the elbow joint it buries itself behind the aponeurosis of that muscle, and engages itself between the two fasciculi of the pronator teres. Lower down, it is situate between the flexors—sublimis and profundus—and passes, with their tendons, under the ante-

rior annular ligament; it then divides into five branches, which are distributed to the muscles of the thenar eminence, to the lumbricales, the integuments of the thumb, the index, middle finger, and outer part of the ring finger. This nerve gives no branches to the arm. In the forearm, it furnishes filaments to all the pronator and flexor muscles; and one of them accompanies the anterior interosseous artery. It also gives off a filament to the integuments of the palm of the hand.

**MEDIAN VEINS.** Three of the superficial veins of the forearm are so called. The *median basilic*—the *median cephalic* and *common median* or *furnis brachii*. See Basilic and Cephalic.

**MEDIANUM, Mediastinum, Mesentery.**

**MEDIASTINAL, Mediastinalis.** Relating to the mediastinum.

**MEDIASTINAL ARTERIES** are very delicate arterial branches, distributed in the cellular texture of the mediastinum. They are distinguished, according to their situation, into anterior and posterior.

**MEDIASTITITIS, Mesodmitis.**

**MEDIASTINUM, Mediastinus,** quasi, *in medio stans*, as being in the middle; *Mesod'me*, *Mediana*, *Mesothorium*, *Mesothoracium*, *Septum thoracis*, *Hymen Diaphragmaton*, *Membra na Diaphragmaton*, *Membra na thoracem interserpiens*, *Intersepiens thoracis*, *Diribitorium*, *Dissepiens thoracis*. A membranous septum formed by the approximation of the pleura, dividing the chest into two parts, the one right, the other left. The mediastinum, formed by a double reflection of the pleura, extends from the spine to the posterior surface of the sternum. Its anterior part, called *anterior mediastinum*, *Mediastinum pectorale*, lodges, at its upper part, the thymus gland in the fetus, and is filled below with fatty, cellular tissue. Its posterior part, parallel to the spine, is occupied by the œsophagus, vena azygos, thoracic duct, the lower part of the windpipe, the origin of the bronchia and a number of lymphatic glands. This part is called the *posterior mediastinum—Mediastinum dorsale*.

**MEDIASTINUM AURIS**, see Tympanum—m. Cerebri, Falx cerebri, Septum lucidum.

**MEDIASTINUS, Mediastinum.**

**MEDICAL, Medica'lis, Iat'ricus, Paon'ius, Paon'icus, Physic'al, (F.) Medical.** Relating to medicine.

**MEDICAL JURISPRUDENCE, Medicine, legal.**

**MEDICALIS, Medical.**

**MEDICAMENT, Medicamentum, Remedi'um, Aed'is, Aoes'ma, Aoes'tium, Aoes'tys, Althos, Hygias'ma, la'ma, Aoo's, Medica'mon, Pharm'acum, Pharmaceu'ma, Med'icins, Physic, Rem'edy, Alkar, Auaril'ium, Boetho'ma, (F.) Remède;** from *medicare*, 'to cure or heal.' A medicine. Any substance exhibited with the view of curing or allaying morbid action. Medicines are obtained from the three kingdoms of nature, and are divided into *internal* and *external*, according as they are administered internally or applied externally.

**MEDICAMENTO'SUS LAPIS, Medio'inal stone, (F.) Pierre medicamentouse.** A name formerly given to a mixture of *peroxyd of iron, litharge, alum, nitre, sal ammoniac, and vitriol*; evaporated and calcined at a red heat for an hour. The product was regarded as eminently astringent.

**MEDICAMENTUM, Drug—m. ex Palma'ria, Diaphenicon.**

**MEDICASTER, Medicastra.** An ignorant practitioner. A charlatan.

**MEDICATION, Medica'tio, from mederi, 'to remedy.'** The change in the animal economy produced by the operation of remedies. Treatment by medicine.

**MEDICINA, Ars medica, Res medica, Ars Machao'nia, A. Machaon'ica, Iat'ricæ, Iat'ria, Iat'rica, Iat'rica, Paon'ius, Paon'icæ, Iatro'tech'nicæ, Acasto'ria, Scientia medica seu san'dendi, Sote'ria doctri'na, Med'icins, The heal'ing art, Physic, (F.) Médecine.** A science, the object of which is the cure of disease and the preservation of health. Occasionally, it is used to comprehend all the branches of the healing art; at others to comprise one great division, in contradistinction to *surgery and obstetrics*. Medicine, in this sense, includes many branches;—the chief of which are, *Anatomy, Physiology, Pathology, Therapeutics, Hygiene, Materiam Medica, and Pharmacy*.

**MEDICINA CONSERVATIVA, Hygiene—m. Dietetica, Dietetica—m. Eclectica, see Eclectico—m. Efficax, Surgery—m. Equaria, Hippiatra—m. Euectica, Gymnastus—m. Forensis, Medicine, legal—m. Gymnastica, Gymnastics—m. Hermetica, see Spagyrics—m. Judiciaria, Medicine, legal—m. Mechanica, see Mechanical—m. Methodica, see Methodists—m. Operativa, Surgery—m. Paracelsistica, see Spagyrics—m. Politica, Police, medical—m. Sinica, Chinese medicine—m. Spagyrica, Chymistria; see Spagyrics—m. State, Police medical—m. Tristitia, Crocus—m. Veterinaria, Veterinary art.**

**MEDIC'INAL, Medica'lis, Med'ical, Iat'ricus, Remedi'al, Rem'diato.** Having a remedial power;—as *medicinal plants, &c.*

**MEDICINA'LES DIES, Medice'inal days.** Days on which the ancients considered that remedies might be administered; and especially evacuants. Such days were not esteemed critical.

**MEDICINE, Medicament, Medicina.**

MEDICINE is, also, used in the same sense as Medicament, and for a purging potion.

**MED'ICINE, CLINICAL, see Clinical—m. Eclectic, see Eclectico—m. Galenic, Galenism.**

**MEDICINE, LEGAL, Medical jurisprudence of some, Law med'icins, Foren'sic med'icins, Medici'na foren'sis, M. judic'aria, Dicit'ria, (F.) Médecine légale.** The application of medical knowledge to the solution of every question connected with the preservation of the species, and the administration of justice.

**MEDICINE, POLITICAL, Police, medical.**

**MEDICINIER CATHARTIQUE, Jatropha curcas.**

**MEDICO-CHIRURGICAL ANATOMY, see Anatomy.**

**MEDICO-LEGAL, Medico lega'lis.** Relating to legal medicine; as "a medico-legal inquiry, *Inquisitio medico-legalis*—"a medico-legal inspection"—*Inspec'tio medico-legalis*.

**MEDICUS, Doctor, Physician—m. Equarius, Hippiatra—m. Ocularius, Oculist—m. Unguentarius, Iatralaptes—m. Vulnerarius, see Deligatio—m. Veterinarius, Hippiatra—m. Vulnerum, Surgeon.**

**MEDIMNUS, Medim'nos, μδιμνος.** An ancient measure, capable of containing about 4 pecks and 6 pints.

MEDITULLIUM, Diploë.

MEDIUM MUSCULI, see Muscle.

MEDIUS, Middle, Median.

MIDDLE FINGER, (F.) *Doigt du milieu*, is between the index and ring finger.

MEDLAR, *Mespilus*.

MEDO, Hydromeli.

MEDOBLENNORRHOEA, Leucorrhœa.

MEDORRHOEA, Gonorrhœa—m. Feminarum insons, Leucorrhœa—m. Virilis, Gonorrhœa.

MEDULLA, Marrow—m. Cerebri, see Cerebrum—m. Dorsalis, m. Spinalis—m. Dorsualis, M. Spinalis—m. Nervorum, Neurine.

MEDULLA OBLONGATA, *Cerebral protuberance*, *Nervous system of the senses*, (Gall.) *Cerebrum elongatum*, (F.) *Mésocephale*, *Moëlle allongée*, *Mésocéphale*, (Ch.) The medullary substance that lies within the cranium upon the basilar process of the occipital bone. The anterior surface which rests in the basilar groove, is impressed by the basilar artery. At the upper extremity, and on its posterior surface are the *Tubercula quadrigemina*. At the same extremity, the medulla gives rise to two prolongations, the *peduncles of the brain*, separated from each other by the mammillary eminences, and becoming lost in the optic thalami. The lower extremity is called the *tail* or *Rachidian bulb*, and is continuous with the medulla spinalis. It is to this part only that some anatomists apply the name *Medulla oblongata*. From the posterior angles two other prolongations arise, called *Peduncles of the cerebellum*. The medulla oblongata has several eminences—the *Pons varolii*, *Corpora pyramidalia*, *C. olivaria*, &c.—and it has a longitudinal fissure before, and another behind, called the *anterior* and *posterior median fissures*.

MEDULLA SPINÆ, M. spinalis.

MEDULLA SPINALIS seu *Spina* seu *dorsualis* seu *dorsalis*, *Corda spinalis*, *Funis argenteus*, *Rhachitrum*, *Myelus*, *M. rachites* seu *notivus* seu *diachivus* seu *psötes*, *Notomyelus*, *Rhachites*, *Eon*, *Medulla vertebralis*, *Processus rachidianus*, *Sacra fistula*, *Spinal prolongation*, *Vertebral marrow*, *Spinal cord*, *Nervous system of voluntary motion and tactile impression* (Gall.) *Spinal marrow*, (F.) *Moëlle épinière*, *Moëlle vertébrale*, called by Ch., *Prolongement rachidien* of the encephalon, is the continuation of the medulla oblongata. It commences at the foramen magnum of the occipital bone, and descends in the vertebral canal as low as the 2d lumbar vertebra, without filling it; presenting, in its course, several evident enlargements. It is grooved on both its anterior and posterior surfaces by a furrow, which divides it, in its whole length, into two great nervous cords, intimately united with each other. It terminates by an oval tubercle, whence a number of nerves set out, called *Cauda equina*, (F.) *Queue de cheval*, from its resemblance to a horse's tail. The spinal marrow has no analogy, as regards its structure, with the marrow of long bones. It is formed of two substances; one white, the other gray, presenting an inverse arrangement to that which they have in the brain, the white being external, the cineritious at the centre. It is enveloped by a yellowish, fibrous membrane, very resisting, which seems to be continued insensibly from the pia mater, and by two other

membranes, which are merely prolongations of the arachnoid and dura mater. See Nerve.

MEDULLA VERTEBRALIS, M. spinalis.

MEDULLÆ, Sperm.

MEDULLARY, *Medullaris*, from *medulla*, 'marrow.' Relating to the marrow or analogous to marrow.

MEDULLARY ARTERIES. The arteries, which enter bones and pass to the marrow.

MEDULLARY CANAL, see Canal, medullary—m. Cells, see Medullary Membrane—m. Juice, Marrow—m. Matter of the brain, see Cerebrum.

MEDULLARY MEMBRANE, *Periosteum Interneum*, *Endosteum*. A vascular, areolar web of extreme tenuity, which envelops the marrow and lines the inner surface of the medullary canal of the long bones. This membrane has been considered as a species of internal periosteum of those bones. It has numerous vessels, which bury themselves in the thickness of the marrow; and others which nourish the innermost plates of the bone. The cells formed by it are termed *Cellulae seu Sacculi medullares*.

MEDULLARY SARCOMA, Encephaloid, *Hæmatodes fungus*.

MEDULLARY SYSTEM. Bichat gives this name to the marrow and its membranes. He distinguishes two species of medullary systems; the one occupies the cellular tissue at the extremities of the long bones and that of the flat and short bones; the other is found merely in the central canal of long bones.

MEDULLARY TUMOUR OF THE LUNGS, Phthisis, cancerous.

MEDULLITIS, Myelitis.

MEGALANTHROPOGENESIS, from *μεγας*, 'great,' *ανθρωπος*, 'man,' and *γενεσις*, 'birth.' A term used by a French physician, named Robert, to designate the art of procreating great men; men of mind; men of genius. He considered that they may be perpetuated by always taking care to have talented men united to clever women!

MEGALOCARDIA, from *μεγας*, 'great,' and *καρδια*, 'heart.' The state of having a very large heart.

MEGALOCCELIA, Intestine, great, *Megalosplanchnia*.

MEGALOPHONIA, from *μεγας*, *μεγαλη*, 'great,' and *φωνη*, 'voice.' The condition of having a full, strong voice.

MEGALOPHTHALMUS; from *μεγας*, *μεγαλη*, 'great,' and *οφθαλμος*, 'eye.' A congenital deformity, in which the eye is inordinately large.

MEGALOSPLANCHNUS, *Megalosplanchnus*, from *μεγας*, 'great,' and *επλανχνον*, 'a viscus.' *Megalocœlia*. Hippocrates applies the epithet to those in whom a viscus, or the viscera, are tumid. Some have used the substantive *Megalosplanchnia* for the tumour itself.

MEGALOSPLENIA, Splenoncus.

MEGETHOS, Stature.

MEGRIM, Hemicrania.

MEIBOMIUS, GLANDS OF, *Follicles of M.*, *Palpebral Follicles*, *Ciliary F.*, *Glandula sebacea ciliaris* seu *Meibomia*, *Intestinula Meibomia*, *Lacuna palpebrarum*, (F.) *Folliculus palpebrarum* ou *olivaris*, *Glandes de Meibomius*. Small, sebaceous follicles, called after Henry Meibomius, although known long before his description of them. They are si-

tuat in special grooves in the tarsal cartilages; and are ranged by the side of each other, in the form of yellowish, parallel, and vertical lines; sometimes straight, at others, tortuous. They may be seen at the inner surface of the eyelids, through the conjunctiva, and secrete a sebaceous humour, called *Lappitudo*, *Gum*, (F.) *Chassis*.

**MEIOSIS**, *Meo'sis*, *Mio'sis*, *Imminutio*, *Minutho'sis*, *Minitho'sis*, from  $\mu\iota\omega\sigma$ , 'I lessen.' The period of a disease, in which the symptoms begin to diminish;—the decline. Remission.

**MEIUIROS**, *Decurtatus*, *Myurus*.

**MEL**, *Meli*, *Nili'acum*, *Honey*, (F.) *Miel*. A substance of a muco-saccharine nature, prepared by the *Apis mellifica*, or common bee, which collects it from the nectaries of flowers. Honey is employed as aliment, condiment, and medicine. It is demulcent and aperient; and is prescribed as an adjunct to gargles in cyanche tonsillaris, &c. It is, at times, used as a detergent to foul ulcers. *Virgin Honey*, *Mel virginum* seu *virginum*, (F.) *Miel vierge*, is that which flows from the wax spontaneously.

**HILL'S BALSAM OF HONEY** is formed of *balsam tolu*. ℞, *honey*, ℞j, *rectified spirit*, one gallon. It was long a celebrated empirical pectoral.

**MEL ACETATUM**, *Oxymel*—m. *Ægyptiacum*, *Ægyptiacum*—m. *Aërium*, *Fraxinus ornus*—m. *Arundinaceum*, *Saccharum*.

**MEL BORA' CIS**, *Mel subbora'cis*, *Colluto'rium adstringens*, *Laminatum de Bora'is*, *L. ad aphthas*, *Mel Boraxatum*, *Linctus de Bora'is*, *L. ad aphthas*, *Honey of Borax*. (*Boracis contrit.* ℞j, *mellis despumati* ℞j, *Ph. L.*) Detergent. Applied to the mouth in apthous affections.

**MEL CANNÆ**, *Saccharum* (non purificatum)—m. *Coctum*, *Pellicide*.

**MEL DESPUMATUM**, *Clarified Honey*, *Anaphrom'eli*, (F.) *Miel Clarifié*. Melt the honey in a water bath, and remove the scum. Uses the same as honey.

**MEL PRÆPARATUM**, *Prepared Honey*. (*Mel despumat.* Oss. *Alcohol*, dilut. Oj. *Creta præparat.* ℞ss. To the honey and diluted alcohol, mixed, add the prepared chalk, and let the mixture stand for two hours, occasionally stirring. Then heat to ebullition, filter, and by means of a water-bath, evaporate the clear liquor to the specific gravity 1.32. *Ph. U. S.*)

**MEL ROSÆ**, *Mel rosa'tum*, *Melli'tum de Rosis*, *Rhodom'eli*, *Rhodostacton*, *Honey of Roses*, (F.) *Miel rosat*, *Mellite de Roses*. (*Rosæ galicæ* ℞ij, *aquæ feræ* Oss. *mellis despum.* Oij. Infuse the roses for two hours; add the strained liquor to the honey, and boil to a proper consistence in a water-bath.) Astringent and detergent. Used chiefly in gargles and washes for apthæ, &c.

**MEL SCILLÆ**, *Oxymel scillæ*—m. *Scillæ compositum*, *Syrupus scillæ compositus*.

**HONEY WATER** is a mixture of essences coloured with saffron. A little honey is added to communicate a clamminess; the effect of which is to make it retain the scent the longer. It is used as a scent.

**MEL VINOSUM**, *Œnomet*—m. *Virginum*, see *Mel*.

**MELÆ'NA**, *Melanorrhag'ia*, *Melanorrhag'ia*, *Icterus niger*, *Melanoch'rus*, *Melanict'erus*, *Melas Icterus*, *Morbus niger Hippod'ratii*, *Enterorrh'as*, from  $\mu\epsilon\lambda\alpha\varsigma$ , 'black;'

*Jaundice*, *Morbus niger*, (F.) *Maladie noire*, *Méline*, *Ictère noir*. A name given to vomiting of black matter, ordinarily succeeded by evacuations of the same character. It seems to be often a variety of hæmatemesis. The *Black Vomit* in yellow fever is owing to a morbid secretion from the lining membrane of the stomach and small intestine. Melæna also signifies hæmorrhage from the intestines; *Fluxus splenicus*, *Dysenter'ia splenicæ*, *Dejectio'nis nigre*, *Scœsus niger*, *Hæmorrhage from the Intestines*.

**MELÆNA FUNGOSA CARCINODES**, *Hæmatodes fungus*.

**MELÆNORRHAGIA**, *Melæna*.

**MELALEUCA CAJAPUTI**, *M. Minor*, *M. Leucodendron*. This plant affords the *Cajeput Oil*, (see *Cajeput*.) The leaves are esteemed diuretic, stomachic, and emmenagogus.

**MELALEUCA LEUCODENDRON**, *M. Cajaputi*—m. *Minor*, *M. Cajaputi*.

**MELAMPHONUS**; from  $\mu\epsilon\lambda\alpha\varsigma$ , 'obscure,' and  $\phi\omega\nu$ , 'voice.' Having a hoarse or indistinct voice.

**MELAMPHYLLUM**, *Acanthus mollis*.

**MELAMPODIUM**, *Helleborus niger*.

**MELANÆMA**, *Suffocation*.

**MELANÆMIA**, *Venosity*.

**MEL'ANAGOGUE**, *Melanog'gus*, from  $\mu\epsilon\lambda\alpha\varsigma$ , 'black,' and  $\alpha\gamma\omega$ , 'I expel.' A medicine which the ancients believed adapted for expelling black bile or melancholy.

**MELANCHLORUS**, from  $\mu\epsilon\lambda\alpha\varsigma$ , 'black,' and  $\chi\lambda\alpha\rho\omega\varsigma$ , 'green.' The ancients gave this name to certain dark-coloured topical remedies. See *Melæna*.

**MELANCHOLE**, *Atrabilis*.

**MELANCHOLIA**, *Melancholy*—m. *Autochirica*, *Suicide*—m. *Errabunda*, *Cuttubuth*—m. *Flatua*, *Hypochondriasis*—m. *Hypochondriaca*, *Hypochondriasis*—m. *Nervæ*, *Hypochondriasis*—m. *Pleonectica*, see *Pleonectica*—m. *Saltans*, *Chorea*—m. *Suicidum*, *Suicide*—m. *Uterina*, *Nymphomania*—m. *Zoanthropia*, *Melancholy*.

**MEL'ANCHOLIC**, *Melanchol'icus*, *Melan'cholus*, *Melanchol'ides*, from  $\mu\epsilon\lambda\alpha\varsigma$ , 'black,' and  $\chi\omega\lambda\eta$ , 'bile.' One labouring under melancholy. That which belongs or relates to melancholy. In popular language, one of a gloomy disposition.

**MELANCHOLODES**, *Melancholic*.

**MELANCHOLUS**, *Melancholy*.

**MEL'ANCHOLY**, *Melanchol'ia*, same etymon. *Lypema'nia*, *Monoma'nia*, *Echiro'nia*, *Melanchol'ia*, *Mania Melanchol'ica*, *Mania Melanchol'ia*, *Tristema'nia*, *Bryth'nia*, *Hypoleptosioma'nia*; (F.) *Melancholie*, *Lypérophrénie*. A disease supposed, by the ancients, to be caused by black bile. A variety of mental alienation, characterized by excessive gloom, mistrust, and depression, with insanity on one particular subject or train of ideas. *Panophobia*, *Demonomania*, *Erotomania*, *Nostalgia*, &c., may be referred to this head.

*Melancholy* is also used for unusual gloominess of disposition.

**MELANCHOLY, EROTIC, EROTOMANIA**—m. *Love*, *Erotomania*.

**MELANCHRUS**, *Melan'ochrus*, from  $\mu\epsilon\lambda\alpha\varsigma$ , 'black,' and  $\chi\omega\sigma$ , 'a colour.' One attacked with black jaundice. It is probably an abbreviation of *Melanchlorus*.

**MELANCOLIE**, Melancholy.  
**MÉLANGE PECTORAL**, Mistura acidi hydrocyanici.

**MELANIC**, *Melan'icus, Melanot'ic, Melanot'icus*; from *μαλας*, 'black.' Of or belonging to Melanosis.

**MELANICTERUS**, *Melæna*.

**MELANOCHERUS**, Melanchrus.

**MELANOMA PULMONUM**, see Melanosis.

**MELANOMYCES**, Melanospongus.

**MELANOPATHIA**, from *μαλας*, 'black,' and *πάθος*, 'affection.' *Nigricitum, Nigrit'iss*. A disease of the skin, which consists in augmentation of black pigment; generally in patches.

**MELANOPHYMA**, Ergot.

**MELANOPIPER**, Piper nigrum.

**MELANOPNEUMON**, see Melanosis.

**MELANORRHAGIA**, *Melæna*.

**MELANORRHIZUM**, *Helleborus niger*.

**MÉLANOSE**, Melanosis.

**MELANOSIS**, *Melan'osis, Nigritu'do, Carcino'ma melanot'icum, Cancer melan'icus, Fungus melano'des*, (F.) *Dégénérescence noire, Mélanose, Cancer mélané, Black cancer, Black tubercle*, from *μαλας*, 'black.' An organic affection, in which the tissue of the parts is converted into black, hard, homogeneous substance, near which ulcers or cavities form;—owing to the softening, either of this substance itself, or of some other morbid tissue,—of tubercles especially. This morbid change affects the lungs particularly; when it is called *Melano'sis seu Melano'mi seu Anthracosis Pulmonum, Melanopneumon, Nigritu'do seu Carcino'ma melanot'icum seu Melan'osis Pulmonum, Pneumomelano'sis*, (F.) *Milano'se Pulmonaire*. It is also, met with in the liver and cellular texture. Its causes are very obscure. Melanosis of the lungs constitutes one of the species of phthisis of Bayle; but it is impossible to distinguish it from the other species during life. In the classification of Fuchs, *Melanosen* (G.) forms a family of diseases.

**MELANOSIS PULMONUM**, see Melanosis—m. **Universalis**, Venosity.

**MELANOSMEGMA**, see Sapo.

**MELANOSPONGUS**, *Melanomyces*; from *μαλας*, 'black,' and *σπγγος*, 'sponge.' The tuberciform variety of melanosis of the lungs.

**MELANOTIC**, Melanic—m. Cancer, Cancer, melanotic.

**MELANOTHRIX**, *Atricapill'us*, from *μαλας*, 'black,' and *θριξ*, 'hair.' Having black hair.

**MELANSIS**, Melanosis—m. *Pulmonum, Melanosis pulmonum*.

**MELANTHIUM**, *Nigella*.

**MELAS**, *Lepra nigricans*—m. Icterus, Melæna.

**MELASMA**, *Echymo'ma Melas'ma, Nigror*, from *μαλας*, 'black.' A black spot or echymosis, occurring on the lower extremities of old people especially. Also, a cutaneous affection analogous to chloasma, differing from it only in the darker colour of the morbid pigment. It is called also *Pityriasis nigra*.

**MELASSES**, *Molas'ses, Molus'tum, Theriaca cammi'sis, Syrupus empyreumatic'us seu nigror, Treacle*. The syrup, which remains after the juice of the sugar cane has been subjected to all the operations for extracting sugar from it. In the United States, the syrup, made in the process of forming common sugar, is called

*melasses*; that remaining after the refinement of sugar being termed *sugar-house melasses* or *treacle*.

**MELASSES SPIRIT**, Rum.

**MELATROPHIA**, from *μελος*, 'a limb,' and *στροφία*, 'wasting.' Wasting of the limbs.

**MELCA**, *μελασα*. Food made of acidulated milk.

**MELE**, Specillum.

**MELEA**, *Pyrus malus*.

**MELEGUETTA**, *Atomum grana paradisi. MELEI'OS, ημελιος, Moli'nus, Melias*. A species of alum found in the island of Melos.

**MELKZE**, *Pinus larix*.

**MELI**, Mel.

**MELIA**, *Fraxinus ornus*.

**MÉLIA AZED'ARACH**, *Azedard'cha ama'na, Poison Berry Tree, Azed'arach, Pride of India, Pride of China, Pride tree, Hop tree, Bead tree. Nat. Ord. Meliaceæ; Sex. Syst. Decandria Monogynia*. The bark of the root—called in India *Noem Bark, Azedarach*, (Ph. U. S.), is usually given in decoction, in the proportion of three or four ounces of the bark of the fresh root to a quart of water, boiled down to a pint.

The dose is one or two table-spoonfuls, every two or three hours, till purging is induced. It is given in this manner as an anthelmintic. It is sometimes formed into an ointment, and used in tinea capitis. The tree is a native of Syria, Persia, and the north of India, and is abundant in the southern states.

**MELIA TERRA**, Creta.

**MELICERA**, *Porrigo favosa*.

**MELICERIA**, *Hydrarthrus, Porrigo favosa*.

**MELICE'RI**, *Melisa'vium*, from *μελι*, 'honey,' and *κηρος*, 'wax.' *Empy'ma ency'stis melice'ria*. An encysted tumour filled with a substance resembling honey. Also, *Porrigo favosa*.

**MELICERUM**, *Porrigo favosa*.

**MELICHEIUM**; from *μελι*, 'honey,' and *χλω*, 'I pour out.' A honey-like discharge from an ulcer.

**MELICRATUM**, *Hydromeli*.

**MELIFAVIUM**, *Meliceris, Porrigo favosa*.

**MELIGE'ON**; from *μελι*, 'honey.' A fetid humour of the consistence of honey, discharged from ulcers, accompanied with caries of a bone.

**MÉLILOT**, *Trifolium melilotus*.

**MELILOTUS**, *Trifolium melilotus*.

**MELIME'LUM**, from *μελι*, 'honey,' and *μηλον*, 'an apple.' A name given to two compounds:—one of honey and quince, the other of honey and apples.

**MÉLINE**, *Melæna*.

**MELINI SULPHAS**, *Cadmii sulphas*.

**MELINUM**, *μηλίον*. The ancient name of an ointment, and of several plasters, described by Dioscorides and Galen; so called from their resembling the *μηλον*, or quince, in colour.

**MELINUM SULPHURICUM**, *Cadmii sulphas*.

**MELINUS**, *Meleios*.

**MELIPHYLLUM**, *Melissa*.

**MELISSA**, from *μηλισσα*, 'a bee,' because bees gather honey from it. *Melissa officinalis, Citra'go, Citra'ria, Melit'is'a, Melissob'otus, Melit'is'na, Melissobot'anum, Melis'sa citra'ta, Melissophy'llum, Meliphy'llum, Montha citra'ta, Melit'is, Cedronel'ia, Apias trum, Melissa cit'rina, Ero'tion, Balm, (F.) Mélisso, La Citronelle; Nat. Ord. Labiatae. The leaves of balm, *Melissa* (Ph. U. S.), have a pleasant*

odour; and an austere and aromatic taste. Balm was formerly much used in nervous diseases, but is now only employed when made into a tea, as a diluent, in febrile affections. It is the basis of a celebrated preparation,—the *Eau des Carmes*.

MELISSA CALAMIN'THA, *Calamin'tha*, *C. vulgaris*, *C. officinarum*, *Cal'amin't*, (F.) *Calamint*. This plant smells like wild mint, though more agreeably. It is used, popularly, as a tea in dyspepsia; flatulent colic; hysteria; uterine obstructions, &c.

MELISSA GRANDIFLO'RA, *Calamin'tha magno flore*, *C. montana*, *Mountain Cal'amin't*. This plant resembles the last in virtues.

MELISSA HUMILIS, *Melittis melissophyllum*.

MELISSA NER'ETA, *Calamin'tha Anglica*, *C. Pulg'ris odor't*, *Nep'tea agrestis*, *Field Cal'amin't*, *Spotted Cal'amin't*. Formerly used as an aromatic.

MELISSA PULG'RIDES, *Hedeoma*—*m. Turcica*, *Dracocephalum Canariense*.

MÉLISSÉ DES BOIS, *Melittis melissophyllum*—*m. de Moldavia*, *Dracocephalum Canariense*.

MELISSOBOTANUM, *Melissa*.

MELISSOBOTOS, *Melissa*.

MELISSOPHYLLUM, *Melissa*, *Melittis melissophyllum*.

MÉLISSOT, *Melittis melissophyllum*.

MELITÆNA, *Melissa*.

MÉLITAGRE, *Impetigo*.

MELITEIA, *Melissa*.

MELITHOCORTON, *Corallina Corsicana*.

MELITIS, *Inflammat'io genarum*; from  $\mu\eta\lambda\omicron\varsigma$ , 'the cheek,' and *itis*, denoting inflammation. Inflammation of the cheek.

MELITITES, *Hydromeli*.

MELITTA, *Bee*.

MELITTIS, *Melissa*.

MELIT'IS MELISSOPHYLLUM, *Lamium montanum*, *Melissa humilis*, *Melissophyllum*, *Bastard Balm*, (F.) *Melisse des Bois*, *Melissot*. This plant was formerly employed, like the balm, in uterine obstructions.

MELITURIA, *Urine*, diabetic, see *Diabetes*.

MELI'TUS, *Melitus*, from *mel*, 'honey.' Appertaining to honey. Of the nature of honey.

MELIZOMUM, from *mel*, 'honey,' and *ζωμος*, 'broth;' *Mead*, *Melli'na*, *Matheg'lin*. A drink prepared with honey.

MELLA'GO, from *mel*, 'honey.' Any medicine having the consistence of honey. A fluid extract.

MELLICRATUM, *Hydromeli*.

MELLIFAVIUM, *Porrigo favosa*.

MELLINA, *Melizomum*.

MELLITE DE ROSES, *Mel rosæ*.

MELLI'TUM, from *mel*, 'honey.' A prepared honey:—a medicated honey.

MELLI'TUM DE ACETATE CUPRI, *Linimentum Æruginis*.

MELLI'TUM DE MERCURIALI COMPOSITUM, (F.) *Miel de mercuriale composé*, *Syrup de longus vis*. (*Succ. purif. mercurialis* ℞ij, *boraginis*, *anchusæ officinalis*,  $\mathcal{R}\mathcal{S}$  lbs, *iris pseudacori radicis recent.* ℥ij, *rad. sicca gentiana* ℥j, *mellis* ℞ij, *vini albi* ℥xiiij. Macerate the bruised roots in the wine for 24 hours; strain; mix the juices and honey; boil slightly, and filter: then add the two liquors, and boil to the

consistence of syrup. *P.A.P.*) Cathartic, stomachic, &c.

MELLI'TUM DE ROSIS, *Mel rosæ*.

MELLI'TUM SIMPLEX, *Syrupus de Mellè*, *Syrup of Honey*. (*Mellis* ℞vj, *aquæ Bissæ carbonat. calcis. preparat.* ℥ij. Mix the honey, water, and carbonate of lime in a silver vessel: boil the mixture, stirring, at the same time, for 2 or 3 minutes: then add prepared animal charcoal ℥vj, two whites of eggs, mixed in a pint of water. Mix all, and boil to the consistence of syrup: remove from the fire; let the syrup rest for 15 minutes, and pass through a cloth. *P.A.P.*) Demulcent

MELLI'TUS, *Melitus*.

MELOÆ'MIA, from  $\mu\lambda\omicron\varsigma$ , 'black,' and *αἷμα*, 'blood.' A state of blood, characterized by its inconagulability, black colour, and septic properties.

MELOCHITIS, *Lapis Armenicus*, *Armenicites*, *Armenian Stone*. A variety of blue carbonate of copper. It is found in Germany, the Tyrol, and especially in Armenia. It was formerly employed as a cardiac, and as proper for purging away melancholy.

MEL'OE NIGER, *M. Pennsylvanicus*. A blistering fly, native of the United States. It feeds upon *Prunella vulgaris* or *Self-heal*, and *Ambrosia trifida* or *Stick-wood*. These flies resemble the Spanish flies in properties.

MELOR PENNSYLVANICUS, *M. niger*.

MELOR PROSCARABÆUS, *Cantarelus*, was anciently used as a diuretic and anti-hydrophobic.

MELOR VESICATORIUS, *Cantharis*.

MELON,  $\mu\lambda\omicron\varsigma$ , 'an apple.' A disorder of the eye, in which it protrudes out of the socket. See *Exophthalmia*.—Castelli.

MELON, *Cucumis melo*—*m. d' Eau*, *Cucurbita citrullus*—*m. Plant*, *Cucumis melo*—*m. Water*, *Cucurbita citrullus*.

MELONGENA, *Solanum melongena*.

MELOPLACUNTIVM, *Meloplacus*.

MELOPLACUS, *Meloplacuntivum*, from  $\mu\lambda\omicron\varsigma$ , 'an apple,' 'a quince.' A compound obtained by boiling *wine*, *honey*, *quince*, *pepper*, &c., together.—Galen.

MELOPLASTIC, *Meloplasticus*; from  $\mu\lambda\omicron\varsigma$ , 'the cheek,' and *πλαστω*, 'I form.' The operation for forming a new cheek when any part of it has been lost.

MELOS,  $\mu\lambda\omicron\varsigma$ , *Membrum*. A member. An organized part, composed of other parts.—Castelli.

MELOSIS, *Catheterismus*, *Conombatisis*, from  $\mu\lambda\omicron\varsigma$ , 'a probe.' The act of probing a wound, ulcer, &c.—Hippocrates. Catheterism.

MELOTHRUM, *Bryonia alba*.

MELOTIS, *Melotris*, *Speculum minus*. A small probe,—a probe for the ear. See *Apyromele*.

MELOTRIS, *Melotis*.

MELUM,  $\mu\lambda\omicron\varsigma$ , *Malum*. An apple. Fruit in general. Also, a round, firm female breast. The cheek. The *apple-eye* or *melon-eye*; an apple-formed projection of the eye from the orbit.

MELUM ARMENIACUM, *Prunus armeniaca*—*m. Cydonium*, see *Pyrus cydonia*.

MELUSTUM, *Melasses*.

MEMBRA PUDENDA, *Genital organs*.

MEMBRANA, *Membrane*—*m. Abdominis*, *Peritonæum*—*m. Adiposa*, *Cellular membrane*

**MEMBRANA SACCOFORMIS.** A separate synovial membrane for the inferior radio-cubital articulation, which covers the upper surface of the triangular ligament, and the sort of incomplete ring which circumscribes the head of the ulna.

**MEMBRANA SEMIPELLUCIDA,** Caligo—m. Sinuosa, Decidua—m. Subcostalis, Pleura—m. Succingens, Diaphragm—m. Succingens, Pleura—m. Thoracem intersepiens, Mediastinum—m. Tympani, see Tympanum—m. Tympani secundaria, see Fenestra—m. Urinaria, Allantois—m. Uteri interna evoluta, Decidua—m. Uvea, Uvea—m. Vasculosa cerebri, Pia mater—m. Verrucularis, Retina.

**MEMBRANA VERSICOLOR.** A peculiar membrane—according to Mr. Fielding, of Hull—situate immediately behind the retina, and in connexion with it. It is separable into distinct layers from the choroid, and is supplied with blood-vessels.

**MEMBRANA WACHENDORFIANA,** Pupillary membrane.

**MEMBRANACEOUS,** Membranous.

**MEMBRANE,** *Membrana*, *Hymen*, *Meninx*, *Ependyma*. A name, given to different thin organs, representing species of supple, more or less elastic, webs; varying in their structure and vital properties, and intended, in general, to absorb or secrete certain fluids; and to separate, envelop, and form other organs. Bichat has divided the membranes into simple and compound.

*Simple Membranes* comprise three orders. 1. A *Mucous Membrane*, *Membrana Mucosa* seu *pituitosa* seu *pituitaria*, *Phlogymen*, *Phlogomas'hymen*, *Membrana folliculosa*, (Ch.), is so called, on account of the mucous fluid by which they are constantly lubricated. They line the canals, cavities, and hollow organs, which communicate externally by different apertures on the skin. Bichat refers the mucous membranes to two great divisions—the *gastro-pulmonary*, and the *genito-urinary*. The mucous membranes have a striking analogy with the cutaneous tissue, in organization, functions, and diseases. They are composed of chorion, papillae, and epidermis; and are furnished with a multitude of follicles, which secrete a viscid humour;—mucus. They receive a quantity of arterial vessels, veins, lymphatics, and nerves. 2. The *Serous Membranes*, *M. villosa* *simples* (Ch.), are transparent, thin, and composed of one lamina. One surface adheres to other textures; the other is smooth, polished, and moistened by a serous fluid. They are arranged—in the form of sacs without apertures—as great, intermediate reservoirs for the exhalant and absorbent systems, and in which the serous fluid in passing from the one system carries some time before it enters the other. The serous membranes resemble the cellular membrane in structure and diseases. They facilitate the motion on each other of the organs which they envelop. They may be divided into, 1. *Serous membranes*, properly so called; as the arachnoid, pleura, peritoneum, and tunica vaginalis. 2. *Synovial membranes* or *Capssules*; which belong to joints, tendons, aponeuroses, &c. 3. *Fibrous Membranes*, *Membranes albugineuses* (Ch.) These are almost all continuous, and terminate at the periosteum—their common centre. They have been divided into two sections. 1. *Enveloping aponeuroses*, *Aponeuroses of insertion*, *Fibrous capsules of the joints*, and *Fibrous sheaths of tendons*. 2. *The Periosteum*, *Dura mater*, *Sclerotica*, *Tunica albuginea testis*, *Fibrous membrane of the spleen*, &c. The fibrous membranes are not free or moistened by any particular fluid. They adhere by both surfaces to the neighbouring parts; are firm, resisting, but slightly elastic, and of a white colour; sometimes pearly and glistening. They are chiefly composed of the *albugineous fibre*, (see Albugineous and Fibrous.) Their vessels are numerous, in some, as in the dura mater and periosteum: in others, scarcely perceptible, as in the aponeuroses. The presence of nerves has never been proved, although several circumstances, regarding their sensibility, render their existence probable. The fibrous membranes serve, in general, to augment the solidity of the organs which they envelop; to retain the muscles in their respective positions; to favour the motion of the limbs, and that of the muscles and skin; to form canals and rings for the passage of different organs, &c.

Bichat admits three species of *Compound Membranes*. 1. The *Sero-fibrous*, formed of a serous and fibrous lamina, intimately adherent to each other;—as the pericardium, dura mater, and tunica albuginea. 2. The *Sero-mucous*, formed of a serous and mucous lamina;—as the *gall-bladder* at its lower part. 3. The *Fibro-mucous*, constituted of the union of a fibrous

and mucous membrane; as the mucous membrane of the nasal fossa, gums, &c. Chaussier admits six kinds of membranes. 1. The laminated. See Cellular Tissue. 2. The serous or simple villous: 3. The follicular or complicated villous: 4. The muscular or fleshy: 5. The albugineous: 6. The albuminous.

MEMBRANE, ACCIDENTAL, *M. false*—*m. Accidentelle*, *M. false*—*m. Adnés*, *Conjunctiva*—*m. Adventitious*, *M. false*—*m. Anhistous*, *Decidua*.

MEMBRANE, BASEMENT, *Primary membrane*. A delicate, structureless lamella of membrane found beneath the epidermis or epithelium, on all the free surfaces of the body.

MEMBRANE CADUQUE, *Decidua*—*m. Caduque réstéchie*, *Decidua reflexa*—*m. de Democrit*, see *Aqueous Humour*, and *Cornea*—*m. de Descomet*, see *Aqueous Humour*, and *Cornea*.

MEMBRANE, FALSE, *Accidental membrane*, *Adventitious membrane*, *Pseudo-Membrane*, *Pseudymen*, *Pseudoménine*, (F.) *Fausse membrane*, *M. accidentelle*. Membranous productions are so called, which form on all the free, natural surfaces, and on every free, accidental surface. They are, in general, produced by the exudation of a fibrinous matter, susceptible of organization, which takes place in consequence of inflammation of the various tissues. These accidental membranes occur on the skin after the application of a blister; on mucous surfaces, as in croup; on the parietes of inflamed veins and arteries, &c. The cicatrices of wounds are formed of them.

MEMBRANE FAUSSE, *Membrane false*—*m. Germinal*, see *Molecule*—*m. Primary*, *Membrane*, *basement*—*m. Pseudo*, *M. false*—*m. Hyaloid*, see *Hyaloid membrane*—*m. Ruychienne*, *Choroid* (inner layer,) *Ruychiana tunica*—*m. du Tympan*, see *Tympanum*.

MEMBRANES ALBUGINEUSES, *Membranes*, fibrous, see *Albuginea*—*m. Folliculeuses*, *Membranes*, mucous—*m. Veloutées*, *Villose membranes*—*m. Villieuses simples*, *Membranes*, serous.

MEMBRANES OF THE FŒTUS, *Membrana factum involventes*, *Velamenta infantis*. The membranes which immediately envelop the fœtus in the cavity of the uterus, and the rupture of which gives rise to the discharge of the liquor amnii. These membranes are the *decidua*, *chorion*, and *amnion*.

MEMBRANEUX, *Membranous*.

MEMBRANIFORM, *Membraniformis*, from *membrana*, and *forma*;—resembling a membrane. A name given to thin and flat parts, which resemble membranes.

MEMBRANIFORM MUSCLES. Very broad and thin muscles, as the *platysma myoides*, *obliquus abdominis*, &c.

MEMBRANOSUS, *Fascia lata muscle*.

MEMBRANOUS, *Membranosus*, *Membranosus*, *Hymenodes*, (F.) *Membraneux*. Having the nature of membrane. Formed of membrane.

MEMBRANULA, *Hymenium*—*m. Corone ciliaris*, see *Ciliary*—*m. Lunata vaginæ*, *Hymen*—*m. Nervorum*, *Neurilema*—*m. Semilunaris conjunctivæ*, *Valvula semilunaris*.

MEMBRANULE, *Membranula*; diminutive of *Membrana*, 'a membrane.' A small membrane.

MEMBRE, *Membrum*—*m. Viril*, *Penis*.

MEMBROSUS, *Membrosior*, *Mentulatus*,

*Mutoniatus*, *Nasatus*, *valde Mentulatus*, *Peolon*, from *membrum*, 'the male organ.' One whose penis is very large.

MEMBRUM, *Artus*, *Milos*, *Colon*, a limb, a member, (F.) *Membre*. The limbs or extremities or members of animals are certain parts exterior to the body, which are more or less apparent, long, and moveable. It is by means of their limbs, that animals transport themselves from one place to another; and that they defend themselves, or attack others. The limbs are arranged on each side of the trunk, with which they are articulated. In man, they are four in number;—two upper or thoracic, and two lower, pelvic or abdominal. Also, the male organ.

MEMBRUM MULIEBRE, *Clitoris*—*m. Virile*, *Penis*.

MÉMOIRE, *Memory*—*m. Portada*, *Amnesia*.

MEMORIA DELETA, *Amnesia*.

MEMORY, *Memo'ria*, *Mnemé*, *Hypomnésis*, *Recordatio*, *Recordatus*, (F.) *Mémoire*. The cerebral faculty, by virtue of which past impressions are recalled to the mind.

MEMPHITES LAPIS. A sort of stone, found in the environs of Memphis; which was formerly esteemed narcotic.

MENAGOGUES, *Emmenagogues*.

MENDESION, *Ægyptiacum*.

MENE, *Méon*.

MENECRATIS ACCIPITER, *Accipiter*.

MENES, *Menses*.

MENESPAUSIE, see *Lentescia*.

MENFRIGE, see *Pistacia lentescus*.

MENINGARTHROC'ACÉ, *Inflammatio membrorum articulationis*, *Arthromeningitis*, from *μηνίτις*, 'membrane,' *αρθρον*, 'a joint,' and *αίτιος*, 'disease.' Inflammation of the membranes of a joint.

MÉNINGE, *Dura mater*.

MÉNINGÉ, *Meningeal*.

MENINGEAL, *Meningeus*, from *μηνίτις*, 'a membrane,' (F.) *Méningé*. Relating to the meninges, or merely to the dura mater.

MENINGEAL ARTERY, *MIDDLE*, *Arteria meningea media*, *A. Sphæno-spinosa*, *A. Dura Matris media maxima*, *A. Sphæno-spinalis*, *Spinal Artery*, (F.) *Artère méningée moyenne*, *A. Sphæno-spinose*, *A. Epinense*, is the largest of the branches given off by the internal maxillary artery. It enters the cranium by the foramen spinale, and distributes its branches chiefly to the dura mater.

MENINGEAL VESSELS, *Vasa meningea*. The vessels of the membranes of the brain.

MENINGES, *Élémrides*, *Matres* seu *Involucra Cerebri*, *Omen'ta seu Velamenta cerebrella*, from *μηνίτις*, 'a membrane.' The three membranes which envelop the brain—*Dura mater*, *Arachnoid*, and *Pia mater*.

MÉNINGETTE, *Pia mater*.

MENINGINA, (F.) *Méningine*. Same etymology. A name given by Chaussier to the pia mater, united to the cerebral layer of the arachnoid.

MENINGINA, INNER LAMINA OF THE, *Piamater*.

MÉNINGINE, *Meningina*.

MENINGINITIS, from *Meningina*, and *itis*, denoting inflammation. Inflammation of the meningina.

MENINGION, *Arachnoid membrane*.

MENINGIOS CUSTOS, *Meningophylax*.

MÉNINGITE, *Meningitis*—*m. Granulosee*, *Hydrocephalus internus*—*m. Rachidienne*, *Me-*

ningitis, spinal—*m. Tuberculosa*, Hydrocephalus internus.

**MENINGITIS**, *Encephalitis peripherica*, *E. membranosae*, (F.) *Inflammation de la membrane séreuse céphalo-rachidienne*, *Méningite*. Inflammation of the meninges or membranes of the brain. See Phrenitis.

**MENINGITIS ARTHRITICA**, *Cephalagra*—*m. Infantum*, Hydrocephalus internus—*m. Membranosa*, *M. spinal*—*m. Peripherica*, *M. spinal*—*m. Potatorum*, Delirium tremens—*m. Rachidian*, *M. spinal*.

**MENINGITIS SPINAL**, *M. Rachidian*, *M. Spinalis* seu *peripherica* seu *membranosa*, *Perimyelitis*, (F.) *Méningite rachidienne*. Inflammation of the meninges of the spinal marrow.

**MENINGITIS TUBERCULAR**, see Hydrocephalus internus—*m. Tuberculosa*, Hydrocephalus internus.

**MENINGIUM**. Diminutive of *μηνιγξ*, 'a membrane.' A fine delicate membrane. The tunica arachnoidea of the brain.

**MENINGO-CEPHALITIS**, *Meningo-encephalitis*, *Cephalo-meningitis*, from *μηνιγξ*, 'a membrane,' *κεφαλή*, 'head,' and *itis*, a suffix denoting inflammation. Inflammation of the membranes and brain.

**MENINGOGASTRITIS**, Fever, gastric.

**MENINGOMALACIA**, from *μηνιγξ*, 'membrane,' and *μαλακία*, 'softening.' Softening of membranes in general.

**MENINGOPHYLAX**, *Custos menin'gis*, *Depressorium*, (F.) *Dépressoire*, from *μηνιγξ*, 'a membrane,' the dura mater; and *φυλάξ*, 'a preserver.' An instrument for depressing the dura mater; and guarding it from injury, whilst the bone is cut or rasped.

**MENINGORRHŒA**, from *μηνιγξ*, 'membrane,' and *ρῆσις*, 'I flow.' Effusion of blood upon or between the membranes of the brain.

**MENINGOSIS**. Same etymon. The union of bones by means of membrane; e. g. the articulation of the bones of the cranium in the fœtus. Meningosis is a variety of Syndesmosis.

**MENINGOSYM'PHYSIS**; from *μηνιγξ*, 'membrane,' and *συμφυσις*, 'growing together.' Adhesion of or by membrane. Adhesion of the membranes of the brain to each other, or to the brain.

**MENINX**, Membrane—*m. Choroides*, *Pia mater*—*m. Crassa*, *Dura mater*—*m. Dura*, *Dura mater*—*m. Exterior*, *Dura mater*—*m. Interior*, *Pia mater*—*m. Media*, Arachnoid membrane—*m. Pacheia*, *Dura mater*—*m. Sclera*, *Dura mater*.

**MENISCHESES**, see Amenorrhœa.

**MENISPERMUM CANADENSE**, from *μηνιγξ*, 'the moon,' and *σπέρμα*, 'seed.' A climbing plant, growing in various parts of the United States. Said to be used in Virginia as a substitute for sarsaparilla in scrofula. It is an excitant tonic.

**MENISPERMUM COCCULUS**, *Anamirta Cocculus*, *A. paniculata*, *Cocculus suberosus*, so called from the shape of its seed. *Family Menispermæ*. *Sex. Syst.* Diœcia Dodecandria. The systematic name of the plant, the berries of which are well known by the name of *Cocculus Indicus*, *Indian Berries*, *Bacca Piscatoricæ*, *Cocculus suberosus*, *Indian Cockles*, *Coccus Indicus*, *Coccula officinarum*, *Cocci orientales*, *Grana Orientis*, (F.) *Cogus du*

*Levant*, *Cogus levant*. These berries are remarkable for their inebriating and destructive quality to fish. The deleterious principle appears to reside in the kernel, and in the active principle called *Picrotoxin*. *Cocculus Indicus* has been used in decoction to kill vermin. It has, at times, been added to beer, by fraudulent tradesmen, to render it more inebriating.

**MENISPERMUM PALMATUM**, Calumba.

**MENISPERMUM TUBERCULATUM**, *M. Verrucosum*, *Cocculus crispus*. A Chinese plant, an extract from the root of which is tonic to the stomach and bowels, and possesses some astringency. Dose, 5 to 10 grains.

The same may be said of the *Menispermum cordifolium*—the *Golunoha*, of Bengal.

**MENISPERMUM VERRUCOSUM**, *M. Tuberculatum*.

**MENOCRYPHIA**, Amenorrhœa.

**MENOLIPSIS**, see Menses.

**MENOPAUSIS**, see Menses.

**MENOPHAGIA**, Menstruation, vicarious.

**MENORRHAG'IA**, from *μηνιγξ*, 'a month,' and *ρηρμι*, 'I flow fiercely.' Flow of the menses. Frequently, the word is used synonymously with uterine hemorrhage or *metrorrhagia*, or for immoderate flow of the menses—*profuse menstruation*, *Paramenia superflua*, *P. profusa*, *Menorrhagia rubra*, *Catameniorum fluxus immodicus*, *Menstrua immodica*, *M. superflua*, *Menorrhœa*.

**MENORRHAGIA**, Menstruation, Metrorrhagia—*m. Alba*, Leucorrhœa—*m. Difficilis*, Dysmenorrhœa—*m. Erronea*, Menstruation, erroneous—*m. Stillatitia*, Dysmenorrhœa.

**MENORRHŒA**, from *μηνιγξ*, 'month,' and *ρῆσις*, 'I flow.' Too long continuing, or too often returning, menstruation. Also, menorrhagia.

**MENOSCHESIS**, see Amenorrhœa.

**MENOSTASIA**, Amenorrhœa.

**MENOSTASIS**, from *μηνιγξ*, 'month,' and *στασις*, 'stasis,' 'stagnation.' This word, according to some, signifies the retention of the menses and their accumulation in the uterus. According to others, it means the acute pain which, in some females, precedes each appearance of the menses: a pain which has been presumed to proceed from the stasis of blood in the capillary vessels of the uterus.

**MENOXEN'IA**, *Menoxenosis*, from *μηνιγξ*, 'a month,' and *ξενος*, 'foreign.' Irregular menstruation.

**MENOXENOSIS**, Menoxenia.

**MENS**, Anima, Intellect.

**MENSA**, 'a table.' The upper superficial part of the jaw teeth.

**MENSES**, (*Mensis*, 'a month;') *M. Muliebres*, *Mulieb'ria*, *Menses*, *Fluxus menstruus*, *F. lunaris*, *Profluvium muliebrè*, *P. genitâlè muliebrè*, *Consuetudo menstrua*, *Catamenia*, *Menstrua*, *Emmènia*, *Tributum lunare seu menstruum*, *Purgatio'nes*, *P. menstrua*, *Gynacœi'a*, *Aphedri'a*, *Cursus menstruus*, *Horæa*, *Lunaria*; the *Courses*, *Menstrual flux*, *Monthly courses*, *M. periods*, *Flowers*, *Turns*, *Terms*, *the Reds*, *Troubles*, (F.) *Mois*, *Règles*, *Lunes*, *Flueurs*, *Affaires*, *Èpoques*, *Ordinaires*, *Purgations*, *Pleures*, *Menstrues*. The sanguineous evacuation from the uterus, *Sanguis menstruus*, the monthly occurrence of which constitutes menstruation. The first appearance of the menses is usually preceded by the

discharge of a fluid whitish matter from the vagina; by nervous excitement, and by vague pains and heaviness in the loins and thighs; numbness of the limbs, tumefaction and hardness of the breasts, &c. More or less indisposition and irritability also precede each successive recurrence of the menstrual flux. In temperate climates, each period ordinarily continues from three to six days; and the quantity lost varies from four to eight ounces. The menses continue to flow from the period of puberty till the age of 45 or 50. At the term of its natural cessation, *Menopausis*, *Menospausis* (Gardanne,) *Menopausis*, the flux becomes irregular; and this irregularity is occasionally accompanied with symptoms of dropsy, glandular tumours, &c., constituting the *Paramenia cessatio*'s of Good, and what is called the *critical time of life*; yet it does not appear that the mortality is increased by it. With the immediate causes of menstruation we are unacquainted. We express only our ignorance, when we assert it to depend upon periodicity: the discharge comes from the vessels of the uterus, and vagina, and differs from ordinary blood by its peculiar odour, and by its not coagulating. It is evidently connected with the condition of the ovaries, and appears to be synchronous with the periodical discharge of ova from them. It is arrested, as a general principle, during pregnancy and lactation. In warm climates, women usually begin to menstruate early, and cease sooner than in the temperate regions. The quantity lost is also greater. In the colder regions, the reverse of this holds as a general rule.

**GENSES ALBI**, Leucorrhœa—m. Anomala, Paramenia—m. Devii, Menstruation, vicarious—m. Dolorifici, Dysmenorrhœa—m. Retention of the, see Amenorrhœa—m. Suppression of the, Amenorrhœa.

**MENSIUM RETENTIO**, see Amenorrhœa.

**MENSTRUATA**, Menses—m. Alba, Leucorrhœa—m. Difficilia, Dysmenorrhœa—m. Dolorosa, Dysmenorrhœa—m. Immodica, Menorrhœgia—m. Superflua, Menorrhœgia.

**MENSTRUAL FLUX**, Menses.

**MENSTRUATIO ANOMALA**, Paramenia—m. Difficilis, Dysmenorrhœa—m. Dolorifica, Dysmenorrhœa—m. Impedita, see Amenorrhœa—m. Per insolitas Vias, Menstruation, vicarious.

**MENSTRUATIO RECIDIVA**, Menstruation, when protracted beyond the usual age.

**MENSTRUATIO RETENTA**, Amenorrhœa, Paramenia—m. Suppressa, Amenorrhœa, Paramenia.

**MENSTRUATIO**, *Menstruatio*, *Chronogunœa*, *Menorrhœgia*, *Fluxus menstrualis*. The flow of the menses.

**MENSTRUATION DIFFICILE**, Dysmenorrhœa—m. Difficult, Dysmenorrhœa—m. Laboriosa, Dysmenorrhœa—m. Profusa, Menorrhœgia.

**MENSTRUATION, VICARIOUS**, is that which occurs from other parts than the uterus. It is called *Paramenia erroris*, *Menorrhœgia erroris*, *Mensium per alia loca exercitio*, *Menses devii*, *Aberratio mensium* seu *menstruorum*, *Menstruatio per insolitas vias*, *Hæmatoplasia* seu *Hæmoplasia menstrualis*, *Menoplasia*, (F.) *Deviation des Règles*, *Règles déviées*. At times, the secreted fluid has all the characters of the menstrual secretion: at others, it appears to be mere blood.

**MENSTRUUS**, Menses.

**MENSTRUUM**, (F.) *Menstrus*. Same etymon;—the menstruum being, of old, usually continued in action for a month. This name was formerly given to every substance which possesses the property of dissolving others slowly and with the aid of heat. At present, it is used synonymously with *solvens*. Thus—water, alcohol, ether, acids, oils, &c., are menstrua.

**MENSTRUUM AURI**, Nitro-muriatic acid—m. Ventriculi, Gastric juice.

**MENSURA MEDICA**. A measure of 48 ounces.

**MENSURATION**, *Mensuratio*, from *mensura*, 'measure.' *Measurement*. One of the means used for exploring the state of the thoracic and other cavities. It consists in a comparative measurement of each side of the chest, by means of a riband extended from the median line of the sternum to the spine. When effusion exists on one side, the measurement is usually greater than on the other. When, on the other hand, a portion of a lung has ceased, for some time, to exert its respiratory functions, the corresponding side of the chest becomes smaller, in consequence of the contraction of the pleura, retraction of the pulmonary tissue and greater approximation of the ribs.

**MENTA**, *Mentha*, Penis.

**MENTAGRA**, Mentulagra, Sycosis—m. Infantum, Porrigo lupinosa.

**MENTAGRA PHYTE**, *Mentagrophyte*, from *mentagra*, and *phytos*, 'a plant.' A name proposed by M. Gruby, of Vienna, for a cryptogamic plant, which he found in the eruption of mentagra.

**MENTAL**, *Mentalis*, from *mens*, 'mind;' belonging or relating to the mind, as, *mental phenomena*, *mental diseases* (*Morbi mentales*), &c.

In Anatomy, *Mental*, *Mentalis*, (F.) *Mentonnier*, signifies that which relates to the chin; from *mentum*, 'the chin.'

**MENTAL ARTERY**, (F.) *Artère mentonnière*. This is given off by the inferior dental, and issues at the mental foramen to be distributed on the lower lip.

**MENTAL FORAMEN**, (F.) *Trou mentonnier*, *Anterior maxillary F.*, is the outer orifice of the inferior dental canal. It is situated on the outer surface of the lower jaw-bone, opposite the second incisor or the canine tooth, and gives passage to the vessels and nerves.

**MENTAL FOSSA**, see Fossa, mental.

**MENTAL NERVE**, (F.) *Nerf mentonnier*, is furnished by the inferior dental nerve. It issues by the mental foramen, and is distributed, in numerous filaments, to the muscles of the lower lip.

**MENTAL REGION**, *Région mentalis*. The region of the chin.

**MENTHA** seu **MENTA AQUATICA**, *Menthastrum*, *Sisymbrium menthastrum*, *Mentha rotundifolia palustris*, *Watermint*, (F.) *Mentha aquatica*, *M. rotunda*. *Nat. Ord.* Labiata. This is less agreeable than the *Mentha viridis*, and more bitter and pungent. It is used like *sparmint*.

**MENTHA CERVINA**, *Hart's pennyroyal*, *Hysop-leaved mint*, *Pulegium cervinum*, (F.) *Mentha cervina*. Possesses the properties of pennyroyal, but is very unpleasant.

MENTHA CITRATA, Melissa.

MENTHA CRISPA, *Colymbifera minor*, Curled Mint, (F.) *Mentha frisco*, *Mentha crispus*, *Baume d'eau à feuilles ridées*. Possesses the properties of peppermint.

MENTHA GENTILIS, M. viridis.

MENTHA PIPERITA, *Mentha Piperitis*, Peppermint, (F.) *Mentha piperata*. The odour of this variety is strong and agreeable. Taste, pungent, aromatic, and producing a sensation of coldness in the mouth. Virtues depend upon essential oil and camphor. It is stomachic and carminative. It is chiefly used in the form of essential oil—the *oleum mentha piperita*.

Essence of Peppermint consists of *ol. mentha pip.* ʒij, *sp. vin. rectif.*, coloured with spinach leaves, Oij.

MENTHA PULGONIUM, *Pulegium*, *Pulegium vulgare*, *Pulegium latifolium*, *Glechion*, *Pennyroyal*, *Padding grass*, (F.) *Pouliot*. The oil—*Oleum pulgani*—possesses the virtues of the plant. It resembles the mints in general in properties. Amongst the vulgar, it is esteemed an emmenagogue.

MENTHA ROMANA, *Balsamita suaveolens*, *Tanacetum balsamita*—m. *Rotundifolia palustris*, M. aquatica—m. *Saracenia*, *Balsamita suaveolens*, *Tanacetum balsamita*—m. *Sativa*, M. viridis—m. *Spicata*, M. viridis.

MENTHA VIRIDIS, M. *Sativa*, M. *vulgaris*, M. *gentilis*, M. *spicata*, *Spearmint*, (F.) *Mentha sawage*, *Baume des jardins*, *Mentha verta*, *Mentha des jardins*. Odour strong, aromatic; taste, warm, austere, bitterish. Virtues the same as those of the peppermint. The *Oleum mentha viridis* is obtained from it.

MENTHA VULGARIS, M. viridis.

MENTHASTRUM, *Mentha aquatica*.

MENTHA AQUATIQUE, *Mentha aquatica*—m. *Cervina*, *Mentha cervina*—m. *Coq*, *Tanacetum balsamita*—m. *Crispa*, *Mentha crispata*—m. *Frisata*, *Mentha crispata*—m. *des Jardins*, *Mentha viridis*—m. *Poirata*, *Mentha piperita*—m. *Bouge*, *Mentha aquatica*—m. *Sawage*, *Mentha viridis*—m. *Verta*, *Mentha viridis*.

MENTIGO, *Porrigo larvalis*, *Sycosis*.

MENTISME, from *mens*, *mentis*, 'mind.' Any irregular movement of the mind, whether from emotion or a vivid imagination.—Baumes.

MENTOBICORNEUS, *Geniohyoides*.

MENTO-LABIAL, *Mento-labialis*. Under this name Chaussier has united the Levator labii inferioris, and Quadratus muscles. See Depressor labii inferioris.

MENTO-LABIAL FURROW: a transverse depression situate between the lower lip and the chin, which is remarkable for the perpendicular direction of the hairs growing upon it.

MENTON, Mentum.

MENTONNIER, Mental—m. *Labial*, Depressor labii inferioris.

MENTONNIÈRE, see Funda.

MENTULA, Penis—m. *Muliebris*, *Cercosis*, *Clitoris*—m. *Parva*, *Pipinna*.

MENTULAGRA, *Mentagra*. A hybrid word, from *mentula*, 'the penis,' and *agra*, 'a seizure.' A convulsive erection of the mentula or penis; such as is sometimes observed in eunuchs. See *Pudendagra*.

MENTULATUS, *Membrosus*.

MENTUM, *Genion*, *Genium*, *Antheroon*, 'the chin.' (F.) *Menton*. The inferior and middle part of the face, situate below the lower

lip. The chin is formed of skin, cellular tissue, muscles, vessels, nerves, and the os maxillare inferius.

MENYANTHES TRIFOLIATA, *Minyanthes*, *Trifolium paludosum*, *T. aquaticum*, *T. palustre*, *T. fibrinum*, *Menyantes*, *Water trefoil*, *Buckbean*, *Bogbean*. *Nat. Ord.* *Genitianeae*. (F.) *Trèfle d'eau*. The taste is intensely bitter, and is extracted by water. It is tonic, anthelmintic, diuretic, cathartic, and, in large doses, emetic. In some countries, it is used as a substitute for hops in making beer.

MENYANTHES VERNA, *American buck bean*, *Marsh trefoil*, *Water shamrock*, *Bitter root*, has similar properties.

MEOSIS, Meiosis.

MEPHITIC, *Mephiticus*; from a Syriac word, signifying 'to blow, to breathe.' Any thing possessed of an unwholesome property; chiefly applied to exhalations.

MEPHITIS HEPATICA, Hydrogen, sulphuretted—m. *Inflammabilis*, Hydrogen—m. *Urinosa*, *Ammonia*.

MEPHITISM. Same etymon. Any pernicious exhalation. *Mephitis* and *Mophtia*, (F.) *Mofette* ou *Moufette*, are old names for azote; and, in general, for all exhalations and gases that are unfit for respiration.

MERACUS, Merus.

MERAMAUROSIS, *Hypamaurosis*.

MERANÆSTHESIS, *Moranæsthesia*, from *μερος*, 'a part,' *ær*, 'privative,' and *αἰσθησις*, 'sensation.' Insensibility of a part of the body.

MERATROPHIA, from *μερος*, 'a part,' and *τροφη*, 'want of nourishment.' Atrophy of some part of the body.

MERCURE, *Hydrargyrum*—m. *Bichlorure de*, *Hydrargyri oxyurias*—m. *avec la Craie*, *Hydrargyrum cum creta*—m. *Cru*, *Hydrargyrum*—m. *Cyanure de*, *Hydrargyri cyanuretum*—m. *Doutiodure de*, *Hydrargyri iodidum rubrum*—m. *Douto-chlorure de*, *Hydrargyri oxyurias*—m. *Doux*, *Hydrargyri suburias*—m. *Gommeux de Planch*, *Syrupus de mercurio mediante gummi*—m. *Muriate oxygéné de*, *Hydrargyri oxyurias*—m. *Oxide de, caudré*, *Hydrargyri oxydum cinereum*—m. *Oxide gris de*, *Hydrargyri oxydum cinereum*—m. *Oxide nitrique de*, *Hydrargyri nitrico-oxydum*—m. *Oxide noir de*, *Hydrargyri oxydum cinereum*—m. *Oxide rouge de*, *Hydrargyri oxydum rubrum*—m. *Protiodure de*, *Hydrargyri iodidum*—m. *Protochlorure de*, *Hydrargyri suburias*—m. *Protoxide de*, *Hydrargyri oxydum cinereum*—m. *Sous-muriate de, précipité*, *Hydrargyrum præcipitatum*—m. *Sous-sulfate de*, *Hydrargyri vitriolatus*—m. *Sulphure de, noir*, *Hydrargyri sulphuretum nigrum*—m. *Sulphure de, rouge*, *Hydrargyri sulphuretum rubrum*.

MERCURIAL, *Mercurialis*, *Hydrargyricum*, *Hydrargyrium*. That which contains mercury: one of the preparations of mercury.

MERCURIALIS, *Mercurialis an'na*, *French mercury*. It has been esteemed cathartic, hypnotic and cosmetic, and has been chiefly used by way of *laxament*. See *Chenopodium Bonus Henricus*.

MERCURIALIS HUMOR, *Humor melancholicus*. A supposititious humour with the older physicians, out of which they presumed that morbi melancholicus seu mercuriales arose.

MERCURIALIS PERENNIS, *Cynonram'be*, *Cani'na bras'sica*, M. *montana*, M. *Sylvestris*,

*Dog's mercury.* This plant is possessed of acro-narcotic properties.

MERCURIALISMUS, Hydrargyriasis.

MERCURI CALX VITRIOLATA, Hydrargyrus vitriolatus—m. Sperma, Hydrargyrus acetatus—m. Terra foliata, Hydrargyrus acetatus.

MERCURIUS, Hydrargyrum—m. Acetatus, Hydrargyrus acetatus—m. Alkalisatus, Hydrargyrum cum cretâ—m. Calcinatus, Hydrargyri oxydum rubrum—m. Causticus flavus, Hydrargyrus vitriolatus—m. Cinereus, Hydrargyri oxydum cinereum—m. Cinnabarinus, Hydrargyri sulphuretum rubrum—m. Corallinus, Hydrargyri nitrico-oxydum—m. Corrosivus, Hydrargyri oxymurias—m. Corrosivus ruber, Hydrargyri nitrico-oxydum—m. Corrosivus sublimatus, Hydrargyri oxymurias—m. Cosmeticus, Hydrargyrum præcipitatum—m. Dulcis, Hydrargyri submurias—m. Emeticus flavus, Hydrargyrus vitriolatus—m. Gummosus Plenckii, Syrupus de mercurio mediante gummi—m. Luteus, Hydrargyrus vitriolatus—m. Mortis, Algaroth—m. Niger Moscati, Hydrargyri oxydum cinereum—m. Præcipitatus corrosivus, Hydrargyri nitrico-oxydum—m. Præcipitatus niger, Hydrargyri oxydum cinereum—m. Saccharatus, Hydrargyrum saccharatum—m. Solubilis of Hahnemann, see Hydrargyri oxydum cinereum—m. Sublimatus dulcis, Hydrargyri submurias—m. cum Sulphure, Hydrargyri sulphuretum nigrum—m. Terrestris, Polygonum hydropiper—m. Vitæ, Algaroth—m. Zoticus Hartmanni, Hydrargyri submurias.

MERCURY, Hydrargyrum—m. Acetate of, Hydrargyrus acetatus—m. Ammonio-chloride of, Hydrargyrum præcipitatum—m. Bichloride of, Hydrargyri oxymurias—m. Binoxide of, Hydrargyri iodidum rubrum, see Iodine—m. Bisulphuret of, Hydrargyri sulphuretum rubrum—m. Bromide of, see Bromine—m. with Chalk, Hydrargyrum cum cretâ—m. Chloride of, mild, Hydrargyri submurias—m. Cyanuret of, Hydrargyri cyanuretum m. Deuto-iodide of, see Iodine—m. Dog's, Mercurialis perennis—m. English, Chenopodium bonus Henricus—m. French, Mercurial—m. Iodide of, Hydrargyri Iodidum—m. Iodide of, red, Hydrargyri Iodidum rubrum—m. Iodo-arsenite of, Arsenic and Mercury, iodide of—m. Muriate of, corrosive, Hydrargyri oxymurias—m. Muriate of, mild, Hydrargyri submurias—m. Nitrate of, Hydrargyri nitras—m. Nitric oxyd of, Hydrargyri nitrico-oxydum—m. Oxide of, black or gray, Hydrargyri oxydum cinereum—m. Oxide of, red, Hydrargyri oxydum rubrum—m. Oxymuriate of, Hydrargyri oxymurias—m. Periodide of, Hydrargyri iodidum rubrum—m. Phosphuretted, Hydrargyrus phosphoratus—m. Precipitate of, white, Hydrargyrum præcipitatum—m. Protochloride of, Hydrargyri submurias—m. Protoiodide of, see Hydrargyri iodidum, and Iodine—m. Prussiate of, Hydrargyri cyanuretum—m. Soluble, Hydrargyri nitras—m. Submuriate of, Hydrargyri submurias—m. Sulphuret of, black, Hydrargyri sulphuretum nigrum—m. Sulphuret of, red, Hydrargyri sulphuretum rubrum, Realgar—m. Sulphuret of, with Sulphur, Hydrargyri Sulphuretum nigrum—m. Tartrate of, Hydrargyri tartaras.

MERCURY AND ARSENIC, IODIDE OF, Arsenic and Mercury, Iodide of—m. and Quinia, Proto-

chloride of, Hydrargyri et Quinæ Protochloridum.

MERDA, Excrement.

MERDIVOMUS, Copremetus.

MERDUS, Excrement.

MÈRE DES PLANS, Pian.

MEREMPHRAXIS, from *μῆρος*, 'a part,' and *μπαράσις*, 'obstruction.' Obstruction or infarction of an organ.

MERICUS, Local.

MERIDRO'SIS, *Sudor partialis* seu *localis*; from *μῆρος*, 'a part,' and *ἰδρωσις*, 'sweating.' A partial perspiration.

MERIMNA, Cura.

MERIMNE, Cura.

MERSIER, Prunus avium.

MEROBALANEUM, Bath, partial.

MEROBALNEUM, Bath, partial.

MEROCELE, *Mirocele*, *Meroria's*, *Morrothæa's*, from *μῆρος*, 'the thigh,' and *κῆλη*, 'tumour;' *Hernia cruralis* seu *femorialis*, *Femoral* or *crural hernia*, (F.) *Hernia cruralis* seu *femorale*. In this hernia, the viscera issue from the abdomen through the crural canal; or through an opening immediately on the outer side of Gimbernat's ligament, which gives passage to lymphatic vessels. This affection is more frequent in the female than in the male, and especially in those who have had children. The tumour, formed by the merecele, is generally small, round, and more or less difficult of reduction. In other respects, it possesses all the characters of hernia. The neck of the sac has, close on the outside, the epigastric artery; above, the spermatic cord and spermatic artery in the male—the round ligament in the female; on the inside, Gimbernat's ligament; and, below the pubes. When the obturator artery arises from the epigastric, it generally passes on the outside of and below the orifice of the sac; sometimes, however, it takes a turn above, and then to the inside of the opening. J. Cloquet asserts, that of 134 cases, in one only did he find the epigastric artery on the inside of the orifice of the sac.

The operation, required in strangulation of this variety, may be practised on the aponeurotic opening, by cutting downwards and inwards, on the side of Gimbernat's ligament.

MEROCOXYALGIA, Coxalgia.

MEROPIA, from *μῆρος*, 'a part,' and *ὄψ*, 'the eye.' A partial obscuration of vision.

MERORIXIS, Merocele.

MERORRHEU'MA, *Rheumaticus* seu *partialis*, *Rh. localis*, *Rh. Membrorum singulorum*; from *μῆρος*, 'a part,' and *ρῆμα*, 'defluxion, rheumatism.' Rheumatism affecting a part. Topical or local rheumatism.

MERORRHEXIS, Merocele.

MEROS, Femur, Thigh.

MERRY-ANDREW. An itinerant quack, who exposes his nostrums for sale at fairs and markets. See CHARLATAN.—So called from Dr. Andrew Boorde, who lived in the reigns of Henry VIII., Edward VI., and Queen Mary, and who was in the habit of frequenting fairs and markets at which he harangued the populace.

MERUS, *Mera'cus*, *A'cratos*, 'pure, genuine;' as *Vinum merum*, unmixed wine.

MERUS, Femur, Thigh.

MERVINE MALE, *Cypripedium luteum*.

MERYCISMUS, Rumination.

MERYCOLOG'IA, from *μῆρμα*, 'I rumi-

nate,' and *λεψς*, 'a description.' Any work on rumination may be so termed.

MESA, Genital organs.

MESARÆUM, Mesentery.

MESARAIC, Mesenteric.

MESEMAR, Mismar.

MESEMBRYANTHEMUM COPTICUM, see Soda.

MESEMBRYANTHEMUM CRYSTAL'INUM, *M. fcoi'des*, *Di'amon'd fig-marygold*, *Ico-plant*, (F.) *Glaci'ale*, *Crystalline*. It has been recommended in dysuria, ischuria, and some other affections of the urinary organs.

MESENCEPHALE, Medulla oblongata, Pons Varolii.

MES'ENTERIC, *Mesara'ic*, *Mesenteric'ous*, *Mesara'icus*, *Mesara'icus*; from *mesaragion*, or *μαραγιον*, 'the mesentery.' That which relates or belongs to the mesentery.

MESENTERIC ARTERIES are two in number, and distinguished into, 1. The *Superior mesenteric*, which arises from the anterior part of the abdominal aorta, below the celiac. It immediately descends to the left, forwards, behind the pancreas, and in front of the third portion of the duodenum,—to gain the superior extremity of the mesentery, where it makes a long curvature, the convexity of which is turned forwards and to the left. Towards the termination of the ileum, it ends by anastomosing with a branch of the *A. colica dextra inferior*. At its concavity, it gives off the three *Arteria colica dextra*, which belong to the great intestine; and, at its convexity, it sends off fifteen or twenty branches, which are distributed to the small intestine, after having formed numerous arches by their anastomoses.

2. The *Inferior Mesenteric Artery* arises from the anterior part of the abdominal aorta, an inch and a half before its termination. It descends, on the left side, behind the peritoneum; engages itself in the substance of the iliac mesocolon, forming a considerable curvature, whose convexity faces the left side. When it reaches the brim of the pelvis, it passes along the posterior separation of the mesorectum, and attains the neighbourhood of the anus, under the name *Superior hemorrhoidal artery*. It gives off no branch at its concave part; but, from the convex, the three *Arteriæ colicæ sinistrae* arise.

MESENTERIC DISEASE; *Tabes mesenterica*.

MESENTERIC GLANDS are the lymphatic ganglions of the mesentery. Through them, the chyliiferous vessels pass to the thoracic duct. Their uses are unknown. When diseased, nutrition is interfered with, and atrophy produced.

MESENTERIC HERNIA. If one of the layers of the mesentery be torn by a blow, whilst the other remains in its natural state, the intestines may insinuate themselves into the aperture, and form a kind of hernia. It is not known during life.

MESENTERIC PLEXUSES are furnished by the solar plexus, and have been distinguished into *superior* and *inferior*; like the mesenteric arteries which they accompany.

MESENTERIC or MESARAIC VEINS are two in number, and belong to the vena porta. They are distinguished into, 1. The *Superior mesenteric* or *mesaraic* or *great mesaraic*. This trunk receives, from above to below and on the right side, the three *vena colica dextra* and the *Gastro-epiploica dextra*. Into its left side, the veins

of the small intestine open. It passes in front of the transverse portion of the duodenum; and, behind the pancreas, unites with the splenic vein to concur in the formation of the vena porta.

The *inferior* or *lesser mesenteric vein* corresponds to the artery of the same name, and opens into the splenic, near the union of that vein with the superior mesenteric, and behind the pancreas.

MESENTERITIS, Mesenteritis.

MESENTERITIS, *Mesenterii'tis*, *Emproma peritonitis mesenterica*, *Enteritis mesenterica*, *Inflammation of the mesentery*. The pain is here deeper seated and more immediately in the mesenteric region. The external tenderness is less than in some of the other varieties of peritonitis. See *Tabes Mesenterica*.

MESENTERIUM, Mesentery—m. Crassum, Mesocolon.

MESENTERON, Mesentery.

MESENTERY, *Mesenterium*, *Mesaraion*, *Mesaraum*, *Medi'um*, *Membra'na pinguis intestino'rum*, *Lactes*, *Mesenteron*, *Meseraum*, *Mesoraum*, *Medium intesti'num*, *Epichor'dis*, from *mesos*, 'in the middle,' and *εγγοσ*, 'intestine.' (F.) *Mésentère*. A term in anatomy, applied to several duplicatures of the peritoneum, which maintain the different portions of the intestinal canal in their respective situations; allowing, however, more or less mobility. They are formed of two laminae, between which are contained the corresponding portion of intestine and the vessels that pass to it. One only of these duplicatures has received the name *mesentery*, properly so called. This belongs to the small intestine, which it suspends and retains *in situ*. Its posterior margin, which is the smallest, is straight, and descends obliquely from the left side of the body of the second lumbar vertebra to the right iliac fossa. Its anterior margin is curved, undulating, plaited, and corresponds to the whole length of the small intestine. The mesentery contains, between the two laminae which form it, a number of lymphatic ganglions; the trunks and branches of the mesenteric vessels; the nervous plexuses accompanying them, and many lacteals and lymphatics.

MESERA, Tutia.

MESERÆUM, Mesentery.

MESERAION, Mesentery.

MESIAMUM, Aniceton.

MESMERIC, *Mesmeric'us*. Relating to mesmerism or animal magnetism—as the 'mesmeric state,' 'mesmeric sleep,' &c. &c.

MESMERISM, Magnetism, animal.

MESMERIZED, *Mesmerisatus*, *Hypnotized*. Affected with mesmerism or animal magnetism.

MESO, *mesos*, 'in the middle.' A prefix to certain words.

MESOBREGMATE, see Cranium.

MESOCÆ'ÇUM. A name given to a duplicature of the peritoneum, (in some persons only,) at the posterior part of the cæcum.

MESOCEPHALE, Medulla oblongata, Pons Varolii.

MESOCHON'DRIAC, *Mesochondriacus*; from *mesos*, and *χονδρος*, 'cartilage.' A name given by Boerhaave to fleshy fibres situate between the cartilaginous rings of the trachea.

MESOCOLIC HERNIA. Hernia is so

named by Sir Astley Cooper, when the bowels glide between the layers of the mesocolon.

**MESOCOLON**, *Mesocolum*, *Mesenterium crassum*, from *mesos*, and *kolon*, 'the colon.' A name given to the duplicatures of the peritoneum, which fix the different parts of the colon to the abdominal parietes. It has received different names, according to its situation. The *right lumbar mesocolon* fixes the ascending colon to the corresponding lumbar region. The *transverse mesocolon* arises from the concave arch of the colon, and forms a septum between the epigastric and umbilical regions. Its inferior portion is continuous with the mesentery. The *left lumbar mesocolon*, which contains the ascending colon, is continuous below with the *Iliac mesocolon*. The last includes between its layers the sigmoid flexure of the colon, and ends in the mesorectum. Under the right kidney, it is narrow and firm, and forms the *right ligament of the colon*: at the under end of the left kidney, it forms the *left ligament of the colon*.

**MESOCRANIUM**, Sinciput.

**MESOCRANIUM**, Sinciput.

**MESODERMUM**, Corpus mucosum.

**MESODME**, Mediastinum.

**MESODMITIS**, from *mesodmi*, 'the mediastinum,' and *itis*, 'inflammation.' *Mesotachistis*, *Mediastinitis*, *Inflammatio mediastini*. Inflammation of the mediastinum.

**MESOGASTRIUM**, Umbilical region.

**MESOGLOSSUS**, Genioglossus.

**MESOGLOTTUS**, Genioglossus.

**MESOGONIUM**, Intermedium.

**MESOLOBAR**. Belonging to the *Mesolobe* or *Corpus callosum*.

**MESOLOBAE ARTERIÆ**, *Arteriæ mesolobicae*, *A. corporis callosi cerebri*, are the arteries of the corpus callosum.

**MESLOBE**, Corpus callosum.

**MESOMERIA**, from *mesos*, and *mesos*, 'the thigh.' The parts of the body situate between the thighs or hips.

**MESOMERION**, Perineum.

**MESOMPHALUM**, Umbilicus.

**MESOPHLEBIUM**, from *mesos*, 'in the middle,' and *phleps*, 'a vein;' *Interveniendum*. The space between two veins.

**MESOPHYRION**, *Glabella*, *Gabella*, *Intercilium*, *Metopium*, *Nasal eminence*. The part between the eyebrows; from *mesos*, 'the middle,' and *ophris*, 'the eyebrows.'

**MESOPLEURIUM**, Intercostal space.

**MESOPLEURIUS**, Intercostal.

**MESORÆUM**, Mesentery.

**MESORECTUM**. A hybrid word; from *mesos*, and *rectum*, 'the intestine rectum.' A triangular reflection, formed by the peritoneum, between the posterior surface of the rectum and the anterior surface of the sacrum. Between the two layers of which the mesorectum is composed are found much cellular tissue, and the termination of the inferior mesenteric vessels.

**MESOS**, Meso.

**MESOSCELOCELE**, Hernia, perineal.

**MESOSCELOM**, Perineum.

**MESOSCELOPHYMA**, from *Mesocolon*, 'perineum,' and *phyma*, 'swelling.' A tumour of the perineum.

**MESOTHENAR**, from *mesos*, and *thénar*, 'the thenar,' 'the palm of the hand.' A muscle, which carries the thumb towards the palm.

Winslow applied the term to the abductor pollicis, united to the deep-seated portion of the flexor brevis pollicis.

**MESOTICA**, from *mesos*, 'middle.' Diseases affecting the parenchyma. Pravity in the quantity or quality of the intermediate or connecting substance of organs; without inflammation, fever, or other derangement of the general health. The first Order, class *Esorities* of Good.

**MESOTŒCHITIS**, Mesodmitis.

**MESOTŒCHIUM**, Mediastinum.

**MESOTŒCHUM**, Mediastinum.

**MESPIPLUS**, *Mespilus Germanica*. The *medlar*, (F.) *Néfior*. The fruit, (F.) *Nêse*, and seeds of the medlar have both been used medicinally:—the immature fruit as an astringent, and the seeds in nephritic diseases. See *Cratægus Aria* and *Sorbus acuparia*.

**MESPILUS OXYACANTHA**, *Oxyacantha*, *Spiræa alba*, *White Hawthorn*, (F.) *Aubepine*. The flowers of this uncommon European plant are sometimes used in infusion as a pectoral.

**META**, *meta*, *Metá*, 'with,' 'together with,' 'after,' 'change of form and place.' A common prefix to words. Hence:

**METABASIS**, *Transitus*, *Metabole*, *Metabolis*, *Metallage*, *Metallaxis*, from *meta* and *basis*, 'I digress.' A change of remedy, practice, &c.—Hippocrates.

**METABOLE**, Metabasis, Transformation.

**METABOLELOGY**, *Metabolologia*; from *metabolis*, 'change,' and *logos*, 'a description.' A description of the changes which supervene in the course of a disease.

**METABOLIA**, Metabasis.

**METACARPAL**, *Metacarpia*, (F.) *Metacarpien*. Relating or belonging to the metacarpus.

**METACARPAL ARTERY**, *Arteria dorsalis metacarpi*, arises from the radial, at the moment it engages itself in the upper extremity of the abductor indicis. It descends obliquely upon the back of the hand. Its branches are distributed to the abductor indicis, and the integuments: some communicate with the dorsalis carpi.

**METACARPAL ARTICULATIONS** are those by which the last four metacarpal bones are united together at their upper extremity.

**METACARPAL BONES**, or bones which compose the metacarpus, are five in number; and distinguished into *first, second, third*, &c., beginning from the outer or radial side. They are articulated by their superior extremity with the bones of the second range of the carpus; and by the lower with the first phalanges.

**METACARPAL LIGAMENT**, *Inferior palmar Ligament*, is a fibrous band, stretched transversely before the inferior extremities of the last four metacarpal bones, which it keeps in their respective positions.

**METACARPAL PHALANGES** are the first phalanges of the fingers; so called, because they are articulated with the bones of the metacarpus.

**METACARPAL RANGE OF ROW** of the carpal bones, (F.) *Rangée métacarpienne du carpe*, is the lower row of carpal bones; so called because they are articulated with the bones of the metacarpus. It is composed of the trapezium, trapezoides, magnum, and unciniforme.

**METACARPEUS**, Abductor metacarpi minimi digiti.

**METACARPIEN**, Metacarpal—*m. du Petit doigt*, Opponens minimi digiti—*m. du Pouce*, Opponens pollicis.

**METACARPION**, Metacarpus.

**METACARPO-PHALANGÆUS POLLICIS**, Adductor pollicis manus.

**METACARPO-PHALANGIAN**, *Metacarpophalangianus*, *Metacarpophalang.* (F.) *Mitacarpophalangien*. That which belongs to the metacarpus and phalanges.

**METACARPO-PHALANGIAN OF METACARPO-PHALANGAL ARTICULATIONS** are formed by the bones of the metacarpus and the corresponding phalanges. In these articulations, the bony surfaces are incrustated with cartilage, covered by a synovial membrane, and kept in connexion by means of an anterior and two lateral ligaments.

**MÉTACARPO-PHALANGIEN LATÉRAL SUS-PALMAIRE, ET MÉTACARPO-PHALANGIEN LATÉRAL**, Interosseus manus.

**METACARPUS**, from *meta*, 'after,' and *carpus*, 'the wrist'; *Metacarpion*, *Postbrachiale*, *Postcarpium*, *Torus manus*, (F.) *Mitacarpus*. The part of the hand comprised between the carpus and fingers. It is composed of five parallel bones, called *metacarpal*; forming the back of the hand, externally, and the palm internally.

**METACERASMA**, Cerasma.

**METACHEIRIXIS**, Surgery.

**METACHIRISIS**, Surgery.

**METACHIRISMUS**, Surgery.

**METACHORESIS**, Metastasis.

**METACINEMA**, Metastasis.

**METACINESIS**, Metastasis.

**METACONDYLE**, see Phalanx.

**METACYE'SIS**, from *meta*, 'after,' and *κύησις*, 'pregnancy'; *Graviditas extra-uterina secundaria*. Extra-uterine pregnancy in which the fœtus is at first in the uterus, but subsequently in some other place.

**METADERMATO'SIS**, from *meta*, 'after,' and *δέρμα*, 'skin.' A morbid development of the epidermis or epithelium.

**METAL**, *Metalum*. A class of simple, combustible bodies; distinguished from others by considerable specific gravity; a particular splendour; almost total opacity; insolubility in water; and the property they have of ringing when struck. Metals have no effect, except of a mechanical nature, when taken into the stomach; unless they have already undergone, or undergo, in the stomach, oxidation or union with an acid; when several most deleterious compounds may be formed. Copper cents; half-pence; quicksilver; lead, have frequently been swallowed in the metallic state with impunity. Tin and mercury are the only metals used to produce a mechanical effect; the former as an anthelmintic,—the latter, idly enough, in cases of fancied intussusception.

**MÉTAL DES CLOCHES**, Bell metal.

**METALLAGE**, Metabasis.

**METALLAXIS**, Metallage.

**METALLIC VOICE**, *Tintement métallique*.

**METALLODYN'IA**, from *metallos*, 'a metal,' and *odynē*, 'pain.' Pain owing to the injurious influence of a metal—as lead, quicksilver, &c.

**METALLUM**, Metal—*m. Hæmatopœticum*, Ferrum.

**METAMORPHOS'IA**, *Phantasmascopia*, *Phantasmascopia*, from *μεταμορφωσις*, (*meta*, and *μορφή*, 'form,') 'I transform,' and *ὄψις*, 'the eye.' *Suffusio*, *Suffusio Oculorum*, *Suffusio metamorphosis*, *S. Myodes*, *Imagination* (Maitre-Jean); *Crupsis*, *Marmorygē*, *Marmorygē*, *Macula ante oculos volitantes*, *Marmorygia*, *Oculi marmorygodes*, *False sight*, (F.) *Berlus*. Aberration of the sense of sight, which transmits the image of imaginary objects. This affection sometimes depends on a slight opacity in the transparent parts of the eye; the cornea, crystalline, or vitreous humour, when it is symptomatic and of no consequence. At other times, it appears to be idiopathic; and occurs particularly in those who have been in the habit of constantly fixing their eyes on very brilliant or small bodies. The objects, fancied to be seen, are various. They are sometimes circular, perpetually moving, or shining or black spots, cobwebs, insects, or pieces of wood—when they are often termed *Musca volitans*, (F.) *Mouches volantes*, and the condition *Visus muscarum*, *Scotom'ata*, *Suffusio Myodes*, *Myiodesopsia*, *Myodesopsia*, *Visus muscarum*. These appearances sometimes continue for a few days; being dependent on the state of the nerves of the individual at the time; or they may exist for life, and ultimately impair the sight.

If the affection be symptomatic, it is of but little moment. If idiopathic, and connected with any excitement of the brain, which is not often the case, attention will have to be paid to that organ.

**METAMORPHOSIS VENTRICULI GELATINIFORMIS**, Gastromalacia.

**METANGISMOS**, Decantation.

**METAPEDIUM**, Metatarsus.

**METAPHRENON**, Dorsum.

**METAPHYTEIA**, Transplantation.

**METAPODIUM**, Metatarsus.

**METAPOROPE'IA**, *Metaporopœisis*, from *meta*, 'after,' *πορος*, 'a pore,' and *ποιω*, 'to make.' The change produced in the minute pores, in the capillary extremities of vessels,—when they pass from the morbid to the healthy condition.—Galen.

**METAPTO'SIS**, *Metaschematis'mus*, *Metaschematis'is*. Mutation, change; from *μεταπρωτω*, (*meta*, and *πρωτω*, 'I fall,') 'I digress.' Any change in the form or seat of a disease.

**METARRHŒ'A**, *Metar'rhœsis*, from *meta*, 'change of form or place,' and *ῥω*, 'I flow.' Reflux. The transfer of a disease from without to within, or from one part to another.

**METARRHYSIS**, Metorrhœa.

**METASCHEMATISIS**, Metaptosis.

**METASCHEMATISMUS**, Metaptosis.

**METAS'TASIS**, *Metachore'is*, *Metacine'ma*, *Metacine'is*, from *μεταστημι*, (*meta*, and *στας*, 'place,') 'I change place.' *Displacement*, *Translocation*. A change in the seat of a disease; attributed, by the Humorists, to the translation of the morbid matter to a part different from that which it had previously occupied; and by the Solidists, to the displacement of the irritation. It has also been used in the same extensive sense as Metaptosis. Disputes have often been indulged, whether a case of metastasis ought not rather to be esteemed

one of extension of the disease. The phenomena of gout and acute rheumatism are in favour of metastasis occasionally supervening.

**METASTASIS LACTIS**, Galactoplasia, Phlegmatia dolens.

**METASTATIC**, *Metastaticus*. Belonging or relating to metastasis. A *metastatic crisis* is one produced by metastasis;—a *metastatic affection*, one caused by metastasis, &c. See Abscess, metastatic.

**METASYNCRISIS**, from *συνκρίσις*, 'I compose,' and *μετα*, which indicates a change. *Recomposition*. A word employed by some disciples of Asclepiades. This physician supposed, that all animals are formed by the union or assemblage of atoms. He designated all bodies by the word *συνκρίματα*; which signifies 'assemblage.' *Συνκρίσασθαι*, 'to be assembled,' was, with him, synonymous with 'to exist;' and *διακρίσασθαι*, 'to separate,' was, with him, synonymous with 'to dissolve,' 'to cease to exist.' The word *Metasyncrisis* was invented to express the recomposition of bodies after their momentary dissolution. Some have rendered the word by the Latin *Recorporatio*.

**METASYNCRITIC**, *Metasyncriticus*, *Recorporativus*. Belonging or relating to metasyncrisis. A name formerly given to medicines to which was attributed the virtue of producing the metasyncrisis or regeneration of the body, or some of its parts.

**METASYNCRITIC CYCLE** meant a determinate series of remedies employed for this purpose.

**METATARSAL**, *Metatarsus*, (F.) *Mitarsarien*. Relating or belonging to the metatarsus.

**METATARSAL ARTERY**, *Arteria sub-mitarsarienne* of Chaussier, arises from the *Arteria dorsalis Tarsi*; passes transversely over the back of the foot; and furnishes, at its convexity, which is anterior, three branches, called *A. interossea dorsales Pedis*. These branches are distributed in the interosseous spaces.

**METATARSAL ARTICULATIONS** are those resulting from the junction of the metatarsal bones with each other. They are strengthened, behind, by *dorsal*, and *plantar* ligaments; and before, by a *transverse metatarsal ligament*, which is plantar, and has the greatest analogy to the *inferior transverse metacarpal ligament*.

**METATARSAL BONES**, (F.) *Os metatarsiens*, are five in number, and distinguished by their number; *first*, *second*, *third*, &c., reckoning from the outer side.

**METATARSAL PHALANGES** are the first phalanges of the toes; so called because they are united to the metatarsus.

**METATARSAL ROW**—(F.) *Range metatarsienne*—of the bones of the tarsus, is the second row, or that contiguous to the metatarsus; comprehending the cuboides and three cuneiform bones; some add the scaphoides.

**METATARSEUS**, see *Abductor minimi digiti pedis*.

**MÉTATARSIEN**, *Metatarsal*.

**METATARSO-PHALANGIAN**, *Metatarso-phalangianus*, *Metatarso-phalangal*. Relating to the metatarsus and phalanges.

**METATARSO-PHALANGIAN** or **METATARSO-PHALANGAL ARTICULATIONS** are formed by the bones of the metatarsus and the corresponding phalanges. They bear the greatest analogy to the *metacarpophalangian articulations*.

**MÉTATARSO-PHALANGIEN-LATÉ-**

**RAL**, see *Interossei pedis*—*m. Sous-phalangien transversal du premier orteil*, *Transversus pedis*.

**METATAR'SUS**, *Metatarsium*, *Metapedium*, *Μεταπόδιον*, *Præcoridium* seu *Solium pedis*, *Vestigium pedis*, from *μετα*, 'after,' and *ταρσος*, 'the tarsus.' That part of the foot which is situate between the tarsus and toes, corresponding with the metacarpus. It is composed of five parallel bones; one to each toe. Like the metacarpal bones, they are developed from two points of ossification.

**METATHESIS**, from *μετατίθημι*, (*μετα*, and *τίθημι*, 'to place,') 'I change place.' *Transpositio*. An operation, by which a morbid agent is removed from one place to another, where it may produce less disturbance in the exercise of the functions;—as, for example, in the operation of depressing cataract, or when calculus in the urethra is pushed back into the bladder. Also, Derivation.

**METATOCIA**, from *μετα*, 'change of form or place,' and *τοκίς*, 'birth.' Parturition in a preternatural manner. Preternatural labour.

**METATOPTOSIS**, *Diadexis*.

**METENSOMATOSIS**, *Incorporation*.

**METEORISMUS**, *Sublimation*, *Tympanitis*.

**METEBOROL'OGY**, *Meteorolog'ia*, from *μετεωρος*, 'a meteor,' and *λογία*, 'a discourse.' The science, whose object is a knowledge of the origin, formation, appearance, &c. of meteors. The state of the atmosphere has a most important bearing upon the health of animals. The whole range of epidemic affections have their causes seated there. Meteorological observations have, hence, ever been attended to by the physician for the purpose of detecting the precise character of any particular epidemic influence. The barometer, thermometer, and hygrometer are the instruments used with this intent—to detect, as well the varying weight or pressure, and the temperature, as the moisture. Perhaps, of the three conditions, the last exerts more influence in the production of disease than either of the others. Our knowledge, however, of this part of physics is extremely limited and unsatisfactory.

**METER**, *μετρος*, 'a measure,' a suffix to words denoting 'a measure,' as in *Barometer*, *Piezimeter*, &c.

**METHÆMACHYmia**, *Transfusion*.

**METHE**, *Temulentia*.

**METHEGLIN**, *Melizomum*.

**METHEMERINUS**, *Quotidian*.

**METHOD**, *Methodus*, from *μετα*, 'with,' and *οδος*, 'way.' This word has different acceptations in the sciences. In medicine, *curative method*, *methodus medendi*, is the methodical treatment of disease.

**METHOD**, **MARIANO'S**, see *Lithotomy*.

**METHOD**, **NUMERICAL**, *Method of Observation of Louis*, (F.) *Methode numerique*, consists in observing every case and every symptom of a case numerically, so as to ensure, as far as practicable, accuracy of observation; and to enable us by the analysis and collation of such facts to deduce general laws and conclusions. Also, the application of numbers to the study of disease. See *Statistics*, *Medical*.

**METHODE NUMÉRIQUE**, *Method*, numerical, *Statistics*, *medical*—*m. Perturbatrix*, *Perturbatrix* (*Medicina*.)

**METHODICS**, *Methodists*.

**MÉTODIQUES**, *Methodists*.

**METHODISTS**, *Methodical sect, Methodists*, (F.) *Méthodistes, Méthodiques*. A sect of physicians whose doctrine was in vogue after that of the Empirics and Dogmatists, towards the end of the first century. According to the Methodists, of whom Themison was the chief, almost every disease was dependent on contraction or relaxation;—*strictum* or *laxum*. To these two causes, they added a third—*mixed* or *compound*—to include those affections which partook of the two characters. The doctrine, *medicina methodica*, resembled, in some respects, that of Brown.

**METHODOLOGY**, (MEDICAL), *Methodologia Medica*, from *μῆθοδος*, 'method,' and *λογος*, 'a discourse.' A word used by the French more especially, to signify *method* applied to the study of any science. *Medical Methodology*, consequently, means *method* applied to the study of medicine.

**METHÓDUS CATALEPTICA**, see *Cataleptic*—m. Celsiana, see *Lithotomy*—m. *Curatoria*, *Therapeutics*.

**METHODUS DERIVATÓRIA**. The derivative or revellent system of treatment.

**METHODUS ENDERMÁTICA** *SEU* **ENDERMICA**, see *Endermic*—m. *Franconiana*, see *Lithotomy*—m. *Guytoniana*, see *Lithotomy*—m. *Medendi*, *Method* of cure, *Therapeutics*.

**METHOMANIA**, from *μῆθη*, 'drunkenness,' and *μανία*, 'mania.' An irresistible desire for intoxicating substances. *Temulencia*.

**METHYSMUS**; *Temulencia*.

**METODONTIASIS**; from *μετα*, 'in the sense of change,' and *ὀδοντίαςις*, 'dentition.' Faulty development of the teeth.

**METOPAGES**, *Symphyocephalus*.

**METOPANTRA**, *Frontal sinuses*.

**METOPANTRAL'GIA**, from *μετωπον*, (*μετα*, and *ων*, 'the eye,') 'the forehead,' *αλγος*, 'a cavity,' and *αλγος*, 'pain.' Pain in the frontal sinuses.

**METOPANTRITIS**, *Inflammatio sinuum frontaliūm*, from *μετωπον*, 'the forehead,' *αλγος*, 'a cavity,' and *ιτις*, denoting inflammation. Inflammation of the frontal sinuses.

**METOPION**, *Bubon galbanum*.

**METOPIMUM**, *Mesophryon*.

**METOPODYNIA**, *Neuralgia frontalis*.

**METOPON**, *Front*, *Frontal bone*.

**METOPOSCOPY**, *Metoposcofia*, from *μετων*, 'the forehead,' and *σκοπεν*, 'to view.' The art of knowing the temperament and character of a person, by inspecting the traits of his forehead or face. See *Physiognomy*.

**METRA**, *Uterus*.

**METRÆMORRHAGIA**, *Metrorrhagia*.

**METRAL'GIA**, *Metrodyn'ia*, from *μητρα*, 'the womb,' and *αλγος*, 'pain.' Pain in the uterus.

**METRANASTROPHE**, *Uterus*, inversion of the.

**METRATRE'SIA**, *Imperforatio uteri*, from *μητρα*, 'the womb,' and *ατραηια*, 'imperforation.' An unnatural closure of the uterus.

**METRELCO'SIS**, *Metrelcolco'sis*, from *μητρα*, 'the womb,' and *υλκος*, 'an ulcer.' Ulceration of the uterus.

**METREMPHRAXIS**, from *μητρα*, 'the uterus,' and *μφορασσω*, 'I obstruct.' Obstruction of the womb or of the vessels of the womb—*Infartus uteri*. A name under which some authors have confounded chronic inflammation

of that viscus, and the different degenerations to which it is exposed.

**METREMPHYSEMA**, *Physometra*.

**METREN'CHYTA**, *Metren'chytes*, from *μητρα*, 'the uterus,' and *εγχυμα*, 'I inject.' Injection of the uterus. Substances injected into the uterus are also called *Metren'chyta*.

**METREURYS'MA**; from *μητρα*, and *ευρυς*, 'dilated.' A morbid dilatation of the womb.

**METRHELCO'SIS**, *Metrelcolosis*.

**METRIOPATH'IA**, from *μετρος*, 'tempered,' and *παθος*, 'affection.' State of an individual whose passions are temperate.

**METRITIS**, from *μητρα*, 'the womb,' *Febriis uterina*, *Hysteri'tis*, *Empres'ma Hysteri'tis*, *Inflammatio Uteri*, *Metrophlogo'sis*, *Inflammatio of the Uterus* or *Womb*; (F.) *Inflammatio de la matrice*. The characteristic symptoms of this affection are:—pain, swelling, and tenderness in the hypogastric region; with heat, pain, and tenderness of the os uteri; vomiting, smallness, and frequency of pulse. It occurs most frequently after delivery, when there is generally suppression of the lochial discharge. The treatment must be vigorous, —bleeding early, so as to make a decided impression; followed by a full dose of opium, fomentations, blisters, &c.

Acute inflammation of the womb, seated in its internal membrane, *Endo-metritis*, has been called *Inflammatio catarrhalis uteri* or *Acute catarrh*, (F.) *Catarrhus acutus*, of that viscus. It is known by the discharge of a clear, stringy fluid *per vaginam*; preceded by pains, which, from the hypogastric region, shoot to the thighs, groins, &c., with more or less fever. It requires the antiphlogistic treatment. *Chronic metritis* sometimes succeeds the acute. To it must be referred the indurations, observed in the uterus, and many of the leucorrhœal discharges to which females are subject.

**METRITIS SEPTICA**, *Metrocace*—m. *Venosa*, see *Phlebitis*.

**METROBLENNORRHŒA**, *Leucorrhœa uteri*.

**METRO'ACE**, *Metritis septica*: from *μητρα*, 'the womb,' and *κακος*, 'evil.' Putrescence or gangrene of the uterus.

**METROCAMP'SIS**, *Hysteroloxia*.

**METROCARCINO'MA**, *Hystero-carcinoid'ma*, *Uteri carcinoma*, *Cancer uteri*, from *μητρα*, 'the uterus,' and *καρκινωμα*, 'cancer.' Cancer of the uterus.

**METROCELIDES**, *Nævus*.

**METROCHOL'OSIS**, from *μητρα*, 'the uterus;' and *χολος*, 'bile;' *Febriis puerperalis biliosa*.

**METRODYNIA**, *Metralgia*.

**METROHÆ'MIA**, *Hypermetrohæmia*, from *μητρα*, 'the uterus,' and *αιμα*, 'blood.' Hyperæmia or congestion of blood.

**METROHEMORRHAGE**, *Metrorrhagia*.

**METROLOXIA**, *Hysteroloxia*.

**METROMALACOMA**, *Hysteromalacia*.

**METROMALACOSIS**, *Hysteromalacia*.

**METROMANIA**, *Nymphomania*.

**METROPATH'IA**, from *μητρα*, 'the womb,' and *παθος*, 'affection.' An affection of the womb.

**METRO-PÉRITONITE PUERPERALE**, see *Peritonitis*.

**METROPERITONITIS**, from *μητρα*, 'the uterus,' and 'peritonitis.' *Inflammatio uteri et*

*peritonæi*. Inflammation of the uterus and peritoneum. Puerperal Fever. See Peritonitis.

**METROPHLEBITIS**, from *μῆτρα*, 'the uterus,' *φλέψ*, 'a vein,' and *ίτις*, denoting inflammation. Inflammation of the veins of the uterus.

**METROPHLEBITIS PUERPERALIS**, see Phlebitis.

**METROPHLOGOSIS**, Metritis.

**METROPHTHYSIS**, *Phthisis uterina*; from *μῆτρα*, 'the uterus,' and *φθίω*, 'I consume.' Consumption from ulceration of the uterus;—*Ulcera seu Hæmorrhæ uteri*.

**METROPOLYPUS**, *Hystero-polypus*, *Polypus Uteri*, from *μῆτρα*, 'the uterus,' and *πολύπος*. Polypus of the uterus.

**METROPROPTOSIS**, Prolapsus uteri.

**METROPTOSIS**, Prolapsus uteri.

**METRORRHAGIA**, *Métrorrhag'ia*, *Hæmorrhagia uterina*, *H. uteri*, *Sanguifluxus uterinus*, *Sanguis stillicid'ium ab Utero*, *Flux uterini sanguinis*, *Profluviu[m] Sanguinis ex utero*; *Hystorrhag'ia sanguinea*, *Hystorrhæa*, *Hæmorrhæa uterina* (of some), *Menorrhægia* (of some), *Uterine Hæmorrhage*, *Hæmorrhage from the Womb*, *Metrorrhage*, *Hæmatométra*, *Hæmatoma'tra*, (F.) *Hémorrhagie de la Matrice*, *Pertes*, *Pertes utérines rouges*, *P. de sang*, from *μῆτρα*, 'the womb,' and *ρῆγνυμι*, 'I break forth.' An effusion of blood from the inner surface of the uterus, either at the menstrual or other periods; but in a greater quantity than proper. Uterine hemorrhage may be caused by those influences which produce hemorrhage in general. It happens, however, more frequently during pregnancy, and during or after delivery, when the vascular system of the uterus is so circumstanced as to favour its occurrence more than at other periods. The termination of metrorrhagia is usually favourable. Should it, however, be very copious, or frequently recur; or should it happen to a great extent after delivery, death may occur very speedily; and, in some cases, without the discharge being perceptible; constituting *internal hemorrhage*.

Uterine hemorrhage may be *active* or *passive*; requiring obviously a different treatment. The general management is similar to that of hemorrhage in general, as the horizontal posture; acid drinks; free admission of cool air; cold applications to the loins, thighs, and abdomen; injection of cold water, even of iced water, into the vagina; plugging the vagina, so as to prevent the discharge *per vaginam*, and thus induce a coagulum in the mouths of the bleeding vessel. Such will be the *special* plan adopted where the hemorrhage has occurred in one not recently delivered. In uterine hemorrhage, after delivery, the same cooling plan must be followed; but, as the flow of blood is owing to the uterus not contracting so as to constrict its vessels, pressure must be made on the abdomen to aid this; and, if necessary, the hand must be introduced into the uterus to stimulate it to contraction. Should the female be excessively reduced, so as to render the accoucheur apprehensive that she may expire from loss of blood, brandy may be exhibited. The profuse exhibition of opium in such cases, is, at least, a doubtful plan.

Transfusion has, at times, been practised as a last resource.

**METRORRHEUMA**, *Rheumaticus Uteri*

*Hystorral'gia rheumatica seu catarrhalis*, (F.) *Rheumatisme de l'utérus*; from *μῆτρα*, 'the womb,' and *ρῆγμα*, 'defluxion, rheumatism.' Rheumatism of the uterus.

**METRORRHÆXIS**, Uterus, rupture of the **METRORRHÆA**, from *μῆτρα*, 'the uterus,' and *ρῆω*, 'I flow.' A protracted discharge of any fluid from the uterus.

**METROSCIRRHUS**, *Hysteroscir'rhus*, *Scirrhus seu Carcinoma uteri*; from *μῆτρα*, 'the womb,' and *σκιρρος*, 'scirrhus.' Scirrhus of the uterus.

**METROSCOPE**, *Metrosco'pium*: from *μῆτρα*, 'the uterus,' and *σκοπέω*, 'to view.' An instrument, invented by M. Nauche, for listening to the sounds of the heart of the fetus in utero-gestation, when the sounds and movements are imperceptible through the parietes of the abdomen. The extremity of the instrument—the first notion of which was given to M. Nauche by the stethoscope of Laënnec—is introduced into the vagina and applied against the neck of the uterus.

**METROSTERE'SIS**, from *μῆτρα*, 'the uterus,' and *στερεσις*, 'privation.' Extirpation of the uterus. Want of uterus.

**METROTOMIA**, Cæsarean section.

**MEU**, *Æthusa meum*.

**MEULIÈRE**, Molar.

**MEUM**, *Æthusa meum*.

**MEURTEISSURE**, Contusion.

**MEVIUM**, Syphilis.

**MEZEA**, Genital organs.

**MEZEREON**, *Daphne mezereum*.

**MIAMMA**, Miasma.

**MIANSIS**, Miasma.

**MIARIA**, Miasma.

**MIASMA**, *Miasm*, *μιασμα*, 'a stain,' from *μιαίνω*, 'I contaminate;' *Miam'ma*, *Mion'is*, *Mia'ria*, *Mias'mus*, *Inguinomen'ium*, *Molyn'is*, *Contagium*. The word *miasm* has, by some, been employed synonymously with contagion. It is now used more definitely for any emanation, either from the bodies of the sick, or from animal and vegetable substances, or from the earth, especially in marshy districts, (*Marsh poison*, *Effluviu[m] palustrè*, *Gas palustrè*, (F.) *Intoxication des Marais*,) which may exert a morbid influence on those who are exposed to its action. To these terrestrial emanations—the *Koino-mias'mata* of Dr. E. Miller of New York—the Italians give the name *aria cattiva*, but, more commonly, *mala'ria*; a word which has been adopted into other languages. The deleterious effluvia, originating from the decomposition of matter derived from the human body, have been called by Dr. Miller, *Idiomias'mata*; the epithets *Koino* and *Idio* being derived respectively from *κοινος*, 'common,' and *ιδιος*, 'personal.' Of the miasms which arise either from the animal body or from the most unhealthy situations, we know, chymically, nothing. All that we do know is, that, under such circumstances, emanations take place, capable of causing disease in many of those who are exposed to their action.

**MIASMATIC**, *Miasmaticus*. Belonging or relating to miasmata. Sauvages, in his classification of diseases according to their etiology, has a class under the name *Morbi miasmaticos*. A fever that arises from marshy miasms, is styled *mala'ricus*, *paludal*, *Helopy'ra*, *Helopy'rus*, &c.

**MIASMUS**, *Miasma*.

**MICÆ PANIS**, see *Triticum*.

**MICATIO CORDIS**, *Systole*.

**MICHE-LIA CHAMPACA**, *Champaca*, *Mischelia Tsjampaca*. An Oriental tree, much prized for the odour and beauty of its flowers. The oily infusion of the flowers is employed in the Moluccas in headache.

**MICLE'TA**: A medicine used by Mease for arresting hæmorrhæge; probably, according to Siebenhaar, from the Arabic, *michsata*, "proved by experience."

**MICOSIS**, *Frambæsia*.

**MICRENCEPHALIUM**, *Cerebellum*.

**MICRENCEPHALUM**, *Cerebellum*.

**MICROCEPHALUS**, *Microcranius*, from *μικρος*, 'small,' and *κεφαλη*, 'head.' One who has a small head. A monster having a small imperfect head, or a small imperfect cranium.

**MICROCOSM**, *Microcosmus*, from *μικρος*, 'little,' and *κοσμος*, 'world.' A little world. Some philosophers have given this appellation to man, whom they consider as the epitome of all that is admirable in the world. The world they call *Macrococosm*.

**MICROCOSMETOR**, *Vital principle*.

**MICROCOSMICA MACHINA**. The organization of man.

**MICROCOSMIOGA SCIENTIA**, *Physiology*.

**MICROCOSMICUM SAL**, with the ancients meant the salts of the urine, — *Sal urinæ*.

**MICROCOSMOGRAPHIA**, *Physiology*.

**MICROCOST'IC**, *Microcosticus*, from *μικρος*, 'small,' and *ακουω*, 'I hear.' This word, as well as *Microphonus*, from *μικρος*, 'small,' and *φωνη*, 'voice,' means any thing that contributes to increase the intensity of sound—as the speaking trumpet—by collecting the sonorous rays.

**MICROCRANIUS**, *Microcephalus*.

**MICROGLOSSIA**, from *μικρος*, 'small,' and *γλωσση*, 'tongue.' Original smallness of tongue.

**MICROLEUCONYMPHÆA**, *Nymphæa alba*.

**MICROMELUS**, *Hemimelus*, from *μικρος*, 'small,' and *μελος*, 'a limb.' A monster having imperfectly developed extremities.

**MICROMMATUS**, *Microphthalmus*.

**MICROPHONOUS**, *Microcoustic*.

**MICROPHthalmus**, *Microphthalmus*, from *μικρος*, 'little,' and *οφθαλμος*, 'eye.' One who has small eyes. A monster with two small, or imperfectly developed eyes. A small eye, — *Ophthalmidium*, *Ophthalmium*.

**MICROPODIA**, *Micropus*.

**MICROPROSOPUS**, *Aprorosopus*; from *μικρος*, 'small,' and *προσωπον*, 'face.' A monster in which a part of the face is absent.

**MICROPUS**; from *μικρος*, 'small,' and *πους*, 'foot.' One who has small feet. The condition is called *Micropodia*.

**MICRORCHIDES**; from *μικρος*, 'small,' and *ορχις*, 'a testicle.' They who have very small testicles.

**MICROSCOPY**, *Microscopium*; from *μικρος*, 'small,' and *σκοπη*, 'a view.' Observation by the microscope; an important agency in the examination of the healthy and morbid tissues.

**MICROSPHYCTUS**, same etymon as the next. One who has a small pulse.

**MICROSPHYXTA**, from *μικρος*, and *σφυγμος*, 'pulse.' Smallness or weakness of pulse.

**MICROSTOMUS**; from *μικρος*, 'small,' and *στομα*, 'mouth.' One who has a small mouth.

**MICROTE'SIA**, *Par'tium organica'rum par'titas morbo'sa*; from *μικροτης*, 'smallness.' Morbid smallness of organic parts.

**MICROTRAPEZIA**, *Leptotrophia*.

**MICROTRICH'IA**; from *μικρος*, 'small,' and *τριχ*, 'hair.' Fineness or shortness of hair.

**MICROTROPHIA**, *Leptotrophia*.

**MICTIO**, *Micturition*—*m. Cruenta*, *Hæmaturia*—*m. Inopportuna*, *Eureasis*—*m. Involuntaria*, *Eureasis*—*m. Sanguinea*, *Hæmaturia*.

**MICTURIT'ION**, *Mictio*, *Mictus*, *Ure'sis*, *Uri'aris*, *Omich'sis*, from *micturio*, 'I make water.' The act of making water. Also, morbid frequency of passing the water.

**MICTUS**, *Micturition*—*m. Cruentus*, *Hæmaturia*.

**MIDRIFF**, *Diaphragm*.

**MIDWIFE**, from *μα*, 'with,' and *πις*, 'wife,' or, from *μβ*, 'meed,' 'recompense,' and *πις*, 'wife.' *Ma'ru'na*, *Obse't'ria*, *Hyper't'ria*, *Ma'a*, *Ma'a*, *Ma'u't'ria*, *Ac'e't'oris*, *Ac'e't'ris*, *Ac'e't'ria*, (F.) *Sage femme*, *Accouch'euse*. A female who practises obstetrics.

**MIDWIFERY**, *Obstetrics*.

**MIEL**, *Mel*—*m. d'Ac'it'ate de Cui'vre*, *Lini-mentum æruginis*—*m. Mercuriale compos'it*, *Mellitum de mercuriali compos'itum*.

**MIEUTER**, *Accoucheur*.

**MIGMA**, *Mistura*.

**MIGRAINE**, *Hemicrania*.

**MIGRANA**, *Hemicrania*.

**MIKANIA GUACO**, *Guaco*.

**MILFOIL**, *Achillea millefolium*.

**MILIAIRE**, *Miliary fever*.

**MILIARIA**, *Miliary fever*—*m. Sudans*, *Miliary fever*—*m. Sudatoria*, *Miliary fever*.

**MILIARIS SUDATORIA**, *Sudor anglicus*, *S. picardicus*.

**MILITARY (FEVER)**, *Emphy'sis milia'ria*, *Miliaria*, *M. sudans*, *Milia'ris*, *M. sudato'ria*, *Sudor*, *S. milia'ris*, *Pap'ula milia'ris*, *Fobris milia'ris*, *Ezanth'e'ma milia'ria*, *Syn'ochus milia'ria*, *Aspre'do milia'cea*, *Fobris essero'sa*, *F. punctula'ris*, *F. culicula'ris*, *F. vesicula'ris*, *F. lenticula'ris*, *Pur'pura purpera'rum*, *P. milia'ris*, *Fobris purpura'te rubra et alba milia'ris*, *Pap'ula sudo'ris*, *Millet-seed rash*, (F.) *Milicaire*, *Millet*, *Pourpre blanc*, *Millet*. It is so called from the eruption resembling the seed of the *miliun* or *millet*. Fever, accompanied by an eruption of small, red, isolated pimples, rarely confluent, but almost always very numerous, slightly raised above the skin, and presenting, at the end of 24 hours, a small vesicle filled with a white transparent fluid; which quickly dries up, and separates in the form of scales. Miliary fever is now rare, in consequence of the cooling practice in fevers and other states of the system. It is almost always brought on by external heat, and hence the prevention is obvious. The treatment is simple. It requires merely the antiphlogistic regimen, in ordinary cases.

**MILIARY GRANULATIONS OF TUBERCLES**, see *Granulation*.

**MILII SEMINA**, *Panicum Italicum*.

**MILIOIUM**. Diminutive of *miliun*, 'millet.' *Conchridion*. A small tumour on the eyelids, resembling, in size, a millet-seed.

**MILITARIS HERBA**, *Achillea millefolium*.

**MILIUM**, *Grutum*, *Panicum miliaceum*, see

Hydatid—m. Indicum, Panicum Italicum—m. Solis, Lithospermum officinale.

MILK, Sax. meolc, *Lac, Gala, Humor lac-  
teus, Latex ni'veus*, (F.) *Lait*. A fluid se-  
creted by the mammary glands of the females  
of the mammalia. The skimmed milk of *the  
cow*, (F.) *Lait de Vache*, contains water, caseous  
matter, traces of butter, sugar of milk, chloride  
of sodium, phosphate, and acetate of potass,  
lactic acid, lactate of iron, and earthy phos-  
phate. The *cream* is formed of butter, casein,  
and whey, in which there is sugar of milk and  
salts. Cow's milk is employed for the prepa-  
ration of cream, butter, cheese, whey, sugar of  
milk, and frangipane. It is useful in a number  
of cases of poisoning; either by acting as a de-  
mulent, or by decomposing certain poisons,  
or by combining with others so as to neutralize  
them. It is constantly employed as aliment,  
and may be regarded as an emulsion in which  
butter and casein are found in suspension.  
When taken into the stomach, it is coagulated  
by the gastric fluids, and the coagulum is di-  
gested like any other solid. The watery parts  
are absorbed.

Between milk, flour, and blood, there is great  
similarity of composition. The following table  
is given by Dr. Robert Dundas Thomson:

<i>Milk.</i>	<i>Flour.</i>	<i>Blood.</i>
Curd or Casein,	Fibrin,	Fibrin,
	Albumen,	Albumen,
	Casein,	Casein,
	Gluten.	Colouring matter.
Butter, . . .	Oil.	Fat.
Sugar, . . .	Sugar, Starch.	Sugar.
Chloride of potassium, sodium, Phosphate of soda, lime, magnesia, iron,	Do.	Do.

From a considerable number of experiments,  
Messrs. Deyeux and Parmentier class the six  
kinds of milk, which they examined, according  
to the following table, as regards the relative  
quantity of materials they contain.

<i>Casein.</i>	<i>Butter.</i>	<i>Sugar of Milk.</i>	<i>Serum.</i>
Goat	Sheep	Woman	Ass
Sheep	Cow	Ass	Woman
Cow	Goat	Mare	Mare
Ass	Woman	Cow	Cow
Woman	Ass	Goat	Goat
Mare	Mare	Sheep	Sheep

MILK, ALMOND, Emulsio amygdalæ.

MILK, ASSES', (F.) *Lait d'Anesse*, considera-  
bly resembles human milk, of which it has the  
consistence, smell, and taste: but it contains a  
little less cream, and more soft, caseous matter.  
It is often used by those labouring under pul-  
monary affections.

MILK, EWES', (F.) *Lait de Brebis*. It affords  
more cream than cows' milk; but the butter is  
softer. The caseum, on the contrary, is fatter,  
and more viscid. It contains less serum than

cows' milk. The Roquefort cheeses are made  
from it.

MILK GLASS, Breast glass.

MILK, GOATS', (F.) *Lait de Chèvre*, resembles  
cows' milk: the butyraceous matter, however,  
which enters into its composition, is more solid  
than that of the cow.

MILK, HUMAN, (F.) *Lait de femme*,—contains  
more sugar, milk, and cream, and less caseum,  
than cows' milk. Its composition differs ac-  
cording to the distance of time from delivery.

MILK KNOT, *Galacto-ganglion*; (F.) *Gan-  
gion laitouz*. The knots often observed in the  
breast after inflammation of the organ, or for  
some time after the suppression of the secre-  
tion. They generally end by resolution.

MILK, MALES', Sperm.

MILK, MARES', (F.) *Lait de Jument*,—con-  
tains only a small quantity of fluid butyraceous  
matter; a little caseum, softer than that of cows'  
milk, and more serum.

MILK SCALE, Porrigo larvalis.

MILK SICKNESS, *Stiek stomach, Swamp sick-  
ness, Tires, Slows, Stiff joints, Puking fever,  
River sickness*. A disease occasionally ob-  
served in the states of Alabama, Indiana, and  
Kentucky, which affects both man and cattle,  
but chiefly the latter. It is attributed in cattle  
to something eaten or drunk by them; and in  
man to the eating of the flesh of animals la-  
bouring under the disease. Owing to the trem-  
ors that characterize it in animals, it is called  
the *Trembles*.

The symptoms of the disease are such as are  
produced by the acro-narcotic class of poisons  
—vomiting, purging, extreme nervous agita-  
tion, &c.: and the approved indications of treat-  
ment appear to be—gentle emetics and laxa-  
tives, with quiet and mucilaginous drinks.

MILK, SNAKES', Euphorbia corollata—m.  
Spots, Strophulus—m. Stone, Morochthus—m.  
Sugar of, Sugar of milk—m. of Sulphur, Sulphur  
precipitatum—m. Sweet, Galium verum—m.  
Teeth, see Dentition—m. Vetch, Astragalus  
verus—m. Vetch, stemless, Astragalus exscapus  
—m. Weed, Apocynum androsæmifolium, A-  
clepias Syriaca, Euphorbia corollata—m. Wort,  
bitter, Polygala amara—m. Wort, common,  
Polygala—m. Wort, dwarf, Polygala paucifolia  
—m. Wort, rattlesnake, Polygala.

MILKY, Lactic.

MILL MOUNTAIN, Linum catharticum.

MILLEFEUILLE, Achillea millefolium.

MILLEFOLIUM, Achillea millefolium.

MILLEMORBIA SCROPHULARIA, Scro-  
phularia nodosa.

MILLEPEDES, Onisci aselli.

MILLEPERTUIS ORDINAIRE, Hype-  
ricum perforatum.

MILLET, Aphtæ, Miliary fever—m. Bar-  
badoes, Panicum Italicum—m. Common, Pani-  
cum miliaceum—m. Indian, Panicum Italicum  
—m. *des Oiseaux*, Panicum Italicum—m. *Ordi-  
naire*, Panicum miliaceum.

MILLET-SEED RASH, Miliary fever.

MILGRAMME, from *mille*, 'a thousand,'  
and *γρᾶμμα*, 'a gramme.' The thousandth part  
of a gramme;—about 0.0154 Troy grain.

MILLIGRANA, Herniaria glabra.

MILLIMETRE, from *mille*, 'a thousand,'  
and *μετρον*, 'measure.' The thousandth part  
of the metre;—equal to 0.03937 English inch,  
or about two-fifths of a line.

**MILLOT**, Miliary fever.  
**MILPHÆ**, Madarosis.  
**MILPHOSIS**, Madarosis.  
**MILT-LIKE TUMOUR**, Encephaloid.  
**MILTUS**, Plumbi oxydum rubrum.  
**MILTWASTE**, Asplenium.  
**MIMOSA NILOTICA**, see *Acaciæ gummi*  
 —m. Scandens, Cachang-parang—m. Senegal,  
 see Senegal, gum.

**MIND, ABSENCE OF**, Aphexia socors—  
 m. Abstraction of, Aphexia intenta—m. Un-  
 sound, Insanity.

**MINERALIUM**, Antimonium.  
**MINER'S ELBOW**. An enlargement of a  
 bursa over the olecranon, occurring in such as  
 are in the habit of leaning much upon it; and,  
 therefore, often seen in those who work on the  
 side in low-roofed mines.

**MINIMUM**, a *minimus*, 'the least part or  
 portion.' The 60th part of a fluidrachm. This  
 measure has been introduced by the London  
 College of Physicians, in consequence of the  
 uncertainty of the size of the drop, (see Gutta.)  
 The subdivision of the wine pint has, accord-  
 ingly, been extended to the 60th part of the  
 fluidrachm; and glass measures, called "minim-  
 measures," have been adopted by the London  
 College. The proportion between the minims  
 and the drops of various fluid preparations is  
 exhibited in the following table. The results  
 were obtained by Mr. Durand, a skilful *phar-*  
*maciæ*, of Philadelphia, under circumstances as  
 regards the different articles, as nearly identi-  
 cal as possible.

TABLE OF THE NUMBER OF DROPS OF DIFFERENT  
 LIQUIDS EQUIVALENT TO A FLUIDRACHM.

	Drops.
Acid Acetic, Crystallizable, -	120
Acid Hydrocyanic (Medicinal), -	45
— Muriatic, - - - - -	54
— Nitric, - - - - -	84
— ——— diluted (1 to 7,) - - -	51
— Sulphuric, - - - - -	90
— ——— aromatic, - - - - -	120
— ——— diluted (1 to 7,) - - -	51
Alcohol (rectified Spirit), - - -	138
Alcohol, diluted (proof Spirit), -	120
Arsenite of Potassa, solution of, -	57
Ether, Sulphuric, - - - - -	150
Oils of Aniseed, Cinnamon, Cloves, Pepper- mint, Sweet Almonds, Olives, -	120
Tinctures of Asafetida, Foxglove, Guaiac, Opium, - - - - -	120
Tincture of Chloride of Iron, - - -	132
Vinegar, distilled, - - - - -	78
— of Colchicum, - - - - -	78
— of Opium (black drop,) - - -	78
— of Squill, - - - - -	78
Water, distilled, - - - - -	45
Water of Ammonia (strong,) - - -	54
Do. do. (weak,) - - - - -	45
Wine (Teneriffe,) - - - - -	78
— Antimonial, - - - - -	72
— of Colchicum, - - - - -	75
— of Opium, - - - - -	78

**MINISTER GYMNASTÆ**, Pædotribes.  
**MINITHOSIS**, Meiosis.  
**MINIUM**, Plumbi oxydum rubrum—m.  
 Græcorum, Hydrargyri sulphuretum rubrum—  
 m. Purum, Hydrargyri sulphuretum rubrum.  
**MINORATIVUS**, Laxative.  
**MINT, COCK**, Tanacetum balsamita—m.

Curled, *Mentha crispæ*—m. Cat, *Nepeta*—m.  
 Horse, *Monarda coccinea* and *M. punctata*—m.  
 Horse, sweet, *Cunila Mariana*—m. Hyssop-  
 leaved, *Mentha cervina*—m. Mountain, *Monarda*  
*coccinea*—m. Pepper, *Mentha piperita*—m.  
 Spear, *Mentha viridis*—m. Squaw, *Hedeoma*—  
 m. Stone, *Cunila Mariana*—m. Water, *Mentha*  
*aquatica*.

**MINUTHEISIS**, Meiosis.  
**MINYANTHES**, Menyanthes.  
**MIOSIS**, Meiosis.  
**MIROCELE**, Merocele.  
**MISADIR**, Ammonia murias.  
**MISANTHROPIA**, *Misanthroppy*, *Ezan-*  
*thro'pia*, *Phyganthro'pia*, from *μισος*, 'hatred,'  
 and *ανθρωπος*, 'man.' Aversion to man and  
 society;—a symptom of melancholy, and hypo-  
 chondriasis.

**MISCARRIAGE**, Abortion.  
**MISERERE MEI**, Ileus.  
**MISHME TEETA**, *Coptis teeta*.  
**MISMAR**, *Mosemar*. A name given by Avi-  
 cenna to a kind of nodus, which forms on the  
 toes as the sequel of contusion or inflammation  
 of those parts.

**MISOPTOCHUS**, from *μισος*, 'hatred,' and  
*πτωχος*, 'poor.' That which has hatred for the  
 poor. The gout has been so called by some,  
 because it commonly affects the rich.

**MISSADAN**, Hydrargyrum.  
**MISSIO SANGUINIS**, Bloodletting.  
**MISTIO**, Mistura.

**MIST'LETOE**, *Viscum album*.  
**MISTURA**, *Migma*, *Mis'tio*, *Miz'tio*, *Miz-*  
*tu'ra*, a mixture; from *miscro*, *mixtum*, 'to  
 mix.' A mingled compound, in which differ-  
 ent ingredients are contained in the fluid state;  
 suspended or not by means of mucilaginous or  
 saccharine matter. In this sense, it is synony-  
 mous with the French *Potion*. In France,  
 however, the word *mixture* is more frequently  
 understood to mean a liquid medicine, which  
 contains very active substances, and can only  
 be administered by drops. A mixture, in other  
 words, in the French sense, may be regarded  
 as a *potion* deprived of watery vehicle.

**MISTURA**, (S.) A fragrant yellow-coloured  
 water, used as a perfume by the ladies of Peru.  
 It is prepared from gillyflower, jasmine, and  
*Stor de mistela* (*Talinum umbellatum*). See  
*Campomanesia lineatifolia*.

**MISTURA AC'IDI HYDROCYANICI**, *Mixture of*  
*Prussic acid*, *Mélange pectoral* (Magendie.)  
 (Medicinal prussic acid, 1 drachm, distilled  
 water, ℥i4, pure sugar, ℥iiss.) A dessert  
 spoonful every morning and evening, as a  
 pectoral, &c.

**MISTURA AMMONIACI**, *Lac ammoniaci*, *Mia-*  
*ture of ammoniac*. (*Ammoniac*, ℥ij. *aque* Oss.  
 Rub the ammoniacum: adding the water gradu-  
 ally until they are perfectly mixed.) Dose,  
 f. ℥ss to ℥j.

**MISTURA AMYGDALÆ**, *Emulsio amygdalæ*.  
**MISTURA ASAFETIDÆ**, *Lac asafetidæ*, *Emul-*  
*sio antihysterica*, *Mixture of asafetida*, (F.)  
*Lait d'asafetida*. (*Asafetidæ* ℥ij. *aque* Oss.  
 Rub together, adding the water by degrees.)  
 Used where pills cannot be swallowed, and as  
 a glyster in irritations during dentition, and in  
 ascariæ. Dose, f. ℥ss, to f. ℥iiss.

**MISTURA ASAFETIDÆ PRO CLYSMATE**, *Enema*  
*fœtidum*.

**MISTURA CAMPHORÆ**, *Aqua camphoræ* (Ph.

U. S.), *Camphor mixture, Camphor Julep, Mistura camphorata, Julepium s. camphorâ seu camphoratum*, (F.) *Julep camphré*. (Camphor ʒss; rectified spirit, 10 minims, water, a pint. Rub the camphor and spirit; add the water and filter.) Virtues like those of camphor. See Emulsio camphoræ.

MISTURA CORNU USTI, *Decoctum cornu cervini, Decoction album, Decoction of burnt hartshorn, Mixture of burnt hartshorn*. (Cornuum ust. ʒij, acaciæ gum. cont. ʒj, aquæ Oijj. Boil to Oij, constantly stirring and strain. Ph. L.)

MISTURA CRETÆ, *Potio carbonatis calcis, Mistura cretæ caea, Mucilago cretica, Chalk mixture, Cretaceous mixture*, (F.) *Misture de Craie*. (Cretæ pp. ʒss, sacchar., acaciæ gum. in pulv. ʒiij, aqua cinnam., aqua, ʒi f. ʒiv. Mix. Ph. U. S.) Antacid and absorbent. Dose, f. ʒj to f. ʒij.

MISTURA DIABOLICA. A mixture under this name is kept in military hospitals for malingers. It is made of sundry nauseous ingredients, as aloes, asafoetida, castor, &c., and is given so as to keep up a disagreeable impression on the gustatory nerves.

MISTURA EMETICÆ VOMITORIA, *Emetic Mixture of emetine*. (Emetine 4 gr., orange-flower water ʒij, syrup, ʒss, M.) A dessert spoonful every half hour till it acts.

MISTURA FERRI COMPOSITA, *Compound mixture of iron*, (F.) *Mixture de fer composée, Griffith's mixture*. (Myrrh cont. ʒj, potassæ carb. gr. xxv, aqua rosæ f. ʒviiss, ferri sulph. cont. ʒj, sp. lavand. ʒss, sacchar. ʒj. Rub together the myrrh, subcarbonate of potass, and sugar; then add, while triturating, the rose-water, spirit of nutmeg; and, lastly, the sulphate of iron. Pour the mixture directly into a glass bottle, and stop it close. Ph. U. S.) It is tonic and emmenagogue, and is useful wherever iron is indicated.

MISTURA GUAIACI, *Mixture of guaiac, Lac guaiaci, Emulsio guaiacina, Mistura guaiaci gummosa, M. gummi guaiaci Bergeri, Solutio guaiaci gummosa, S. resina guaiaci aquosa*, (F.) *Mixture de Gayac*. (Guaiac. g. resin. ʒiiss, sacch. pur. ʒij, muc. acaciæ gum. ʒij, ag. cinnam. f. ʒviij. Rub the guaiacum with the sugar; then with the mucilage. Add, gradually, the cinnamon water. Ph. L.) Dose, f. ʒss to f. ʒij.

MISTURA GUMMI GUAIACI BERGERI, *Mistura Guaiaci*—m. Leniers, Looch ex ovo.

MISTURA MOSCHI, *Musk mixture, Mistura moschata*. (Moschi, acaciæ gum. contus., sacch. purif., sing. ʒj, ag. rosæ f. ʒvj. Rub the musk with the sugar; add the gum, and, by degrees, the rose-water. Ph. L.) Dose, f. ʒss to f. ʒij.

MISTURA STRYCHNIE, *Mixture of strychnia*. (Distilled water, ʒij, very pure strychnia, 1 gr., white sugar ʒij, M.) Dose, a dessert spoonful.

MISTURA SULFURICO-ACIDA, *Elixir acidum Halleri*—m. Vulveneria acida, *Arquebusade, Eau d.'*

MITELLA, Sling.

MITHRIDATE, *Mithridatum, Mithridaticum medicamentum, Antidotum Mithridaticum, Diascinci antidotus, Confectio Damocreatis*. A very famous electuary, into which entered—Myrrh of Arabia, Saffron, Agaric, Gin-

ger, Cinnamon, Frankincense, Garlic, Mustard, Birthwort, Galbanum, Castor, Long pepper, Opoponax, Bdellium, Gum Arabic, Opium, Gentian, Orris, Sagapenum, Valerian, Acacia, Hypericum, Canary wine, Honey, &c. It was invented by Mithridates, king of Pontus and Bithynia, and was formerly regarded as alexipharmic. It is little used at the present day; and, from its heterogeneous nature, should be wholly abandoned.

MITHRIDATICUM MEDICAMENTUM, Mithridate.

MITIGANS, Lensitive.

MITRA HIPPOCRATICA, *Bonnet d'Hippocrate*.

MITRAL, *Mitralis*. Having the form of a mitre; resembling a bishop's mitre.

MITRAL VALVES, *Valvula mitralis, V. Cordæ mitralis, V. episcopalis, V. bicuspidalis*. Two triangular valves at the opening of communication between the left auricle of the heart and the corresponding ventricle. These valves are formed by the inner membrane of the left cavities of the heart; and are retained on the side of the ventricle by tendinous cords, proceeding from the columnæ carneæ. They form a species of valve, which permit the blood to pass from the auricle into the ventricle and oppose its return.

MITRIUM, Sling.

MITTE (F.), *Effluvium Latrinarium*. An emanation exhaled from privies, which strongly irritates the eyes. It consists of ammonia, united to the carbonic and hydro-sulphuric acids.

MIUAMARU, see Arrow poison.

MIXIS, Coition.

MIXTIO, Mistura.

MIXTURA, Mistura.

MIXTURE, *Mistura*—m. of Ammoniac, *Mistura ammoniaci*—m. of Asafoetida, *Mistura asafoetidæ*—m. Calmants, Looch ex ovo—m. Camphor, *Mistura camphoræ*—m. Chalk, *Mistura cretæ*—m. de Craie, *Mistura cretæ*—m. Cretaceous, *Mistura cretæ*—m. of Emetine, emetic, *Mistura emetinis vomitoria*—m. de Fer composée, *Mistura ferri composita*—m. de Gayac, *Mistura Guaiaci*—m. Griffith's, *Mistura ferri composita*—m. of Guaiac, *Mistura Guaiaci*—m. of Hartshorn, burnt, *Mistura cornu usti*—m. of Irea, compound, *Mistura ferri composita*.

MIXTURE, HOPE'S. A mixture recommended by Mr. Hope, in diarrhœa and dysentery. It is essentially a nitrate of morphia. Although the proposer employed the acidum nitrosum of the Edinburgh Pharmacopœia, nitric acid is generally used. (Acid. nitros. f. ʒj; Aquæ camphor. f. ʒviij; Tinct. opii gr. xl. M.) Dose, a fourth part every three or four hours.

MIXTURE, MUSK, *Mistura moschi*—m. Neutral, Liqueur potassæ citratis—m. of Prussic acid, *Mistura acidi hydrocyanici*.

MIXTURE, SCUDAMORE'S. A mixture recommended by Sir C. Scudamore in gouty and rheumatic affections, and much prescribed in the United States. *Magnes. sulph.* ʒj—ʒij; *Aquæ menthae* f. ʒx; *Aceti colchic.* f. ʒj—f. ʒiiss; *Syrup croci* f. ʒj; *Magnes.* ʒviij. M. Dose, one, two, or three table-spoonfuls, repeated every two hours in a paroxysm of gout, until from four to six evacuations are produced in the twenty-four hours.

MIXTURE OF STRYCHNIA, *Mistura strychniæ*.

**MNEME, Memory.**

**MNEME CEPHALICUM BALSAMUM.** A very compound medicine, into which entered *Balm, Lily, Rosemary, Lavender, Borage, Broom, Roses, Violet, Saffron, Thyme, Storax, Galbanum, &c.*

**MNEMONEU TICE, Mnemonics.**

**MNEMONICS, Mnemon'ic, Mnemoneu'tic,** from *μνημα*, 'I recollect.' The art of aiding the memory by signs; and of forming, in some sort, an artificial memory.

**MOANING, from Sax. mannan, 'to grieve.'** *Respiratio luctuosa, Mycthis'mos.* A plaintive respiration, in which the patient utters audible groans.

**MOBILE, see Saint Augustine.**

**MOBILITY, Mobil'itas, from mobilis, contraction of movibilis, 'that can be moved.'** The power of being moved. In *physiology*, great nervous susceptibility, often joined to a disposition to convulsion. Greatly developed excitability.

**MOCASIN FLOWER, Cypripedium luteum.**

**MOCH'LIA.** Reduction of a luxated bone; from *μοχος*, a lever.

**MOCHLICUS, Purgative.**

**MOCHLISCUS, Lever.**

**MOCHLUS, Lever.**

**MOCHTHUS, Agony.**

**MOCK-KNEES, Crusta genu equina.**

**MODELLING PROCESS.** A term proposed by Dr. Macartney, of Dublin, to signify the mode in which wounds are healed without inflammation or suppuration; by a deposit of plastic matter from the surface of the wound, by which the gap is more rapidly filled,—portion being laid upon portion, without waste, after the manner of clay in the hands of the sculptor:—hence the term.

**MODIOLUS, 'the nave of a wheel.'** *Pyramis seu axis cochleae.* A hollow cone in the cochlea of the ear, forming a nucleus, axis, or central pillar, round which the gyri of the cochlea pass. The modiolus forms the inner and larger portion of the central pillar, and is the cavity seen at the bottom of the meatus auditorius internus. It lodges a branch of the auditory nerve. The central portion of the modiolus contains a number of minute canals, and is called in consequence *Tractus spiralis foraminulosus.* Into these the nerves of the cochlea enter, and pass out at right angles between the bony plates forming the *zona ossea* of the lamina spiralis, to be expanded on the membranous portion of the lamina.

**MODIOLUS, Mas,** also means the crown of the trepan.

**MODIUS.** A dry measure, the third of an amphora, equal to the bushel.—Varro.

**MODUS OPERAN'DI, 'mode of operating.'** This term is applied to the general principles upon which remedies act in morbid states of the body;—a subject of much interest, although involved in considerable obscurity.

The following classification will convey some idea of the ways in which different organs may be excited into action.

1. By actual or immediate contact of the remedy, and by absorption or mediate contact.
2. By an impulse conveyed by the nerves, through an impression made on the stomach or elsewhere.
3. By contiguous or continuous sympathy, or by that which is excited by mere proximity or continuity of parts.

**MOËLLE, Marrow—m. Allongée, Medulla oblongata—m. Epinière, Medulla spinalis—m. Vertébrale, Medulla spinalis.**

**MENIA DENTIUM, Alveoli dentium.**

**MEROR, Athymia.**

**MOFFETTE, see Mephitism.**

**MOFFAT, MINERAL WATERS OF.** Moffat is a village situate about 56 miles S. W. of Edinburgh. The water is a cold sulphureous: containing, in a wine gallon, 36 grains of chloride of sodium, 5 cubic inches of carbonic gas, 4 of azote, and 10 of sulphohydric acid. It resembles Harrogate water in its properties.

A strong chalybeate spring was discovered there about the year 1828, which contains sesquisulphate of peroxide of iron, sulphate of alumina, and uncombined sulphuric acid.

**MOGIL'IA, Paral'ia, from μοιρα, 'with difficulty,' and λαω, 'to speak.'** This word is inaccurately written by Paul Zacchias,—*Mola'ia*, and *Mollia'ia.* Difficult or defective articulation. Impediment of speech. See *Balbuties.*

**MOGOSTOCIA, Dystocia, Laborious labour.**

**MOGUS, Agony.**

**MOHAWK TASSEL, Eupatorium purpureum.**

**MOIS, Menses.**

**MOISTURE, Mador, (F.) Moteur, anciently moisteur.** Simple humidity of the skin. The skin is said to be moist or in a state of moisture, when there is slight perspiration.

**MOÏTEUR, Moisture.**

**MOLA, Maxillary bone, Molar tooth, Mole, Patella.**

**MOLAGOCODI, Piper nigrum.**

**MOLAIRE, Molar.**

**MOLALIA, Mogil'ia.**

**MOLAR, Molaris, Mylicus, (F.) Molaire, Meulière.** That which bruises or grinds; from *molaris, 'a grindstone,' or mola, 'a millstone.'*

**MOLAR GLANDS.** Two small bodies formed by a collection of mucous crypts; seated in the substance of the cheeks, between the masseter and buccinator muscles, and whose excretory ducts open into the mouth opposite the last molar tooth.

**MOLAR TEETH, Grinders, Jaw Teeth, Mola'res permanentes dentes, Dentes molares seu maxilla'res seu gom'phii seu clavales, Mola, Gomphioi, Mylactri, Mylodontes, Mylodi, Nomis'ci, (F.) Dentes molares ou mâchelières,** occupy the farther part of each alveolar arch. Their corons are broader than they are high: unequal, tuberculated; and the roots are more or less subdivided. They are 20 in number, 10 in each jaw. The first two pairs of molar teeth, in each jaw, have been called *lesser molares* or *bicuspid, Dentes bicuspida'ti.* The corons have two tubercles; the outer being more prominent and larger than the inner. The root is commonly simple; sometimes bifurcated. The other three pairs have been termed, *Great molares—Dents multicuspidés* (Ch.) Their corons are cubical, rounded, and have, at the upper surface, four or five tubercles, separated by deep furrows. The root is divided into two, three, four, and five *fungs*, which are more or less curved. The third great molaris appears a long time after the others; and hence, has been called *Dens sapientie* or *Wisdom tooth*:

**MOLASSES, Melasses.**

**MOLE, Mola**, from *moleo*, 'mass.' *Myll*, *Zephyrus fetus*, *Geramen fulcrum*, *Pseudocypsis molaris*, *Graviditas molaris*. A fleshy, insensible, at times, soft—at others, hard—mass; of variable and determinate size, which forms in the uterus, and is slightly united by vessels to that organ; from which its feeble vitality is derived. It has been conceived by some to be always owing to the imperfect conception; but moles may form in the undoubted virgin. They seem to be owing to a morbid process; and certainly are generally connected with conception. At times, they contain parts of the fetus; but commonly do not. At very different periods, in different women, the diseased mass is expelled from the uterus, with ordinary symptoms of abortion; and the case requires similar management. See, also, *Nævus* and *Conception*, (false.)

**MOLE PLANT, Euphorbia lathyris.**

**MOLECULAR, Molecula'ris**. Of or belonging to molecules or minute portions of any thing. Hence *molecular* death, in contradistinction to *somatic* death.

**MOLÉCULE, Molec'ula, Mass'ula**; diminutive of *Moles*, 'a mass.' A minute portion of any body. Also, the *cicatric'ula, mac'ula, gillatu'ra, tread of the cook*, or embryo part of the impregnated ovum, observable by the microscope before the ovum has left the ovarium of the hen. It lies under the epidermic coats of the yolk, and upon its proper coat. If the ovum, according to Valentin, be lacerated and its contents minutely examined, the cicatricula is found like a grayish white disk, which in its whole periphery is dense, granulous, and opaque, but in the centre presents a clear nongranulous and perfectly diaphanous point. Purkinje found, that when he removed the dark granulous mass by suction with a small tube, there remained a perfectly transparent vesicle filled with a pellucid lymph, which had a decidedly spherical form, but being extremely delicate, was easily lacerable, and then its fluid escaped. As he found this, which later naturalists have named—after its discoverer—the *Purkin'jean vesicle*, in the ova of the ovary, but could not see it in ova, which had already entered the oviduct, he gave it the name *germinal vesicle, vesic'ula prolifera* seu *germinati'va*. Besides a perfectly colourless fluid, this contains one or more dark corpuscles, which appear as a nucleus through the including membrane in the shape of opaque spots—the *germinal spot, mac'ula germinati'va* seu *germinans, nucleus germinati'vus*. The granulous membrane—its thickened portion, the so called "cicatricula,"—and the germinal vesicle, constitute those parts of the ovum which pass immediately into the original foundation of the embryo, the *blastoderma* or *germinal membrane, vesic'ula blastodermat'ica*.

**MOLÈNE, Verbascum nigrum.**

**MOLES GANGLIFORMIS, Ganglion** of Gasser.

**MOLIBDUS, Plumbum.****MOLILALIA, Mogilalia.****MOLIMEN, from molior, 'to move or stir.'**

'An attempt to struggle.' Hence,—

**MOLIMEN HÆMORRHAGÆTICUM.** The hemorrhagic diathesis or impulsion.

**MOLIMEN HÆMORRHODALÆ.** The hemorrhoidal diathesis or impulsion. See *Hæmorrhoids*.

**MOLIMEN MENSTRUALÆ.** The menstrual diathesis or impulsion.

**MOLIMEN NATURÆ SALUTARIUM, Instinct.**

**MOLLESCENCE, Mollities.**

**MOLLET, Sura.**

**MOLLIPUFFS, Lycoperdon.**

**MOLLIS MATER, Pia mater.**

**MOLLIT'IES, Mollis'cencia, Malacia'mus, Mollit'ia, Mollitudo, Emollities, Emollities morbo'sa, Mollitudo, Malax'is, Malaco'is, Malthax'is, (F.) Ramollissement; (G.) Malakien (Fuchs); from mollis, 'soft.' Preternatural softness of an organ or part of an organ.**

**MOLLITIES CEREBRI, Malaco'is Cer'ebri, Encephalomalacia, Encephalomalax'is, Necrocephalus (W. Farr), Cer'ebromalacia, Encephalosp'is, Mollascence, or softening, or a kind of liquefaction, of the cerebral substance; the remainder preserving its ordinary consistency. (F.) Ramollissement du cerveau.** The neurine often contains small clots of blood, giving rise to what has been termed *Apoplezie capillaire*, (Cruveilhier.) The symptoms denoting it are equivocal.

**MOLLITIES CORDIS, Cardiomalacia.**

**MOLLITIES MEDULÆ SPINALIS, Myelomalacia, (F.) Ramollissement de la Moëlle Epinière.** Softening of the spinal marrow.

**MOLLITIES OS'SIUM, Malaco'osto'is, Malaco'steon, Emollit'ies os'sium, Paros'ia flex'ilis, Osteomalaco'is, Rachit'is seu Rachit'is adultorum, Spina vento'sa (of some), Osteomalacia, Softening of the bones, (F.) Osteomalacia, Osteomalacia, Osteomalakia, Ramollissement des os.** A rare affection in which the bones are deprived of their salts, particularly of the phosphate of lime, and consist only, or mainly, of gelatin; hence they acquire a degree of suppleness which renders them unfit for the performance of their functions. The disease generally affects all the bones; but it is especially remarkable during life in the long bones, which assume any curvature that may be wished. Very violent pain is often experienced in them; and the urine frequently contains an enormous proportion of calcareous phosphate. The patient is compelled to remain in the horizontal posture; the bones no longer being fixed points for the muscles to act upon. The disease has, hitherto, always terminated fatally, and dissection has exhibited the gelatinous nature of the bones; which, by desiccation, have become transparent, as if they had been macerated in acid.

Experience has afforded no means of relief in this dreadful affliction. The alkaline salts, earthy phosphates, &c. are of little or no use.

**MOLLITIO, Mollities.**

**MOLLITUDO, Mollities.**

**MOLLUSCUM, Athero'ma.** A cutaneous affection, so called in consequence of its resemblance to certain molluscous animals. It consists of numerous tumours, varying in size from that of a pea to that of a pigeon's egg, filled with an atheromatous matter, which are developed in the substance of the derma, and are of various shapes, some having a large base,—others adherent by means of a pedicle.

*Molluscum contagiosum*, a singular variety, is characterized by the presence of hard, round, tubercles, which are smooth and transparent, and when pressed, pour out from an orifice in their summits a little opaque or milky fluid.

The disease is probably seated in the sebaceous follicles.

If internal treatment be adopted at all, it must consist of eutrophics, as arsenic, iodine, &c. The external treatment consists in the employment of measures calculated to excite the tubercles to inflammation, as by touching them with potassa.

MOLOCHE, *Malva rotundifolia*.

MOLOPES, *Vibices*.

MOLYBDÆNUM MAGNESII, Manganese, black oxide of.

MOLYBDOS, *Plumbum*.

MOLYBOSIS, Lead-poisoning.

MOLYNE, *Anus*.

MOLYNSIS, *Miasma*.

MOMIE, *Mummy*.

MOMIN, *Mamei*.

MOMISCI, *Molar teeth*.

MOMOR'DICA BALSAMINA, *Balsamina*, *Balm-apple*, *Balsam apple*, (F.) *Balsamina*, *Pomme de mercurille*. The fruit of this oriental tree, *Pomum mirabile seu hicrosolymitanum*, was formerly considered vulnerary.

MOMOR'DICA ELATERIUM, *Elaterium*, *Echobium Elaterium*, *Oxycumis agrastis*, *C. asiaticum*, *C. sylvestris*, *Elaterium officinarum*, *Charantia*, *Boudalios*, *Guaverba erba*, *Wild or Squinting cucumber*, *Echobium elaterium*, (F.) *Concombre Sauvage*, *Momordique*. *Nat. Order*, Cucurbitaceæ. The dried sediment from the juice is the elaterium of the shops. (See *Extractum Elaterii*.) It is a most powerful cathartic, and, as such, has been used in dropsies. Its active principle is the *Elatin*, *Elaterine* or *Elaterium*. Dose, gr.  $\frac{1}{4}$  to gr. j. until it operates.

MOMORDIQUE, *Momordica elaterium*.

MONAD, from *Monas*, 'unity.' A simple particle, or atom, or unit.—Leibnitz. The smallest of all visible animalcules. A primary cell or germ.

MONÆ, *Nates*.

MONAR'DA COCCINEA, *Scarlet Rose balm*, *Mountain mint*, *Oswego Tea*, *Mountain Balm*, *Horsensint*, *Square stalk*, *Red Balm*; a beautiful indigenous plant, having the excitant properties of *monarda punctata*.

MONAR'DA FISTULOSA, *The Purple monarda*. The leaves have a fragrant smell; and an aromatic, somewhat bitter taste. They are reputed to be nervine, stomachic, and deobstruent.

MONAR'DA PUNCTATA, *Horsensint*. *Sex. Syst.* *Diandria Monogynia*. *Nat. Ord.* *Labiata*. Indigenous in the United States. Stimulant and carminative. The *Oleum monardæ* is officinal in the United States.

MONARDA PURPLE, *M. fistulosa*.

MONDER (F.), from *mundus*, 'cleanly.' To render clean or pure. In *Pharmacy*, it means to separate any substance from its impure or useless portion. In *surgery*, *monder* ou *mondir une plaie*, is to clean or deterge a wound.

MONDIFICATIFS, *Detergents*.

MONDIFIER UNE PLAIE, see *Monder*.

MONEMERON, *Monoëmeron*, *Monohëmeron*; from *μονος*, 'one,' and *ἡμέρα*, 'a day.' A name given to several collyria, which were supposed to be capable of curing diseases of the eyes in a day.

MONENTERUM, *Colon*.

MONESIA. A vegetable extract imported

into Europe from South America, in hard, thick cakes. It is prepared from the bark of a tree, whose botanical name is unknown. It is very friable, and its fracture very much resembles that of a well-torrefied cocoanut. It is wholly soluble in water; and its taste—which is at first sweet like liquorice, sometimes becomes astringent. It is on account of its astringent properties that it has been prescribed in chronic bronchitis, hæmoptysis, diarrhœa, hæmorrhœa, uterine hemorrhage, &c. It has been applied locally, in the form of ointment, (*Mones. p. 1, Adipsa*, p. vij.) The dose of *Monesia* is from 12 to 40 grains a day.

MONEYWORT, *Lysimachia nummularia*.

MONGO'LIAN. Anthropologists give the name *Mongolian race* to a variety of the human species, spread over a great part of the north of Asia, in China, India, Thibet, the Moluccas, &c. The individuals composing it have the skin of a brown red, forehead flat, nose broad, cheeks prominent, and lips large. See *Homo*.

MONKSHOOD, *Aconitum*—m. Common, *Aconitum napellus*—m. Salutory, *Aconitum anthora*.

MONNINA POLYSTACHIA. A beautiful South American plant. *Nat. Ord.* *Polygalæ*. *Sex. Syst.* *Diadelphia Octandria*. The bark of the root is a powerful astringent, and much used in South America in diseases of the bowels.

MONOBLEP'SIS, from *μονος*, 'one,' and *βλεψις*, 'sight.' An affection in which vision is confused, imperfect, and indistinct, when both eyes are employed; but quite perfect or nearly so, when either eye is used singly.

MONOCAR'PÆ; from *μονος*, 'alone,' 'single,' and *καρπος*, 'fruit.' A division of cutaneous affections, of the family of *Eczematosen* of *Fuchs*, which includes *strophulus*, *psyracria*, and *ecthyma*.

MONOCEPH'ALUS, from *μονος*, 'one,' and *κεφαλη*, 'head.' A compound monster having two bodies with a single head.

MONOCOLON, *Cæcum*, *Rectum*.

MONOCRA'NUS, from *μονος*, 'one,' 'single,' and *κρανιον*, 'cranium.' A monster with one cranium, but with the face in part double.—*Gurll*.

MONOCULUM, *Cæcum*.

MONOC'ULUS, *Mon'oculo*, *Monophthal'mus*, *Unio'culus*, *Unoc'ulus*, from *μονος*, 'one,' and *oculus*, 'an eye.' A bandage employed to maintain topical applications over one of the eyes. This bandage, called by some surgeons *Simplex oculus*, (F.) *Ceil simple*, is made of a roller three or four ells long, rolled into a single ball. See *Cyclops*.

MONODIPLO'PIA; from *μονος*, 'alone,' *διπλος*, 'double,' and *οψ*, 'eye.' Double vision with one eye.

MONOEMERON, *Monemeron*.

MONOGAS'TRIC, *Monogastrius*; from *μονος*, 'one,' and *γαστηρ*, 'stomach.' That which has but one stomach. Man is *Monogastrius*; ruminating animals, on the contrary, are *polygastrius*.

MONO'GRAPH, MEDICAL, *Monograph'ia medica*; from *μονος*, 'one,' and *γραφη*, 'description.' An *ex professo* treatise on a single class of diseases, or on a single disease.

MONOHEMERON, *Monemeron*.

MONOMACHON, Cæcum.

MONOMACUM, Cæcum.

MONOMANIA, Melancholy.

MONOMMATOS, Cyclops.

MONOPAGIA, Clavus hystericus, Hemis-  
crania.

MONOPATHY, *Monopathia*, from *μονος*, 'one,' and *παθος*, 'disorder.' A state in which one organ or function is disordered. Applied to melancholy or monomania; which is said to be a *monopathic* affection.

MONOPEGIA, Clavus hystericus, Hemis-  
crania.

MONOPHTHALMUS, Cyclops, Monoculus.

MONOPLASTIC, *Monoplasticus*: from *μο-  
νος*, 'one,' and *πλασσω*, 'I form.' That which has one form. A *Monoplastic element*, in histology, is one which retains its primary form.—  
Gerber.

MONOPODIA, Symptodia.

MONOPS, Cyclops.

MONOPSIA, Cyclopia.

MONOPUS, Symmeles.

MONORCHIS, from *μονος*, 'one,' and *ορχης*,  
'testicle.' One who has only one testicle.

MONOSTIA, from *μονος*, 'one,' and *εσθη*,  
'food,' 'repast.' The habit of taking only one  
meal in the day.

MONOTROPA UNIFLORA, *Isopiant, Pipe-  
plant, Nest root, Fit root*. An indigenous plant,  
whose juice, mixed with water, has been ex-  
tollled by the Indians in ophthalmia. The dried  
root in powder has been given in epilepsy and  
nervous diseases.

MONROLA'NUM FORA'MEN. A foramen  
at the anterior part of the lateral ventricles of  
the brain, by which they communicate with  
each other, is so called from the second Monro.

MONS VENERIS, *Monticulus Venæris*,  
*Ephed'um*, (F.) *Mont de Venus, Pénis, Monts*,  
*Læminæ sus-pubiannæ*. The more or less pro-  
jecting eminence, situate at the base of the  
hypogastrium, above the vulva and in front of  
the os pubis. At the period of puberty it be-  
comes covered with hair, formerly called *Treas-  
soria*.

MONSTER, *Monstrum, Teras, Polor, Polo-  
ria, Polorium, Polorum*. Any organized being,  
having an extraordinary vice of conformation,  
or a preternatural perversion of every part, or  
of certain parts only. Three species of mon-  
sters are usually distinguished. The *first* com-  
prehends those that are born with an excess of  
parts; as with two heads on one trunk,—two  
trunks with one head,—with six fingers or toes,  
&c. The *second* includes those with a deficiency  
of parts,—such as the acephali, monopes, &c.;  
and the *third*, those with a deviation of parts,—  
as where the heart is on the right side, the liver  
on the left, &c. Amongst the numerous hypo-  
theses entertained on the origin or cause of mon-  
sters, or of monstrosity—*terato'sis, monstrosi-  
tas*, as the state has been called—three only  
are worth mentioning. They have been attri-  
buted, 1. To the influence of the maternal im-  
agination on the fœtus in utero. 2. To acciden-  
tal changes, experienced by the fœtus at some  
period of its uterine existence: and, 3. To a  
primitive defect in the germs. The second  
seems to be the only one that is philosophical.

As a medico-legal question, monsters, if ca-  
pable of action as individuals, have the same  
rights as other persons.

MONSTROSITAS, see *Monster*.

MONSTROSITY, see *Monster*.

MONSTRUM, *Monster*.

MONT DE VENUS, *Mons Veneris*.

MONTBRISON, MINERAL WATERS  
OF. Montbrison is a town in France, in the  
department of the Loire, fifteen leagues from  
Lyons. There are three cold springs here,  
which are highly acidulous, and used as refri-  
gerants and aperients.

MONT-DE-MARSAN, MINERAL WA-  
TERS OF. Mont-de-Marsan is a small French  
town, 10 leagues from Dax; where there is a  
chalybeate spring, somewhat frequented.

MONT-D'OR, MINERAL WATERS OF.  
Mont d'Or is a village seven leagues from Cler-  
mont, (Puy-de-Dôme,) at which are several  
mineral springs, cold and thermal. Those of  
the Fountain *La Madelaine*, and of the *Great  
Bath*, are thermal; temp. 112° Fahr. and con-  
tain carbonic acid, subcarbonate and sulphate of  
soda, chloride of sodium, subcarbonate of lime  
and magnesia, alumine and oxide of iron. Those  
of *St. Margaret* are cold, and contain much  
carbonic acid.

MONTECATINI, MINERAL WATERS  
OF. This town is situate near Borgo-Bag-  
giano, in Tuscany. The springs are thermal;  
ranging from 78° to 118° Fahrenheit.

MONTHLY COURSES, *Menses*—m. Pe-  
riods, *Menses*.

MONTICULI CEREBELLI, Vermiform  
processes of the Cerebellum.

MONTICULUS VENERIS, *Mons veneris*.

MONTPELLIER, CLIMATE OF. This  
seat of a celebrated medical school in the S. E.  
of France was at one time renowned for its cli-  
mate, and especially in regard to its adaptation  
to consumptive cases. This is now exploded,  
and it is at present esteemed an unfit residence  
for them. The climate possesses the general  
characters of that of south-eastern France—  
being dry, hot, and irritating; subject to fre-  
quent vicissitudes, and especially to blasts of  
keen, cold, northerly winds. It is, indeed, most  
injurious in pulmonary diseases.

MOON, *Luna, Sel'net, Mond, Sax. Mons*,  
(G.) *Mond*, (F.) *Lune*. The moon has been  
supposed to exert considerable influence over  
the human body, in health and disease. Such  
influence has been grossly exaggerated. Not  
many years ago, it would have been heretical  
to doubt the exacerbation of mania, at the full  
of the moon; yet it is now satisfactorily shown,  
that if the light be excluded at this period, the  
*lunatic* is not excited more than ordinarily.

MOONSTRUCK, Lunatic.

MOORBERRY, *Vaccinium oxycoccos*.

MOORSHEAD, Alembic.

MOORWORT, BROAD-LEAVED, *Andro-  
meda mariana*.

MOOSEWOOD, *Dirca palustris*.

MOPHETA, see *Mephitism*.

MORBEUX, Morbid.

MORBI, see *Morbus*—m. *Acquisiti*, Acquired  
diseases—m. *Acuti*, see *Acute*—m. *Adventitii*,  
Acquired diseases—m. *Anniversarii*, Annual dis-  
eases—m. *Annui*, Annual diseases—m. *Asthenici*,  
Adynamia—m. *Celati*, Feigned diseases—m.  
*Chronici*, Chronic diseases—m. *Cognati*, Innate  
diseases—m. *Complicati*, see *Complication*, Im-  
pliciti morbi—m. *Congeniti*, Innate diseases—m.  
*Connati*, Connate diseases—m. *Connexi*, Con-

juacti morbi—m. Consequentes, Conjuncti morbi—m. Constrictorii, see Spasmodicus—m. Dermatodes, see Dermatoid—m. Dispersi, Sporadic diseases—m. Dissimulati, Feigned diseases—m. Vulpis, Alopecia.

**MORCEAU DU DIABLE**, see Tuba Fallopiana—m. *Frangé*, see Tuba Fallopiana.

**MORDICANT**, *Mordicans, Calor mordicans.* A morbid heat, causing a disagreeable pungent sensation in the fingers of the physician.

**MORDICES**, Teeth: see Teeth.

**MOREA**, Morus nigra.

**MORBILLE**, Boletus esculentus—m. *à Fruit noir*, Solanum—m. *Furiosus*, Atropa belladonna—m. *en Grappes*, Phytolacca decandra—m. *Grimpante*, Solanum dulcamara.

**MORETARIUM**, Mortar.

**MORETUS**, *Morētus*, from *morvus*, 'the mulberry.' Ancient name of a cordial julep, into the composition of which the syrup of mulberries entered.—Schröder.

**MORGAGNI**, HUMOUR OF, *Humor Morgagnianus*. A peculiar, transparent, slightly viscid fluid, found between the crystalline and its capsule.

**MORGELENE**, Aisine media.

**MORIA**, Idiotism—m. Demens, Idiotism, Dementia—m. Demens lerema, see Dementia—m. Imbecilis amnesia, Amnesia.

MORIBUNDUS, Psychorages.

MORINGA OLEIFERA, Guilandina moringa—m. Zeylanica, Guilandina moringa.

MORION, Genital organ, Penis.

MORIOPLASTICE, *Chirurgia curtorum*, *Ch. Anaplastica*, *Restitutio organica seu partium deperditarum*, *Transplantatio*, *Autoplastice*, *Anaplastica Surgery*, *Autoplasty* or *Autoplastic* or *Plastic Surgery*, *Chirurgia plastica*, from *μοιον*, 'a part,' and *πλαστικός*, 'forming.' The operations for the purpose have various names, according to the part concerned, as *Cheiloplastice*, *Ceroplastice*, *Rhinoplastice*, &c.

MORO, from *morum*, 'a mulberry':—*Morum*, (F.) *Murs*. A small abscess resembling a mulberry. A small tumour, of a similar appearance, particularly on the genital organs after impure coition.

MOROCHTHUS, *Morochtus*, *Morochites*, *Merochites*, *Merochtes*, *Galaxia*, *Leucographia*, (F.) *Pierre au lait*, *Milk stone*. An Egyptian stone, used by the ancients as an application to the intertrigo of children: probably a variety of fuller's earth, inasmuch as it appears to have been used by fullers.

MOROCHTES, Morochthus.

MOROCHTUS, Morochthus.

MOROCOMIUM, Morotrophium.

MORODOCHIUM, Morotrophium.

MOROSIS, Fatuitas, Idiotism.

MOROSITATES, from *μορεια*, 'folly.' A generic name given by Linnæus to an order of Vesanæ, in which he included pica, bulimia, polydipsia, antipathia, nostalgia, panophobia, satyriasis, nymphomania, tarentiamus, and hydrophobia.

MOROTROPHIUM, *Morocomium*, *Morodochium*, from *μορος*, 'fatuous,' and *τροφή*, 'support.' An insane establishment; a lunatic asylum; a mad-house. Under proper management, a valuable institution; but liable to various abuses.

MORPHÆA ALBA, *Lepra alphoides*—m. Nigra, *Lepra nigricans*.

MORPHIA, Morphina—m. Acetate of, Morphine acetat—m. Citrate of, see Morphina—m. Muriate of, see Morphina—m. Sulphate of, Morphine sulphas.

MORPHIÆ ACETAS, Morphine acetat—m. Sulphas, Morphine sulphas.

MORPHICA, from *μορφη*, 'shape.' Monstrosities of birth. The 3d order, class *Typhica* of Good.

MORPHINA, *Morphina*, *Morphium*, *Morphine*, *Morphins*, from *Morpheus*, the 'god of sleep.' A solid, colourless alkali; crystallizable in beautiful pyramids, truncated and transparent; soluble in alcohol, and slightly so in boiling water. It exists, combined with meconic acid, in opium. It may be obtained by decomposing, by means of ammonia or calcined magnesia, an aqueous solution of opium made in the cold.

The following is the process of the Pharm. U. S. *Opium*, sliced, ℞j; *distilled water*, *alcohol*, each a sufficient quantity; *solution of ammonia*, f. ℥vj. Macerate the opium with four pints of distilled water for 24 hours, and having worked it with the hand, digest for 24 hours, and strain. Macerate the residue twice successively with distilled water, and strain. Mix the infusions; evaporate to six pints, and filter;

then add first five pints of alcohol, and afterwards three fluidounces of the solution of ammonia, previously mixed with half-a-pint of alcohol. After 24 hours, pour in the remainder of the solution of ammonia, mixed as before with half-a-pint of alcohol; and set the liquor aside for 24 hours, that crystals may form. To purify these, boil them with two pints of alcohol till they are dissolved; filter the solution, while hot, through animal charcoal, and set it aside to crystallize.

Morphia dissolves perfectly in the acids, which it saturates; and with which it forms very crystallizable salts, with the exception of the acetate. All these salts have a bitter taste, and act upon the animal economy in the same manner as opium, but more powerfully. The acetate is the salt commonly employed in medicine. It was, at one time, supposed that Morphia is the purely sedative part of opium, divested of its irritating properties; but experience has not confirmed this. On the contrary, Morphia will generally disagree where opium does. Dose of Morphia  $\frac{1}{4}$  to  $\frac{1}{2}$  of a grain.

MORPHINÆ ACETAS, *Morphia Acetas*, *Acetate of Morphine*, *Acetate of Morphia*. A salt, formed by saturating morphia with acetic acid. (*Morphia*, in powder, freed from narcotina by boiling with sulphuric ether, ℥j; *distilled water*, Oss; *acetic acid*, a sufficient quantity. Mix the morphia with the water; then carefully drop in the acid, constantly stirring until the morphia is saturated and dissolved. Evaporate the solution in a water-bath to the consistence of syrup. Lastly, dry the acetate with a gentle heat and rub it into powder.—Ph. U. S.) Dose, from  $\frac{1}{4}$  of a grain to a grain.

MORPHINÆ SULPHAS, *Morphia Sulphas*, *Sulphate of Morphia*. A salt, formed by saturating morphia with sulphuric acid, evaporating, and crystallizing. Dose, the same as of the acetate.

*Muriate* and *Citrate of Morphia* have likewise been used; but they possess no advantages over the other salts. The sulphate and muriate are official in the Ph. U. S.

MORPHIUM, Morphina.

MORPHOLOGICAL, from *μορφη*, 'shape,' and *λογος*, 'a description.' That which has relation to the anatomical conformation of parts. Applied, at times, to the alterations in the form of the several parts of the embryo, in contradistinction to histological, which is applied to the transformation by which the tissues are gradually generated.

MORPHOLOGY, Anatomy.

MORPHONOMY, *Morphonomia*: from *μορφη*, 'shape,' and *νομος*, 'a law.' The laws of organic formation. The department of anatomical science which teaches the laws of organic configuration.

MORPHOTOMY, see Anatomy.

MORPIO, see Pediculus.

MORPION, Crab-louse, see Pediculus.

MORS, Death—m. Apparens, Asphyxia—m. Putativa, Asphyxia—m. Repentina, Demotivus lapsus—m. *du Diable*, Scabiosa succisa.

MORSELLUS, Tabella.

MORSULI ANTIMONIALES, *Tabellæ antimoniales Kunkelii*—m. Stibii, *Tabellæ antimoniales Kunkelii*.

MORSULUS, Tabella.

MORSURE, Degmos.

**MORSUS**, Degmos—*m. Diaboli*, Scabiosa succisa, see *Tuba Fallopiana*—*m. Gallinæ*, *Alsinæ media*—*m. Stomachi*, *Cardialgia*—*m. Ventriculi*, *Cardialgia*.

**MORT**, Death—*m. Apparente*, *Asphyxia*—*m. du Chien*, *Cholera*—*m. aux Chiens*, *Colchicum autumnale*—*m. aux Panthères*, *Doronicum pardalianches*.

**MORTA**, Pemphigus.

**MORTAL**, *Mortalis*, from *mors*, *mortis*, 'death.' *Lethalis*, *Leta'lis*, *Thanato'des*, *Thanasimus*, (F.) *Mortel*. That which is subject to death;—that which causes death:—*as, mors is mortal*; a disease is mortal. Of old, it was the custom to have a division of mortal wounds, which gave rise to many errors in medico-legal investigations, as the mortality of wounds depends upon various circumstances; and it is often a matter of extreme difficulty, to pronounce whether or not a wound is necessarily mortal.

**MORTALITY**, *Mortalitas*, *Lethal'itas*, *Letal'itas*, *Mortalité*. This word taken in an extended sense, expresses the condition of all organized bodies,—of being subject to the cessation of life. In the sense in which it is most frequently employed, it signifies,—the proportional quantity of individuals who, in a certain population, die in a given time. If we assume the population of the earth to be one thousand millions, and a generation to last thirty-three years; in that space of time the one thousand millions must all die; and, consequently, the number of deaths will be, by approximation,

Each year,	30,000,000
Each day,	82,109
Each hour,	3,491
Each minute,	57
Each second,	1 nearly.

If on the other hand, as has been supposed, the number of deaths is to that of the births as TEN to TWELVE: there will be born,

Each year,	36,000,000
Each day,	98,356
Each hour,	4,098
Each minute,	68
Each second,	1 & 2-15ths.

It has been estimated, that the average mortality of the Pays du Vaud, is 1 in 49; of Sweden and Holland, 1 in 48; of Russia, 1 in 41; of France, 1 in 40; of Austria 1 in 38; of Prussia and Naples, 1 in 33 to 35; of England, 1 in 45; and of South America, 1 in 30. The same rate of mortality has been given to the United States as to France; but the statistical details on all this matter have been inadequate, and—it is not improbable—inaccurate. The following has been given as the annual mortality of some of the chief cities of this country and of Europe: (See the Author's *Human Health*, p. 101: Philadelphia, 1844.) Philadelphia, 1 in 45.68; Glasgow, 1 in 44; Manchester, 1 in 44; Geneva, 1 in 43; Boston, 1 in 41.26; Baltimore, 1 in 41; London, 1 in 40; New York, 1 in 37.83; St. Petersburg, 1 in 37; Charleston, 1 in 36.50; Leghorn, 1 in 35; Berlin, 1 in 34; Paris, Lyons, Strasburg, and Barcelona, 1 in 33; Nice and Palermo, 1 in 31; Madrid, 1 in 29; Naples, 1 in 28; Brussels, 1 in 26; Rome, 1 in 25; Amsterdam, 1 in 24; and Vienna, 1 in 22½.

In the cities, the mortality under two years of age bears a large ratio. This is exhibited by the following table:

	Assa.	London.	Philad.	Baltimore.
Under 1 year,	28.52	22.7	24.11	
From 1 to 2,	9.97	8.6	8.55	
2 to 5,	9.97	7.3	11.18	
5 to 10,	4.33	4.	5.	
10 to 20,	4.03	5.	6.3	
20 to 30,	6.64	12.	9.87	
30 to 40,	8.08	12.	10.58	
40 to 50,	8.89	10.	8.88	
50 to 60,	8.89	7.2	5.78	
60 to 70,	9.15	5.	4.5	
70 to 80,	7.83	3.5	3.	
80 to 90,	3.18	1.9	1.67	
90 to 100,	0.40	0.5	0.26	
100 to 110,	—	0.09	0.18	
110 to 120,	—	0.013		

**MORTALITY**, *Bills of*, *Bills of Necrology*, (F.) *Tables de Mortalité*. Tables, instituted for the purpose of exhibiting the number of deaths, &c. in a given time. Well kept bills of mortality are of great use to the physician and political economist. Those of London have been proverbial for their inaccuracy and insufficiency; especially as regards the complaints of which the persons have died. They were formerly made out by the parish clerks, and the information was conveyed to them by two old women, who were appointed in each parish, and were called *Searchers*;—their duty being to see that the deceased had died a natural death. This miserable system has, however, been abolished: and the Registrar-General's annual reports of births, deaths, and marriages, exhibit how admirably vital statistics are now conducted in Great Britain.

**MORTAR**, *Morta'rium*, *Moretarium*, *Mortorium*, *Piso*, *Acorn*, *Pila*, *Holmos*, *Igdé*, *Igdus*, (F.) *Mortier*. A vessel for reducing to powder different solid substances, and for making certain mixtures. Different substances are employed in the construction of mortars;—iron, marble, glass, wedgewood ware, &c.

**MORTARIOLUM**, Alveolus.

**MORTEL**, Mortar.

**MORTIER**, Mortar.

**MORTIFER**, Lethiferous.

**MORTIFICATIO**, Mortification—*m. Pulmonum*, *Necropneumonia*.

**MORTIFICATION**, *Mortificatio*, *Necrosis*, from *mors*, 'death,' and *fo*, 'I become.' The loss of vitality in a part of the body. The incipient stage of mortification, when the case is still recoverable, is called *Gangrene*; when totally destroyed, *Sphacelus*. Mortification of a bone is called *Necrosis*.

**MORTIFICATION**, *COLD*, *Sphacelus*—*m. Ergot*, *Ergotism*—*m. Hot*, *Gangrene*—*m. Mildew*, *Ergotism*.

**MORTOOTH**, *Cupri sulphas*.

**MORUM**, see *Morus nigra*—*m. Palpebræ interne*, *Trachoma carunculoum*.

**MORUS NIGRA**, The *Mulberry-Tree*, *Mors'a*, *Sycami'nos*, (F.) *Mûrier Noir*. The fruit of the mulberry-tree, *Morus*, *Sycami'num*, (F.) *Mûre*, is pleasant, sweet, subacid, and abounds with a deep violet-coloured juice. A syrup is directed in the London Pharmacopœia. The bark of the root has been regarded as an anthelmintic.

**MORVE**, *Mucus*, *Nasal mucus*; see *Equinia*—*m. Farcinæus*, see *Equinia*.

**MOS**, *Habit*.

**MOS MORBI BENIGNUS** seu **MALIGNUS**. The benign or malignant character of a disease.

**MOSCHARDINA**, *Moscarda*, from *μοσχος*, 'musk.' A lozenge for the mouth, composed of musk, ambergris and other aromatics.

**MOSCHELÆON**, *Moscolæa*. A compound aromatic oil, containing musk.

**MOSCHUS**, Musk—*m. Arabum*, *Hibiscus abelmoschus*—*m. Facitius*, Musk, artificial.

**MOSCOLÆA**, Moschelæon.

**MOSLICH**, Maslach.

**MOSQUITO** (S.) Diminutive of (S.) *mosca*, 'a fly.' A very troublesome insect in warm, moist situations. Curtains, called *Mosquito curtains*, are used in India, by way of protection. The entrance of mosquitos into the bed-chamber may also be prevented, to a certain extent, by keeping the doors and windows closed until the light is extinguished. The pain and itching from the bites are alleviated by washing them with hartshorn.

**MOSQUITA** is a name given, by the Portuguese, to small, red pimples on the skin, resembling the bites of the mosquito.

**MOSS BERRY**, *Vaccinium oxycoccus*—*m. Ceylon*, *Fucus amylaceus*—*m. Club*, *Lycopodium*—*m. Cup*, *Lichen pyxidatus*—*m. Iceland*, *Lichen Islandicus*—*m. Irish*, *Fucus crispus*—*m. Marine*, *Fucus amylaceus*.

**MOTA**, *Fagus castanea*.

**MOTAMEN**, Motion.

**MOTATIO**, Motion.

**MOTE**, *Carbasus*, Lintæum.

**MOTEUR**, Motory.

**MOTHER'S MARKS**, *Nævus*—*m. Spots*, *Nævus*.

**MOTHERWORT**, *Leonurus cardiaca*, *Matricaria*.

**MOTILITY**, *Motilitas*, from *motus*, 'movement.' (F.) *Motilité*. Faculty of moving; moving power; contractility.

**MOTION**, *Motus*, *Motio*, *Motatio*, *Motamen*, *Commotio*, *Permotio*, *Cinasis*, *Movement*, (F.) *Mouvement*. The act of changing place. The various motions may be divided into,—*First*, the *voluntary* or those that are executed under the influence of the brain. *Secondly*. The *involuntary*, which may be subdivided into, 1. The *excited*, of the *reflex function* of Dr. Marshall Hall and others,—as the closure of the larynx on the contact of acrid vapours, of the pharynx on that of the food,—a function of the spinal marrow; and 2. Those that are executed under the organic and other nerves of involuntary function. It is probable, too that every living tissue is capable of moving responsive to its appropriate irritant. See Irritability.

**MOTION, CILIARY**, see *Cilia*—*m. Involuntary*, see *Automatic*—*m. Vibratory*, see *Cilia*—*m. Voluntary*, *Autocinesis*.

**MOTIVE**, Motory.

**MOTOR**, Motory.

**MOTOR OCULI EXTERNUS**, *Nervus tim'idus*, (F.) *Nerf oculo-musculaire externe* (Ch.), *Nerf moteur oculaire externe*, *Sixth pair of nerves*, arises from the furrow which separates the pons Varolii from the medulla oblongata. It enters the cavernous sinus; anastomoses on the outside of the carotid artery with two filaments furnished by the superior cervical ganglion; enters the orbit by the sphenoidal fissure, and is

lost on the rectus externus oculi. This pair is, also, called *Abducens*.

**MOTORÆS OCULORUM**, *Motoris Oculorum*, *Oculares communes*, *Ophthalmici externi*, *Common Oculo-muscular Nerves*, (F.) *Nerfs moteurs oculaires communs*, (Ch.,) *The third pair of nerves*. This nerve arises from a depression at the inner side of the peduncles of the brain, between the tuber annulare and corpora mamillaria. It enters the outer part of the cavernous sinus, and passes into the orbital cavity. Behind the sphenoidal fissure, it divides into two branches; the one *superior*; and the other, *inferior*. The *former* is lost on the rectus superior oculi and the levator palpebræ superioris; the *latter*—the larger of the two—divides into three branches, which pass to the rectus internus, rectus inferior, and lesser oblique. The last furnishes a filament, which passes to the ophthalmic ganglion.

**MOTORIAL**, Motory.

**MOTORY**, *Motivus*, *Motor*, *Motorial*, *Motrix*, (F.) *Moteur*. That which moves or impresses movement, as *motor nerves*, in contradistinction to the *sensory*.

**MOTOS**, Lintæum, Tent.

**MOTOSIS**, from *μotos*, 'charpie.' The application of charpie to a wound.

**MOTRIX**, Motory.

**MOTTE**, *Mons veneris*.

**MOTUM**, *Carbasus*, Lintæum.

**MOTUS**, Motion—*m. Automaticus*, see *Automatic*—*m. Compressorius*, *Peristole*—*m. Cordis diastalticus*, *Diastole*—*m. Hæmorrhoidalis*, *Hæmorrhoids*—*m. Intestinorum*, *Borborygmus*—*m. Involuntarius*, see *Autocinesis*—*m. Peristalticus*, *Peristole*—*m. Testudineus*, *Peristole*—*m. Vermicularis*, *Peristole*—*m. Voluntarius*, *Autocinesis*.

**MOUCHE**, *Cantharis*—*m. d'Espagne*, *Cantharis*.

**MOUCHER L'ACTION DE**, *Munetio*.

**MOUCHES**, see *Pains*, labour.

**MOUCHETURE**, see *Scarification*.

**MOUCHOIR EN TRIANGLE**, *Couvre-chef*, see *Bandæa*.

**MOUPETTE**, see *Mephitism*.

**MOULD**, *Fontæella*.

**MOULE**, *Mytilus edulis*.

**MOULEUR**, *Meller*.

**MOUREILLER**, *Malpighia mourella*.

**MOURON DES OISEAUX**, *Alsine media*—*m. Rouge*, *Anagallis*.

**MOUSE-EAR**, *Alsine media*, *Hieracium pilosella*.

**MOUSE-SIGHT**, *Myopia*.

**MOUSSE DE CORSE**, *Corallina Corsicana*—*m. d'Island*, *Fucus crispus*—*m. Porlie*, *Fucus crispus*.

**MOUSSERON**, see *Agaric*.

**MOUSSEUX**, *Frothy*.

**MOUSTACHE**, *Mystax*.

**MOÛT DE LA BIÈRE**, *Wort*.

**MOUTARDE**, *Sinapis*.

**MOUTH**, *Sax. mut*, *Oz*, *Cavum Oris*, *Stoma*, (F.) *Bouches*. This word sometimes signifies the cavity situate between the jaws, and containing the tongue, &c.—at others, the outer orifice of that cavity. The mouth, in the first acceptation, *Cavitas* seu *Spatium Oris*, is the cavity; bounded, *above*, by the palatine arch; *below*, by the tongue; *before*, by the lips; and *behind*, by the velum palati and pharynx. The

sides of the mouth and the organs it contains are lined by a mucous membrane. The anterior aperture of the mouth is, sometimes, called *facial*;—the posterior *pharyngeal*. In the mouth are the teeth, gums, alveolar margins, tongue; the excretory ducts of the salivary glands, and those of a number of mucous follicles, &c. It is in this cavity that the food is cut, torn, or bruised by the teeth; is impregnated with saliva, and formed into a mass or *bolus*, which is then subjected to the act of deglutition. The mouth contains the organs of taste; and it serves in respiration, articulation, expectoration, suction, &c.

The condition of the mouth requires to be attended to in *Semiology*. The state of the mucous membrane, like that of the tongue, indicates the condition of the membrane of the alimentary canal generally.

**MOUTH, Os, Apertura, Orific'ium, Hiatus, Peristomium,** is, also, applied to the open extremities of vessels or other canals.

**MOUTH ROOF, Coep'tis**—m. Sore, Aphthæ—m. Watering, see Salivation.

**MOUVEMENT, Motion.**

**MOVEMENT, Motion.**

**MOXA, Moxib'rium.** A word by which the Chinese and Japanese designate a cottony substance, which they prepared by beating the dried leaves of the *Artemisia moza*,—a kind of mugwort. With this down they form a cone, which is placed upon the part intended to be cauterized, and is set fire to at the top. The heat and pain gradually increase, in proportion as the combustion proceeds downwards, until ultimately an eschar may be formed. In Europe and this country, the same operation is usually practised with a cylinder of cotton wool, or with one formed from the pith of the greater sun-flower. This mode of cauterization is employed as a powerful counter-irritant; which it assuredly is. Sloughing may be, in some measure prevented, according to Baroa Larrey, by the application of liquid ammonia to the burnt part.

**MOXIBURIUM, Moxa.**

**MOXIBUSTION, Moxib'utio, Encau'is.** Mode of cauterization by means of moxa.

**MOXON'S EFFERVESCING MAGNESIA,** see Magnesia, effervescing, Moxon's.

**MUCAGO, Mucilage.**

**MUCARUM, Mucharum.**

**MUCEDO, Mucilage.**

**MUCHARUM, Muca'rum.** A barbarous term, formerly used for an aqueous infusion of roses, sweetened and evaporated to the consistence of syrup.

**MUCIFIC, Blennogenous.**

**MUCIFORM, Muciform'is, Myco'des, Blenno'des, Blennoi'des, Blennoi'deus,** from *mucus*, and *forma*, 'form.' Resembling *mucus* in character or appearance.

**MUCILAGE, Mucila'go, Muca'go, Muc'do,** from the Lat. *mucus*,—itself presumed to be from *mungero*, 'to wipe the nose.' A mixture of gum and a small quantity of matter analogous to *mucus*, which is found in abundance in linseed, quince-seed, &c. It is obtained by heating with water the parts, or products, of plants which contain it. It is much used in the preparation of emollient cataplasms and the greater part of the demulcent *sitanes*.

**MUCILAGE, ANIMAL, Mucus**—m. of Quince

seeds, Decoctum cydoniæ—m. Starch, Mucilago amyli.

**MUCILAGINEUX, Mucilaginosus.**

**MUCILAG'INOUS, Mucilaginosus, Gummosus, Gummio'des, Gummido'des,** (F.) *Mucilaginosus.* Gummy. Resembling gum. That which possesses the character of mucilage.

**MUCILAGO, Mucilage, Synovia.**

**MUCILAGO ACA'CIÆ, M. Acacia Arabi'ca, M. Gummi Arabi'ca, Mucilage of acacia, M. of gum Arabic.** (*Acacia gum contus. ʒiv, ag. serv. Oss.* Rub the gum with the water gradually added.) Demulcent. To allay cough; but, chiefly, to suspend insoluble matters in water, &c.

**MUCILAGO AM'YLI, Starch mucilage.** (*Amyli ʒij. aqua Oj.* Rub the starch with the water gradually added; then boil till it forms a mucilage. *Ph. L.*) Demulcent. Generally given *per anum*.

**MUCILAGO ARTICULORUM seu JUNCTURARUM, Synovia.**

**MUCILAGO ASTRAG'ALI TRAGACAN'THÆ, M. tragacanthæ, M. gummi tragacanthæ, Mucilage of tragacanth.** (*Gummi tragacanth. ʒj, aqua bullient. Oj.* Macerate for 24 hours; triturate till the gum is dissolved, and press through linen.) For pharmaceutical purposes.

**MUCILAGO CRETICA, Misturæ cretæ**—m. Gummi Arabici, M. acaciæ—m. Seminis cydonii mali, Decoctum cydoniæ—m. Gummi tragacanthæ, M. astragali tragacanthæ—m. Tragacanthæ, M. astragali tragacanthæ.

**MUCIN, Mucus.**

**MUCIPAROUS, Mucip'arus,** from *mucus*, and *pario*, 'I bring forth.' Mucous producing; as *muciparous* glands or follicles.

**MUCOCE'LE, Hernia sacci lachrymal'is,** from *mucus*, and *κρηλη*, 'rupture.' An enlargement or protrusion of the mucous membrane of the lachrymal passages giving occasion to fistula lachrymalis. Also, dropsy of the lachrymal sac.

**MUCO-ENTERITIS, see Enteritis.**

**MUCO-PURULENT, Mucopurulentus, Pyoblen'nicus,** from *mucus*, and *pus*. Having the character or appearance of *mucus* and *pus*.

**MUCOR, Euros, Mucus**—m. Narium, Nasal mucus.

**MUCOSITAS, Mucus.**

**MUCOSITY, Mucos'itas.** A fluid, which resembles *mucus*, or contains a certain quantity of it.

**MUCOUS, Mucos'us.** An epithet for all bodies containing mucilage or *mucus*. It is, also, sometimes used synonymously with gum. In *pathology*, it is occasionally employed to express the seat of a disease, as *mucous disease, mucous phlegmasia*; that is, having its seat in a mucous membrane.

**MUCOUS MEMBRANES, see Membranes**—m. Web, Corpus mucosum.

**MUCRO, Apex.**

*Mucro seu Cory'pht seu Fundus seu Vertex Cordis.* The apex or point of the heart.

**MUCRO HUMERI, Acromion.**

**MUCRONATA CARTILAGO, Xiphoid cartilage.**

**MUCRONATUM OS, Xiphoid cartilage.**

**MUCULENT, Muculentus,** from *mucus*. Slimy, viscid.

**MUCUNA, see Dolichos pruriens**—m. Pruriens, Dolichos pruriens—m. Prurita, see Dolichos.

**MUCUS**, *Mucor*, *Mucor's humor*, *Mucositas*, *Myza*, *Mycus*, *Lapt*, *Pituita*, *Zoomycus*, *Zoomy'a*, *Animal mucus*, *Blenna*, *Animal mucilage*, (F.) *Muqueux animal*, *Morve*, *Mucilage animal*, presumed to be from *mungers*, 'to wipe the nose.' A substance, analogous to vegetable mucilage; from which, however, it differs, by affording subcarbonate of ammonia on distillation. Mucus exudes through the skin, in a state of combination with a peculiar oily matter; and, drying, forms the epidermis. It constitutes, in part, the different epidermeous productions, as the hair, nails, wool, and horn of animals, feathers of birds and scales of fish. It is found at the surface of the mucous membranes, and presents some difference in its composition and properties, according to the particular mucous membrane from which it is obtained. Its chief organic constituent is an albuminous compound, — *muoin*. Mucus preserves the membranes moist; and in a state best fitted for the performance of their functions. The French give the term *glairs* to the thick, stringy mucus, secreted by the mucous membranes when in a state of disease.

**MUCUS CARPHODES**, see *Carphodes*—m. Ca-

tharticus, *Lichen Islandicus*—m. *Malpighii*, *Corpus mucosum*—m. *Narium*, *Nasal mucus*.

**MUD-APPLE PLANT**, *Solanum melongena*.

**MUDAR**, *Madar*. The *Calotropis mudaris* seu *madaris*; or, according to the generality of authorities, the *C. gigantea* or *Asclepias gigantea*. In the Hindoo practice of physic, the bark of the root, as well as the concrete juice of the plant, enters into various compound formulæ for the cure of elephantiasis and many other disorders. Experiments instituted by Dr. Duncan, jr., exhibit its properties to be like those of *ipæacuanha*.

**MUGUET**, *Aphthæ*, *Convallaria maialis*—m. *des Bois*, *Asperula odorata*—m. *de Mai*, *Convallaria maialis*.

**MUGWORT**, *Artemisia vulgaris*.

**MULATRE**, *Mulatto*.

**MULATTO**, (F.) *Mulâtre*, (S.) *Mulata*. An individual of the human species engendered of a white and black race; from *mulus*, 'a mule.'

The following table exhibits the proportion of white blood in the various castes,—arising from the hybridous admixture of white and black,—according to the principles sanctioned by usage.

PARENTS.	OFFSPRING.	Degree of Mixture.	
Negro and White,	Mulatto,	1-2 White,	1-2 Black.
White and Mulatto,	Terceron,	3-4 _____	1-4 _____
Negro and Mulatto,	} Grippo, or Zambo, } or black Terceron, }	1-4 _____	3-4 _____
White and Terceron,		Quarteron,	7-8 _____
Negro and Terceron,	Black Quarteron,	1-8 _____	7-8 _____
White and Quarteron,	Quinteron,	15-16 _____	1-16 _____
Negro and Black Quarteron,	Black Quinteron,	1-16 _____	15-16 _____

The last two were considered to be respectively white and black, in the British West India Islands; and the former, prior to modern changes, were white by law, and consequently free. See *Half-caste*.

**MULBERRY TREE**, *Morus nigra*.

**MULES** (F.), *Mula*. Chilblains on the heels.

**MULIEBRIA**, *Menses*, *Vulva*.

**MULIEBROSITAS**, *Philogyn'ia*, from *mulier*, 'a woman,' *muliebria*, 'appertaining to women.' Fondness for women. Hence, *Muliebro'sus*, *Muliera'rius*, and *Muliero'sus*; one who is fond of women.

**MULIEBROSUS**, see *Muliebro'sitas*.

**MULIERARIUS**, see *Muliebro'sitas*.

**MULIERITAS**, *Womanhood*, from *mulier*, 'a woman.' The state of puberty in the female.

**MULIEROSUS**, see *Muliebro'sitas*.

**MULIER PLENA**, *Pregnant*.

**MULLEIN**, **BLACK**, *Verbascum nigrum*—m. Broad-leaved, great, *Verbascum nigrum*—m. Yellow, *Verbascum nigrum*.

**MULLER**, (F.) *Mouleur*. A moulder. A stone held in the hand, with which any powder is ground upon a flat horizontal stone. It is sometimes called *mullet*. (F.) *Mollette*.

**MULLIGRUBS**, *Tormina*, *Colic*.

**MULOMEDICINA**, *Veterinary art*.

**MULOMEDICUS**, see *Hippiater*.

**MULSA ACIDA**, *Oxyglycus*.

**MULSUM**, *Hydromeli*—m. *Vinosum*, *CEnomel*.

**MULTIFIDUS SPINÆ**, *Transversalis dorsæ*.

**MULTILOCCULAR**, *Multilocularis*, from *multus*, 'many,' and *loculus*, 'a cell.' Having many cells.

**MULTIMAMMÆ**; from *multus*, 'many,' and *mamma*, 'the breast.' A variety of hypergenesis, in which there are supernumerary mammas.

**MULTIPAROUS**, (F.) *Multipare*; from *multus*, 'many,' and *parire*, 'to bring forth.' One that brings forth several young at the same time.

**MULTITUDO**, *Plethora*.

**MULTIVORANTIA**, *Polyphagia*.

**MUMIA**, *Mummy*.

**MUMMIFICATION**, from *mummy*, and *fo*, 'to make.' *Scalateu'sis*. The mode of preparing a mummy.

**MUMMY**, *Mumia*, Arab. *Moumya*, from *mum*, 'wax.' *Rebolea*, *Rebona*, (F.) *Momia*. A dead body simply dried, or dried after having been embalmed. The latter acceptation is the most common. Formerly, the Egyptian mummy was extolled as useful in contusions. It was presumed, also, to have healing, tonic, and resolvent properties. It is now only regarded as an archaeological curiosity.

**MUMPS**, *Cynanche parotidea*.

**MUNCATIO**, *Apomæ'ia*, (F.) *l'Action de Moucher*. The act of blowing the nose.

**MUNDIFICANTIA**, *Detergents*.

**MUNDIFICATIVA**, *Detergents*.

**MUNGOS RADIX**, *Ophiorrhiza mungos*.

MUNIMENTUM CASTITATIS, Hymen.  
**MUQUEUX ANIMAL**, Mucus.

**MUR**, Coryza.

**MURAL**, *Mura'lis*, from *murus*, 'a wall.'

Vesical calculi are so called when rugous and covered with tubercles or asperities. They are composed of oxalate of lime.

**MURE**, Moro, see *Morus nigra*.

**MURIA**, *Halmé*, *Salsila'go*, Brine, (F.) *Saumure*. This was formerly used as a glyster in dysentery, in certain inveterate neuralgia, &c.

**MURIA**, Soda, muriate of.

**MURISA AURICO-NATRICUM**, see Gold.

**MURIATE D'AMMONIAQUE**, Ammonias murias—*m. d'Ammoniaque et de fer*, Ferrum ammoniatum—*m. d'Or*, Gold, muriate of, see Gold.

**MURIATICUM AC'IDUM**, from *muria*. *Ac'idum salis*, *Spir'itus salis mari'ni*, *Sp. salis Glaube'ri*, *Acidum mari'num concentratum*, *Acidum salis culina'ris*, *Acidum salis mari'ni*, *Spir'itus salis ac'idus seu fumans*, *Acidum hydrochlor'icum*, *Muriat'ic acid*, *Spir'it of salt*, (F.) *Acide hydrochlorique ou muriatique*. An aqueous solution of chlorohydric acid gas of s. g. 1.16. The odour of muriatic acid is suffocating; taste very acid and caustic. It is nearly colourless when pure; but commonly of a pale yellow; volatile; the fumes visible. Muriatic acid is possessed of tonic and antiseptic properties. It is used in typhus, cutaneous eruptions; in gargles for inflammatory and putrid sore throats, (gtt. xxx to f.  $\frac{3}{4}$  of water,) &c. When added to a pediluvium, it renders it stimulating.

**ACIDUM MURIAT'ICUM DILU'TUM** of the *Ph. U. S.* contained four ounces, by measure, of muriatic acid to twelve ounces of distilled water.

**MURIDE**, Bromine.

**MURIER NOIR**, *Morus nigra*.

**MURIGENE**, Chlorine.

**MURINA**, Bromine.

**MURMUR AURIUM**, *Tinnitus aurium*—*m.* Intestinalis seu intestinorum seu Ventris, *Borborygmus*.

**MURMUR, RESPIRATORY**. The noise heard during inspiration and expiration, especially the former. It is produced by the passage of the air through the bronchial tubes and into the air-cells. It has been also called *murmur of the expansion of the lungs*; and, when distinctly vesicular, *Respiration of the cells* or *vesicular respiration*, (F.) *Respiration vésiculaire*. Vesicular respiration is of course absent when the cells of the lungs have been obliterated from any cause. We may then have the *Respiration nulle*, *Absence du bruit respiratoire*, *Silence*, and *Respiration silencieuse* of the French writers.

At times, it is rude during inspiration or expiration, or both—the *Respiration rude* or *R. râpeuse* of the French. At others, there is a blowing sound, (F.) *Souffle*, *Respiration soufflante*, as if some one were blowing into the auscultator's ear through a tube. This is heard in the healthy state over the larynx, trachea, and about the bifurcation of the bronchia; but when it proceeds from the lungs it denotes disease.

The respiration, perceived over the trachea and bronchia in health, is called *tracheal* or *bronchial* or *tubal*, (F.) *Respiration bronchique*,

*Souffle tubaire*, according to the situation in which it is heard.

**MURMUR, UTERINE**, *Bruit placentaire*—*m.* Utero-placentalis, *Bruit placentaire*.

**MURRAIN**, Coryza.

**MURREN**, Coryza.

**MUSA PARADISI'ACA**, *Musa*, *Amusa*, *Palma hu'milis*, *Ficus In'dica*, *Bata*, *Plat'anus*. The *Plantain tree*. *Family*, Musaceæ. *Sec. Syst.* Hexandria Monogynia. It grows in many parts of India and South America. The fruit, which is largely eaten for bread, consists of a mealy substance. It is clammy; has a sweetish taste, and will dissolve in the mouth without chewing. The whole spike of fruit often weighs forty or fifty pounds. The leaves of the tree serve the Indians for table cloths and napkins. Being smooth and soft, they are also, employed as dressings for blisters. The water from the soft trunk is astringent, and is sometimes used in diarrhœa.

**MUSA SAPIENTUM**. The *Bana'na tree*, *Bacoba*, (F.) *Banania*, *Bacove*. This differs somewhat from the last. The fruit, *Bana'na*, (S.) *Platano*, is shorter, straighter, and rounder; the pulp softer and of a more luscious taste. When ripe, it is very agreeable; is eaten like the plantain, and relished by all ranks of people in the West Indies. Both varieties are natives of Guinea.

**MUSC**, Musk.

**MUSCA HISPANICA**, *Cantharis*.

**MUSCADE**, see *Myristica moschata*.

**MUSCADIER**, *Myristica moschata*.

**MUSCERDA**, *Moscardina*.

**MUSCLE**, *Musculus*, *Torus*, *Mys*, *Myon*, from *μῦς*, 'a rat;' because, say some etymologists, the ancients compared the muscles to flayed rats. According to Diemerbroeck, Douglas, Chausaier, &c., *μῦς* comes rather from *μῦναι*, 'to close,' 'to move,' &c., a function proper to muscles. This etymon is the more probable. Muscles have been divided into those of *Animal life* or *of the life of relation*—*voluntary muscles*—which execute movements under the influence of the will; as the muscles of the limbs, head, trunk, &c., and into those of *organic life*—*involuntary muscles*—which contract under the influence of certain special stimuli; as the heart, fleshy fibres of the stomach, &c. *Mixed muscles* are those which belong partly to each of these divisions;—as the muscles of respiration; the sphincters, &c. Muscles that act in opposition to each other are called *antagonists*; thus, every extensor has a flexor for an antagonist, and *vice versa*. Muscles that concur in the same action are termed *congenerous*. The muscles present numerous varieties in form, size, situation, use, &c., and have been divided, by some, into *long*, *broad*, and *short*. Each of these divisions comprises *simple* and *compound* muscles. *Simple* or *rectilinear muscles* have all their fibres in a similar direction: and only one body—as the *Sartorius*, *Pronator quadratus*, &c. *Compound muscles* are those which have only one belly and several tendons, as the flexors of the fingers and toes; or several bellies and several tendons,—as the biceps flexor cubiti, sacro-lumbalis, &c. To the compound muscles belong, also, the *radiated muscles*. Their fibres set out from a common centre, and are arranged like the radii of a circle;—such are the diaphragm, iliacus,

temporal, &c. *Pennated* or *Pennisiform Muscles*. Their fibres are arranged in two rows, which are united at a median line, at greater or less angles; nearly as the feathers are inserted into a quill. The *palmaris longus* is one of these. *Semi-pennisiform Muscles*: their fibres are oblique, as in the last case; but they are inserted only on one side of the tendon. *Hollow Muscles* are,—the heart, intestines; urinary bladder, &c.

Much difference has existed in the enumeration of muscles. Some authors reckon them at upwards of 400. *Chaussier* admits only 368. The greater part of the muscles are in *pairs*. Very few are *asyngous*.

Muscles have been variously named. 1. *According to their uses*, as diaphragm, buccinator, extensors, flexors, adductors, abductors, levators, depressors, &c. 2. *According to their position*, as interspinales, interossei, subclavius, popliteus, anconeus, cubitalis, iliacus, temporalis, &c. 3. *According to their shape*, as trapezius, splenius, lumbricalis, serratus, digastric, deltoid, scalenus, rhomboides, &c. 4. *According to their dimensions*. *Pectoralis major*, *rectus capitis anticus major*, *pectoralis minor*, *glutæus maximus*, *medius*, and *minimus*. 5. *According to their direction*, as *obliquus abdominis*, *transversalis abdominis*, *rectus femoris*, *rectus abdominis*, &c. 6. *According to their composition*, as *semi-membraneous*, *semi-tendinous*, *complexus*, &c. 7. *According to their attachments*, or the different points of the skeleton to which they are connected by means of tendons or aponeuroses; as *sterno-cleido-mastoidens*, *sterno-hyoideus*, &c. On this is grounded the nomenclature of *M. Dumas*, and that of *Chaussier*.

The end of the muscle, which adheres to the most fixed part, is usually called the *origin* or *head*, (F.) *Tête*; and that which adheres to the more moveable part, the *insertion* or *tail*, (F.) *Queue*; the intervening part or body of the muscle being called the *venter* or *belly*; *Venter musculi*, *Médium musculi*: hence, the names *gastrocnemii*, *digastricus*, *biceps*, and *triceps*; according as they have two bellies, two or three heads, &c.

Muscles are formed,—1. Essentially of the *muscular* or *fleshy fibre*, (see *Muscular Fibre*.) 2. Of *Cellular tissue*, which unites together the fibres. This cellular tissue is not very visible between the fine and loose fibres; but becomes more so, when they unite in more considerable fasciculi. It forms, moreover, to each muscle an external envelope, which unites it to the neighbouring parts, and admits of its motion. This envelope was formerly called *Tunica propria musculorum*. 3. Of *Arteries*. These proceed from neighbouring trunks, and are, generally, very large. Their size and number are always in proportion to the bulk of the muscle. With the exception of some viscera, as the lungs and the kidneys, there are few organs that receive as much blood as the muscles. 4. Of *Veins*. They follow the same course in the muscles as the arteries. *Bichat* asserts, that they are generally devoid of valves. 5. Of *Lymphatics*. Of these, we know little, and cannot easily follow them between the fleshy fibres. 6. Of *Nerves*. These are numerous, and of different sizes. They, almost all, proceed from the encephalon; some, however, is-

sue from ganglions, and accompany the arteries. In general, they penetrate the fleshy tissue along with the vessels, to which they are narrowly united. After they have entered the muscles, they divide and subdivide until they are lost sight of.

*MUSCLE CANIN*, *Levator anguli oris*—*m. Caninæ*, *Ischio-trochanterianus*.

*MUSCLE OF GAUARD*. The oblique muscular fibres of the stomach.

*MUSCLE GRAND FESSIER*, *Glutæus major*—*m. of Guthrie*, *Compressor Urethra*—*m. of Horner*, *Tensor Tarsi*—*m. of Houston*, *Compressor venæ dorsalis penis*—*m. très Large du dos*, *Latissimus dorsi*—*m. of Wilson*, *Compressor urethra*.

*MUSCULAR, Muscularis, Muscularis, Torosus*. That which belongs or relates to the muscles. Well furnished with muscles.

*MUSCULAR ARTERIES*. Arteries that are distributed to the muscles. The name, *Muscular Arteries of the eye*, has been especially given to two branches sent off by the ophthalmic artery:—the one, *inferior*, which furnishes branches to the *rectus inferior oculi*, *lachrymal sac*, &c., and some of the anterior ciliary arteries: the other—the *superior*, which is sometimes wanting; but, when it exists, gives branches to the *rectus superior oculi* and *levator palpebræ superioris*.

*MUSCULAR CONTRACTION*. The exertion of the power, possessed by muscles, of shortening themselves, or of contracting to produce motion:—*muscular motion* being the change in the situation and relation of organs, induced by muscular contraction. When a muscle contracts, its fibres assume more the zigzag direction, and the extremities approximate; but the bulk of the whole muscle is not augmented. This contraction takes place, at times, with extreme velocity: a single thrill, in the letter *r*, can be pronounced in the 1-30,000th part of a minute. The force of contraction, *Myodynamis*, depends upon the healthy physical condition of the muscle, combined with due energy of the brain. The duration, in voluntary motion, is for a certain time dependent upon the will:—contractions, excited involuntarily, cannot be so long maintained.

*MUSCULAR FIBRE, Fleshy fibre*. A name given to the filaments, which, by their union, form the muscles. This fibre is flat, soft, downy, linear, little elastic, more or less red: and arranged in zigzag according to its length, which is variable. It is firmer in adults than in the young or the aged; of the same size in the great and small muscles; and runs its course without bifurcation or ramification. It is but slightly resisting in the dead body, tearing readily; but during life, it supports very great efforts without laceration. It is, itself, composed of a considerable number of fibrils, similar to each other, and subdividing almost *ad infinitum*. The ultimate filaments into which the fibre can be decomposed by mechanical means seem to be hollow or tubular. The fibre exists under two forms, the *striated* and *non-striated*; the muscles composed of the former ministering, as a general rule, to the *animal functions*,—the latter always, perhaps, to the *organic*. The colour of the muscular fibres is red in man, and white in several animals. A greater or less number,—united in fasciculi, *Fasciculi* seu

*Lacerti musculo-rum*, approximated to each other, and forming a distinct mass, of very variable size and shape, the extremities being attached to bones by means of tendons,—constitutes a muscle. In this are included cellular membrane, vessels and nerves. See Muscle.

**MUSCULAR NERVES.** The nerves distributed to the muscles are so named. Winslow calls the 4th pair of nerves—*Nerv musculoire obliquus superior*.

**MUSCULAR SYSTEM.** A term given to the aggregate of the muscles of the body.

**MUSCULAR VEINS.** These bring back the blood, which has been carried to the muscles by the muscular arteries.

**MUSCULARIS, Corroborant.**

**MUSCULI ACCESSORII AD SACROLUMBALEM,** see *Sacro-lumbalis*—*m.* *Papillares, Carnes columnæ*—*m.* *Pectinati, Pectinatus* muscles.

**MUSCULO-CUTANEUS, Musculo-cutaneus,** from *musculus*, 'a muscle,' and *cutis*, 'skin.' That which appertains to muscles and skin.

**MUSCULO-CUTANEOUS NERVE.** This name is specially given to two nerves;—the one, the *External cutaneous nerve*; furnished by the brachial plexus (see *Cutaneous*:—) the other, given off from the popliteus externus, (*F.*) *Nerv Sciaticus, Popliteus externus*;—*Prætibio digital*, (*Ch.*) It descends on the anterior and outer part of the leg,—at first, hid among the muscles; becomes superficial about the middle of the leg; and divides into two branches, which pass superficially on the back of the foot.

**MUSCULO-RACHIDÆUS.** Belonging or relating to muscles and to the spine. A name given to branches, furnished behind by the intercostal, lumbar, and sacral arteries; and which are distributed to the spine and to the muscles of the neighbourhood.

**MUSCULOSA EXPANSIO, Platysma myoides.**

**MUSCULO-SPINAL NERVE, Radial nerve.**

**MUSCULOSUS, Muscular.**

**MUSCULUS ACCLIVIS, Obliquus internus abdominis**—*m.* *Auxiliarius, Pyramidalis abdominis*—*m.* *Constrictorius, Sphincter*—*m.* *Cutaneus, Platysma myoides*—*m.* *Eustachii, Laxator tympani*—*m.* *Fallopil, Pyramidalis abdominis*—*m.* *Femoris membranosus, Fascia lata*—*m.* *Patientiæ, Levator scapulæ*—*m.* *Penicillatus, Levator labii inferioris*—*m.* *Pyxoides terrestris, Lichen pyxidatus*—*m.* *Scandularius, Parathenar*—*m.* *Subcutaneus, Platysma myoides*—*m.* *Succenturiatus, Pyramidalis abdominis*—*m.* *Succingens, Diaphragm*—*m.* *Supercilii, Corrigator supercilii*—*m.* *Testicondus, Cremaster*—*m.* *Testis, Cremaster*—*m.* *Tubæ novæ, Circumflexus.*

**MUSCUS ARBOREUS, Lichen plicatus**—*m.* *Caninus, Lichen caninus*—*m.* *Clavatus, Lycopodium*—*m.* *Corallinus, Corallina Corsicana*—*m.* *Cranii humani, Lichen saxatilis*—*m.* *Erectus, Lycopodium selago*—*m.* *Helminthocortos, Corallina Corsicana*—*m.* *Islandicus, Lichen islandicus*—*m.* *Marinus, Corallina Corsicana*—*m.* *Maritimus, Corallina*—*m.* *Pulmonarius quercinus, Lichen pulmonarius*—*m.* *Pyxidatus, Lichen pyxidatus*—*m.* *Villosus, Peristroma.*

**MUSEAU DE TANCHE, Os uteri.**

**MUSEUM ANATOMICUM, Suppellex anatomica.** An anatomical museum.

**MUSEROOM, Fungus.**

**MUSIC, Musica, (F.) Musique,** from *μουσα, musa*, 'a song.' The art of producing harmonious and cadenced sounds: an art, which has, at times, been beneficially used in diseases, particularly on those of the mind; or on which the mind could act in a salutary manner.

**MUSICOMANIA, Musomania,** from *music*, and *mania*. A variety of monomania in which the passion for music is carried to such an extent, as to derange the intellectual faculties.

**MUSING, LISTLESS, Aphelxia otiosa.**

**MUSIQUE, Music.**

**MUSK, Moschus, Mosch, (Arab.) (F.) Muso.** A peculiar concrete animal substance, of a very diffusible odour, bitter taste, and a deep brown colour: solid, and enclosed in a sac found near the anus of the *Moschus moschiferus* or *Musk Deer*. It is possessed of stimulant and antispasmodic properties. Dose, gr. v. to ʒj in bolus.

**MUSK, ARTIFICIAL, Moschus factitious, Resina Succini.** (*Ol. succini rectific.* 1 part, *acid. nitric.* 4 parts. Digest;—a black matter will be deposited, which must be well washed with water.)

**MUSKGRAPE FLOWER, Bulbus vomitorius.**

**MUSKMALLOW, Hibiscus abelmoschus.**

**MUSKSEED, see Hibiscus abelmoschus.**

**MUSKWOOD, Thymiana.**

**MUSOMANIA, Musicomania.**

**MUSSENDA FRONDOSA, Bellilla, Balsam.** A decoction of this plant has been esteemed refrigerant.

**MUSSEL, Mytilus edulis.**

**MUSSITATIO, Musitation,** from *musitare*, itself from *musare*, 'to murmur.' A condition, in which the tongue and lips move, as in the act of speaking, but without sounds being produced. This sort of murmuring is an unfavourable sign in disease, as indicating great cerebral debility.

**MUSTACEUM:** from *Mustacea*, a kind of laurus used in making it. A kind of wedding-cake used by the ancients, which consisted of meal, aniseed, cummin, and several other aromatics; its object—it has been conceived—being to prevent or remove the indigestion occasioned by too great indulgence at the marriage feast.

**MUSTACHE, Mystax.**

**MUSTARD, BLACK, Sinapis**—*m.* *Clammy, Polanisia graveolens*—*m.* *Essence of, Whitehead's, see Sinapis*—*m.* *False, Polanisia graveolens*—*m.* *Hedge, Erysimum*—*m.* *Mithridate, Thlaspi campestre*—*m.* *Stinking hedge, Alliaria*—*m.* *Treacle, Thlaspi arvense*—*m.* *White, Sinapis alba*—*m.* *Wild, Sinapis arvensis.*

**MUSTELANEUS, Galeancon.**

**MUSTUM, Wort.**

**MUTACISMUS, Mutacism,** from *mutacis*, "I use the letter *m* too frequently." A vicious pronunciation; consisting, according to Sauvages, in the frequent repetition of the letters *b*, *p*, and *m*, which are substituted for others.

**MUTEOSIS.** Under this name is comprehended every phenomenon of expression, voluntary and involuntary, which impresses the sight or touch.

**MUTILATION, Mutillatio, Maiming,** from *mutillus*, 'broken.' The removal or privation of

a limb, or of some other external part of the body. In all countries, this crime has been punished with severity.

**MUTINUS**, Penis.

**MUTISME**, Mutitas.

**MUTITAS**, *mutus*, 'dumb.' *Obtusescentia*, *Alalia*, *Ana'dia*, *Dumbness*, *Speechlessness*, (F.) *Mutismo*, *Mutité*. Impossibility of articulating sounds; although they can be elicited. Dumbness is often congenital, and united with deafness, of which it is an effect. In some cases it is accidental.

**MUTITAS SURDORUM**, *Aphonia Surdorum*, *Surdmutitas*, *Deaf-dumbness*. Speechlessness from deafness; congenital, or produced during infancy. The subjects of this affection are called *deaf-dumb*, (F.) *Sourds-muets*.

**MUTITÉ**, Mutitas.

**MUTO**, Penis.

**MUTIONIATUS**, Membrosus.

**MUTTERKORN**, Ergot.

**MYACANTHA**, Ruscus.

**MYASTHENIA**, from *μῦς*, 'a muscle,' and *ασθενία*, 'debility.' Muscular debility.

**MYCE**, Occlusion.

**MYCES**, Fungus.

**MYCHMUS**, Suspirium.

**MYCHTHISMUS**, Moaning, Suspirium.

**MYCODERMA**, see *Porrigo favosa*—m.

*Cerevisia*, *Torula cerevisias*.

**MYCODES**, Fungoid.

**MYCORTHOPNEA**; from *μῦκος*, 'mucus,' and *ορθοπνοία*, 'difficulty of breathing except when in the erect attitude.' *Orthopnoea* from excessive secretion of mucus in the air-passages—*Orthopna a pituitosa*.

**MYCOSIS**, Fungus.

**MYCTERES**, *Μυξæ*, Nares.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

**MYCTEROPHONIA**, Rhinophonia.

various nervous and vascular irregularities of function. It is not common. Dr. Marshall Hall proposes to call the inflammation of the membranes of the brain *Meningitis*; that of the substance of the brain *Myelitis*.

**MYELITIS SPINALIS**, *Myelitis*—m. *Exsudativa*, *Hydrorachis*—m. *Parenchymatosa*, *Myelitis*.

**MYELOCHYSIS**, *Hydrorachis*.

**MYELOGANGLIITIS**, *Cholera* (sporadic.)

**MYELOMA**, see *Encephaloid*.

**MYELOMACIA**, *Mollities medullæ spinalis*.

**MYELOMYCES**, see *Encephaloid*.

**MYELOPHTHISIS**, *Tabes dorsalis*—m. *Sicca*, *Tabes mesenterica*.

**MYELOPHYMATA**, *Tubercula medullæ spinalis*, from *μῦκος*, 'marrow,' and *φυμα*, 'a tubercle.' Tubercles of the spinal marrow.

**MYELORRHAGIA**, *Apoplexia myelitica*.

**MYELOSPONGUS**, see *Encephaloid*.

**MYELUS**, Marrow, *Medulla spinalis*—m.

*Diauchenius*, *Medulla spinalis*—m. *Dorsites*,

*Medulla spinalis*—m. *Notisus*, *Medulla spinalis*—m. *Poites*, *Medulla spinalis*.

**MYENERGIA**, from *μῦς*, 'a muscle,' *εν*,

and *εργον*, 'work.' Muscular strength.

**MYGMUS**, *Suspirium*.

**MYOCEPHALUM**, *Staphyloma*.

**MYIODEOPSIA**, *Metamorphopsia*.

**MYITIS**, *Myositis*, *Rheumatism*, acute.

**MYLACRI**, *Molar teeth*.

**MYLACRIS**, *Patella*.

**MYLE**, *Patella*, *Mole*.

**MYLICUS**, *Molar*.

**MYLODI**, *Molar teeth*.

**MYLODONTES**, *Molar teeth*.

**MYLO-GLOSSUS**, from *μύλη*, 'the jaw,' and *γλῶσσα*, 'the tongue.' Winslow has given this name to muscular fibres, which pass from the posterior part of the myloid line of the lower jaw, and from the sides of the base of the tongue to the parietes of the pharynx. These fibres belong to the constrictor superior pharyngis.

**MYLO-HYOID LINE**, see *Mylo-hyoideus*.

**MYLO-HYOID FURROW OR GROOVE**. A furrow which passes from the superior orifice of the inferior dental canal of the lower jaw in the same direction as the canal, and lodges the *mylo-hyoid nerve*, a branch of the inferior-dental.

**MYLO-HYOID NERVE**, see *Mylo-hyoid furrow*.

**MYLO-HYOIDEUS**, from *μύλη*, 'the jaw,' and *υψίδης*, 'the os hyoides.' *Mylo'des*, (F.) *Mylo-hyoideus*. The *Mylo-pharyngeus* of Morgagni and Santorini. This muscle is situated at the upper and anterior part of the neck, behind the lower jaw. It is broad, flat, and has the form of a truncated triangle. It arises from the *internal oblique*, *internal maxillary* or *mylo-hyoid line* of the lower jaw bone, and is inserted at the fore part of the body of the os hyoides. Its innermost fibres unite with those of the opposite side to form a raphe on the median line. The *mylo-hyoideus* raises the os hyoides and carries it forward, or it depresses the lower jaw.

**MYLO-PHARYNGEUS**, *Constrictor pharyngis*, *Mylo-hyoideus*.

**MYLUODES**, *Mylo-hyoideus*.

**MYOCARDITIS**, *Carditis*.

**MYOCEPHALITIS**, *Myi'tis cephalica*; from *μῦς*, 'a muscle,' *κεφαλή*, 'head,' and *itis*, de-

various nervous and vascular irregularities of function. It is not common. Dr. Marshall Hall proposes to call the inflammation of the membranes of the brain *Meningitis*; that of the substance of the brain *Myelitis*.

**MYELITIS SPINALIS**, *Myelitis*—m. *Exsudativa*, *Hydrorachis*—m. *Parenchymatosa*, *Myelitis*.

**MYELOCHYSIS**, *Hydrorachis*.

**MYELOGANGLIITIS**, *Cholera* (sporadic.)

**MYELOMA**, see *Encephaloid*.

**MYELOMACIA**, *Mollities medullæ spinalis*.

**MYELOMYCES**, see *Encephaloid*.

**MYELOPHTHISIS**, *Tabes dorsalis*—m. *Sicca*, *Tabes mesenterica*.

**MYELOPHYMATA**, *Tubercula medullæ spinalis*, from *μῦκος*, 'marrow,' and *φυμα*, 'a tubercle.' Tubercles of the spinal marrow.

**MYELORRHAGIA**, *Apoplexia myelitica*.

**MYELOSPONGUS**, see *Encephaloid*.

**MYELUS**, Marrow, *Medulla spinalis*—m.

*Diauchenius*, *Medulla spinalis*—m. *Dorsites*,

*Medulla spinalis*—m. *Notisus*, *Medulla spinalis*—m. *Poites*, *Medulla spinalis*.

**MYENERGIA**, from *μῦς*, 'a muscle,' *εν*,

and *εργον*, 'work.' Muscular strength.

**MYGMUS**, *Suspirium*.

**MYOCEPHALUM**, *Staphyloma*.

**MYIODEOPSIA**, *Metamorphopsia*.

**MYITIS**, *Myositis*, *Rheumatism*, acute.

**MYLACRI**, *Molar teeth*.

**MYLACRIS**, *Patella*.

**MYLE**, *Patella*, *Mole*.

**MYLICUS**, *Molar*.

**MYLODI**, *Molar teeth*.

**MYLODONTES**, *Molar teeth*.

**MYLO-GLOSSUS**, from *μύλη*, 'the jaw,' and *γλῶσσα*, 'the tongue.' Winslow has given this name to muscular fibres, which pass from the posterior part of the myloid line of the lower jaw, and from the sides of the base of the tongue to the parietes of the pharynx. These fibres belong to the constrictor superior pharyngis.

**MYLO-HYOID LINE**, see *Mylo-hyoideus*.

**MYLO-HYOID FURROW OR GROOVE**. A furrow which passes from the superior orifice of the inferior dental canal of the lower jaw in the same direction as the canal, and lodges the *mylo-hyoid nerve*, a branch of the inferior-dental.

**MYLO-HYOID NERVE**, see *Mylo-hyoid furrow*.

**MYLO-HYOIDEUS**, from *μύλη*, 'the jaw,' and *υψίδης*, 'the os hyoides.' *Mylo'des*, (F.) *Mylo-hyoideus*. The *Mylo-pharyngeus* of Morgagni and Santorini. This muscle is situated at the upper and anterior part of the neck, behind the lower jaw. It is broad, flat, and has the form of a truncated triangle. It arises from the *internal oblique*, *internal maxillary* or *mylo-hyoid line* of the lower jaw bone, and is inserted at the fore part of the body of the os hyoides. Its innermost fibres unite with those of the opposite side to form a raphe on the median line. The *mylo-hyoideus* raises the os hyoides and carries it forward, or it depresses the lower jaw.

**MYLO-PHARYNGEUS**, *Constrictor pharyngis*, *Mylo-hyoideus*.

**MYLUODES**, *Mylo-hyoideus*.

**MYOCARDITIS**, *Carditis*.

**MYOCEPHALITIS**, *Myi'tis cephalica*; from *μῦς*, 'a muscle,' *κεφαλή*, 'head,' and *itis*, de-

noting inflammation. Inflammation of the muscles of the head.

**MYOCEPHALON**, Staphyloma.

**MYOCELIAL'GIA**, from *μῦς*, 'muscle,' *κοιλία*, 'abdomen,' and *ἀλγος*, 'I suffer.' Pain in the muscles of the abdomen.

**MYOCELI'TIS**, *Myoceli'tis*, *Inflammati'o musculor'um abdominal'ium*, from *μῦς*, 'muscle,' *κοιλία*, 'lower belly,' and *ίσις*, denoting inflammation. Inflammation of the muscles of the abdomen.

**MYODEOP'SIA**, Metamorphopsia.

**MYO'DES**, from *μῦς*, 'a muscle,' and *είδος*, 'resemblance.' Like unto muscle. Muscular.

**MYODESOP'SIA**, Metamorphopsia.

**MYODYNA'MIA**, *Vis muscula'ris*; from *μῦς*, 'a muscle,' and *δυναμίς*, 'power.' The force or power of a muscle.

**MYODYNAMICS**, see Muscular contraction.

**MYODYNAMIOMETER**, Dynamometer.

**MYODYNAMOMETER**, Dynamometer.

**MYODYN'IA**, from *μῦς*, 'muscle,' and *ἔδωγ*, 'pain.' Pain in the muscles,—rheumatismal or other. Rheumatism.

**MYODYNIA INFLAMMATORIA**, Myositis.

**MYOGRAPHY**, *Myogra'phia*, from *μῦς*, 'muscle,' and *γράφω*, 'to describe.' An anatomical description of the muscles.

**MYOLEM'MA**, *Myole'ma*, from *μῦς*, 'a muscle,' and *λεμμα*, 'a coat.' The membranous tube of each muscular fibre. It has also the same signification as *Sarcolemma*.

**MY'OLINE**, from *μῦς*, 'a muscle.' A name given by Mr. Erasmus Wilson to a transparent substance that fills the cells, which, he conceives, by their juxtaposition form the ultimate muscular fibril.

**MYOL'OGY**, *Myolog'ia*, *Sarcolog'ia*, *Myosilog'ia*; from *μῦς*, 'a muscle,' and *λογος*, 'a discourse.' That part of anatomy which treats of the muscles.

**MYON**, Muscle.

**MYONARCO'SIS**, from *μῦς*, 'a muscle,' and *ναρκή*, 'stupor.' Numbness of the muscles.

**MYONITIS**, Myositis.

**MYON'OSUS**, *Myonos'os*, *Myopathi'a*, from *μῦς*, 'a muscle,' and *νοσος*, 'disease.' A disease of the muscles.

**MYOPALMUS**, Subsultus tendinum.

**MYOPATHIA**, Myonosis.

**MYOPHO'NIA**, from *μῦς*, 'a muscle,' and *φωνή*, 'voice.' The sound of muscular contraction,—as that of the ventricles of the heart, during the systole of that organ.

**MYO'PIA**, *Myopi'asia*, *Lusivos'itas*, *Myo'is*, *Paropi'sis propin'qua*, *Amblyo'pia dissitiorum*, *Dyso'pia dissitiorum*, *Dyepho'tia*, *Visus juvenis*, from *μῦς*, 'I close,' or from *μῦς*, 'a mouse,' and *ὤψ*, 'the eye;' *Near-sightedness*, *Mouss-sight*, *Purblindness*, (F.) *Vus courts*. Persons who can only see objects very near. The defect is owing to the too great convexity of the eye, or too great density of the humerus, and is palliated by wearing concave glasses.

**MYOPODIORTHO'TICON**, from *μῦς*, 'one that is short-sighted,' and *διορθωτικόν*, 'having power to correct.' An apparatus for the cure of short-sightedness.—A. A. Berthold.

**MYOPS**, *μυωψ*, *Lusio'pus*, *Myo'pus*. Same etymon. One affected with myopia or short-sightedness.

**MYORRH'EX'IS**, from *μῦς*, 'a muscle,' and *ῥήξις*, 'rupture.' Rupture of a muscle.

**MYO'SIS**, from *μῦς*, 'I close.' *Phth'osis pupilla'ris*. Permanent contraction of the pupil. It is usually caused by iritis, and is extremely difficult to cure. When it exists to such an extent as to obliterate the pupil, it is called Synizesis. Also, Myopia.

**MYOSIT'É**, Myositis.

**MYOSIT'IS**, *Myo'itis*, *Myo'itis*, *Myoni'tis*, *Sarci'tis*, *Rheumati'smus phlegmono'des*, *Myodyn'ia inflammati'ria*, *Phlegmo'gia myoica*, *Inflammati'o seu Phlegmon'É Musculo'rum*, (F.) *Myosite*, *Inflammati'o des Muscles*, from *μῦς*, 'a muscle.' A name proposed by Sagar for inflammation of the muscles. Also, Rheumatism.

**MYOSOTIS**, Hieracium pilosella, Rheumatism, Rheumatism, acute.

**MYOSPASMUS**, Cramp.

**MYOTIL'ITY**, *Myotil'ias*, from *μῦς*, 'a muscle.' Muscular contractility.—Chaussier.

**MYOT'OMY**, *Myotom'ia*, from *μῦς*, 'a muscle,' and *τέμνω*, 'to cut.' The part of practical anatomy which treats of the dissection of the muscles. Also, the surgical operation of the division of muscles to remove deformity.

**MYOTYRBE**, Chorea.

**MYRAC'OPUM**, from *μύρον*, 'an ointment,' and *κοπος*, 'fatigue.' An ointment used by the ancients in cases of fatigue.

**MYREPSUS**, Unguentarius.

**MYR'IAGRAMME**, from *μύρια*, '10,000,' and *γράμμα*, 'gramme.' A weight equal to 10,000 grammes, or to 26 pounds, 9 ounces, and 6 drachms Troy.

**MYRIAMETRE**. A measure of 10,000 metres; equal to 16 miles, 1 furlong, 156 yards, and 14 inches.

**MYRICA ASPLENIFOLIA**, *Comptonia asplenifolia*—m. *Cerifera*, see *Cera flava* et alba, and Wax, myrtle.

**MYR'ICA GALÉ**, *Myrtus Brabantica*, *M. Anglica*, *Myrtis'folia Belgica*, *Gale*, *Gagel*, *Rhus sylvos'tris*, *Ac'aron*, *Elæagnus*, *E. Cordo*, *Chamalaagnus*, *Dodona'a*, *Dutch myrtle*, *Sweet gale*, *Sweet willow*, *Candleberry myrtle*, (F.) *Piment Royal*, *Thé de Simon Pauli*, *Gale odorant*. Family, *Amentacea*. *Sex. Syst.* *Diœcia Tetrapdia*. The leaves, flowers, and seeds have a strong, fragrant smell, and a bitter taste. They are used for destroying moths and cutaneous insects, and the infusion is given internally as a stomachic and vermifuge.

**MYRINGA**, see *Tympanum*.

**MYRINX**, see *Tympanum*.

**MYRIS**, *Myrotho'ci*, *Narth'ecia*, *Nartho'cium*, *Narthez*, from *μύρον*, 'a perfumed oil or ointment.' A perfumed oil or ointment box or jar.

**MYRISTICA**, see *M. moschata*.

**MYRISTICA MOSCHA'TA**, *M. aromati'ca*, *Comacon*. *Nat. Ord.* *Myristicæ*. The tree which produces the nutmeg and mace. (F.) *Muscadier*. The *Nutmeg*, *Myristica* (Ph. U. S.) *Myristica nucleus*, *Myristica moschata' nucleus*, *Nux moschata' seu unguenta'ria*, *Nucis'ta*, *Nux myristica*, *Chrysobalanus Gale'ni*, *Unguenta'ria*, *As'sala*, *Nux aromati'ca*, (F.) *Muscade*, is the seed or kernel. It has a fragrant, aromatic odour; an agreeable pungent taste, and is much used for culinary purposes. Alcohol extracts its active matter. It has the properties of aromatics in general; being stimulant and stomachic. The oil—*O'leum myristica*—possesses

the virtues of the nutmeg. Dose of the nutmeg, gr. v. to ℥j;—of the oil gr<sup>ss</sup>. iij to gr<sup>ss</sup>. vj.

*Mace*, *Macis*, *Maccos*, *Flores macis seu macidos*, (F.) *Fleurs de muscade*, is the involucre of the fruit; it is membranous, with the odour and taste of the nutmeg, and is possessed of similar qualities. The *O'leum macis* is a fragrant, sebaceous substance, expressed in the East Indies. It is only used externally.

MYRISTICÆ NUCLEUS, see *Myristica moschata*.

MYRMECIA, Formica.

MYRMECIASIS, Convulsio cerealis, Formication.

MYRMECIASMUS, Convulsio cerealis, Formication.

MYRMECISMUS, Convulsio cerealis, Formication.

MYRMECIZON, Formicant.

MYRMECOSIS, Convulsio cerealis, Formication.

MYRMEX, Formica.

MYROBALANUS, from *μυρον*, 'an ointment,' and *βελανος*, 'a nut;' so called, because formerly used in ointments; *Angelo'caeos*, *Myro'balan*, *Glans unguenta'ria*, *Palma unguenta'rio'rum*. A dried Indian fruit, of the plum kind, of different species of *Terminalia*. Of this there are several varieties—the *M. Bellirica* or *Balliric myrobalan*, *Bellagu*, *Bellerigi*, *Belnilog*:—the *M. chebul* or *Chebul myrobalan*; the *M. citrina* or *Yellow myrobalan*, *Ara'ra*; the *M. Emblica* or *emblic myrobalan*, and the *M. Indica*, *A'uar*, *Indian*, or *Black myrobalan*. All the myrobalans have an unpleasant, bitterish, very austere taste; and strike an inky blackness with a solution of steel. They are said to possess laxative as well as astringent properties.

MYRON, Myrum, Unguentum.

MYROPISSOCE'RON. A topical application in alopecia, referred to by Galen; from *μυρον*, 'ointment,' *πισσα*, 'pitch,' and *κηρος*, 'wax.'

MYROPEUS, Unguentarius.

MYROPOLES, Apothecary, Unguentarius.

MYROSPERMUM PERUIFERUM, see *Myroxylon Peruiferum*.

MYROXYLON, see *M. Peruiferum*.

MYROXYLON PERUIFERUM, from *μυρον*, 'an ointment,' and *ξυλον*, 'wood;' *Caburei'ba*. *Nat. Ord.* Leguminosæ. The tree which affords the *Peruvian balsam*, *Balsamum Peruvia'num*, *Putzochill*, *Myroz'yli Peruisferi balsamum*, *Myroz'yllon* (Ph. U. S.), *Balsamum Perua'num*, *Cabureiciba*, *Indian*, *Mezican*, or *American balsam*, (F.) *Baume de Pérou*. This balsam consists of benzoic acid, resin, and essential oil. Its odour is fragrant and aromatic; taste hot and bitter: it is soluble in alcohol, and miscible in water by the aid of mucilage. It is stimulant and tonic, and considered to be expectorant: as such, it has been employed in paralysis, chronic asthma, chronic bronchitis and rheumatism, gleet, leucorrhœa, &c., and externally, for cleansing and stimulating foul indolent ulcers. Dose gr<sup>ss</sup>. v. to gr<sup>ss</sup>. xxx.

*White Balsam of Peru*, *Natural balsam*, *Balsamum album*, *Styrax alba*, *Balsamel'aron*, is obtained by incision from *Myrospermum peruiferum*.

MYROXYLON TOLUIFERUM, *Toluisera Balsamum*.

MYRRHA, *μυρρα*, Heb. *מו*; *Bola*, *Stact'*,

*Bergas'ma*, *Myrrh*, *Calo'nia*, *Smyrna*, *Myrrha rubra*, (F.) *Myrrha*. The exudation of an unknown plant of Abyssinia or Arabia Felix, said to be the *Balsamaden'dron myrrha*. This gum-resin has a fragrant, peculiar odour; and bitter aromatic taste. It is in reddish-yellow, light, brittle, irregular tears; partially soluble in distilled water when aided by friction. S. G. 1.360. It is stimulant; and has been used in cachectic affections, humoral asthma, chronic bronchitis, &c. Dose, gr. x. to ʒj.

MYRRHA IMPERFECTA, *Bdellium*.

MYRRHINE, *Myrtus*.

MYRRHIS ANNUA, *Athamanta Cretenais*—m. *Odorata*, *Chærophyllum odoratum*.

MYRSINE, *Myrtus*.

MYRSINELÆ'ON, from *μυρσινη*, 'the myrtle,' and *λαιον*, 'oil.' Oil of myrtle.—*Dioscorides*.

MYRSINI'TES, *μυρσινιτης*. Wine in which branches of myrtle have been macerated.

MYRTACANTHA, *Ruscus*.

MYRTE COMMUN, *Myrtus*.

MYRTID'ANON, *μυρτιδανον*. An excretion, growing on the trunk of the myrtle, and used as an astringent. Also, a wine—*Vinum Myrtid'anum*—made from wild myrtle berries.

MYRTIFOLIA BELGICA, *Myrica gale*.

MYRTIFORM, *Myrtiformis*, *Myrto'des*, from *myrtus*, 'a myrtle,' and *forma*, 'shape.' Having the shape of a leaf of myrtle. A name given to a muscle (depressor alæ nasi), to the fossa incisiva; and to certain caruncles, &c.

MYRTIFORMIS, Compressor naris, Depressor alæ nasi.

MYRTI'TES. A name given to a medicine prepared with honey and myrtle berries.

MYRTLE, *Myrtus*—m. *Berry*, *Vaccinium myrtillus*—m. *Candleberry*, *Myrica gale*—m. *Dutch*, *Myrica gale*—m. *Wild*, *Ruscus*.

MYRTOCHEILIDES, *Nymphæ*.

MYRTOCHILA, *Nymphæ*.

MYRTODES, *Myrtiform*.

MYRTON, *Clitoris*.

MYRTUS, *Myrtus communis*, *M. communis Italica*, *Myrsinè*, *Myrrhinè*, *The Myrtle*, (F.) *Myrta Commun*. The berries of this plant have been recommended in alvine and uterine fluxes and other disorders of relaxation and debility. They are moderately astringent and somewhat aromatic.

MYRTUS ANGLICA, *Myrica gale*—m. *Brabantica*, *Myrica gale*.

MYRTUS CARYOPHYLLA'TA, *Cassia caryophyllata*, *Canel'la caryophyllata*, (F.) *Capulet*, *Cannelle giroflée*. The tree which affords the *Cloves bark*; *Cortex caryophyllatus*. This bark is a warm aromatic; resembling clove with an admixture of cinnamon. It may be used with the same views as cloves or cinnamon.

MYRTUS PIMENTA. The tree which bears the *Jamaica pepper*; *Pimenta* *baccos*, *Pimento berries*, *Pimento*, *Piper caryophyllatum*, *Cocculi Indi aromati'ci*, *Piper chia'pa*, *Amomum pimenta*, *Fructus pimenti*, *Carivos*, *Caryophyllus America'nus*, *Piper odoratum Jamaica'nsis*, *Allspice*, *Piper Jamaica'nsis*, *Piper tabascum*, (F.) *Poirra de Jamaïque*, *Toite ip'ce*, *Assourou*. The unripe berries—*Pimenta* (Ph. U. S.)—have an aromatic odour; resembling a mixture of cinnamon, nutmeg, and cloves; the taste is pungent, but mixed, like the odour.

Like other peppers, this is stimulant and carminative. The oil—*Oleum Pimentæ*—possesses the virtues of the berries. The powdered fruit has been called *Quatre épices* or *Four spices*. Dose, gr. v. to ℥ij.

MYRUM, *Myron*, μυρον. A perfumed oil or ointment. A liquid perfume. The spontaneously exuding juice of many plants, especially of that from which myrrh is obtained.

MYS, Mucle.

MYSIOLOGIA, Myology.

MYSTITIS, Myositis.

MYSTAX, *Mastax*. The hair growing on each side of the upper lip in men. The *mustache* or *mustachio*, (F.) *Moustache*. Also, the upper lip.

MYSTERION, μυστηριον, 'a mystery.' An arcanum, nostrum, or secret preparation in general. Also, an antidote referred to by Galen and others.

MYSTRON, μυστρον. A Greek measure, which held about three drachms.

MYTILUS EDULIS. The common mussel, (F.) *Moule*. A bivalve, the flesh of which,

when at all in a state of decomposition, is highly poisonous. When fresh, it is an agreeable, but not very digestible article of diet.

MYURUS, *Meiuros*. A pulse is so called when it sinks progressively and becomes smaller and smaller like a rat's tail; from μυρ, 'rat,' and ουρζ, 'tail.' *Pulsus myurus reciprocus*, a pulse, which, after having become gradually weaker, resumes, by degrees, its former character.

MYXA, Mucus, Sebestina.

MYXÆ, Mycteres.

MYXEOSIS, Gonorrhœa impura.

MYKODES, Muciform.

MYXORRHOOS, μυκorrhœος, from μυξα, 'mucus,' and ρησ, 'I flow.' One who is subject to mucous discharge. Applied to an infant, that discharges a considerable quantity of mucus and saliva.

MYXOSARCOMA, from μυξα, 'mucus,' and σαξ, 'flesh.' A tumour which is *mucocarcinoma*; partly mucous and partly fleshy.

MYXOTER, Nasus.

MYZESIS, Sucking.

## N.

N. This letter, in prescriptions, is an abridgment of *Numero*, 'by number.'

NABOT, Saccharum candidum.

NABOTHI GLANDULÆ, *Ovula seu Ova Nabothi seu Nabothiana, Ovarium Nabothi, Follisculi rotundi et oblongi, Vesiculae seu Bulla rotunda cervicis uteri, Vesicula seminales mulierum, Cervicis globosa, Corpuscula globosa, Glandulae seu Hydatides cervicis uteri*. Small, mucous crypts or follicles situated in the interstices of the duplicatures of the lining membrane of the cervix uteri. Naboth, from noticing them in a morbid condition, mistook them for ova; and hence they received the name *Ovula Nabothi*.

NACRA, *Nakra, Nasa*. A kind of influenza common in the East Indies.

NACRÆ, Margaritaceus.

NÆVI, see *Nævus*.

NÆVUS, *Nævus maternus, N. Sigillum, Nota materna, Nevus*—Plural *Nævi, Maculae matricis, M. Materna seu matricales, Nota infantum, Lupus varicosus, Stigmata, Metæostoides, Congenita nota, Mother's Marks, Fancy marks, Mother's spots*, (F.) *Envie, Tache de Naissance*. Spots of various kinds on the skin of children when born, which have been attributed to the influence of the maternal imagination on the fœtus in utero. They are of various appearances, some much better supplied with blood than others. Some are merely superficial or stain-like spots. Others are prominent; and often have long, irregular hairs growing from them. These have usually been called *Moles, Spili, Spiloma, Epichroæa spili*, &c.

When *nævi* are superficial, without any disposition to enlarge or spread, they need not be meddled with; but all those that partake of the character of aneurism by anastomosis had better be removed by the knife, where practicable.

NÆVUS SIGILLUM, *Nævus*.

NAFDA, Naphtha.

NAIL, Sax. *næxl*, (G.) *Nagel, Unguis, Onyx*, (F.) *Ongle*. A whitish transparent substance, similar to horn, which covers the dorsal extremity of the fingers. Three portions are distinguished in it; the *extremity*, which is free, at the end of the finger;—the *body* or middle portion adherent by its inner surface; and the *root, Radix* seu *Matrix unguis, Intimum unguis*. The last presents two distinct parts; the one, terminated by a thin, serrated edge, is buried in a duplicature of the skin; the other, called *lunula* seu *Semilunula* seu *Seloné* seu *Arcus* seu *Exortus* seu *Anatolè* seu *Albedo unguis*, is whitish and of a semilunar shape, and is situate above the part where the epidermis terminates. The nails are composed of a horny tissue, of the same nature as that which forms the hoofs, horns, and scales of different animals. When the nail has been torn off, the papillæ of the skin become covered by a soft, whitish lamina, whose consistence gradually augments. New laminae are then formed underneath, and give the nail the thickness it ought to possess. The corneous substance, being thus constantly produced at the extremity of each of these laminae, the whole of the nail is pushed forwards, and it would grow indefinitely, were it not cut or worn by friction.

The nails protect and support the extremities of the fingers against the impression of hard bodies. They are, also, useful in laying hold of small bodies; and dividing those that have but little consistence.

NAÏN, Nanus.

NAKRA, Nacra.

NANOCEPH'ALUS, from νανος, 'a dwarf,' and κεφαλη, 'head.' A monstrous state in which the whole head or certain of its parts are too small, whilst the trunk and extremities are normal.

NANOCORMUS, from νανος, 'a dwarf,' and

*νεμες*, 'a trunk.' A monstrous condition in which the trunk is too small, whilst the head possesses its normal size.

NANOM'ELUS, from *νανος*, 'a dwarf,' and *μειλος*, 'a limb.' A monstrous condition in which some part of an extremity is too small, and the whole limb too short.

NANOSOM'US, from *νανος*, 'a dwarf,' and *σωμα*, 'body.' *Dwarfishness*. A state in which the entire body with all its parts is smaller than common.

NANUS, *Pumilio*, *Pumilo*, *Pusillus*, 'a dwarf.' (*Pumilus*, *Pomillus*, 'dwarfish.') (F.) *Nain*. One, who is much below the usual stature. The term is applicable to all organized beings from man to the vegetable. Trees have their dwarfs, as the human species have theirs. Some curious authenticated instances of human dwarfs are on record. Bebe, the dwarf of Stanislaus, king of Poland, was 33 inches (French) long, and well proportioned. The Polish nobleman, Borwlaski, who was well made, clever, and a good linguist, measured 28 Paris inches. He had a brother, 34 inches high, and a sister 21. A Friesland peasant, at 26 years of age, had attained 29 Amsterdam inches. C. H. Stöberin, of Nürnberg, was under three feet high at 20, yet he was well proportioned and possessed of talents. General Tom Thumb so called, was seen by the Author in 1847. He was said to be 15 years old; measured 28 inches in height, and when weighed at the mint was found to weigh 20 pounds and 2 ounces.

NAPE OF THE NECK, *Nucha*.

NAPELLUS. VERUS, *Aconitum napellus*.

NAPHÆ FLORES, see *Citrus aurantium*.

NAPHTHA, *Acetone*.

NAPHTHA, *Nafsa*, *Napta*, *Napta'lius*, *O'leum petra album*; from a Chaldaic and Syriac word signifying *bitumen*. A bituminous substance, found in Persia, Calabria, Sicily, &c. It is liquid, limpid, of a yellowish white colour, a smell slightly resembling that of oil of turpentine, and lighter than water. It resembles petroleum in its properties, and has been chiefly used as an external application; although, occasionally, as an anthelmintic, and in inhalation in phthisis pulmonalis.

NAPHTHA VITRIOLI, *Ether sulphuricus*—*n*. *Vitrioli camphorata*, *Tinctura ætherea camphorata*—*n*. *Vitrioli martialis*, *Tinctura seu Alcohol sulphurico-æthereus ferri*—*n*. *Wood*, *Acetone*.

NAPHTHALINE, *Naphthali'na*, *Naphthalin*. When coal-tar is subjected to distillation, naphthaline passes over after coal naphtha. It is a white, shining, concrete, crystalline substance, fusible at 176° and boiling at 423°. It is soluble in alcohol, ether, naphtha and the oils, but insoluble in water. It has been used as an excitant expectorant, in the dose of 8 to 30 grains, in emulsion or syrup, and repeated. It has also been used as an anthelmintic; and, when made into an ointment, in psoriasis, lepra vulgaris, &c.

NAPIFORM, *Bunioid*.

NAPIUM, *Lapsana*, *Sinapis*.

NAPLES, (CLIMATE OF.) The climate of Naples in its general characters resembles that of Nice, but it is more changeable: the sirocco too, which is little known in Nice, is severely felt at Naples. It is not a good residence for the phthisical invalid: Sir James

Clark, indeed, considers it altogether unsuitable.

NAPLES, MINERAL WATERS OF. In the Quarter Santa Lucia, near the coast, is a cold spring, rich in sulphuretted hydrogen and carbonic acid. It is much used as an aperient tonic, and in cutaneous affections.

NAPLES WATER, *FACIT'IOUS*, (F.) *Eau de Naples*, *Aqua Neapolitana*, *Aqua acid'ula hydrosulphurata*. (*Acidulous water*, containing four times its bulk of carbonic acid,  $\frac{3}{4}$  xv, and  $\frac{3}{4}$  ij; *hydrosulphuretted water*,  $\frac{3}{4}$  ix; *carbonate of soda*, gr. viij; *carbonate of magnesia*, gr. x. *M. Ph. P.*)

NAPTA, *Nanus*, *Nata*.

NAPTALIUS, *Nanus*.

NAPUS, *Sinapis*—*n*. *Leucosinapis*, *Sinapis alba*—*n*. *Sylvestris*, *Brassica napus*.

NAPY, *Sinapis*.

NARCAPHTE, *Thymiana*.

NARCAPH'THON, *Nascaph'thon*. The bark of an aromatic tree formerly brought from India. By some, supposed to be that of the tree which affords the *olibanum*. It was used in fumigation, in diseases of the lungs.

NARCE, *Narcosis*.

NARCEMA, *Narcosis*.

NARCEPIS, *Narcosis*.

NARCISSE FAUX, *Narcissus pseudo-narcissus*—*n*. *des Près*, *Narcissus pseudo-narcissus*—*n*. *Sauvage*, *Narcissus pseudo-narcissus*.

NARCIS'SUS PSEUDO-NARCIS'SUS, *Daffodil*, (F.) *Narcissus savages*, *Narcissus des près*, *Faux narcissus*. The root is emetic and cathartic, in the dose of  $\frac{3}{4}$  j. The flowers are antispasmodic. Dose, 24 grains.

NARCODES, *Narcotized*.

NARCO'SIS, *Nar'cotism*, *Narcl*, *Narca*, *Narces'ma*, *Narces'is*, from *ναρκαω*, 'I benumb.' *Torpe'do*, *Torpor*, *Stupor*, *Stupefactio*. The aggregate effects produced by narcotic substances. At times, narcotism is confined to a state of more or less profound stupor; and constitutes, in certain cases, a useful remedial condition; at others, it is a true poisoning, characterized by vertigo, nausea, a state of intoxication or apoplexy, constant delirium, convulsive motions, &c. Emetics in strong doses, and not much diluted with water; purgatives and glysters are the first means to be used in this condition. The stupor may afterwards be combated by the use of exciting and stimulating drinks.

NARCOSIS FOLLICULO'RUM. A state of the scalp, which Mr. Erasmus Wilson conceives to be dependent upon torpid action of the hair follicles, and on which the scalp and hair are found covered with a yellowish, dirty-looking powder, composed of an admixture of granular particles and furfuraceous scales.

NARCOSPASMUS, from *ναρκη*, 'stupor,' and *σπασμος*, 'spasm.' *Stupor* combined with spasm.

NARCOTIA, *Narcotine*.

NARCOTIC POISON, see *Poison*.

NARCOTICO-ACRID, see *Poison*.

NARCOTICS, *Naroot'ica*, *Carot'ica*, *Obstupefacient'ia*, *Stupefacient'ia*, *Cerebro-spinant's*, (F.) *Stupefactifs*, *Stupefiant's*. Same etymon. Substances, which have the property of stupefying;—as opium, stramonium, hyoscyamus, belladonna, &c. They are used in medicine as soothing agents; exerting their particular influence on the brain. In small doses, as a ge-

neral principle, narcotics stimulate; in large, they act as sedatives. The following is a list of the chief narcotics:—Aconitum, Ætherea, Belladonna, Camphora, Cannabis, Conium, Digitalis, Humulus, Hyoscyamus, Lactucarium, Opium and Morphia, Stramonii Folia, Stramonii Semina, Mental Narcotics, (Appropriate Music, Monotonous Sounds, or any succession of monotonous impressions.)

**NARCOTINE**, *Narcoti'na*, *Narcoti'ca*, *Narcotin*, *Opia'num*; same etymon; (F.) *Sel de Déroons*, *Opiane*, *Sel d'opium*, *Principe cristallizable de Déroons*. A solid, white, inodorous, and insipid substance; by some considered to be alkaloid, by others neuter; crystallizable in straight prisms with a rhomboidal base; fusible like the fats; soluble in boiling alcohol and ether, and scarcely soluble in water. Narcotine produces all the unpleasant effects of opium; but, at the same time, throws the animal into a state of stupor. It is not used in medicine, on account of these objections. The salts, which are very bitter, have been used successfully in India for the cure of intermittents.

**NARCOTISM**, Narcosis.

**NARCOTIZED**, *Torpidus*, *Narco'des*. Affected with stupor, as from the use of a narcotic.

**NARD**, **CELTIC**, *Valeriana Celtica*—n. *Indica*, *Nardus Indica*—n. *Indien*, *Nardus Indica*—n. *Indique*, *Nardus Indica*—n. *Petit*, *Aralia nudicaulis*—n. *Sauvage*, *Asarum*.

**NARDUM GALLICUM**, *Valeriana Celtica*.  
**NARDUS AMERICANUS**, *Aralia nudicaulis*—n. *Celtica*, *Valeriana Celtica*—n. *Montana*, *Asarum*.

**NARDUS IN'DICA**, *Spica nardi*, *Spica In'dica*, *Andropogon nardus*, *Indian nard*, *Spikenard*. The root of this plant is one of the ingredients in the mithridate and theriaca. It is moderately warm and pungent, and has a flavour by no means disagreeable. It is used by the Orientals as a spice:—(F.) *Nard Indien*, *N. Indique*. An ointment was formerly used, called *Unguentum nardi'num*. It was prepared of *Nard*, *Malabathrum leaves*, *Oil of worms*, *Costus*, *Amomum*, *Myrrh*, &c., and was used as a detergent.

**NARDUS RUSTICA**, *Asarum*.

**NARES**, *Rhines*, *Cav'itas Na'rium*, *Cavum seu Ca'vea seu Caver'na narium*, *Nasus internus*, *Mycteres*, *Na'rium ad'itus*, *Ochetus' mata*. *The nostrils*, (F.) *Narines*. Two elliptical apertures, situate beneath the nose, and separated from each other by the cartilaginous septum nasi. These apertures are continually open, and give passage to the air we breathe; and to the mucous fluids secreted in the nasal fossæ.

**NARES INTERNÆ**, *Nasal fossæ*.

**NARES POSTERIOR**, *Nares postre'mæ*, *Extre'mæ nares*, *Os'tia posteriora seu Chou'na narium*, *Na'rium Ex'itus*, (F.) *Arrières narines*, *Ouvertures postérieures des fosses nasales*, are the posterior apertures of the nasal cavities, which establish a communication between those cavities and the pharynx. They are bounded, above, by the body of the sphenoid bone; below, by the palate bone, and the base of the velum pendulum; and, on the outside, by the internal ala of the pterygoid process. They are separated from each other by a septum, of which the vomer is the bony part.

**NARIFUSORIA**, from *nares*, 'the nostrils,'

and *funders*, *fusum*, 'to pour.' Medicines dropt into the nostrils.

**NARINES**, *Nares*.

**NARIUM ADITUS**, *Nares*—n. *Siccitas*, *Mycteroxerotes*.

**NARTHECIA**, *Formulary*, *Myris*.

**NARTHECIUM**, *Formulary*, *Myris*.

**NARTHEX**, *Formulary*, *Myris*, *Splint*—n. *Asafetida*, see *Asafetida*.

**NASA**, *Nacra*, *Nata*.

**NASAL**, *Nasa'lis*, from *nasus*, 'the nose.' That which relates to the nose.

**NASAL ARTERY**. This is the largest of the two branches in which the ophthalmic artery terminates. It issues from the orbit, above the tendon of the orbicularis palpebrarum, passes above the side of the root of the nose, and anastomoses with the last extremity of the facial. Haller gave the name *nasal* to the sphenopalatine. He also called the dorsales nasi, furnished by the external maxillary, *Nasa'les laterales*.

**NASAL BONES**, *Ossa nasi*, *Ossa nasa'lia*, *Ossic'ula nasi*, *Ossa maxil'la superioris quarta seu quinta seu secun'da*, (F.) *Os nasaux*, *Os propra du nez*. These bones are situate beneath the nasal notch of the os frontis, and occupy the space between the nasal or angular processes of the superior maxillary bone. Their shape is nearly quadrilateral. They have an external or cutaneous surface; an internal or nasal, and four margins. Each is articulated with its fellow, with the os frontis, ethmoid, and superior maxillary bone. They ossify from a single point.

**NASAL CARTILAGE**, *Cartilago triangula'ris Nasi*. A cartilage formed of three portions, which unite at the dorsum nasi, and are distinguished into the *cartilage of the septum*, and the *lateral cartilages*. This cartilage is continuous, above, with the ossa nasi; and, inferiorly, with membranous fibro-cartilages, which form the supple and movable part of the nostrils. They are two in number—the one before, the other behind.

**NASAL DUCT**, *Lachrymal duct*—n. *Eminence*, *Mesophryon*.

**NASAL FOSSÆ**, *Cavi na'rium*, *Nares internæ*, are two large, anfractuons cavities, situate between the orbits below the cranium, and lined by the pituitary or Schneiderian membrane. These cavities have no communication with each other; but the various sinuses in the neighbouring bones;—the ethmoidal, sphenoidal, superior maxillary, &c., all communicate with them. The general cavity of each nostril is divided by the ossa spongiosa into three *meatus* or *passages*, which run from before backwards. 1. The *Meatus narium superior*, placed at the upper, inner, and back part of the superior spongy bone. 2. The *Meatus medius*, situate between the superior and inferior spongy bones; and 3. The *Meatus inferior*, situate between the inferior spongy bone and at the bottom of the nose. The Schneiderian membrane receives the first pair of nerves, and various branches from the fifth pair. The arteries are furnished by the branches of the *internal maxillary*, known under the names of sphenopalatine, infra-orbital, superior alveolar, palatine, pterygo-palatine; by the supra-orbital, and ethmoidal branches of the ophthalmic artery, by the internal carotid, superior labial, and dor-

sales nasi. Its veins are little known, and generally follow the course of the arteries. The lymphatics are almost unknown. The nasal fossæ are the seat of smell; they aid, also, in respiration and phonation.

NASAL MEATUS, see Nasal fossæ.

NASAL MUCUS, *Mucus na'rrium*, *Phlegma na'rrium crassum*, *Mucor* seu *Pituita* seu *Blenna* seu *Lympha muculen'ta narium*, *Apomyx'ta*, vulgarly called *Snot*, (F.) *Morve*, is the mucus secreted by the Schneiderian membrane.

NASAL NERVE, *Naso-palpebr'al*, (Ch.) *Naso-ocula'ris*, (Sömmering.) One of the three branches of the ophthalmic nerve of Willis. It enters the orbit by the sphenoidal fissure, passes along the inner paries of that cavity, and divides, opposite the internal and anterior orbital foramen, into two branches. 1. The *internal* and *posterior*, which passes into the *Foramen orbitarium internum anterius*, enters the cranium beneath the dura mater, and passes into the nasal fossæ, through an aperture at the sides of the *Crista galli*. It afterwards divides into several filaments: one of them—the *Naso-labar*, of Chaussier—is very small, and descends on the posterior surface of the os nasi, and ramifies on the integuments of the ala nasi. A second terminates near the septum; others descend along the outer paries of the nasal fossæ. 2. The other is *external* and *anterior*, and is called the *external nasal nerve*. It is distributed to the outside of the orbit. Before dividing, the nasal nerve communicates with the ophthalmic ganglion, and gives off two or three ciliary nerves: the *Posterior Nasal Nerve*. Sömmering has given this name to the nerves, which arise from the internal part of the sphenopalatine ganglion.

NASAL NOTCH, (F.) *Échanerure nasale*. A semicircular notch, situate between the nasal prominence of the frontal bone, and articulated with the nasal bones and the nasal processes of the superior maxillary bones.

NASAL PROCESS, Maxillary bone, superior.

NASAL PROMINENCE, (F.) *Bosse nasale*. A prominence, situate on the median line, at the anterior surface of the os frontis, between the two superciliary arches.

NASAL REGION, *Re'gio nasa'lis*. The region of the nose.

NASAL SPINES. These are three in number.

1. The *Superior nasal spine* of the os frontis, occupying the middle of its nasal notch, and articulated before with the nasal bones, behind with the ethmoid. 2. The *inferior and anterior nasal spine*, situate at the inferior part of the anterior opening of the nasal fossæ. It is formed by the two superior maxillary bones; and 3. The *inferior and posterior nasal spine*, *Spina gutturale*, (Ch.) a process, formed on the median line by the two palate bones at the posterior part of the palatine arch.

NASALE, Errhine.

NASALIS, Compressor naris.

NASA'LIS LA'BII SUPERIO'RI'S. A small muscular slip, which runs up from the middle of the orbicularis and the lip to the tip of the nose. It lies exactly in the furrow, and is occasionally a levator of the upper lip, or a depressor of the tip of the nose.

NASAS, Nata.

NASATUS, Membrosus.

NASCALE. A kind of pessary, made of

wool or cotton, which was formerly introduced into the vagina, after being impregnated with oil, ointment, or some other proper medicament.

NASCAPHTHON, Narscarphthon.

NASDA, Nata.

NASITAS, Rhinophonia.

NASITIS, Rhinitis—n. Postica, Angina nasalis.

NASO, *Nasu'tus*, from *nasus*, 'the nose.' One who has a long nose.

NASO-LA'BIAL, *Naso-labi'd'lis*; from *nasus*, 'the nose,' and *labium*, 'a lip.' Relating to the nose and lip.

NASO-LABIAL LINE. A line or furrow, which separates the lip from the cheek, and commences at the ala nasi.

NASO-LABIALIS. A muscular fasciculus described by Albinus, which arises from the anterior extremity of the septum nasi, and terminates in the orbicularis oris.

NASO-PAL'ATINE, *Naso-palati'nus*. That which belongs to the nose and velum palati.

NASO-PALATINE GANGLION is situate in the foramen palatinum anterius. Its greater extremity receives the two naso-palatine branches; whilst the smaller gives off two or three filaments, which reach the palatine vault, where they ramify on the membrane of the same name, anastomosing with filaments of the great palatine nerve.

NASO-PALATINE NERVE is furnished by the sphenopalatine, which proceeds from the ganglion of Meckel. It traverses the vault of the nasal fossæ, and proceeds upon the septum between the two layers of the pituitary membrane. It enters the anterior palatine canal, and terminates at the superior angles of the naso-palatine ganglion, without attaining the mouth.

NASO-PALPÉBRAL, Orbicularis palpebrarum.

NASTA, Nata.

NASTURTIIUM AMPHIBIUM, see *Sisymbrium*—n. Aquaticum, *Cardamine pratensis*, *Sisymbrium nasturtium*—n. Hortense, *Lepidium sativum*—n. Indicum, *Tropæolum majus*—n. Officinale, *Sisymbrium nasturtium*—n. Palustre, see *Sisymbrium*—n. Peruvianum, *Tropæolum majus*—n. *Pratense*, *Cardamine pratensis*.

NASUM DILATANS, Pyramidalis nasi.

NASUS, The *Nose*, *Rhin*, *Rhis*, *Organo olfactûs* seu *odoratûs* seu *olfactorium*, *Promontorium faciei*, *Myzo'ter*, *Emunctorium cerebri*, (F.) *Nex*. The nose is a pyramidal eminence, situate above the anterior apertures of the nasal fossæ, which it covers; and, consequently, occupying the middle and upper part of the face, between the forehead and upper lip, the orbits and the cheeks. Its lateral surfaces form, by uniting angularly, a more or less prominent line, called the *Dorsum* seu *Rhachis* seu *Spina Nasi*, (F.) *Dos du nez*. This line terminates, anteriorly, by the *lobes*. The sides are called *Ala Nasi*, *Pinna Naris*, (F.) *Ailes du nez*. The *columna* is the inferior part of the partition. Its apex or tip has been called *Glob'ulus nasi*.

The chief varieties of the nose are the *aquiline*, the *flat nose*, (F.) *Nex camarot* ou *épaté*, and the *snub nose*, (F.) *Nex retroussé*. The nose is formed, besides its bones, of fibro-carti-

lage, cartilage, muscles, vessels, and nerves; and its use seems to be, to direct odours to the upper part of the nasal fossæ.

NASUS INTERNUS, Nares.

NASUTUS, Naso.

NATA, *Natta, Nasa, Nasda, Nasta, Nasas, Napta*. A fleshy, indolent excrescence, having the shape of the nates.

NATARON, Natron.

NATA TION, *Nata'tio*, from *natare*, itself from *nare*, 'to swim.' *Swimming*. The action of swimming, or of supporting one's self, or moving upon the water. Swimming resembles the horizontal leap in its physiology—the medium being water instead of air. The difference between the specific gravity of the human body and that of water is not great; so that but little exertion is required to keep a part of the body above water. Swimming is a healthy gymnastic exercise, combining the advantages of bathing.

NATES, *Ephed'rana, Nat'ula, Sca'phia, Clunas, Glutoi, Gluti, Glu'tia, Sedi'lia, Pyge, Mana; the Bottom, Backside, Post'rior, Buttocks, &c.*, (F.) *Fesses*. Two round projections, at the inferior and posterior part of the trunk, on which we sit. Amongst the mammalia, man alone has the nates prominent and round. They are formed chiefly by the skin, and a thick layer of cellular tissue, which covers the three glutæi muscles:

NATES CEREBRI, see *Quadrigenina corpora*—n. of *Testes, Quadrigenina corpora*.

NATRIUM, Sodium.

NATRON, *Natrum, Nat'aron, Nitrum, Anasrum, Aphronitrum*, from *Natron*, a lake in Judæa. A saline compound, very abundant in Egypt, which is almost wholly formed of subcarbonate of soda.

NATRONIUM, Sodium.

NATRUM, Natron—n. Chloratum liquidum, Liquor sodæ chlorinate—n. Muriaticum, Soda, muriate of—n. Muriatum, Soda, muriate of—n. Præparatum, Soda, subcarbonate of—n. Tartarizatum, Soda, tartrate of—n. Vitriolatum, Soda, sulphate of—n. Nitricum, Soda, nitrate of—n. Oxymuriaticum, Soda, chloride of—n. Oxyposphorodes, Soda, phosphate of—n. Sulphuricum, Soda, sulphate of.

NATTA, Nata.

NATULÆ, Nates.

NATU'RA, from *nasci*, 'to be born or arise.' *Physis*. Nature. Also, Genital organs.

NATU'RA MORBI. The essence or condition of a disease.

NATURAL PARTS, Genital organs.

NATURALIA, Genital organs.

NATURISM, *Nat'uralism*. A view which attributes every thing to nature, as a sage, prescient and sanative entity.—*Nysten*. See *Expectation*.

NATURIST. A physician who scrupulously investigates, interprets, and follows the indications presented by nature in the treatment of disease.

NAUCLEA GAMBIR, *Uncaria gambir*. A plant of the family and tribe *Cinchonaceæ*, a native of the Malayan Peninsula and Indian Archipelago, which yields large quantities of the kind of Catechu known by the names *Terra Japonica*, and *Square Catechu*, and which, in

Indian commerce, is called *Gambear*. It is a powerful astringent, much used in tanning, and in medicine, as a substitute for the Catechu of the Acacia.

NAU'SEA, *Nau'ria, Nausi'asis, Nausio'is, Nau'tia*, (F.) *Nausée, Envie de vomir*; from *navis, navis*, 'a ship;' because those unaccustomed to sailing are so affected. *Sickness*. A desire to vomit.

NAUSEA MARINA; *Morbus nauticus, Vomitus navigantium seu marinus, Sea-sickness*, (F.) *Mal de mer*. The sickness, vomiting, &c., experienced at sea by those unaccustomed to a sea life; and from which those who are accustomed are not always exempt. It generally ceases when the person becomes habituated to the motion of the vessel, and not till then.

NAUSEANT, *Nau'seans*. An agent that excites nausea, which is a state of diminished action. Nauseants are, hence, valuable remedies in diseases of excitement.

NAUSIA, Nausea.

NAUSIASIS, Nausea.

NAUSIOSIS. This word, besides being synonymous with nausea, has been used to express the state of venous hemorrhage, when blood is discharged by jets.

NAUTIA, Nausea.

NAVEL, Umbilicus—n. String, Funiculus umbilicalis.

NAVET, Brassica rapa.

NAVETTE, Brassica napus.

NAVICULAR, *Navicula'ris, Navifor'mis*, from *navicula*, 'a little ship.'

NAVICULAR FOSSA, *Fossa Navicula'ris, F. Scaphoides, Navicula, Scaph'ula*. See *Scaphoid*. This name has been given, 1. To a small depression between the entrance of the vagina and the posterior commissure of the labia majora or fourchette. 2. To a perceptible dilatation, presented by the urethra in man, near the base of the glans. 3. To the superficial depression which separates the two roots of the helix. This is also called *Scapha*.

NAVICULARE OS, Scaphoides os.

NAVIFORMIS, Navicular.

NAVIS, Vulva.

NEAR-SIGHTEDNESS, Myopia.

NEB'ULA, *Nubus, Nubec'ula, Naphus, Neph'ellè, Neph'elion*, (F.) *Nuage, Ombrage*. See *CALIGO*. A slight speck on the cornea. A mist or cloud suspended in the urine.

NEBULOUS, Nepheloid.

NECESSARY, *Necessarius*, (*no*, and *cessare*.) The *Necessaries of Life, Vita necessitates*, (F.) *Besoins de la vie*, include every thing requisite for the maintenance of life, and particularly food.

NECK, DERBYSHIRE, Bronchocele—n. Swelled, Bronchocele—n. Stiff, Torticollis—n. Wry, Torticollis.

NECKLACE, AN'ODYNE. These are formed of the roots of hyocyamus, Job's tears, allspice steeped in brandy, or the seeds of the wild liquorice vine, to suit the fancies of the prescribers. They are employed to facilitate dentition in children, and to procure sleep in fever. [1]

NECKWEED, *Veronica beccabunga*.

NECRE'MIA, from *νεκρος*, 'death,' and *αιμα*, 'blood.' Death of the blood. Death beginning with the blood.

NECRENCEPHALUS, *Mollities cerebri*.

NECRODES, Cadaverous.

NECROLOGY, BILLS OF, Mortality, bills of.

NEC'ROMANCY, *Necromanti'a, Negroman-ti'a, Necyomanti'a, Nigromanti'a*; from *νεκρος*, 'death,' and *μαντια*, 'divination.' Divination by the dead.

NECROMANTIA, Necromancy.

NECRON, Cadaver.

NECRONARCEMA, Rigor mortis.

NECROPHOBIA, from *νεκρος*, 'death,' and *φοβος*, 'fear.' Exaggerated fear of death. This symptom occurs in patients where the disease is not mortal; as in hypochondriasis. In fevers, it is not a good symptom.

NECROPNEUMO'NIA, *Pneumo'nia gan-grano'sa seu typho'sa, Gangra'na seu Mortifi-catio seu Anthrax seu Carbum'culus Pulmo'num, Pneumoseps'is, Pneumoc'act*, (F.) *Gangrène du Poupon*; from *νεκρος*, 'death,' and *pneumonia*. Gangrenous inflammation of the lungs. This may be *diffused* or *circumscribed*. The only pathognomonic symptom is the extraordinary and repulsive odour of the breath and expectoration. The treatment consists in the use of the chlorides internally, or of chlorine by in-halation; allaying irritation by opium, and sup-porting the patient by wine whey, and nourish-ing diet.

NECROPSIA, Autopsia cadaverica.

NECROPSY, Autopsia cadaverica.

NECROSCOPIA, Autopsia cadaverica.

NECROSCOPY, Autopsia cadaverica.

NECRO'SIS, from *νεκρωω*, 'I kill.' Mor-tification. State of a bone or of a portion of a bone deprived of life. *Osteogangra'na, Osteonecro'sis*. Necrosis may take place with-out the surrounding soft parts being struck with gangrene. It is to the bones what gangrene is to the soft parts. The part of the bone affected with necrosis becomes a foreign body, similar to the gangrenous eschar, and its separation must be accomplished by the efforts of nature, or by art. When necrosis occurs in the centre of long bones, it never extends to their articular extremities. The exterior layers of bone form a canal round the dead portion or *sequestrum*; between these swollen layers and the seques-trum, suppuration takes place; the matter presses against the bony canal; perforates it, and is discharged by apertures, which become fistulous.

In the treatment, the exit of the sequestrum must be facilitated by proper incisions, by the application of the trepan to the bone, &c.

NECROSIS CEREALIS, Ergotism—*n. Dentium*, Dental gangrene—*n. Ustilaginea*, Ergotism.

NECROTOMY, Dissection.

NECTANDRA RODIEI, see Bebeera.

NECTAR, from *νεϋ*, 'a particle of negation,' and *κραω*, 'to kill.' A pleasant liquor, feigned by the poets to have been the drink of the gods, and to have rendered immortal those who partook of it. A name given, by the ancients, to many drinks; and particularly to one made with wine, evaporated and sweetened with honey.

NECTARIUM, *Inula helenium*.

NECUSIA, see Wound.

NECYOMANTIA, Necromancy.

NEDYIA, Intestines.

NEDYS, *νηδύς*. The belly, abdomen, stomach, uterus.

NEEDLE. Sax. *nebl, næbl*; from Teut. *n e t e n*, 'to sew.' *Acus, Bel'ont, Raphis, Raph'ion, Acos'tra*, (F.) *Aiguille*. A steel instrument, used in many professions. In *Surgery*, a steel, gold, silver, or platina instrument, that may be round, flat, or triangular, straight, or curved, supported or not by a handle, but having *always* a point, by means of which it penetrates the textures; and *often* having, either near the point, or, more commonly, near the other extremity, an aperture or eye for the reception of a thread or tape, which it introduces into the parts. The *Aiguille à appareil* of the French is the ordinary sewing needle used in the making of bandages, &c.

NEEDLE, ACUPUNCTURE, (F.) *Aiguille à Acu-puncture*. An inflexible gold or silver needle; conical, very delicate, four inches long, furnished with a handle, and at times, with a canu-la shorter than it by about half an inch. An ordinary needle waxed at the head, will answer as a substitute for this. See Acupuncture.

NEEDLE, CATARACT, *Acus ophthal'mica*, (F.) *Aiguille à cataracts*. Needles of gold, silver, and steel have been used; the latter, alone, at the present day. The cataract needle is em-ployed to depress or tear the crystalline when opaque. This needle is usually made from 15 to 24 lines long; and is attached to a fine han-dle. The extremity may be, as in Scarpa's and Langenbeck's, pointed, prismatic, triangular, and curved; in Dupuytren's and Walther's, flat, curved, and sharp-edged; in Hey's, flat, with a semicircular and sharp end; or, as in Beer's, Siebold's, Schmidt's, Himly's, Von Gräfe's, &c., straight and spear-pointed. A mark is gener-ally placed upon the handle to inform the oper-ator,—when the instrument is engaged in the eye,—what side corresponds to the crystalline.

NEEDLE FOR A COUNTER-OPENING, *Acus in-vaginata*, (F.) *Aiguille à Contre-ouverture, Aiguille engagée, Aiguille à gaine*,—a long, narrow instrument of steel; the point of which is fine and sharp on both sides;—the heel (*tailon*) having an aperture to receive a thread, tape, &c., provided with a flat silver sheath, shorter than the blade, the point of which it covers when passing through parts that have to be respected.

NEEDLE, DESCHAMP'S, *Pawpe's needle*, (F.) *Aiguille de Deschamps, Aiguille à manche*, &c., is the last described needle, fixed to a handle. The eye is placed near the point. It is em-ployed in the ligature of deep-seated arteries.

NEEDLE, FISTULA, (F.) *Aiguille à Fistule*. A long, flat, flexible, silver instrument; having an aperture near one extremity; blunt at the other. This was formerly used for passing a seton into fistulous ulcers. On one of its sides was a groove for guiding a bistouri in case of necessity.

Also, a long steel instrument, terminated by a point like that of a trocar, which Desault employed for penetrating the rectum, when oper-ating for fistula that had no internal aperture.

NEEDLE, HARE-LIP, (F.) *Aiguille à Bec de Lièvre*. A small silver canula, to which is at-tached a spear point, that can be readily with-drawn. This needle, armed with the point, is introduced at one side of the fissure in the lip, and through the other. The twisted suture is then applied, and the pin withdrawn.

NEEDLE, LIGATURE, (F.) *Aiguille à ligature*.

A long, steel instrument, sharp towards one extremity, with an eye near the other, which was formerly used for suspending the circulation of blood prior to amputation, by being passed through the limb, so as to include the principal artery and a part of the muscles and integuments.

Also, a steel instrument of various dimensions, round towards one of its extremities, which was straight, and furnished with an aperture; curved and flat towards the opposite, which was pointed, and had a slight ridge on its concave side. At the commencement of the last century, this instrument was used to pass ligatures around vessels.

Also, a steel instrument of various dimensions, flat, regularly curved in the form of a semicircle, with a sharp or lance point, and a long eye, used with advantage in place of the last.

**NEEDLE, SETON, (F.)** *Aiguille à Seton*. A long, narrow, steel blade; pointed and sharp at one extremity; pierced at the other by an aperture. The *Aiguille à contre-ouverture* may be used for the same purpose.

**NEEDLE, SUTURE, (F.)** *Aiguille à Suture*. For the twisted suture, the hare-lip needle is used; for the others, the straight or curved needle: the straight needle is preferable for stitching up the abdomen, &c., in dissection. In the suture of the tendons, a curved needle has been used; flat on both sides, and cutting only at the concave edge, in order that the instrument may pass between the tendinous fibres without dividing them.

**NEEDLE-BEARER, Porte-aiguille.**

**NEEDLE-CARRIER, Porte-aiguille.**

**NEFLE, Mespilus** (the fruit.)

**NEFLIER, Mespilus.**

**NEFRENDES, Nodoi, Eden'tuli** (*vs*, privative, and *δεν*, 'a tooth?') Persons devoid of teeth. Young children, for instance, who have not cut them; or aged persons, who have lost them. This state is called *Nefrendis*, *Nodo'sia*, *Odon'tia eden'tula*.

**NEGOTIUM PARTURITIONIS, Parturition.**

**NEGRE BLANC, Albino.**

**NEGRO, Ni'grita.** One of the Æthiopian race. See *Homo*.

**NEGROMANTIA, Necromancy.**

**NEIÆRA, Nei'ra, Imus Venter.** The lower part of the belly.—*Hippocrates*.

**NEIGE, Snow.**

**NEIRA, Neizra.**

**NELUMBIUM LUTEUM, Yellow nalm'bo, Yellow water lily, Pond lily, Water shield, Water nuts, Water chin'capin, Rattle nut, Sacred bean.** A beautiful water plant, common in the United States, and belonging to *Nat. Ord. Nymphacæ; Sez. Syst. Polyandria Polygynia*. The leaves are cooling and emollient when applied to the surface. The roots, leaves, and nuts are eaten. The last are called by the Indians and others *water chin'capins*.

**NELUMBO YELLOW, Nelumbium luteum.**

**NENUPHAR, Nymphaea alba—n. Blanc, Nymphaea alba—n. Jaune, Nymphaea lutea—n. Odorant, Nymphaea odorata.**

**NEOARTHROSIS, from νεος, 'new,' and αρθρον, 'a joint.'** A new joint; an artificial joint.

**NEOG'ALA, from νεος, 'new,' and γαλα, 'milk.'** Milk secreted immediately after the colostrum. Also, the colostrum.

**NEOGENES, Nouveau-né.**

**NEOGILES, Nouveau-né.**

**NEOGNUS, Nouveau-né.**

**NEONATUS, Nouveau-né.**

**NE'OPLASTY, Neoplas'tiel:** from νεος, 'new,' and πλασσω, πλαστω, 'I form.' An operative process for the formation of new parts. It includes autoplasty, cicatrization of wounds, and the formation of adhesions.—*Burdach*.

**NEOTTIA, Goodyera pubescens.**

**NEP, Nepeta.**

**NEPEN'THA DESTILLATO'RIA, Bandu'ra.** A Ceylonese plant, the root of which is astringent.

**NEPEN'THES, from νη, negative particle, and πενθος, 'grief.'** A remedy much extolled by the ancients against sadness and melancholy.

The women of Thebes, according to *Diocorus Siceliotus*, alone possessed the secret of its composition; and, according to *Homer*, *Helen* introduced it from *Egypt*. Some suppose it to have been opium.

**NEPENTHES, Bangue—n. Opiatum, Pilule opiate.**

**NEPETA, N. Cata'ria, Herba felis, Nep or Catmint, (F.) Herbe aux Chats,—so called, because cats are fond of it.** The leaves, *Cata'ria* (*Ph. U. S.*), have a smell and taste like those of an admixture of spearmint and pennyroyal. It has been recommended in uterine disorders, dyspepsia, flatulency, &c. like pennyroyal; and is much used in domestic medicine, on the American continent, in flatulencies, &c., of children.

**ΝΕΡΕΤΑ ΑΓΡΕΣΤΙΣ, Melissa nepeta—n. Glechoma, Glechoma hederacea.**

**NEPHALIOTES, Temperance.**

**NEPHELE, Enæorema, Nebula.**

**NEPHELION, Nebula.**

**NEPHELOID, Nepheloides, Nepheloides, Neb'ulous, Nubilo'sus.** An epithet applied to urine when it is cloudy.—*Uri'na nepheloides*.

**NEPHOS, Nebula.**

**NEPHRAL'GIA, Dolor Nephreticus, Neuralgia Renum, (F.) Névralgie des Reins, Dyanephroneris, from νεφρος, 'a kidney,' and αλγος, 'pain.'** Pain and neuralgia in the kidney.

**NEPHRALGIA ARENOSA, see Gravel—n. Calculosa, see Gravel—n. Rheumatica, Lumbago.**

**NEPHRAPO'STASIS, Nephropo'sis, Abscessus renalis, from νεφρος, 'kidney,' and αποσπασις, 'abscess.'** Renal abscess.

**NEPHRATON'IA, from νεφρος, 'kidney,' and ατονια, 'want of tone.'** *Renum atonia seu paraly'sis*. Atony of the kidney.

**NEPHRELCO'SIS, Nephropo'sis, Helco'sis renal'is, from νεφρος, 'kidney,' and ιλκωσις, 'ulceration.'** Ulceration of the kidney.

**NEPHRELMIN'TIC, Nephrelmin'ticus, from νεφρος, 'a kidney,' and ελμιντις, 'a worm.'** That which is owing to the presence of worms in the kidney.

**NEPHREMPHRAXIS, from νεφρος, 'a kidney,' and φρασσω, 'I obstruct.'** A name given by *Plouquet* to obstruction of the kidneys.

**NEPHRETIC, Nephrid'ius, Nephrit'ic, Nephreticus, from νεφρος, 'a kidney.'** That which relates to the kidney. Applied, especially, to pain, &c., seated in the kidney.

NEPHRETICUM, in *Materia Medica*, means a medicine employed for the cure of diseases of the kidney.

NEPHRETICUM LIGNUM, *Guilandina moringa*.

NEPHRETICUS LAPIS, *Talcum nephriticum*, (F.) *Pierre néphretique*, *Jade néphritico orientalis*. A green, fatty kind of stone, — once used as an amulet against epilepsy; an absurd name, as there can be no such universal remedy.

NEPHRIDION, *Pinguedo renalis*. The fat which surrounds the kidneys. — Hippocrates.

NEPHRIDIDIUM, Capsule, renal.

NEPHRIDIDIUS, Nephretic.

NÉPHRITE, Nephritis — n. *Albuminosa*, Kidney, Bright's disease of the.

NEPHRITES, Asphalites.

NEPHRITIC, Nephretic.

NEPHRITICUM LIGNUM, *Guilandina moringa*.

NEPHRITIS, Asphalites.

NEPHRITIS, *Empressma Nephritis*, from νεφρος, 'kidney,' and *itis*, 'denoting inflammation;' *Renum inflammatio*, *Nephro-phlegmoné*, — *Inflammation of the Kidney*, (F.) *Nephritis*, *Inflammation des Reins*, is characterized by acute pain; burning heat, and a sensation of weight in the region of one or both kidneys; suppression or diminution of urine; fever; dysuria; ischuria; constipation, more or less obstinate; retraction of the testicle, and numbness of the thigh of the same side. It may be distinguished into *simple* and *calculous nephritis*. In the latter, the urine often contains small particles of uric acid or of urate of ammonia. The most common causes of nephritis are, — excess in irritating and alcoholic drinks; abuse of diuretics; blows or falls on the region of the kidneys; the presence of renal calculi, &c. It may be distinguished from lumbago by the pain which attends the latter on the slightest motion, &c. It usually terminates by resolution in from one week to two or three. It may, however, end in suppuration — *pyonephritis*; or may become chronic — *chrononephritis*, (Piorry.) In the treatment, antiphlogistics, as bleeding, baths, &c., are required to the full extent; with the use of diluents, opiates, &c.

NEPHRITIS ALBUMINENSIS, Kidney, Bright's disease of the — n. *Albuminosa*, Kidney, Bright's disease of the — n. *Associated*, Kidney, Bright's disease of the — n. *Cachectic*, Kidney, Bright's disease of the — n. *Sociata*, Kidney, Bright's disease of the.

NEPHRODES, Nephroid.

NEPHRODIUM FILIX MAS, *Polypodium filix mas*.

NEPHROGRAPHY, from νεφρος, 'a kidney,' and γραφή, 'a description.' An anatomical description of the kidney.

NEPHROHÆMIA, from νεφρος, 'kidney,' and *αἷμα*, 'blood.' Hyperæmia or congestion of the kidney.

NEPHROID, *Nephroides*, *Nephroides*, *Reniformis*, from νεφρος, 'kidney,' and εἶδος, 'form, resemblance.' *Reniform*. Having a resemblance to a kidney — as 'nephroid cancer,' so called because the morbid growth resembles the kidney in structure.

NEPHROLITHIASIS, from νεφρος, 'a kidney,' and λίθος, 'a stone.' The disease of cal-

culus in the kidney; *Lithis renalis*, *Lithiasis nephritica*, *L. renalis*. See Gravel.

NEPHROLITHIC, same etymon. Belonging to calculi in the kidneys. This epithet has been applied to ischuria, occasioned by calculi formed in the kidneys.

NEPHROLOGY, *Nephrologia*, from νεφρος, 'kidney,' and *λογία*, 'a treatise.' A treatise on the kidneys. *Dissertation on the kidneys and their functions*.

NEPHROMALACIA, from νεφρος, 'kidney,' and *μαλακία*, 'softness.' Softening of the kidney.

NEPHROMETRÆ, *Psora*.

NEPHRONCUS, *Tumor renalis*, from νεφρος, 'kidney,' and *ωνος*, 'a tumour.' A tumefaction of the kidney.

NEPHROPHLEGMATIC, *Nephro-phlegmaticus*, from νεφρος, 'kidney,' and *πλεγμα*, 'phlegm.' A name given, by some authors, to ischuria produced by mucus contained in the urine.

NEPHROPHLEGMONE, Nephritis.

NEPHROPTHISIS, from νεφρος, 'kidney,' and *θσις*, 'consumption.' Phthisis from suppuration of the kidney.

NEPHROPLETHORIC, *Nephro-plethoricus*, from νεφρος, 'a kidney,' and *πληθώρα*, 'plethora.' Belonging to plethora of the kidneys. An epithet given to ischuria dependent upon this cause.

NEPHROPYIC, *Nephro-pyicus*, from νεφρος, 'a kidney,' and *πυον*, 'pus.' Belonging to suppuration of the kidney.

NEPHROPYOSIS, Nephrapostasis, Nephrelcosis.

NEPHRORRHAGIA, *Hæmaturia renalis*, *Hæmorrhagia renum*, from νεφρος, 'kidney,' and *ρῆξις*, 'rupture;' *Profluxivium sanguinis renalis*. Hemorrhage from the kidney.

NEPHROS, Kidney.

NEPHROSCLERIA, from νεφρος, 'kidney,' and *σκληρία*, 'hardness;' *Induratio renum*. Induration of the kidneys.

NEPHROSPASTIC, *Nephrospasticus*, from νεφρος, 'a kidney,' and *σπασ*, 'I draw.' That which depends upon spasm of the kidney. An epithet given to a variety of ischuria.

NEPHROTHROMBOID, *Nephro-thromboides*, from νεφρος, 'a kidney,' and *θρομβος*, 'a clot.' That which depends upon clots of blood, contained in the kidneys or their ducts. An epithet for a species of ischuria.

NEPHROTOMY, *Nephro-lithotomy*, *Nephrotomia*, *Nephro-lithotomia*,  *Sectio renalis*, *S. renis*, from νεφρος, 'a kidney,' and *τομή*, 'to cut.' Dissection of the kidney. Also, an operation proposed with the view of extracting calculi formed in the kidney, by means of an incision into the tissue of that organ.

NEPHRUS, Kidney.

NEPION, Infans.

NEPIOTES, Infancy.

NEPTA, Asphaltum.

NERANTIA, see *Citrus aurantium*.

NERF, Nerve — n. *Circumflexa*, Axillary nerve — n. *Dentaire*, Dental nerve — n. *Fessier*, Gluteal nerve — n. *Glossopharyngia*, Pharyngoglossal nerve — n. *Gustatif*, see Lingual nerve — n. *Gustatif innominé*, Trigemini — n. *Gutturale*, Palatine (middle) nerve — n. *Gutturopalatine*, Palatine nerve — n. *Honteux*, Pudic nerve — n. *Irien*, Ciliary nerve — n. *Ischio-elitarion*,

**Pubic nerve**—*n. Ischio-pénion*, **Pubic nerve**—*n. Labyrinthique*, **Auditory nerve**—*n. Mentonnier*, **Mental nerve**—*n. Moteur oculaire externe*, **Motor oculi externus**—*n. Oculo-musculaire externe*, **Motor oculi externus**—*n. Oculo-musculaire interne*, **Patheticus nerve**—*n. Pathétique*, **Patheticus nervus**—*n. Péronière branche*, **Popliteal nerve, external**—*n. Pharyngo-glossien*, **Pharyngo-glossal nerve**—*n. Première paire trachéenne*, **Occipital nerve**—*n. Vertébro-digital*, **Musculo-cutaneous nerve**—*n. Prétibio-digital*, **Musculo-cutaneous nerve**—*n. Prétibio-suplantaire*, **Tibial nerve, anterior**—*n. Radio-digital*, **Radial nerve**—*n. Sciatique grand*, **Sciatic nerve, great**—*n. Sciatique petit*, **Sciatic nerve, lesser**—*n. Sciatique popliée externe*, **Musculo-cutaneous nerve**—*n. Sous-occipital*, **Occipital nerve**—*n. Sous-pubio-fémoral*, **Obturator nerve**—*n. Spino-oratio-trapézien*, **Spinal nerve**—*n. Sus-maxillaire*, **Maxillary superior nerve**—*n. Sup-pubien*, **Supra-pubian nerve**—*n. Tibiale branche*, **Popliteal internal**—*n. Trachéal*, **Laryngeal inferior nerve**—*n. Trachélo-dorsal*, **Spinal nerve**—*n. Trijumeau*, **Trigemini**—*n. à Trois cordes*, **Trigemini**—*n. Tympanique*, **Chorda tympani**.

**NERVES BRONCHIQUES**, **Bronchial nerves**—*n. Ciliaires*, **Ciliary nerves**—*n. Moteurs oculaires communs*, **Motores oculorum**—*n. Sacrés*, **Sacral nerves**—*n. Sous-costales*, **Intercostal nerves**.

**NERIUM**, *N. oleander*.

**NERIUM ANTIDISENTERICUM**. The tree which affords the *Codaga-pala Bark*, *Cone'ssi cortex*, *Tillicher'sry cortex*, *Cortex profusivii*. **Family**, Apocynæ. **Sex**, Syst. Pentandria Monogynia. (*F.*) *Codagapala*, *Cropala*. The bark of this Malabar tree is of a black colour, externally, and is generally covered with a white moss or scurf. It has an austere, bitter taste, and has been recommended as an astringent in diarrhœa, dysentery, &c.

**NERIUM OLEANDER**, *Nérium*, *Rhododaphnis*, *Rosa'go*, (*F.*) *Laurier rose*. The leaves are reputed to be narcotic. The infusion is employed internally, in herpetic affections, and the powder, incorporated with lard, is used in the itch.

**NERONIANA (PHLEBOTOMIA)**. An epithet given, for some cause, to phlebotomy, when more than one vein was opened on the same day.

**NERPRUN PURGATIF**, *Rhamnus*.

**NERVE**, *Nervus*, *Neuron*, *neroug*, 'a string.' (*F.*) *Nerf*. *Neuron* and *Nervus* meant also, with the ancients, the tendons and ligaments,

*Partes nervosa*; and hence the different acceptations of 'nervous;'—a man of nerve—a strong, nervous man; and a weak, nervous woman. The nerves are tubular cords of the same substance as that which composes the encephalon and spinal marrow. They extend from one or other of the nervous centres to every part of the body, communicating, frequently, with each other; forming *plexuses*, and, occasionally, *ganglions*; and being, at length, lost in the parenchyma of organs. There are 42 pairs, and, according to their origin, they are termed *Cranial* or *Encephalic*, and *Spinal*. Each nerve is composed of several filaments or cords placed alongside each other, and is surrounded by a neurilemma. The encephalic nerves, except the 5th pair, have only one root in the brain, whilst the spinal arise from the marrow by two roots: the one from an anterior fasciculus of filaments, the other from a posterior, separated from each other by the *Ligamentum denticulatum*; uniting outside this ligament, and presenting, near the intervertebral foramen, a ganglion formed only by the posterior root. The two roots make, afterwards, but one nerve; and, like the encephalic nerves, proceed to their destination, subdividing into rami and ramusculi, until they are finally lost in the texture of the organs. The trunks first formed are commonly round, and proceed alone, or accompany the great vessels, being placed in the cellular spaces which separate the organs, and are thus protected from injury. Their manner of termination we are not acquainted with; whether the nervous pulp, for instance, be distributed or lost in a membrane, as seems to be the case with the nerves of sight, hearing, and smell,—or are looped. Certain it is, that there is considerable difference in the organs, as respects the quantity of nerves that terminate in them; and the particular arrangement of the nervous extremities. Some organs have numerous nerves; others seem to have none: a circumstance which influences considerably the sensibility of parts.

The *Encephalic Nerves* arise from the encephalon, or are inserted into it; (according as we consider the brain the origin or termination of the nerves;) and make their exit by foramina at the base of the skull. They are 12 in number. The spinal nerves are 30 in number, 8 cervical, 12 dorsal, 5 lumbar, and 5 or 6 sacral: the four inferior cervical being much larger than the superior, because they furnish the nerves of the upper extremities.

SYNOPTICAL TABLE OF THE NERVES.

I. Cranial or Encephalic Nerves.

1. Olfactory..... (1st pair.)	Divided into internal, external, and middle branches, which are distributed on the Schneiderian membrane.	rymal branch, to the lachrymal gland and upper eyelid. 2. Frontal branch, to the forehead and upper eyelid. 3. Nasal branch, to the eyelids, nasal fossæ, and nose.
3. Optic..... (2d pair.)		
3. Motores Oculorum... (3d pair.)	Superior Branch. To the rectus superior oculi and levator palpebræ superioris.	5. Per Trigemini... (5th pair.)
3. Pathetici..... (4th pair.)	Inferior Branch. To the rectus internus, rectus inferior and lesser oblique muscles; a filament which goes to the ophthalmic ganglion.	
5. Per Trigemini... (5th pair.)	To the greater oblique muscle of the eye.	Inferior Maxillary Branch. 1. Temporal profound branches, to the temporal muscle. 2.
	Ophthalmic Branch. Divided into three branches. 1. The lach-	

1. *Cranial or Encephalic Nerves.*

5. <i>Par Trigemina</i> ... (5th pair.)	<p><i>Masseterine</i> branch, to the masseter muscle. 3. <i>Buccal</i>, to the inner surface of the cheek. 4. <i>Pterygoid</i>, to the internal pterygoid muscle. 5. <i>Lingual</i>, to the mucous membrane of the tongue. 6. <i>Inferior dental</i>, to the teeth of the lower jaw, and to the lower lip. 7. <i>Auricular</i> branch, to the pavilion of the ear and forehead.</p>	<p>1. <i>IN THE NECK</i>,—a <i>pharyngeal</i> branch to the pharynx; <i>superior laryngeal</i> branch to the larynx, and to some muscles of the inferior hyoid region. <i>Cardiac</i> branches to the cardiac plexus. 2. <i>IN THE CHEST</i>,—the <i>inferior laryngeal</i> branch to the larynx; <i>pulmonary</i> branches, which form the plexus of the same name; <i>oesophageal</i> branches to the oesophagus. 3. <i>IN THE ABDOMEN</i>,—<i>gastric</i> branches to the plexus of the stomach; filaments which go to the neighbouring plexuses. At its exit from the cranium—the <i>accessory of the pneumogastric nerve</i> anastomosing with this nerve. In the neck—filaments to the trapezius muscles. <i>Cervicofascioides</i> to the muscles of the inferior hyoid region, and to the cervical nerves. Filaments to the muscles of the tongue.</p>
6. <i>Abducens</i> ..... (6th pair.)	To the rectus externus oculi.	10. <i>Par Vagus</i> ..... (8th pair.)
7. <i>Facial</i> ..... (Portio dura of the 7th pair.)	<p>1. At its exit from the cranium, the <i>posterior auricular, stylohyoid, and infra-mastoid</i>, to the pavilion of the ear, the mastoid process, the digastricus, and the muscles attached to the styloid process. 2. Near the parotid gland, the <i>temporal, malar, buccal, supra-mazillary, and infra-mazillary</i> to the whole superficies of the face.</p>	11. <i>Spinal or Accessory of Willis</i> .....
8. <i>Auditory</i> ..... (Portio mollis of the 7th pair.)	To the vestibule, semi-circular canals, and cochlea.	12. <i>Hypoglossal</i> ..... (9th pair.)
9. <i>Glosso-pharyngeal</i> ..... (Portion of the 9th pr.)	To the base of the tongue and pharynx.	

II. *Spinal or Vertebral Nerves.*

1. *Cervical Nerves.*

1st Cervical Pair.....	<p><i>Anterior Branch.</i> Anastomosing <i>per arseada</i> with the second pair.</p>	Brachial Plexus.....	<p>principally to the integuments of the palmar and dorsal surfaces of the forearm, near the radial margin. 6. The <i>median nerve</i>, to the forearm, hand, and palmar surface of all the fingers. 7. The <i>cutaneous nerve</i>, to the last two fingers. 8. The <i>radial</i>, to the first three. 9. The <i>axillary</i>, around the shoulder-joint, and to the neighbouring muscles.</p>
2d Cervical Pair.....	<p><i>Anterior Branch.</i> A branch anastomosing with the first pair: a branch which goes to the cervical plexus.</p>		
3d and 4th Cervical Pairs.	<p><i>Anterior Branch.</i> Concurring in the cervical plexus. The <i>Posterior Branch</i> of these four pairs ramifies on the occiput and muscles of the superficial and deep-seated cervico-occipital regions.</p>		

**DESCENDING BRANCHES.**—1. *Internal descending*, anastomosing with a branch of the hypoglossus. 2. *Phrenic branch*, to the diaphragm. 3. *External descending branches*, dividing into supra-clavicular, supra-scapular, infra-clavicular, and cervico-ales profundi, to the muscles and integuments of the upper part of the chest and shoulder, to the trapezius, levator scapulae, rhomboidens, &c.

**ASCENDING BRANCHES.**—1. *Mastoid*, to the posterior and lateral part of the head, and the inner surface of the pavilion of the ear. 2. *Auricular*, to the parotid gland and pavilion of the ear.

**Superficial Cervical Branches.** (2.) To the platysma myoides, digastricus, the integuments of the neck, &c.

**Anterior Branches.** Assisting in the formation of the brachial plexus.

**Posterior Branches.** To the muscles and integuments of the posterior part of the neck and upper part of the back.

1. **Thoracic Branches**, (2.) to the anterior and lateral parts of the chest. 2. **Supra-scapular** branch to the muscles of the posterior scapular region. 3. **Infra-scapular** branches (3.) to the subcapularis, teres major, teres minor, and latissimus dorsi. 4. The **brachial interna cutaneous**, to the integuments of the palmar and dorsal surfaces of the forearm, near the ulnar margin. 5. The **brachial externa cutaneous**,

2. *Dorsal Nerves, (Nervi dorsales.)*

1st Dorsal Pair.	<p><i>Anterior Branch.</i> To the brachial plexus.</p>
2d & 3d Dorsal Pairs.	<p><i>Anterior Branches.</i> An intercostal and brachial branch.</p>
4th, 5th, 6th, and 7th Dorsal Pairs.....	<p><i>Anterior Branches.</i> <i>Internal</i> branches, to the intercostals, triangularis sterni, pectoralis major, and to the skin. <i>External</i> branches to the integuments of the chest, the obliquus externus abdominis, and the skin of the abdomen.</p>
8th, 9th, 10th, and 11th Dorsal Pairs.	<p><i>Anterior Branches.</i> <i>Internal</i> branches, to the transversalis, obliquus internus, and rectus muscles, and to the skin of the abdomen. <i>External</i> branches, to the integuments of the chest, and to the muscles and skin of the abdomen.</p>
12th Dorsal Pair....	<p><i>Anterior Branch.</i> To the first lumbar nerve, and to the muscles and skin of the abdomen as far as the iliac crest.</p>

The *Posterior Branches* of the dorsal nerves are distributed to the muscles and integuments of the back and loins.

3. *Lumbar Nerves.*

1st, 2d, 3d, and 4th Lumbar Pairs.....	<p><i>Anterior Branches.</i> Concurring to form the lumbar plexus.</p>
5th Pair.....	<p><i>Anterior Branch.</i> Aiding in forming the sciatic plexus.</p>

The *Posterior Branches* of the lumbar nerves are distributed to the loins, sacrum, and nates.

1. **Musculo-cutaneous Branches**, to the number of three. One *superior*, to the muscles of the abdomen, to the fold of the groin, and the scrotum: a *middle*, to the integuments and muscles of the abdomen: and an *inferior*, to the skin of the thigh. 2. A **genico-crural** branch to the integu-

Cervical Plexus.....

5th, 6th, and 7th Cervical Pairs.

Brachial Plexus.....

II. *Spinal or Vertebral Nerves.*

<p><i>Lumbar Plexus</i>.....</p>	<p>ments of the scrotum, the groin, and the thigh. 3. The <i>crural</i> nerve, to the integuments and muscles of the thigh, skin of the leg, and foot. 4. The <i>obturator</i> nerve, to the muscles at the inner part of the thigh. 5. The <i>lumbo-sacral</i>, to the sciatic plexus. It gives off the <i>gluteal</i> nerve to the gluteal muscles.</p>	<p>1. <i>Hæmorrhoidal nerves</i>, to the rectum. 2. <i>Fæcal</i>, to the bladder. 3. <i>Uterine</i> and <i>vaginal</i>, to the vagina and uterus. 4. <i>Inferior gluteal</i>, to the gluteal muscles, perinæum, and integuments of the posterior part of the thigh. 5. <i>Pudic</i>, to the perinæum, penis, or vulva. 6. <i>Sciatic</i>, divided into the <i>external popliteal</i>, which ramifies on the integuments and muscles of the external side of the leg, on the dorsum of the foot, and the dorsal surface of the toes; and into the <i>internal popliteal</i>, distributed on the dorsal surface of the two last toes, to the muscles of the foot, and on the plantar surface of all the toes.</p>
<p><i>Sacral Nerves.</i></p> <p>1st, 2d, 3d, and 4th <i>Sacral Pairs</i>.....</p> <p>5th and 6th <i>Pairs</i>....</p> <p>The <i>Posterior Branches</i> ramify on the muscles and integuments of the nates.</p>	<p><i>Sciatic Plexus</i>.....</p> <p><i>Anterior Branches.</i> They form by their union the sciatic plexus.</p> <p><i>Anterior Branches.</i> To the parts in the vicinity of the coccyx.</p>	

Classifications of the nerves have been recommended according to their uses, in preference to the ordinary anatomical arrangement. It has been remarked that the encephalic nerves have but one root, while the spinal have two. Now, experiments and pathological facts have proved, that the anterior fasciculus of the marrow and the anterior roots of the spinal nerves are inservient to volition or voluntary motion; and that the posterior fasciculus and roots are destined for sensibility. Hence the spinal nerves, which have two roots, must be the conductors both of motion and feeling; whilst the encephalic, which, with the exception of the fifth pair, have but one, can possess but one of these properties:—they must be either *sensitive* or *motive*, according as they arise from the posterior or anterior fasciculus of the medulla: and, consequently, three classes of nerves may be distinguished.

- 1. *Sensory*.... { Arising, by a single root, from the posterior fasciculus of the medulla oblongata or spinal marrow.
- 2. *Motor*..... { Arising, by a single root, from the anterior fasciculus of the same parts.
- 3. *Sensory and Motor*... { Which have two roots: one from the anterior, and one from the posterior fasciculus.

According to Sir Charles Bell, the medulla oblongata is composed of three fasciculi on each side; an *anterior*, *middle*, and *posterior*. Now, whilst the anterior and posterior fasciculi produce the nerves of motion and sensation respectively; the middle, according to Sir Charles, gives rise to a third set of nerves—the *respiratory*. To this order belong:—

- 1. The accessory nerve of Willis, or *superior respiratory*.
- 2. The par vagum.
- 3. The glosso-pharyngeal.
- 4. The facial or *respiratory of the face*.

- 5. The phrenic.
- 6. A nerve which has the same origin as the phrenic;—the *external respiratory*.

When a horse has been hard-ridden, every one of these nerves is in action. This division is now, however, generally abandoned, and there does not seem to be a third column, especially destined for respiration.

Sir C. Bell, again, has reduced the system of nerves to two great classes. 1. Those that are *regular, primitive, symmetrical*, and common to all animals, from the worm to man; which have double roots, and preside over sensibility and motion: and, 2. The *irregular or super-added*, which are added to the preceding, in proportion as the organization of animals offers new or more complicated organs. To the first class belong all the spinal nerves and one encephalic—the 5th pair;—to the second, the rest of the nervous system.

Lepelletier thinks we are justified in dividing the nerves into five classes;—the *first* comprising the *nerves of special sensibility*—the olfactory, optic, lingual branch of the fifth pair, and the auditory;—the *second*, the *nerves of general sensibility*, the fifth pair; and the spinal nerves, through their posterior root;—the *third* comprising the *voluntary motors*, the spinal nerves, by their anterior roots, the *motores oculorum*, or common oculo-muscular, the external oculo-muscular, and the hypo-glossal:—the *fourth*, *instinctive motors*, involuntary, the respiratory nerves of Sir Charles Bell, the pathetic, facial, glosso-pharyngeal, pneumogastric, and spinal accessory; and the *fifth*, *nerves of vital association and nutrition*—the filaments and plexuses of the ganglionic system.

Dr. Fletcher adopts a different arrangement. He divides them into *ganglionic* and *cerebro-spinal*; the latter being subdivided into the respiratory, motiferous, sensiferous, and regular: the last including those which communicate both the faculty of sensibility and the stimulus of volition. His arrangement is contained in the following table.

GANGLIONIC.	CEREBRO-SPINAL.			
	Respiratory.	Motiferos.	Sensiferous.	Regular.
<p><i>Those immediately connected respectively with</i></p> <p>The Ophthalmic, The Cavernous, The Otic, The Spheno-palatine, The Sub-maxillary, The three Cervical, The Cardiac, The twelve Dorsal, The Cœliac. The five Lumbar, The five Sacral, and The Coccygeal Ganglions.</p>	<p>The Pathetic, The Facial, The Glosso-pharyngeal, The Pneumo-gastric, The Accessory, The Phrenic, and The external Respiratory.</p>	<p>The Motor oculi. A part of the lower maxillary branch of the Trigemimus. The Abductor. The Hypo-glossal.</p>	<p>The Olfactory. The Optic. The Ophthalmic branch of the Trigemimus. The upper Maxillary branch of the Trigemimus. A part of the lower Maxillary branch of the Trigemimus. The Auditory.</p>	<p>The Sub-occipital. The seven Cervical. The twelve Dorsal. The five Lumbar. The five Sacral.</p>

Dr. Marshall Hall has proposed another division of the nervous system, which is calculated to explain many of the anomalous circumstances we so frequently witness. He proposes to divide all the nerves into, 1. The cerebral or sentient and voluntary. 2. The true spinal or excito-motory. 3. The ganglionic or cyclo-ganglionic,—the nutrient and secretory. If the sentient and voluntary functions be destroyed by a blow upon the head, the sphincter muscles will still contract when irritated, because the irritation is conveyed to the spine, and the reflex action takes place to the muscle so as to throw it into contraction. But if the spinal marrow be now destroyed, the sphincters remain entirely motionless, because the centre of the system is destroyed. Dr. Hall thinks that a peculiar set of nerves constitutes, with the true spinal marrow as their axis, the second subdivision of the nervous system; and as those of the first subdivision are distinguished into sentient and voluntary, these may be distinguished into the *excitor* and *motory*. The *first*, or the excitor nerves, pursue their course principally from internal surfaces, characterized by peculiar excitabilities, to the true medulla oblongata and medulla spinalis; the *second*, or the motor nerves, pursue a reflex course from the medulla to the muscles, having peculiar actions concerned principally in ingestion and egestion. The motions connected with the first or cerebral subdivision are sometimes, indeed frequently, *spontaneous*; those connected with the true spinal are, he believes, *always excited*. Dr. Hall thinks, too, that there is good reason for viewing the fifth, and posterior spinal nerves as constituting an external ganglionic system for the nutrition of the external organs; and he proposes to divide the *ganglionic* subdivision of the nervous system, into 1. The *internal ganglionic*, which includes that usually denominated the sympathetic, and probably filaments of the pneumogastric; and 2. The *external ganglionic*, embracing the fifth and posterior spinal nerves. To the *cerebral* system he assigns all diseases of sensation, perception, judgment, and volition—therefore all painful, mental, and comatose, and some paralytic diseases. To the true spinal or excito-motory system, belong all spasmodic and certain paralytic diseases. He properly adds, that these two parts of the nervous system influence each other both in health and disease, as they both influence the ganglionic system.

The main views of Dr. Hall on the excito-motory function have been generally embraced. The following tabular view of the arrange-

ment and connexions of the nerves and nervous centres is given by Dr. Carpenter. It represents the most modern ideas on the subject.

TABULAR VIEW OF THE NERVOUS CENTRES.

Cerebral Ganglia.  
the centres of the operations of Intelligence and Will.

Nerves of special sensation—motor fibres, mingled with general motor system.[?]	Sensory ganglia, the centres of	Nerves of special sensation—motor fibres, mingled with general motor system.[?]
	Consensual, instinctive, and emotional actions.	

Cerebellic Ganglia,  
for harmonization of general muscular actions.

Afferent and motor nerves of respiration, deglutition, &c.	Respiratory and stomato-gastric Ganglia, in Medulla oblongata.	Afferent and motor nerves of respiration, deglutition, &c.
--	--	--

Trunks of spinal nerves, composed of afferent and motor fibres from true spinal cord and medulla oblongata; and probably also of sensory and motor fibres, connected by the longitudinal strands of the cord with the sensory ganglia.	Fibrous structure continuous with Spinal Cord, consisting of chains of ganglia, for reflex actions of the trunk and extremities. Fibrous structure continuous with Encephalon.	Trunks of spinal nerves, composed of afferent and motor fibres from true spinal cord and medulla oblongata; and probably also of sensory and motor fibres, connected by the longitudinal strands of the cord with the sensory ganglia.
--	--	--

The nerves are covered and united to the neighbouring parts by an abundant layer of fatty cellular texture, which sends, inwards, prolongations that separate the nervous cords and filaments from each other. The arterial trunks, which furnish them, transmit branches into their interior. The veins follow the same course as the arteries. Absorbents are not easily traced even on the greatest trunks.

NERVE, ACCESSORY, OF WILLIS, Spinal nerve—n. Articular, Axillary nerve—n. Buccinator, Buccal nerve—n. Femoral cutaneous, see Genito-crural nerve—n. Femoro-popliteal, lesser, Sciatic nerve, lesser—n. Genito-crural, see Genito-crural nerve—n. Gluteal of the Sacral plexus, Sciatic nerve, lesser—n. Gustatory, Hypoglossal nerve—n. Popliteal internal, Tibial nerve, posterior—n.

Power, Nervous power—*n.* Respiratory, of the face, Facial nerve—*n.* Respiratory, superior, Spinal nerve—*n.* Scapulo-humeral, Axillary nerve—*n.* Scrotal, see Genito-crural nerve—*n.* Spiral, Radial nerve—*n.* Spiral, muscular, Radial nerve—*n.* Sub-occipital, Occipital nerve—*n.* Sub-pubian, Genito-crural nerve—*n.* Superficial temporal, Auricular nerve—*n.* Sympathetic, Trisplanchnic nerve—*n.* Temporal cutaneous, Auricular nerve—*n.* Ulnar, Cubital nerve—*n.* Vidian, Pterygoid nerve—*n.* Zygomatic-auricular, Auricular nerve.

NERVES, COSTAL, Intercostal nerves—*n.* Dorsal, Intercostal nerves—*n.* Eighth pair of, Pneumogastric—*n.* Encephalic, first pair, Olfactory nerves—*n.* Encephalic, eleventh pair, Spinal nerves—*n.* Ethmoidal, Olfactory nerves—*n.* Fifth pair, Trigemini—*n.* Fourth pair of, Patheticus nervus—*n.* Infra-orbital, Sub-orbital nerves—*n.* Ninth pair of, Hypoglossal nerve—*n.* Oculo-muscular, common, *Motors oculorum*—*n.* Phrenic, Diaphragmatic nerves—*n.* Recurrent, Laryngeal inferior nerves—*n.* Sixth pair of, *Motor oculi externus*—*n.* Spinal, Vertebral nerves—*n.* Third pair of, *Motors oculorum*.

NERVI ANONYMI, Innominati nervi—*n.* Divisi, Trigemini—*n.* Entobœnontes, Afferent nerves—*n.* Gustatorii, Trigemini—*n.* Odoratorii, Olfactory nerves—*n.* Reversivi, Laryngeal inferior nerves—*n.* Vulneratio, Neurotrois.

NERVINE, *Nervi'nis*, *Neuro'tic*, *Neurit'ic*, *Antineurotic*, *Antineuropath'ic*. A medicine considered proper for relieving debility of the nervous system.

NERVOUS, *Nerv'o'sus*, *Neuro'des*, *Ner'veus*, *Ner'vicus*. Relating or belonging to the nerves. Strong. Also, weak, irritable.

NERVOUS ATTACK, (F.) *Attaque des nerfs*, is an affection accompanied with spasms, pain and different nervous symptoms, to which irritable individuals are liable.

NERVOUS CENTRES, see Centres, Nervous.

NERVOUS DIATHESIS is termed *Atax'ia spir'ituum*, *Anoma'lia nervo'rum*, *Status nervo'sus*, *S. orath'i'ceus*, *Diath'esis nervo'sa*, *Constituti'o nervo'sa*.

NERVOUS DISEASES, *Morbi nervo'si*, (F.) *Maladies nerveuses*. Affections seated in the nervous system.

NERVOUS FLUID, *Nervous principle*, *Flu'idum nervo'um*, *Liq'uidum nervo'um*, *Succus nervo'us*, *Spir'itus vita'lis*. The fluid which is supposed to circulate through the nerves, and which has been regarded as the agent of sensation and motion. Of this fluid we know nothing, except that it resembles, in many respects, the electric or galvanic. It was formerly called *Animal spirits*, *Spir'itus anima'les*, (F.) *Esprits anima'ux*.

NERVOUS PAIN, Neuralgia.

NERVOUS POWER, *Nervus power*, *Neurodyn'amia*, *Neurody'namis*. The power of the nerves as exhibited in the living organism.

NERVOUS PRINCIPLE, N. fluid.

NERVOUS SYSTEM. The nerves of the human body considered collectively. See Nerves.

NERVOUS SYSTEM OF THE AUTOMATIC FUNCTIONS, Trisplanchnic nerve—*n.* System, organic, see Trisplanchnic nerve—*n.* System of the senses, Medulla oblongata—*n.* System of voluntary motion, &c., Medulla spinalis.

NERVUS, see Nerve, Penis—*n.* Ambulato-

rius, Pneumogastric nerve—*n.* Anonymus, Trigemini—*n.* Communicans faciei, Facial nerve—*n.* Genito-cruralis, Genito-crural nerve.

NERVUS IMPAR. A prolongation of the neurilemma below the lower extremity of the spinal cord, as a fibrous filament which is inserted into the base of the coccyx. It was formerly regarded as a nerve:—hence its name.

NERVUS INNOMINATUS, Trigemini—*n.* Ischiadicus, Sciatic nerve—*n.* Juvenilis, Penis—*n.* Latus, Achillis tendo—*n.* Lingualis lateralis, Pharyngo-glossal nerve—*n.* Lingualis medius, Hypoglossal nerve—*n.* Musculi pterygoidei, Pterygoid nerve—*n.* Mixtus, Trigemini—*n.* Opticus, Optic nerve—*n.* Quintus, Trigemini—*n.* Sympatheticus medius, Trigemini—*n.* Sympathicus medius, Trigemini—*n.* Timidus, *Motor oculi externus*—*n.* Tremellus, Trigemini—*n.* Trochlearis, Patheticus nervus.

NESTIA, Jejunum.

NESTIATRIA, Limotherapeia.

NESTIS, Jejunum.

NESTITHERAPEIA, Limotherapeia.

NESTOTHERAPEIA, Limotherapeia.

NESTROOT, *Monotropa uniflora*.

NETLEAF, *Goodyera pubescens*.

NETTLE, ARCHANGEL, WHITE, *Lamium album*—*n.* Dead, *Lamium album*—*n.* Dwarf, *Urtica urens*—*n.* Hedge, *Galeopsis*—*n.* Pill-bearing, *Urtica pilulifera*—*n.* Rash, *Urtica*—*n.* Stinging, common, *Urtica*.

NETWORT, *Goodyera pubescens*.

NEURADYNAMIA, *Neurasthenia*.

NEURALGIA, from *νευρον*, 'a nerve,' and *αλγος*, 'pain.' *Rheumatis'mus spu'rius nervo'sus*, *Neurody'n'ia*, (F.) *Néuralgie*, *Néurody'nis*, *Nervous pain*. A generic name for a certain number of diseases, the chief symptom of which is a very acute pain, exacerbating or intermitting, which follows the course of a nervous branch; extends to its ramifications, and seems, therefore, to be seated in the nerve. The principal neuralgiæ have been distinguished by the names *facial* (of which the *infra-orbital*, *maxillary* and *frontal* are but divisions)—the *silo-scrotal*, *femoro-popliteal*, *femoro-pretibial*, *plantar* and *cubito-digital*. A division of *anomalous* neuralgiæ has likewise been admitted.

NEURALGIA, ANOM'ALOUS. Under this name Chaussier has included different neuroses, some of which are characterized by acute pains circumscribed within a short compass, or extending by irradiations, but not having their seat in the course of a nerve; and others which are occasioned by tumours in the course of a nerve, or which succeed contusions or incomplete divisions of nerves.

NEURALGIA BRACHIO-THORACICA, *Angina pectoris*.

NEURALGIA CUBITO-DIGITALIS, *Ir'chias nervo'sa digitalis*. In this variety the pain extends from the part where the nerve passes under the inner condyle to the back of the hand and to its cubital edge.

NEURALGIA DENTALIS, *Odontalgia nervosa*.

NEURALGIA, FA'CIAL, *Neuralgia fa'ciae*, *Trismus maxillo'ris*, *T. Dolorificus*, *Opst'al'gia*, *Dolor eru'cians faciei*, *Hemiera'n'ia idopst'al'ica*, *Aut'al'gia doloro'sa*, *Tic douloureux*, *Dolor faciei*, *Dolor faciei typhi'o charact'ré*, *D. F. Pothergilli*, *Trismus clon'icus*, *T. dolorificus*, *Rheumatis'mus canoro'sus*, *Rheumatis'mus larta'tus*, *Proost'pal'gia*, *Proost'odyn'ia*, *Dolor fa-*

*cies period'icus, Febris top'lea, Ophthalmodyn'ia period'ica, Tortura Oris, Affectus spasmodico-convulsivus Labio'rum,* is characterized by acute lancinating pains, returning at intervals; and by twinges in certain parts of the face, producing convulsive twitches in the corresponding muscles. It may be seated in the frontal nerve, infra-orbital, or in the maxillary branch of the 5th pair.

*Metopodyn'ia, Brow-ague, Neural'gia frontalis, Ophthalmodyn'ia, Tic douloureux, Dolor period'icus, &c.,* commences at the superciliary foramen and extends along the ramifications of the frontal nerve that are distributed on the forehead, upper eyelid, caruncula lacrymalis, and nasal angle of the eyelids. Sometimes it is felt particularly in the orbit.

*Neuralgia infra-orbitaria, Dolor faciei atrox, Rheumatis'mus cancro'sus, Trismus dion'icus, Prosopal'gia, Febris top'lea, Odontal'gia remittens et intermit'tens, Hemisora'nia sava, Infra-orbital neuralgia, Tic douloureux,* is chiefly felt in the infra-orbital foramen, whence it passes to the cheek, upper lip, ala nasi, lower eyelid, &c.

In *Neuralgia maxilla'ris, Gnathal'gia, Gnathoneural'gia, Tic douloureux, Trismus catarhal'is maxillaris,* the pain usually sets out from the mental foramen and passes to the chin, lips, temple, teeth and tongue.

**NEURALGIA, FALSE.** A term assigned to pains along a nerve, or its ramifications, produced by some body compressing it,—those pains terminating with the removal of the compressing cause.

**NEURALGIA FEM'ORO-POPLITE'A, Sciatal'ica, Schias, Malum ischiad'icum, Morbus ischiad'icus, Passio ischiad'ica, Ischiagra, Ischial'gia, Ischio'sis, Coxal'gia, Neural'gia Ischiadica, Dolor Ischiad'icus nervo'sus, Is'chias nervo'sa Cotugnii vel Cotunnii, Neu'isch'ias, Ischias nervo'sa posti'ca, Is'chias, Cod'agra, Ischias rheumat'icum, Ischial'ica, Ischoneural'gia, (F.) Goutte sciaticque.** This is characterized by pain following the great sciatic nerve from the ischiatic notch to the ham, and along the peroneal surface of the leg to the sole of the foot.

**NEURALGIA FEM'ORO-PRETIBIA'LIS, Ischias nervo'sa anti'ca.** In this, the pain, setting out from the groin, spreads along the fore part of the thigh, and passes down, chiefly, on the inner side of the leg, to the inner ankle and back of the foot.

**NEURALGIA OF THE HEART, Angina pectoris**—n. Hepatica, Hepatalgia.

**NEURALGIA ILIO-SCROTAL** has been rarely observed. It is characterized by a very acute pain in the course of the branches of the first lumbar pair; this pain follows the crista ilii and accompanies the spermatic vessels to the testicle, which is often painfully retracted.

**NEURALGIA LIENIS, Splenalgia.**

**NEURALGIA PLANTA'RIIS.** This is rare; and the pain is confined to the course of the plantar nerves.

All varieties of neuralgia are obstinate, and the greatest diversity of means has been made use of:—bleeding, general and local,—emetics, purgatives, rubefacients, vesicants, actual cautery, narcotics, mercurial frictions, electricity; destruction of a portion of the nerve, &c. The most successful remedy, perhaps, is the carbonate of iron, given in doses of some magnitude;

as, for instance, ℞ss or ℞ij, twice or thrice a day in molasses. This plan of treatment, continued for a month or two, will generally relieve and ultimately remove this much dreaded affection. The mode in which it acts is by no means clear; but it is almost as certain as any other remedy used in disease in producing its salutary effects. The bowels must be kept free; and all inflammatory symptoms removed during its administration.

**NEURALGIA RENUM, Nephralgia**—n. Spinalis, Spinal irritation.

**NEURASTHENIA, Neuradyn'ia, Debilit'itas nervo'sa.** Debility or impaired activity of the nerves; from *νευρον*, 'a nerve,' and *ασθενια*, 'debility.'—See Irritable.

**NEURICUS, Nervous.**

**NEURILEMMA, Neurile'ma, Neurily'ma, New'rymen, Perineur'ion, Fis'tula seu Tu'bulus seu Cap'sula seu Involucrum nervo'rum, Membrana seu Membran'ula seu Tu'nica seu Indumentum nervo'rum, Vagi'na nervo'rum; (F.) Neurilemme;** from *νευρον*, 'a nerve,' and *λεμμα*, 'a coat.' The fine transparent, and apparently fibrous membrane that surrounds the nerves—to every filament of which it forms a true canal.

**NEURILEMMATITIS, Neurilemmatitis.**

**NEURILEMMITIS, Neurilemmat'itis, Neurolemmat'itis, Neuril'itis, (F.) Neurilemmis.** Same etymon. Inflammation of the neurilemma.

**NEURILITIS, Neurilemmitis.**

**NEURILYMA, Neurilemma.**

**NEURINE, Madull'a nervo'rum, (F.) Nervine.** The substance of which the nervous system is composed. It consists chiefly of albumen and a peculiar fatty matter.

**NEURISCHIAS, Neuralgia femoro-poplite'a.**

**NEURITIC, Nervine.**

**NEURITIS, Inflammatio nervo'rum, Neurophlogo'sis, Neurophleg'moné, (F.) Inflammation des Nerfs, Névrite,** from *νευρον*, 'a nerve,' and *ιτις*, a suffix denoting inflammation. Inflammation of a nerve.

**NEUROBLACIA, from νευρον, 'a nerve,' and *βλαξια*, 'stupor.' Insensibility of the nerves.**

**NEUROCHONDRO'DES, from νευρον, 'a sinew,' *χονδρος*, 'a cartilage,' and *ειδος*, 'resemblance.' A hard substance between a sinew and a cartilage.**

**NEURODES, Nervous.**

**NEURODYNAMIA, Nervous power.**

**NEURODYNAMIS, Nervous power.**

**NEURODYNIA, Neuralgia.**

**NEUROGAMIA, Magnetism, animal.**

**NEUROGRAPHY, Neurograph'ia;** from *νευρον*, 'a nerve,' and *γραφή*, 'a description.' The part of anatomy which describes the nerves.

**NEUROLEMMATITIS, Neurilemmitis.**

**NEUROLOGY, Neurolog'ia, (F.) Névrologie,** from *νευρον*, 'a nerve,' and *λογος*, 'a discourse.' That part of anatomy which treats of the nerves.

**NEURO'MA, (F.) Névro'me,** from *νευρον*, 'a nerve.' A morbid enlargement of a nerve. Applied to subcutaneous, circumscribed and highly painful tumours formed on the tissue of the nerves; and likewise to small, hard, grayish tumours of the size of a pea, which are observed in the course of the nerves, and appear to be formed from the neurilemma.

**NEUROMALACIA;** from *νευρον*, 'a nerve,' and *μαλακια*, 'softening.' Softening of nerves,

NEUROMETRES, *Præos.*

**NEUROMYELITIS**, from *νεῦρον*, 'a nerve,' *μυελος*, 'marrow,' and *itis*, denoting inflammation. Inflammation of the medullary matter of the nerves.

**NEURON**, see *Nerve*.

**NEURON'OSOS**, *Neuron'osias*, from *νεῦρον*, 'a nerve,' and *νοσος*, 'a disease.' A disease of the nerves.

**NEURONYGMÊ**, *Neuronyg'mus*, *Neuronygm'is*, from *νεῦρον*, 'a nerve,' and *νευρη*, 'puncture;' *Punctio nervi*. Puncture of a nerve.

**NEUROPATH'IC**, *Neuropath'icus*, from *νεῦρον*, 'a nerve,' and *παθος*, 'a disease.' Belonging to disease of the nerves, to *Neuropath'ia* or *Neuron'osias*.

**NEUROPHLEGMONE**, *Neuritis*.

**NEUROPHLOGOSIS**, *Neuritis*.

**NEUROPLASTY**, *Neuroplast'icô*, (F.) *Névroplastie*, from *νεῦρον*, 'a nerve,' and *πλαστικός*, 'forming.' M. Serres applies this term to a ganglionic alteration of the peripheral nerves.

**NEUROPYRA**, Fever, nervous, Typhus mitior.

**NEUROPYRETUS**, Fever, nervous, Typhus mitior.

**NEURO'SES**, (F.) *Névrosses*, from *νεῦρον*, 'a nerve.' A generic name for diseases supposed to have their seat in the nervous system, and which are indicated by disordered sensation, volition, or mental manifestation; without any evident lesion in the structure of the parts, and without any material agent producing them. Such is the usual definition. Broussais attributes them to a state of irritation of the brain and spinal marrow.

**NEURO-SKELETON**, see *Skeleton*.

**NEUROSPASMI**, see *Spasm*.

**NEUROSTHENI'A**, (F.) *Névrosthénie*, from *νεῦρον*, 'a nerve,' and *δύναμις*, 'strength.' Excess of nervous irritation. Nervous irritation.

**NEUROTHELIC APPARATUS**, *Corpus papillare*.

**NEUROTIC**, *Nervine*.

**NEUROTICA**, Diseases of the nervous function. The 4th class of Good's Nosology.

**NEUROTOME**, *Neurot'omus*; from *νεῦρον*, 'a nerve,' and *τομή*, 'I cut,' 'I dissect.' An instrument used by anatomists to dissect the nerves. It is a long and very narrow scalpel, having two edges.

**NEUROTOMY**, *Neurotom'ia*, (F.) *Névrotomie*. Same etymon. Dissection of the nerves. Also, an incised wound of a nerve.

**NEUROTROSIS**, *Neurotros'mus*, from *νεῦρον*, 'a nerve,' and *τρῶσις*, 'wounding.' *Nervi vulneratio*. Wound or wounding of a nerve.

**NEUROTROSMUS**, *Neurotrostis*.

**NEURYMEN**, *Neurilemma*.

**NEUTA**, *Neutha*. A membrane, according to Paracelsus, which covers the eyes and ears of the fœtus in utero.

**NEUTRAL**, from *neutor*, 'neither.' Belonging to neither in particular.

**NEUTRAL SALTS**, *Secondary salts*, (F.) *Sels neutres*. Salts, composed of two primitive saline substances, combined together, and not possessing the characters of acid or of base.

**NEVIS**, MINERAL WATERS OF. Ther-

mal springs in the department of Allier, France. Temperature, 136° to 146° Fahrenheit.

**NEURALGIE**, *Neuralgia*—*n. du Foie*, *Hepatalgia*—*n. des Reins*, *Nephralgia*—*n. de l'Utérus*, *Hysteralgia*.

**NEVRILEMME**, *Neurilemma*.

**NEVRILEMMITE**, *Neurilemmitis*.

**NEVRINE**, *Neurine*.

**NEVRITE**, *Neuritis*.

**NEVRODYNIE**, *Neuralgia*.

**NEVROLOGIE**, *Neurology*.

**NEVROME**, *Neuroma*.

**NEVROSE DU CŒUR**, *Angina pectoris*.

**NEVROSES**, *Neuroses*.

**NEVROSTHÉNIE**, *Neurosthenia*.

**NEVROTOME**, *Neurotome*.

**NEVROTOMIE**, *Neurotomy*.

**NEVUS**, *Nævus*.

**NEW JERSEY, MINERAL WATERS**

**OF**. In the upper part of Morris county and in the county of Hunterdon, near the top of Musconetcong mountain, there are chalybeate springs, which are resorted to. See Schooley's Mountain.

**NEW YORK, MINERAL WATERS OF**. The chief waters are those of Ballston, Saratoga, and Sharon.

**NEXUS STAMINEUS OCULI**, *Ciliary body*.

**NEZ**, *Nasus*.

**NICARAGUA WOOD**, see *Cæsalpinia*.

**NICE, CLIMATE OF**. The climate of Nice possesses some advantages over that of the neighbouring countries of Provence and Italy, being free from the sirocco of the latter, and protected from the mistral of the former. Spring is the most unfavourable season. The climate is very dry. It has been a great winter retreat for the consumptive; but does not deserve the encomiums that have been passed upon it.

**NICKAR TREE**, *Gymnocladus Canadensis*.

**NICODEMI O'LEUM**, *Oil of Nicodemus*. An oil made by digesting, for some time,—in a mixture of white wine and olive oil,—old turpentine, litharge, aloes, saffron, oxyd of zinc, &c.

**NICOTIANA**, *N. tabacum*—*n. Minor*, *N. rustica*.

**NICOTI'NA RUS'TICA**, called after Nicot, who carried it to Europe; *N. minor*, *Priapei'a*, *Hyoscy'amus luteus*, *English Tobacco*. The leaves possess the properties of tobacco, but are milder.

**NICOTIANA TAB'ACUM**, *Nicotia'na*, *Herba tabaci*, *Tabacum Petum*, *Petun*, *Hyoscy'amus Peruvia'nus*, *Tobacco*, *Virgin'ia tobacco*, (F.) *Tabac*, *Nicotiana*. Tobacco is a violent acnarcotic; its properties seeming to depend upon a peculiar principle, *Nicotin* or *Nicotianin*. It is narcotic, sedative, diuretic, emetic, cathartic, and errhine. In incarcerated hernia, it is injected, in the form of smoke or infusion, but requires great caution. It is extensively and habitually used as an errhine and sialogogue. The infusion is used to kill vermin, and in some cutaneous eruptions.

**NICOTIANE**, *Nicotiana tabacum*.

**NICOTIANIN**, see *Nicotiana tabacum*.

**NICOTIN**, see *Nicotiana tabacum*.

**NICTATIO**, *Hippus*, *Nictatio*.

**NICTATION**, *Nictatio*, *Nictatio*, from *nictare*, 'to wink.' *Clonus nictatio*, *Blepha-*

*rismus, Palpebra'tio, Twinkling of the eyes, (F.) Clignotement, Clignement, Cillement, Souris.* A rapid and repeated movement of the eyelids, which open and shut alternately. As occasionally performed, it is physiological; if repeatedly, a disease. It seems to be executed chiefly by the motor 7th pair of nerves; but it is necessary that the excitor 5th pair, should likewise be in a state of integrity.

NIDAMENTUM, Decidua.

NIDOREUX, Nidorous.

NIDOROUS, *Nidoro'sus, (F.) Nidoreux,* from *Nidor, Cnissa,* 'the smell of any thing burnt,' &c. Having the smell of burnt or corrupt animal matter.

NIEDERBRONN, MINERAL WATERS OF. Saline waters in the department of Bas-Rhin, France, which contain chloride of sodium, sulphate of magnesia, and carbonic acid.

NIELLE, Nigella.

NIGELLA, Coptis.

NIGELLA, *N. Sati'va, Melan'thium, Cum'minum Nigrum, Fennel flower, Nutmeg flower, Devil in a bush, (F.) Nigelle, Nielle.* This small southern European and Syrian plant was formerly used medicinally as an expectorant and deobstruent, errhine, sialogogue, &c.

NIGELLE, Nigella.

NIGHT-BLINDNESS, Hemeralopia.

NIGHT EYES, Crusta genu equinæ—n. Mare, Incubus.

NIGHTSHADE, AMERICAN, *Phytolacca decandra*—n. Bittersweet, *Solanum dulcamara*—n. Common, *Solanum*—n. Deadly, *Atropa belladonna*—n. Enchanter's, *Circæa Lutetiana*—n. Garden, *Solanum*—n. Palestine, *Solanum sanctum*—n. Stinking, *Hyoscyamus niger*—n. Vine, *Solanum dulcamara*—n. Woody, *Solanum dulcamara*.

NIGREDO A SOLE, Ephelides.

NIGRITA, Negro.

NIGRITIES, Melanopathia—n. Ossium, Caries.

NIGRITISM, Melanopathia.

NIGRITUDO, Melanosis—n. Pulmonum, Melanosis pulmonum.

NIGROMANTIA, Necromancy.

NIGROR, Melasma.

NIGRUM OCULI, Pupil.

NIHIL ALBUM, Zinci oxydum—n. Griseum, Zinci oxydum.

NILIACUM, Mel.

NINDSIN, Sium ninsi.

NINSI, Sium ninsi.

NINSING, Panax quinquefolium.

NINZIN, Sium ninsi.

NIPPLE, Sax. nypele. The *Teat, Dug, Pap, Aeromastium, Uber, Staphylis, Staphylisum; Bubona, Mammil'la, Mammel'la, Papil'la, Thel, Tit'hè, Titthos, Tit'hion, Titthis, (F.) Mamelon.* The conical tubercle, situate at the centre of the breast. Towards the central part of each breast the skin changes colour, and assumes a rosy tint in young females, or a reddish brown in those who have suckled several children. This circle is called the *Areola* or *Aureola of the nipple*. The nipple is capable of erection on being excited.

NIPPLEWORT, Lapsana.

NIRLES, Herpes exedens.

NISUS, *Nizus, Peira, Straining,* from Lat. *nitōr,* 'to endeavour.' A voluntary retention of the breath; so as to force down the dia-

phragm; the abdominal muscles being at the same time contracted forcibly. In this manner the contents of the abdomen are compressed; and the evacuation of the fæces, urine, &c., is effected.

NISUS, Effort—n. Formativus, Plastic force. NISUS PARTURIENTIIUM. The efforts or forcing during parturition.

NITEDULA, Cicindela.

NITON, MINERAL WATERS OF. These springs in the Isle of Wight contain iron, and sulphate of alumina and potassa.

NITRAS KALICUM, Potassæ nitras—n. Lixiviæ, Potassæ nitras—n. Natricum, Soda, nitrate of—n. Potassæ cum sulphure fusus, Potassæ nitras fusus sulphatis paucillo mixtus—n. Sub-bismuthicum, Bismuth, sub-nitrate of.

NITRATE, *Nitras.* A salt, formed of a base and nitric acid. Several nitrates are employed in medicine.

NITRATE D'AMMONIAQUE, Ammoniacæ nitras—n. D'Argent, Argenti nitras.

NITRE, Potassæ nitras.

NITRIC ACID, *Acidum nitricum, A. aso'ticum, A. sep'ticum, A. nitri, Aqua fortis, Nitrons acid, Spiritus nitri duplex, Sp. nitri fumans, Sp. nitri Glauberi, Azotic acid, De-phlogisticated nitrous acid, Oxysepton's acid, Spiritus nitri ac'idus, (F.) Acide nitrique.* Nitric acid is obtained from nitre—*Nitrate of potass.* Its odour is suffocating; taste very acid and caustic. It is corrosive, liquid, colourless, and transparent. S. g. 1.500.

Strong nitric acid is rarely used except as an application to foul, indolent ulcers, or to warts. When given internally, it is in the form of the *Acidum nitricum Dilu'tum, Spiritus nitri simplex, Sp. nitri vulgaris*—the *Diluted nitric acid*, which, in the Pharmacopœia of the United States, consists of *nitric acid, ʒj, water, ʒij*, by measure. Diluted largely with water, it is used, as a drink, in fevers of the typhoid kind; in chronic affections of the liver, syphilis, &c.; but, in the latter affections, it is not to be depended upon.

NITROGEN, Azote.

NITROGEN, GAZEUS OXIDE OF, *Nitrons oxide, Protoxide of azote, Paradiss gas, Intoxicating gas, Laughing gas, De-phlogisticated nitrous gas, Gas azo'icum oxygenat'um.* This gas, when respired, produces singular effects; great mental and corporeal excitement; and, generally, so much exhilaration as to render the appellation, "*laughing gas*" by no means inappropriate. It has not been much used in medicine, although recommended in paralysis. Its effects are too violent and too transient to render it a valuable remedial agent; and, in the delicate, it has been productive of unpleasant effects, inducing palpitation, fainting, and convulsions.

NITROGENE, Azote.

NITROGENIUM, Azote.

NITROGENIZED, *Azotized, Azotized.* Containing nitrogen or azote:—as a *nitrogenized, azoted, or azotized principle or tissue.*

NITRO-MURIATIC ACID, *Ac'idum nitro-muriat'icum, Nitro-hydrochloric acid, Hydrochloro-nitric acid, Aqua regia, Aqua styg'ia, Chrysulca, Aqua regis, Acidum muriaticum nitro-so-oxygenna'tum, Mens'trum auri, (F.) Eau régale.* A mixture of the nitric and muriatic acids, has been used in diseases of the liver, in

the form of a bath for the feet and legs made sharply acidulous. It has, also, been employed, and with more uniform results, in cutaneous affections. Whatever advantage it may possess in internal diseases—and these advantages are doubtful—they are probably dependent upon the chlorine formed by the mixture, or upon the properties possessed by the mineral acids in general. See Chlorine.

The *Acidum nitro-muriaticum* of the Pharmacopœia of the United States is formed by mixing four fluidounces of nitric acid with eight of muriatic acid.

**NITROUS OXIDE**, Nitrogen, gaseous oxide of.

**NITRUM**, Natron, Potassæ nitras—n. Antiquorum, Soda—n. Cubicum, Soda, nitrate of—n. Fœctitium, Borax—n. Flammans, Ammoniz nitras—n. Lunare, Argentini nitras—n. Rhomboidale, Soda, nitrate of—n. Vitriolatum Schroederi; Potassæ sulphas—n. Tabulatum, Potassæ nitras fusus sulphatis paucillo mixtus—n. Vitriolatum, Potassæ sulphas.

**NIX**, Snow—n. Fumans, Calx viva—n. Zinci, Zinci oxydum.

**NIXUS**, Nisus—n. Parturientium, Nisus parturientium.

**NOAH'S ARK**, *Cypripedium luteum*.

**NOBLE**, *Nobilis*, *Prin'cipal*, *Essent'ial*.

**NOBLE PARTS**, *Partes essential'es*.—Some anatomists have given this name to parts, without which life cannot exist; such as the heart, liver, lungs, brain, &c. The organs of generation have, likewise, been so called.

**NOCAR**, *Torpor Soporificus*. Lethargic torpor.

**NOCTAMBULATIO**, Somnambulism.

**NOCTAMBULISMUS**, Somnambulism.

**NOCTAMBULUS**, Somnambulist.

**NOCTILUCA**, Cincindela.

**NOCTISURGIUM**, Somnambulism.

**NOCTUINI OC'ULI**. Gray or blue eyes.—Castelli.

**NOCTURNAL**, *Nocturnus*, *Nycterinus*, from *nox*, 'night.' Relating to night, as *Febris nocturna* seu *nycter'ina*. A fever occurring in the night.

**NODDING**, Annuitio.

**NODDLEPOX**, Syphilomania.

**NODE**, *Nodus*, *Emphy'ma exost'ois perios'tea*, (F.) *Nodosité*, *Naud*; from Hebr. ך, 'a heap.' A hard concretion or incrustation, which forms around joints attacked with rheumatism or gout. Some include, under this name, exostoses, articular calculi, ganglions, and even the chronic swellings of the joints, known under the name of white swellings.

**NODES**, Edentulus.

**NODI DIGITORUM MANUS**, Phalanges of the fingers—n. Nervorum, Ganglions, nervous—n. Hæmorrhoidales, see Hæmorrhoids.

**NODOI**, Nefrendes.

**NODOSIA**, see Nefrendes.

**NODOSITÉ**, Node.

**NODULI ARANTII**, *Noduli Morgagnii*, *Corpora Arant'ii*. The small sesamoid bodies situate on the periphery of the semilunar valves of the aorta and pulmonary artery, for the better occlusion of the artery.

**NODULI MORGAGNI**, *Noduli Arantii*—n. Nervorum, Ganglions, nervous.

**NODULÛS**; diminutive of *nodus*, 'a knot.' A small knot. See Vermiform process, inferior.

**NODUS**, Articulation, Edentulus, Encystis, Hamma—n. Cerebri, Pons Varolii—n. Chirurgicus, Knot, surgeon's—n. Encephali, *Naud de l'Encéphale*, Pons Varolii—n. Hystericus, Globus hystericus—n. Vitæ, *Naud vital*.

**NOESIS**, Intellect.

**NŒUD**, Node—n. du Chirurgical, Knot, surgeon's—n. Emballeur, Knot, packer's.

**NŒUD DE L'ENCEPHALE** (F.), *Nodus Enceph'ali*. M. Cruveilhier, under this name, includes the pons Varolii, peduncles of the cerebrum and cerebellum, and the tubercula quadrigemina.

**NŒUD VITAL** (F.), *Nodus Vitæ*. This term has been applied by some to the medulla oblongata as the nervous centre of respiration.

**NŒUSES**, Calculi, arthritic.

**NOISETIER**, *Corylus avellana*.

**NOISETTE**, *Corylus avellana* (nut.)

**NOIX**, *Juglans regia* (nux)—n. *Américaine*, *Jatropha curcas*—n. *des Barbades*, *Jatropha curcas*—n. *Cathartique*, *Jatropha curcas*—n. *d'Eau*, *Trapa natans*—n. *de Galie*, see *Quercus infectoria*—n. *de Serpent*, see *Thevetia Ahouai*—n. *Vomique*, see *Strychnos nux vomica*.

**NOLA CULINARIA**, *Anemone pulsatilla*.

**NOLI ME TANGERE**, *Lupus*, see *Chancreux* (*Bouton*.)

**NOMA**, Cancer aquaticus—n. Pudendorum, Colpocæe infantis.

**NOMADE**, *Nomas*, from *nom*, 'pasturage.'

An epithet given to people who have no fixed habitation, and who travel, with their flocks, from country to country, for pasturage. Such are the Tartars. By analogy, the word *Nomad'ic* has been applied to spreading ulcers.

**NOMBELI**, Umbilicus.

**NOME**, Cancer aquaticus, Phagedenic ulcers.

**NOMENCLATURE**, *Nomenclatio*, *Nomenclatur'a*, *Onomatolog'ia*, *Onomatocle'isis*, *Terminology*, *Orismology*, from *ονομα*, 'name,' and *καλεω*, 'I call.' A collection of terms or words peculiar to a science or art. In all sciences, nomenclature is an object of importance; and each term should convey to the student a definite meaning. The Lavoisierian nomenclature was a valuable gift to chemistry; and anatomy has derived advantage from the labours of Barclay, Dumas, and Chaussier, who have given names to parts indicative of their situation. See Muscle. The nomenclature of pathology has required the greatest attention; and although repeated attempts have been made to improve it, the barbarous terms that disgrace it are still most frequently adopted. It consists of Hebrew and Arabic terms; Greek and Latin, French, Italian, Spanish, German, English, and even Indian, African, and Mexican; often barbarously and illegitimately compounded. A want of principle in founding the technical terms of medicine is every where observable. They have been formed:—1. From colour; as *Melana*, *Melas*, *Atrabilis*, *Leuce*, *Alphas*, *Chlorosis*, *Rubola*, *Scarlatina*, *Purpura*, &c. 2. From duration, as *sphemeral*, *quotidian*, *tertian*, and *quartan*, *continua*, and *intermittent*, &c. 3. From Birds, Beasts, Fishes, Insects, and Plants, as *Rabies canina*, *Cynanche*, *Bovinia*, *Pica*, *Hippopyon*, *Elephantiasis*, *Urticaria*, *Lichen*, *Ichthyosis*, &c. 4. From Persons or Places, as *Morbus Herculæus*, *Facies Hippocratica*, *Lepa Arabum*, *Plicia Polonica*,

*Sudor Anglicus, Morbus Gallicus, Ignus Sancti Antonii, Chorea Sancti Viti, &c.*

NOMUS, Cancer aquaticus.

NON-NATURALIS, *Non naturalis*. Under this term the ancient physicians comprehended air, meat, and drink, sleep and watching, motion and rest, the retentions and excretions, and the affections of the mind.

NON-STRIATED MUSCULAR FIBRE, see Muscular fibre.

NONUS HUMERI PLACENTINI, Teres minor—n. Linguae musculus, Genio-glossus—n. Vesalii, Peronæus tertius.

NOOS, Intellect.

NORRIS'S DROPS, see Antimonium tartarizatum.

NORTON'S DROPS, Liquor hydrargyri oxy-muriatis.

NO SACERUS, Sickly.

NOSE, Nasus—n. Running at the, Coryza.

NOSELI'A, *Nosocomesis, Nosocomia*, from *nosos*, 'disease.' Care of the sick.

NOSEMA, Disease.

NOSENCEPHALUS, from *nosos*, 'disease,' and *εγκεφαλος*, 'brain.' A monster whose skull is open only on the frontal and parietal regions, the posterior fontanelle being distinctly present.

NOSE ROS, Insalubrious, Sick.

NOSEUMA, Disease.

NOSOCOMESIS, Noselia.

NOSOCOMIA, Noselia.

NOSOCOMIUM, Hospital.

NOSOCOMUS, *Infirmier*.

NOSODES, Insalubrious, Sick, Sickly.

NOSODOCHIUM, Hospital.

NOSOGENESIS, Pathogeny.

NOSOGENIA, Pathogeny.

NOSOGENY, Pathogeny.

NOSOGRAPHY, *Nosographia*, from *nosos*, 'a disease,' and *γραφω*, 'I describe.' A description of diseases.

NOSOLOG'Y, *Nosologia*, from *nosos*, 'a disease,' and *λογος*, 'a discourse.' A name given to that part of medicine whose object is the classification of diseases. The most celebrated nosological systems have been those of Sauvages, (1763,) Linnæus, (1763,) Vogel, (1764,) Sagar, (1776,) Macbride, (1772,) Cullen, (1772,) Darwin, (1796,) Selle, Crichton, (1804,) Parr, (1809,) Swediaur, (1812,) Pinel, (1813,) Young, (1813,) Good, (1817,) Hosack, (1818,) &c. Besides these general nosographies, others have been published on *Surgery* exclusively, none of which are particularly worthy of enumeration amongst nosological systems. Nosological arrangements have, also, been formed of single families or groups of diseases. Plenck, of Baden, is the author of two different treatises of this kind: the one, a methodical arrangement of the diseases of the eyes, and the other, of cutaneous diseases. Dr. Willan published an arrangement of cutaneous diseases, which was completed by Dr. Bateman, and adopted into the Nosology of Dr. Hosack. Mr. Abernethy, also, published a methodical classification of tumours, and many other partial nosological classifications might be enumerated. Also, Pathology.

NOSONOMY, *Nosonomia*, from *nosos*, 'a disease,' and *ονομα*, 'name.' The nomenclature of diseases.

NOSOPHYTA, from *nosos*, 'disease,' and *φυτον*, 'a plant.' A disease supposed to be pro-

duced by, or to consist in the development of parasitic plants—as porrigo, mentagra, &c.—Gruby.

NOSOPCEUS, *Nosopœticus*, from *nosos*, 'disease,' and *ποιω*, 'I make.' That which causes disease.

NOSOS, Disease.

NOSOTAXY, *Nosotaxia*, from *nosos*, 'a disease,' and *ταξις*, 'arrangement.' The distribution and classification of diseases.

NOSOTHEORIA, from *nosos*, 'disease,' and *δωγμα*, 'doctrine.' The doctrine or theory of disease.

NOSTAL'GIA, from *nosos*, 'return,' 'a journey home,' and *αλγος*, 'pain.' *Nostomania, Nostrassia, Apodemialgia, Pathopatridal'gia, Patopatridal'gia, Philopatridal'gia, Philopatridomania, Ademonia, Ademosyne, Home sickness, (F.) Nostalgia, Maladie du pays.* An affection produced by the desire of returning to one's country. It is commonly attended by slow wasting, and sometimes by hectic, which may speedily induce death. M. Pinel properly regards it as a variety of melancholy.

NOSTOMANIA, Nostalgia.

NOSTRASSIA, Nostalgia.

NOSTRILS, Nares.

NOTA MATERNA, Nævus.

NOTÆ INFANTUM, Nævi.

NOTAL'GIA, *Notialgia, (Nostalgia, improperly, of Köchlin and others), from nosos*, 'the back,' and *αλγος*, 'pain.' Pain in the back. Spinal irritation.

NOTANENCEPHALIA, see Notencephalus.

NOTCH, Teut. *N o c k e*, Ital. *Nocchia, Emarginatio, Emarginatura, (F.) Échancre.* A depression or indentation of different shape and size, observed on the circumference or edges of certain bones.

NOTCH OF THE CONCHA, Incisura tragica.

NOTCH, ETHMOID'AL, (F.) *Échancreure ethmoïdale*, is situated on the frontal bone, and joins the ethmoid.

NOTCHES, ISCHIAT'IC, (F.) *Échancreures Ischiatiques*, are two in number;—the *greater* and the *less*. The *former* is large, situate at the inferior part of the pelvis, and formed by the sacrum and ilium. It gives passage to the sciatic nerve, pyramidalis muscle, and to the superior gluteal vessels and nerves. The *latter* is much smaller than the other, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

NOTCH, PAROT'ID, (F.) *Échancreure parotidienne*, is the triangular space comprised between the parotid edge of the inferior maxillary bone and the mastoid process; so called, because it lodges the parotid gland. The notches in soft parts are generally called Fissures.

NOTCH, SCAP'ULAR, *Incisura scapularis, Lu'nula scapularis, (F.) Échancreure scapulaire.* The notch on the superior edge or *costa* of the scapula, which is converted into a foramen by means of a ligament, and gives passage to the suprascapular nerve.

NOTCH, SEMILUNAR OF THE STERNUM, *Fourchette*.

NOTENCEPHALIA, see Notencephalus.

NOTENCEPHALUS, from *nosos*, 'the back,' and *εγκεφαλος*, 'the head.' A monster whose head, with the brain, is on the back.

The condition is termed *Notencephalia* and *Notanencephalia*.—G. St. Hilaire.

NOTHEUSIS, Degeneration.

NOTHIA, Degeneration.

NOTHROTÉS, Torpor.

NOTHUS, False.

NOTIÆUS, Dorsal—*n.* Myelus, Medulla spinalis.

NOTIALGIA, Notalgia.

NOTOMYELITIS, Myelitis.

NOTOMYELUS, Medulla spinalis.

NOTON, Dorsum.

NOTOS, Dorsum, Vertebral column.

NOUËGE DE LA CORNÉE, Caligo.

NOUË, (*Bandage*) (F.); 'knotted,' from *nodus*, 'a knot.' A bandage which has a considerable number of knots placed above each other. It is made with a roller, 6 or 7 ells long, rolled into two balls, and is used to compress the parotid region, after the extirpation of the parotid gland.

Also, an epithet applied to children in whom the disease of rickets has swollen the articulations.

It is, likewise, applied to the gout, when it has caused nodes on the joints.

NOUËT (F.), *Nod'ulus*. A bag filled with medicinal substances, and infused in a liquid to communicate their properties to it.

NOUFFER'S, MADAME, REMEDY, *Polypodium filix mas*.

NOURRICE, Nurse.

NOURRICIER, Nutritious.

NOURRITURE, Aliment.

NOUS, Intellect.

NOUURE, Rachitis.

NOUVEAU-NÉ (F.), *Neonatus*, *nuperimè Natus*, *Neogenes*, *Neog'ites*, *Neog'itus*, *Neog'nus*, *Infans recens natus*. That which has been just born. A new-born infant.

NOVACULA, Razor.

NOYAU CENTRAL DES PÉDONCULES DU CERVELET, *Corpus dentatum*.

NOYER, *Juglans regia*—*n. de Ceylon*, *Adhatoda*.

NUAGE, Nebula.

NUBECULA, *Enaërema*, Nebula.

NUBES, *Enaërema*, Nebula.

NUBILE, *Nu'bilis*, 'marriageable,' 'fit to marry.' Generally, the period of puberty is considered to be the age at which both sexes are *nubile*. They are truly *nubile*, however, only when they are fitted to procreate healthy and vigorous children, and are competent to discharge their duties as parents.

NUBILOSUS, Nepheloid.

NUCES AQUATICÆ, see *Trapa natans*—*n.* *Quercus*, see *Quercus alba*.

NUCHA, *In'ium*, (F.) *Nuqus*. The *nuck*, hinder part, or *naps* of the neck. The part where the spinal marrow begins.

*Ligamentum Nucha*. A strong ligament from the neck, proceeding from one spinous process to another, and inserted into the occipital bone. It is very strong in quadrupeds.

NUCHAL RE'GION, *Re'gio nucha* seu *nuchalis* seu *occipitalis inferior*. The region of the nucha or nape of the neck.

NUCISTA, see *Myristica moschata*.

NUCK, CANAL OF. A small prolongation of the peritoneum often sent into the inguinal canal of the female fœtus. So called from Nuck, who first described it.

NUCLEATED CELL, see *Cytoblast*.

NUCLEI OSSEI, Ossification, points of.

NUCLEOLUS, see *Cytoblast*.

NUCLEUS, see *Cytoblast*—*n.* *Centralis*, *Corpus dentatum*—*n.* *Dentatus*, *Corpus dentatum*—*n.* *Dentis*, *Dental pulp*—*n.* *Encased*, *Cytoblast*—*n.* *Fimbriatus*, *Corpus dentatum*—*n.* *Furunculi*, see *Furunculus*—*n.* *Germinal*, see *Molecule*—*n.* *Germinativus*, see *Molecule*—*n.* *Ossificationis*, *Ossification*, point of—*n.* *Rhomboidalis*, see *Corpus dentatum*.

NUCULA TERRESTRIS, *Banimum bulbocastanum*.

NUKE, *Nucha*.

NUMMULAR, *Nummularis*. Relating to money, from *nummus*, 'money.' An epithet applied to the sputa in phthisis, when they flatten at the bottom of the vessel, like a piece of money.

NUMMULARIA, *Lysimachia nummularia*. NUQUE, *Nucha*.

NURSE, Sax. *norice*, *Nutrix*, (from *nourish*, itself from *nutrire*.) *Tith'ônè*, *Trophousa*, *Lactans*, *Lacticans*, *Nutrients*, *Thelactria*, (I.) *Nutrice*, (F.) *Nourrice*. One who suckles her own child or another's. One that has the care of a sick person, (F.) *Garde-malade*.

NURSE, DRY. One who gives every care to a child, but does not suckle it.

NURSE, WET. A female, who suckles the child of another.

NŪS, Intellect.

NUSSUS, Disease.

NUT, BUTTER, *Juglans cinerea*—*n.* *Cembros*, see *Pinus cembra*—*n.* *Physic*, *Jatropha curcas*—*n.* *Pine*, see *Pinus picea*—*n.* *Pistachio*, see *Pistacia vera*—*n.* *Poison*, see *Strychnos nux vomica*—*n.* *Purging*, see *Jatropha*—*n.* *Rattle*, *Nelumbium luteum*—*n.* *Soap*, see *Sapindus saponaria*—*n.* *Tree*, *Malabar*, *Adhatoda*—*n.* *Vomic*, see *Strychnos nux vomica*—*n.* *Zirbel*, see *Pinus picea*.

NUTATION, *Nuta'tio*, from *nutare*, 'to nod.' Constant oscillation of the head, by which it moves involuntarily in one or more directions.

NUTATOR CAPITIS, *Sterno-cleido-mastoideus*.

NUTMEG, see *Myristica moschata*—*n.* *Flower*, *Nigella*—*n.* *Liver*, *Liver*, *nutmeg*.

NUTRICATIO, Nutrition.

NUTRICIER, Nutritious.

NUTRICIUS, Nutritious.

NUTRIENS, Aliment, Nurse.

NUTRIMEN, Aliment.

NUTRIMENTUM, Aliment, Pabulum.

NUTRITION, *Nutrit'io*, *Nutricatio*, *Nutritus*, *Alit'ura*, *Threpsis*, from *nutrire*, 'to nourish.' Nutrition is that function by which the nutritive matter already elaborated by the various organic actions, loses its own nature, and assumes that of the different living tissues.—to repair their losses and support their strength. Sometimes the word is used in a more extended signification, to express the whole series of actions by which the two constant movements of composition and decomposition are accomplished, in organized bodies. Nutrition, then, would comprehend digestion, absorption, respiration, circulation, and assimilation; the latter being *nutrition*, properly so called, and being operated in the intermediate system over the whole of the body,—the tis-

suces attracting from the blood the elements necessary for their reparation.

NUTRITION, FORCE OF, Plastic force.

NUTRITIOUS, *Nutric'ius*, *Nutritive*, *Alib'ilis*, *Trophim'os*, *Tropho'des*, (F.) *Nourricier*, *Nutricier*. Having the quality of nourishing: as nutritious food, nutritious lymph, &c.

NUTRITIOUS OR NUTRITIVE ARTERIES, (F.) *Artères nutritières*. Arterial branches which enter the *foramina nutritia* of long bones, and penetrate to the medullary membrane.

NUTRITIVE, Nutritious. Also, relating to nutrition: hence the 'nutritive functions,' or those that are concerned in nutrition.

NUTRITUS, Aliment, Nutrition.

NUTRIX, Nurse.

NUTS, WATER, Nelumbium luteum.

NUX AROMATICA, see Myristica moschata—n. Avellana, Corylus avellana (nut)—n. Barbadosis, Jatropha curcas—n. Becuiba, Icacuba—n. Cathartica Americana, Jatropha curcas—n. Gallæ, see Quercus cerris—n. Juglans, Juglans regia—n. Medica, Coco of the Maldives—n. Metella, Strychnos nux vomica—n. Methel, Datura stramonium—n. Moschata, see Myristica moschata—n. Myristica, see Myristica moschata—n. Pistacia, see Pistacia vera—n. Unguentaria, see Myristica moschata—n. Vomica, Strychnos nux vomica.

NYCTALOPEX, Nyctalops.

NYCTALOP'IA, from νύξ, 'night,' and οπτομαι, 'I see;' *Paropsis Lucif'uga*, *Nyctalop'iasis*, *Cæcitas diurna*, *Visus nocturnus*, *Oxyopia*, *Hemeralopia* (moderns,) *Amblyopia meridiana*, *Hemertaphlo'isis*, *Photophobia*, *Photophobia*, *Dysopia luminis*, *Visus d'rior*, (F.) *Vus nocturnus*, *Aveuglement de Jour*. The faculty of seeing during the night, with privation of the faculty during the day. It affects both eyes at once when idiopathic. Its duration is uncertain, and treatment very obscure. It is, however, a disease of nervous irritability, and one of excitement of the visual nerve in particular. The indications of cure will, consequently be—to allay direct irritation in every way; to excite counter-irritation by blisters; and to gradually accustom the eye to the impression of light.

One labouring under this affection is called a *Nyctalops*, *Nyctalops*, *Nyctalopez*.

NYCTERINUS, Nocturnal.

NYCTHEMERON, see Dies.

NYCTHEMERUM, from νύξ, 'night,' and ἡμερα, 'day.' The space of 24 hours, or of a day and night. Certain complaints continue only so long.

NYCTOBADIA, Somnambulism.

NYCTOBASIS, Somnambulism.

NYCTOBATESIS, Somnambulism.

NYCTOBATIA, Somnambulism.

NYCTOTYPHLOSIS, Hemeralopia.

NYGMA, Wound, punctured.

NYGMATICUM EMPLASTRUM, Emplastrum resinæ.

NYMPHA, Clitoris.

NYMPHÆ, from νυμφη, 'a water nymph.' *Alæ inter'næ minores clitoridis*, *Carunculae cuticular'es*, *Alæ minores*, *A. mulie'bres minores*, *Cristæ clitoridis*, *Collic'uli vaginæ*, *Myrtoch'ila*, *Myrtocheil'idæ*, *Labia minora seu inter'na*, *L. pudendi minora*, (F.) *Nymphæ*, *Pætes lèvres*. Two membranous folds, which arise from the lateral parts of the prepuce of the

clitoris, and descend on the inner surface of the labia majora; terminating, by becoming gradually thinner, about the middle of the circumference of the orifice of the vagina. They are formed each of two folds of the mucous membrane of the vulva; and contain, in their substance, a thin layer of spongy, erectile tissue. Their use seems to be,—not, as was once supposed, to direct the course of the urine, which notion gave rise to their name, but to favour the elongation and dilatation of the vagina in pregnancy and labour.

The word νυμφη, *Nymphæ*, has also been used synonymously with clitoris by Oribasius, Aëtius, &c.

NYMPHÆ' A ALBA, *Leuconympha'a*, *Nenuphar*, *Microleuconympha'a*, *White Water Lily*, (F.) *Ninuphar blanc*. *Nat. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Monogynia. Formerly employed as a demulcent, antaphrodisiac, emollient, and slightly anodyne remedy.

NYMPHÆA INDICA, *N. nelumbo*—n. Major lutea, *N. lutea*.

NYMPHÆA LUTEA, *N. major lutea*, *Yellow Water Lily*, (F.) *Ninuphar jaune*. Used for the same purposes.

NYMPHÆA NELUM'BO, *Faba Ægyptiaca*, *Cyamus Ægyptiacus*, *Nympha'a Indica*; *Pontic* or *Ægyptian Bean*. The fruit of this is eaten raw in Egypt and some of the neighbouring countries; and is considered to be tonic and astringent.

NYMPHÆA ODORA'TA, *Sweet-scented Water Lily*, *Sweet water lily*, *White pond lily*, *Toad Lily*, *Cow Cabbage*, *Water Cabbage*, (F.) *Ninuphar odorant*. An indigenous plant, growing in most parts of the United States in fresh water ponds, and on the borders of streams, and having large white, beautiful, sweet-scented flowers. The root is very astringent and bitter. It is sometimes made into a poultice and used as a discutient.

NYMPHÆ, Clitoris.

NYMPHES, Nymphæ.

NYMPHITIS; from νυμφη, 'the clitoris,' and itis, denoting inflammation. *Epidorrh'iti*. *Inflammati'o Clitoridis*. Inflammation of the clitoris.

NYMPHOCLUIA, Nymphomania.

NYMPHOMANIA, from νυμφη, 'a bride,' and μανια, 'fury;' *Furor uter'inus*, *Uteromania*, *Lagn'is furor famini'nus*, *Metromania*, *Edoagar'galus*; *Edoagaris'mus*, *Thelygon'ia*, *Erotomania*, *Edæomania*, *Aidoiomania*, *Melancholia uteri'na*, *Nymphoclu'ia*, *Symptoma turpitudinis*, *Andromania*, *Gynæcomania*, *Machlos'gynè*, *Entelipathi'a*, *Tenti'go venerea*, *Hysteromania*, *Salac'itis vulvæ*, *Uteri pruritus*, *Brach'na*, *Ara'seon*, *Arsatum*, *Æstromania*, (F.) *Nymphomania*, *Furor uterine*. An irresistible and insatiable desire, in females, for the venereal act. It occurs in those particularly, who possess a nervous temperament, and vivid imagination, especially if excited by improper language, masturbation, &c. Its course, as described, is as follows. In the commencement, the sufferer is a prey to perpetual contest between feelings of modesty and impetuous desire. At an after period, she abandons herself to the latter, seeking no longer to restrain them. In the last stage the obscenity is disgusting; and the mental alienation, for such it is, becomes complete. The treatment con-

sists in the use of the same means as are required in the satyriasis of man. When the mental alienation is complete, solitude is indispensable.

**NYMPHONCUS**, from *νυμφη*, 'the nymph,' and *οζος*, 'a tumour.' A morbid tumefaction of the nymphæ.

**NYMPHOTOMY**, *Nymphotomia*, *Nympharum Sectio*, from *νυμφη*, 'nymphæ,' and *τεμνω*, 'to cut.' An operation, known and practised for a long time, which consists in the excision of the nymphæ. The operation is had recourse

to, when they are attacked with scirrhus, cancer, fungus, or gangrene; or when they are so large as to interfere with walking or coition. *Nymphotomy* is the circumcision of the female. It is practised in some countries.

Some authors have used the term *Nymphotomy* for amputation of the clitoris.

**NYSTAGMUS**. A partial rotatory movement of the eyeball from side to side. Also, *Coma vigil*.

**NYXIS**, Puncture.

O.

**OAK, BLACK**, *Quercus tinctoria*—o. Common, *Quercus robur*—o. Jerusalem, *Chenopodium botrys*—o. Lungs, *Lichen pulmonarius*—o. Poison, *Rhus toxicodendron*—o. Red, *Quercus rubra montana*—o. Sea, *Fucus vesiculosus*—o. Spanish, *Quercus rubra montana*—o. White, *Quercus alba*.

**OARIOCYESIS**, Pregnancy, ovarian.

**OARION**, Ovary.

**OARIONCUS**, *Oariophyma*, *Ovarium tumidum*, *Tumor Ovarii*, from *ωαριον*, 'the ovarium,' and *οζος*, 'swelling.' Ovarian tumour.

**OARIOPARECTAMA**, from *ωαριον*, 'ovarium,' and *παρεστυτω*, 'to extend.' Enlargement of the ovary.

**OARIORRHESIS**, from *ωαριον*, 'ovarium,' and *ρηξις*, 'rupture.' *Ruptura Ovarii*. Rupture of the ovary.

**OARIOTOMY**, *Oariotomia*, *Ovariomotia*, *Ovariomotomy*, from *ωαριον*, 'the ovarium,' and *τομη*, 'incision.' The operation for removing the ovary.

**OARITIS**, *Oophoritis*, *Ooritis*, *Inflammatio Ovarii*, *Ovaritis*, (F.) *Inflammation de l'Ovaire*, from *ωαριον*, 'the ovarium,' and *itis*, the termination denoting inflammation. Inflammation of the ovarium.

**OARIUM**, Ovary.

**OARTHROCAE**, formed by contraction from *omo-artroocace*. Said to be used by Rust to designate inflammation of the scapulo-humeral articular surfaces.—Nysten.

**OATMEAL**, see *Avena*.

**OATS**, *Avena*.

**OBAUDITIO**, Barycoia.

**OBAUDITUS**, Barycoia.

**OBCÆCATIO**, Cæcitas.

**OBDOORMITIO**, from *ob*, and *dormio*, 'to sleep.' The state of the limbs being asleep. *Stupor artuum*.

**OBDUCTIO**, *Autopsia cadaverica legalis*.

**OBELÆA RAPHE**, Sagittal suture.

**OBSITAS**, *Polysarcia*—o. Collis, *Struma adiposa*—o. Nimia, *Pimelosis*—o. Viscerum, *Physconia adiposa*.

**OBESITÉ**, *Polysarcia*.

**OBSITY**, *Polysarcia*.

**OBSUS**, Corpulent.

**OBFUSCATIO**, Amaurosis.

**OBITUS**, Death.

**OBLINITIO**, Inunction.

**OBLIQUE**, *Obliquus*. Any thing inclined, or which deviates from the vertical line. Anatomists have given this name to certain muscles, which have an oblique direction as regards

the plane that divides the body into two equal and symmetrical halves. These are:—

**OBLIQUE MUSCLES OF THE ABDOMEN**. They are two in number, and distinguished into: 1. *Obliquus Externus Abdominis*, *O. descendens externus*, *O. descendens*, *O. major*, (F.) *Iliopubo costo-abdominal*, *Costo-abdominal* (Ch.), *Grand oblique*, *Oblique externus*. One of the broadest muscles of the body. It is situate at the lateral and anterior part of the abdomen; and is flat and quadrilateral. It is attached, above, to the outer surface and lower edge of the 7 or 8 last ribs; below, to the anterior third of the external lip of the crista ilii; before, it terminates at the linea alba by means of a broad and strong aponeurosis, which covers the rectus, and presents towards its inferior part two very solid fibrous fasciculi, which are inserted,—the one at the symphysis, the other at the spine of the pubis,—under the name of *Pillars of the Abdominal Ring*. These pillars leave between them an opening, which forms the inferior orifice of the inguinal canal. The obliquus externus depresses the ribs, and carries them backwards during a strong expiration. It impresses on the chest a movement of rotation, and bends the thorax upon the pelvis, or conversely. It contracts, also, the abdominal cavity.

2. *Obliquus Internus Abdominis*, *M. acilivis*, *O. ascendens*, *O. minor*, *O. internus*, *O. ascendens internus*, (F.) *Ilio-lombo-costo-abdominal*, *Ilio-abdominal* (Ch.), *Muscle petit oblique ou oblique interne*, is broad, especially before; thin, and irregularly quadrilateral, like the preceding, beneath which it is situate. It is attached, above, to the inferior edge of the cartilages of the 5th, 4th, 3d, and 2d false ribs; below, to the anterior two-thirds of the interstice of the crista ilii, to the posterior part of the crural arch, and to the pubis; behind, to the spinous processes of the last two lumbar vertebræ, and to those of the first two portions of the sacrum; before, to the linea alba. Its upper fibres run obliquely upwards and forwards; the middle are horizontal; and the lower pass obliquely downwards and forwards.

These last, in the male, are dragged down through the inguinal ring, when the testicle descends, and form the two fasciculi of the cremaster.

The obliquus internus resembles the O. externus in function.

**OBLIQUE MUSCLES OF THE EYE**, *Amatorii*, *Circummagentes*, *Rotatores Oculi*, are two in number. They are distinguished into: 1. *Olli-*

*gus Superior Oculi, Amatorius musculus, Trochlearis, Trochleator, Obliquus major, Optico-trochleari scleroticum, Grand trochléateur* (Ch.) *Circumductio'nis op'isæ, Longis'simus oculi*, (F.) *Grand oblique de l'œil, O. supérieur de l'œil, Amoureux* (Muscle), is situate at the inner and upper part of the orbit. It is small, round, fusiform, and reflected upon itself in the middle of its course. Behind, it is attached to the inside of the foramen opticum; and when it arrives opposite the internal orbital process, it becomes a small, round tendon, which slides in a cartilaginous pulley fixed to the os frontis, and is reflected, at an acute angle, to proceed downwards and outwards, and to attach itself to the outer and back part of the globe of the eye. This muscle carries the globe of the eye forwards and inwards; making it experience a movement of rotation, which directs the pupil downwards and inwards. This is conceived to be an involuntary muscle as well as the next. In sleep, according to Sir C. Bell, when the power over the straight or voluntary muscles of the organ is nearly lost, the eye is given up to the oblique muscles, which lodge the transparent cornea under the upper eyelid. At the approach of death, the same thing is observable; hence, the turning up of the eye, at such a time, is not an evidence of agony or suffering, but of insensibility. 2. *Obliquus Inferior Oculi, O. minor oculi*, (F.) *Maxillo-scleroticum, Petit Trochléateur* (Ch.), *Petit oblique ou oblique inférieur de l'œil*, is situate at the anterior and inferior part of the orbit. It is flat and attached to the inner and anterior part of the orbital surface of the superior maxillary bone, on the outside of the lachrymal gutter; from thence it passes outwards and backwards, and terminates by an aponeurosis, at the posterior and inner part of the globe of the eye. It carries the globe of the eye inwards and forwards; and directs the pupil upwards and outwards.

**OBLIQUE MUSCLES OF THE HEAD.** These are two in number: 1. *Obliquus Superior Capitis, O. minor capitis*, (F.) *Trachelo-atloïdo occipital, Atloïdo-sous-mastoi'dien* (Ch.), *Muscle oblique supérieur ou petit oblique de la tête*. This muscle is situate at the sides of, and behind, the articulation of the head: it is flat and attached, on the one hand, to the top of the transverse process of the atlas; and, on the other, terminates at the occipital bone, beneath the inferior curved line, and sometimes, also, at the mastoid region of the temporal bone. It extends the head,—inclining it to one side. 2. *Obliquus Inferior Capitis, Obliquus major*, (F.) *Spino-atloïdo-trachelo-atloïdien, Axoïdo-atloïdien* (Ch.), *Oblique inférieur ou grand oblique de la tête*, is situate at the posterior part of the neck and head. It is round, fusiform; attached to the spinous process of the axis, and proceeds to terminate behind and below the summit of the transverse process of the atlas. It impresses, on the first vertebra and the head, a movement of rotation, which turns the face to one side.

**OBLIQUE EXTERNE**, *Obliquus externus abdominis*—*O. Grand, Obliquus externus abdominis*—*O. Grand de l'œil, Obliquus superior oculi*—*O. Grand de la tête, Obliquus inferior capitis*—*O. Inférieur de l'œil, Obliquus inferior oculi*—*O. Inférieur de la tête, Obliquus inferior capitis*—*O. Internus, Obliquus internus abdominis*—*O. Petit, Obliquus internus abdominis*—*O. Petit*

*de l'œil, Obliquus inferior oculi*—*O. Petit de la tête, Obliquus superior oculi*—*O. Supérieur de l'œil, Obliquus superior oculi*—*O. Supérieur de la tête, Obliquus superior capitis*.

**OBLIQUITÉ DE LA MATRICE**, *Retroversio uteri*.

**OBLIQUUS ASCENDENS**, *O. internus abdominis*—*O. Auris, Laxator tympani*—*O. Descendens externus, O. externus abdominis*—*O. Major, O. externus abdominis, O. inferior capitis, O. superior oculi*—*O. Minor, O. internus abdominis*—*O. Minor capitis, O. superior capitis*—*O. Minor oculi, O. inferior oculi*.

**OBLITERATED, Obliteratus**; from *obliterare*, 'to efface,' (*litera*, 'letters.')

A vessel or duct is said to be obliterated, when its parietes have approximated and contracted such an adhesion to each other that the cavity has completely disappeared.

**OBLITERATIO COMPLETA**, *Hapantismus*.

**OBLIVIO**, *Amnesia*—*O. Iners, Lethargy*.

**OBLOBIUM**, *Antilobium*.

**OB'OLUS, Onolosa**. A weight of 9 or 10 grains.

**OBSCENÆ PARTES**, *Genital organs*.

**OBSCURCISSEMENT DE LA VUE**, *Caligo*.

**OBSERVATION, Observatio**, (from *ob*, and *servare*, 'to keep,' e. g. in sight.) *Tere'sis, Symparater'sis*. Act of examining a thing by means of the external senses. This word is employed in several acceptations. It expresses—1. The action of observing—2. The aggregate of knowledge, afforded by observation. In French—but not in English—it means the case or history of the phenomena presented by a patient in the course of a disease.

**OBSERVATION, Case**—*O. Method of, Numerical method*.

**OBSTETRICANS, Accoucheur**.

**OBSTETRICS**, from *Obstrix*, 'a midwife.' *Tokol'ogy, Tocology, Maes'a, Maes'a, Maes'a, Maes'u'ica ars, Ars obstetric'ia, Obstet'ricy*. The art of midwifery.

**OBSTETRICY**, *Obstetrics*.

**OBSTETRIX**, *Midwife*.

**OBSTIPATIO, Constipation**—*O. Tenesmus, Tenesmus*.

**OBSTIPATIO, see Hump**.

**OBSTIPITAS, Torticollis**—*O. Capitis seu Colli, Torticollis*.

**OBSTRUCTION, Emphraxis, Stegnosis**—*O. Alvi, Constipation*—*O. Ductus Alimentarii, Constipation*—*O. Ductus Stenoniani, Stenosis*—*O. Intestinalis, Constipation*—*O. Recti Spastica, Stricture of the Rectum, spasmodic*—*O. Pulmonum pituitosa febrilis, Peripneumonia notha*.

**OBSTRUCTION OF THE INTESTINES, Enteremphraxis**.

**OB'STRUENS**, from *ob'struo*, (*ob*, and *struere*, 'to build,') 'I stop up by building against.' *Oppilativus*. A medicine which closes the orifices of ducts or vessels.

**OBSTUPEFACIENTIA, Narcotics**.

**OBTONDANT, Obtundens**.

**OBTUNDENSIA, Mutitas**.

**OBTUNDENS, (F.) Obtondant**, from *obtundere* (*ob* and *tundere*, 'to beat,') 'to beat against,' and therefore to blunt the edge. An epithet applied to remedies that were supposed, accord-

ing to an erroneous theory, to be possessed of the power of blunting the acrimony of the humours. A demulcent is one of these.

**OBTURAMENTUM**, Emphragma.

**OBTURATEUR DU PALAIS**, Palate, artificial.

**OBTURATIO**, Emphraxis.

**OBTURATOR**, *Obturato'rius*, (F.) *Obturator*, from *obturare*, 'to close,' 'stop up the entrance.' A name given to several parts.

**OBTURATOR ARTERY**, *Arteria obturato'ria*, *A. obturatrix*, (F.) *Sous-pubio fémorale* (Ch.), *Artère obturatrice*, arises, most commonly, from the hypogastric. It is, however, frequently given off from the epigastric; a matter of importance to be determined in cases of femoral hernia. Of 500 obturator arteries examined by Mr. J. Cloquet, 348 were furnished by the hypogastric, and 152 by the epigastric or crural. When it arises from the hypogastric, it passes forwards and outwards, and then turns horizontally into the cavity of the pelvis, to issue from this cavity by the opening left at the upper part of the obturator membrane. When, on the contrary, the obturator artery arises from the epigastric or the crural, it descends obliquely inwards, behind the os pubis, to the obturator foramen. At its exit from the pelvis, the artery divides into two branches, a *posterior* and an *anterior*, which are distributed to the muscles of the anterior and superior part of the thigh.

**OBTURATOR FORAMEN**, *Foramen Obturato'rium*, *F. infra-pubianum*, *Foramen ovale*, *F. thyroïdeum*, *F. Thyroïdes*, *F. Amplum Pelvis*, (F.) *Trou sous-pubien*. A large opening, of an oval or triangular form, in the anterior part of the os innominatum, on the outside of the symphysis pubis and beneath the horizontal ramus of the os pubis. This foramen is closed by a membranous ligament.

**OBTURATOR LIGAMENT OR MEMBRANE**, *Subpubic membrane*, is a fibrous membrane, fixed to the whole circumference of the obturator foramen, except above, where an opening remains for the passage of the vessels and nerves of the same name.

**OBTURATOR MUSCLES**, *Obturato'res*, *Rotato'res femoris*. These are two in number. They are divided into

*a. Obturator Exter'nus*, *Extra-pelvio-pubio-trochantérien*, *Sous-pubio-trochantérien externe* (Ch.) A muscle, situate at the anterior and inner part of the thigh. It is broad, flat, and triangular; and is attached, on the one hand, to the anterior surface of the os pubis, to that of the ischium, and to the anterior surface of the obturator ligament. Its fleshy fibres converge to the tendon, which proceeds to be inserted at the inferior part of the cavity of the great trochanter. This muscle rotates the thigh outwards.

*b. Obturator Inter'nus*, *Marsupia'lis*, *Bursa'lis*, *Intra-pelvio-trochantérien*, *Sous-pubio-trochantérien interne* (Ch.) is seated, almost entirely, in the pelvis. It arises from the inner surface of the obturator ligament, and from the posterior part of the circumference of the obturator foramen, and is inserted, by means of a strong tendon, running between the two portions of the gemini, into the cavity at the root of the great trochanter; after having turned upon the ischium, which forms for it a kind of

pulley. This muscle also rotates the thigh outwards.

**OBTURATOR NERVE**, *Sous-pubio-fémoral* (Ch.), proceeds principally from the 2d and 3d lumbar nerves. It descends into the pelvis; gains the obturator foramen; gives branches to the obturator muscles, and divides, behind the adductor primus and pectinialis, into two branches; one *anterior*, whose branches are distributed to the first two adductors, gracilis, and integuments; the other, *posterior*, distributing its ramifications to the obturator externus and third adductor.

**OBTURATOR VEIN** has, ordinarily, the same arrangement as the artery. It is common, however, to find it arising from the epigastric; whilst the corresponding artery proceeds from the hypogastric, and conversely.

**OBTURATORIES**, Obturator muscles.

**OBVOLVENTIA**, Demulcents.

**OCA**, *Oxalis tuberosa*.

**OCCÆCATIO**, *Océcitas*.

**OCCIPITAL**, *Occipita'lis*. That which belongs to the occiput.

**OCCIPITAL ARTERY**. This arises from the posterior part of the external carotid, beneath the parotid. It proceeds backwards, passes between the mastoid process and the transverse process of the atlas; reaches the occipital bone and divides into two branches, which may be called ascending posterior and anterior, and are distributed to the neighbouring muscles and ligaments.

**OCCIPITAL BONE**, *Os occipit'is seu occipit'is seu occipita'le*, *Os sphæno basilare*, *Os memo'ris*, *Os natio'rum*, *Os basilare*, *Os prora*, *Os pyxid'is seu sextum cran'ni seu lambdoi'des seu lambdæ seu laudæ seu puppis seu nervo'sum seu fibro'sum seu pulvicephal'icum*, (F.) *Os occipital*, is situate at the posterior and inferior part of the cranium, which it assists in forming. It is flat, symmetrical, and curved upon itself. It presents, 1. An *occipital or posterior surface*, which is convex, and has, upon the median line, the *basilary surface*, the *foramen magnum*, through which passes the spinal marrow with its membranes and vessels,—the *external occipital crest*, the *external occipital protuberance*; and, at the sides, the *upper curved line*, *large rough arched ridge or transverse arch* or *linea semicircularis*, the *lower curved line*, the *posterior condyloid fossæ*, the *condyles* for the articulation of this bone with the atlas; and the *anterior condyloid fossæ*, pierced by a foramen for the passage of the ninth pair of nerves. 2. A *cerebral or anterior surface*. On the median line are: the *basilary fossæ*, the *inner orifices* of the foramen magnum, the *internal occipital crest*, the *internal occipital protuberance*, the *cruciform spine*; a *channel*, which lodges the termination of the straight sinus, and on each side, the *occipital fossæ* distinguished into *superior or cerebral*, and *inferior or cerebellous*, and separated by a groove which lodges the lateral sinus. 3. The surfaces of the occipital bone are separated by four ridges and four angles. The two superior edges are articulated with the parietal bones; the two lower join the temporal; and the anterior angle, under the name *basilary process*, is united to the sphenoid.

The occipital bone is developed from four points of ossification; and sometimes from a greater number.

**OCCIPITAL MUSCLE, *Occipitalis*.** Many anatomists have given this name to the posterior fasciculus of the occipito-frontalis.

**OCCIPITAL NERVE, *Sub-occipital nerve*, (F.) *Première paire trachélienne* (Ch.), *Nerv occipital ou sous occipital*.** It arises from the upper part of the spinal marrow by eight or ten filaments, united in two fasciculi. Thus formed, it passes between the foramen magnum and the posterior arch of the atlas; and, at this place, forms a long ganglion, afterwards dividing into two branches. Of these, the *anterior*, which is long and small, makes a turn above the transverse process of the atlas, and forms an anastomotic noose with a branch of the second cervical nerve. The *posterior* branch, larger and shorter, divides into seven or eight branches, which are distributed to the muscles of the upper and back part of the neck.

**OCCIPITAL REGION, *Occiput*.**

**OCCIPITAL VEIN.** Its roots follow exactly the course of the branches of the artery, and unite into a single trunk, which opens into the internal jugular vein, and sometimes into the external.

**OCCIPITIUM, *Occiput*.**

**OCCIPITO-ATLOID, *Occipito-atloideus*, (F.) *Occipito-atloidien*.** That which has reference to the occiput and atlas.

**OCCIPITO-ATLOID ARTICULATION** is the articulation of the condyles of the occipital bone with the superior articular cavities of the atlas. It is strengthened by two ligaments; the one *anterior*, the other *posterior*, called *occipito-atloid ligaments*: the one extends from the anterior, the other from the posterior, arch of the atlas, to the corresponding portion of the circumference of the foramen magnum.

**OCCIPITO-AX'OID, *Occipito-axoideus*, (F.) *Occipito-axoidien*.** That which relates to the occipital bone and the axis or second vertebra.

**OCCIPITO-AXOID ARTICULATION** is the connexion of the occipital bone with the axis or second vertebra, although these bones are not really articulated, but are merely retained in apposition by three strong ligaments, the posterior of which is called the *occipito-axoid*, and the two others *odontoid*.

**OCCIPITO-FRONTA'LIS, *Digastricus cranii*, *Epicranius*, *Frontalis et occipitalis*.** The majority of anatomists call by this name the whole of the fleshy plane, with the epicranial or coronal aponeurosis, (see *Calotte*), which covers the head from the occiput to the forehead. It is attached, by its posterior fasciculus, to the two outer thirds of the upper curved line of the occipital bone, and to the outer surface of the mastoid portion of the temporal; and, by its anterior fasciculus, it terminates at the eyebrow, where it becomes confounded with the superciliaris, pyramidalis nasi, and orbicularis palpebrarum.

The occipito-frontalis, by the contraction of its anterior fasciculus, draws forward a part of the integuments of the cranium. It wrinkles the skin of the forehead transversely, and may, also, contribute to open the eye by its decussation with the orbicularis palpebrarum. The posterior fasciculus of the muscle draws backwards a part of the skin of the cranium and assists in stretching the common aponeurosis.

**OCCIPITO-MENINGEAL.** That which

belongs to the occipital bone, and to the meninge or dura mater.

**OCCIPITO-MENINGEAL ARTERY**, in Chaussier's nomenclature, is a branch of the vertebral, given off to the dura mater at its entrance into the cranium.

**OC'CIPIUT, *Occipitium*, *Regio occipitalis*, *Inion*, from *ob*, and *caput*, *Opisthocranium*, *Opisthocéphalon*, *Prora*, *Occipitium*.** The back part of the head, formed by the occipital bone.

**OCCLUSION, *Oclu'sio*, *Mycē*, from *occludere*, 'to shut up.'** Sometimes this word signifies, simply, the transient approximation of the edges of a natural opening—the *occlusion of the eyelids*, for example; at others it is synonymous with imperforation, as *occlusion of the pupil*, *vagina*, &c.

**OCCULT DISEASES**, see Latent.

**OCHEMA**, Vehicle.

**OCHETEUMATA**, Nares.

**OCHETOS**, Canal.

**OCHEUS**, Scrotum.

**OCHREA RUBRA**, Hæmatites.

**OCHRIASIS**, Paleness.

**OCHROMA**, Paleness.

**OCHROPYRA**, Fever, yellow.

**OCHROTES**, Paleness.

**OCHROTYPHUS**, Fever, yellow.

**OCHTHODES**, Callous.

**OCIMUM BASILICUM, *Basilicum*, *Beren'daros*, *Basilicum majus*, *B. citratum*, *Commum* or *Citron basil*, (F.) *Basilic commum*. *Nat. Ord.* Labiatae. *Sez. Syst.* Dydynamia Gymnospermia. This herb has a fragrant odour and aromatic taste. It is used as a condiment, and has been supposed to possess nerve properties.**

**OCIMUM CARYOPHYLLATUM, *O. sin'isum*, *Small* or *Bush basil*.** Possesses properties similar to the former. It is sometimes used as snuff.

**OCREA**, Hippocampus minor, Shin.

**OCTANA, *Hebdomada'ria*, *Febris hebdomada'ria*, from *octo*, 'eight.'** A fever whose paroxysms recur every week. A supposititious case.

**OCTARIUS.** The eighth part of a wine-gallon. It contains sixteen fluidounces, (Ph. U. S.) to 20 fluidounces imperial measure.

**OCTOPUS**, Synaphecephalus, Hemipages.

**OC'TUNK.** A weight of eight ounces.

**OCULARES COMMUNES**, Motores oculorum—o. Dentes, Canine teeth.

**OCULARIA**, Euphrasia officinalis.

**OCULI MARMARYGODES**, Metamorphopsia—o. Palpebrarum scabies pruriginosa, Ophthalmia tarsi.

**OCULIST, *Oculis'ta*, *Ophthalmia'ter*, *Medicus ocularius*.** One who occupies himself, chiefly, with the management of diseases of the eye.

**OCULISTIQUE**, Ophthalmology.

**OCULO-MUSCULAR NERVES, COMMON**, Motores oculorum.

**OCULUM MOVENS PRIMUS**, Rectus internus oculi—o. *Movens secundus*, Rectus inferior oculi—o. *Movens secundus*, Rectus externus oculi—o. *Movens tertius*, Rectus superior oculi.

**OCULUS, Eye**—o. *Bovinus*, Hydrophthalmia—o. *Bovis*, Chrysanthemum leucanthemum—o. *Bubulus*, Hydrophthalmia—o. *Casius*,

Glaucoma—o. Duplex, Binoculus—o. Elephantinus, Hydrophthalmia—o. Genu, Patella—o. Lachrymans, Epiphora—o. Purulentus, Hypopyon—o. Simplex, see Monoculus—o. Typhoidis, Scilla.

OCYODYNIC, Ocytoic.

OCYPH'ONUS, from *ocys*, 'quick,' and *phōnē*, 'murder.' An agent that kills speedily.

OCYTOCEUS, Ocytoic.

OCYTOC'IC, *Ocytoicis*, *Ocytoos'us*, *Ocytoos'ius*, *Ocyt'ocus*, *Ocyody'nio*, *Odinago'gus*, from *ocys*, 'quick,' and *toceis*, 'labour.' Any thing that expedites parturition.

OCYTOCIUS, Ocytoic.

OCYTOCUS, Ocytoic.

ODAXISMUS, *Odaxos'mus*, *Odontoos'is*, *Odontocnesmus*, from *odax*, 'a tooth.' The painful itching of the gums which precedes the appearance of the teeth. Dentition.

ODES. A suffix, see Eidos.

O'DEUR, Odour.

ODIN, Pains, (labour.)

ODINAGOGUS, Ocytoic.

ODINOL'YSIS, from *odn*, 'labour pains,' and *lysis*, 'solution.' Mitigation of labour pains.

ODINOPE'A, from *odn*, 'labour pains,' and *peis*, 'I make.' Agents that encourage labour pains.

ODIS, Pains, labour.

ODME, Odour.

ODONTAGOGON, Dentagra.

ODONT'AGRA, from *odous*, 'a tooth,' and *αγρα*, 'a seizure.' A rheumatic or gouty pain in the teeth. Dentagra.

ODONTAL'GIA, from *odous*, 'a tooth,' and *αλγος*, 'pain.' *Odont'ia*, *Dent'ium dolor*, *Toothache*, *Odont'ia dolorosa*, *Gomphi'asis*, *Gomphi'as'mus*, *Odontodyn'ia*, (F.) *Douleur des dents*, *Fluxion sur les dents*, *Mal de dent*, *Mal d'amour*.

A disease dependent upon a variety of causes affecting the cavity of the tooth; but generally owing to caries, which exposes the cavity to the action of the air, and to extraneous matters in general. Hence, the treatment consists in plugging the tooth, or destroying the sensibility of the nerve, by powerful stimulants; and, if these means fail, in extracting the tooth.

ODONTALGIA CARIOSA, Dental gangrene—o. Dentitionis, Dentition—o. Hæmodia, Hæmodia.

ODONTALGIA NERVOSA, *Neural'gia Dent'al'is*. Neuralgia of the Teeth. Characterized by periodical pain, shooting with the utmost violence along the branches of the fifth pair distributed to the affected jaw.

ODONTALGIA REMITTENS ET INTERMITTENS, Neuralgia infra-orbitaria.

ODONTALGIC, Anti-odontalgic.

ODONTAMBLYOGMUS, Hæmodia.

ODONTHÆMODIA, Hæmodia.

ODONTHARPAGA, Dentagra.

ODONTHYPERÆSTHESIS, Hæmodia.

ODONTIA, Odontalgia.

ODONTIA DEFOR'MIS. Deformity of the teeth from error of shape, position, or number.—Good.

ODONTIA DENTITIONIS LACTANTIUM, see Dentition (first)—o. Dentitionis puerilis, see Dentition, (second)—o. Edentula, see Nefrendes—o. Excrecens, Epulis—o. Incrustans, Odontolithos—o. Stuporis, Hæmodia.

ODONTIASIS, Dentition.

ODONTIATER, Dentist.

ODONTIATERIA, Dentistry.

ODONTIC, Anti-odontalgic.

ODONTIT'IS, *Odontophleg'monē*, from *odous*, 'a tooth,' and *itis*, denoting inflammation. Inflammation of the teeth.

ODONTOBOTHRI'TIS, *Odontophatni'tis*, *Inflamma'tio alveolo'rura*, from *odontobothrium*, 'alveolus,' and *itis*, denoting inflammation. Inflammation of the alveoli.

ODONTOBOTHRIUM, Alveolus.

ODONTOCLA'SIS, from *odous*, 'a tooth,' and *κλασις*, 'fracture;' *Fractura dent'is*. Fracture of a tooth.

ODONTOCNESIS, Odaxismus.

ODONTOCNESMUS, Odaxismus.

ODONTODES, Odontoid.

ODONTODYNIA, Odontalgia.

ODONTOG'ENY, *Odontogen'ia*; from *odous*, 'a tooth,' and *γενεσις*, 'generation.' Generation or mode of development of the teeth.

ODONTOGLYPHON, Gum lancet.

ODONTOGLYPHUM, Dentiscalpium.

ODONTOID, *Odontoides*, *Odonto'des*, *Dentiform'ia*, *Dental'is*, *Dentoides*, *Pyrenoides*, from *odous*, 'a tooth,' and *oides*, 'shape,' 'resemblance.' This epithet is given to the *Processus dentatus* of the second vertebra or axis.

ODONTOID LIG'AMENTS, (F.) *Ligaments odontoidiens*, are two strong and short conical fasciculi, whose truncated summits embrace the sides of the odontoid process, and whose bases are fixed in the fossæ at the inner side of the condyles of the occipital bone. Their direction is obliquely outwards and slightly upwards. They enter into the composition of the occipito-axoid articulation; strengthen the junction of the head with the vertebral column, and limit the movement of rotation of the atlas on the axis.

ODONTOL'ITHOS, from *odous*, 'a tooth,' and *λιθος*, 'a stone.' A sort of incrustation, of a yellowish colour, which forms at the base of the teeth, and is called *Tartar*, *Tartarus Dentium*, *Odont'ia incrustans*, *Calculus dental'is*, (F.) *Tartro des Dents*. It consists of seventy-nine parts of phosphate of lime; twelve and a half of mucus; one of a particular salivary matter, and seven and a half of animal substance, soluble in chlorohydric acid.

ODONTOLOG'Y, *Odontolog'ia*, from *odous*, 'a tooth,' and *λογος*, 'a discourse.' An anatomical treatise of the teeth.

ODONTONECROSIS, Dental gangrene.

ODONTOPARALLAX'IS, from *odous*, 'a tooth,' and *παρὰλληξις*, 'deviation.' Irregularity and obliquity of the teeth.

ODONTOPHATNE, Alveolus.

ODONTOPHATNITIS, Odontobothritis.

ODONTOPHYIA, Dentition.

ODONTOPRISIS, Brygmus, Stridor dentium.

ODONTOSEI'SIS, *Odontoseis'mus*, *Dent'ium vacillan'tia*. Looseness of the teeth.

ODONTOSEISMUS, Odontoseisis.

ODONTOSMEGMA, Dentifrice.

ODONTOSPHACELISIS, Dental gangrene.

ODONTOSPHACELISMUS, Dental gangrene.

ODONTOSTERE'SIS, from *odous*, 'a tooth,' and *στέρησις*, 'privation.' Loss of the teeth.

ODONTOSYNERISMUS, from *odous*, 'a tooth,' and *συνερισμ*, 'to strike together.' (F.) *Claquement*. Chattering of the teeth.

ODONTOTECHNY, Dentistry.

ODONTOTHERAPIA, Dentistry.

ODONTOTRIMMA, Dentifricee.

ODORAMENTUM, Odoriferum.

ODORAT, Olfaction.

ODORATIO, Olfaction.

ODORATUS, Olfaction—o. Deperditus, Anosmia.

ODORIFERUM, from *odor*, 'odour,' and *fero*, 'I carry;' *Odoramentum*. A medicine that gives odour or flavour. A scent. A perfume.

ODOS, Way.

ODOUR, *Ōdor*, *Ōdmé*, *Ōsmé*, (F.) *Ōdeur*.

A smell. Odours are subtle particles, constantly escaping from the surface of certain bodies. They act, in some manner, by actual contact with the nerves of the Schneiderian membrane, and give occasion to the sense of smell or olfaction.

ODOUS, Tooth.

ODYNE, *odyny*, 'pain,' *Dolor*, *Ōdyna'ma*.

A very common suffix to words; as in *Pleurodyne*.

ODYNEMA, *Ōdyne*.

ŒCONOMIA, Economy—œ. *Animalis*, Physiology.

ŒDALICUS, Œdematous.

ŒDALIUS, Œdematous.

ŒDEMA, from *œdē*, 'I am swollen.' *Hydronecus*, *Œdemat'ia*, *Hydronecus*, *Hydatonecus*, *Hydroœdē'ma*, *Hydrœdē'ma*, *Hydrops cellulæ'ris artuum*, *Phlegmat'ia*, *Leucophlegmat'ia*, *Œcphy'ma ademat'icium*, (F.) *Œdème*, *Œdématic*, *Enflure*. Swelling produced by the accumulation of a serous fluid in the interstices of the cellular texture. This swelling is soft; yields under the finger; preserves the impression for some time, and is pale and without pain. It presents the same characters as *anasarca*, which is general œdema. Its etiology and treatment are also the same. See *Anasarca*.

ŒDEMA ACUTUM, see *Anasarca*.

ŒDEMA ARSENICALIS. The swelling of the eyelids and face, induced by continued use of the preparations of arsenic.

ŒDEMA CALIDUM, see *Anasarca*—œ. *Capitis*, *Hydrocephalus externus*.

ŒDEMA CEREBRI, (F.) *Œdème du cerveau*. Œdema of the brain. A condition of the cerebral pulp, in which there is an infiltration of serous fluid into it, so that it appears more moist or watery than common; and, when sliced or pressed, small drops of water are seen to ooze out.

ŒDEMA COMPACT, Induration of the cellular tissue—œ. *Cruentum*, *Suggillation*—œ. *Febrile*, see *Anasarca*—œ. *Fugax*, *Anathymiasis*—œ. *Hystericum*, *Anathymiasis*.

ŒDEMA OF THE GLOTTIS, *Œdem'atous Laryngit'is*, *L. submuc'osa seu ademat'osa seu sero-purulent'a*, *Œdē'ma glot'tidis*, *Hydrops glot'tidis*, *Angi'na aqu'osa*, *A. laryngis ademat'osa*, *Submuc'ous Laryngit'is*, *Œdem'atous angi'na*, (F.) *Laryngitis ademat'ieuse*, *L. adémateuse et sero-purulente*, *L. susglottique*, *L. sous-muqueuse*, *Angi'na laryngée adémateuse*, *Œdème de la glotte*. A disease consisting of serous or sero-purulent infiltration into the submucous tissue of the glottis. The symptoms resemble those of croup; but the disease attacks the adult rather than the child. The age is, indeed, a principal means of diagnosis between the two affections.

The disease is almost always fatal. The treatment has to vary according to the accompanying general symptoms.

ŒDEMA LACTEUM, *Phlegmatia dolens*.

ŒDEMA OF THE LUNGS, (*Œdē'ma pulmo'nium*, *Pneumoch'ysis*, *Pneumonadē'ma*, *Hydrops Pulmo'nium*, *Hydropneumo'nia*, *Anasar'ca Pulmo'nium*, (F.) *Œdème du poumon*. *Laënnec* has so called the infiltration of serum into the tissue of the lung, carried to such an extent as to diminish its permeability to air. It is not an uncommon sequela of pneumonia, and the major exanthemata. The respiration is laborious; the respiratory murmur scarcely perceptible, although the thorax is largely expanded, and there is a slight *râle crepitant*, particularly at the base and inferior part of the lung. The sound on percussion is clear, and on both sides equally so. The cough is attended with aqueous expectoration. In some cases the respiration becomes puerile in a small portion of the summit of the lung.

ŒDEMA PALPEBRARUM, *Hydroblepharon*—œ. *Puerperarum*, *Phlegmatia dolens*—œ. *Pulmonum*, Œdema of the lungs—œ. *Pulmonum chronicum*, *Hydropneumonia*—œ. *Scroti aquosum*, *Oschydrœdema*—œ. *Scroti cruentum*, *Œschamætœdema*—œ. *Scroti purulentum*, *Oschœopyœdema*—œ. *Scroti urinosum*, *Urocele*—œ. *Spasticum*, *Anathymiasis*—œ. *Uvulæ*, *Staphylœdema*.

ŒDEMATIA, Œdema.

ŒDÉMATIC, Œdema.

ŒDEMATOSARCA, Œdematosarca.

ŒDEMATOSCHŒOCELE, (*Œdemoschœocelē*, *Oschœocelē ademat'ica*. *Oschœocelæ* with œdema of the scrotum).

ŒDEMATOUS, *Œdemato'sus*, *Œdemat'icus*, *Œdemato'ses*, *Œdal'ius*, *Œdal'icus*, *Œdemat'ous*. Affected with œdema.

ŒDÈME, Œdema—œ. *du Cerveau*, *Œdema cerebri*—œ. *Douloureux des femmes en couche*, *Phlegmatia dolens*—œ. *des Nouvelles accouchées*, *Phlegmatia dolens*—œ. *actif des Nouvelles accouchées*, *Phlegmatia dolens*—œ. *de la Glotte*, Œdema of the glottis—œ. *de la Glotte*, *Angi'na œdematosa*—œ. *du Tissu cellulaire des nouveau-nés*, *Induration of the cellular tissue*.

ŒDEMATOSARCA, *Œdematosar'ca*. A species of tumour mentioned by M. A. Severinus, which holds a middle place between œdema and sarcoma.

ŒDEMOSCHŒOCELE, Œdematoschœocelæ.

ŒIL, Eye—œ. *de Bauf*, *Anthemis tinctoria*—œ. *Double*, *Binoculus*—œ. *de Lièvre*, *Lagophthalmus*—œ. *Simple*, see *Monoculus*.

ŒILLET GIROFLÉE, *Dianthus caryophyllus*.

ŒILLIÈRE, *Scaphium oculare*.

ŒNANTHÈ, Œ. *crocata*, Œ. *chærophyllis foliis*, *Hemlock dropwort*, *Hemlock water-dropwort*. *Nat. Ord.* *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. A violent poison of the acro-narcotic class. Its juice has been recommended in certain cutaneous diseases; but it is scarcely ever used. It is employed in fomentations.

ŒNANTHE PHELLANDRIUM, *Phellandrium aquaticum*.

ŒNELLÆON, from *oinos*, 'wine,' and *λαιον*,

'oil.' A mixture of oil and wine.—Galen. Also, rectified spirit or alcohol.

CENOG'ALA, *οινογαλα*, from *οινος*, 'wine,' and *γαλα*, 'milk,'—'a mixture of wine and milk.' According to some, wine as warm as new milk.

CENOG'ARON, *Garum vino mistum*. Wine mixed with garum.—Aëtius.

CENOIDES, Vinous.

CENOMANIA, Delirium tremens.

CENOMEL, *Cenomeli*, from *οινος*, 'wine,' and *μελι*, 'honey.' *Mel vino'sum*, *Mulsum vino'sum*. Honey wine. Wine mead.

CENOPHLYGIA, Temulentia.

CENOPHLYXIS, Temulentia.

CENOS, Wine.

CENOSTAGMA, Spiritus vini rectificatus.

CENOTHE'RA BIEN'NIS, *C. Mollis'sima*, *Evening Primrose*, *Tree Primrose*, *Primrose tree*, *Scabish*. An indigenous plant, common on the borders of fields, and in natural hedges. *See*. *Syst.* Octandria Monogynia. Its properties are mucilaginous and slightly acrid. A decoction has been used in cases of infantile and other eruptions.

CESOPHAGE'AL, *Cesophageus*, (F.) *Cesophagion*. Relating or belonging to the œsophagus.

CESOPHAGEAL AP'ERTURE OF THE DIA'PHRAGM, (F.) *Ouverture œsophagienne du diaphragme*. An opening in the diaphragm for the passage of the œsophagus.

CESOPHAGEAL AP'ERTURE OF THE STOMACH. A name given to the superior or cardiac orifice of the stomach, to distinguish it from the inferior or pyloric.

CESOPHAGEAL MUSCLE, *Cesophageus*. Some anatomists have given this name to the transverse muscular fibres which surround the œsophagus at its upper extremity.

CESOPHAGEAL TUBE, see Tube, œsophageal.

CESOPHAGEURYS'MA, *Cesophagus succenturiatus*, from *σοοφαγος*, 'the œsophagus,' and *ευρυσμα*, 'dilatation.' Dilatation of the œsophagus.

CESOPHAGIALGIA, *Cesophagismus*.

CESOPHAGIARCTIA, *Dysphagia contracta*.

CESOPHAGIEN, (muscle,) Constrictor œsophagi.

CESOPHAGISMUS, *Cesophagismus*. A name given by Vogel to spasm of the œsophagus, *Dysphagia spasmodica*, *D. Spastica*, *Cesophagospasmus*, *D. Nervosa*, *Strictura œsophagi spasmodica*, *Cesophagialgia*, *Tenesmus Gulae*, (F.) *Ténisme de l'œsophage*. By some used synonymously with œsophagitis, dysphagia, and contraction of the œsophagus.

CESOPHAGITIS, Inflammation of the œsophagus.—*Angina œsophagica*, *Cynanchœ œsophagica*, *Dysphagia inflammatoria*, *Inflammatio œsophagi*, *I. Gulae*, (F.) *Angine œsophagienne*.

CESOPHAGODYN'IA, from *σοοφαγος*, 'the œsophagus,' and *δωνη*, 'pain.' Pain in the œsophagus.

CESOPHAGOPATHI'A, *Morbus Cesophagi*, from *σοοφαγος*, 'the œsophagus,' and *παθος*, 'disease.' A morbid condition of the œsophagus.

CESOPHAGOPLE'GIA, *Dysphagia paralytica*, from *σοοφαγος*, 'the œsophagus,' and *πληγη*, 'a stroke.' Paralysis of the œsophagus.

CESOPHAGORRHAG'IA, from *σοοφαγος*, 'the œsophagus,' and *ραγη*, 'a rupture.' Hemorrhage from the œsophagus.

CESOPHAGORRHE'IA, from *σοοφαγος*, 'the œsophagus,' and *ρρω*, 'I flow.' Discharge of blood or mucus from the œsophagus.

CESOPHAGOSPASM'US, from *σοοφαγος*, 'the œsophagus,' and *σπασμος*, 'spasm.' Spasm of the œsophagus.

CESOPHAGOT'OMY, *Cesophagotomy*, from *σοοφαγος*, 'the œsophagus,' and *τομειν*, 'to cut.' An incision made into the œsophagus for the purpose of extracting foreign bodies from it.

CESOPH'AGUS, from *οιω*, 'I carry,' and *φαγω*, 'I eat;' *Gula*, *Fistula cibalis*, *Via stomachi et ventris*, *Fistula vel Infundibulum Ventriculi*, *Glutius*. The Gullet. A musculo-membranous canal, cylindrical, and depressed from before to behind, which extends from the inferior extremity of the pharynx to the upper orifice of the stomach. At its origin, it is situate in the median line; but, beneath the larynx, it deviates to the left, and in the chest experiences different inflections. In its cervical portion, it corresponds, behind, with the spine; before, with the larynx and trachea; and, at the sides, it is close to the primitive carotids, internal jugular veins, par vagum, recurrent nerves, &c. In its inferior or thoracic portion, the œsophagus is entirely contained in the posterior mediastinum; and enters the abdomen through the œsophageal aperture of the diaphragm. The œsophagus is composed of a very strong muscular layer, sometimes called *Tunica vaginalis gulae*; formed, itself, of two sets of fibres, the external being generally longitudinal, the internal transverse or annular. 2. Of a mucous membrane which is soft, fine, thin, and white, especially at its lower part. It is continuous, above, with the mucous membrane of the pharynx. The mucous follicles, found beneath it, are not numerous, and have been called *Cesophageal glandulae*. The arteries of the œsophagus proceed, in the neck, from the thyroid; in the chest, from the bronchial arteries and directly from the aorta;—in the abdomen, from the inferior phrenic, and coronaria ventriculi. Its veins empty themselves into the inferior thyroid, the vena cava superior, the internal mammary, azygos, bronchial, phrenic, and coronaria ventriculi. Its lymphatics pass into the ganglia surrounding it. Its nerves are afforded by the pharyngeal and pulmonary plexuses; by the cardiac nerves; the thoracic ganglia, and, especially, by the pneumogastrics and their recurrent branches.

CESOPHAGUS SUCCENTURIATUS, Pharyngocele.

CESTROMANIA, Nymphomania.

CESTRUM, Clitoris.

CESTRUM VEN'ERIS, *Cestrum venereum*, *Cestrus venereus*; from *οιστρος*, *œstrus*, 'a violent impulse or desire.' A vehement desire for sexual intercourse. With some, *æstrum* signifies Clitoris.

CE'SYPUS, from *οεις*, 'a sheep,' and *υππος*, 'dirt' [?]. The greasy matter of unwashed wool; formerly employed in friction in diseased joints.

CEUPS, Ova.

OFFICE, PHYSICIAN'S or SURGEON'S, Iatrimon.

OFFICINA, Pharmacopolium.

**OFFICINAL**, *Officina'lis*, from *officina*, 'a shop.' An epithet for medicines found in the shop of the apothecary, ready prepared—*usualia*; in opposition to *magistral* or *extemporaneous*,—those prepared after the prescription of the physician.

**OFFIUM**, Affion, Opium.

**OFFSPRING**, Epigone.

**OFFUSCATIO**, Amaurosis.

**OGLA**, Oogala.

**OGNON**, a Corn—*o. Marin*, Scilla.

**OHI'O**, MINERAL WATERS OF. *Yellow Spring* is a chalybeate, situate in Green county, 64 miles from Cincinnati. It is sometimes frequented.

**OIE**, Sorbus domestica.

**OIGNON**, Allium cepa.

**OIL**, *O'leum*, *Ela'e'on*, (F.) *Huile*; from *elaia*, 'the olive.' A collective name, under which two classes of fluids are included, very different from each other: those belonging to the one class, are viscid; mawkish or almost insipid; those of the other are nearly devoid of viscosity, and are caustic and very volatile. The former are called *fat* or *fixed oils*; the latter *volatile* or *essential oils*, or *essences*.

**OIL OF ALMONDS**, *Oleum amygdalarum*—*o.* of Amber, rectified, see *Succinum*—*o.* Animal, *Oleum animale*—*o.* Animal, of Dippel, *Oleum animale Dippelii*—*o.* of Bay, *Daphnelæon*—*o.* of Bays, *Oleum laurinum*—*o.* and Beeswax, *Unguentum cera*—*o.* of Benjamin or Benzoin, *Oleum benzoini*—*o.* Benne, see *Sesamum orientale*.

**OIL**, BRITISH. An empirical preparation often used in cases of sprains.

A committee of the Philadelphia College of Pharmacy recommend the following form for its preparation.—*Ol. Terabinth. Ol. Lani. usitatiss.* aa. f.  $\zeta$ viii; *Ol. Succini. Ol. Juniper.* aa. f.  $\zeta$ iv, *Petrol. Barbadiens.* f.  $\zeta$ ij; *Junol. American.* (*Seneca Oil*), f.  $\zeta$ j. *M.*

**OIL OF CACAO**, Butter of Cacao—*o.* of the Cashew nut, see *Anacardium occidentale*—*o.* Castor, see *Ricinus communis*—*o.* of Chabert, *Oleum animale empyreumaticum Chaberti*—*o.* of Cinnamon, see *Laurus cinnamomum*—*o.* of Cloves, *Eugenia caryophyllata*—*o.* Codliver, *O. Jecoris aselli*—*o.* of Cubebs, see *Piper cubeba*—*o.* of Cyprus, *Cyprinum oleum*—*o.* of Dill, see *Anethum graveolens*—*o.* Dippel's, *Oleum animale Dippelii*—*o.* of Egg, see *Ovum*—*o.* Ethereal, *Oleum Æthereum*—*o.* Flaxseed, see *Linum usitatissimum*.

**OIL**, FUSSEL, *Foussel oil*, *Pot'd'o oil*. An acrid volatile oil, formed in the manufacture of potato brandy, and which is not easily separable from it. Its chemical constitution is analogous to that of alcohol. It exhales a powerful and peculiarly suffocating odour. S. g. .818. In small doses, it is highly stimulating,—acting like narcotics in general. In large doses it destroys the mucous membranes of the stomach.

**OIL**, HÆRLEM. An empirical preparation supposed to consist chiefly of petroleum, turpentine, and balsam of sulphur. Used internally in renal and rheumatic affections.

**OIL**, KRUMHOLZ, see *Pinus mughos*—*o.* of Lemons, see *Citrus medica*—*o.* Lily, see *Lilium candidum*—*o.* of Mucilages, *Oleum e mucilagibus*—*o.* Neatsfoot, *Oleum bubulum*—*o.* of Nicodemus, *Nicodemi oleum*—*o.* of Nutmegs, see *Myristica moschata*—*o.* Olive, *Oleum olivæ*—*o.* Palm, see *Cocos butyracea*—*o.* Paper, Py-

rothonide—*o.* of Pennyroyal, see *Hedeoma pulegioides*—*o.* of Pike, *Oleum lucii piscis*—*o.* Rock, *Petrolæum*—*o.* Potato, Oil, *Fusel*—*o.* Rag, *Pyrothionide*—*o.* of Roses, see *Rosa centifolia*—*o.* of Rue, *Peganelæon*, see *Ruta*—*o.* of Spike, *Oleum terebinthinæ*—*o.* of St. John's Wort, see *Hypericum perforatum*—*o.* Salad, *Oleum olivæ*—*o.* of Scorpion, see *Scorpion*—*o.* Sulphuretted, *Balsamum sulphuris simplex*—*o.* of Tartar, *Liquor potassæ subcarbonatis*—*o.* of Turpentine, *Oleum terebinthinæ*—*o.* of Turpentine, rectified, *Oleum terebinthinæ rectificatum*—*o.* of Vitriol, *Sulphuric acid*—*o.* of Wine, *Oleum æthereum*.

**OILS**, ANIMAL, *Olea animalia*—*o.* Distilled, *Olea volatilia*—*o.* Empyreumatic, *Olea empyreumatica*—*o.* Essential, *Olea volatilia*—*o.* Ethereal, *Olea volatilia*—*o.* Expressed, *Olea fixa*—*o.* Fatty, *Olea fixa*—*o.* Fixed, *Olea fixa*—*o.* Fugacious, *Olea fugacia*—*o.* Medicinal, *Olea medicinalia*—*o.* Volatile, *Olea volatilia*.

**OILNUT**, *Juglans cinerea*.

**OILY GRAIN**, *Sesamum orientale*.

**OINTMENT**, *Unguentum*—*o.* of Antimony, tartarized, *Unguentum antimonij tartarizati*—*o.* Basilicon, *Unguentum resinæ*—*o.* Bay, *Unguentum laurinum*—*o.* Blister, *Cerate of cantharides*—*o.* Blistering, green, *Unguentum lyttæ medicatum*—*o.* Blistering, milder, *Unguentum lyttæ*—*o.* Blistering, yellow, *Unguentum lyttæ medicatum aliud*—*o.* Blue, *Unguentum hydrargyri*—*o.* Citrine, *Unguentum hydrargyri nitratæ*—*o.* of Creasote, *Unguentum creasoti*—*o.* Cyrillo's, *Unguentum muriatis hydrargyri oxygenati medicatus*—*o.* Digestive, simple, *Unguentum digestivum simplex*—*o.* Edinburgh, see *Unguentum veratri*—*o.* Elder, *Unguentum sambuci*—*o.* of Elemi, *Unguentum elemi compositum*—*o.* for the Eyes, (Smellone's), see *Ceratium resinæ*—*o.* Golden, *Unguentum hydrargyri nitrico-oxidæ*—*o.* Golden, Singleton's, see Singleton's golden ointment—*o.* Goulard's, *Ceratium plumbi compositum*—*o.* Green, *Unguentum sambuci*—*o.* Hellebore, white, *Unguentum veratri*—*o.* of Hydriodate of potass, *Unguentum potassæ hydriodatis*—*o.* of Iodine, *Unguentum Iodini*—*o.* of Iodine, compound, *Unguentum iodini compositum*—*o.* Itch, *Unguentum sulphuris compositum*—*o.* Itch, Bateman's, see *Unguentum sulphuratum alcalinum ad scabiem*—*o.* Itch, Bailey's, see *Unguentum sulphuratum ad scabiem*—*o.* Itch, Helmerick's, *Unguentum sulphuratum alcalinum ad scabiem*—*o.* Issue, Dr. Physick's, see *Unguentum lyttæ medicatum aliud*—*o.* of white oxide of Lead, *Unguentum alium plumbi albi*—*o.* of Lydia, Bacaris—*o.* Marshmallow, *Unguentum de Althæa*—*o.* Mercurial, *Unguentum hydrargyri*—*o.* of nitrate of Mercury, *Unguentum hydrargyri nitratæ*—*o.* of gray oxide of Mercury, *Unguentum oxidi hydrargyri cinereum*—*o.* of nitric oxyd of Mercury, *Unguentum hydrargyri nitrico-oxidi*—*o.* of Nitrous acid, *Unguentum acidi nitrosi*—*o.* Plunkett's, for cancer, *Plunkett's ointment*—*o.* red Precipitate, *Unguentum hydrargyri nitrico-oxidi*—*o.* of white Precipitate, *Unguentum hydrargyri precipitati albi*—*o.* Resin, *Ceratium resinæ flavæ*—*o.* Resin, black, *Unguentum resinæ nigre*—*o.* of Rosewater, *Unguentum aquæ rosæ*—*o.* Soldier's, *Martiatum unguentum*—*o.* of Spanish flies, *Cerate of Cantharides*, *Unguentum lyttæ*—*o.* Spermaceti, *Unguentum cetacei*—*o.* of

Stramonium, Unguentum stramonii—o. of Subacetate of copper, Unguentum subacetatis cupri—o. of Sugar of lead, Unguentum plumbi superacetatis—o. Sulphur, Unguentum sulphuris—o. Sulphur, compound, Unguentum sulphuris compositum—o. Tar, Unguentum picis liquidæ—o. Tobacco, Unguentum Tabaci—o. Tutty, Unguentum oxidi zinci impuri—o. Verdigris, Unguentum subacetatis cupri—o. Wax, Unguentum ceræ—o. White, Unguentum oxidi plumbi albi—o. Zinc, Unguentum zinci—o. of impure oxide of Zinc, Unguentum oxidi zinci impuri.

OIOCALYMMA, *Otiocalyptrum*; from *ωιωρ*, 'egg,' and *κλυπτειν*, 'to cover;' *Membra'na O'visi corticalis*. The membrane of the egg-shell.

OLD AGE, Senectus.

OLD MAN, Artemisia abrotanum.

OLD WIFE'S SHIRT, Liriodendron.

OLEA ANIMA'LIA, *Animal oils*, (F.) *Huiles animales*. A name given to fixed oils, holding in solution the mucilaginous and gelatinous principles of certain animals, as the *Oil of frogs*, *Oil of scorpions*, *Oil of spiders*, &c. Sometimes, also, the term *animal oils* is given to empyreumatic oils, produced during the decomposition of animal substances by heat.

OLEA DESTILLATA, O. volatilia.

OLEA EMPYREUMAT'ICA, *Empyreumatic oils*, (F.) *Huiles empyreumaticas*. Oils which have an empyreumatic or burnt smell. They are obtained by treating vegetable or animal matter by heat, in close vessels. They do not exist in organized bodies, but are formed during their decomposition by fire. The animal oil of Dippel is an empyreumatic oil.

OLEA EUROPE'A, *Oli'va*, *Olea sativa*. The *Olive tree*, *ελαια*, *Ela'a*, (F.) *Olivier*, (Fruit) *Olives*. *Nat. Ord.* Jasminææ. *Sez. Syst.* Dianthria Monogynia. The fruit of the olive tree, when pickled, is extremely grateful to some stomachs. Olives, as met with in the shops, are prepared from the green, unripe fruit, repeatedly steeped in water. To this, some quicklime or alkaline salt is added, and afterwards, they are washed and preserved in a pickle of common salt and water. From this fruit is prepared the *Olive oil* or *Salad oil* of the Pharmacopœias, which is obtained by grinding and pressing the olives, when thoroughly ripe. The finer and purer oil issues first by gentle pressure, and the inferior sort on heating what is left and pressing it more strongly. See *Oleum Olivæ*. In Calabria, an odorous resin exudes from its trunk, which is employed as a perfume by the Neapolitans.

A gum flows from certain wild olives, in warm countries, which consists, according to Pelletier, of a resin, a little benzoic acid, and a peculiar substance, called *Olivite*. It is in yellow masses, of a slightly acrid taste, and of a vanilla smell. It is called *Olezæ gummi*, *O. resinæ*, and *O. balsamum*, (F.) *Gomme olivier*, and is esteemed astringent and detersive.

OLEA FIXA VEL PIN'GUIA, *Express'd oils*, *Fixed oils*, *Fatty oils*, (F.) *Huiles fixes ou grasses*. All the oils obtained from the seeds or pericarps of vegetables, without distillation, and which are viscid, but slightly odorous and sapid; lighter than water, and insoluble in alcohol. The rancidity of oils depends on the absorption of oxygen, and, therefore, they

should be kept in bulk as much as possible; and in narrow-necked bottles, so that a very small surface only can be exposed to the air. All the fixed oils are emollient, and, in a certain dose, they act as purgatives and emetics. They are prepared by expressing the fruit or seed containing them.

OLEA FUGA'CIA, *Fuga'cious oils*, (F.) *Huiles fugaces*. A name given to oils which are so volatile that, in order to obtain them, recourse must be had to a different process from that employed for other essential oils. Such are the oils of jessamine, lily, violet, &c.

OLEA MEDICINA'LIA, *Medic'inal oils*, (F.) *Huiles Medicinales*. A name given to oils, prepared by macerating, infusing, or boiling medicinal substances in olive or any other fixed oils. These oils may then be regarded as oily solutions of certain medicinal substances; whence they can never be simple. They have, however, been divided into *simple* and *compound medicinal oils*. To the former belong the *Oils of St. John's wort*, of the *Solanum nigrum*, &c.; to the other—which have often been called *Oily balsams*, (F.) *Baumes huileux*,—the *Balsams of Fioraventi*, *Meiz*, &c. Medicinal oils are, almost always, employed externally.

OLEA VOLATIL'IA, *Olea destillata*, *Volatile oils*, *Athero'lea*, *Ethe'real oils*, *Essential oils*, *Distilled oils*, *Es'sences*, (F.) *Huiles volatiles*, *H. essentielles*. Oils found in aromatic vegetables, and in every part of them, except in the interior of the seeds. The majority are obtained by distillation; but some by expression. They possess unctuousity, inflammability, and viscosity, like the fixed oils; but they are generally odoriferous, pungent, and acrid. The greater part are lighter than water; but some are heavier, and congeal at a moderate temperature. They dissolve, in small quantity, in distilled water, by simple agitation. Almost all are soluble in alcohol. The odour and taste are the usual tests of their goodness. To preserve them, they should be kept in a cool place, in small bottles quite full and well corked. Volatile oils are possessed of the aromatic properties of the plants whence they are obtained. They are all, when applied externally, stimulant and rubefacient.

OLEAG'INOUS, *Oleagino'sus*, *Oleo'sus*. Oily; containing oil,—as 'an *oleaginous* or *oily* mixture.'

OLEA MEN, *Oleamen'tum*. Any soft ointment prepared of oil.—*Scribonius*.

OLEANDER, *Rhododendron chrysanthemum*.

OLECRANARTHRI'TIS, from *ωλεκρανον*, 'the olecranon,' *αρθρον*, 'joint,' and *itis*, denoting inflammation. Inflammation of the elbow joint.

OLECRANOID CAVITY, see *Ulna*.

OLEC'RANON, *Olecranon*, *Olecranium*, *Olecranon mobile*; from *ωλενη*, 'the elbow,' and *κρανον*, 'the head.' *Acrole'mion*, *Additamentum neacutum*, *Ancon*, *Processus anconæus*, *Glans seu Coro'na seu Coro'na posterior seu Additamentum unca'tum Ulnæ*, *Vertex Cubiti*, *Patella fixa*, *Rostrum externum seu posterius*, *Top of the cubit*. Head or projection of the elbow. A large process at the upper extremity of the ulna, on which we lean. When this process is fractured, it is apt to be drawn up by

the triceps; and much care is required to keep the parts in apposition.

**OLECRANARTHROCÆ**, from *oleum*, 'the elbow,' *κεφαλή*, 'the head,' and *arthrocæca*. A name given by Rust to inflammation of the articular surfaces of the elbow.

**OLENE**, Ulna.

**OLEO-CERATUM AQUÆ SUBACTUM**, Ceratum Galeni.

**OLEO-SACCHARUM**, Elæo-saccharum.

**OLEOSUS**, Oleaginous.

**OLETTE**, MINERAL WATERS OF. At Olette, in the department Pyrénées Orientales, is a thermal spring, which raises the thermometer to 190° Fahr. It is the hottest in France.

**OLEUM**, Oil—*o.* Abietis, see Pinus picea—*o.* Absinthii, Artemisia absinthium, (oil of)—*o.* Acusticum, *Huile acoustique*.

**OLEUM ÆTHERÆUM**, *Ætheral oil* (formed in the distillation of ether,) *Oleum vini*, Oil of wine, (F.) *Huile douce de vin*. A peculiar oleaginous matter, obtained by continuing the distillation, after the whole of the sulphuric ether has passed over in the process for the preparation of the latter. It is used only as an ingredient in the compound spirit of ether.

**OLEUM AMMONIATUM**, Linimentum ammoniæ fortius.

**OLEUM AMYGDALÆRUM**, *Oleum amygdalæ*, Oil of Almonds, (F.) *Huile d'amandes*. (Expressed from both sweet and bitter almonds, *Amygdalus communis*.  $\frac{3}{4}$  xvj of almonds yield  $\frac{3}{4}$  of oil.) It is inodorous, insipid, and of a pale straw colour, and is employed as a demulcent and emollient.

**OLEUM ANACARDII**, see Anacardium occidentale.

**OLEUM ANIMALÈ**, *Animal oil*, (F.) *Huile animale*. An oil, obtained by the decomposition of the immediate principles of animals, subjected to the action of heat. It is fetid, and always contains a certain quantity of subcarbonate of ammonia. See Olea Empyreumatica. The name *animal oil* is sometimes also given to the fat contained in the fatty vesicles. The composition of this fat does not, indeed, differ from that of the fixed oil.

**OLEUM ANIMALÈ DIPPËLII**, *Animal oil of Dippel*, *Oleum cornu cervi*, *O. C. C. rectificatum*, *Animal oil*, *Dippel's oil*, *Oleum pyro-animalè depuratum*, *O. animalè atherum*, *Pyro'leum ossium rectificatum*, (F.) *Huile animale de Dippel*, *Huile de corne de cerf*, is obtained by distilling animal matters, especially hartshorn, on the naked fire. The subcarbonate of ammonia, which it contains, renders it partly soluble in water, and communicates to it the stimulant properties for which it is used in medicine. It is employed as an antispasmodic.

**OLEUM ANIMALÈ EMPYREUMATICUM CHABERTI**, *O. Empyreumaticum Chaberti*, *Empyreumatic oil of Chabert*, Oil of Chabert, is made by adding one part of *animal oil* to three parts of oil of turpentine, leaving them to combine for four days, and then distilling three parts. An effective anthelmintic. Dose, a teaspoonful three times a day.

**OLEUM ANIMALIZATUM PER INFUSIONEM**, (F.) *Huile animalisée par infusion*, *Huile aromatique*, *H. de petits chiens*. A preparation, formerly esteemed tonic and cephalic. It was obtained by boiling new-born puppies in oil, first

depriving them of their blood, skin, and intestines. When the decoction was cold, origanum, thyme, pennyroyal, St. Johns-wort, and marjoram were added.

**OLEUM ANISI**, see Pimpinella anisum—*o.* Aurantii, see Citrus aurantium—*o.* Balaninum, Guilandina moringa (oleum)—*o.* Balsami, see Amyris opobalsamum.

**OLEUM BENZOÏNI**, *Oil of Benzoin or Benjamin*. An oil obtained by heating in a sand bath, the matter which remains after benzoic acid has been separated from benzoin by the aid of heat. It has been regarded as balsamic and sudorific.

**OLEUM BERGAMII**, see Bergamote.

**OLEUM BU'BULUM**, *Neats-foot oil*. The oil prepared from the bones of *Bos Domesticus*. It is obtained by boiling in water for a long time the feet of the ox, previously deprived of the hoof. It is introduced into the official list of the Ph. U. S. as an ingredient of the ointment of nitrate of mercury.

**OLEUM CACAO SPISSATUM**, Butter of cacao—*o.* Cajuputi, Caieput (oil)—*o.* Camphoratum, Linimentum camphoræ—*o.* Cari seu Carui, Carum (oleum)—*o.* Caryophylli, see Eugenia caryophyllata.

**OLEUM CEDRINUM**, *Essentia de cedro*, (F.) *Huile de cédrar*. The oil of the peel of citrons, obtained in Italy in a particular manner, without distillation.

**OLEUM CHABERTI**, *O. animale empyreumaticum Chaberti*—*o.* Chenopodii, see Chenopodium anthelminticum—*o.* Cicinum, see Ricinus communis—*o.* Cinnamomi, see Laurus cinnamomum—*o.* Cornu cervi, *O. animale Dippellii*—*o.* Cubebæ, see Piper cubebæ—*o.* Euphorbiæ lathyridis, see Euphorbia lathyris—*o.* Fixum nucum cocos butyracæ, see Cocos butyracea—*o.* Fœniculi, see Anethum—*o.* Gabianum, Petrolæum—*o.* Gallinæ, Alkale—*o.* Gaultheriæ, see Gaultheria—*o.* Hedeomæ, see Hedeoma pulegioides—*o.* Hyperici, see Hypericum perforatum—*o.* Infernale, *O. Ricini*.

**OLEUM JECORIS ASELLI**, *O. Morrhue*, *O. Jecino'ris Aselli*, *Codliver Oil*, (F.) *Huile de morue*. The animal oil, which appears under this name in commerce, is obtained from several of the species belonging to the genus *Gadus*. The clearest sorts are generally used. It appears to have no sensible effects upon the economy; but has been given in strumous affections, rheumatism, chronic cutaneous diseases, and tumours of the mamma. The dose for an adult is from f. ʒij to f. ʒiss.

**OLEUM JUNIPERÆ**, see Juniperis communis—*o.* de Kervâ, see Ricinus communis—*o.* Kervinum, see Ricinus communis.

**OLEUM LAURINUM**, *Oleum lauri*, *Oil of bays*. An oil obtained from bayberries, and sometimes used in sprains and bruises, unattended with inflammation.

**OLEUM LAURINUM**, Daphnelæon, Unguentum L.—*o.* Lavendulæ, see Lavendula—*o.* Lentiscinum, Schinellæon—*o.* Limonis, see Citrus medica—*o.* Lini, see Linum usitatissimum—*o.* Lini cum calce, Linimentum aquæ calcis.

**OLEUM LUCHI PISCIS**, *Oil of Pike*. From the liver of the *Esox lucius* an oil is spontaneously separated, which is used in some countries to destroy specks on the cornea.

**OLEUM MALABATHRI**, see Malabathrum—*o.* Mariæ, see Fagara octandra—*o.* Melaleucæ lëu-

codendri, Caiéput (oil)—o. *Mentha piperita*, see *Mentha piperita*—o. *Mentha viridis*, *Mentha viridis*—o. *Monarda*, *Monarda punctata*—o. *Morrhua*, *O. jecoris aselli*.

**OLEUM MUCILAGINIBUS, Oil of Mucilages.** (*Rad. althææ sec. Des. sem. lini, sem. fenu-graci, & Ziij, aqua Oij.* Boil for half an hour; add-ol. *oliv.* Oiv; continue the boiling till the water is nearly consumed, and pour off the oil.) Emollient.

**OLEUM MYRISTICÆ, see Myristica moschata**—o. *Neroli*, see *Citrus aurantium*.

**OLEUM OLIVÆ, O. oliværum, Olive oil, Salad oil.** An inodorous, insipid, and transparent oil; obtained by expression from the olive, when ripe. It is demulcent and emollient,—possessing the qualities of the fixed oils in general.

An inferior kind, obtained by boiling olives in water, and skimming the oil from the surface is also used in Pharmacy. See *Olea Europæa*.

**OLEUM OMPHEACINUM, Omotribes**—o. *Origanum*, see *Origanum*—o. *Oxydi cupri viride*, *Balsam*, green, of Metz—o. *Palma*, see *Cocos butyracea*—o. *Palma liquidum*, see *Ricinus communis*—o. *Petræ*, *Petrolæum*—o. *Petræ album*, *Naphtha*—o. *Picinum*, *Brutia*, *Pisselæum*—o. *Pimentæ*, see *Myrtus pimenta*—o. *Pini purissimum*, *O. terebinthinæ rectificatum*—o. *Pulegii*, see *Mentha pulegium*—o. *Pyro-animale*, *O. animale* *Dippelii*—o. *Ricini*, see *Ricinus communis*—o. *Rosæ*, see *Rosa centifolia*—o. *Rosarum*, *Rhodelæon*—o. *Rutaceum*, *Peganelæon*—o. *Rosmarini*, see *Rosmarinus*—o. *Rutæ*, see *Ruta*—o. *Sabini*, see *Juniperus Sabina*—o. *Sassafras*, see *Laurus Sassafras*—o. *Sesami*, see *Sesamum orientale*—o. *Sinapis*, see *Sinapis*—o. *Spicæ vulgaris*, *O. terebinthinæ*—o. *Succini*, see *Succinum*—o. *Succini rectificatum*, see *Succinum*.

**OLEUM SULPHURATUM, Balsamum sulphuris simplex, Sulphurated oil.** (*Sulphur. lot. Ziij, olivæ olei lbj.* Heat the oil in a large iron pot, and throw in the sulphur by degrees; stirring the mixture after each addition till they unite.) It is stimulating, and was formerly much used in coughs, asthma, &c., and, externally, to foul ulcers.

**OLEUM TARTARI FER DELIQUITUM, Liquor potassæ subcarbonatis**—o. *Templinum*, see *Pinus mughos*.

**OLEUM TEREBINTHINÆ, Oil of turpentine.** The volatile oil of the juice of *Pinus palustris*, and other species of *Pinus*.

**OLEUM TEREBINTHINÆ RECTIFICATUM, Oleum pini purissimum, Rectified oil of turpentine, Oleum terebinthinæ æthereum, Sp. of turpentine.** Common oil of turpentine is also called *Common oil of spikes, Oleum spicæ vulgaris.* (*Olei terebinth. Oj, aqua Oiv.* Distil over the oil.) It is stimulant, diuretic, anthelmintic, and rubefacient. Dose, ʒss to ʒi.

*Gustonian embrocation* for Rheumatism consists of ol. *terebinth. ol. oliv.* ʒʒ *Ziiss, acid. sulph. dil.* Ziij.

**OLEUM THEOBROMÆ CACAO EXPRESSUM, Butter of cacao**—o. *Tigllii*, *Croton tigllium*—o. *Vini*, *O. æthereum*—o. *Vitrioli*, *Sulphuric acid*.

**OLFACT'ION, Olfact'us, from olfacere, for olfacere, (odor, and facere,) Oosphr'esis, Oosphr'esia, Oosphr'esia, Osm'esis, Odon'atio, Odon'atus, Sensus osm'omat'ricus, Sense of smell, Smelling, (F.) Odonat.** The sense by which

we perceive the impressions made on the olfactory nerves by the odorous particles suspended in the atmosphere. The olfactory nerve, or 1st pair, has usually been considered the great nerve of smell; and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the 5th pair, distributed on the pituitary membrane of the nose and sinuses.

**OLFACTORY, Olfact'ivus, Olfact'orius, Oosphr'aticus, Oosphr'aticus, Oosphr'eticus, from olfactus, 'the smell.'** That which belongs or relates to the sense of smell.

**OLFACTORY FORAMINA, (F.) Troues olfactifs,** are the holes in the cribriform plate of the ethmoid bone, through which the olfactory nerve passes.

**OLFACTORY NERVES, Ethmoidal nerves, Primum Nervorum cerebri, Nervi odoratorii, Processus mamillares seu Papillares, Processus mamillares cerebri ad nares, P. papillares, Caruncula mamillares,**—the first pair of encephalic nerves. This nerve, which probably arises from the medulla oblongata, is observed to leave the brain, opposite the inner part of the fissure of Sylvius, by three roots; which, by their union, form a triangular knot or expansion. When it reaches the ethmoid fossa it expands and forms a triangular ganglion, or grayish, soft bulb, which furnishes, from its inferior surface, the branches that have to be distributed to the nasal fossæ. These filaments are very numerous; they pass through the foramina in the cribriform plate and enter the nasal fossæ. They are distinguished into the internal, external, and middle. The former are distributed over the mucous membrane, covering the outer paries of the nasal fossæ; the second descend upon the septum, and the third are lost, almost immediately, on the portion of the pituitary membrane that lines the vault of the fossæ.

**OLFACTUS, Olfaction**—o. *Acutus*, *Hypersphresia*—o. *Amissio*, *Anosmia*—o. *Deficiens*, *Anosmia*—o. *Depravatus*, *Parosmia*.

**OLIBANUM, see Juniperus lycia**—o. *Vulgare*, see *Pinus abies*.

**OLIGÆMIA, Anæmia, Hæmaporia, Hypæmia.**

**OLIGIDRIA, Ischidrosis.**

**OLIGOBLEN'NIA, from oligos, 'few,' and blenna, 'mucus.'** A deficiency of mucus.

**OLIGOC'HO'LIA, from oligos, 'few,' and chole, 'bile.'** Paucity of bile.

**OLIGOC'HY'LUS, from oligos, 'little,' and chulos, 'juice,' 'chyle.'** An epithet for food which is but little nutritive; which furnishes little chyle.

**OLIGOCOP'RIA, from oligos, 'few,' and kopros, 'excrement.'** Scantiness of alvine evacuations.

**OLIGODAC'RYA, from oligos, 'little,' and dakru, 'a tear.'** Paucity of lachrymal secretion.

**OLIGOGALACTIA, Agalactia.**

**OLIGOGALIA, Agalaxis.**

**OLIGOHÆMIA, Anæmia, Hæmaporia, Hypæmia.**

**OLIGOPO'SIA, from oligos, 'little,' and poosis, 'drink.'** Diminution in the quantity of drinks.

**OLIGOSIA'LIA, from oligos, 'little,' and salivon, 'saliva.'** Paucity of saliva.

**OLIGOSPER'MIA, from oligos, 'little,' and**

σπέρμα, 'sperm.' Paucity of spermatic secretion.

OLIGOSPONDYLUS, from *ολιγος*, 'few,' 'small,' and *σπονδυλος*, 'a vertebra.' A monster with defective vertebrae.—Gurtl.

OLIGOTRICHIA, from *ολιγος*, 'little,' and *τριξ*, 'hair.' Want of hair. Paucity of hair.

OLIGOTROPHIA, *Par'cior nutritio*; from *ολιγος*, 'little,' and *τροφος*, 'I nourish.' Deficient nourishment.

OLIGURESIA, *Oligure'sis*, *Oligoure'sis*, *Oligoure'sia*; from *ολιγος*, 'little,' and *ουρησω*, 'I pass urine.' Morbidly diminished urinary secretion.

OLISTHEMA, Luxation.

OLIVA, *Olea Europæa*.

OLIVAIRE CAUTÈRE, of the French surgeons, is a cautery whose extremity is terminated by a button having the shape of an olive.

OLIVARIS, Olive-shaped.

OLIVARY, Olive-shaped—o. Bodies, *Corpora olivaria*.

OLIVARY PROC'ESS, *Processus Olivaria*, is a small ridge, running transversely between, and a little behind, the roots of the anterior clinoid processes of the sphenoid bone, and by some considered as the 4th clinoid process.

OLIVE, see *Olea Europæa*—o. Tree, *Olea Europæa*.

OLIVE-SHAPED, *Olivaria*, *Oliviformis*, *Olivary*, from *oliva*, 'an olive.' Resembling an olive, see *Corpora olivaria*.

OLIVES, PICKLED, *Colymbades*.

OLIVIER, *Olea Europæa*.

OLIVIFORMIS, Olive-shaped.

OLLA CAPITIS, Cranium.

OLMITELLO, MINERAL WATERS OF. A thermal spring in the isle of Ischia. Temperature, 100° Fahrenheit.

OLOPHLYCTIDE, Herpes.

OLOPHONIA, from *ολω*, *ωλω*, 'I lose,' and *φωνη*, 'voice.' Congenital misconstruction of the vocal organs.—Good.

OLOPHONIA LABII LOBATA, Harelip—o. *Lingua frænata*, see *Ankyloglossum*.

OM'AGRA, *Hom'agra*, from *ομος*, 'the shoulder,' and *αγρα*, 'a seizure.' Gout in the shoulder.

OMAL'GIA, from *ομος*, 'the shoulder,' and *αλγος*, 'pain.' Pain in the shoulder.

OMARTHRI'TIS, from *ομος*, 'the shoulder,' *αρθρον*, 'a joint,' and *ιτις*, denoting inflammation. Inflammation of the shoulder joint.

OMARTHROC'ACE, from *ομος*, 'shoulder,' *αρθρον*, 'a joint,' and *κακος*, 'bad.' Arthrocace of the shoulder joint. Caries or suppuration of the shoulder joint.

OMAS'UM, *Omasus*, *Manyplies*. The third stomach of ruminant animals.

OMBILIC, Umbilicus.

OMBILICALE, Umbilical.

OMBRAGE, Nebula.

OMENTA, Meninges.

OMENTESIS, Epiploitis.

OMENTITIS, Epiploitis.

OMENTULA, *Appendiculæ pinguedinosæ*.

OMENTUM, Epiploon—o. Colicum, Epiploon, colic—o. Gastro-colicum, Epiploon, gastro-colic—o. Gastro-splenic, Epiploon, gastro-splenic—o. Great, Epiploon, gastro-colic—o. Hepato-gastricum, Epiploon, gastro-hepatic—o. Lesser, Epiploon, gastro-hepatic—o. Majus, Epiploon, gastro-colic—o. Minus, Epiploon, gas-

tro-hepatic—o. Oosium, Periosteum—o. Third, Epiploon, colic.

OMICHESES, Micturition.

OMICHEMA, Urine.

OMI'TIS, from *ομος*, 'the shoulder,' and *ιτις*, denoting inflammation. Inflammation in or about the shoulder joint.

OMMA, Eye, Vision.

OMNIPHAGUS, Omnivorous.

OMNIVORE, Omnivorous.

OMNIVOROUS, *Omnivorus*, *Omniph'agus*, *Pantoph'agus*, (F.) *Omnivore*, from *ομναις*, 'all,' and *ωρο*, 'I eat.' An epithet for animals which eat every kind of food,—animal or vegetable.

OMO. In composition, an abridgment of *ομος* or *ομναις*, the humerus.

OMO-CLAVICULAR, see *Coraco-clavicu-lar*.

OMOCOTYLE, see *Glene*.

OMO-HYOIDEUS, *Cor'aco-hyoï'deus*, *Scapulo-hyoï'dien*, *Omo-hyoï'dien*, *Omoplat-hyoï'dien*, *Hyoï'dis Quartus Mus'culus*. This muscle is situate obliquely at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semi-lunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPHAG'IA, *Omosit'ia*, from *ομος*, 'raw,' and *φαγω*, 'I eat.' Fondness for raw food. Eating of raw food.

OMOP'ATE, *Scapula*—o. *Col de l'*, *Collum scapulae*.

OMOPLAT-HYOÏDIEN, *Omo-hyoideus*.

OMOS, Crude, Humerus.

OMOSITIA, *Omophagia*.

OMOTAR'ICHOS, from *ομος*, 'the shoulder,' and *ταριχος*, 'pickled.' *Salsamentum crudum*; *Salted Tunny Fish*, in particular. Properly, the neck or shoulder piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTES, Crudity.

OMOTOCIA, Abortion.

OMOT'RIBES, *Ompha'd'inum O'leum*, from *ομος*, 'crude,' and *τριβω*, 'I bruise.' Oil expressed from unripe olives.

OMPHA'CION, *ομφακιον*, from *ομφακος*, 'an unripe grape';—*Succus uvæ acer'bae*, *Ompha'cium*. The juice of unripe grapes. Also, *Verjuice*.

OMPHACITES (VINUM.) A name given to wine prepared from the unripe grape. *Ompha'citis* is also the name of a small gall.—*Dioscorides*.

OMPHACIUM, *Verjuice*.

OMPHACOM'ELL, from *ομφακος*, 'an unripe grape,' and *μελι*, 'honey.' A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELCO'SIS, from *ομφαλος*, 'the navel,' and *αλκος*, 'an ulcer.' Ulceration of the navel.

OMPHALEX OCHÈ, *Exomphalus*.

OMPHALOCARPUS, *Galium aparine*.

OMPHALOCLE, *Exomphalos*.

OMPHALOMANTIA, from *ομφαλος*, 'the

navel,' and *μᾶρτια*, 'prophecy.' A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel string of the child.

**OMPHALO-MESENERIC**, *Omphalo-mesentericus*, *Omphalo-mesaraicus*; from *ομφαλος*, 'the navel,' and *mesenterium*, 'the mesentery.'

**OMPHALO-MESENERIC VESSELS**, *Vitel'lo-mesenteric*, *Vit'alline vessels*. Haller gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery* and *vein*. The *omphalo-mesenteric artery* is a branch of the superior mesenteric;—the vein empties itself into the trunk, or into one of the branches of the superior mesenteric. Velpeau affirms, that they insinuate with a branch of the second or third order of those great vessels, with those in particular that are distributed to the cæcum, and he regards them to be the vessels of nutrition of the umbilical vesicle. They are occasionally met with in the fœtus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

**OMPHALO-MESERICA**, *Omphalo-mesenteric*.

**OMPHALONCUS**, *Omphalophyma*.

**OMPHALONEURORRHESIS**, *Omphalorrhixis*.

**OMPHALOPHYMA**, *Omphalonus*, from *ομφαλος*, 'the navel,' and *φυμα*, 'tumour.' A tumefaction of the navel.

**OMPHALOPROPTOSIS**, *Exomphalus*.

**OMPHALORRHAG'IA**, *Omphalorrhagè*, from *ομφαλος*, 'the umbilicus,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the umbilicus, in the new-born in particular.

**OMPHALORRHIXIS**; from *ομφαλος*, 'navel,' and *ρηξις*, 'rupture.' *Omphaloneurorrhæxis*. Rupture of the navel string.

**OMPHALOS**, *Umbilicus*.

**OMPHALOSITE**, from *ομφαλος*, 'the navel,' and *σιτος*, 'nourishment.' A monster which possesses an imperfect kind of life, that ceases when the umbilical cord is divided.

**OMPHALOT'OMY**, *Omphalotomia*, from *ομφαλος*, 'the umbilicus,' and *τομω*, 'I cut.' The division of the navel string.

**OMPHALUS**, *Umbilicus*.

**OMUS**, *Crude, Humerus*.

**ONANIA**, *Masturbation*.

**ONANISM**, *Masturbation*.

**ONCOS**, *Tumour*.

**ONCO'SES**, from *ογκος*, 'a tumour.' *Tumours*, as diseases.

**ONCOSIS**, *Intumescence*.

**ONCOT'OMY**, *Oncotomia*, from *ογκος*, 'a tumour,' and *τομη*, 'incision.' The opening of a tumour or abscess with a cutting instrument.

**ONCTION**, *Inunction*.

**ONCUS**, *Swelling, Tumour*.

**ONDULATION**, *Fluctuation*.

**ONEBERRY**, *Paris*.

**ONEIROCRIT'ICUS**, *Oneirocrites*, from *ονειρος*, 'a dream,' and *κρισις*, 'judgment.' One who judges according to dreams.

**ONEIRODYN'IA**, from *ονειρος*, 'a dream,' and *οδυνη*, 'pain.' Painful dreams. *Incubus* and *Somnambulism* are oneirodyniæ.

**ONEIRODYN'IA ACTIVA**, *Paroniria*, *Somnambulism*—*o. Gravans*, *Incubus*.

**ONEIRODYNIE GRAVATIVE**, *Incubus*. **ONEIROG'MUS**, *Oneirog'ynè*, *Oneiropol'esis*, from *ονειρος*, 'a dream.' A lascivious dream; pollution; nocturnal pollution.

**ONEIROGONORRH'EA**, *Pollution*, *nocturnal*.

**ONEIROGONOS**, *Pollution*.

**ONEIROLOG'Y**, *Oneirolog'ia*, from *ονειρος*, 'a dream,' and *λογος*, 'a description.' The doctrine of dreams.

**ONEIROMANT'IA**, from *ονειρος*, 'a dream,' and *μαντια*, 'divination.' The art of divining by dreams; or of interpreting dreams.

**ONEIRON'OSUS**; from *ονειρος*, 'a dream,' and *νοσος*, 'a disease.' *Somnia'tio morbo'sa*. *Morbid, uneasy dreaming*.

**ONEIROPOLESIS**, *Oneirogmus*.

**ONERA ALVI**, *Excrement*.

**ONGLADE**, *Paronychia*.

**ONGLE**, *Nail*.

**ONGLÉE** (F.), *Digitorum stupor à gelu*. Painful numbness at the extremities of the fingers, caused by cold.

**ONGLET**, *Pterygion*.

**ONGUENT**, *Unguentum*—*o. d'Althèa*, *Unguentum de Althæa*—*o. de Blanco de balneo*, *Unguentum cetacei*—*o. Blanc de Rhazes*, *Unguentum plumbi subcarbonatis*—*o. de Corusso*, *Unguentum plumbi subcarbonatis*—*o. Citrin contre la gale*, *Unguentum hydrargyri nitras*—*o. Digestif simple*, *Unguentum digestivum simplex*—*o. Gris*, *Unguentum oxidii hydrargyri cinereum*—*o. de Guismaues*, *Unguentum de althæa*—*o. de Laurier*, *Unguentum laurinum*—*o. Mercuriel*, *Unguentum hydrargyri*—*o. Napolitain*, *Unguentum hydrargyri*—*o. de Nitrate de mercure*, *Unguentum hydrargyri nitratiss*—*o. de Poiz et de cire*, *Basilicon*—*o. de Soldat*, *Martium unguentum*—*o. de Sureau*, *Unguentum sambuci*—*o. de Tornamira*, *Unguentum plumbi subcarbonatis*.

**ONION**, *COMMON*, *Allium cepa*—*o. Sea*, *Scilla*.

**ONIS'CUS**, *Asellus*, *Cu'tio*, *Porcellio*, *Porcellus*, *Diminutive of onos*, 'a small ass.' A genus of insects very common in cellars and dark and moist places.

**ONISCI ASELLI**, *Milleg'ades*, *Aselli*, *Milleg'edæ*, *Fabæ*, *Wood-lice*, *Slators*, *Hog-lice*, (F.) *Cloportes ordinaires*, had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

**ONITIS**, *Origanum dictamnus*.

**ONOLOSAT**, *Obolus*.

**ONOMATOCLESIS**, *Nomenclature*.

**ONOMATOLOGIA**, *Nomenclature*.

**ONONIS ANTIQUORUM**, *O. spinosa*.

**ON'NIS ARVEN'SIS**, (F.) *Bugrane des champs*, has properties like the next.

**ONONIS SPINO'SA**, *Ano'nia*, *Resta bovis*, *Arresta bovis*, *Rem'ora Ara'tri*, *Ononis antiquorum*, *Rest harrow*, (F.) *Arrête-bœuf*, *Bugrands épineuse*, *Bugrane*. *Nat. Ord.* *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. The root of this plant was once used as a diuretic.

**ONOPORDIUM ACANTH'IUM**, *Car'duus tomento'sus*, *Acan'thium*, *Ac'anos*, *Cotton Thistle*. (F.) *Chardon aux Anes*. *Family*, *Cinarocephalæ*. *Sex. Syst.* *Syngenesia Polygamia æqualis*. The expressed juice has been recommended as a cure for cancer applied externally.

**ONTHUS**, *Fimus*.

**ONYCHEXALLAXIS**; from *ονυξ*, 'a nail,'

and *ἀλλοίωσις*, 'change.' A morbid condition of the nails.

ONYCHIA, Paronychia.

ONYCHITIS; from *ονύξ*, 'nail,' and *ίτις*, denoting inflammation. Inflammation of a nail.

ONYCHOC'LASIS; from *ονύξ*, 'a nail,' and *κλάσις*, 'fracture.' Fracture of a nail.

ONYCHOCRYPTOSIS, Onychogryphosis.

ONYCHOGRYPHO'SIS, *Onychogrypho'sis*, *Onychogrypto'sis*, *Onychoerypto'sis*, *Grypho'sis*, *Grypho'sis*, *Onyza'sis*, from *ονύξ*, 'the nail,' and *gryposis*, 'crookedness.' Curvature of the nails; such as occurs in hectic individuals. Also, growing in of the nails; *Incar'natio seu Adunca'tio seu Arctu'ra un'guinum*.

ONYCHON'OSI, *Onychonu'sis*, from *ονύξ*, 'a nail,' and *νοσος*, 'a disease.' Disease of the nails.

ONYCHOPH'THORA, *Onychophtho'ria*, *Onycooph'thoro*, *Onycoophtho'ria*, from *ονύξ*, 'the nail,' and *φθορα*, 'degeneration.' A degenerate condition or destruction of the nails.

ONYCHOPHY'MA, from *ονύξ*, 'the nail,' and *φυμα*, 'a tumour.' A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra.

ONYCHOPTO'SIS, *Piptonychia*, *Dis'cre'sis Un'gulæ*, from *ονύξ*, 'a nail,' and *πτωσις*, 'falling.' The falling off of the nails.

ONYCOPHTHORA, Onychophthora.

ONYX, Hook, blunt, Nail, Pterygion. Also, a collection of purulent matter between the laminae of the cornea, having the shape of a nail.

ONYXIS, Onychogryphosis.

ONYXITIS, see Paronychia.

OOCYESIS, Pregnancy, ovarian.

OODEOCELE, see Hernia (foraminis ovalis.)

OODES, Aqueous humour, Oval.

OOG'ALA, *Oog'la*, *Ogla*, *Puls ex Ovis et Lacti*. Milk of eggs. A preparation of eggs and milk.

OOGLA, Oogala.

OODES, Aqueous humour, Oval.

OOLEMMA PELLUCIDUM, Zona pellucida.

OOLOG'IA, *Ovolog'ia*, *Ovolog'ogy*, from *ovov*, 'an ovum or egg,' and *λογος*, 'a discourse,' 'a description.' A description of the ovum.

OON, Ovum.

OONINE, Albumen.

OOPHORITIS, Ooritis.

OOPHORON, Ovary.

OORITIS, Oaritis.

OPAC'ITY, *Opac'itas*, from *opacare*, 'to obscure.' Quality of that which is opaque. The property possessed by some bodies of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*;—opacity of the crystalline causes cataract.

OPAKE'y, *Opac'us*. An epithet given to bodies, which do not permit the passage of rays of light. The *opaque cornea* is the sclerótica, in contradistinction to the *transparent cornea* or true cornea.

OP'ALINE. That which resembles the opal. A fluid is said to be opaline, when milky, and when it presents an appearance more or less like that of the opal.

OPERATIO, Action, Operation—o. Chirurgica, see Operation—o. Chymica seu pharmaceutica, Operation, chymical, &c.—o. Simplex, Haplotomia.

OPERATION, *Operatio*, from *opus*, 'work.' The application of instruments to the human body with the view of curing disease. The object of an operation, *operatio chirurgica*, is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operative methods have been called *Synthesis*, *Diarresis*, *Excresis*, and *Prothesis*. Frequently, the most difficult subject, connected with an operation, is to decide when it is absolutely called for or advisable, and when improper.

OPERATION, BILATERAL, see Lithotomy—o. *Cæsarienne*, Cæsarean section.

OPERATION, CHYMICAL or PHARMACEUTICAL, *Operatio chymica* seu *pharmaceutica*, is any process whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition;—such are, *solution*, *distillation*, *sublimation*, *evaporation*, *digestion*, *maceration*, *infusion*, *decoction*, *calcination*, &c. Some of these operations are mechanical; others, really chymical.

OPERATION, HIGH, see Lithotomy—o. Lateral, see Lithotomy—o. Sigaultian, Symphyseotomy.

OPERATOR. A surgeon who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPERCULUM, *Operatorium*, *Operimentum*, from *operire*, 'to cover.' A cover or lid. In fishes, the gill cover.

OPERCULUM ASPERÆ ARTERIÆ, Larynx—o. Cutis, Epidermis—o. Ilei, Bauhin, valve of—o. Laryngis, Epiglottis—o. Oculi, Palpebra.

OPERCULUM PAPILLÆRUM. A shield for the nipple.

OPERIMENTUM, Operculum—o. Intestinarum, Epiploon—o. Prætensum abdominis, Peritonæum.

OPERTORIUM, Operculum.

OPHELIA CHIRATA, Gentiana chirayta.

OPHIASIS, Calvities, Porrigo decalvas.

OPHIOSLOSSUM VULGATUM, *Echinoglossum*, *Lingua serpentina*, *Adder's Tongue*, (F.) *Langus de Serpente*. Family, Filicoideæ. *Sex. Syst.* Cryptogamia. This plant was formerly considered to be vulnerary.

OPHIOPH'AGUS, from *ophis*, 'a serpent,' and *φαγος*, 'I eat.' An epithet for animals which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHIZA MUNGOS, from *ophis*, 'a serpent,' and *ρίζα*, 'root.' Family, Gentianææ. *Sex. Syst.* Pentandria Digynia. The name of the plant whose root has been called *Radix Serpentina*, *Mungos Radix*. The bitter root is much esteemed in Java, Sumatra, &c., for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed anthelmintic.

OPHIOXYLUM, from *ophis*, 'a serpent,' and *ξύλον*, 'wood.' *Ophiozylum Serpentina*, *Acacw'ria*, *Lignum serpentina*, has been recommended in the bites of serpents, and in intermittents. It is said to be very bitter.

OPHIS, Serpent.

**OPHITES**, from  $\sigma\epsilon\iota\varsigma$ , 'a serpent.' *Serpentinus*, *Serpentinus* or *Black Porphyry*. This rock was formerly worn as an amulet, to cure diseases of the head.

**OPHROSTAPHYLON**, *Bryonia alba*.

**OPHRYS**, *Supercilium*.

**OPHTHALMAL'GIA**, from  $\sigma\theta\alpha\lambda\mu\omicron\varsigma$ , 'the eye,' and  $\alpha\lambda\gamma\omicron\varsigma$ , 'pain.' Pain in the eye.

**OPHTHALMEMPASMA**, *Collyrium siccum*.

**OPHTHALMIA**, *Ophthalmi'tis*, from  $\sigma\theta\alpha\lambda\mu\omicron\varsigma$ , 'the eye.' *Oculo'rum inflammatio*, *Causa ophthalmi'tis*, *Ophthalmopo'nia*, *Inflammation of the Eye*, *Ophthalmia*, (F.) *Ophthalmis*, *Ophthalmite*, *Inflammation de l'œil*, *Catarrhe oculaire*. Three great varieties of ophthalmia, independently of the acute and chronic (which conditions occur in all inflammations), may be reckoned:—the *Ophthalmia membranarum*, *O. purulenta*, and *O. tarsi*. The first is characterized by the general symptoms of ophthalmia;—pain and redness of the eye or its appendages: with intolerance of light, and unusual flow of tears; the inflammation being seated chiefly in the coats of the eyeball. It is the *Hymenophthalmia*, *Ophthalmia tarax'is*, *Conjunctivitis*, *Inflammatio conjunctivæ*, *Symphymenitis*, *Syndesmitis*, *Catarrhal ophthalmia*, *Ophthalmo-conjunctivitis*, *O. humida*, *O. vera*, *Epiph'ora* (Galen), *Conjunctival Ophthalmia*, *Tarax'is* (Paulus of Ægina), *Chemosis* (Aëtius), *O. Chemosis*, *Lach'rymose Ophthalmia*, (F.) *Conjunctivite*, *Inflammation de la conjonctive*. In the second,—*Ophthalmia purulenta*, *O. puriformis*, *Blennophthalmia*, *Bleph'aroblennorrhæ'a*, *Ophthalmoblennorrhæa*, *Blennorrhæa oculi*—the internal surface of the palpebræ associates in the inflammation of the eye-ball; and there is a copious secretion of a purulent fluid. An epidemic and contagious(?) variety of this is the *Egyptian Ophthalmia*, *Ophthalmia epidemica*, *O. purulenta epidemica*, *O. contagiosa*, *O. Catarrhalis bellica*, *Lamophthalmia*, *O. bellica*, *O. Asiatica*, *Blennorrhæa Oculi Egyptiaca*, *Conjunctivitis puro-mucosa contagiosa vel Egyptiaca*, *Blepharot'is glandularis contagiosa*, *Adenitis palpebrarum contagiosa*, *O. purulenta contagiosa*, *Conjunctivitis puro-mucosa contagiosa*, *Suppurative Ophthalmia*, *Epidemic contagious ophthalmia*—called *Egyptian*, from its prevalence in Egypt during the British Expedition under Sir Ralph Abercromby. The inflammation is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium. In new-born children, a species of purulent ophthalmia, *O. purulenta infantum*, *O. Neonatorum*, *Blepharophthalmia neonatorum*, *Lippitudo neonatorum*, *Blennorrhæa Oculi neonatorum*, (F.) *Ophthalmia puriformis des nouveau-nés*, in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes. A severe form of purulent ophthalmia—*Hyperconjunctivitis* (Piorry)—is produced by the application of gonorrhœal matter to the eye. It is the *Ophthalmia gonorrhœica*, *Blennorrhæa oculi gonorrhœica*, *Conjunctivitis blennorrhœica*, *C. gonorrhœica*,

*Gonorrhœal Ophthalmia*, (F.) *Ophthalmia blennorrhagique*, *Conjunctivitis blennorrhagique*.

*Ophthalmia* is likewise modified by the condition of the constitution, and hence we have *strumous*, *variolous*, and other inflammations of the conjunctiva.

The third variety—the *Ophthalmia Tarsi*, *O. glutinos'a*, *Blepharophthalmia*, *Blepharot'is*, *Blepharot'itis*, *Blepharitis*, *Blepharadenitis*, *Psorophthalmia*, *Oculi palpebrarum scabies pruriginosa*, *Adenophthalmia*—is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

*Ophthalmia Membranarum*, when slight, requires little treatment: the antiphlogistic regimen—and, particularly, avoiding exposure to light,—being all that is necessary. When more severe, along with this, general and local blood-letting, especially by leeches to the side of the septum narium, must be employed so as to make a decided impression on the system; with nauseating doses of antimony, purgatives, blisters (at some distance from the organ), refrigerants; and astringents, cold or warm, according to circumstances, to the eye. In *Purulent Ophthalmia*, these measures must be still more actively employed, otherwise disorganization will speedily follow:—the granulations, which form on the adnata of the eyelids, may be removed with the scissors, and the sore be touched with a solution of alum. *Ophthalmia Tarsi* must be treated on general principles when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment; such as the unguentum hydrargyri nitrico-oxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together during the night, and thus obviates the irritation caused by attempts at separating them.

**OPHTHALMIA, EGYPTIAN**, see *Ophthalmia*—*o. Asiatica*, see *Ophthalmia*—*o. Bellica*, see *Ophthalmia*—*o. Biliosa*, *Ophthalmocholosis*—*o. Catarrhal*, see *Ophthalmia*—*o. Catarrhalis bellica*, see *Ophthalmia*—*o. Chronica*, *Lippitudo*—*o. Conjunctival*, see *Ophthalmia*—*o. Contagiosa*, see *Ophthalmia*—*o. Epidemica*, see *Ophthalmia*—*o. Glutinosa*, see *Ophthalmia*—*o. Gonorrhœica*, see *Ophthalmia*—*o. Gonorrhœal*, see *Ophthalmia*—*o. Humida*, see *Ophthalmia*—*o. Lachrymose*, see *Ophthalmia*—*o. Membranarum*, see *Ophthalmia*—*o. Neonatorum*, see *Ophthalmia*—*o. Phlyctenular*, *O. strumous*—*o. Puriformis*, see *Ophthalmia*—*o. Purulenta*, see *Ophthalmia*—*o. Purulenta contagiosa*, see *Ophthalmia*—*o. Purulenta epidemica*, see *Ophthalmia*—*o. Purulenta infantum*, see *Ophthalmia*—*o. Rheumatic*, *Sclerotitis*—*o. Sicca*, *Xerophthalmia*—*o. Suppurative*, see *Ophthalmia*—*o. Taraxis*, see *Ophthalmia*—*o. Tarsi*, see *Ophthalmia*—*o. Ulcerosa*, *Helcophthalmia*—*o. Varicose*, *Cirsophthalmia*—*o. Vera*, see *Ophthalmia*.

**OPHTHALMIATER**, *Oculist*.

**OPHTHALMIATR'IA**, *Ophthalmiatrotechnica*, *Ophthalmotherapia*; from  $\sigma\theta\alpha\lambda\mu\omicron\varsigma$ , 'the eye,' and  $\alpha\tau\tau\omicron\varsigma$ , 'a physician.' The art of the oculist. Treatment of diseases of the eye.

**OPHTHALMIATROTECHNICA**, *Ophthalmiatria*.

**OPHTHALMIC**, *Ophthalmicus*, from  $\sigma\theta\alpha\lambda\mu\omicron\varsigma$

μὸς, 'the eye.' That which relates or belongs to the eye.

**OPHTHALMIC ARTERY, A. orbitaire, (Ch.)** arises from the internal carotid, and issues from the cranium by the foramen opticum. At first, it is situate at the outer and lower side of the optic nerve, but ascends above this nerve, and passes towards the inner angle of the orbit. It furnishes, in its course, the *lachrymal, centralis retinae, infra-orbitaris, ciliaris, anterior ciliaris, inferior and superior musculares, anterior and posterior ethmoidals, and superior and inferior palpebrals*. After having given off these, it divides into two branches—the *frontal and nasal*, which furnish a number of ramifications,—some superficial, others deep-seated.

**OPHTHALMIC GANG'LION, Lenticular G., Ciliary ganglion, G. orbitaire, (Ch.)** is one of the smallest ganglions of the body. It is situate at the outer side of the optic nerve near the bottom of the orbit; is irregularly quadrilateral and flat: its colour being of a reddish gray. Behind, it communicates by its posterior angles—by means of nervous filaments—with the nasal nerve of the ophthalmic and the motor oculi. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

**OPHTHALMIC NERVE, Ophthalmic Nerve of Willis, Orbito frontal, (Ch.)** is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches: one, *external*—the lachrymal nerve; another, *superior*—frontal nerve, and the last, *internal*—the nasal nerve. See Lachrymal, Frontal, Nasal.

**OPHTHALMIC OF OPTIC REMEDY, Ophthalmicum seu Opticum, (F.) Topique ophthalmique,** is a medicine employed in ophthalmia.

**OPHTHALMIC SINUS,** see Cavernous Sinus.

**OPHTHALMIC VEIN** has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch by which the facial vein communicates with the ophthalmic.

**OPHTHALMICA, Euphrasia officinalis.**

**OPHTHALMICI EXTERNI, Motores oculorum.**

**OPHTHALMICUM, Ophthalmic remedy.**

**OPHTHALMIDIUM, Microphthalmus.**

**OPHTHALMIE PURIFORME DES NOUVEAUX-NÉS,** see Ophthalmia—*o. Blennorrhagique*, see Ophthalmia.

**OPHTHALMITE, Ophthalmia.**

**OPHTHALMITIS, Ophthalmia.** This term is occasionally restricted to inflammation of the globe of the eye, in which, both the external and internal structures are involved.

**OPHTHALMIUM, Microphthalmus.**

**OPHTHALMO-BLENNORRHEA, Ophthalmia (purulent.)**

**OPHTHALMO-CARCINOMA, from οφθαλμος, 'the eye,' and κρκινωμα, 'cancer.'** Cancer of the eye.

**OPHTHALMOCELE, Exophthalmia.**

**OPHTHALMOCHOLO'SIS, from οφθαλμος, 'the eye,' and χολη, 'bile;'** *Ophthalmia biliosa.* Ophthalmia from biliary excitement.

**OPHTHALMOCHROÏTES,** see *Choroidea tunica.*

**OPHTHALMO-CONJUNCTIVITIS,** see *Ophthalmia.*

**OPHTHALMODULI'A, from οφθαλμος, 'the eye,' and δουλια, 'servitude.'** Eye-service. The title of a book by Bartisch on diseases of the eye.

**OPHTHALMODYNNIA, from οφθαλμος, 'the eye,' and δυνα, 'pain,'** especially rheumatic pain of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain irradiates particularly towards the bottom of the orbit. See *Neuralgia, Frontal.*

**OPHTHALMODYNNIA PERIODICA, Neuralgia, facial.**

**OPHTHALMŒDE'MA; from οφθαλμος, 'the eye,' and οιδημα, 'œdema.'** Œdema of the conjunctiva.

**OPHTHALMOGRAPHY, from οφθαλμος, 'the eye,' and γραφη, 'a description.'** The part of anatomy which gives a description of the eye. An anatomical description of the eye.

**OPHTHALMOL'OGY, Ophthalmolog'ia, (F.) Oculistiquis, from οφθαλμος, 'the eye,' and λογος, 'a discourse.'** The part of anatomy which treats of the eye. An anatomical treatise on the eye. A description of the eye in health and disease.

**OPHTHALMOMETER, from οφθαλμος, 'the eye,' and μετρον, 'measure.'** An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

**OPHTHALMOMYÏTIS, Ophthalmomyositis; from οφθαλμος, 'the eye,' μυς, 'a muscle,' and ιτις, denoting inflammation.** Inflammation of the muscles of the eye.

**OPHTHALMOPHLEBOTOM'IA, from οφθαλμος, 'the eye; φλεψ, 'a vein,' and τομη, 'incision.'** Bleeding from the vessels of the conjunctiva.

**OPHTHALMOPHTHAR'SIS, Ophthalmophthisis; from οφθαλμος, 'the eye,' and φθορασις, 'corruption.'** Destruction of the eyeball.

**OPHTHALMOPHTHISIS, Ophthalmophtharsis.**

**OPHTHALMOPLE'GIA, from οφθαλμος, 'the eye,' and πλησσω, 'I strike.'** Paralysis of one or more of the muscles of the eye.

**OPHTHALMOPONIA, Ophthalmia.**

**OPHTHALMOPTO'SIS, from οφθαλμος, 'an eye,' and πτωσις, 'a prolapse.'** A word employed by some authors in the sense of exophthalmia, by others, in that of hydrophthalmia.

**OPHTHALMORRHAG'IA, from οφθαλμος, 'the eye,' and ρηγνυμι, 'I break forth.'** Hemorrhage from the tunica conjunctiva. It is rare.

**OPHTHALMOS, Eye.**

**OPHTHALMOSCOPIA, Ophthalmoscopy.** from οφθαλμος, 'the eye,' and σκοπειν, 'I regard attentively.' The art of judging of the temperament, &c. of a person by examining his eyes. The art of judging of health or disease by inspection of the eyes. Exploration of the eyes in order to a diagnosis.

**OPHTHALMOSTATUM, (F.) Ophthalmostat, from οφθαλμος, 'the eye,' and στασις, 'station;'** *Speculum Oculi.* An instrument for fixing the eye.

**OPHTHALMOTHERAPIA**, Ophthalmiatria.

**OPHTHALMOT'OMY**, *Ophthalmotomia*, from οφθαλμος, 'the eye,' and τέμνω, 'I cut.' The part of anatomy which treats of the dissection of the eye. It has, also, been applied to extirpation of the eye.

**OPHTHALMOXEROSIS**, Xerophthalmia. **OPHTHALMOXYSIS**, from οφθαλμος, 'the eye,' and ξηω, 'I scrape.' A name given to the scarification sometimes practised on the conjunctiva, in cases of ophthalmia.

**OPHTHALMOXYSTRUM**, *Ophthalmoxyster*, *Ophthalmoxysterium*, *Xystrum ophthalmicum*. An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of ophthalmia.

**OPHTHALMUS**, Eye.

**OPHTHALMYMENITIS**, *Ophthalmomy-menitis*, from οφθαλμος, 'eye,' υμεν, 'membrane,' and itis, denoting inflammation. Inflammation of one or more membranes of the eye.

**OPIACUM**, Opiatum.

**OPIANE**, Narcotine.

**OPIANUM**, Narcotine.

**OPIAT**, Opiate—o. *Dentifrice*, Dentifrice.

**OPIATE**, *Opiatum*, *Opiacum*, (F.) *Opiat*, from οπιον, οπιοι, 'juice,' 'opium.' A medicine containing opium. A medicine that procures sleep. An electuary. Formerly, an electuary, which contained opium. In this sense, the *Codex* of Paris retains it.

**OPIATUM FEBRIFUGUM**, *Electuarium de Kinâ Kinâ*; *Electuary of Cinchona*. (*Pulv. cinch. ꝑviiij, ammon. muriat. ꝑj, mellis, syrup. absinth. aa ꝑij*. Make into an electuary. *Ph. P.*) Given, when cinchona is indicated.

**OPIATUM MESPENTERIUM**, *Electuarium de Aloë, Muria'te Hydrargyri et Ferro*. (*Gum. ammon. ꝑss, sennæ ꝑvj, hydrargyri submuriat., rad. ar. aloës socotrin. aa ꝑij, pulv. scammon. comp. (vulg. de tribus.) rhej. rad. aa ꝑij, ferri limatur. porphyrisat. ꝑss*. Bruise and mix together, add of compound syrup of apples double the weight of the other matters, and make into an electuary. *Ph. P.*) Dose, ꝑss to ꝑij, in obstructions of the liver, mesentery, &c.

**OPION**, Opium.

**OPI SMA**, Succus.

**OPISTHENAR**, *Dorsum manus*, from οπισθε, 'backwards,' and διαγ, 'the flat of the hand.' The back of the hand.

**OPISTHOCEPHALON**, Occiput.

**OPISTHO CRANIUM**, Occiput.

**OPISTHO CYPHOSIS**, Cyphoma.

**OPISTHOLOB'IUM**, *Opistholum*, from οπισθος, 'behind,' and λοβιον, 'the lobe of the ear.' Any agent applied behind the ear.

**OPISTHOTIUM**, *Opisthobium*.

**OPISTHOT'ONOS**, *Raptus posterganeus*, *Totanus dorsalis*, *T. posticus*, *T. posterganeus*, from οπισθη, 'backwards,' and τενω, 'I stretch.' A species of tetanus, in which the body is bent backwards.

**OPIUM**, see Papaver—o. *Colatum*, *Extractum opii*—o. *Depuratum*, *Extractum opii*.

**OPOBALSAMUM**, see *Amyris opobalsamum*.

**OPOCARPASON**, *Carpasium* (juice.)

**OPODELDOC**, *Opodeldoch*.

**OPODELDOCH**, *Opodeltoch*, *Opodeldoc*.

An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries; now, it is applied to the *Lini-mentum Saponis Compositum*.

**OPODELDOCH**, STÆR'S. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sap. alb. Mj, camphor ꝑij, ol. rosmarini f. ꝑiv, spiritus vini rectificati Oij*. See *Lini-mentum Saponis Compositum*.

**OPODYMUS**, *Diprosopus*.

**OPIOPIOS**, *Optic*.

**OPOPONACUM**, *Pastinaca opopanax*.

**OPOPONAX**, see *Pastinaca opopanax*.

**OPOPONAXWORT**, *Pastinaca opopanax*.

**OPO'RICE**, from οπωρα, 'autumnal fruits.'

A medicine, composed of several autumnal fruits, particularly of quinces, pomegranates, &c. and wine. It was formerly administered in dysentery, diseases of the stomach, &c.

**OPOS**, *Succus expressus*—o. *Silphion*, *Laserpitium*.

**OPPIDULUM**, *Vulva*.

**OPILATIO**, *Emphraxis*—o. *Telæ Cellulosa*, *Induration of the cellular tissue*.

**OPILATIVUS**, *Obstruens*.

**OPPONENS**, (F.) *Opposant, ob, and ponere*, 'to place.' That which faces or is put in opposition to something. The name has been given to two muscles of the hand.

**OPPONENS MINIMI DIGITII**, *Carpometacarpian du petit doigt*, (Ch.) *Métacarpian du petit doigt*, (F.) *Opposant du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards and outwards, and thus augments the concavity of the palm of the hand.

**OPPONENS POL'LCIS**, *Flezor ossis metacarpi pollicis*, *Opponens pollicis manus*, *Flezor primi interno'dii* (Douglass.) *Antih'enar sive semi-interosseus pollicis*, (F.) *Carpometacarpian du pouce* (Ch.) *Métacarpian du pouce*, *Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the thenar eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and, on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.

**OPPOSANT**, *Opponens*—o. *du Petit doigt*, *Opponens minimi digiti*—o. *du Pouce*, *Opponens pollicis*.

**OPPRESSIO**, *Catalepsy*, *Oppression*—o. *Nocturna*, *Incurtus*.

**OPPRESSION**, *Oppressio*, *Thlipsis*, *Cata-thlipsis*, from *opprimere*, (*ob*, and *premere*, *pressum*), 'to press against.' A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractedly, it means, particularly, *Oppression of the chest*—*Oppressio Pectoris*, (F.) *O. de Poitrine*.

**OPPRESSION**, *Oppressio virium*, (F.) *Oppression des forces*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is oppressed rather than debilitated, and where the vascular action rises,

as the obstruction to free circulation is relieved by bleeding, purging, &c.

OPS, Eye.

OPSEONUSI, Opsionusii.

OPSIALGIA, Neuralgia, facial.

OPSIONUSI, *Opsionusii*, from *opsis*, 'vision,' and *nosos*, 'a disease;' *Morbi visus*. Diseases of vision.

OPSIOTOCIA, from *opsis*, 'too late,' and *tocos*, 'birth;' *Partus serotinus*. Parturition after the usual period. See Pregnancy.

OPSIS, Pupil, Vision.

OPSOMANIAC, *Opsomanes*, (F.) *Opsomane*, from *opsis*, 'aliment,' and *mania*. One who loves some particular aliment to madness.

OPTESIS, Assatio.

OPTIC, *Opticus*, *Opo'prios*, from *optomai*, 'I see.' That which relates to vision.

OPTIC COMMISSURE, see Chiasmus.

OPTIC FORAMEN, *Foramen opticum*, (F.)

*Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.

OPTIC GANGLIA, *Quadrigenina tubercula*.

OPTIC GROOVE. A transverse groove on the superior surface of the sphenoid bone, on which the commissure of the optic nerves rests, and which is continuous on each side with the optic foramen.

OPTIC LOBES, *Quadrigenina tubercula*.

OPTIC NERVE, *Nervus opticus*, *Par secundum* seu *opticum* seu *visorium*, *Nervus of the 2d pair*, *Nervus visivus* seu *visorius*, *Ocular nerve* of Chaussier. The optic nerves are remarkable for their size; for their running a longer course within than without, the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigenina. Immediately after their origin the *optic tracts*, proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve proceeding through the optic foramen with the ophthalmic artery. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ to give rise to the nervous expansion called the retina. Besides its neurilemma, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye.

OPTIC REMEDY, see Ophthalmic remedy.

OPTIC THALAMI, Thalami nervorum opticorum—o. Tracts, see Optic nerve.

OPTICO-TROCHLÆI-SCLÉROTICIEN, Oblique superior of the eye.

OPTICUM, Ophthalmic remedy.

OPTILOS, Eye.

OPUNTIA, Cactus opuntia.

OR, Gold—o. *Cyanure d'*, see Gold—o. *Hydrochlorate d'*, see Gold—o. *Iodure d'*, see Gold—o. *Nitromuriate d'*, see Gold—o. *Oxide d'*, see Gold—o. *de Sodium, chlorure d'*, see Gold—o. *de Soude, Hydrochlorate d'*, see Gold—o. *de Soude, Muriate d'*, see Gold.

ORA SERRATA, see Ciliary (Body.)

ORACH, STINKING, *Chenopodium vulvaria*.

ORANGE, FLOWERS OF THE, see Ci-

trus aurantium—o. Root, *Hydrastis Canadensis*—o. Tree, *Citrus aurantium*.

ORANGEADE. A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see *Citrus aurantium*—o. Curassoa, *Aurantia curassaventia*.

ORBES CARTILAGINOSI TRACHEÆ, see Trachea.

ORBICULAIRE DES LÈVRES, *Orbicularis oris*—o. *des Paupières*, *Orbicularis palpebrarum*.

ORBICULAR, *Orbicularis*, from *orbis*, 'a circle.' Spherical, circular.

ORBICULAR BONE, *Os orbicularé* seu *lenticularé* seu *Sylvii* seu *orbicularé Sylvii*, *Globulus stapédæ ossis*, *Epiph'ysis cruris longioris in'cudis*, *Ossiculum orbicularé* seu *squamosum* seu *cochlearé* seu *quartum*, is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situates between the long ramus of the incus and the head of the stapes.

ORBICULAR MUSCLES are muscles with circular fibres surrounding some natural opening of the body. 1. *Orbicularis Oris*, *Sphincter Labiorum*, *Semi vel Demi-orbicularis*, *Saprasemi-orbicularis*, *Constrictor Oris*, *Labialis*, *Osculato'rius*, *Basia'tor*, (F.) *Labial*, *Orbiculaire des lèvres*. A muscle situate in the substance of the lips, and extending from one commissure to the other. It is formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip, the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *Bourrelet* with radiated wrinkles. It is an antagonist to every other muscle of the lips. 2. *Orbicularis Palpebrarum*, *Orbicularis oculi*, *Orbicularis palpebrarum ciliaris*, *Palpebrarum duo musculi*, *Mazillo-palpebral*, *Palpebralis*, *Constrictor palpebrarum*, *Sphinctor Palpebrarum seu Oculi*, (F.) *Naso-palpebral* (Ch.), *Palpebral*, *Orbiculaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter. It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbital process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending somewhat beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together. The part of the orbicularis which covers the cartilages of the eyelids, and which is remarkably thin, is the *Musculus Ciliaris* of some authors.

ORBICULARIS OCULI, *Orbicularis palpebrarum*, see *Orbicularis muscles*—o. *Oris*, see *Orbicular muscles*—o. *Palpebrarum*, see *Orbicular muscles*—o. *Recti*, *Sphincter ani externus*.

ORBICULUS CILIARIS, Ciliary ligament, Ciliary zone.

## ORBIS GENU, Patella.

ORBIT, *Orbita*, *O. oculi*, *Troch'ia*, *Conchus* seu *Cav'itas* seu *Fovea* seu *Fov'id'ula oculi*, from *orbis*, 'a circle.' The circular cavities are so called which lodge the organs of sight. The *orbis* or *orbital fossæ* or *cavities*, *conchi*, *κογχος*, are situate at the upper part of the face, and are composed of seven bones, viz:—the *frontal*, above; the *palate* and *superior maxillary*, below: the *sphenoid* and *malar*, externally, and the *ethmoid* and *lacrimal*, internally. The orbit is filled by the globe of the eye, with its different accessory parts—muscles, nerves, vessels, the lacrimal gland, &c. Its margin is termed *margo orbita'lis*.

ORBITA, Orbit—*o. Oculi*, Orbit.

ORBITAL FISSURE, INFERIOR, Sphenoidal fissure—*o. Fissure*, superior, Maxillary fissure.

ORBITAR, *Orbita'rius*, *Orbita'lis*, *Or'bital*; same etymon. Relating or belonging to the orbit.

ORBITAR APOPH'YSES or PROO'ESSES terminate the two extremities of the orbital arch. The *external* is much more prominent, and is articulated with the cheek bone; the *internal* is thinner, and joins the os unguis.

ORBITAR ARCH, (F.) *Arcade orbitaire*, is the projecting, round margin, which separates the *frontal* and *orbital* surfaces of the os frontis, and forms a part of the circumference of the orbit.

ORBITAR FISSURES, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the Sphenoidal; the other *inferior*, the Spheno-maxillary.

ORBITAR FORAM'INA. Of these there are several.—1. The *Foramen orbitarium superius*, (F.) *Trou orbitaire superieur*, which is situate at the junction of the inner third of the orbital arch with its two outer thirds, and gives passage to the frontal nerve. 2. The *Foramina orbitaria interiora vel interna*, *Foramina Ethmoidea*. These are situate at the upper part of the internal paries of the orbit, are formed by the union of two notches of the os frontis with two similar ones of the ethmoid; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

ORBITAR NERVE, *Nervus orbita'lis* seu *orbita'rius*, is a branch given off from the superior maxillary. It enters the orbit by the sphenomaxillary fissure, and divides into two filaments; the one—*malar*—which passes over the cheek bone, is distributed to the orbicularis palpebrarum, and anastomoses with the facial nerve; the other—*temporal*—which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

ORBITO-EXTUS-SCLÉROTICIEN, *Rectus externus oculi*—*o. Inus-Scleroticien*, *Rectus internus oculi*—*o. Maxillo-labial*, *Levator labii superioris proprius*—*o. Palpebral*, *Levator palpebræ superioris*—*o. Sus-palpebral*, *Levator palpebræ superioris*.

ORCANETTE, *Anchusa officinalis*.

ORCHALGIA, Orchidalgia.

ORCHAS, Scrotum.

ORCHEITIS, *Osci'tis*, *Oschei'tis*, *Inflammat'io scroti*, from *ορχας*, 'the scrotum,' and *itis*, denoting inflammation. Inflammation of the scrotum.

ORCHEITIS, *Hernia humoralis*.

ORCHEOCATABASIS, *Orchidocatabasis*.

ORCHEOCELE, *Orchiocele*.

ORCHEOTOMY, Castration.

ORCHESTROMANIA, *Chorea*.

ORCHIDAL'GIA, *Orchal'gia*, *Orchidodyn'ia*, from *ορχις*, 'a testicle,' and *αλγες*, 'pain.' Pain of the testicle.

ORCHIDITIS, *Hernia humoralis*.

ORCHIDOCATAB'ASIS, *Orchoecatab'asis*, *Descensus testiculo'rum*, from *ορχις*, 'the testis,' and *καταβασις*, 'descent.' The descent of the testes into the scrotum.

ORCHIDOCELE, *Hernia humoralis*.

ORCHIDODYNIA, *Orchidalgia*.

ORCHIDONCUS, *Hernia humoralis*.

ORCHIDOTOMY, Castration.

ORCHILL, *Lichen roccella*.

ORCHIOCE'LE, *Orchoecel'e*, from *ορχις*, 'the testicle,' and *κηλη*, 'a rupture.' A tumour of the testicle. Scrotal hernia. *Hernia humoralis*. A name given to several diseases of the testicle and its envelopes, essentially differing from each other.

ORCHIOCE'LE SCIRRHO'SA, *Scirrhocel'e*. A malignant tumour of the testis.

ORCHIS, *Testicle*—*o. Butterfly*, *Orchis bifolia*.

ORCHIS MAS'CU'LA, *Satyr'ion*, *Male Orchis*, *Testic'ulus can'inus*, *Cynosor'chis*, *Dogs' stones*, *Male Fools' stones*, *Twinroot*. This root has had a place in some pharmacopœias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifolia* or *Butterfly orchis*, has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to *ορχις*, 'a testicle,' whence its name.

*Salep* is obtained from this variety of the orchis;—and from the *Orchis morio*, &c. See *Salep*.

ORCHITE, *Hernia humoralis*.

ORCHITIS, *Hernia humoralis*.

ORCHOI, see *Tarsus*.

ORCHOTOMIA, Castration. Also, removal of the tarsi.

ORDEOLUM, *Hordeolum*.

ORDEUM, *Hordeum*.

ORDINAIRES, *Menses*.

ORDONNANCE, *Formula*, *Prescription*.

OREILLE D'HOMME, *Asarum*—*o. de Souris*, *Hieracium pilosella*.

OREILLETTE, *Asarum*, *Auricle* of the heart.

OREILLONS, *Parotis*, *Cynanche parotidea*.

ORELIA GLANDIFLORA, *Allamanda*.

OREOSELINUM, *Athamanta aureoselinum*—*o. Africanum*, *Bubon galbanum*.

OREXIS, *Appetite*, *Pyrosis*—*o. Cynodes*, *Boulimia*.

ORGAN, *Organum*, *Organon*. 'An instrument.' Part of an organized being, destined to exercise some particular function. Thus—the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called apparatus.

ORGANA GENERATIONI INSERVIENTES, *Genital organs*—*o. Sudoripara*, see *Perpiration*.

ORGANES GÉNITAUX, *Genital organs*.

ORGAN'IC, *Organ'icus*. Relating to an organ or organs, and to beings possessed of organs. Hence, ORGANIC FUNCTIONS are those possessed

by both animals and vegetables. It is also used synonymously with *vital*, in contradistinction to *physical*.

ORGANIC CHEMISTRY, see Chymistry.

ORGANIC DISEASES or LESIONS are such as concern the organ itself, in contradistinction to *functional*, which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional*.

ORGANISATIO, Organization.

ORGANISATUS, Organized.

ORGANISM. Same etymon. The living economy. Many physiologists have used this word synonymously with organization; but more especially to designate the aggregate of vital actions in organized beings, animals as well as vegetables. The collection of parts composing an organized body, and the laws which govern it.

ORGANIZATION, *Organisatio*, from *organos*, 'an organ.' The manner of structure proper to different beings. It is also employed in the sense of the structure of a part; as, the *organization of the heart*, &c.

ORGANIZATION, COMPOUNDS OF, Principles, immediate.

ORGANIZED, *Organis instructus, Organisatus*. That which is composed of organs.

ORGANIZED BODIES, (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables: in opposition to *inorganic* bodies, which term comprises the mineral kingdom.—See *Corpus*.

ORGANOCHEMIA, Chymistry, organic.

ORGANOGENY, *Organogenia*; from *organos*, 'an organ,' and *genesis*, 'generation.' The doctrine of the formation of different organs.

ORGANOGENO'SIA, from *organos*, 'organ,' and *gnosis*, 'knowledge.' The knowledge and discrimination of organized bodies.

ORGANOGRAPHY, *Organographia*, from *organos*, 'an organ,' and *grapho*, 'a description.' A description of the organs of a living body.

ORGANOLOGY, Anatomy, Craniology.

ORGANON OLFAC'TUS, Nasus.

ORGANONOMIA, from *organos*, 'an organ,' and *nomos*, 'a law.' The doctrine of the laws of organic life.

ORGANOZOOMIA, Zoonomia.

ORGANUM, Instrument.

ORGASM, *Organismus, Orgosis*, from *orgao*, 'I desire ardently.' A strong impulse or desire for something. State of excitement and turgescence of any organ whatever. Applied particularly to the genital organs at the height of venereal excitement.

ORGASMUS, Turgescence.

ORGASTICA. Same etymon. The second order of the class *Genetica* of Good. Defined: diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

ORGE, Rago.

ORGE, Hordeum—o. *Perle*, see Hordeum.

ORGEAT, Syrupus amygdalæ.

ORGELET, Hordeolum.

ORGEOLET, Hordeolum.

ORGOSIS, Orgasm.

ORICHALCUM, Brass.

ORICULAR, Auricular.

ORICULE, Auricle, Pavilion of the ear.

ORIFICIUM, Mouth—o. Dextrum Ventri-

culi, Pylorus—o. Uteri, Os uteri—o. Ventriculi Sinistrum, Cardia.

ORIGANUM, *Origanum vulgare, Cuniola bulbula, Marjorana mancurana, O. heracleoticum, Zazarbon's herba, Wild marjoram, Common marjoram, Mancura'na*, (F.) *Pied de lit. Family, Labiate. Sez. Syst. Didynamia Gymnospermia*. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil, *oleum origani*, Ph. U. S.—is very pungent, and is rarely given internally. It is used in toothache.

ORIGANUM AQUATICUM, Eupatorium cannabinum—o. Creticum, O. dictamnus.

ORIGANUM DICTAMNUS, *Dictamnus Creticus, O. Creticum, On'itis, Dittany of Crete*, (F.) *Dictamnus de Crète*. The leaves of this plant were once recommended as emmenagogue and alexipharmic.

ORIGANUM HERACLEOTICUM, Origanum.

ORIGANUM MAJORA'NA, *Marjorana, O. majorana'des, Majorana, Sweet marjoram, Sampsucus, Agrig'orianum, Amaracus*, (F.) *Marjolaine*. Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and errhine. It is chiefly used, however, for culinary purposes, and as a snuff in headache.

ORIGANUM SYRIACUM, Teucrium marum.

ORIGINAIRE (F.), from *origo*, 'origin.' This term has been used, by French writers, in the same sense as *congenital*. It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

ORIGO, Arche.

ORISMOLOGY, Terminology.

ORME, Appetite.

ORME, Ulmus.

ORMSKIRK MEDICINE. A celebrated antilyssic remedy, supposed to consist of *Pulv. Crata, ℥ss; Bol. Armon. ℥iij; Alumin. gr. x; Pulv. Inula ʒj; Ol. Anisi, gtt. vj*.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

ORNAMENTUM FOLIACEUM, see Tube, Fallopiian.

ORNITHOGALUM MARITIMUM, Scilla.

ORNITHOGLOSSÆ, see Fraxinus excelsior.

ORNUS EUROPÆA, see Fraxinus ornus—o. Sylvestris, Fraxinus excelsior.

OROBAN'CHÆ VIRGINIA'NA, *Epipagus America'nus, E. Virginia'nus, Virgin'ia broomrape, Beech-drops, Cancer-root. Family, Orobanchoidæ*. This parasitic plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally, to obstinate ulcers.

OROBAN'CHÆ AMERICA'NA, and O. UNIFLO'RA, have the same properties, and are, likewise, called *Cancer root, Earth club* and *Claywort*.

OROBE, Ervum ervilia.

OROBION, see Ervum ervilia.

OROBOIDES, from *oros*, 'the orobus,' and *idos*, 'form,' *Orobo'des*. Having the shape of the orobus. A name given to urine, *Urina orobo'des* seu *orobo'des*, when depositing a substance of a fawn colour, like the meal of the orobus.

OROBUS, Ervum ervilia.

ORONGE, see Agaric.

OROPHALL'US, from *ορος*, or *ορος*, 'the rump,' and *φαλλος*, 'the male organ.' A monster having a second male organ originating from the rump.—Gurlt.

OROS, *Croupion*, Serum.

ORPIMENT, *Auripigmentum*, *Orpin*, *Rissigallum*, *Rissigallum*, *Cloana*, *Elomé*, *Sira*, *Lampnias*, *Speculum citrinum*, *Yrides*, *Yrides*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adarigo*, *Adarneck*, *Akusal*, *Althana*, *Asarnet*. The Turks prepare a depilatory with it; which they call *Rusma*.

ORPIN, Orpiment—o. *Brûlant*, Sedum—o. *Grand*, Sedum telephium—o. *Reprise*, Sedum telephium.

ORPINE, Sedum telephium.

ORRHOCHEZIA, Diarrhœa, serous.

ORRHOCYST'IS, from *ορρο*, 'serum,' and *κυστις*, 'a bladder.' An encysted tumour containing a serous fluid.

ORRHOHYMENTIS, Hydrohymenitis.

ORRHOPYG'ION. The inferior extremity of the vertebral column; from *ορρος*, 'extremity,' and *πυγη*, 'the nates.' The os coccygis. Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

ORRHORRHŒ'A, from *ορρο*, 'serum,' and *ρρω*, 'I flow.' A morbidly increased secretion of a serous fluid.

ORRHOS, *Croupion*, Serum.

ORRIS, Iris Florentina—o. Common, Iris Germanica.

ORSEILLE, Lichen roccella.

ORTEIL, Digitus pedis.

ORTHOCOLUM, from *ορθος*, 'straight,' and *κωλον*, 'limb.' Stiffness of the limb, so that it is kept quite straight.

ORTHOD'RON. A measure with the Greeks, equal to eleven finger-breadths.

ORTHOMORPHIA, Orthopædia.

ORTHOMORPHOSIS, Orthopædia.

ORTHONTROPIA, Orthopædia.

ORTHOPÆD'IA, *Orthopædiæ*, *Orthomorphia*, *Orthomorphosis*, *Orthontropia*, from *ορθος*, 'right,' and *παις*, 'a child.' The part of medicine whose object is to prevent and correct deformity in the bodies of children. Often used, however, with a more extensive signification, to embrace the correction or prevention of deformities at all ages. *Orthosomat'ics*, *Orthosomat'icæ*, from *ορθος*, 'right,' and *σωμα*, 'body,' has been proposed as a preferable term.

ORTHOPE'DIC, *Orthopædicus*; same etymon. Relating to orthopædia,—as *Orthopædic Institution*, *Institutum orthopædicum seu orthopædium*: an institution for the correction or prevention of deformities in children.

ORTHOPE'DIST, *Ortho'ter*, *Orthopædicus*, same etymon. One who practises orthopædia.

ORTHOPHREN'IC, *Orthophren'icus*, from *ορθος*, 'right,' and *φρηνη*, 'mind.' Relating to sound mind.

ORTHOPNŒ'A, *Suffocatio*, *Strangulatio*, *Præsecutio*, *Pnæx*, *Prægnus*, *Buthy'not*, *Euthygnæ'a*, *Angor*, *Apnæ'a*, from *ορθος*, 'right,' 'straight,' and *πνευ*, 'I respire.' Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

ORTHOPNŒA CARDIACA, Angina Pectoris—o. Convulsiva, Asthma—o. Cynanchica, Cynanche trachealis—o. Hydrothoracica, Hydrothorax—

o. Hysterica, Angone—o. Pituitosa, Mycorthopnea—o. Tussiculosa, Pertussis.

ORTHOSOMATICE, Orthopædia.

ORTHOSOMATIQUÉ, Orthopædia.

ORTHOTER, Orthopædist.

ORTHYSTEROPTOMA, Prolapsus uteri.

ORTHYSTEROPTOSIS, Prolapsus uteri.

ORTIE, Urtica—o. *Blanche*, Lamium album—o. *Brûlante*, Urtica urens—o. *Morte*, Lamium album—o. *Morte des Bois*, Galeopsis—o. *Romaine*, Urtica pilulifera.

ORTYX, Tetrao coturnix.

ORUS, *Croupion*, Serum.

ORVALE, Salvia sclarea.

ORVIETA NUM. From the Italian *Orvietano*. An electuary regarded as an invaluable antidote, and composed of *Old theriac*, *Dried viper*, *Scorzonera*, *Carolina*, *Imperatorium*, *Angolica*, *Bistort*, *Rosemary*, *Juniper*, *Cinnamon*, *Cloves*, *Mace*, *Honey*, and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvieto, a town in Italy.

ORY'ZA, from *Orez*, (Arab.) *Ory'za sativa*, Rice, (F.) *Riz*. Family, Graminæ. *See*. *Syst. Hexandria Monogynia*. A plant, almost aquatic, and indigenous in China, one of the richest productions of Egypt, and which prospers in the warmer regions of the four quarters of the globe. Its amylaceous seeds, *Ory'sa*, *Ory'sum*, *Hordeum galacticum*, nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient.

OS, Bone, Mouth, see Ossiculum—o. Acromii, Acromion—o. ad Cubitale, Radius—o. Adjutorium, Humeri os—o. Alæforme, Sphenoid—o. Alagas, Coccyx, Sacrum—o. Amphidone, Os uteri—o. *Anonym*, Innominatum os—o. *Anonymum*, Innominatum os—o. Anticum, *Avant bouche*—o. Arcuale, Temporal bone—o. Armale, Temporal bone—o. Asser, Sternum—o. *de l'Assiette*, Ischion—o. Azygos, Sphenoid—o. Ballistæ, Astragalus—o. Basilare, Occipital bone, Palate bone, Sacrum, Sphenoid—o. Baxillare, Sphenoid—o. Bicornæ, Hyoides os—o. Brachiale, Humeri os—o. Brachii, Humeri os—o. Calcis, Calcaneum—o. Capitatum, Magnum os—o. Caudæ, Occipital bone—o. Clunium, Sacrum—o. Coccygis, Coccyx—o. Colatorium, Ethmoid bone—o. Coliforme, Ethmoid—o. Convolutum superius, Turbinate bone, middle—o. Coronale, Frontal bone—o. Coxæ, Innominatum os—o. *Cozal*, Innominatum os, Ischion—o. *Criblæux*, Ethmoid—o. Cribriforme, Ethmoid—o. Cribrosum, Ethmoid—o. Cristatum, Ethmoid bonè—o. *Crochu*, Os unicumforme.

OS CROTOPHALE. A name given by M. Béclard to a bone sometimes met with at the anterior and inferior angle of the parietal bone; from *κροταφος*, 'the temple.'

OS CROTAPHITICUM, Temporal bone—o. Cubicum, Ethmoid bone—o. Cubiti Inferius, Ulna—o. *de la Cuisse*, Femur—o. Cuneiforme, Sphenoid—o. Cuneo comparatum, Sphenoid—o. Cymbiforme, Scaphoid bone—o. Disciforme, Patella—o. Durum, Temporal bone—o. Ensiforme, Sternum.

OS ÉPACTALE. A name given to one of the ossa Wormiana; particularly to one met with in the posterior fontanelle, and which has

been described by G. Fischer, under the name *Os Epactale sive Gøthianum*.

## OS ÉPACTAUX, Wormiana ossa.

OS EXTERNUM. The entrance into the vagina, in contradistinction to the *Os internum*, or *Os uteri*.

OS EXTRA ORDINEM CARPI, Os pisiforme—o. Fibrosum, Occipital bone—o. Foraminulentum, Ethmoid—o. Frontis, Frontal bone—o. Genæ, Males os—o. Gladioli, Sternum—o. Grandi, Magnum os—o. Grandi, col du, Collum ossis magni—o. Grandiosum, Cuboid—o. Gutturis, Hyoides os—o. Hamatum, Os unciniforme—o. *Hors du rang*, Os pisiforme—o. Hypopium, Males os—o. Hypseloides, Hyoides os—o. Inconjugatum, Sphenoid—o. Incudi similis, Incus—o. Inferius ventriculi, Pylorus—o. *Innominé*, Innominate os—o. *Intercalis*, Wormiana ossa—o. Internum, Os uteri—o. Inverecundum, Frontal bone—o. Ischii, Ischion—o. Jugale, Males os—o. Jugamentum, Males os—o. Juguli, Clavicule—o. Lachrymale, Unguis os—o. Lambda, Occipital bone—o. Lambdoides, Hyoides os, Occipital bone—o. Lapideum, Temporal bone—o. Latum, Sacrum—o. Latum humeri, Scapula—o. Lenticulare, Os orbiculare, Os pisiforme—o. Lepidoideis, Temporal bone—o. Lingue, Hyoides os—o. Linguale, Hyoides os—o. Lithoides, Temporal bone—o. Magnum, neck of the, Collum ossis magni—o. *Malaisre*, Males os—o. Malare, Males os—o. Maxillæ superioris undecimum, Vomer—o. *Maxillaire inferiure*, Collum mandibulæ—o. Memento inferiori, Temporal bone—o. Memoria, Occipital bone—o. Mendosum, Temporal bone—o. Morsus Adami, Thyroid cartilage—o. Mucronatum, Xiphoid cartilage—o. Multangulum majus, Trapezium os—o. Multangulum minus, Trapezoides os—o. Multiforme, Ethmoid, Sphenoid—o. *Nasauz*, Nasal bones—o. Naviculare, Os scaphoides—o. Nervale, Temporal bone—o. Nervosum, Occipital bone—o. Occipiti, Occipital bone—o. Orbiculare, Os pisiforme—o. *du Palais*, Palate bone—o. Palati, Palate bone—o. *Palatin*, Palate bone—o. Papillare, Sphenoid—o. Parietale inferius, Temporal bone—o. Pectinis, Pubis, os—o. Pectoris, Sternum—o. Pelvi-cephalicum, Occipital bone—o. Pelvis laterale, Innominate os—o. Perone, Fibula—o. Petrosus, Temporal bone—o. Polymorphon, Sphenoid—o. *de la Pommette*, Males os—o. Posterum, Pharynx—o. Prærupte rupi assimilatum, Temporal bone—o. Procubitale, Ulna—o. *Propus du nez*, Nasal bones—o. Proræ, Occipital bone—o. Pudicum, Males os—o. Puppis, Frontal bone, Occipital bone—o. Pyramidale carpi, Trapezoides os—o. Pyxidis, Occipital bone—o. Rationis, Frontal bone—o. *du Rayon*, Radius—o. Sacrum, Sacrum—o. Saxeum, Temporal bone—o. Scutiforme, Patella—o. Sedarium, see Ischiatic—o. Semilunare, Lunare os—o. Sextum cranii, Occipital bone—o. *du Sinaput*, Parietal bones, see Sinciput—o. *Sous-ethmoidal*, Turbinate bone, inferior—o. Sphæno-basilar, Occipital bone—o. Sphæroides, Sphenoid—o. Sphenoidale, Sphenoid—o. Sphenoides, Sphenoid—o. Spongiosum, Ethmoid—o. Spongiosum inferius, Turbinate bone, inferior—o. Spongiosum medium, Turbinate bone, middle—o. Spongiosum superius, Turbinate bone, middle, Turbinate bone, superior—o. Spongoides, Ethmoid—o. Squamosum, Temporal bone—o. Suboculare, Males os—o. *Sumaxillaire*, Maxillary (superior) bone—o.

*Surnuméraires*, Wormiana ossa—o. Sylvii, Os orbiculare—o. Temporia, Temporal bone—o. Tessera, Cuboid—o. Thyroides, Patella—o. Tibiæ minus, Fibula—o. Tinæ, Os uteri—o. *Triangulaires*, Wormiana ossa—o. Turbinatum, Turbinate bone, middle—o. Turbinatum inferius, Turbinate bone, inferior—o. Uncinatum, Os unciniforme—o. Upseloides, Hyoides os—o. Varium, Cuboid—o. *Vespiriforme*, Sphenoid—o. Vomeris, Vomer—o. *Wormiana*, Wormiana ossa—o. Xiphoides, Sternum—o. Ypseloides, Hyoides os—o. Zygomaticum, Males os.

OS UTERI, *Os tinæ*, *Protosporos*, *Os internum*, *Os amphidion seu amphidion*, *Oschion*, *Hysterosoma*, *Os oculum uteri*, *Hysterosomium*, *Orificium uteri*, (F.) *Museau de Tanché*. The mouth of the Womb, see Uterus.

OSCEDO, Yawning.

OSCHÆMATŒDE'MA, *Oschamade'ma*, *Edema scroti cruentum*; from *oschon*, 'scrotum,' *αιμα*, 'blood,' and *οιδημα*, 'œdema.' Effusion of blood into the scrotum.

OSCHÆMŒDEMA, *Oschæmatœdema*.

OSCHE, Scrotum.

OSCHEITIS, Orchitis, Oschitis.

OSCHEOCARCINOMA, Cancer, chimney-sweepers'.

OSCHEOCELE, *Oschocèle*, from *oschon*, 'the scrotum,' and *κηλη*, 'tumour;' *Scrotal hernia*, see Bubonocèle. Sauvages uses it in the sense of *Dropsy of the scrotum*, see Hydrocèle.

OSCHEOCELE AQUOSA, Hydroscœcele—o. Flatulenta, Physocœle—o. Hydatidosa, Hydatidocœle—o. Œdematica, Œdematoscœcele—o. Seminalis, Spermatocele—o. Urinalis, Urocele—o. Varicosa, Varicocele.

OSCHEON, Scrotum, Os uteri.

OSCHEON'CUS, *Oschon'cus*, *Oschophy'ma*, *Oschophy'ma*, from *oschon*, 'scrotum,' and *ουζα*, 'a tumour.' A preternatural swelling of the scrotum.

OSCHEOPHYMA, Oscheoncus.

OSCHEOPLASTIC, *Oschoplasticus*, from *oschon*, 'the scrotum,' and *πλαστω*, 'I form.' An epithet given to the operation for restoring the scrotum when lost.

OSCHEOPYŒDE'MA, *Oschopyadema*, *Edema scroti purulentum*. Purulent tumefaction of the scrotum.

OSCHEUS, Scrotum.

OSCHION. The raised margin of the os uteri. According to some, an excrescence from the os uteri.

OSCHI'TIS, *Orchoi'tis*, *Ochoi'tis*, *Inflammatio scroti*, from *oschon*, 'the scrotum,' and *itis*, 'inflammation.' Inflammation of the scrotum.

OSCHOCARCINOMA, Cancer, chimney sweepers'.

OSCHOCELE, Oscheocèle.

OSCHONCUS, Oscheoncus.

OSCHOPHYMA, Oscheoncus.

OSCHOPYŒDEMA, Oscheopyœdema.

OSCHUREDE'MA; from *oschon*, 'scrotum,' *ουρα*, 'urine,' and *οιδημα*, 'œdema.' Œdema from effusion of urine into the scrotum.

OSCHUS, Scrotum.

OSCHYDREDE'MA, from *oschon*, 'scrotum,' *υδωρ*, 'water,' and *οιδημα*, 'œdema;' *Œdema scroti aquosum*. Watery œdema of the scrotum.

OSCILLATIO, Irritability, Oscillation.

OSCILLATION, *Oscillatio*; from *oscillum*, 'an image perhaps of Bacchus, hung on ropes, and

swung up and down in the air; Vibration, *Vibra'men*, *Vibra'tio*, *Vibra'tus*. Also, a partial rotatory movement of the eyeball to and from its antero-posterior axis.

OSCITANT, (FEVER,) *Febris oscitans*, (F.) *Fièvre oscitante*; from *oscitare*, 'to yawn.' A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSCLULATORIUS, Orbicularis oris.

OSCULUM UTERI, Os uteri.

OSCUS, Scrotum.

OSEILLE, *Rumex acetosa*—o. *Boucher*, *Rumex scutatus*—o. *Petite*, *Rumex scutatus*—o. *Ronde*, *Rumex scutatus*—o. *Rouge*, *Rumex sanguineus*.

OSMAZOME, *Os'mozome*, *Osmazo'ma*, *Osmozo'ma*, *Zomol'mum*, (F.) *Matière extractive du Bouillon*; *Extractive of meat*, *Saponaceous extract of meat*; from *οσμη*, 'smell,' and *ζωμος*, 'soup.' M. Thénard gave this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell and taste, and is found in *Bouillons* of meat, in the proportion of one part to seven of gelatin. Vanquelin discovered in it some fungi. It is the substance which gives the flavour of meat to soups, and hence its name.

OSME, Odour.

OSMESIS, Olfaction.

OSMIDROSIS; from *οσμη*, 'odour,' and *ἰδρωσ*, 'sweat.' Perspiration of an unusual odour.

OSMOMETRICUS SENSUS, Olfaction.

OSMONOSI, *Osmonu'si*, *Morbi olfactūs*; from *οσμη*, 'odour,' and *νοσος*, 'a disease.' Diseases of olfaction.

OSMONOSOLOG'IA; from *οσμη*, 'odour,' *νοσος*, 'disease,' and *λογία*, 'description.' The doctrine of, or a treatise on, the diseases of the sense of smell.

OSMOZOME, Osmazome.

OSMUND, ROYAL, *Osmonda regalis*.

OSMUNDA REGAL'IS, *Flix Florida*, *Osmond-royal*. Family, Filicoidæ. This plant was once thought to possess astringent and emmenagogue virtues.

OSORON, Opium.

OSPHRANTERICUS, Olfactory.

OSPHRANTICOS, Olfactory.

OSPHRASIA, Olfaction.

OSPHRESIOLOG'Y, *Osphresiology*; from *οσμη*, 'odour,' and *λογος*, 'a discourse.' A treatise on olfaction and odours.

OSPHRESIS, Olfaction.

OSPHRETICUS, Olfactory.

OSPHRIS'TICE, from *οσφρησις*, 'olfaction.' The doctrine of the phenomena of odours.

OSPHYALGEMA, Coxalgia.

OSPHYALGIA, Coxalgia.

OSPHYARTHROSIS, Osphyitis.

OSPHYARTHROACE, Coxarum morbus.

OSPHYITIS, *Osphy'itis*, *Osphyarthri'tis*, *Inflammati'o coxæ*, from *οσφυς*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the parts about the hip.

OSPHYRRHEUMA, Lumbago.

OSPHYS, Lumbi.

OSPHYTIS, Osphyitis.

OSSA BREGMATIS, Parietal bones—o. *Convoluta inferiora*, Turbinate bones, inferior—o. *Digitorum manūs*, Phalanges of the fingers

—o. *Digitorum pedis*, Phalanges of the toes—o. *Epactalia*, *Wormiana ossa*—o. *Maxillæ superioris quarta seu quinta seu secunda*, Nasal bones—o. *Nasalia*, Nasal bones—o. *Nasi*, Nasal bones—o. *Nervalia*, Parietal bones—o. *Pisiformia lingualia*, see *Hyoides*—o. *Raphogeminantia*, *Wormiana ossa*—o. *Sesamoidea*, *Sesamoid bones*—o. *Sincipitis*, Parietal bones—o. *Spongiosa*, *Turbinate bones*—o. *Suturarum*, *Wormiana ossa*—o. *Tertia maxillæ superioris*, *Turbinate bones*—o. *Tetragona*, Parietal bones—o. *Triangularia*, *Sphenoidal cornua*—o. *Triangularia Blasii*, *Wormiana ossa*—o. *Triquetra*, *Wormiana ossa*—o. *Turbinata*, *Turbinate bones*—o. *Verticalia*, Parietal bones.

OSSELETS DE L'OREILLE, *Ossicula auditūs*.

OSSEOUS, *Os'seus*, *Osto'des*, *Ostō'des*, (F.) *Ossoux*; from *os*, 'a bone.' Bony. Resembling bone.

OSSICULA, see *Ossiculum*.

OSSIC'ULA AUDIT'US, *Ossic'ula Auris*, (F.) *Ossiclets de l'oreille*, *O. de l'ouis*. The small bones situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows, *Malleus*, *Incus*, *Os orbiculare*, *Stapes*.

OSSICULA BERTINI, *Sphenoidalia cornua*—o. *Innominata*, *Innominata minora ossa*—o. *Nasi*, *Nasal bones*—o. *Sesamoidea*, *Sesamoid bones*.

OSSIC'ULUM, (plural *Ossic'ula*), *Ossa'rium*. Diminutive of *os*, a bone. A small bone. See *Os*.

OSSICULUM COCHLEARE, *Orbicular bone*—o. *Incudi Comparatum*, *Incus*—o. *Malleolo assimilatatum*, *Malleus*—o. *Molari denti comparatum*, *Incus*—o. *Orbiculare*, *Orbicular bone*—o. *Quartum*, *Orbicular bone*—o. *Squamosum*, *Orbicular bone*.

OSSIFICATION, *Ossificatio*; from *os*, 'a bone,' and *facere*, 'to make;' *Ostogen'ia*, *Osteogen'esis*, *Osteo'osis*, *Osto'osis*. Formation of bones. Development, or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other organs. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage, at length, receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Puncta seu Nu'clei ossificatio'nis*, *Nu'clei ossi*, are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification. Besides the natural ossification, which we observe in the fetus and in the first periods of life, there are also *accidental ossifications*, such as those frequently remarked after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthe'ia*, *Incrustation*, and *Petrification* have, sometimes, been applied.

OSSIFRAGA, *Osteocolla*.

OSSIS SACRI ACUMEN, *Coccyx*.

OSSISANA, *Osteocolla*.

OSSIVOROUS, from *os*, 'a bone,' and *voro*, 'I devour.' A species of tumour, mentioned by Ruysch, which destroys bone.

OSTAGRA, *Os'tagra*, from *οστρον*, 'a bone,'

and *αγρα*, 'seizure.' A forceps to cut or remove portions of bone.

OSTALGIA, Osteocopus.

OSTALGITIS, *Osti'tis, Oston'tis*, from *οστιον*, 'a bone,' and *itis*. *Inflammati'o Ossis*. Inflammation of bone; characterized by violent shooting and lancinating pains in the bone.

OSTARIUM, Ossiculum.

OSTARTHRTIS, Arthrophlogosis.

OSTARTHROCACE, Spina ventosa.

OSTEAGRA, Ostagra.

OSTEALGIA, Osteocopus.

OSTEITES, Osteocolla.

OSTEITIS, Ostalgitis.

OSTEMPYESIS, *Ostempy'sis, Ostempyo'sis*, from *οσσειον*, 'a bone,' and *εμπυσις*, 'effusion of pus.' An abscess in the interior of a bone.

OSTEMPYOSIS, Ostempyesis.

OSTEOCLELE, from *οσσειον*, 'a bone,' and *κληη*, 'a tumour.' A hernia in which the sac is cartilaginous and bony—a rare case. Also, osseous induration of one or both testicles.

OSTEOCLASIS, Fracture.

OSTEOCOLLA, from *οσσειον*, 'a bone,' and *κωλλα*, 'glue;' *Glue-bone, Stone or bone binder, Ossifraga, Holosteus, Ossisa'na, Ostri'tes, Ostei'tes, Amos'teus, Osteo'i'thos, Stelochi'tes*. A name given to a petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it has been supposed to possess the power of favouring the formation of callus in fractures. It is the *Chaux carbonat'e concretionnée incrustante* of Haüy. Not used.

OSTEOCOPUS, *Osteal'gia, Ostalgia, Osteodynia'sis*, from *οσσειον*, 'a bone,' and *κοπος*, 'fatigue.' An epithet given to pains felt in bones, which are commonly owing to constitutional syphilis.

OSTEODYNIA, Osteocopus.

OSTEOGANGRÆNA, Necrosis.

OSTEOGENIA, Ossification.

OSTEOGRAPHY, *Osteogra'phia*, from *οσσειον*, 'a bone,' and *γραφειν*, 'to describe.' Description of the bones. The part of anatomy which describes the bones.

OSTEOLITHOS, Osteocolla.

OSTEOLGY, *Osteolog'ia*, from *οσσειον*, 'a bone,' and *λογος*, 'a discourse.' The part of anatomy which treats of bones.

OSTEOMA, Exostosis.

OSTEOMALACIA, Mollities ossium—o. Infantum, Rachitis.

OSTEOMALACOSIS, Mollities ossium.

OSTEON, Bone—o. Hieron, Sacrum.

OSTEONCUS, from *οσσειον*, 'a bone,' and *γκος*, 'a tumour.' A bony tumour.

OSTEONECROSIS, Necrosis.

OSTEONOSI, *Osteonu'sis*, from *οσσειον*, 'a bone,' and *νοσος*, 'a disease;' *Morbi ossium*. Diseases of the bones.

OSTEOPÆDION, Lithopædion.

OSTEOPALINCLASIS, from *οσσειον*, 'a bone,' *παλιν*, 'again,' and *κλασις*, 'fracture.' The breaking again of a bone which has united unfavourably.

OSTEOPHYMA, Osteoncus.

OSTEOPHYTA, Exostosis.

OSTEOPLEURIA, *Pleurosto'sis*; from *οσσειον*, 'a bone,' and *πλευρον*, 'a rib.' Ossification of the cartilages of the ribs.

OSTEOPOROSIS, from *οσσειον*, 'a bone,'

and *πορωσις*, 'induration.' Induration of a bone, from the deposition of too much bony matter.

OSTEOPSATHYROSIS, Fragilitas ossium.

OSTEO-SARCO'MA, *Osteo-sarco'sis, Sarco-sto'sis, Hemateo-sto'sis*, from *οσσειον*, 'bone,' and *σαρξ*, 'flesh.' Disease of the bony tissue, which consists in softening of its laminae, and their transformation into a fleshy substance, analogous to that of cancer, and which is accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with spina ventosa.

OSTEOSARCOSIS, Osteosarcoma.

OSTEOSIS, Ossification.

OSTEO-STEATO'MA, *Exosto'sis steatomato'des*, from *οσσειον*, 'a bone,' and *στερον*, 'suet or fat.' A name given to bony tumours or degenerations, which sometimes belong to osteosarcoma; at others to spina ventosa, exostosis, &c.

OSTEOTOMIST, *Osteotomis'ta*; same etymon as the next. An instrument, invented by Dr. D. Davis, for cutting the bones of the fetal cranium, where it becomes necessary to greatly reduce the size of the head in parturition.

OSTEOTOMY, *Osteotom'ia*, from *οσσειον*, 'a bone,' and *τομην*, 'to cut.' The part of practical anatomy whose object is the dissection of bones.

OSTEOTOPHUS, Tophus.

OSTEOTYLUS, Callus.

OSTEULCUM, Bone nippers.

OSTEUM, Bone.

OSTHESIA, see Ossification.

OSTIARIUS, Pylorus.

OSTIOLUM, from *οσσειον*, 'a mouth or opening.' A small door or gate.

OSTIOLA CORDIS, *Valvula cordis, Pellicula cordis*. The valves of the heart.

OSTITIS, Ostalgitis.

OSTIUM, *Orific'ium*, a door or gate,—of the heart, for example. The opening between the auricle and ventricle of each side; *Ostium venosum*, that of the right side; *Ostium arteriosum*, that of the left.

OSTIUM ABDOMINALE, see Tube, Fallopiian—o. Internum, see Ostium uteri.

OSTIUM UTERI. The vulva; the vagina. The term *Ostium internum* has been applied to the inferior opening of the uterus, which establishes a free communication between the cavities of the body and neck, and which is often obliterated in old women.—Cruveilhier. The neck of the uterus; the mouth of the uterus.

OSTIUM UTERINUM, see Tube, Fallopiian—o. Ventriculi Duodenale seu Pyloricum seu Dextrum seu Inferius, Pylorus.

OSTODES, Bony.

OSTOIDEA SUBSTANTIA, see Tooth.

OSTOIDES, Bony.

OSTOMA, Exostosis.

OSTOSIS, Ossification.

OSTREA, *Ostreum*, (F.) *Huître*. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, *Testa Ostrea, Testa*, (Ph. U. S.) (F.) *Coquilles d'huîtres*, have been received into the Pharmacopœias, and used medicinally. Their virtues are similar to those of the carbonate of lime. See Creta.

OSTREUM, Ostrea.

OSTRITES, Osteocolla.

OSTRUTHIUM, Imperatoria.

OSYRIS, Antirrhinum linaria.

OTACOUS'TIC, *Otacus'ticus*; from *οτις*, *ωτις*, 'the ear,' and *ακουω*, 'I listen.' Any instrument is so called which improves the sense of hearing,—as the different species of trumpets.

OTAGRA, Otagria.

OTAL'GIA, *Ot'agra*, *Otod'gñe*, from *οτις*, *ωτις*, 'the ear,' and *αλγος*, 'pain.' Pain in the ear; *Dolor aurium*, *Spas'mus aurium*, *Ears-achs*. See Otitis.

OTAL'GIC, *Otal'gicus*. An epithet for remedies used in otalgia.

OTECHUS, Tinnitus aurium.

OTEMPLASTRUM, *Otoplas'ta*, *Otoplas'trum*, from *οτις*, 'the ear,' and *εμπλαστρον*, 'a plaster.' A plaster put behind the ears.

OTEN'CHYTES, *Oten'chyta*, from *οτις*, *ωτις*, 'the ear,' *εν*, 'into,' and *χυνω*, 'I pour.' *Sypho auricular'is*. A species of syringe, used for injecting the ear.

OTHELCO'SIS, from *οτις*, *ωτις*, 'the ear,' and *αλωσις*, 'ulceration.' Ulceration or supuration of the ear,

OTHONE, Linteum.

OTHONION, Linteum.

OTHYGROTES, Otitirrhœa.

OTIATER, Aurist.

OTIATRIA, *Otiat'ricè*, from *οτις*, *ωτις*, 'the ear,' and *ιατρία*, 'medicine.' The business of the aurist. The management of diseases of the ear.

OTIATRICE, Otiatria.

OTIATRUS, Aurist.

O'TICUM, from *οτις*, *ωτις*, 'the ear.' A medicine employed in diseases of the ear.

OTICUM GANGLION, *Otogan'gium*, *Ganglion auricular'e*, *Otic ganglion*, *Auric'ular ganglion*, (F.) *Ganglion maxillo-tympanicus*. This is a small ganglion, although more than double the size of the ophthalmic, ash-coloured and pulpy like the ganglions of the sympathetic. It is situated in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve, at the inner margin of the foramen ovale of the sphenoid bone. See Petrous ganglion.

OTIRRHE'A, *Otorrhœa*, *Oth'grotos*, *Blennotorrhœa*, (F.) *Catarrhe de l'oreille*, from *οτις*, 'the ear,' and *ρρω*, 'I flow.' Discharge of a purulent or puriform liquid, *Pyorrhœa aurium*, *Otopyorrhœa*, *Pyo-otorrhœa*, *Otorrhœa purulenta*, from the meatus auditorius externus. It is a symptom of chronic otitis. Some authors have, indeed, used the term synonymously with chronic otitis. When it extends to the brain, it is termed *ce'bral otorrhœa*; and when from the middle or internal ear, it is termed *internal otorrhœa*, *Otorrhœa interna*, and *Entotorrhœa*.

OTIRRHEA, CEREBRAL, see Otitirrhœa.

OTITES, see Digitus.

OTI'TIS, *Otophleg'monè*, *Empres'ma otitis*, *Inflammatio auris*, *Inflammation of the ear*, (F.) *Inflammation de l'oreille*. Inflammation of the mucous membrane of the ear, characterized by excruciating pain; intolerable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. When the inflammation is restricted to the lining membrane of the meatus, it is termed *otitis catarrhal'is*. Otitis is

divided into *external* or *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum or internal ear. It may be *acute* or *chronic*. *Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistica. *Chronic otitis*, *otirrhœa*, is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

OTITIS CATARRHALIS, see Otitis.

O'TIUM, *Ota'rium*, from *οτις*, *ωτις*, 'the ear.' A small ear. The auricle or pavilion of the ear.

OTOCEPH'ALUS, *Monot'ia*, from *οτις*, *ωτις*, 'the ear,' and *κεφαλη*, 'head.' A monster, whose ears are in contact, or united into one.

OTOCONIES, see Otolithi.

OTODYNE, Otagria.

OTOGLYPHIS, Earpick.

OTOGLYPHUM, Earpick.

OTOGRAPHY, *Otogra'phia*, from *οτις*, *ωτις*, 'the ear,' and *γραφω*, 'a description.' The part of anatomy which describes the ear.

OTOLITHI, (F.) *Otolithes*, from *οτις*, *ωτις*, 'the ear,' and *λιθος*, 'a stone.' White calcareous substances contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of nervous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are inservient to audition. When of a looser consistence, they are called *Otocon'ia*, (F.) *Otoconies*, from *οτις*, 'the ear,' and *κοινια*, 'dust.'

OTULOGY, *Otolog'ia*, from *οτις*, *ωτις*, 'the ear,' and *λογος*, 'a discourse.' The part of anatomy which treats of the ear. An anatomical treatise on the ear.

OTOPATHEMA, Otopathy.

OTOP'ATHY, *Otopathi'a*, *Otopathi'ma*, from *οτις*, *ωτις*, 'the ear,' and *παθος*, 'a disease.' A diseased condition of the ear.

OTOPHLEGMONE, Otitis.

OTOPLASTA, Otemplastrum.

OTOPLASTICE, from *οτις*, *ωτις*, 'the ear,' and *πλαστικος*, 'forming.' The operation for restoring a lost ear.

OTOPLASTRUM, Otemplastrum.

OTOPYORRHEA, Otitirrhœa.

OTORRHAG'IA, from *οτις*, *ωτις*, 'the ear,' and *ρρηγη*, 'rupture.' Bleeding from the ear or ears.

OTORRHEUMATIS'MUS, from *οτις*, *ωτις*, 'the ear,' and *ρευματισμος*, 'rheumatism;' *Otagria rheumatica*. Rheumatic ear-ache.

OTORRHEA, Otitirrhœa—o. Cerebral, see Otitirrhœa—o. Interna, see Otitirrhœa—o. Purulenta, Otitirrhœa.

OTOSCOP'UM, from *οτις*, *ωτις*, 'the ear,' and *σκοπη*, 'examination.' An instrument for examining the condition of the external ear.

OTOTOMY, *Ototom'ia*, from *οτις*, *ωτις*, 'the ear,' and *τομειν*, 'to cut.' The part of practical anatomy which teaches the mode of dissecting and preparing the ear.

OULA, Gingivæ.

OULE, Cicatrix.

OUNCE, *Un'cia*. A weight equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See Weights and Measures.

OURAQUE, Urachus.

OUREMA, Urine.

OURLES, Parotis, Cynanche parotidæa.

OURON, Urine.

OUS, Ear.

OUTRE MER, Lapis lazuli.

OUVERTURE CADAVERIQUE, Autopsia cadaverica.

OVA NABOTHI, Nabothi glandulæ.

OVAL, *Ova'lis, Oö'des, Oö'id'es, Oö'dtus*, from *ovum*, 'an egg.' Egg-shaped, elliptic. That which is round and oblong like an egg.

OVALÉ FORAMEN, *Foramen oö'des*, (F.) *Trou ovale*. The foramen obturatorium; also, the foramen in the inner paries of the middle ear, which opens into the vestibule; and the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium.

OVALIS FOSSA, *Val'vula seu Vestig'ium Foraminis ovalis*, is a depression observed in the right auricle of the heart, on the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foraminis ovalis, Isthmus seu An'nulus Vieussse'nus* seu *An'nulus fossæ ovalis*: in the fœtus called *An'nulus foraminis vel fossæ ovalis*. The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum, which, in the fœtus, is called *foramen ovale*, (F.) *Trou ovale, Trou de Botal*.

OVARIAN, *Ova'rial, Ovaria'nus*, from *ovarium*, 'the ovary.' Relating to the ovary—*as Ovarian pregnancy*.

OVARIAN ARTERY, Spermatic artery—*o*. Nerves, Spermatic plexus of nerves—*o*. Pregnancy, see Pregnancy, ovarian—*o*. Veins, Spermatic veins—*o*. Vesicles, Folliculi Graafiani.

OVARIOTOMY, Oariotomy.

OVARISTS, *Ovists*. Same etymon. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, merely incited by the male. Not many of the physiologists of the present day can be classed among the ovarists.

OVARITIS, Oaritis.

OVARIUM. Same etymon. The *O'vary, Testis mulie'bris, T. femineus, Oa'rion, Ooph'oron, Gynoa'rium, Vesica'rium*, (F.) *Ovaire*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female. They are two ovoid bodies, almost as large as the testicles in men, placed on each side of the uterus, between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and the internal is fixed to the uterus by a small ligamentous cord, called *Ligamentum rotundum ovarii*. The ovaries are composed of a very close, spongy texture—*stroma*,—and of small vesicles filled with a clear fluid; these vesicles contain ovules, which detach themselves from the ovarium before and after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

OVARIUM TUMIDUM, Oarioncus—*o*. Nabothi, Nabothi glandulæ.

OVATUS, Oval.

OVERO BUTUA, Pareira brava.

OVICAPSULE, see Folliculi Graafiani.

OVIDUCTUS MULIEBRIS, Tuba Fallopiana.

OVIPARITE, see Oviparous.

OVIP'AROUS, *Ovip'arus*; from *ovum*, 'an egg,' and *pa'rio*, 'I bring forth.' An epithet applied to animals which are hatched from eggs outside of the body. The condition may be termed *Oviparousness*, (F.) *Oviparité*. See Generation.

OVIPAROUSNESS, see Oviparous.

OVISAC, see Folliculi Graafiani.

OVISTS, Ovarists.

OVOLGY, Oologia.

OVO-VIVIP'AROUS, from *ovum*, 'an egg,' *vivus*, 'living,' and *para're*, 'to bring forth.' Oviparous animals, whose ova are hatched within the mother,—vipers, for example. See Generation.

OVULA GRAAFIANA, Folliculi Graafiani—*o*. Nabothi, Nabothi glandulæ.

OVULATION; from *ovulum*, diminutive of *ovum*, 'an egg.' The formation of ova in the ovary, and the discharge of the same. SPONTANEOUS OVULATION, (F.) *Ovulation spontané*, is the spontaneous formation and discharge of ova which takes place in the female of the mammalia. See Heat.

OVULINE, Decidua reflexa.

O'VULUM, *O'vule*; diminutive of *ovum*, 'an egg.' A small egg. That which has the appearance of a small egg. See Ovum.

OVUM, *ov*, *Oön*, an egg. The eggs of poultry are chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Auran'cum, Auran'tum*, (F.) *Coqus d'œuf, Coquillo d'œuf*, calcined, is esteemed an absorbent. The *Oil of the egg* is emollient, and is used, externally, to burns and chaps. The *Yolk of the egg*—*Vital'lum* seu *Vital'lus ovi*—renders oils, &c., miscible with water. Eggs, when lightly boiled, are easy of digestion; but, when very hard-boiled or fried, they are more rebellious.

In *Pharmacy, white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c. *Yolk of egg*, (F.) *Jaune d'œuf*, beaten up with warm water and sugar, and *aromatized* with orange-flower water, forms an emulsion, which is emollient, and known under the name *Lait de poule* or *chicken's milk*.

Anatomists give the name *Ova, Ovula, Ovules*, (F.) *œufs*, to round vesicles, containing a humour similar to the white of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the fœtus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *œuf*. The changes induced in the mammalia after impregnation greatly resemble those in the bird.

Ovum, Testicle—*o*. Hystericum, see Clavus hystericus.

OXALAS SUBPOTASSICUS, Potass, oxalate of.

OXALAT'IC, *Oxalat'icus*. Relating to *oxalate*: hence *Oxalatic Diath'esis* is the habit of body which favours the formation and deposition of oxalates from the urine.

OXAL'IC ACID, *Acidum oxali'num, A. sacchari'num, A. hydro-carbon'icum, A. acetosol'la, A. oxal'icum, Acidum sac'chari, Acid of sugar*;

*Acid of sorrel, Carbonous acid, from οξαις, 'sorrel.'* An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa. It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary; and, besides, in quantity, it is a virulently acrid poison. It is largely employed for cleaning boot tops; and, as it strongly resembles the sulphate of magnesia, has often been taken for it. Several fatal cases are, indeed, on record. For its antidotes, &c., see Poison.

**OXALIDE**, Oxalis acetosella.

**OXALIS ACETOSA**, *Rumex acetosa*.

**OXALIS ACETOSILLA**. The systematic name of the *Wood-sorrel, Cuckowbread, Sour Trefoil, White Sorrel, Mountain Sorrel, Trifolium acetosum, Oxitriphyllum, Lajula, Allelu'ja, Acetosella, Oxyphyl'lon, Oxytriphylon, Pansie euculi, (F.) Surulle, Oxalide, Pain a Coucou, Allouisa. Family, Geraniæ. Sex. Syst. Decandria Decagynia.* This plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbutic, and diuretic.

**OXALIS TUBEROSA**, *Oca*. A tuberous plant, whose oval-shaped root is used as food by the Peruvians. It is watery, has a sweetish taste, and is much liked.

**OXALIUM**, Potass. oxalate of.

**OXAL'ME**, from οξυς, 'acid,' and αλς, 'salt.'

A mixture of vinegar and salt.

**OXALURIA**, Urine, oxalic.

**OXELÆON**, from οξυς, 'acid,' and ελαιον, 'oil.' A mixture of vinegar and oil, used as a condiment.

**OX EYE**, *Helenium autumnale*.

**OX GALL**, Bile of the Ox.

**OXID**, Oxyd.

**OXIDATION**, Oxyd.

**OXIDE**, Oxyd.

**OXIDUM**, Oxyd.

**OXINES**, οξινες, (νευς,) from οξυς, 'acid.'

Wine already sour, but not yet vinegar.

**OXITRIPHYLLUM**, *Oxalis acetosella*.

**OXODES**, Acidulous.

**OXOIDES**, Acidulous.

**OXOS**, Aceticum acidum.

**OXYA**, *Fagus sylvatica*.

**OXYÆSTHESIA**, Hyperæsthesia.

**OXYAPHE**, Hyperaphia.

**OXYAPHIA**, Hyperaphia.

**OXYBAPHION**, see *Actabulum*.

**OXYBOLIA**, from οξυς, 'quick,' and βολη, 'ejection.' Too rapid emission of sperm.

**OXYCANTHA**, *Mespilus oxyacantha*.

**OXYCANTHA GALENI**, *Berberis, Berberis vulgaris, Spina acida, Crespinus, (F.) Épine vinette, Vinettier. Family Berberidæ. Sex. Syst. Hexandria Monogynia.* The *Barberry*. The fruit of the berries, *Berberies, Piperidæ*, is gratefully acid, and moderately astringent. By preparing an alcoholic extract of the root and adding water to it, a pulverulent brown substance is thrown down, which, when dissolved in alcohol and evaporated, yields the bitter principle, *Berberin*, which is an excellent stomachic in the dose of ʒ, 5, or 10 grains.

The American *Barberry, Berberis Canadensis, Pepperridge Bush, Souberry*, differs slightly from the European. It flourishes on mountains and hilly districts from Canada to Virginia.

**XYCOCCOS**, *Vaccinium oxycoccos*.

**XYCRATE**, *Oxyera'tum*, from οξυς, 'acid,'

and κραι, 'I mix'; *Posea, Phusca*. A mixture of vinegar and water; frequently used in medicine as a refrigerant and antiseptic.

**XYCROCEUM EMPLASTRUM**, from οξυς, 'acid,' and κροκε, 'saffron.' A plaster, composed of *saffron, pitch, colophony, yellow wax, turpentine, galbanum, gum ammoniac, myrrh, oilibanum, and mastic*. It was employed as a strengthening plaster.

**XYCUM**, Oxygen.

**XYD**, *Oxid, Oxide, Oxyde, Ox'ydum, Ox'idum*, from οξυς, 'acid.' A combination, not acid, of a simple body with oxygen.

**XYDATA TION**, *Oxydat'io, Oxidat'ion, Oxygenat'ion*. The action of oxidizing a body; that is, of combining it with oxygen; a combination from which results an oxyd.

**XYDE**, Oxyd.

**XYDE**, *Cystic*. A species of urinary calculus, having the shape of confused, yellowish, semi-transparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all azoted matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

**XYDE D'ANTIMOINE SULFURE**, Oxydum stibii sulphuratum.

**XYDERCIA**, *Oxyder'cia, Visus a'cies*, from οξυς, 'quick,' and δεικναι, 'to see.' Sharpness of vision.

**XYDERCICUS**, *Oxyder'ces*, from οξυς, 'sharp,' and δεκναι, 'I see.' A medicine which sharpens the sight.

**XYDORCIA**, Oxydercia.

**XYDUM**, Oxyd—o. Antimonii cum phosphate calcis, Antimonial powder.

**XYDUM FERRI NIGRUM**, *Ferri ox'idum nigrum, Black oxyd of iron*. The scales, which fall from iron, when heated, consist of iron, combined with oxygen. They have been used like the chalybeates in general.

**XYDUM FERRICUM CRYSTALLIZATUM NATIVUM**, *Hæmatites*—o. Hydrargyri completum, Hydrargyri nitrico-oxydum—o. Hydrargyricum, Hydrargyri nitrico-oxydum—o. Hydrargyricum præparatum, Hydrargyri oxydum cinereum—o. Hydrargyrosium, Hydrargyri oxydum cinereum.

**XYDUM STIBII SULPHURATUM**, *Hepar antimoni, Crocus metallo'rum, Crocus antimoni, (F.) Oxyde d'antimoine sulfuré, Fose d'Antimoine*. This was formerly exhibited in the cure of fevers, but it is now rarely employed.

**XYECOIA**, Hyperacusia.

**XYG'ALA**, from οξυς, 'sour,' and γαλα, 'milk.' Sour milk. The *Oxygala equinum, Caracos'mos*, is reckoned amongst the delicacies of the Tartars.

**XYG'ARON**, from οξυς, 'acid,' and γαρν, 'garum.' A composition of garum and vinegar.

**OXYGEN**, *Oxygen'ium, Empy'real air, Pure air, Vital air, Dephlogisticated air, Oxyg'enes, Ox'yum, Princip'ium oxyg'enans seu oxygenet'ium seu acid'ificans seu acid'idum, Elementum acidificum, (F.) Oxygène, Air du feu*; from οξυς, 'acid,' and γενναι, 'I engender,' that is, *generator of acids*; and such it was believed to be, *exclusively*, at the period when the name was given to it. This is now known not to be the case. Oxygen is largely distributed in nature. It exists in the air, in water, in several acids, in all the oxyds, and in vegetable and animal substances, &c. It is obtained by decomposing the peroxyd of manganese or the

chlorate of potassa by heat in close vessels. Although oxygen, in the state of admixture in which it is found in the atmosphere, is of vital importance, it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed. The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, scrofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being given during the day.

**OXYGENATION, Oxidation.**

**OXYGENE, Oxygen.**

**OXYGENESES.** A name given by Baumes to diseases which he attributed to disordered oxygenation.

**OXYGEUSIA, Hypergenasia.**

**OXYGLICUS, Oxygl'icus,** from  $\acute{o}\xi\upsilon\varsigma$ , 'acid,' and  $\gamma\lambda\upsilon\kappa\upsilon\varsigma$ , 'sweet;' *Mulsa acida, Acetum mulsum dulcē.* Prepared by macerating and boiling honey-comb (from which the greater part of the honey has been taken) in water, and adding vinegar. An *Oxymel*.

**OXYLAPATHUM, Rumex acutus.**

**OXYMEL, Apom'eli, Mel acetatum,** from  $\acute{o}\xi\upsilon\varsigma$ , 'acid,' and  $\mu\alpha\lambda\lambda\iota$ , 'honey.' Honey and vinegar boiled to a syrupy consistence.

**OXYMEL ÆRUGINIS, Linimentum Æruginis.**

**OXYMEL COLCHICI, Oxymel of meadow saffron, (F.) Oxymel colchique.** (*Rad. colch. recent. in laminas tenues secta* ℥ij, *aceti destillati* ℔ij, *mellicis despumati.* pond. ℔ij.) Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. *Ph. D.*) It is expectorant and diuretic. Dose, f. ℥j, in gruel.

**OXYMEL COLCHIQUE, O. colchici—o. of Meadow saffron, O. colchici.**

**OXYMEL SCILLÆ, Oxymel of squills, Mel scilla, Oxymel scillit'icum.** (*Mellis despumati.* ℔ij, *aceti scilla* Oij.) Boil in a glass vessel over a gentle fire to a proper consistence. It is reputed to be expectorant and diuretic. Dose ℥j.)

**OXYMEL, SIMPLE, Oxymel simplex,** is prepared as follows; (*Mellis despumati* ℔ij, *acidi acetici* ℔j.) Boil in a glass vessel, over a slow fire, to a proper thickness. *Ph. L.*) It is cooling;—externally, detergent.

**OXYMEL OF SQUILL, O. scillæ.**

**OXYMYRRHINE, Ruscus.**

**OXYMYRSINE, Ruscus.**

**OXYNGIUM, Adeps suilla.**

**OXYNITRON,** from  $\acute{o}\xi\upsilon\varsigma$ , 'acid,' and  $\nu\eta\tau\rho\nu\varsigma$ , 'nitre.' Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

**OXYNOSEMA, Acute disease.**

**OXYNOSOS, Acute disease.**

**OXYNUSOS, Acute disease.**

**OXYOPTIA, Galero'pia, Hyperop'ia, Suffu'sio exalt'rans, Acies visus,** from  $\acute{o}\xi\upsilon\varsigma$ , 'quick,' and  $\omega\psi$ , 'sight.' Excessive acuteness of the sense of sight. Instances have occurred, where persons could see the stars in the day time. The cause is seated in great sensibility of the retina. The term has been used synonymously with nyctalopia.

**OXYOSPHERE'SIA, Oxyosphra'sia,** from  $\acute{o}\xi\upsilon\varsigma$ , 'acute,' and  $\sigma\sigma\phi\eta\rho\eta\iota\varsigma$ , 'smell.' Excessive acuteness of the sense of smell.

**OXYPHLEGMA'SIA, εὐφλεγμασία, Acu'ta**

*et v'homens inflammatio.* A violent inflammation.

**OXYPHENICON, Tamarindus.**

**OXYPHONIA, Vox acuta;** from  $\acute{o}\xi\upsilon\varsigma$ , 'sharp,' and  $\phi\omega\eta\eta$ , 'voice;' *Paraphonia clangens, P. ulcero'sa, Clangor, Vox clang'o'sa, Leptophonia.* A shrill and squalling voice;—frequently, a symptom of morbid affection of the larynx.

**OXYPHYLLON, Oxalis acetosella.**

**OXYPODIA, see Kylosis.**

**OXYPROTEIN, see Corium phlogisticum.**

**OXYREG'MIA, Ructus ac'idus,** from  $\acute{o}\xi\upsilon\varsigma$ , 'sour,' and  $\rho\eta\rho\upsilon\sigma\mu\alpha$ , 'I belch.' Acid eructation.

**OXYRIA RENIFORM'IS, Rumex dig'ynus, Boreal sourdock, Mountain Sorrel, Welsh sorrel.** A plant, *Sex. Syst.* Diandria digynia, which grows in the northern parts of America and Europe; blossoming in the spring. It possesses the same properties as oxalis acetosella.

**OXYRRHOD'INON, Acetum rosa'tum,** from  $\acute{o}\xi\upsilon\varsigma$ , 'acid,' and  $\rho\omicron\delta\omicron\nu$ , 'a rose.' A composition of vinegar and roses. (*Ol. Rosat.* ℥ij, *acet. rosat.* ℥j.) Used as a liniment in herpes and erysipelas.

**OXYS, Acetum, Acute.**

**OXYSAC'CHARUM, from**  $\acute{o}\xi\upsilon\varsigma$ , 'acid,' and  $\sigma\alpha\chi\alpha\rho\alpha\nu$ , 'sugar.' A mixture of sugar and vinegar. It was called *Oxy'saccharum vomiti-vium*, when it held in solution the glass of antimony; and *Oxy'saccharum scillit'icum*, when it contained squills.

**OXYSAL DIAPHORET'ICUM AN'GELI SALÆ.** A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and consequently fallen into a state of deliquium.—Orfila.

**OXYTARTARUS, Potassæ acetas.**

**OXYTES, Acidities.**

**OXYTOC'IA.** Same etymon as the next. Rapidity of parturition. Too great rapidity of birth.

**OXYTOCIC, Oxy'tocus,** from  $\acute{o}\xi\upsilon\varsigma$ , 'quick,' and  $\tau\iota\alpha\tau\omega$ , 'I bring forth.' A medicine which promotes delivery.

**OXYTRIPHYLLON, Oxalis acetosella.**

**OXYURE VERMICULAIRE, Ascaris vermicularis.**

**OXYURIS VERMICULARIS, Ascaris vermicularis.**

**OYSTER ROOT, Tragopogon—o. Shells, Ostrea testæ—o. Prepared, Testa preparata.**

**OZÆ'NA, Cory'za enton'ica, C. purulen'ta, Pyorrh'a'a nasa'tis, Entozæ'na, C. ozæno'sa, C. ulcero'sa, Coryza virulen'ta, C. malign'a, Rhini'tis ulcero'sa, Ulcus na'rrium fatens,** from  $\acute{o}\zeta\omega$ , 'I smell of something.' (F.) *Ozæna, Punaisie.* An affection of the pituitary membrane, which gives occasion to a disagreeable odour, similar to that of a crushed bed-bug; hence the name *Punais*, by which the French designate one labouring under ozæna. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

**OZÆNA BENIGNA, Coryza, chronic.**

**OZE, Breath, offensive.**

**OZEMAN, Albumen.**

**OZÈNE, Ozæna.**

**OZONE:** same etymon. The powerfully odorous matter, produced when a current of ordinary electricity passes from pointed bodies into the air.—Schönbein.

## P.

P. A contraction of *Pugillus*.  
 P. Æ. A contraction of *Partes aquales*.  
 P. P. A contraction of *Pulevis patrum*.  
 PAB'ULUM, *Trophæ*, *Phorbé*, *Alimentum*, *Nutrimen'tum*. Food, aliment. The animal heat and animal spirits—unmeaning terms—were formerly considered the *Pabulum vite*.  
 PACAY, *Prosopis dulcis*.  
 PACCHIONI GLANDS OF, *Glandula Dura Matris*, *G. dura Menin'gis*, *Tuber'cula parva dura matris*, *Cor'pora glandi'formia dura matris*, (F.) *Granulations cérébrales*. Small, whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.  
 PACHÆMIA, *Pachyæmia*, *Pachæma*, *Pachyæma*, from *παχυς*, 'thick,' and *αἷμα*, 'blood.' Too great thickness of the blood.  
 PACHEABLEPHAROSIS, *Pacheableph'ara*, *Pachybleph'aron*, *Pachyblephar'osis*, *Pach'ytes*, from *παχυς*, 'thick,' and *βλεφαρον*, 'an eyelid.' A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Caligo à Pacheablephar'osi*.  
 PACHETOS, see Laqueus.  
 PACHULOSIS, *Pachylosis*.  
 PACHYÆMIA, *Pachæmia*.  
 PACHYBLEPHARON, *Pacheablepharosis*.  
 PACHYCHOLIA, from *παχυς*, 'thick,' and *χολη*, 'bile.' Morbid thickness of the bile.  
 PACHYLO'SIS, *Pachulo'sis*, from *παχυς*, 'thick.' An inordinate production of the epidermis dependent upon hypertrophy of the papillæ of the skin.—E. Wilson.  
 PACHYNSIS, *Polysarcia adiposa*.  
 PACHYNTICA, *Incrassantia*.  
 PACHYSMUS, *Polysarcia adiposa*.  
 PACHYTES, *Pacheablepharosis*.  
 PACINIAN CORPUSCLES, see Corpuscles.  
 PAD, (S.) *Pajado*, from *paja*, 'straw.' *Plumaceolus*, *Pulvillus*, *Pulvinulus*, *Parvum pulvinar*.—a cushion, a little cushion; a junk; (F.) *Coussinet*. A small bag, filled with feathers, wool, hair, bran, chaff, &c. It is used to compress or support parts. In the treatment of certain fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.  
 PADNOON, Bit noben.  
 PAD'UA, MINERAL WATERS OF. Near Padua, in Italy, there are several thermal, sulphureous springs; the hottest of which is 188° Fahr. The chief establishments are Abano, Battaglia, and Montegrotto.

PADUS, *Prunus padus*.  
 PÆDAN'CHONÉ, from *παῖς*, *παῖδες*, 'a child,' and *αγγω*, 'I strangle,' *Angina Stoca*. Name of a fatal species of *cynanche*, mentioned by M. A. Severinus; probably the *Cynanche Trachealis*, or *Cynanche Maligna*.  
 PÆDARTHROACE, *Spina ventosa*.  
 PÆDATROPH'IA, from *παῖς*, *παῖδες*, 'a child,' *α*, privative, and *τροφή*, 'nourishment.' Atrophy of children. *Tabes mesenterica*.  
 PÆDATROPHIA GLANDULOSA, *Scrofula*.  
 PÆDERAS'TIA, *Pædogygium*, *Pædicatio*, *Cinædia*, from *παῖς*, 'a boy,' and *ἔρα*, 'love.' The love of boys. A disgraceful passion, common in ancient times, but now unknown. These terms are likewise applied to the crime of sodomy.  
 PÆD'IA, *παιδεία*, 'learning.' *Educatio infantum*. The bringing up or education—physical as well as moral—of children.  
 PÆDIATRI'A, *Pædiat'rica*, from *παῖς*, 'a child,' and *ιατρικία*, 'medical management.' Treatment of the diseases of children.  
 PÆDICATIO, *Pæderastia*.  
 PÆDICTERUS, *Icterus infantum*.  
 PÆDOBAROMACROMETER, *Baromacrometer*.  
 PÆDOGOGIUM, *Pæderastia*.  
 PÆDOMETER, *Baromacrometer*.  
 PÆDON'OSUS, from *παῖς*, *παῖδες*, 'a child,' and *νοσος*, 'disease.' A disease of childhood.  
 PÆDOPHLEBOTOM'IA, from *παῖς*, 'a child,' *φλεψ*, 'a vein,' and *τομή*, 'incision.' *Venæsectio puerorum*. Bleeding performed on children.  
 PÆDOT'RIBES, *Minister Gymnastæ*, from *παῖς*, 'a child,' and *τρίβω*, 'I train.' In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the directions of the superior.  
 PÆONIA, *P. officinalis*, *Glycis'idè*, *Hæmago'gum*, *P'ony*, or *Pi'ony*, male and female, (F.) *Pivoine*, *Pions*. The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astringent, and have been considered to be narcotic and antispasmodic. They have been given, particularly, in intermittents and epilepsies, but are not now used. The flowers are called *Rosæ benedictæ*, *R. ros'giz*.  
 PÆONICE, Medicine.  
 PÆONICUS, Medical.  
 PÆONIUS, Medical.  
 PÆOSYNE, Medicine.  
 PAGAPOPLEX'IA, from *παγαν*, 'to nail fast,' and *αποπληξία*, 'apoplexy.' Apoplexy from cold.  
 PAIDIA, Infancy.  
 PAIDION, Infans.  
 PAIGIL, *Primula veris*.  
 PAIN, (old F.) *painer*, 'to torment;' *Sax. pinan*, 'to torture.' *Dolor*, *Algos*, *Algéma*, *Alge'do*, *Alge'sis*, *Od'ynè*, (F.) *Douleur*. A disagreeable sensation, which scarcely admits of definition. It is generally symptomatic, and

is called *acute*, (F.) *aiguë*, when very violent; *pruigent*, (F.) *pongitive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight: *tensive*, when the part seems distended: *lan'cinating*, when occurring in shoots: *lac'erating* or *tearing*, when the part seems to be tearing: *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

PAIN, SUN, Hemieriana.

PAIN, see *Triticum*—*p. à Coucou*, *Oxalis acetosella*—*p. de Madagascar*, *Jatropha manihot*—*p. de Pourceau*, *Cyclamen*.

PAINS, AFTER, see *P. labour*.

PAINS, *Labour pains*, *Parturient'is dolores*, *Odis*, *Odis*, *Dolo'res ad partum*, *Torm'ina parturientium*, (F.) *Mal d'Enfant*, *Douleurs*. The uneasy sensations that accompany labour, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*; those which extrude the child, *forcing*. Those which take place in the first days after delivery, and are employed in forcing a way coagula, &c., are termed *Astor pains*, *Dolo'res seu Torm'ina post partum*, *D. puerperarum*, (F.) *Tranchées utérines*.

"To take a pain,"—: "To try a pain,"—is to make an examination *per vaginam*, during labour, to discover its progress, character, &c.

The French term the pains, which precede and announce labour, *mouches*; those which accompany it, *douleurs*; and those which occur immediately afterwards, *tranchées* ou *coliques*.

PAINS, GNAWING, *Dolo'res rodentes*. Pains resembling what might be produced by the gnawing of an animal.

PAINT, from *pingere*, *pinctum*, 'to paint,' (I.) *pinto*, (F.) *point*; *Pigmentum*, *Fucus*, (F.) *Fard*. A name given to different substances, employed for embellishing the complexion or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subnitrate of Bismuth*, (F.) *Blanc de fard*. A spirituous solution of benzoil, precipitated by water, and forming *Virgin's milk*, (F.) *Lait virginal*; the red or rouge of the carthamus; *Spanish white*; the oxides of lead, tin, and mercury, vermilion, red saunders, &c. All paints may be said to be noxious. They injure the skin; obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See *Cosmetic*.

PAINT, INDIAN, *Hydrastis Canadensis*, *Sanguinaria Canadensis*—*p. Yellow*, *Hydrastis Canadensis*.

PALÆSTRA, *Gymnasium*.

PALAIS, *Palate*.

PALATAL, *Palatine*.

PALATE, *Palatum*, *Hypero'a*, *Hyper'um*, *Uranis'eos*, *Roof of the mouth*, *Fossa Palatina*, *Palatum stabilè*, (F.) *Palais*. The upper part of the cavity of the mouth; a kind of parabolic vault, formed by the two superior maxillary bones, and the two palate bones covered with a thick and dense mucous membrane: bounded, before and at the sides, by the superior dental arch; and, behind, by the velum palati. A whitish line runs along the middle, from before to behind; at the anterior extremity of which is a tubercle corresponding to the in-

terior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infra-orbital, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the palatine, facial, infra-orbital, superior dental, and from the naso-palatine ganglion.

PALATE, ARTIFICIAL, (F.) *Obturateur du Palais*. A plate of tortoise shell, silver, &c., used to close a deficiency of the palate.

PALATE BONE, *Os Palati*, *Os Basila're*, (F.) *Os Palatin*, *Os du Palais*, is a small bone of the irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal*;—the other, *superior* and *vertical*. The *horizontal* or *palatine portion*, *Arch of the palate*, is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower forms part of the palatine arch, and contains the inferior orifice of the *posterior palatine canal*. Its *anterior* edge is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the velum palati, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion. The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone*. Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbital process*;—the other posterior, the *sphenoid process*. These two processes are separated by an almost circular notch, which the sphenoid bone forms into a foramen, called the *sphenopalatine*.

This bone appears to be developed from a single point of ossification. It is articulated, with the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

PALATE, CLEFT, see *Harelip*—*p. Falling down of the*, *Uvulitis*—*p. Soft*, *Velum pendulum palati*.

PALATINE, *Pal'atal*, *Palati'nus*, from *palatum*, 'the palate.' Relating or belonging to the palate.

PALATINE OR PALATAL ARTERIES are two in number. They are distinguished into, 1. The *superior palatal* or *palatine*, *Palati'na descendens* or *Palato-maxillary*, which leaves the internal maxillary behind the top of the orbit; descends into the pterygo-maxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The *inferior* or *ascending palatine* or *palatal*, which is very small,

and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

**PALATINE CANALS OR DUCTS.** These are two in number. The anterior, *Ductus incisivi* vel *Naso-lo-palati*, *Incisive canal*, is situated at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called *Foramen incisivum* vel *F. Palatinum anterius*, *F. Alveolarè anterius*, *F. cæcum ossis maxillaris superioris*. The posterior palatine canal is situated at the posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones; and, in its course, gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called, *F. Palati num posterius*, *F. Palato-maxillariè*, *F. Alveolarè posterius*.

**PALATINE MEMBRANE** is the fibro-mucous membrane that lines the palate or roof of the mouth.

**PALATINE OR PALATAL NERVES,** *Gutturopalatins*, (Ch.) are three in number; and arise from the inferior part of the sphenopalatine ganglion. 1. The *great palatine*, *Palatin infèrieur*, (Ch.) is situated anteriorly to the two others, and descends into the posterior palatine canal; gives a *nasal filament* and a *staphylins* filament, and is distributed on the palate. 2. The *middle palatine*, *Guttural*, (Ch.) which arises behind the preceding; enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The *little palatine nerve*, situated still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

**PALATITE**, Isthmitis.

**PALATITIS**, Uranisconitis.

**PALATO-GLOSSUS**, Glosso-staphylinus.

**PALATO-PHARYNGEUS**, *Pharyngo-staphylinus*, *Staphylinopharyngeus*, *Thyro-pharyngo-staphylinus*, part of the *Stylo-pharyngien* (Ch.) *Hyper-pharyngeus*, (F.) *Palatopharyngien*. A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and velum palati. It includes the perystaphylo-pharyngeus, pharyngo-staphylinus, and thyro-staphylinus of Winslow. When the two palato-pharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

**PALATO-PHARYNGIEN**, Palato-pharyngeus—p. Salpingeus, Circumflexus—p. *Salpingien*, Circumflexus.

**PALATOSTAPHYLINI**, see Azygos muscle.

**PALATUM FISSUM**, Hyperoochasma—p. Molle, Velum pendulum palati—p. Pendulum, Velum pendulum palati.

**PALENESS**, *Pallor*, *Och'rotus*, *Ochro'ma*, *Ochri'asis*, *Leuco'asis*, *Dealbat'io*, *Luvor*, (F.) *Paleur*. Whiteness of complexion. It appears

to be owing to a diminution or alteration of the blood circulating in the capillary vessels, and is often a sign of disease.

**PAËLE COULEURS**, Chlorosis.

**PALETTE** (F.), *Pal'mula*, *Per'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed, by Mr. Percy, for what is called the *Massago*, a kind of pressure or kneading, exerted by the hand on the body and limbs to excite the tone of the skin and subjacent tissues.

*Palette* also means a cup for bleeding, and the xiphoid cartilage(?).

**PALETTE À PANSEMENT.** A small splint of thin, scooped wood, having the shape of the hand, and used to support the hand in certain cases—when burnt, for example—in order to prevent the fingers from being deformed by the cicatrices.

**PALETTE DE CABANIS.** An instrument, invented by Cabanis of Geneva to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lachrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

**PALEUR**, Paleness.

**PALILLO**, Campomanesia lineatifolia.

**PALIMPISSA**, see Pinus sylvestris.

**PALINCOTESIS**, Recrudescencia.

**PALINDROME**, Palindromia.

**PALINDROM'IA**, *Palin'dromè*, from *παλι*, 'again,' and *δρομος*, 'a course.' This word signifies, with some, a reflux of fluids from the exterior towards the interior; and, according to others, the relapse of an affection—the recurrence—*Recur'sio*, *Repetit'io*—of a paroxysm or disease,—*Morbus recidi'vus*, *Morbi recur'sus*.

**PALINGENESIA**, Regeneration.

**PALLIATION**, *Palliatio*, from *palliare*, 'to cover, mask;' from *pallium*, 'a mantle.' The act of palliating—that is, of causing the symptoms of a disease to mitigate, without curing it. The medical art can frequently only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is a *palliative treatment*.

**PALLIATIVE**, *Palliati'vus*, *Antipath'ic*, *Enantipath'ic*. A remedy or mode of treatment, which only relieves a disease, without curing it. The *palliative treatment*—*Cura palliati'va*, is placed in antithesis to the radical, *Cura radical'is*; see Radical.

**PALLIDLUS**, *Blasphè*.

**PALLOR**, Paleness.

**PALM**, *Palma*, *Vola*, *V. manûs*, *Plato'a*, *Thenar*, *Agas*, *Agos'tus*, *Poculum*, *Pa't'era*, *Suppellez* seu *Suppellectilè Diog'onis*, (F.) *Paume* on *Croze* de la main. The hollow or inside of the hand. It is limited, *without*, by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which answers to the little finger; *above*, by the wrist-joint; and, *below*, by the four fingers.

**PALMA CHRISTI**, Ricinus communis—p.

Humilis, Musa paradisiaca—p. Unguentariorum, Myrobalanus.

**PALMÆ UTERI Plicatæ**, *Arbor uteri viv'ifcans*. The arborescent strise in the interior of the cervix uteri.

**PALMAIRE CUTANÉ**, *Palmaris brevis*—p. *Grand*, *Palmaris magnus*—p. *Grêle*, *Palmaris longus*—p. *Long*, *Palmaris longus*.

**PALMAR**, *Palmaris*, from *palma*, 'the palm of the hand.' That which concerns the palm of the hand. The palm has, sometimes, been divided into three regions, called *palmar*. 1. The *external palmar region* corresponds to the thenar eminence. 2. The *internal palmar region* is formed by the hypothenar eminence: and, 3. The *middle palmar region* is the hollow of the hand, (F.) *Croix de la main*.

**PALMAR APONEURO'SIS**, *Palmar fasc'ia*. A strong triangular aponeurosis, which arises from the inferior tendon of the *palmaris brevis*, and the anterior annular ligament of the carpus. It covers the whole palm of the hand, and adheres somewhat strongly, to the skin of the part. The *palmar ligaments* are small, very numerous, fibrous fasciæ, which unite the different bones of the carpus and metacarpus.

**PALMAR ARCHES**, (F.) *Arcades ou Crosses palmaires*. The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches:—the one *cubital or superficial*,—*grande Arcade palmaire* of Chaussier, furnishes, at its convexity towards the fingers, the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial, profound, or deep-seated*,—*petite Arcade palmaire* of Chaussier, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts. The palmar veins accompany the corresponding arteries.

**PALMAR ARTERIES**, see *Palmar arches*—p. *Fascia*, P. *aponeurosis*,

**PALMAR MUSCLES**. These are three in number. 1. *Palmaris Magnus*, *Flexor carpi radialis*, *Radialis internus*, *Epitrochlo-metacarpian*, (F.) *Palmaire grand*, *Radial antérieur*. A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand. 2. *Palmaris longus*, *Latescens chordæ*, *Ulnaris grac'ilis*, *Epitrochlocurpi-palmaire*, (F.) *Palmaire long*, P. *grêls*. This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand. 3. *Palmaris brevis*, *Caro quadrata*, *Carpicus*, (F.) *Palmaire cutané*. A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contractions.

**PALMAR VEINS**, see *Palmar arches*.

**PALMARIS BREVIS**, see *Palmar muscles*—p. *Longus*, see *Palmar muscles*—p. *Magnus*, see *Palmar muscles*.

**PALMETTO**, *Saw*, *Chamærops serrata*.

**PALMI-PHALANGIENS**, *Lumbricales manus*.

**PALMISTRY**, *Chiromancy*.

**PALMOSCOPIA**, from *παλμος*, 'palpitation,' and *σκοπιω*, 'I view.' Investigation of the beating of the heart and pulse. Prognosis from the beating of the heart and pulse.

**PALMULA**, *Date*, *Palotto*.

**PALMUS**, *Palpitation*—p. *Cordis*, *Palpitation*—p. *Plumbarius*, *Colic*, *metallic*—p. *Vomitus*, *Vomiting*.

**PALO DE CALENTURAS**, *Calenturas*.

**PALOS DE CALENTURA**, *Cinchona*.

**PALPA'TION**, from (F.) *palper*, to feel. The sense of Touch. It is also used for the mode of exploring disease by feeling or pressing upon the diseased organ.

**PALPEBRA**, supposed to be from *palpitare*, 'to palpitate,' owing to its frequent motion. (?) *Bleph'aron*, *Oper'culum seu Cooper'culum oculi*, *Eyelid*, (F.) *Paupière*. The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies. They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper*, *Epicy'lum*,—and *lower*, *Hypoc'alis*, *Hypoc'ulum*, *Hypoc'ylium*. The former is much broader and more movable than the latter. They are separated by a transverse cleft; and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles,—the innermost being called the *greater angle of the eye*, or *inner or greater canthus*; the other, the *lesser or external angle* or *canthus*. They are formed, 1. Of a thin dermoid texture: 2. Of a muscular membrane,—a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: and 5. Of a mucous membrane,—a part of the tunica conjunctiva.

Their vessels and nerves are called *Palpebral*.

**PALPEBRA INFERIOR EXTRORSUM FLEXA**, *Ectropion*—p. *Tertia*, *Valvula semilunaris*.

**PALPEBRÆ SUPERIORIS PRIMUS**, *Levator palpebræ superioris*.

**PALPEBRAL**, *Palpebra'lis*, from *palpebra*, 'the eyelid.' That which belongs or relates to the eyelid.

**PALPEBRAL ARTERIES** are those distributed to the eyelids. They are two in number; an *upper* and a *lower*. The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle, and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications to the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

**PALPEBRAL FLUX**, *Puriform*. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lachrymalis, in many cases.

**PALPEBRAL LIGAMENTS** are distinguished into *superior* and *inferior*. Some anatomists, with Winslow, have described, under this name, the fibrous layer which is attached,—on the one

hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

**PALPEBRAL NERVES**, *Nerves of the eyelids*, arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; and from the facial, nasal, and infra-orbital branch of the superior maxillary nerve.

**PALPEBRALIS**, Orbicularis palpebrarum.

**PALPEBRARUM APERIENS RECTUS**, Levator palpebræ superioris—p. Duo musculi, Orbiculares palpebrarum.

**PALPEBRATIO**, Nictation.

**PALPITATIO**, Palpitation—p. Arteriarum, see Palpitation—p. Cordis trepidans, Cardiotromus.

**PALPITATIO MEMBRORUM**. A term used by Gaubius for involuntary shaking of the legs.

**PALPITATION**, *Palpitation*, *Palmus*, *P. Cordis*, *Palpitatio* seu *Pulsatio Cordis*, *Tremor Cordis*, *Vibratio Cordis* seu *Cordis*, *Cardiogmus*, *Cardiopalmus*, *Subsultio*, *Closmus Palpitatio*, (F.) *Palpitation*, *P. du Cœur*. A name given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual, than ordinarily. Palpitations occur in a number of affections. They are, sometimes, owing to organic diseases of the heart, hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

**PALPITATION** is sometimes felt in the arteries, constituting *Palpitatione Arteriosæ*.

**PALPITATION DU CŒUR**, Palpitation.

**PALSY**, Paralysis—p. Bell's, Paralysis, Bell's.

**PALSY, LEAD**, *Paralysis saturnina*, *P. metallica*, (F.) *Paralysis saturnina*, *Metallica palsy*. The paralysis of the upper extremities especially, induced by the poison of lead.

**PALSY, METALLIC**, see Palsy, lead—p. Shaking, Paralysis agitans—p. Trembling, Paralysis agitans.

**PALTA**, Persea gatissima.

**PALUDAL**, Elodes.

**PALUDAPIUM**, Apium graveolens.

**PALUDOSUS**, Elodes.

**PALUS**, Marsh, Penis—p. Sanctus, Guaiacum.

**PAMBIOMA**, Panbioma.

**PAMOISON**, Syncope.

**PAMPINIFORM PLEXUS**, Corpus pampiniforme.

**PAMPINIFORME CORPUS**, see Corpus pampiniforme.

**PAMPLE'GIA**, *Pamplagia*; from *πᾶν*, 'all,' and *πληγῆ*, 'I strike.' General paralysis. Palsy of the whole body.

**PANACE'A**, *Catholicon*, *Catholicum*, from *πᾶν*, 'all,' and *εὐσοπία*, 'I cure;' *Universale remedium*, *Panchrestos*. A pretended universal remedy. There is no such thing in existence.

**PANACEA DUCIS HOLSATIÆ**, Potassæ sulphas—p. Duplicata, Potassæ sulphas—p. Lapsorum, Arnica montana—p. Mercurialis, Hydrargyri submurias—p. Mercurii rubri, Hydrargyri nitrico-oxidum—p. Pectoris, Glechoma hederacea—p. Vegetabilis, Crocus.

**PANA'DA**. Diminutive of Ital. *Pane*, 'bread,' (Lat. *Panis*.) *Pana'ta*, *Panato'la*. Bread, boiled in water to the consistence of pap. Sometimes administered to the sick.

**PANARIS**, Paronychia.

**PANARITIUM**, Paronychia.

**PANARIUM**, Paronychia.

**PANATA**, Panada.

**PANATELLA**, Panada.

**PANAX COSTINUM**, *Pastinaca opoponax*—p. *Heraclium*, *Pastinaca opoponax*—p. *Pastinacea*, *Pastinaca opoponax*.

**PANAX QUINQUEFOLIUM**, *Aurelia'na Canadensis*, *Aralia Canadensis*, *Ginseng*, *Niusing*, *Gensang*, *Redberry*, *Five-fingers*. *Family*, *Araliaceæ*. *Sez. Syst.* *Polyandria Monœcia*. This plant grows in Tartary and North America. The root is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish yellow-colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

**PANBIOMA**, *Pambio'ma*, from *πᾶν*, 'all,' and *βίος*, 'life.' The original animating principle. The general principle of life.

**PANCHRESTOS**, Panacea.

**PANCHYMAGO'GUM**, *Pantago'gon*, from *πᾶν*, 'all,' *χυμός*, 'juice,' and *αγω*, 'I drive away.' A medicine which the ancients believed capable of purging away all sorts of humours.

**PANCHMAGOGUM MINERALE**, *Hydrargyri submurias*.

**PANCŒNOSUS**, Pandemic.

**PANCENUS (MORBUS)**, Pandemic.

**PANCRATIUM**, Pancreas.

**PANCREAS**, from *πᾶν*, 'all,' and *πῆμα*, 'flesh;' i. e. 'quite fleshy;' *Callicreas*, *Pancreatium*, *Pan'creum*, *Lactes*, *Pulvi'nar vœtricuti*, *Totum carno'sum*, *Gland'ula saliv'alis abdom'inis*, *Pancro'nê*. A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the *tail* of the pancreas; it is smaller than the right, which is called the *head*. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow, and some others, the *lesser pancreas*, (F.) *Petit pancreas*, *Pancroas of Aselli*, *Pancroas minus*. The pancreas resembles the salivary glands in structure, and has been called the *Abdominal Salivary Gland*. It is composed of lobes and granulated lobules, distinct and united by cellular tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and united like veins. The duct itself, *Ductus Pancreat'icus*, *Canal or Duct of Wirsung* or *Wirsunge*, (F.) *Canal pancreat'ique*, proceeds in a serpentine course through the substance of the organ; and when it has reached behind the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arterias* are very numerous and small. They proceed from the cœliac, splenic, superior mesenteric, right gastro-epiploic, coronaria ventriculi, and left capsular. Its *veins* open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its *nerves* emanate from the solar plexus, and its lymphatics pass into ganglions, to which it

gives its name. The pancreas secretes the *Pancreatic juice*, *Succus seu Liquor Pancreaticus*, *Lympha Pancreatica*, which resembles the saliva.

PANCREAS OF ASELLI, see Pancreas—p. Minus, see Pancreas—p. Petit, see Pancreas—p. Second, Brunner's glands.

PANCREAT'ALGIA; from *παγκρῆσας*, 'the pancreas,' and *άλγος*, 'pain.' Pain or disease of the pancreas.

PANCREATEMPHRAXIS, from *παγκρῆσας*, 'the pancreas,' and *μφρασσω*, 'I obstruct.' Obstruction of the pancreas.

PANCREATIC ARTERIES, see Pancreas—p. Duct, see Pancreas—p. Juice, see Pancreas—p. Nerves, see Pancreas—p. Veins, see Pancreas.

PANCREAT'IC SARCO'MA OF AB'ERNETHEY, *Emphy'ma sarco'ma pancreat'icum*. A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the cellular substance; but, more usually, in lymphatic glands, chiefly in the female breast.

PANCREATITIS, *Inflammat'io pancreat'is*, (F.) *Inflammation du Pancreas*. Inflammation of the pancreas;—an affection, the phenomena of which are not well known.

PANCREATOID, from *παγκρῆσας*, 'the pancreas,' and *ειδος*, 'appearance;' *Pancreatoides*. A tumour resembling the pancreas in structure.

PANCREATON'CUS; from *παγκρῆσας*, 'the pancreas,' and *οψος*, 'a swelling.' Tumour of the pancreas.

PANCRENE, Pancreas.

PANCREUM, Pancreas.

PANDA'LEA, *Panda'leum*. A kind of lozenge used by the Arabian physicians.

PANDALEUM, Pandalea.

PANDALITIUM, Paronychia.

PANDEMIA, Pandemic.

PANDEMIC, *Pan'demy*, *Pande'mia*, *Morbus Pandemicus* seu *Pande'mus* seu *Panco'nus*, *Panco'norus*, (F.) *Pandémio*; from *παν*, 'all,' and *δημος*, 'people.' An epidemic which attacks the whole population.

PANDE'MIE, Pandemic.

PANDEMY, Pandemic.

PANDICUL'ATION, *Pandicula'tio*, *Scordine'ma*, *Scordinis'mus*, *Clonus Pandicula'tio*, from *pandero*, 'to stretch out;' *Stretching*, *Hal'ices*, (Pl.) An action which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles is in some measure independent of the will, and is accompanied with yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is also observed at the onset of certain paroxysms of fever, hysteria, &c.

PANDOCE'UM, *Pandochi'um*, *Pandoc'i'um*; from *παν*, 'all,' and *δεχομαι*, 'to receive.' An inn that receives all classes. A general hospital, or one that admits all cases.

PANDOCHIUM, Pandoceum.

PANDOCIUM, Pandoceum.

PANHIDRO'SIS; from *παν*, 'all,' and *ιδρωσις*, 'sweating;' *Sudor universa'lis*. Sweating over the whole body.

PANICAUT, *Eryngium campestre*—p. *Martima*, *Eryngium maritimum*.

PANICUM ITAL'ICUM, *Italian Panic Grass*, *Indian Millet*, *Guinea Corn*, *Barbadoes Millet*, *Mil'ium Ind'icum*, *Sorghum*, *Holcus Sorghum*, (F.) *Millet des oiseaux*. *Nat. Ord.* Gramineæ. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in soups, and made into a variety of forms for the table.

PANICUM MILIA'CEUM, *Common Millet*, *Milium*, *Cenchrion*, *Cenchrus*, (F.) *Millet ordinaire*. Millet seed are esteemed a nutritious article of diet, and are often made into puddings.

PANIS CANICACEUS, see Canicæ—p. *Cibarius seu secundarius*, *Porcicomistos*—p. *Cuculi*, *Oxalis acetosella*—p. *Porcinus*, *Cyclamen*.

PANNI, Swathing clothes.

PANNICULE CHARNU, *Panniculus carnosus*.

PANNIC'ULUS. Diminutive of *Pannus*, cloth. A piece of fine cloth. *Pterygion*.

PANNICULUS ADIPOSUS, Cellular membrane.

PANNICULUS CARNO'SUS, *Tu'nica carnosae*, *Muscular Web*, *Mantle*, (F.) *Panniculus charnuus*, is a general covering found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body,—as in the forehead, where it is formed by the occipitofrontalis; in the neck, by the platysma myoides; and, in the scrotum, by the cremaster muscle.

PANNICULUS CORDIS, Pericardium—p. *Hymenæus*, *Hymen*—p. *Virginalis*, *Hymen*.

PANNUS. A piece of cloth. This word has several other meanings many of which are equivocal. It means a tent for a wound, and also, an irregular nœvus or mark on the skin.—Castelli. Modern ophthalmologists apply it to an opaque and vascular condition of the anterior membrane of the cornea, almost invariably produced by the continuance of purulent or strumous ophthalmia, or by chronic inflammation of the cornea. This part becomes nebulous, covered with red vessels, and opaque. At times, the sclerotic conjunctiva undergoes a similar change to that which occurs in the corneal portion.

PANNUS HEPATICUS, Chloasma—p. *Lenticularis*, *Ephelides*.

PANOCHIA, Bubo.

PANOPHO'BIA, *Pantopho'bia*, *Pavopho'bia*, *Athym'ia*, *Pavor*, (F.) *Fragor nocturne*, *Sonci*, from *Παν*, 'the god Pan,' and *φοβος*, 'fear.' A panic or fear inspired by the god Pan, according to the opinion of the ancients. Some derive it from *παν*, 'all,' and *φοβος*, 'fear.' This is sometimes morbid, and is a symptom of melancholy.

PANOPHTHALMITIS, from *παν*, 'all,' and *ophthalmitis*; 'inflammation of the eye.' Inflammation of the whole eye.

PANPLEGIA, Pamplegia.

PANSCLERO'SIS; from *παν*, 'all,' and *σκληρωσις*, 'hardness.' Complete induration of a part.

PANSEMENT, Dressing.

PANSIES, *Viola tricolor*.

PANSPERM'IA, from *παν*, 'all,' and *σπερμα*, 'sperm.' The theory of *Dissemination of Germs*, according to which, ova or germs are dissemi-

nated over all space, undergoing development under favourable circumstances.

PANTAGOGON, Panchymagogom.

PANTANENCEPHALIA, from παν, παντα, 'all,' and anencephalia, absence of brain. Entire absence of brain—the same as anencephalia.—G. St. Hilaire.

PANTATROPHIA, from παν, 'all,' and ατροφία, 'atrophy.' Universal atrophy.

PANTICES, Intestine.

PANTING, Anhelatio.

PANTOGANGLIITIS, Cholera.

PANTOPHAGUS, Omnivorous.

PANTOPHOBIA, Hydrophobia, Panophobia.

PANTOZOOTIA, Panzootia.

PANUS, Phygethlon—p. Faucium, Stomatoanus—p. Inguinalis, Bubo.

PANZOÏTIA, *Pantozootia*; from παν, 'all,' and ζωον, 'animal.' An endemic or epidemic disease affecting animals generally.

PAP, Nipple—p. of the Throat, Uvula.

PAPAS AMERICANUS, Solanum tuberosum.

PAPAVER, *P. somniferum*, *Mecon*. The *White Poppy*, *Papaver sativum*, (F.) *Pavot des Jardins*. Family Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. THE CAPSULE OF THE WHITE POPPY, *Co dia, rodia* or *rodica*, *Scarphion*, *Papaveris Caput* vel *Cap'sula*, *Mecon*, *Poppy-head*, is used in fomentation, as an anodyne and relaxant, to inflamed or ulcerated parts. The expressed oil of the seeds is called by the French *Huile d'Esillets*. It is from the poppy that we procure OPIUM,—called, also, *Opium Thebaicum*, *Meconium*, *Opion*, *Manus Dei*, *Affion*, *Amphiam*, *Afium*, *Osoron*, *Lav'danum*, *Mecon*, *Sopia*. It is the milky juice obtained after the flowering of the plant, by making longitudinal incisions in the capsules and stalks. It is commonly obtained from the Levant or India, where the poppy grows abundantly. Opium is a compound of morphia, narcotina, meconic acid, codeia, narcein, meconin, caoutchouc, secula, resin, oil, and several other substances. *Turkey Opium* is of a heavy and slightly fetid odour. Its taste is nauseous, bitter, acrid, and warm: it is in flat pieces; solid and tenacious; of a dark brown colour, and yellowish when powdered; making a light brown, interrupted streak on paper. In *East India Opium*, the odour is the same, and empyreumatic; the taste is less bitter, but more nauseous, and the colour darker. The varieties of opium known in commerce are the *Smyrna*, the *Constantinople*, the *Egyptian*, the *Persian*, and the *Indian*. Opium is stimulant in small doses; sedative, in large; narcotic and anodyne; operating through the nervous system. It is a most valuable remedy in all painful affections, and inflammations, when given so as to produce its full, sedative effects, especially in peritonitis. In diarrhœa and dysentery, it acts as an astringent; in intermittents, it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial; in larger, it allays irritation and produces sleep. When applied externally, its narcotic effects are developed: and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose, gr. ʒ to ʒ as a stimulant; gr. j to iv as a sedative.

PAPAVER CEREALE, *P. rhœas*—p. Corniculatum, *Chelidonium majus*—p. Erraticum, *P. rhœas*—p. Luteum, *Chelidonium majus*.

PAPAVER NIGRUM. This is merely a variety of the white poppy, producing black seeds.

PAPAVER RHÆAS. The systematic and pharmacopœial name of the *Red corn-poppy*, *Charn rose*, *Papaver erraticum*, *P. cereale*, *P. rubrum*, *Rhœas*, (F.) *Coquelicot*. The heads of this species, also, contain a milky juice of a narcotic quality. A syrup of its flowers has been directed, which has been esteemed diaphoretic and slightly soothing; but is more admired for its colour than for any other property.

PAPAVERCULUM, Meconium.

PAPAW TREE, *Carica papaya*.

PAPAYER, *Carica papaya*.

PAPIER ÉPISPASTIQUE, Sparadrapum vesicatorium.

PAPILLÆ A, *P. Mammæ*, *Thele*:—diminutive, perhaps, from *papa*, one of the earliest cries of the infant, ascribed to a craving for food. The end of the breast, the nipple. An eminence similar to a nipple. A name given to small eminences more or less prominent, at the surface of several parts, particularly of the skin and mucous membranes, in which latter situation they are also called villi. See Villous. They appear formed by the ultimate expansion of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papillæ nervosæ* seu *Nervosæ*, *P. Pyramidales*, *Nervous papillæ*, (F.) *Papilles* ou *Papilles nerveuses*, *Houppes nerveuses*.

PAPILLA LACHRYMALIS, see Lachrymal puncta—p. Mammæ, *Papilla*.

PAPILLÆ CALYCIFORMES, see *Papillæ* of the tongue—p. *Capitata*, see *Papillæ* of the tongue—p. *Circumvallatæ*, see *Papillæ* of the tongue—p. *Conical*, see *Papillæ* of the tongue—p. *Conoidal*, see *Papillæ* of the tongue—p. *Filiform*, see *Papillæ* of the tongue—p. *Fungiform*, see *Papillæ* of the tongue—p. *Fungoid*, see *Papillæ* of the tongue.

PAPILLÆ OF THE KIDNEY, (F.) *Mamelons du rein*, are the projections into the pelvis of the kidney of the apices of the cones of the tubular substance of the organ. They are also called *Processus mamillares*, *Caruncula papillares*, *Pyramides Malpighiæ*, *Papillæ renum*.

PAPILLÆ, LENTICULAR, see *Papillæ* of the tongue—p. *Maximæ*, see *Papillæ* of the tongue—p. *Mediæ*, see *Papillæ* of the tongue—p. *Minimæ*, see *Papillæ* of the tongue—p. *Mucosæ*, see *Papillæ* of the tongue—p. *Nervosæ*, see *Papillæ*—p. *Nervous*, see *Papilla*—p. *Pyramidal*, see *Papillæ* of the tongue—p. *Pyramidales*, see *Papilla*—p. *Renum*, see *Papillæ* of the kidney—p. *Semilenticulares*, see *Papillæ* of the tongue.

PAPILLÆ OF THE TONGUE are very numerous and marked. They are observed, particularly, at the upper surface of the organ, and are distinguished into—1. The *Lenticular papillæ*, *Papillæ mucosæ*, *P. maximæ*, *P. capitata*, *P. vallata*, *P. circumvallata*, *P. truncata*, *P. calyciformes*. They are arranged at the base of the tongue in two oblique lines having the shape of the letter V; and united angularly at the foramen cœcum. They have, in general, an ovoid or spherical shape, and are merely mucous follicles similar to those of the palate, lips, &c. 2. The *Fungiform* or *Fungoid papillæ*, *Papillæ medice*, *P. Semilenticulares*, are of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point

of the tongue; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. Of their real nature we are ignorant. 3. The *Conical*, *Conoid* or *Pyramidal papilla*, *P. min'ima*, *P. villosa*, are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones; the base being towards the tongue and the apex free. The anterior are very small, and have been called *Filiform papilla*. They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

**PAPILLÆ TRUNCATÆ**, see *Papillæ* of the tongue—*p. Vallatæ*, see *Papillæ* of the tongue—*p. Villosæ*, see *Papillæ* of the tongue.

**PAPILLARY BODY**, *Corpus papillare*.

**PAPILLI-AUT-MAMMILLI-FORMIS**, *Mastoid*.

**PAPOOSE ROOT**, *Caulophyllum thalictroides*.

**PAPULA**. A *pimple*, *Exor'nia*, (F.) *Bouton*, *Bourgeon*. A small, acuminated elevation of the cuticle, with an inflamed base; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation.

*Papula* form the first order of Willan and Bateman's arrangement of cutaneous diseases.

**PAPULA AGRIA**, *Lichen agrius*—*p. Fera*, *Herpes exedens*—*p. Miliaris*, *Miliary fever*.

**PAPULÆ**, *Lichen*—*p. Sicca*, *Lichen*—*p. Sudoris*, *Miliary fever*—*p. Sudorales*, *Sudamina*.

**PAPPUS AMERICANUS**, *Solanum tuberosum*.

**PAQUERETTE VIVACE**, *Bellis*.

**PAR NERVO'RUM**, *Syz'gi nervo'rum*. A pair of nerves.

**PAR OPTICUM NERVORUM**, *Optic nerve*—*p. Primum nervorum cerebri*, *Olfactory nerves*—*p. Quintum nervorum cerebralium*, *Trigeminum*—*p. Secundum nervorum*, *Optic nerve*—*p. Septimum sive faciale*, *Facial nerve*—*p. Trigemimum*, *Trigeminum*—*p. Trium funiculorum*, *Trigeminum*—*p. Vagus*, *Pneumogastric*—*p. Visorius*, *Optic nerve*.

**PARA**, *para*, a common prefix, 'by, near, contrary to, through,' (*per*); 'above and beyond,' (*ultra*): 'besides,' (*prætor*). In certain terms, as in *Paracosis*, *Parapsis*, *Parabysma*, &c., used by Dr. Good, *para* means a defective or morbid condition.

**PARABAL'ANUS**, from *παράβαλλειν*, (*para*, and *ballai*, 'to cast,') 'to expose one-self.' A name given, by the ancients, to a person who devoted himself to the service of the sick in hospitals; and particularly during epidemics and the plague.

**PARABYS'MA**, from *παρά*, and *βυσιν*, 'to stuff.' Infarction or engorgement of an organ—as *Parabysma Lienis*, *Engorgement of the spleen*.

**PARABYSMA MÉSÉNTÉRICUM**, *Tabes mesenterica*.

**PARABYS'TIA**, same etymon. Engorgement or infarction of an organ with blood.

**PARACELSIS'TA**, *Paracel'sist*; from *Paracelsus*. A follower of Paracelsus.

**PARACELSISTICA MEDICINA**, see *Spagyrista*.

**PARACENTE'RIMUM**. Same etymon as the next. Woolhouse has given this appellation to a small trocar, employed by Nuck for puncturing the eye in cases of dropsy of that organ.

**PARACENTE'SIS**, *Perforatio*, *Punctio*, *Punctu'ra*, *Cenobates'is*, *Centis'is*, *Compunctio*: from *παράειρον*, (*para*, and *ειρω*, 'I pierce,') 'I pierce through.' *Pancture*. The operation of *tapping* to evacuate the collected fluid in ascites, ovarial dropsy, &c.

**PARACENTESIS**, *Puncturing*—*p. Thoracis*, *Thoracentesis*.

**PARACENTETERION**, *Trocar*.

**PARACENTICION**, *Trocar*.

**PARACHRŒ'A**, from *παρά*, and *χρῶα*, 'colour.' Morbid change of colour of the surface, especially of the face.

**PARACHROMA**, *Achromatopsia*.

**PARACHROSIS**, *Decoloration*.

**PARACINE'SES**, (G.) *Parakinæsiën*, from *παρά*, 'defective,' and *κίνησις*, 'motion.' Diseases of the motor nerves; morbid movements of voluntary muscles.

**PARACMASIS**, *Decline*.

**PARACMAS'TIC**, *Paracmas'ticus*, from *παρῆματις*, 'I decrease.' Decreasing. An epithet for a distemper, which gradually decreases. Also, according to Galen, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old,—a definition that would not suit us at the present day.—Gorræus, and Castelli.

**PARACMASTICOS**, see *Acmasticos*.

**PARACME**, *Decline*.

**PARACOE**, see *Cophosis*, *Paracosis*.

**PARACŒPE**, *Paraph'ora*, *Paracrū'sis*, from *παράπειρω*, 'I strike falsely.' *Delirium*. In Hippocrates, it means the slight delirium which sometimes occurs in febrile diseases.

**PARACOUSIA**, see *Cophosis*.

**PARACRISIS**, (G.) *Parakri'sis*: from *παρά*, 'defective, morbid,' and *κρίσις*, 'secretion.' Diseases of the secretory function.—Fuchs.

**PARACRUSIS**, *Paracoe*.

**PARACUSIS**, *Cophosis*. Also, *perverted audition*.

**PARACUSIS ACRIS**, *Auditus ac'rior*, *Paracū'sis oxycoia*, from *παρά*, 'defective,' and *ακρῶσις*, 'the act of hearing.' The hearing painfully acute, and intolerant of the lowest sounds; a symptom in otalgia, epilepsy, cephalitis, and febrile affections.

**PARACUSIS DUPLICATA**, *Double hearing*—*p. Imaginaria*, *Tinnitus aurium*—*p. Imperfecta*, *Double hearing*, *P. perversa*—*p. Obtusa*, *Barycoia*—*p. Oxycoia*, *P. acris*.

**PARACUSIS PERVER'SA**, *P. Willisiana*, *P. imperfecta*, *Perverse hearing*. The ear only sensible to articulate sounds, when excited by other and louder sounds intermixed with them—Good.

**PARACUSIS SURDITAS**, see *Cophosis*—*p. Willisiana*, *Paracosis perversa*.

**PARACYCLE'SES**, (G.) *Paraklyklesen*, from *παρά*, 'defective, morbid,' and *κύκλισις*, 'circulation.' Diseases of the blood as regards its distribution and motion.—Fuchs.

**PARACYESIS**, *Pregnancy*, *morbid*, *Pregnancy*, *pretermatural*—*p. Abortus*, *Abortion*—*p. Tubaria*, *Salpingo-cyesis*.

**PARACYNAN'CHÈ**, (*para* and *cynanche*.) *Inflammation of the external muscles of the larynx*. According to others, a slight *cynanche*.

**PARÆSTHESIA**, *Paresthesis*—*p. Olfactoria*, *Parosmia*.

**PARÆSTHESIS**, *Paresthesis*—*p. Auditus flacca*, *Proptoma auricularum*.

PARÆTHENAR, Parathenar.

PARAGEUSIS, Ageusia. Also, perversion of taste, *Parageusia*, *Parageusia*, *Allotriogusia*, *Gustus depravatus*.

PARAGEUSTIA, Parageusis.

PARAGLOSSA, *Paraglossis*, from *παρὰ*, and *γλῶσσα*, 'the tongue;?' Swelling of the tongue; *Dysphagia Linguosa*, *Glossomegitus*, *Macroglossa*, *Prolapsus linguae*. Sauvages, under the term *Paraglossa deglutitoria*, means a pretended doubling of the tongue into the pharynx, (F.) *Renversement de la langue*. See Glossocèle.

PARAGOGE, Abduction, Coaptation.

PARAGOMPHOSIS, *Paragomphosis capitis*, from *παρὰ*, 'by;,' 'near;,' and *γομφῶσι*, 'a nailing.' Incomplete wedging of the head of the child in the pelvis during labour.

PARAKINESIEN, Paracineses.

PARAKRISIEN, Paracrieses.

PARAKYKLESEN, Paracycleses.

PARALALIA, Mogilalia—p. Nasalis, Rhinophonia.

PARALAMP'SIS, *παλαμπικ*, from *παρὰ* and *λαμπῶ*, 'I shine;,' 'I shine at the side of;,' *Macula cornea margaritacea*, *Perla*. A cicatrix on the transparent part of the eye.—Hippocrates.

PARALEREMA, Delirium.

PARALLAGE, Insanity.

PARALLAGMA, *Chevauchement*.

PARALLAXIS, *Chevauchement*, Insanity.

PARALLE'LA. A kind of scurfy, cutaneous eruption, affecting the palms of the hands, in parallel lines, and symptomatic of the venereal disease.—Forestus.

PARALLELISM OF DISEASES, Idiopathia.

PARALOGIA, Delirium.

PARALOPH'IA, from *παρὰ*, 'near;,' and *λοφία*, 'the first vertebra of the back.' The lower and lateral part of the neck, near the vertebrae.—Keil.

PARALYSIE, Paralysis—p. *Saturnino*, Palsy, lead.

PARALYSIS, *Par'asis*, *Resolutio membrorum*, *R. nervorum*, *Curus paralysis*, *Catalysis*, (F.) *Paralysis*, *Résolution des membres*; *Palsy*, from *παρὰ*, and *λυω*, 'I loosen;,' 'I relax.' Abolition or great diminution of the voluntary motions, and sometimes of sensation, in one or more parts of the body.

Palsy is said to be *local*, when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemiplegia* or *Paraplegia*. It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy. The immediate cause is, generally, pressure either by blood effused, or by serum, or by vascular turgescence. At its onset, therefore, blood-letting may be advisable; but, afterwards, the disease becomes one of nervous debility, and requires stimulants—to the paralyzed parts, or to the mucous membranes,—frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

PARALYSIS, *Primula veris*.

PARALYSIS AG'ITANS, *P. tremula*, *Synclonus ballismus*, *Scelotyrhè festinans*, *Tremor*, *Tremor*, *Shaking Palsy*, *Trembling Palsy*. A variety of tremor, in which the muscles are in a perpetual alternation of contraction and relaxation.

PARALYSIS, BELL'S, *Bell's Palsy*, *Paralysis facialis*, *Trismus diastrophè Sauvage'sii*, *Diastrophè Gale'ni*, *Hemiplegia facialis*, *Oris tortura paralytica Linnæi*, *Hemiprosoplegia*. The paralysis of the face induced by a lesion of the portio dura, has been called Bell's Palsy, owing to Sir Charles Bell having been one of the first to investigate it minutely.

PARALYSIS BERIBERIA, Beriberi—p. *Facialis*, *Paralysis*, Bell's—p. *Hemiplegia*, *Hemiplegia*—p. *Lingue*, *Glossolysis*—p. *Medullaris*, *Paraplegia*—p. *Metallica*, *Palsy*, lead—p. from *Poisons*, p. *Venenata*—p. *Rachialgia*, *Colic*, *metallic*—p. *Saturnine*, *Palsy*, lead—p. *Scorbatica*, *Pellagra*—p. *Spinalis*, *Paraplegia*—p. *Tremula*, *Paralysis agitans*.

PARALYSIS VENENATA, *Paralysis e venenis*, *Paralysis from poisons*. Paralysis, the result of poisonous substances—as of lead, mercury, arsenic, ergot, &c.

PARALYSIS E VENENIS, P. *Venenata*.

PARALYTIC, *Paralyticus*; same etymon. Affected with paralysis.

PARALYTIC STROKE, see *Stroke*, *paralytic*.

PARAMENIA, *παρὰμηνια*, from *παρὰ*, 'badly;,' and *μην*, 'a month;,' *Menstruatio anomala*, *Menses anomala*, *Mis-menstruation*. Difficult menstruation. Disordered menstruation.

PARAMENIA DIFFICILIS, *Dysmenorrhœa*—p. *Erroris*, *Menstruation*, *vicarious*—p. *Obstructionis*, see *Amenorrhœa*—p. *Profusa*, *Menorrhagia*—p. *Superflua*, *Menorrhagia*.

PARAME'RIA, *παρὰμηνια*, from *παρὰ*, 'about;,' and *μηρός*, 'the thigh.' The internal parts of the thigh.

PARAMESOS, *Annular finger*, see *Digitus*.

PARANEPHRI'TIS, from *παρὰ*, and *νεφριτις*, 'inflammation of the kidney.' Inflammation of the renal capsules, *Inflammatio renum succenturiatorum*.

PARANCEA, *Delirium*, *Dementia*.

PARANYMPHUS, from *παρὰ*, 'near;,' and *νυμφη*, 'a young spouse;,' 'a bride.' A name given by the ancients to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine, to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidate were described.

PARAPATHIA, *Pathomania*.

PARAPECHYON, *Radius*.

PARAPHIA, *Parapsis*.

PARAPHIMOSIS, *Periphimosis*, *Circumligatura*, *Phimosi circumligata*, *Penis lipodermosa*, from *παρὰ*, 'about;,' and *φίμωσις*, 'I bridle.' Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c. In paraphimosis, the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangulates the part, causes it to swell and inflame, and even to become gangrenous. Attempts must be made to bring back the pre-

puce. These excite considerable pain, yet they must be persevered in for some time; and should they not succeed, the rings, formed by the tumefied prepuce, must be cut transversely, and the antiphlogistic treatment be adopted.

PARAPHOBIA, Hydrophobia.

PARAPHON'IA, from *παφα*, and *φωνη*, 'the voice.' Affection of the voice, when its character or *timbre* is less agreeable.

PARAPHONIA CLANGENS, Oxyphonia—p. Gutturalis, Asaphia—p. Nasalis, Rhinophonia—p. Puberum, Hirquitalitas—p. Rauca, Raucedo—p. Ulcerosa, Oxyphonia.

PARAPHORA, Delirium, Paracope.

PARAPHRENESIS, Paraphrenitis—p. Diaphragmatica, Diaphragmitis.

PARAPHREN'IS, Insanity.

PARAPHRENIT'IS, from *παφα*, 'near,' and *φρεν*, 'the diaphragm;' *Paraphrenesis*. A name given to inflammation of the diaphragm, (see Diaphragmitis,) which was supposed always to produce delirium—as well as to the delirium itself, accompanying that affection.—See Phrenitis.

PARAPHROSYNE, Delirium.

PARAPHROTES, Delirium.

PARAPLASTIC: *Paraplasticus*, from *παφα*, and *πλαστικός*, 'formative.' Possessed of depraved formative powers.—as Carcinoma, Encephaloma, Melanosis, &c.

PARAPLE'GIA, *Paraplexia*, *Rachio-paralyxis*, *Rhachioptlexia*, *Rhachio-paralyxis*, *Paralyxis spinalis*, *P. medullaris*, *Carus paralyxis paraplegia*, from *παπα*, dim. participle, and *πληρω*, 'I strike.' Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebro-spinal axis; especially of the spinal portion. The ancients sometimes used the term for incomplete apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia*,—using the former for *partial apoplexy*—the latter for *general or complete apoplexy*.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, Paraplegia.

PARAPOPLEXY, *Parapoplexia*, from *παφα*, dim., and *αποπληξια*, 'apoplexy.' False apoplexy; a soporous state, resembling apoplexy; and especially that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, *Paraphia*, from *παφα*, 'defectively,' and *απρωμα*, 'I touch.' Sense of touch or general feeling vitiated or lost.—Good.

PARAP'SIS ACRES TENERITUDO, Soreness—p. Expers, Torpor. Anæsthesia—p. Illusoria, Pseudæsthesia—p. Pruritus, Itching.

PARARMA, Fimbria.

PARARRHYTHMICUS, Pararrhythmus.

PARARRHYTHMUS, *Pararrhythmicus*, from *παφα*, 'dim.,' and *ρυθμος*, 'rhythm.' An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, *Pararthroma*, *Pararthrosis*, *Pararthrosis*, *Paractasis*, *Parastrop-sis*, from *παφα*, and *αρθρον*, 'a joint.' Incomplete luxation; subluxation.

PARASCEPASTRA, from *παφα*, and *κενω*, 'I cover.' A cap or bandage, which covers the whole head.—Galen.

PARASCEUE, Apparatus.

PARASCHIDES, from *παφα*, and *σχιζω*, 'I

cleave.' Fragments or splinters of a broken bone.

PARASITE, *Parasitus*, from *πασι*, 'near,' and *σιτος*, 'corn,' 'food.' Parasites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant;—the louse a parasitic animal. The chief parasitic animals are the *Pediculus humanus corporis*, *P. capitis*, *P. pubis*, *Pulex irritans*, *P. penetrans*, and the *Acarus Scabiei*.

PARASIT'IC, *Parasiticus*, *Parasitoid*, *Parasitoides*. Same etymon. Having the nature of, or resembling a parasite, as 'parasitic growths,' tubercles, cancer, &c., for example.

PARASITICIDE, Antiparasitic.

PARASITISMUS INTESTINALIS, Helminthiasis—p. Superficies, Malis.

PARASITOID, Parasitic.

PARASPA'DIA, from *παφα*, and *σπασω*, 'I draw.' A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadiaus* and *Paraspadias*.

PARASPADIÆUS, see Paraspadia.

PARASPHAGIS, from *παφα*, 'near,' and *σφαγω*, 'the throat.' The part of the neck contiguous to the clavicles.

PARASTATA, *Parastates*, from *πασιστημι*, (*πασι*, and *στημι*), 'I stand near.' The prostate. In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Varicose parastata* to distinguish them from *glandulosa parastata* or *prostate*. Rufus of Ephesus called the Tube Fallopiæ *Parastata varicose*.

PARASTATA ADENOIDES, Prostate—p. Glandula, Prostate—p. Glandulosa, Prostate.

PARASTATES, Parastata.

PARASTATIT'IS, *Epididymitis*; from *parastata*, 'epididymis,' and *itis*, denoting inflammation. Inflammation of the epididymis.

PARASTREM'MA, *Parastrophé*, from *παροστρεφω*, (*παφα*, and *στρεφω*, 'I turn,' 'I distort or pervert.' Convulsive distortion especially of the face, the soft parts being drawn laterally.

PARASTREPSIS, Pararthrema.

PARASTROPHE, Parastremma.

PARASYNANCHE, Cynanche parotidea.

PARASYSTOLE, Acinesia.

PARATH'ENAR, *Parathenar*, from *παφα*, 'near,' and *θηνα*, 'the sole of the foot.' Winslow called *grand parathénar*, *parathénar major*, a portion of the abductor of the little toe, *musculus scandularius*; and *petit parathénar*, *parathénar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis—p. Minor, Flexor brevis minimi digiti pedis.

PARATHROMA, Elongatio.

PARATONIA, see Spasm.

PARATOPIA, Luxation.

PARATOPIÆ; from *παφα*, in the sense of change, and *τοπος*, 'place.' Diseases, in which organs are removed from their proper position. See Ectopia.

PARATRIMMA, Chafing.

PARATROPE, Apotrope.

PARATROPHY, *Paratrophé*, *Paratrophia*, from *παφα*, 'dim,' and *τροφη*, 'nourishment.' Misnutrition.

PARDALIANCHES, Aconitum.

PARDALIANCHUM, Aconitum.

PARECTAMA, *Parectasis*, from *παρα*, 'beyond,' *εκ*, 'out of,' and *τετα*, 'I stretch.' Immoderate extension or dilatation of a part—as of the heart.

PARECTASIS, Parathrema, Parectama.

PAREGORIC, *Paregoricus*, *So'pions*, from *παρηγοειν* (*παγα*, and *σογειν*), 'I soothe, I calm.' That which soothes or assuages—as paregoric elixir. An anodyne.

PAREIA, Gena.

PAREIRA, see P. brava.

PAREIRA BRAVA, *Cissampelos*, *Pareira*, *Parryra*, *Butua*, *Pariera brava*, *Abu'ta*, *Albu'tua*, *Botou*, *Caa-peba*, *Overo butua*, *Wild vine*, *Velvet leaf*. Family, Menispermæ. *Sez. Syst.* Diœcia Monadelphia. The root of this plant, — *Pareira* (Ph. U. S.)—a native of South America and the West Indies, has a sweet taste with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used.

PARELLE, *Rumex hydrolapathum*.

PARENCEPHALIS, Cerebellum.

PARENCEPHALITIS, Cerebellitis.

PARENCEPHALOCÉLE, from *παρεγκεφαλι*, (*παρα*, and *κεφαλος*, 'the brain,') 'the cerebellum,' and *κηλη*, 'a rupture.' *Hernia of the cerebellum*, a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

PARENCEPHALUS, Cerebellum.

PARENCHYMA, *Caro parenchymatica* seu *viscerum* seu *visceralis* seu *viscero'sa*, *Substantia parenchymatosa*, *Prochou'ma*. The texture of glandular and other organs, composed of agglomerated globules united by cellular tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. *Παρεχυμα* signifies in Greek, effusion, (*παρα*, *ειν*, and *χυω*, 'I pour,') and it was believed, that this tissue consisted of effused blood or other fluid.

PARENCHYMA TESTIS, Pulpa testis.

PARENCHYMATITIS; from *παρεχυμα*, 'parenchyma,' and *ιτις*, denoting inflammation. *Inflammatio parenchymatica*. Inflammation of the substance of an organ.

PARESIS, from *παρημι*, 'I relax.' Paralysis. According to some, a slight, incomplete paralysis, affecting motion, not sensation.

PARESTHESIS, *Paresthesis*, or *Paresthesia*, *Sensus imperfectus*, from *παρα*, 'defective,' and *αισθησις*, 'sensation.' Congenital misconstruction of the external organs of sense. A genus in the nosology of Good. Also, perversion of sensibility.

PARETICUS, Relaxant.

PARETICA EXARTHROSIS. Luxation from relaxation of the ligaments of a joint.

PARFUM, Suffimentum.

PARIERA BRAVA, Pareira brava.

PARIES, Table.

PARIETAL, *Parietalis*, from *paries*, *parietis*, 'a wall.'

PARIETAL ARTERY, see P. Bones.

PARIETAL BONES, *Ossa parietalia*, *Ossa verticilla*, *Ossa verticis*, *Ossa sinuipitii*, *Ossa bregmatica*, *Ossa nervalia*, *Ossa tetragona*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape: their external surface is convex, and presents, at its middle part, an eminence called the *Parietal protuberance*, (F.) *Bosso parietale*. Their inner or cerebral surface, which is concave, has a depression that corresponds with the preceding eminence, and which is called the *Parietal fossa*, *Fossa parietalis*. Above and behind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Parietal foramen*, *Foramen parietale*, through which passes a vein—*parietal vein*—that opens into the superior longitudinal sinus of the dura mater, and an artery—*parietal artery*—a branch of the occipital, which ramifies on the same sinus. Each parietal bone is articulated above, with its fellow; below, with the temporal bone; before, with the frontal; behind, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid. Each parietal bone is developed from a single point of ossification.

PARIETAL FORAMEN, see P. Bones—p. Fossa, see P. Bones—p. Protuberance, see P. Bones—p. Veins, see P. Bones.

PARIETARIA, *P. officinalis*, *Helzins Vittraria*, *Wall pellitory*, (F.) *Parietaire commune*. Family Urticæ. *Sez. Syst.* Polygamia Monœcia. This plant grows on old walls, and contains much nitrate of potassa. It is diuretic, but is not much used.

PARIETES, Plural of *Paries*, 'a wall,' (F.) *Parois*. A name given to parts which form the enclosures—the limits of different cavities of the body, as the *Parietes of the cranium, chest, &c.*

PARIS, *P. quadrifolia*, *Onsberry*, *Truelove*, (F.) *Parisette*, *Raisin de Renard*. It possesses narcotic properties, and was formerly considered a powerful love philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

PARISAGOGE INTESTINORUM, Intussusceptio.

PARISETTE, Paris.

PARISTHMIÀ, *παια*, and *ισθμος*, 'the throat.' A word employed to designate the tonsils, and, likewise, inflammation of the tonsils. *Cynanche tonsillaris*, and *Cynanche* in general.

PARISTHMIOTOMUS, from *παρισθμιον*, 'the tonsils,' and *τομη*, 'I cut.' An instrument with which the tonsils were formerly scarified.

PARISTHMITIS, *Cynanche*, C. tonsillaris.

PARISTHMIUM, Tonsil.

PARISWORT, *Trillium latifolium*.

PARMELIA ISLANDICA, Lichen Islandicus.

PAROCHÆTEUSIS, Derivation.

PARODONTIDES, from *παρα*, 'near,' and *δους*, 'a tooth.' Tumours on the gums; *parulis*, &c.

PARODYNIA, *Dystocia*—p. *Perversa*, Presentation, preternatural.

PAROIS, Parietes.

PAROLE, Voice, articulated.

PAROMPHALOCÉLE, from *παρα*, 'near,' *ομφαλος*, 'the navel,' and *κηλη*, 'rupture.' *Hernia* near the navel.

**PARONIR'IA**, from *παρά*, and *ονειρος*, 'a dream.' Depraved, disturbed, or morbid dreaming; *Oncirodyn'ia acti'va*, *Erethis'mus onciro-dyn'ia*. The voluntary organs connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.—Good.

**PARONIRIA AMBULANS**, Somnambulism—p. Salax, Pollution.

**PARONY'CHIA**, *Parony'chis*, *Paronychi'tis*, *Pan'aris*, *Redu'via*, *Rediv'ia*, *Vermis dig'iti*, *Panarit'ium*, *Pandalit'ium*, *Passa*, *Dactylit'is*, *Pana'rium*, *Oncy'ia*, (F.) *Onglade*, from *παρά*, 'near,' and *ονύξ*, 'the nail.' The ancients gave this name to an inflammatory tumour, seated near the nail, and involving the pulp or matrix of the nail—*Oncy'itis*. (Gross.) Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called in France *Tournaïole*. 2. That seated in the subcutaneous cellular tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum and bone. These last three are only different degrees of the same disease, constituting *Whitlow*, (F.) *Mal d'aventure*:—the worst kinds, in English, are called *Felon*. The inflammation generally commences in the subcutaneous cellular tissue, and spreads to other parts, occasioning excessive, lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely,—even down to the bone, when there is reason to believe that the affection belongs to the fourth division,—making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

**PARONYCHIA**, *Asplenium ruta muraria*—p. Digitium, Digitium.

**PARONYCHIS**, Paronychia.

**PARONYCHITIS**, Paronychia.

**PAROPHOBIA**, Hydrophobia.

**PAROFIA**, Canthus (lesser.)

**PAROPELEXIA**, Paraplegia.

**PAROPSIS**, *Dysæsthesia visualis*—p. Amaurosis, Amaurosis—p. Cataracta, Cataract—p. Glaucoſis, Glaucoma—p. Illuſoria, Pseudopleſia—p. Lateralis, Dysopia lateralis—p. Longinqua, Presbyopia—p. Lucifuga, Nyctalopia—p. Noctifuga, Hemeralopia—p. Propinqua, Myopia—p. Staphyloma, Staphyloma—p. Staphyloma purulentum, Hypopyon—p. Staphyloma simplex, Hydrophthalmia—p. Strabismus, Strabismus—p. Synzeſis, Synzeſis.

**PAROPTESIS**, from *παρά*, dim., and *πρωω*, 'I roast.' Forcing a sweat by placing a patient before the fire or putting him in a dry bath.

**PARORA'SIS**, from *παρά*, dim., and *οραω*, 'I see.' Perversion of sight, which prevents the person from judging accurately of the colour of objects, *Achromatop'ia*. Hallucination.—Galen.

**PARORCHID'UM**, from *παρά*, dim., 'something wrong,' and *ορχις*, 'testicle.' Any position of one or both testicles, different from that which they ought to occupy in the scrotum;—whether they may not have descended through

the abdominal ring, or are drawn up to the groins by the cremaster muscle.

**PARORCHIDO-ENTEROC'ELE**, *Hernia paror'chido-enterica*. Intestinal hernia complicated with displacement of the testicle.—Sauvages.

**PAROSMIA**, Anosmia. Also, perversion of smell; *Paræsthesia olfacto'ria*, *Olfactus depravatus*, *Idiosyncrasia olfacto'ria*.

**PAROSTIA**, from *παρά*, 'defectively,' and *οσσιον*, 'a bone.' Bones untempered in their substance, and incapable of affording proper support.—Good.

**PAROSTIA FLEXILIS**, Mollities ossium—p. Fragilis, Fragilitas ossium.

**PAROTIA**, Cynanche parotidæa.

**PAROTID**, *Glandula parotidea*, *G. ad Aures*, *Parot'ia*, *Animel'ia*, *Alimel'ia*, *Lacticin'ia*; from *παρά*, 'about,' and *οτις*, 'the ear.' The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parotid duct*, *Steno's canal*—the *Ductus superior* or *Superior salivary canal* of some. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Accessory Gland of the Parotid*, *So'cia Parotidis*, *Glandula so'cia parotidis*. In the substance of the parotid are found—a number of branches of the facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw. The parotid secretes saliva, and pours it copiously into the mouth.

**PAROTID, ACCESSORY GLAND OF THE**, see Parotid.

**PAROTID APONEURO'SIS**. A sheath of great thickness, continuous, below, with the cervical fascia. It forms a frame-work to the parotid by means of fibrous prolongations from its deep surface. Its density accounts for the pain of parotitis, and for the difficulty with which pus makes its way to the surface.

**PAROTID ARTERIES**, see Parotid—p. Duct, see Parotid—p. Veins, see Parotid.

**PAROTIDE**, Parotis.

**PAROTIDON'CUS**, *Tumor parotidis*, *T. glandula parotidea*, from *παρωτις*, 'the parotid,' and *ωνυξ*, 'a tumour.' Swelling of the parotid.

**PAROTIS**, *Phlegmonè parotidea*, *Inflammatio parotidum*, *Cynanchè parotidæa*, *Parot'is*, *Diosc'ri*, (F.) *Parotide*, is the name of a tumour seated under the ear; which is reddish, hard, and attended with obtuse pain; the progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted. Some French pathologists restrict the term *parotide* to symptomatic parotitis—as to that which occurs in plague; whilst they apply the terms *Oreillons* or *Ourles* to Cynanche parotidæa or Mumps.

**PAROTIS CONTAGIOSA**, Cynanche parotidæa—

p. Epidemica, Cynanche parotidæa—p. Seroso glutine tumens, Cynanche parotidæa—p. Spuria, Cynanche parotidæa.

**PAROTITIS**, Cynanche parotidæa, Parotis—p. Epidemica, Cynanche parotidæa—p. Erysipelatosa, Cynanche parotidæa—p. Polymorpha, Cynanche parotidæa—p. Specifica, Cynanche parotidæa.

**PAROXYSM**, *Paroxysmus*, from παροξυσμός, (αγά, and οξύσις, 'to render sharp.') 'Irritate;' *Impetus*, *Insultus*, *Invasio*, *Exacerbatio*, *Accessio*, *Accessus*, (F.) *Exacerbation*, *Redoublement*, *Accès*. The augmentation which supervenes at equal or unequal intervals in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

**PAROXYSMAL**, *Paroxysmalis*; same etymon. (F.) *Paroxystique*. Of or belonging to a paroxysm;—as a *paroxysmal day*, (F.) *Jour paroxystique*; a day on which a paroxysm of disease occurs.

**PAROXYSMUS FEBRILIS**, Pyrexia.

**PAROXYSTIQUE**, Paroxysmal.

**PARS INFERIOR PEDIS**, Sole—p. Mastoidea of Temporal Bone, Mastoid process—p. Naturalis medicinæ, Physiology—p. Petrosa, see Temporal Bone—p. Prima aspera arteriæ, Larynx—p. Pyramidalis ossis temporis, see Temporal Bone—p. Squamosa, see Temporal Bone—p. Urethræ membranacea, see Urethra—p. Vaga, Pneumogastric—p. Virilis, Penis.

**PARSLEY**, COMMON, *Apium petroselinum*—p. Fool's, *Æthusa cynapium*—p. Macedonian, *Bubon Macedonicum*—p. Mountain, black, *Athamanta aureoselinum*—p. Poison, *Conium maculatum*—p. Spotted, *Conium maculatum*—p. Water, *Cicuta maculata*.

**PART**, see Parturition—p. *Légitime et illégitime*, see Parturition.

**PARTES GENERATIONI INSERVIENTES**, Genital organs—p. Genitales, Genital organs—p. Laterales nasi, Scapulæ nasi—p. Nervosæ, see Nerve—p. Obscurnæ, Genital organs.

**PARTHENIUM FEBRIFUGA**, *Matricaria*—p. Mas. *Tanacetum*.

**PARTHENIUS**, (*Morbis*); from παρθενός, 'a virgin.' A disease in a young female. Also, chlorosis.

**PARTIALIS**, Local.

**PARTIES**, LES, Genital organs—p. *Génitales*, Genital organs—p. *Honteuses*, Genital organs—p. *Génitoires*, Genital organs—p. *Naturelles*, Genital organs—p. *Nobles*, Genital organs—p. *Sexuelles*, Genital organs.

**PARTIO**, Parturition.

**PARTRIDGE-BERRY**, *Gaultheria*.

**PARTS**, THE, Genital organs.

**PARTURA**, Parturition.

**PARTURIENT**, *Parturiens*, from *parturire*, itself from *parere*, 'to bring forth.'

The *Parturient*, *Childbed*, or *Lying-in state*, *Puerperium*, requires careful management, and is subject to various diseases.

A *Parturient* or *Parturifacient* is a medicine

which induces or promotes labour; as ergot, and, perhaps, borate of soda.

**PARTURIFACIENT**, Parturient.

**PARTURIGO**, Parturition.

**PARTURITION**, *Puerperium*, *Partus*, *Partio*, *Parturitió*, *Parturigo*, *Partura*, *Tocos*, *Toctos*, *Taxis*, *Lochia*, *Apocýsis*, *Mæuusis*, *Maiou'sis*, *Nego'tium* seu *Actus parturitió'nis*, *Enia'us* seu *Enia'tio factus*, *Expul'sio factus*, *Apol'ysis*, *Labour*, (F.) *Accouchement*, *Couche*, *Travail d'Enfant*. The delivery of the fœtus and its appendages. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place, at the full time, until after nine months of uterogestation,—the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The *first stage* comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Signum*, *Leucorrhœa Nabothi*, *Hæmorrhag'ia Nabothi*, *Labour-show*, or *Show*; and, along with this, trifling grinding pains, called by the French *Mouches*, are felt in the loins and abdomen. *Second stage*:—Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters*, (F.) *Poche des saux*; and rupture or breaking of the waters. *Third stage*:—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis; the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage*:—the head now presents at the vulva, the perineum being considerably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité*, in Paris, from the 10th of December, 1797, to the 31st of July, 1806, the following were the presentations:

The head, with the face posteriorly,	12,120
The head anteriorly,	63
The breech,	198
The feet,	147
The knees,	3
Other positions,	102

12,633

The following table, drawn up from data furnished by Velpeau, gives an approximative view of the comparative number of presentations, according to the experience of the individuals mentioned:

TABLE, EXHIBITING THE RATIO OF PRESENTATIONS IN 1000 CASES.

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscarriage* or *abortion*, prior to the seventh month; *premature labour*, *Omotocia*, *Partus præcox seu præmaturus*, between this and eight months and a half; and *labour at the full period*, (F.) *Accouchement à terme*, when it happens at the end of nine months. Labours have likewise been variously divided by different authors. Perhaps the one into *Natural*, *Preternatural*, and *Laborious*, is as common as any; — *natural Labour* meaning that which would occur without manual assistance; *pre-*

*ternatural*, requiring the assistance of art, but by the hand solely; and *laborious*, requiring instrumental assistance; which M. Capuron calls *Accouchement Méchanique*.

The French use the term *Part*, *Partus*, at times, synonymously with *delivery*; at others, with *fatuus*, *Maiséme*, *Maséme*. *Suppression de part* means concealment of delivery: *Part légitime*, a *fatuus* which comes into the world with the conditions necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

I. NATURAL LABOURS;		
Or those in which Delivery can be effected without Assistance.		
HEAD PRESENTING. (Four Positions.)	1. <i>Occiput towards the Left Acetabulum.</i>	The head with the chin bent upon the breast clears the brim of the pelvis. Motion of rotation produced by the inclined planes of the pelvis; the occipital prominence is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.
	2. <i>Occiput towards the Right Acetabulum.</i>	The head attains the outlet; clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates.
	3. <i>Occiput towards the Right Sacro-iliac Symphysis.</i>	The same course is here followed: except that after the rotary movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded; — the face next.
	4. <i>Occiput towards the Left Sacro-iliac Symphysis.</i>	When the chin presents and is turned forwards, the face is first expelled: the head is thrown backwards. This presentation is uncommon. If the chin present and be thrown backwards, natural delivery cannot be effected.
LOWER EXTREMITY PRESENTING. (Four Positions of the Feet, Knees, and Breech.)	1. <i>Heel, Tibia, or Sacrum towards the Left Acetabulum.</i>	The nates enter the brim diagonally; movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.
	2. <i>Heel, Tibia, or Sacrum towards the Right Acetabulum.</i>	The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim: movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.
	3. <i>Heel, Tibia, or Sacrum towards the Right Sacro-iliac Symphysis.</i>	The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.
	4. <i>Heel, Tibia, or Sacrum towards the Left Sacro-iliac Symphysis.</i>	
II. PRETERNATURAL LABOURS:		
Or those which require Manual Assistance only.		
1. PRESENTATION OF THE HEAD, UPPER EXTREMITIES, BACK, ABDOMEN, &c.	1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis; endeavours are to be made to place it in its natural position: the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or	

**I. PRESENTATION OF THE HEAD, UPPER EXTREMITIES, BACK, ABDOMEN, &C.**

the lever may be fixed over the occiput, by drawing down which, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.

2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c., the feet must be laid hold of, and the child turned. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. The female may be placed on her back or left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm, and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain; and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.

If the toes point to the vertebral column or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way, the head may be extracted.

**III. INSTRUMENTAL LABOURS;**

*Or those requiring the Assistance of appropriate Instruments.*

**GENERAL OBSERVATIONS.**

If the pains become feeble, or inadequate from any cause;—or if the presenting part be firmly wedged in the pelvis; or the woman be becoming exhausted, instrumental assistance may be required. In all such cases, place the female on the back or left side, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains; have the patient on her left side, (generally); and extract according to the axes of brim and outlet, as the case may be.

**1. Short Forceps.**

Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the fenestra. Introduce the left-hand blade first; the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little finger being employed to retain the left-hand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractive effort.

**2. Long Forceps.**

Applicable where the head does not enter the brim. The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.

**3. Lever or Vectis.**

The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.

**4. Fillet and Blunt Hook.**

In certain cases of breech and knee presentation, where the hand is insufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple.

**EMBRYULCIA.**

Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysiotomy, or the induction of premature labour may be called for.

The instruments required here, are the *Perforator Crotchet*, and *Craniotomy Forceps*. Make a steady pressure on the abdomen; pass two fingers of the left hand up to the head: feel for a suture or fontanelle; introduce the perforator and bore through, until the progress of the instrument is arrested by its *shoulders*. Open the handles, and turn the instrument in different directions, so that the opening may be large enough to admit the perforator, with which the brain must be broken down.

If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slightly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractive force can now be exerted during the pains; and the extrusion of the child be effected.

Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first.

The crotchet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose, in the sagittal suture.

When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear.

**SYMPHYSIOTOMY AND CÆSAREAN SECTION.**

In cases of great narrowness of the pelvis, the operation of *Symphysiotomy*, has been adopted by French practitioners,—rarely by British or American; and in extreme cases recourse has been had to the *Cæsarean Section*.

**SEPARATION OF THE HEAD OF THE FÆTUS FROM THE BODY.**

If the body of the fœtus have been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand, and the forceps be applied; or the head be opened and delivered as under Embryulcia. Should the head have been brought away, and the body left behind, the feet must be brought down.

In cases of narrowness of the pelvis, where the fœtus at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother.

**INDUCTION OF PREMATURE LABOUR.**

The most advisable plan of accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua,—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured and the waters evacuated. Parturition usually follows within 48 hours.

The laying of eggs by animals is termed in French *ponte*. The term has been applied to the periodical discharge—*ponte périodique*—of ova, which takes place from the ovaries at each menstrual period.

PARTURIUM VANUM, *Fausse couche*.

PARTUS, Parturition—p. Abactio, Abortion—p. Abactus, Abortion—p. Cæsareus, Cæsarean section—p. Difficilis, Dystocia—p. Laboriosus, Dystocia, Laborious labour—p. Fræcox, Parturition, (premature)—p. Præmaturus, Parturition, (premature)—p. Serotinus, Opsiotocia.

PARULIS, from *παρά*, 'near,' and *εὐλερ*, 'the gum;' *Apostéma parulis* vel *paroulis*, *Phlogomoné Parulis*, *Gum Boil*. Small abscesses are so called which form in the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARURIA, from *παρά*, 'defectively,' and *ουρα*, 'I pass urine.' Morbid secretion or discharge of urine.

PABURIA INCONTINENS, Enuresis—p. Incontinenus aquosa, see Diabetes—p. Inops, Ischuria, false—p. Mellita, Diabetes—p. Retentionis, Ischuria—p. Retentionis renalis, Ischuria—p. Retentionis vesicalis, Retention of urine—p. Stillatitia, Strangury—p. Stillatitia mucosa, Cystirrhæa.

PARVITAS MORBOSA PARTIUM ORGANICARUM, Microtesia.

PARYGRON, from *παρά*, and *ὑγρός*, 'humid.' A liquid or moist preparation for allaying topical inflammation.

PAS D'ÂNE, Tuasilago.

PASMA, Catapasma.

PASQUEFLOWER, Anemone pulsatilla.

PASSA, Paronychia.

PASSÆ CORINTHIACÆ, see *Vitis Corinthiaca*.

PASSAGES, DIGESTIVE, Ways, digestive—p. Second, Ways, second.

PASSE-PIERRE, Crithrum maritimum.

PASSERAGE SAUVAGE, Cardamine pratensis.

PASSIFLORA LAURIFO'LIA, *Bay-leaved passion flower*. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIFOR'MIS, *Apple-shaped Granadilla*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

PASSIO, Disease, Passion—p. Æmoptoica, Hæmoptysis—p. Cadiva, Epilepsy—p. Cardiaca, Cardialgia—p. Cœliaca, Cœliac flux—p. Cholericæ, Cholera—p. Felliſua, Cholera—p. Hæmoptoica, Hæmoptysis—p. Hypochondriaca, Hypochondriasis—p. Hysterica, Hysteria—p. Iliaca, Ileus—p. Ischiadica, Neuralgia femoropoplitea—p. Pleuritica, Pleuritis—p. Stomachica, Dyspepsia—p. Ventriculosa, Cœliac flux.

PASSION, *Passio*, *An'imi Pathéma*, *Affectus*, *Emotio*, from *patior*, *passus*, 'to suffer.' An active affection or emotion of the mind; as rage, terror, love, hatred, &c.

PASSION FLOWER, BAY-LEAVED, *Passiflora laurifolia*—p. *Hystérisque*, Hysteria—p. Iliac, Ileus.

PASSIONES ANIMI, Affections of the mind.

PASSIVE, *Passivus*. Same etymon as Passion. An epithet for diseases which seem owing

to a greater or less diminution of the strength, or which are without apparent reaction. Thus, passive hemorrhages are such as supervene in debilitated individuals, or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has also been given to aneurisms of the heart with extenuation of the parietes; in opposition to *active* aneurisms, with thickness of the parietes—hypertrophy.

PASSULÆ MAJORES, see *Vitis vinifera*—p. *Minores*, see *Vitis Corinthiaca*.

PASSULATUM, *Uva passa*, 'raisins, dried grapes.' A medicine in which the pulp of raisins is a chief ingredient.

PASSY, MINERAL WATERS OF. This village is in the vicinity of Paris. There are several springs containing sulphates of lime, iron and magnesia, alum, common salt, carbonate of iron, carbonic acid, &c. They are employed as a tonic and astringent.

PASTA DE ALTHÆA, Paste, marshmallow—p. Amygdalina, Confection (almond)—p. de Dactylis, Paste, date—p. Emulsiva, Confection (almond)—p. de Jujubis, Paste of jujubes—p. Regia, Confection (almond.)

PASTA GLYCIRRHIZÆ GUMMA'TA ET ANISA'TA seu *Massa de extracto glycyrrhizæ*. A compound of *extract of liquorice*, *gum Senegal*, *sugar*, *Florence orris root*, and *volatile oil of aniseed*. Demulcent.

PASTE, *Pasta*, (F.) *Pâte*. A compound medicine like the pastil, but less consistent, flexible, less saccharine, and more mucilaginous.

PASTE, DATE, *Massa seu pasta de dactylis*. Composed of *dates*, *sugar*, *gum Arabic*, *water*, and *orange flower water*. Ph. P. Demulcent.

PASTE OF JUJUBES, *Pasta de jujubis*, *Massa de zizyphorum fructu*: composed of *jujubes*, *gum Senegal*, *sugar*, *water*, and *tincture of lemon peel*. Demulcent.

PASTE, MARSHMALLOW, *Massa de gummi Arabico*, *Pasta de althæa*. A compound of *gum Arabic*, *Sugar*, *white of egg*, and *orange flower water*. Ph. P. It is demulcent.

PASTE, TOOTH, Dentifricium—p. Vienna, see *Powder*, Vienna—p. Ward's, *Confectio piperis nigri*.

PASTEL, *Pastillus*, *Dioeres*, *Avicula Cipria*, *Candela fumalis*, *Phthois*, *Phthoisus*. A compound of aromatic substances in various shapes; used as a fumigating material when set fire to. See *Fumigation*.

The French use the term *Pastille*, (L.) *Pastillus*, for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are in fact small lozenges, and only differ from the *tablette* in their smaller size.

PASTEL, *Isatis tinctoria*.

PASTÈQUE, *Cucurbita citrullus*.

PASTILLES, FUMIGATING, see *Fumigation*.

PASTILLI EMETINÆ PECTORALES, *Trochisci emetinae pectorales*.

PASTILLI DE MENTHÆ PIPERITÆ, *Peppermint drops*. (*Sacch. alb.*, *aqua menthæ pip.*, *aq. destillat.* aa ʒij. Boil to the consistence of an electuary. Take of fine *white sugar* in powder, ʒiv, *volatile oil of peppermint*, ʒss. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the *drops*. Ph. P.)

## PASTILLUS, Pastil.

**PASTINACA OPOPANAX.** The name of the plant which furnishes the *Opopanax*. The plant, whence the gum resin is obtained, has, also, been called *Opopanaxum*, *Panax heracleum*, *Panax costi-num*, *Pastina'cea*, *Kyna*, *Hor'cules-all-heal*, *Opopanaxwort*, *Opopanax*, *Opopanaxis gummi-resi'na*, *Gezir*, *Pop'anax*, *Gummi Panacis*, exudes from the roots when wounded. Its odour is strong and peculiar; taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour, without; white within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x. to ℥j in powder.

**PASTINACA SATI'VA**, *Elaphobos'cum*, *Pastinaca sylvestris*, *Ban'ica*, *Garden parsnep*. The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

**PASTINACA SYLVESTRIS**, *P. sativa*—*p. Sylvestris tenuifolia officinarum*, *Daucus carota*.

**PÂTE**, Paste—*p. Arsenicale*, Arsenical paste.

**PATELLA**, *Rot'ula*, *R. genu*, *Epigon'atis*, *Epigon'tis*, *Acromy'le*, *Epigou'nis* seu *Epigu'nis* seu *Epigo'nis*, *Mola* seu *Concha* seu *Ocu'lus* seu *Orbis* seu *Scutum genu*, *Os scutiforme* seu *disciforme* seu *thyreoïdes*, *Supergenua'lis*, *Caucaloïdes*, *My'la'cris*, *Mylë*, *Gamba*, *Oled-ranon mobile*, (F.) *Rotula*. Diminutive of *patina*, 'a dish,' so called from its shape. A sort of sesamoid, flat, short, thick, rounded bone, situate in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*, united angularly, which are encrusted with cartilage, and each of which is articulated with one of the condyles of the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping the fractured extremities closely in apposition.

**PATELLA**, Cup—*p. Fixa*, *Olecranon*.

**PATER OMNIUM VIVENTIUM**, Penis.

**PATERA DIOGENIS**, Palm.

**PATHEMA**, Affection, Disease.

**PATHEMATOLOGY**, Pathology.

**PATHETIC**, *Pathet'ious*, from *πάθειν*, 'to feel.' That which moves the passions. A name given to the *superior oblique muscle of the eye*, and, also, to a nerve.

**PATHETIC MUSCLE**, Oblique superior of the Eye.

**PATHETIC NERVE**, *Nervus Pathet'icus*, *N. trochlea'ris* seu *trochleato'rius* seu *trochlea'tor*, the 4th pair of nerves, (F.) *Oculo-musculaire interna* (Ch.) *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior part of the tubercula quadrigemina (*the testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin round cord, which makes a turn upon the peduncles of the brain and passes into a canal of the dura mater near the posterior clinoid process. It enters the orbit by the broadest part of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments.

**PATHIC**, Morbid.

**PATHICAL**, Morbid.

**PATHICUS**, Morbid.

**PATHNE**, Alveolus.

**PATHOGENETIC**, *Pathogenet'icus*, *Pathogen'icus*. Same etymon as the next. Relating to pathogeny.

**PATHOGENETIC PHYSIOLOGY**, *Physiolog'ia pathogenet'ica*. That part of physiology which relates to the origin of disease.

**PATHOGENICUS**, Pathogenetic.

**PATHOG'ENY**, *Pathogen'ia*, *Nosogen'esis*, *Nosogen'ia*, from *παθος*, 'a disease,' and *γενεσις*, 'generation.' The branch of pathology which relates to the generation, production and development of disease.

**PATHOGNOMONIC**, *Pathognomon'icus*, *Signum conjunctum* seu *characteris'ticum* seu *morbi essentia'le*; from *παθος*, 'an affection,' and *γινωσκω*, 'I know.' A characteristic symptom of a disease.

**PATHOGRAPHY**, *Pathograph'ia*, from *παθος*, 'disease,' and *γραφω*, 'I describe.' A description of disease.

**PATHOLOGIA**, Pathology—*p. Humoralis*, Humorism—*p. Solidaris*, Solidism.

**PATHOLOG'ICAL**, *Patholog'icus*, *Pathol'ogus*; same etymon as pathology. Relating to pathology.

**PATHOLOGICAL ANATOMY**, see Anatomy.

**PATHOL'OGIST**, *Pathol'ogus*. Same etymon. One versed in pathology.

**PATHOL'OGY**, *Pathematol'ogy*, *Patholog'ia*, *Pathematolog'ia*, *Patholog'ice*, from *παθος*, 'a disease,' and *λογος*, 'a discourse.' The branch of medicine whose object is the knowledge of disease. It has been defined *diseased physiology*, and *physiology of disease*. It is divided into *general* and *special*. The *first* considers diseases in common;—the *second* the particular history of each. It is subdivided into *internal* and *external*, or *medical* and *surgical*.

**PATHOLOGY**, **HUMORAL**, Humorism.

**PATHOMANIA**, *Parapath'ia*, *Moral Insanity*, from *παθος*, 'a disease,' and *mania*. *Ma'nia sine Delir'io*. A morbid perversion of the natural feelings, affections, inclinations, temper, habits, moral disposition, and natural impulses, without any remarkable disorder or defect of the intellect or knowing and reasoning faculties, and particularly without any insanity or hallucination.

**PATHOPATRIDALGIA**, Nostalgia.

**PATHOS**, Affection, Disease.

**PATIENCE**, *Rumex patientia*—*p. d'Eau*, *Rumex hydrolapathum*—*p. Garden*, *Rumex patientia*—*p. Rouge*, *Rumex sanguineus*—*p. Sauvage*, *Rumex acutus*.

**PATIENT**, see Sick.

**PATIENTIA**, *Rumex patientia*.

**PATIENTIÆ MUSCULUS**, Levator scapulae.

**PATNE**, Alveolus.

**PATOPATRIDALGIA**, Nostalgia.

**PATOR NARIUM**. The cavity or the opening of the nostrils.

**PATRATIO**, Ejaculation, (of sperm.)

**PATTE D'OIE** (F.), 'Goose's foot.' An aponeurotic expansion, which covers the internal surface of the tibia at its upper part, and consists of the expansion formed by the tendons of the sartorius, gracilis, and semi-tendinosus muscles.

**PATURSA, Syphilis.**

**PAU, (CLIMATE OF.)** Pau is the capital of the department of the Lower Pyrenees; and is about 150 miles from Bordeaux, and 50 from Bayonne. The climate corresponds with that of the south-west of France generally; its great quality is the comparative mildness of its spring, and exemption from cold winds. It is regarded as a favourable winter residence for invalids labouring under chronic affections of the mucous membranes. It is too changeable for the consumptive; and to be avoided by the rheumatic.

**PAULLINIA.** This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of tisanæ—the powder being mixed with cocoa—in diarrhœa and dysentery. It has been employed also as a tonic. An extract is prepared in Brazil from the *Paullinia sorbilis*, known there under the name of *Guarana*, which is administered in similar pathological cases.

**PAUME DE LA MAIN, Palm.****PAUNCH, Inguivies.****PAUONTA, Sedatives.****PAUPIÈRE, Palpebra.**

**PAUSIMENIA,** from *παύω*, 'cessation,' and *μηνς*, 'menses.' Cessation of the menses.

**PAVANA WOOD, Croton tiglium.**

**PAVILION.** The French give the name *pavillon*, to the expanded extremity of a canal or cavity, for example, of a catheter, sound, &c.

**PAVILION OF THE EAR, Auricula, Pinna, O'tium, Ala, (F.) Auricula ou Oricule, Pavillon de l'oreille,** is seated behind the cheeks, beneath the temple, and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *Helix, Anhelix, Tragus, Antitragus,* and *Lobe*; and several cavities—the *groove of the Helix, the fossa navicularis seu scaphoides,* and the *Concha*. The skin which covers the pavilion is very fine, and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-cellular ligaments;—a *superior, anterior, and posterior*.

**PAVILLON DE L'OREILLE, Pavilion of the ear**—p. *de la Trompe*, see *Tuba Fallopiana*.

**PAVIMENTUM CEREBRI, Base of the brain.**

**PAVINA, Æsculus hippocastanum.**

**PAVITATIO, Tremor;** from *pavor*, 'dread.' Trembling for fright.

**PAVOFOBIA, Panophobia.**

**PAVOR, (L.) Dread. Great fright. Panophobia.**

**PAVORES NOCTURNI SEU DORMIENTIUM. Fear during sleep.**

**PAVOT, Papaver.****PAZAHAR, Bezoar.**

**PEA, GROUND SQUIRREL, Jeffersonia Bartoni**—p. *Love, Abrus precatorius*—p. *Nut, Arachis hypogæa*—p. *Turkey, Galega Virginiana*.

**PEACH BRANDY, Amygdalus Persica**—p. *Tree, Amygdalus Persica*—p. *Wood, see Cæsalpinia*.

**PEAGLE, Primula veris.**

**PEAR, see Pyrus malus.**

**PEARL, Perla, Margaron, Margarita, Margollium, Margolis, Unie, (F.) Perle.** A roundish concretion of a silvery white colour, and brilliant polish, found in several shells, and especially in the *Ascidula margaritifera*, which has, hence, been called *Mater perlarum, Margarita* and *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c. Pearls were formerly given in powder as astringents and antacids. They consist of lime and an animal matter.

**PEARL ASH, Potash of commerce**—p. *Mother of, see Pearl*—p. *White, Bismuth, subnitrate of.*

**PEAU, Cutis.****PEAUCIER, Platysma myoides.**

**PECCANT, Peccans, from peccare, 'to sin.'** An epithet given by the humourists to the humours when erring in quality or quantity.

**PECHEDEON, Perineum.****PECHER, Amygdalus Persica.****PECHIAGRA, Pechyagra.**

**PECHURIM CORTEX.** A highly aromatic bark, the produce of a species of *laurus*. It is extremely fragrant, like that of cinnamon, which it greatly resembles in its properties. In Portugal it is used in the cure of dysentery, &c.

**PECHYAGRA, Pech'i'agra, Ancon'agra, Pech'si'agra, from π'χυς, 'the elbow,' and α'γ'α, 'a seizure.'** Gout affecting the elbow.

**PECHYS, Elbow.****PECHYTRYBE, Porphyra nautica.****PECTE, Cheese.****PECTEN, Pubes. Also, a comb.**

**PECTEN DENTIUM, Sepes dentium**—p. *Veneris, Scandix cerefolium.*

**PECTIHAGRA, Pechyagra.**

**PECTIN, from π'κτις, 'a coagulum.'** A name given by Braconnot to a principle which forms the basis of vegetable jelly. It is extensively diffused in the juices of pulpy fruits and roots, especially when they are mature, and occasions these juices to coagulate when they are mixed with alcohol or boiled with sugar.

It is the basis of one of the classes of elementary principles of Dr. Pereira—the *pectinaceous*.

**PECTINACEOUS, Pectinosis.**

**PECTINALIS, from pecten, 'the pubes;'** *Pectina'us, Mus'culus liv'idus, Pectina'tus, Pubis-fémoral, Suspubis-fémoral* (Ch.), (F.) *Pectin'i.* This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space which separates the ileo-pectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line which descends from the lesser trochanter to the linea aspera. The pectinalis bends the thigh on the pelvis; and carries it outwards in adduction and rotation. It may also bend the pelvis on the thigh.

**PECTINATED, Pectinatus, Pectin'iform, (F.) Pectin'é;** from *pecten, 'a comb.'* Having the shape of a comb.

**PECTINATED MUSCLES, Pectin'ati mus'culi.** The fascicular texture observed in the right auricle of the heart:—*Mus'culi Auric'ule Pectin'ati.* Their main use probably is—to prevent the over dilatation of the auricles.

**PECTINATUS, Pectinalis.****PECTINÉ, Pectinalis, Pectinated.****PECTINEUS, Pectinalis.****PECTINIFORM, Pectinated.**

**PECTINOUS**, *Pectinaceus*, *Pectinosus*, *Pectinaceus*, from *pectin*. Of or belonging to pectin or vegetable jelly,—as a *pectinous* or *pectinaceous* vegetable principle.

**PECTORAL**; from *pectus*, 'the breast.' Relating to the breast. See **Pectorals**.

**PECTORAL**, **GRAND**, *Pectoralis major*. **PECTORALE**, Corset.

**PECTORALIS INTERNUS**, *Triangularis sterni*.

**PECTORALIS MAJOR**, from *pectus*, 'the breast.' *Pectoralis*, *Sterno-clavido-brachialis*, (F.) *Sterno-costo-clavio-humeral*, *Sterno-humeral* (Ch.), *Grand Pectoral*. A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of sponenrotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the first six true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus. The use of this muscle is—to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can also move it in rotation inwards. If the humerus be raised and fixed, the pectoralis major draws the trunk towards the upper extremity.

**PECTORALIS MINOR**, *Serratus anticus minor*, (F.) *Costo-coracoidien* (Ch.), *Petit Pectoral*, *Petit denté antérieur*. This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular; is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process. The pectoralis minor draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

**PECTORALS**, *Pectoralia*, *Thoracica*. Medicines considered proper for relieving or removing affections of the chest.

**PECTORAL DROPS**, **BATEMAN'S**, consist chiefly of *tincture of castor*, with some *camphor* and *opium*, flavoured by *aniseed*. Gray gives the following formula. *Castor* ℥j, *ol. anisi*. ℥j, *camph.* ʒv, *cocci*. ʒiss, *opii* ʒvj, *proof spirit*, a gallon.

A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol. dil. cong. iv*, *Santal. rubr. ras.* ʒj, *Digere per horas xxiv*; *cola, et adde Pulv. opii, Pulv. catechu, Camphoræ* aa ʒij, *Ol. anisi.* ʒiv. Digest for ten days.

**PECTORILOQUE**, from *pectus*, 'the chest,' and *loqui*, 'to speak.' Laënnec calls thus one who presents the phenomenon of *Pectoriloquism*. Also, a stethoscope.

**PECTORILOQUIE**, *Pectoriloquy*—p. *Chérotante*, *Egophony*.

**PECTORILOQUY**, *Pectoriloquism*, *Cavernous voice*, *Pectoriloquia*, (F.) *Pectoriloquie*, *Voix cavernuse*, *V. articulée*. Same etymon. Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests are examined with the ste-

thoscope. The voice seems to issue directly from the chest, and to pass through the central canal of the cylinder,—a phenomenon owing to the voice resounding in the anfractuous cavities, produced in the lungs by the suppurating or breaking down of tubercles, which constitute *abscesses* or *ulcers of the lungs*.

**PECTUS**, *Sternum*, *Thorax*—p. *Carinatus*, see *Carina*.

**PECULIUM**, *Penis*.

**PEDAGRA**, *Potasse supertartras impurus*.

**PEDAL**, *Pedalis*, from *pes, pedis*, 'the foot.' Relating to the foot:—as

**PEDAL APONEUROSIS**, (F.) *Aponevrose pédiense*. A thin, sponenrotic layer, which invests the *extensor brevis digitorum pedis*, and separates the tendons of the foot from each other.

**PEDESIS**, *Pulsation*.

**PEDETHMOS**, *Pulsation*.

**PEDIAL'GIA**, *Pedionalgia*, *Pedioneuralgia*, from *πῆδον*, 'the sole of the foot,' and *αλγία*, 'pain.' Pain in the sole of the foot. *Neuralgia* of the foot in general.

**PEDICLE**, **VITELLINE**, see *Vesicula umbilicalis*.

**PEDICULARIA**, *Delphinium staphisagria*.

**PEDICULATIO**, *Phtheiriasis*.

**PEDICULUS**, *Phtheis*, the *Louse*, (F.) *Pou*. A genus of parasitic insects. The human body is infested with three kinds: the *Body-louse*, or *Clothes Louse*, *Pediculus vestimentis*, (F.) *Pou de corps*; the *Head-louse*, *Pediculus capitis*, (F.) *Pou de la tête*, which lives in the hair; the *Crab-louse*, *Morpio*, *Fera'lis pediculus*, *Platula*, *Phthirius inguinalis*, *Pediculus Pubis*, (F.) *Morpion*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate of mercury, or the white or red precipitate of mercury, readily destroys them. The louse occurring in phtheiriasis, *pediculus tabescentium*, differs from the common louse.—Vogel.

**PEDIGULUS CAPITIS**, see *Pediculus*—p. *Pubis*, *Crab-louse*—p. *Tabescentium*, see *Pediculus*—p. *Vestimenti*, see *Pediculus*.

**PEDICURE**, *Chiropodist*.

**PEDICUS**, *Extensor brevis digitorum pedis*.

**PÉDIEUX** (*muscle*), *Extensor brevis digitorum pedis*.

**PEDIGAMBRA**, *Ysambra*.

**PEDILUVIUM**, from *pedes*, 'the feet,' and *lavo*, 'I wash;' *Lavipedium*, (F.) *Bain de pied*. A bath for the feet. See *Bath*.

**PEDION**, *Sole*.

**PEDIONALGIA**, *Pedialgia*.

**PEDIONEURALGIA**, *Pedialgia*.

**PEDIUM**, *Tarsus*.

**PÉDONCULES DU CERVELET**, *Corpora restiformia*.

**PEDORA**. The sordes of the eyes, ears, and feet.

**PEDUNCLE**, *Pedunculus*. This term has been applied to different prolongations or appendices of the encephalon, from *pes, pedis*, 'a foot.' Thus, the *Peduncles of the brain* are the *Crura cerebri*; the *Peduncles of the cerebellum*, the *Crura cerebelli*.

**PEDUNCLES OF THE BRAIN**, *Pedunculi cerebri*, called also *Crura anteriora medullæ oblongatæ*, are two white cords, about  $\frac{3}{4}$ ths of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and gradually approach, till

they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one point than in any other part of the brain, has been called *Locus niger crurum cerebri*.

**PEDUNCLES OF THE CEREBELLUM**, *Pedunculus cerebelli*, called also, *Crura posteriora*, are six in number, three on each side—a *superior*, a *middle*, and an *inferior*. The superior peduncles are generally known as the *Processus cerebelli ad testes*; the inferior are the *Processus cerebelli ad medullam oblongatam*; and the middle are called also, *Cerebellar peduncles*—*Processus cerebelli ad pontem*, and *crura of the medulla oblongata*.

**PEDUNCLES, INFERIOR OF THE CEREBELLUM**, *Corpora restiformia*—p. of the Medulla Oblongata, *Corpora restiformia*.

**PEDUNCLES OF THE PINEAL GLAND** are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami.

**PEDUNCULI CEREBELLI**, Peduncles of the Cerebellum—p. Cerebri, Peduncles of the Brain—p. Medullæ Oblongatæ, *Corpora restiformia*.

**PEDUNCULUS**, Peduncle.

**PEGA**, Canthus (lesser.)

**PEGANELÆON**, *Oleum rutaecum*, *Oleum ruta*; from *πεγανον*, 'rue.' Oil of Rue.

**PEGANUM**, Ruta.

**PEINE**, Hunger.

**PEINOTHERAPIA**, Limotherapeia.

**PEIRA**, Effort, Experience, Nisus.

**PELADA**, a word of uncertain origin, applied to alopecia, especially to that resulting from syphilis.

**PELAGIA**. A kind of scaly erysipelas of the hands—sometimes of the legs, at others, of the face. Pellagra. (?)

**PELLAGRA**, Pellagra.

**PELICAN**, *Pelicanus*, *Pelocanus*, *Polscan*, *Polscas*. An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

**PELICIDE**, *Pelidæ*, *Mel coctum*. Boiled honey.—Ruland and Johnson.

**PELICOMETER**, Pelvimeter.

**PELIDNOMA**, Ecchymoma, Pelioma.

**PELIONMA**, *Pelidnoma*, from *παιος*, 'black.' A livid ecchymosis.—Forestus. See Ecchymoma.

**PÉLIOSE**, Purpura.

**PELIOSIS**, Purpura hæmorrhagica.

**PELLA**, Cutis, Prepuce.

**PELLLAGRA**, *Pellagra*, *Ichthyosis Pellagra*, *Elephantiasis Italica*, *Tuber Pellagra*, *Leprosia Mediolanensis*, *L. Lombardica*, *Scorbutus alpinus*, *Ma'nia pellagria*, *Erythema endemium* seu *pellagrum*, *Insolazioni de Primavera*, *Mal del Sole*, *Dermatogria*, *Erysipelas periodica nervosa chronica*. *Mal de misère*, *Paralysia scorbutica*, *Scurvy of the Alps*, *Impetigo Pellagra*, (F.) *Scorbut des Alpes*; from *πella*, (?) 'skin,' and *αγξ*, 'seizure.' A disease, particularly noticed among the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and sensations become obscure, and cramps, convulsions, and other lesions of muscular contrac-

tility supervene. It is a singular, endemic affection, and has been supposed to follow every where the introduction of Indian corn: hence the name *Raphanisia malitica*, given to it by some of the Italian physicians.

**PELLENS**; from *pellere*, 'to drive.' Driving; impelling.

**PELLENTIA MEDICAMENTA** are medicines that promote the occurrence of the menstrual or hæmorrhoidal flux.

**PELLICULA SUMMA**, Epidermis—p. Superior, Epidermis.

**PELLICULÆ CORDIS**, Ostiola cordis.

**PELLIS**, Cutis—p. Summa, Epidermis.

**PELLITORY**, *Xanthoxylum fraxineum*—p. Bastard, *Achillea ptarmica*—p. of Spain, *Anthemis pyrethrum*—p. Wall, *Parietaria*.

**PELMA**, Sole.

**PELOR**, Monster.

**PELORIA**, Monster.

**PELORIUM**, Monster.

**PELORUM**, Monster.

**PELOTE DE MER**, Pila marina.

**PELTALIS** seu **PELTATUS CARTILAGO**, Thyroid cartilage, Xiphoid cartilage.

**PELTIGERA CANINA**, Lichen caninus.

**PELUDE**, Pelicide.

**PELVIC**, *Pelvicus*, *Pelvinus*. Belonging or relating to the pelvis.

**PELVIC APONEUROSIS**, (F.) *Aponévrose pelvienne*. A tendinous lamina, given off from the sides of the pelvis, and from the entire circumference of the brim, which passes into and lines the pelvis, and is soon divided into two distinct layers;—one *external*, the *lateral pelvic or obturator fascia*, which continues to line the sides of the pelvis, and covers the obturator internus muscle; the other *internal or superior*, which passes inwards upon the side of the prostate, bladder and rectum in the male, and of the bladder, vagina and rectum in the female, in order to form the floor of the pelvis.

**PELVIC CAVITY**, (F.) *Cavité pelvienne*; the cavity of the pelvis.

**PELVIC MEMBERS**; the lower extremities.

**PELVIC SURFACE OF THE ILIUM**; that which faces the pelvic cavity.

**PELLICULA OCULI**, Orbit.

**PELVI-TROCHANTERIAN**, *Pelvi-trochanterianus*. That which relates to the pelvis and great trochanter. The *Pelvi-trochanterian region* is formed by the muscles—*pyramidalis*, *two obturators*, *geminii*, and *quadratus femoris*, which pass from the pelvis to the digital cavity of the great trochanter.

**PELVIMETER**, *Pelycometer*, *Pelygometer*, *Pelicometer*, *Pyelometer*, from *pelvis*, and *μετρον*, 'a measure.' A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and particularly the antero-posterior or fore-and-aft diameter of the brim. Two have been chiefly employed, especially by French practitioners;—the *Compas d'épaisseur*, and the *Pelvimeter of Coutouly*. 1. The *Compas d'épaisseur* or *Calipers of Baudelocque*, is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied to the symphysis pubis, and the other on the sacrum. About three inches must be deducted from this measurement for the thickness of the mons veneris, pubis, and the base of the sacrum. 2. The *Pelvimeter*

of *Contouly* resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina; and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent. Measurement of the pelvis by the hand has been called *Pely-cochro-metro'sis*; from *πάλυξ*, 'the pelvis,' *χρῆς*, 'the hand,' and *μετρον*, 'measure.'

PELVIS, *Chōana*, *Pyēlos*, (F.) *Bassin*; so called, because fancied to be shaped like an ancient basin. The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the ossa femorum. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unequally thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other. The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*. The *BRIM*, *Angus'tia abdominal'is*, *In'tro'itus*, *Aper'tura pelvis superior*, *Upper Opening or strait of the Cavity of the Pelvis*, (F.) *Détroit supérieur*, *D. abdominal*, is the narrow part which separates the greater pelvis from the less—the *false* from the *true*, *Pelvis vera* seu *minor*. In the well-formed woman, it is elliptical, and slightly inclined forwards. Its *antero-posterior* or *sacro-pubis diameter*, in a *standard pelvis*, measures  $4\frac{1}{2}$  inches, but with the soft parts,  $3\frac{3}{4}$  inches; its *transverse* or *iliac* or *lateral*,  $5\frac{1}{2}$  inches, but with the soft parts  $4\frac{1}{2}$  inches; and its *oblique* with the soft parts,  $4\frac{3}{4}$  inches. The *OUTLET*, (F.) *Détroit inférieur*, *D. périnéal*, *Ex'itus*, *Inferior opening or strait*, *Angus'tia perinæalis*, forms the lower aperture of the pelvis. The antero-posterior diameter is here, on account of the mobility of the coccyx, 5 inches: the lateral, 4 inches. The *AXIS OF THE PELVIS* is important to be known in obstetrics. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx;—the *Axis of the Outlet* by a line drawn from the first bone of the sacrum to the entrance of the vagina. An imaginary curved line which indicates the direction of the canal of the pelvis, has occasionally been termed the *curve of Carus*, in consequence of its having been pointedly described by the German obstetrician.

PELVIS AURIUM, Cochlea—p. Cerebri, Infundibulum of the brain.

PELVIS OF THE KIDNEY, *Pelvis renalis* seu *renum*, *Sinus*, *Venter* seu *Alvus Renum*, (F.) *Bassinet*. This is a small, membranous pouch, occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

PELVIS MINOR, Pelvis—p. Ocularis, Scaphium oculare—p. Renalis, Pelvis of the kidney—p. Renum, Pelvis of the kidney—p. Vera, Pelvis.

PELYCOMETER, Pelvimeter.  
PELYOMETER, Pelvimeter.

PEMPHIGUS, *Emphy'sis Pem'phigus*, *Pom'pholya*, from *πυμφίς*, 'a blister;' *Febris bullosa*, *vesicul'aris*, *ampullo'sa* seu *pemphigo'des* seu *pemphingo'des*, *Exanth'ema serosum*, *Morta*, *Pem'phigus morta*, *Pemphigus Helveticus*, *Pemphigus major*, *Pemphigus minor*, *Morbus bullosus* seu *vesicul'aris* seu *ampulla'cus*, *Pem'phix*, *Pemphix*, *Pemphya*, *Typhus vesicul'aris*, *Vesic'ular Fever*, *Bladdery Fever*, (F.) *Fièvre bulleuse*, *F. Vésiculaire*. A disease, defined to consist of vesicles, scattered over the body; transparent, filbert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, typhous. It is doubtful whether any such idiopathic fever have ever existed: the probability is, that the fever and vesications have been an accidental complication. Cullen thinks the *Pemphigus Helveticus* must have been malignant sore throat. If, however, such a distinct disease did exist, it was probably only as an endemic-epidemic.

РЖИГНОУС МАЛОЕ, Pemphigus—p. Minor, Pemphigus—p. Morta, Pemphigus—p. Variolodes, see Variella.

PEMPHIX, Pemphigus.

PEMPHYX, Pemphigus.

PEMPTÆA FEBRIS, Quintan.

PENÆA MUCRONATA, see Sarcocolla—p. Sarcocolla, Sarcocolla.

PENCIL-LIKE PROCESSES, Styloid processes.

PENDULUM PALATI, Velum pendulum palati.

PENETRATING, *Pen'etrans*, from *penetrare*, (*penitus intrare*), 'to go into.' A wound is so called which penetrates one of the great splanchnic cavities—*Vulnus Penetrans*.

A medicine is, also, so called, which is supposed to pass through the pores and stimulate.

PENICILLUM, Compress, Penicillus.

PENICIL'LUS, *Penicillum*, 'a painter's brush;' diminutive of *penis*, 'a tail.' A tent or plectet. The secreting glandiform extremities of the vena portæ, (*Ad'ini bilio'si*) have been so termed, as well as the villous textures.

PENICULUS, Tent.

PENICULUM, Compress.

PENICULUS, Tent.

PENIDES, Saccharum hordeatum.

PENID'IUM, *Penidium saccharat'um*. A kind of clarified sugar, made up into rolls. *Barley sugar*. It is demulcent; see *Saccharum hordeatum*.

**PENIL, Mons veneris.**

**PENIS**, 'a tail,' from *pendere*, 'to hang down;' *Caulis, Coles, Caulis, Caulos, Mentula, Menta, Phall'us, Posth'e, Pros'thium, Crith'e, Cor'yn'e, Vomer, Pator omnium viscer'tium, Priap'us, Virga, V. viri'lis, V. genit'alis, Veretrum, Sath'e, Membrum viri'le, Membrum, Vobus, Viri'le, Pars Viri'lis, Membrum seminale seu genitale viro'rum, Morion, Cyon, Sicula, Tentum, Hasta, H. nuptia'lis, H. viri'lis, Vas, Vas'culum, Peculium, Virgula, Vir, Thyrsus, Tensus, Clavus, Cauda salax, Cauda, Fascinum, F. viri'le, Muto, Nervus, N. fistulosus seu fistularis seu juveni'lis, Per'tica per se, Scapus, Vena, Contus, Tolum, Gurgulio, Sceptum, Arma, Gladius, Lubricum Caput, Muti'rus, Palus, Pes'ulus, Radix, Romus, Rutabulum, Arma Ventris, Columna adstantinguin'ibus, Columna, Pyr'amis, Trabs, Spina, Caputula viri'lis, Verpa, Macha'ra, Taurus; the Yard, Male organ, &c. (F.) *Verge, Membrum viril*. This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dorsum penis*, (F.) *Dos de la verge*; and, at its anterior surface, there is a longitudinal projection formed by the canal of the urethra. The two sides of the penis are round, and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra. The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra for the conveyance of the urine and sperm, and of the glans, which terminates the canal. The *Arteries* of the penis are branches of the internal pudic. The *Veins* correspond with the arteries. The *Nerves* are from the internal pudic.*

**PENIS CEREBRI**, Pineal gland—p. *Fœmineus, Clitoris*—p. *Lipodermis, Paraphimosis*—p. *Mulieris, Clitoris*.

**PENNATUS, Penniform.**

**PEN'NIFORM, Penni'formis, Penna'tus**, from *penna*, 'a pen,' and *forma*, 'form.' An epithet for muscles whose fleshy fibres are inserted on each side of a middle tendon, like the feathers of a pen on their common stalk.

**PENNYCRESS, Thlaspi.**

**PENNYROYAL, Mentha pulegium, Hedeoma pulegioides**—p. *Hart's, Mentha cervina*.

**PENSACOLA, see Saint Augustine.**

**PENSÉE, Viola tricolor**—p. *Savagne, Viola tricolor*.

**PENTAMYRON, Pentama'ron**, from *πεντε*, 'five,' and *μυρον*, 'ointment.' An ancient ointment, consisting of five ingredients. These are said to have been—storax, mastich, wax, opobalsam, and unguentum nardinum.—Paulus, and Aëtius.

**PENTAPHARMACON**, from *πεντα*, 'five,' and *φάρμακον*, 'remedy.' Any medicine consisting of five ingredients.

**PENTAPHYLLUM, Potentilla reptans.**

**PENTATEUCH, (SURGICAL), Pentateu'chus**, from *πεντε*, 'five,' and *ταυχος*, 'a book,' which signifies the five books of Moses—Genesis, Exodus, Leviticus, Numbers, and Deutero-

nomy. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes:—wounds, ulcers, tumours, luxations, and fractures.

**PENTATH'ETUM**, from *πεντα*, 'five,' and *ετασ*, 'to place.' An ancient plaster consisting of five ingredients.

**PENULA, Ingulvies.**

**PENZANCE, CLIMATE OF.** This is the chief residence of invalids in Cornwall, England, during the winter. It is situated on Mount's Bay, about ten miles from the Land's End. It is 5½° warmer in winter than London; 2° colder in summer; scarcely 1° warmer in the spring, and only about 2¼° warmer in the autumn. It is a very favourable winter residence for the phthisical invalid.

**PEONY, Pœonia.**

**PEPANSIS, Coction, Maturation.**

**PEPANTICOS, Maturative.**

**PEPASMOS, Coction, Maturation.**

**PEPASTIC, Pepas'ticus**, from *περαστω*, 'I concoct.' A medicine supposed to have the power of favouring the concoction of diseases. Maturative.

**PEPEIRUS, Concocted.**

**PEPINO, (S.) A cucurbitacea**, which is cultivated in great abundance in the fields of Peru. The pulp or edible part is solid, juicy, and well flavoured; but is apt to disagree.

**PEPO, Cucurbita pepo.**

**PEPPER, BLACK, Piper nigrum**—p. *Cayenne, Capsicum annuum*—p. *Cubeb, Piper cubeba*—p. *Guinea, Capsicum annuum*—p. *Jamaica, Myrtus Pimento*—p. *Long, Piper longum*—p. *Poor-man's, Polygonum hydropiper*—p. *Tailed, Piper cubeba*—p. *Turnip, Arum triphyllum*—p. *Water, Polygonum hydropiper*—p. *Water, of America, Polygonum punctatum*—p. *Wall, Sedum*—p. *White, Piper album*.

**PEPPERWORT, Lepidium.**

**PEPSIN, Peps'inum, Chymosin, Gas'terose**, from *πεπτις*, 'coction.' A peculiar organic matter, which in combination with the gastric acids, is considered to form the proper digestive solvent. Its chemical constitution is unknown. It would appear that its presence is necessary to induce changes in the elements of the food, which may enable the gastric acids to act upon them so as to form chyme.

**PEPSINUM, Pepsin.**

**PEPSIS, Coction, Digestion.**

**PEPTIC, Peps'ticus**, from *πεπτις*, 'I ripen.' An agent that promotes digestion, or is digestive. Also, applied adjectively to an article of food that is easy of digestion.

**PERACUTUS, Catoxys.**

**PERARTICULATIO, Diarthrosis.**

**PERATODYNIA, Cardialgia.**

**PERCE-CRANE, Perforator.**

**PERCE-FEUILLE, Bupleurum rotundifolium.**

**PERCE-MOUSSE, Polytrichum.**

**PERCE-PIERRE, Crithium maritimum.**

**PERCEPTA**, from *percipere*, 'to perceive,' 'receive.' A word used by some writers on hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy; in other words, the sensations, the functions of the mind, and their deterioration or privation.

**PERCEPTION, Perceptio.** The apprecia-

tion which the brain has of an impression made on an organ of sense.

**PERCEPTIVITY.** Same etymon. The power of perception.

**PERCOLATIO, Filtration, Percolation.**

**PERCOLATION, Percolatio,** from *percolare*, (*per* and *colare*), 'to strain through.' The terms percolation and *displacement*, have been recently applied in pharmacy to an operation which consists in placing any substance, the virtues of which have to be extracted by a menstruum, on a funnel, having a septum perforated with holes, or its tube stuffed with cotton or tow, and pouring fresh portions of the menstruum upon it until all its virtues have been extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c.

**PERCUSION, Epicrosis, Percussio,** from *percussere*, (*per*, and *quassere*), 'to strike.' When immediate or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained organs; and the physician is thus aided in his diagnosis. For this purpose the chest may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *Mediate percussio*, which consists in interposing, between the point of the fingers and the chest, the finger of the other hand, or a *Placium osæ*, and striking this instead of the naked chest.

**PERCUSSION, AUSCULTATORY,** see ACOUOPHONIA.

**PERCUTEUR COURBE À MARTEAU,** (F.) An instrument used by Baron Heurteloup in the operation of lithotomy, in which a hammer is employed instead of a screw, to force together the blades of the instrument on the foreign body.

**PERDONIUM.** A medicated wine of herbs.—*Paracelsus*.

**PERETERIUM, Trepan.**

**PERETORIUM, Trepan.**

**PERFORANS, from perforare, (per, and forare), 'to bore through.'** A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *perforated*. See *Flexor Longus Digitorum*, &c. Under the name *Perforating Arteries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the abductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

**PERFORANS CASSEI, see Cutaneous—p. Manù, Flexor profundus perforans—p. Profundus, Flexor longus digitorum pedis profundus perforans.**

**PERFORATED SPOT, Locus perforatus.**

**PERFORATING ARTERIES, see Perforans.**

**PERFORATIO, Perforation—p. Cranii, see Perforator—p. Intestinorum, Enterobrosis—p. Ventriculi, Gastrobrosis.**

**PERFORATION, Perforatio, Anatri'sis, Diatri'sis,** from *perforare*, 'to pierce.' An accidental opening in the continuity of organs, either from an external or internal cause.

**PERFORATION, Paracentesis—p. de l'Estomac, Gastrobrosis—p. des Intestins, Enterobrosis—p. Uteri, Uterus, rupture of the.**

**PERFORATOR, Perforatorium, (F.) Perce-**

*crans.* An instrument for opening the head of the fetus in utero, when it is necessary to diminish its size. The operation is called *Cephalotomia, Perforatio cranii*.

**PERFORATORIUM, Perforator.**

**PERFORATUS.** That which is pierced. Anatomists have given this name to muscles whose fibres or tendons separate to suffer other parts to pass through them. Such are the *Flexor brevis digitorum pedis, F. sublimis perforatus,* and *Coraco-brachialis*.

**PERFORATUS CASSEI, Coraco-brachialis.**

**PERFRICATIO, Perfrigerium, Catapsysis, Peripsysis,** from *perfrigere, (per, and frigere), 'to shiver with cold.'* Considerable refrigeration. Great sense of cold:—shivering.

**PERFRIGERATIO, see Rigo.**

**PERFRIGERIUM, Perfrigo.**

**PERFUSIO, Fomentation—p. Frigida, see Affusio.**

**PERI, περι, 'about, on all sides, round about.'**

An augmentative prefix. Hence:

**PERIÆRESIS, from περι, 'about,' and αἶρω, 'I take away.'** A sort of circular incision, which the ancients made in the neighbourhood of large abscesses. The periæresis is now only practised in some cases of tumours.

**PERIAL'GIA, from περι, 'on all sides,' and αλγος, 'pain.'** A very violent pain.

**PERIAMMA, Amuletum.**

**PERIAPTON, Amuletum.**

**PERIBLEMA, Catablema.**

**PERIBLEP'SIS, from περι, 'around,' and βλέπω, 'I look.'** The wild look that accompanies delirium.—*Foësius*.

**PERIBOLE, from περιβάλλω, 'I surround.'** The dress of a person. The pericardium. Also, the translation of morbid matters towards the surface of the body.

**PERIBRO'SIS, Pericra'sis, from περιβρωσσω, (περι, and βρωσσω, 'I eat,') 'I eat around.'** Ulceration or erosion at the corners of the eyelids.

**PERICARDIAC, Pericardial, Pericardiæcus;** same etymon as the next. Relating to the pericardium,—as '*pericardial murmur,*' '*pericardial effusion,*' '*pericardial arteries, veins,*' &c., &c.

**PERICARDITIS, from περικαρδίον, 'the pericardium,' and itis, denoting inflammation;** *Inflammati'o Pericardii, Pleuritis pericardii, Carditis externa seu serosa seu membranosæ, Exocarditis, Inflammation of the pericardium, (F.) Pericardite, Inflammation du Péricarde.* This is, probably, the proper appellation for most of those cases which have received the names of *Carditis, Cardipericarditis, and Cardio-pericarditis*. Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Those which point out that the pericardium is the seat of disease are the following:—pain, referred to the region of the heart, or scrobiculus cordis,—sometimes pungent, at others, dull and heavy; palpitation, accompanied with spasmodic twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo: the breathing is by catches; dyspœna considerable: pulse jarring, jerking, peculiar: the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism. The physical signs during the first period are as fol-

lows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards towards the pericardium. Percussion is usually natural, but at times there is dullness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents corresponding characters. When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction *bruits* resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph. The most important point in the pathology of pericarditis is its connexion with acute rheumatism; and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic*: in either case, it is, of course, formidable. The most active depletion must be used; with large doses of opium, counter-irritants, and all the means required in the most violent internal inflammations.

PERICARDITIS EXUDATORIA SANGUINOLENTA, Hæmopericardium.

PERICARDIUM, *Pericardion*, *Peribolē*, *Membra'na Cor circumplex'a*, *Involu'crum* seu *Ar'cula* seu *Capsa* seu *Cap'sula* seu *Cam'ora* seu *Indumen'tum* seu *Pannic'ulus* seu *Membra'na* seu *Theca* seu *Saccus* seu *Sac'culus* seu *Scrotum* seu *Vagi'na* seu *Vesi'ca* seu *Arca* seu *Thal'amus vesga'lis* seu *Amphico'ma* seu *Bursa Cordis*, *Sac* or *Capsule of the Heart*, (F.) *Pé-ricarde*; from  $\pi\epsilon\rho\iota$ , 'around,' and  $\kappa\alpha\rho\delta\iota\alpha$ , 'the heart.' The pericardium is a membranous sac, which envelops the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular, like that of the heart; to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—fibrous; the other—*internal*—serous. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; without, however, having the heart within it; in which arrangement it resembles other serous membranes. The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid, *Liquor* seu *Aqua* seu *Humor* seu *Lympha* seu *Uri'na Pericar'dii*, *Hydrocar'dia*, which it contains in greater or less quantity.

The *arteries* of the pericardium are small, and derived from the superior phrenic, anterior mediastinal and bronchial. The *veins* accompany them, and open into the brachio-cephalic. No nerves have been traced to it. The *lymphatics* enter the lymphatic glands that surround the vena cava superior.

PERICARPIUM, Epicarpium.

PERICHOLIA, Polycholia.

PERICHONDRI'TIS, *Inflamma'tio perichon'dris*, from *perichondrium*, and *itis*, denoting inflammation. Inflammation of the perichondrium; hence *Perichondri'tis laryngea*;—In-

flammation of the perichondrium covering the larynx.

PERICHONDRUM, from  $\pi\epsilon\rho\iota$ , 'around,' and  $\chi\omicron\rho\delta\eta\varsigma$ , 'a cartilage.' A membrane of a fibrous nature, which covers cartilages that are non-articular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, Circumlitio, Liniment.

PERICHRISTON, Circumlitio, Liniment.

PERICLA'SIS, from  $\pi\epsilon\rho\iota$ , 'about,' and  $\kappa\lambda\alpha\sigma\epsilon$ , 'I break.' A comminuted fracture, with denudation of the bone. Galen, *Foësius*.

PERICLIMENUM, *Lonicera periclymenum*.

PERICNE'MIA, from  $\pi\epsilon\rho\iota$ , 'about,' and  $\kappa\pi\eta\eta\lambda\alpha$ , 'the leg.' The parts surrounding the tibia;—the tibia itself.

PERICRANIEDE'MA, from *pericranium*, and  $\alpha\delta\eta\mu\alpha$ , 'a swelling.' Oedema of the head, owing to fluid effused under the pericranium.

PERICRANIUM, *Pericranion*, *Pericrania*, from  $\pi\epsilon\rho\iota$ , 'around,' and  $\kappa\rho\alpha\nu\omicron\varsigma$ , 'the cranium.' The periosteum, which covers the cranium externally.

PERICRISIS, Peribrosis.

PERIDER'IA, from  $\pi\epsilon\rho\iota$ , 'around,' and  $\delta\epsilon\rho\alpha$ , 'the neck.' Twisting of the cord round the neck of the child.

PERIDES'MIC, *Perides'micus*; from  $\pi\epsilon\rho\iota$ , 'around,' and  $\delta\epsilon\sigma\mu\omicron\varsigma$ , 'a ligament.' Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDES'MIUM; from  $\pi\epsilon\rho\iota$ , 'around,' and  $\delta\epsilon\sigma\mu\omicron\varsigma$ , 'ligament.' The delicate cellular tissue covering a ligament.

PERIDIASTOLE, see Diastole.

PERID'ROMUS, from  $\pi\epsilon\rho\iota$ , 'about,' and  $\delta\epsilon\rho\mu\omicron\varsigma$ , 'a course.' The extreme circumference of the hairs of the head.—Gorræus.

PERIESTICOS, Salutory.

PERIGLOT'TIS, Epiglottic gland; see Tongue.

PERIGRAPHE, from  $\pi\alpha\rho\gamma\rho\alpha\phi\omega$ , ( $\pi\epsilon\rho\iota$ , and  $\gamma\rho\alpha\phi\omega$ , 'I write,') 'I circumscribe.' The aponeurotic intersections of the rectus abdominis are so called.—Vesalius.

PERILYMPH, Cotunnus, liquor of.

PERIMYELITIS, Meningitis, spinal.

PERIMYS'IUM, *Fas'cia*, from  $\pi\epsilon\rho\iota$ , 'around,' and  $\mu\upsilon\varsigma$ , 'a muscle.' The cellular membrane that surrounds a muscle, or its fasciculi. The sheath of the whole muscle is termed *Perimysium externum*; of the fasciculi *Perimysium internum*.

PERIN, *Peris*, from  $\pi\epsilon\rho\iota$ , 'a sac or pouch.' With some, this means the scrotum; with others, the testicle; with others, the vagina; with others, the peritonæum; and with others, the anus.

PERINÆOCELE, Hernia, perineal.

PERINÆ'UM, *Interfemin'eum*, *Interfamin'eum*, *Interfamin'ium*, *Interfa'mina*, *Iter femin'eum*, *Peris*, *Perin*, *Perineum*, *Gressu'ra*, *Plechas*, *Am'philex*, *Poch'deon*, *Mesos'celon*, *Mesos'celus*, *Perind'on*, *Perine'os*, *Perine'os*, *Tramis*, *Tauros*, *Interforamin'dum*, *Cocho'nē*, *Plichos*, *Mesom'e'ri'on*, *Pamen*, *Re'gio Perinæ'i*, (F.) *Perin'de*. The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape, and is divided into two equal parts by a median line, called *Raphé*. It is occasionally rup-

tured in labour. The part between the pudendum and anus is sometimes called *anterior perinaeum*, to distinguish it from the part which extends from the anus to the coccyx, called *posterior perinaeum*.

**PERINÆUS**, Perineal.

**PERINEAL**, *Perinaeus*, *Perinaelis*, *Perinaelis*. That which relates or belongs to the perinaeum; as *Perineal artery*, *P. hernia*, &c.

**PERINEAL APONEUROSIS**, *P. Fascia*.

**PERINEAL ARTERY**, *Arteria perinaelis*, *Superficial artery of the Perinaeum*. A branch of the internal pudic distributed to the perinaeum.

**PERINEAL FASCIA**, *F. Perinaei*, *Perineal aponeurosis*. The fascia—*superficial and deep-seated*—*Perineal ligaments*—which belong to the perinaeum.

**PERINEAL FOSSA**, *Fossa perinaei*, *Ischioanal fossa*. A conical fossa, the base of which corresponds with the skin; is formed anteriorly by the transversus perinaei muscle; behind, by the inferior border of the glutæus maximus; internally, by the levator ani; and externally, by the tuber ischii. It is filled up with fat and fibrous strisæ.

**PERINEAL ISCHURIA**, *Ischuria Perinaelis*. A name given by Sauvages to retention of urine, caused by a tumour seated in the perinaeum.

**PERINEAL LIGAMENT**, see *P. fascia*—*p. Region*, *Perinaeum*.

**PERINÉE**, *Perinaeum*.

**PERINEPHRITIS**, (F.) *Phlegmon pyridiphritique*, from *πυρι*, 'around,' *νεφρις*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the external cellular and fibrous membranes of the kidney, or of their investing adipose cellular tissue.

**PERINEPHRUS**, see *Kidney*.

**PERINEURION**, *Neurilemma*.

**PERYNIC'TIDES**, *νυξ*, and *νυξ*, 'night.' An eruption appearing at night and disappearing by day.—*Erotian*.

**PERIOD**, *Periodus*, *Periodiæ*, *Periodæ*, *Stadîum*, *Circuitus*, from *πυρι*, 'about,' and *εξω*, 'way;' *Circuit*. *Periods* are the different phases or revolutions of a disease,—the epochs which are distinguishable in the course of a disease. Three periods are commonly enumerated. 1. The *augmentation*, *increase*, or *progress*, (*Incrementum*;) 2. The *acme* or height, (F.) *Etas* (*Status*;) and 3. The *decline* (*Decrementum*.) Some authors reckon only the *invasion* and *termination*.

*Period* is sometimes used in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

**PERIODS**, *MONTHLY*, *Menses*.

**PERIODEIA**, *Period*.

**PERIODEUSIS**, *Period*.

**PERIODEUTES**, *Charlatan*.

**PERIODICITY**, *Periodicitas*; same etymon. The aptitude of certain physiological and pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which intervals they cease completely. Diseases, thus recurring, are called *Periodical*.—*Typoææ*.

**PERIODOL'OGY**, *Periodologiæ*; from *πυριδος*, 'a course or circuit,' and *λογος*, 'a discourse.' The doctrine of periodicity in health and disease.

**PERIODONTITIS**, (F.) *Périodontite*, *Inflammation de la Membrane alvéolo-dentaire*, from *πυρι*, 'about,' and *εδου*, 'a tooth.' Inflammation of the membrane that lines the socket of a tooth.

**PERIODONTITIS GINGIVARUM**, *Ulitis*.

**PERIODUS MORBI**, *Type*—*p. Sanguinis*, *Circulation*.

**PERIODYNIA**, from *πυρι*, and *δουρη*, 'pain.' A violent and extensive pain.

**PERIONE**, *Decidua*.

**PERIORBITA**, *Periosteum orbitæ*, from *πυρι*, 'around,' and *orbita*, 'the orbit.' An appellation used, by some, for the periosteum lining the orbit, which is a continuation of the dura mater. The inflammation of this periosteum is termed *Periorbitis* or *Periorbititis*; and *Inflammatio periorbitæ*.

**PERIORBITIS**, see *Periorbita*.

**PERIORBITITIS**, see *Periorbita*.

**PERIOSTEITIS**, see *Periostitis*.

**PERIOSTEUM**, *Periosteon*, *Periosteos*, *Periosteum*, *Circumossale*, *Membrana ossis*, *Omentum ossium*, *Circumossalis Membrana*, from *πυρι*, 'around,' and *οστω*, 'a bone.' The periosteum is a fibrous, white, resisting medium which surrounds the bones every where, except the teeth at their coronæ, and the parts of other bones that are covered with cartilage. The external surface is united, in a more or less intimate manner, to the neighbouring parts by cellular tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and, especially, by a prodigious quantity of vessels, which penetrate their substance. The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Béclard demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels, which penetrate there to carry the materials of their nutrition. See *Medullary membrane*.

**PERIOSTEUM INTERNUM**, *Medullary membrane*—*p. Orbitæ*, *Periorbita*.

**PERIOSTITIS**, *Periostitis*, *Inflammatio periostei*, from *periosteum* and *itis*, denoting inflammation. Inflammation of the periosteum.

**PERIOSTOSIS**. Tumour of the periosteum. Tumours are so called which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner disperse than exostoses, which they resemble greatly.

**PERIPHERAL VASCULAR SYSTEM**, *Capillary system*.

**PERIPHIMOSIS**, *Paraphimosis*.

**PERIPLEUMONIA**, *Peripneumonia*.

**PERIPLOCA INDICA**, *Hemidesmus Indicus*.

**PERIPLYSIS**, from *πυρι*, and *πλυσις*, 'the act of washing;' *Profluviium*. A copious discharge from any part, especially from the bowels.

**PERIPNEUMONIA**, *Peripneumonia*, *Peripneumoniæ*, *Trus peripneumony*, from *πυρι*, 'around,' and *πνευμων*, 'the lung.' Inflammation of the substance of the lungs.—See *Pneumonia*.

**PERIPNEUMONIA BILIO'SA**. Inflammation of the lungs, accompanied with bilious fever.

PERIPNEUMONIA CATARRHALIS, P. notha—p. Pituitosa, P. notha.

PERIPNEUMONIA CATARRHALIS. Bronchitis or pulmonary catarrh, with pain in some part of the chest.

PERIPNEUMONIA NOTHA, P. spuria, P. pituitosa, P. catarrhalis, Pneumonia notha, Pseudo-peripneumonia, Pseudo-pneumonia, Pseudo-peripneumonia, Bronchocæce, Btennothorax, Obstruc'tio pulmonum pituitosa fibrilis, Bronchitis athenica, False or Bastard Peripneumony, (F.) *Péripneumonie bâtarde ou fausse*. An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia.—See Bronchitis (chronic.)

PERIPNEUMONITIS, Peripneumonia.

PERIPNEUMONY, BASTARD, Peripneumonia notha.

PERIPNEUMONY, LATENT. Peripneumony whose symptoms are so obscure as to be recognised with difficulty.

PERIPSYXIS, Catapxyxis, Perfrictio.

PERIPYEMA, from *περι*, 'about,' and *πυον*, 'pus.' Suppuration around an organ;—a tooth, for example.

PERIRRHOËA, *Perirrhoe*, from *περι*, 'about,' and *ρῆω*, 'I flow.' Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, enuresis.

PERIS, Perin.

PERISCCELIS, *Jarretière*.

PERISCYPHISMUS, Periscythismus.

PERISCYTHISMUS, *Periscythisis*, *Perysytis'mus*, *Periscy'tisis*, *Periscy'phisis*, *Periscy'phismus*, *Scalping*, from *περι*, 'around,' and *Σαυθης*, 'a Scythian,' that is, 'scalping after the manner of the Scythians.' An operation described by Paulus of Ægina. It consisted of an incision made around the cranium, and was employed in habitual weakness of the eyes, pains of the head, &c.

PERISPHAL'SIS, *Circumductio*, from *περι*, 'about,' and *σφαλλω*, 'I move.' A circular motion impressed on a luxated bone, for the purpose of reducing it.

PERISSODACTYLUS, Polydactylus.

PERISTALTIC, Systaltic—p. Action, Peristole.

PERISTAPHYLINUS EXTERNUS, *Circumflexus musculus*—p. Inferior, *Circumflexus musculus*—p. Internus, *Levator palati*.

PERISTERIUM, *Verberna officinalis*.

PERISTERNA, from *περι*, 'about,' and *στερνον*, 'the sternum.' The lateral parts of the chest.

PERISTOLË, *Motus Peristalticus*, *M. compressorius seu vermicularis seu testudinæus*, from *περι*, 'around,' and *στέλλω*, 'I contract,' 'I close.' The peristaltic action of the intestines, *Motus peristalticus*. It consists of a kind of undulation or vermicular movement, in appearance irregular, but in which the circular fibres of the muscular membrane of the intestine contract successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an antiperistaltic action. The peristaltic action is involuntary, and is not under the im-

mediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMA, Peristroma.

PERISTOMIUM, Mouth.

PERISTROMA, *Peristoma*, *Musculus villosus*, *Crusta membrana'cea*, *Crusta vermicularis*, from *περι*, 'around,' and *σπέρνυμι*, 'to spread.' The villous or mucous coat of the intestines.—Castelli.

PERISYSTOLË, from *περι*, 'about,' and *συστολή*, 'a contraction.' The interval that exists between the systole and diastole of the heart, which is only perceptible in the dying.—Bartholine.

PERITERION, *Trépan perforatif*.

PERITESTIS, Albuginea.

PERITONE, Peritonæum.

PERITOME, Circumcision.

PERITONÆRIX'IS, *Peritonæorix'is*, from *περιτοναιον*, 'the peritonæum,' and *γρηνα*, 'I break.' Hernia formed by the rupture of the peritonæum.

PERITONÆUM, *Peritonæum*, *Peritonæon*, *Peritonæion*, *Peritonæos*, *Peritonæion*, *Peritonæos*, *Velamentum abdominale*, *Tunica præterea seu Operimentum præternum seu Membrana abdominalis*, *Siphar*, *Syphar*, *Zephach*, *Ziphac*, (F.) *Péritoine*, from *περι*, 'around,' and *τενω*, 'I stretch.' A serous membrane, which lines the abdominal cavity; extends over the greater part of the organs contained there; envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds:—the *mesentery*, *epiploon*, *mesocolon*, &c. Like all the serous membranes, the peritonæum is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal surface of which is smooth, and lubricated by a serous fluid. In the male fœtus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fœtus, forms the *Canal of Nuck*. Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Foramen or Hiatus of Winslow*, through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *posterior cavity of the peritonæum*, (F.) *Arrière cavité péritonéale ou Cavité des Epiploons*.

PERITONÆUM DUPLICATUM, *Epiploon*, *gastrocolic*.

PERITONITE, Peritonitis—p. *Puerperale*, see Peritonitis.

PERITONITIS, *Empres'ia Peritonitis*, *Peritonæitis*, *Cauma Peritonitis*, *Inflammatio Peritonæi*, *Phlog'omè peritonæi*, *Phlegm'acia* or *Inflammation of the Peritonæum*, from *peritonæum*, and *itis*, denoting 'inflammation.' (F.) *Péritonite*, *Inflammation du Péritoine*. The characteristic signs of acute inflammation of the peritonæum are,—violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state; and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious, variety has made its appearance, and destroyed numbers of females. This has been described under the name *Puer'peral Fever*, *Métroperitonitis*, *Enc'cia Syn'ochus Puerperarum*, (F.) *Péritonite puerperale*, *Métroperitonite pu-*

*erysipala*, *Fibore purpurale*, *Typhus purpurale*, *Erythematice* or *Nonplastic Purperal Peritonitis*, *Typhohæmic Peritonitis*, *Adynamice* or *Malignant Purperal Fever*, *Low Fever of Childbed*. It is, according to some, a malignant inflammation of the peritoneum and uterus; according to others, a *Uterine Phlebitis*. In any form it requires the most active treatment, early employed. The appearances on dissection are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane. The treatment—in *active peritonitis*—must consist of the same course as recommended under Enteritis. In the *chronic* kind, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury. In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it is of the most decided advantage. Every thing depends upon arresting the morbid process at the outset.

**PERITONITIS, ERYTHEMATIC, see Peritonitis**—*p.* Nonplastic, see Peritonitis—*p.* Purperal, see Peritonitis—*p.* Typhohæmic, see Peritonitis.

**PERITTOMA, Excrement.**

**PERITYPHLITIS**; from *περι*, 'around,' and *typhlitis*, inflammation of the cæcum. Inflammation of the cellular substance surrounding the cæcum. See Typhlo-enteritis.

**PERIWINKLE, LESSER, Vinca minor.**

**PERIZOMA**, from *περιζώνω*, (*περι*, and *ζώνω*, 'to gird,') 'to gird around.' A bandage; a girdle. In Fabricius Hildanus, a truss. Herpes zoster. The diaphragm.

**PERKINISM.** A therapeutical means, first employed by Dr. Elisha Perkins of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal. The success obtained, was through the influence of the imagination; and, consequently, as a remedial agent, it ranks as high as animal magnetism, but no higher. The operation was, also, called *Tractoration*.

**PERLA, Pearl, Paralampsis.**

**PERLE, Pearl.**

**PERMISTIO, Coition.**

**PERMIXTIO, Coition.**

**PERMOTIO, Motion.**

**PERNICIEUX, Deleterious.**

**PERNICIOSUS, Deleterious.**

**PERNIO, Childblain.**

**PERNOCTATIO, Insomnia.**

**PEROCEPHALUS**, from *προς*, 'deficient,' and *κεφαλή*, 'head.' A monster with a defective head.

**PEROCORMUS**, *Oligocephalus*, from *προς*, 'defective,' and *κορμος*, 'trunk.' A malformation in which the trunk is defective, and too short, from the absence of one or more vertebrae,—the head and limbs being normal.

**PERODACTYLEUS, Flexor longus digitorum pedis profundus perforans.**

**PERODYNIA, see Cardialgia.**

**PEROMELIA**, from *προς*, 'wanting,' and *μέλος*, 'a limb.' Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

**PEROMELUS.** A monster possessed of the deformity mentioned above.

**PERONÉ, Fibula**—*p.* *Col du, Collum fibulae.*

**PERONÉAL, Peronæus, Fibularis, Fibular**, from *περον*, 'the fibula.' Belonging or relating to the fibula.

**PERONÉAL ARTERY, Fibular A.**, arises from the popliteal, and is situate deeply at the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. 1. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

**PERONÉAL MUSCLES** are three in number. 1. *Peronæus Brevis, P. Secundus, P. anticus, P. Medius, Semi-fibularis, (F.) Grand-peronæus-métatarsien, Court péronéo-latéral, Mogen Péronier*. A muscle, situate beneath the peronæus longus. It is attached above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot. 2. *Peronæus Longus, Peronæus primus seu posticus, P. maximus seu posterior, (F.) Tibi-péronotarsien, Long péronier latéral, Péronéo-sous-tarsien, (Ch.) Muscle grand péronier*. This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached above to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot. 3. *Peronæus Tertius, Nonus Vesslii, (F.) Péronier antérieur, Petit péronéo-sus-métatarsien (Ch.) Petit Péronier*. A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

**PERONÉAL NERVE, see Popliteal nerves.**

**PERONÉAL VEIN** follows the same course as the artery.

**PERONÉ DACTYLIIUS, Flexor longus digitorum pedis profundus perforans.**

**PERONÉO-LATÉRAL COURT, Peronæus brevis**—*p.* *Phalangien du gros orteil, Flexor longus pollicis pedis*—*p.* *Sous-phalangien du pouce, Flexor longus pollicis pedis*—*p.* *Sous-tarsien, Peronæus longus*—*p.* *Sus-métatarsien, Peronæus tertius*—*p.* *Sus-métatarsien, grand, Peronæus brevis*—*p.* *Sus-phalangien du pouce, Extensor proprius pollicis pedis*—*p.* *Tibi-sus-phalangien commun, Extensor communis digitorum pedis*—*p.* *Sus-phalangien du pouce, Extensor proprius pollicis pedis.*

**PERONEUM, Fibula.**

**PERONIER, GRAND**, *Peronæus longus*—*p. Latral, long*, *Peronæus longus*—*p. Moyen*, *Peronæus brevis*—*p. Petit*, *Peronæus tertius*.

**PERONODACTYLÆUS**, *Flexor longus digitorum pedis profundus perforans*.

**PERONODACTYLUS**, *Flexor longus digitorum pedis profundus perforans*.

**PEROSO'MUS**, from *πρῶτος*, 'mutilated,' and *σῶμα*, 'body.' A monster, whose whole body is imperfectly developed.—Gurit.

**PEROSPLANCH'NICA**, from *πρῶτος*, 'wanting,' and *πλάγχθον*, 'a viscus.' Congenital misconstruction of the viscera. A genus in the nosology of Good.

**PERPENDICULUM HEPATIS**, Suspensory ligament of the liver.

**PERPERACU'TUS**. Extremely acute. An epithet applied to very violent and rapid diseases.

**PERPLEXI MORBI**, see Complication.

**PERROSIN**, see *Pinus abies*.

**PER'SEA GATIS'SIMA**, *Palta tree*. A slender, very high tree of Peru, with a small dome-like top, which grows on the eastern declivity of the Andes, and rises, at times, to the height of more than 60 feet. Its fruit,—(Sp.) *Palta*—which is pear-shaped, is generally much liked. It dissolves, like butter, on the tongue, and hence is called, in some of the French colonies, *beurre végétale*.

**PERSIAN FIRE**, Anthracion.

**PERSICAIRE DOUCE**, *Persicaria*.

**PERSICARIA**, *Polygonum Persicaria*—*p. Urens*, *Polygonum hydropiper*.

**PERSIL**, *Apium petroselinum*—*p. d'Ano*, *Cherophyllum sylvestre*—*p. Fauz*, *Æthusa cynapium*—*p. de Macédoine*, *Bubon Macedonicum*—*p. de Montagne*, *Athamanta aureoselinum*.

**PERSIMMON**, *Diospyros Virginiana*.

**PERSOLATA**, *Arctium lappa*.

**PERSOLLATA**, *Arctium lappa*.

**PERSOLUTA**, *Arctium lappa*.

**PERSPICILLUM**, see Spectacles.

**PERSPIRATION**, *Perspiration*, *Transpiration*, *Diffusio*, *Diapnoë*, *Diapna'a*, *Diapnoë'sis*, from *per*, 'through,' and *spirare*, 'to breathe, exhale.' The *insensible transpiration* or exhalation continually going on at the surface of the skin and membranes. Sensible perspiration is called *suat*. The perspiratory fluid is secreted by an appropriate apparatus, termed by Breschet *diapnoë'sis*, or *sudoriferous*, *Gland'ulæ sudorif'aræ*, *Organa sudorif'ara*, consisting of a secreting parenchyma, situate beneath the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary exhalation* or *transpiration* is that which takes place into the bronchia, and is sent out with the expired air.

**PERSUDATIO**, *Diapedesis*.

**PERSULTATIO**, *Diapedesis*.

**PERTE**, *Metrorrhagia*—*p. d'Appetit*, *Anorexia*—*p. de la Mémoire*, *Amnesia*—*p. de l'Odo'rat*, *Anosmia*—*p. de Sang*, *Hæmorrhagia*—*p. de la Voiz*, *Aphonia*—*p. de la Vue*, *Cæcitas*.

**PERTÉBRANT**, *Pertébrans*; from *per*, 'through,' and *terebere*, 'to bore.' The French give this epithet to an acute pain—*Douleur pertébrante*—which occasions a sensation like that which would be produced by an instrument

penetrating and lacerating a part;—the pain from whitlow, for example.

**PERTES BLANCHES**, *Leucorrhœa*—*p. de Sang*, *Metrorrhagia*—*p. Séminales*, *Spermatorrhœa*—*p. Uterines*, *Metrorrhagia*—*p. Uterines rouges*, *Metrorrhagia*—*p. Uterines blanches*, *Leucorrhœa*.

**PERTICA PER SE**, *Penis*.

**PERTURBATIONES ANIMI**, Affections of the mind.

**PERTURBATRIX**, (*Medicina*) *Perturbating Treatment*, (F.) *Méthode ou Médecine perturbatrice*. A mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. It is the antithesis to the *Medicina expectans*. Much evil has resulted from such treatment, especially in febrile diseases.

**PERTUSSIS**, from *per*, a prefix denoting excess, and *tussis*, 'cough.' *Tussis fori'na*, *T. convulsi'va*, *T. pu'eros strang'ulans*, *T. quinta*, *T. stomachi'sis*, *T. an'hela clamo'sa*, *T. stram'gulans*, *T. delas'sans*, *T. suffocans*, *T. amphomer'ina*, *T. tusticulo'sa*, *T. spasmod'ica*, *Bronchi'tis convulsi'va*, *Bronchocephali'tis*, *Pneusis pertus'sis*, *Amphomer'ina*, *Orthopna'a tusticulo'sa*, *clango'sa*, *suffocati'va*, *clamo'sa*, *spasmod'ica*, *Morbus Cucul'us*, *Morbus cucullari'sis*, *Bechorthopna'a*, *Bez convulsi'va*, *Bez theri'odes*, *Hooping-cough*, *Whooping-cough*, *Chin-cough*, *Kin-cough*, *Kind-cough*, (Germ. *K in d*, 'a child,') (F.) *Coqueluche*, *Catarrhs on Bronchite convulsive*, *Toux convulsive*, *T. quintese*, *T. bleue*, *Maladie cuculaire*. A violent convulsive cough, returning by fits, (F.) *Quintess*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed to be contagious, and attacks the young more particularly. It is rare for it to affect an individual for the second time. The duration is various,—six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however, give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be much pensive pain of the head, or fever, V. S. may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decided relief, and aid in the expectoration of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this, even should the change be to an atmosphere that is less pure.

**PERU**, see Lima.

**PERUNCTIO**, *Inunction*.

**PERVENÇHE**, *Vinca minor*.

**PERVERSION**, *Perver'sio*, from *per* and *vertere*, 'to turn.' *Dias'trophè*, *Diastrom'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The humourists used

this term also to designate disorder or morbid change in the fluids.

**PERVERSION DE LA TÊTE DES OS ET DES MUSCLES**, Loxarthrus.

**PERVIGILIUM**, Insomnia, Coma vigil.

**PES**, πῆξ, ἰχθυός, (F.) *Pied*, 'the foot.'

The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts;—the *tarsus*, *metatarsus*, and *toes*.

**PES ALEXANDRINUS**, Anthemis pyrethrum—p. Anserinus, Chenopodium bonus Henricus, Facial nerve—p. Cati, Antennaria Dioica—p. Equinus, see *Kyllosis*—p. Hippocampi major, Cornu ammonis—p. Hippocampi minor, Hippocampus minor—p. Hippopotami major, Cornu ammonis—p. Hippopotami minor, Cornu ammonis—p. Leonis, Alchemilla.

**PESANTEUR**, Weight—p. *Spécifique*, Gravity, specific.

**PÈSE-LIQUEUR**, Areometer.

**PESSARY**, *Pessarium*, from πῆσος, 'a small stone.' *Pessus*, *Pessum*, *Pes'ulus*, *Supposito'rium uterinum*, *Glans*, *Lomnis'cus*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal hernia reduced, &c. The ancients made use of medicated pessaries, which they distinguished into emollient, astringent, aperient, &c. The form of pessaries is very variable;—round, oval, &c., according to circumstances.

**PESSARY**, EGYPTIAN, Ægyptius *pessus*.

**PESSULUS**, Pessary, Penis.

**PESSUM**, Pessary.

**PESSUS**, Pessary.

**PEST**, Plague.

**PESTE**, Plague.

**PETICHLÆ**, *Petechiæ*.

**PETICLÆ**, *Petechiæ*.

**PETILENCE**, *Pestilentia*, *Pestil'itas*, from *pestis*, 'a pest.' A malignant spreading disease;—applied especially to plague.

**PETILENCE**, CHOLERIC, Cholera spasmodica—p. Glandular, Plague—p. Hæmagatrica, Fever, yellow—p. Septic, Plague.

**PETILENT-WORT**, Tussilago petasites.

**PETILENTIA**, Plague—p. Hæmagatrica, Fever, yellow.

**PETILENTIAL**, *Pestilentia'lis*, *Pestilentia'rinus*, *Pestilentio'sus*, *Pestilent'ius*, from *pestis*, 'a pest.' Relating to the plague. *Pestilential diseases* are those that bear some resemblance to the plague, in respect to mode of propagation, symptoms, danger, &c.

**PETILITAS**, Plague.

**PESTIS**, Plague—p. Acutissima, Plague—p. Adeno-septica, Plague—p. Americana, Fever, yellow—p. Bellica, Typhus—p. Britannica, Sudor Anglicus—p. Bubonaria orientalis, Plague—p. Contagiosa, Plague—p. Glandulosa, Plague—p. Glossanthrax, Glossanthrax—p. Inguinaria, Plague—p. Intertropica, Fever, yellow—p. Occidentalis, Fever, yellow—p. Orientalis, Plague—p. Septica, Plague—p. Variolosa, Variola.

**PET**, Fart.

**PETALE**, Phtheiriasis.

**PETASITES**, Tussilago petasites.

**PETAURUM**. A seat suspended by ropes, in which a person taking the exercise sat, and

was tossed about by assistants.—Juvenal and Martial.

**PETE'CHLÆ**, *Petic'ula*, *Pestic'h'ia*, *Pestic'ia*, *Punctic'ula*, *Purpura maligna*, *Por'phyra Græco'rum*. Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

**PETECHIA SINE FEBRE**, *Purpura simplex*.

**PETECHIAL SCURVY**, *Purpura simplex*.

**PETECHIANOSIS**, *Purpura hæmorrhagica*.

**PETER'S PILLS**, *Pilulæ Aloes* et Cambergiæ—p. Worm lozenges, see *Worm lozenges*, Sherman's.

**PETICULÆ**, *Petechiæ*.

**PETIGO**, Impetigo.

**PETINA**, Sole.

**PETIOLUS**, *Pediolus*, diminutive of *pes*, 'a foot.' A footstalk or leafstalk of a plant.

A petiole.

**PETIOLUS EPIGLOTTIDIS**. The root of the epiglottis.

**PETIOLUS MALLEI**, Manubrium mallei.

**PETIT COURIER**, Influenza—p. *Lait*, Serum lactis—p. *Lait d'Hoffmann*, Serum lactis Hoffmanni—p. *Mal*, see *Epilepsy*—p. *Sus-mazillo-labialis*, Levator anguli oris.

**PETITE POSTE**, Influenza.

**PETRÆLEUM**, Petroleum.

**PETRÆUM**, *Solidago virgaurea*.

**PETRAPTIUM**, Bubon Macedonicum.

**PETRÆOLE**, Petroleum.

**PÊTREUX**, (OS,) see *Temporal bone*.

**PETRO DEL PÓRCO**, Bezoar of the Indian porcupine.

**PÊTROLE**, Petroleum.

**PETRO'LEUM**, *Petro'leum*, *Petræleum*, *Petra oleum*, *Bitu'men Petro'leum*, *Pissela'um Indicum*, *Rock Oil*, *Petroleum Barbaden'se*, *Barbadoes Tar*, (F.) *Pétrôle* ou *Pétrôle*, from *πετρος*, 'rock,' and *ελαϊον*, 'oil.' A bituminous substance of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish brown colour; insoluble in water and alcohol; combined with fixed and essential oils and sulphur; and is partially soluble in ether. The petroleum, found at Gabian, near Beziers, in France, has been called *Oleum Gabianum*, (F.) *Huils de Gabian*, *Petroleum rubrum*.

**PETRO-OCCIP'ITAL**, *Petro-occipita'lis*.

Belonging to the petrous portion of the temporal bone and to the occipital bone.

**PETRO-OCCIPITAL SUTURE** is formed by the junction of the petrous portion of the temporal to the occipital bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

**PETRO-SALPINGO-PHARYNGEUS**. A fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See *Constrictor*.

**PETRO-SALPINGO-STAPHYLINUS**, *Circumflexus*—p. *Salpingo-staphylinus*, *Levator palati*—p. *Staphylin*, *Levator palati*.

**PETRO-SPHENOID'AL**, *Petro-sphenoida'lis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

**PETRO-SPHENOIDAL SUTURE**;—a name given to the small suture which is formed by the anterior edge of the petrous portion of the tempo-

ral bone and the posterior edge of the sphenoid.

**PETROLEUM BARBADENSE**, Petroleum.

**PETROLEUM SULPHURATUM**, *Balsamum Sulphuris Barbadiense*.—(Composed of petrol. Barbadiense, 3xvj, Mor. Sulph. 3iv, has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose, gr. x to xxx. Externally, it is used as a stimulant and discutient.

**PETROSAL**, Petrosus.

**PETROSELINUM**, *Apium petroselinum*—p. Macedonicum, *Bubon Macedonicum*.

**PETROSUM**, OS, see Temporal.

**PETROUS**, *Petrosus*, *Petro'sal*, from πέτρος, 'a stone.' Resembling stone; having the hardness of stone.

**PETROUS GANGLION**, *Petrosal Ganglion*, *Ganglion of Andersch*, is formed by the glossopharyngeal nerve, shortly after it emerges from the jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the Vidian nerve.—See *Otic ganglion*. This has been called the *Nerve of Jacobson*, and the inosculation, *Jacobson's Anastomosis*.

**PETROUS PORTION OF TEMPORAL BONE**, see Temporal Bone—p. Process, see Temporal Bone.

**PETROUS SINUSES**, *Petrosal Sinuses*, are two venous sinuses of the dura mater, connected with the petrous portion of the temporal bone, and distinguished on each side, into:—1. The *superior petrosal sinus*. It arises from the cavernous sinus; follows the upper edge of the petrous portion which affords it a gutter; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus where the latter experiences a bend near the base of the pars petrosa. Its form is triangular. 2. The *inferior petrosal sinus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basilar process; and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It is triangular, and broader at its extremities than middle.

**PETUM**, *Nicotiana tabacum*.

**PEUCE**, *Pinus sylvestris*.

**PEUCEDANUM OFFICINALE**, *Marathrum sylvesterre*, *Marathrophylitum*, *Pinastellium*, *Faniculum porcinum*, *Bonus Geranium*, *Hog's Fennel*, *Sulphurwort*, (F.) *Queus de Pourceau*, *Fenouil de Porc*. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. The root has a strong, fetid smell—somewhat resembling that of sulphureous solutions—and an acrid, unctuous, bitterish taste. It has been recommended as antihysterical and nervine.

**PEUCEDANUM SILAUS**, *Saxifraga vulgaris*, *S. Anglica*, *Hippomarathrum*, *Faniculum erraticum*, *English or Meadow Saxifrage*, (F.) *Séséli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatives. Rarely used.

**PEUPLIER NOIR**, *Populus*.

**PEXYR**, Concretion.

**PEYERI GLANDULÆ**, *G. Peyeriana*, *Peyeri Plezus glandulosi*, *Glandula mucosa*

*coagminata seu agminata seu muciparæ coagminatim congestæ intestino-rum*, *G. intestinalis seu pleziformes seu spuria*, *Corpuscula glandularum similis seu glandula in agmen congregata intestino-rum*, *Enteradenes*, *Peyer's Glands*, *Agminated glands*. Small glands or follicles, situate beneath the villous coat of the intestines. They are clustered together, having a honey-comb appearance—*Plaques gaufrées*—and are extremely numerous. They occur most numerous in the lower portion of the ileum. Their structure and functions are not well known.

**PEZA**, πῆζα, Doric and Arcadian for πῆξ, 'a foot.' The foot: according to some, the sole of the foot; and to others, the astragalus. The ankle.

**PEZIZA seu PEZEZA AURICULA**, *Auricula Juda*, *Fungus sambucinus*, *Agaricus Auricula formæ*, *Jew's Ear*. This fungus is said to be astringent; but has chiefly been used as a gargle in relaxed sore throat.

**PFEFFERS** or **PFÄFFERS**, **MINERAL WATERS OF**. *Thermæ Piperisæ*, *Th. fabarizæ*. These springs, which are in the Swiss Alps, are simply thermal: temperature 100° of Fahrenheit.

**PHACE**, **PHA'CEA**, *Phacus*, φακς; a grain of the lentil, *Ervum lens*. Also, chloasma; the crystalline lens; and a flask for the application of heat, so called owing to its flattened lens-like shape.

**PHACELLUS**, *Fasciculus*.

**PHACELUS**, *Fasciculus*.

**PHACHYMENITIS**, *Phachyemenitis*.

**PHACI**, *Ephelides*.

**PHACICUS**, *Phaco'tus*, *Phaco'des*; from φακς, 'lens.' Lens-shaped, Lenticular.

**PHACITIS**, *Phacoiditis*, *Lentitis*, *Crystallitis*, *Glonitis*, from φακς, 'a lens,' and ἴτις, a termination denoting inflammation. Inflammation of the crystalline lens. Inflammation of the capsule of the lens is termed *Capsitis*, *Capsulitis*, and *Crystalino-capsulitis*.

**PHACODES**, *Phacicus*.

**PHACHYMENITIS**, *Phachyemenitis*, *Phachyemenitis*, *Inflammatio capsulae lentis*; from φακς, 'a lens,' μεμνη, 'a membrane,' and ἴτις, denoting inflammation. Inflammation of the capsule of the crystalline.

**PHACOIDITIS**, *Phacitis*.

**PHACOPEIS**, *Phaco'tus*; from φακς, 'lens,' and πῆξ, 'a knife,' *Scalpelum lentiscula're*. A lenticular-shaped knife.

**PHACOPSIS**; from φακς, 'lens,' and ὄψις, 'vision.' The state of one who has chloasma or freckles on the face.

**PHACOPTIS'ANA**, *Phacium*; from φακς, 'lens,' and πῆξω, 'drink.' A drink of lentils. A poultice of lentils.

**PHACOS**, *Ervum lens*.

**PHACOSCOTOMA**, *Cataract*.

**PHACOTUS**, *Phacicus*, *Phacopsis*.

**PHACUS**, *Phace*.

**PHADARODES**, *Trachoma tuberculosum*.

**PHADAROSIS**, *Trachoma tuberculosum*.

**PHENIGMUS**, *Phenigmus*.

**PHENOMENOLOGIA**, *Semeiology*.

**PHENOMENON**, *Phenomenon*.

**PHAGÆNA**, *Boulimia*.

**PHAGEDÆNA**, *Boulimia*—p. Sloughing of the mouth, *Cancer aquaticus*—p. *Gangrenosa*, *Hospital gangrene*.

**PHAGEDENIC**, *Phageda'nicus*, *Depas'cons*, from φαγω, 'I eat.'

**PHAGEDENIC ULCER**, *Nomē, Phageda'na*, *Ulcus depas'cons*, is one which rapidly eats and corrodes the neighbouring parts.

*Phageden'ic*, in *Materia Medica*, is a substance used for destroying fungous granulations in ulcers, &c.

**PHAKOHYMENTITIS**, *Phacohymenitis*.

**PHALACRA**, Calvities.

**PHALACROMA**, Calvities.

**PHALACROSIS**, Calvities.

**PHALACROTIS**, Alopecia.

**PHALAIJA**. A barbarous term, employed by Basil Valentine to designate a universal medicine or panacea.

**PHALANGAL**, *Phalangian*, *Phalangia'nus*. Having relation to a phalanx.

**PHALANGARTHRI'TIS**; from φαλαγγί, 'a phalanx,' ἀρθρον, 'a joint,' and *itis*, denoting inflammation. Gout in the fingers. Inflammation of the joints of the fingers.

**PHALANGE**, *Phalanx*.

**PHALANGES DES DOIGTS**, see *Phalanx*—p. of the Fingers, see *Phalanx*—p. *des Orteils*, see *Phalanx*—p. of the Toes, see *Phalanx*.

**PHALANGETTES**, see *Phalanx*.

**PHALANGETTIEN**. Professor Chaussier uses this term for any thing relating to the third phalanx of the fingers or toes,—*Phalangien*, for what relates to the first,—and *Phalanginien*, to the second.

**PHALANGIAN**, *Phalanga*.

**PHALANGINES**, see *Phalanx*.

**PHALANGOSIS**, *Hispid'itas*, from φαλαγγί, 'a row of soldiers.' An affection of the eyelids in which the lashes are arranged in two or three rows. See *Trichiasis*. Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

**PHALANX**, *Phalan'ge*, *Phalango'ma*, same etymon. A name given to the small bones which form the fingers and toes, because placed along side each other like a phalanx. They are distinguished into the *Phalanges of the fingers*, *Ossa seu Ag'mina seu A'cies seu Artic'uli seu Scutic'ula seu Scu'tula seu Nodi seu Internodia seu Scy'talides seu Con'dyli Digito'rum Manū;* and the *Phalanges of the Toes*, *Ossa seu Artic'uli seu Internodia Digito'rum Pedis*.

1. *Phalanges of the fingers*, (F.) *Phalanges des Doigts*. They are, in each hand, 14,—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The first or *metacarpal*, *Procon'dyli*, (F.) *Premières phalanges* or *Phalanges métacarpiennes*. 2. The second or *middle phalanges*, (F.) *Secondes phalanges* or *Phalanges moyennes*, *Phalangines*, (Ch.) 3. The third *phalanges*, *Metacon'dyli*, *Phalan'ges un'guium*, (F.) *Troisièmes phalanges* or *Phalanges unguéales*, *unguifères*, *unguinales*, *Phalangettes*, (Ch.) which terminate each finger, and support the nail. II. *Phalanges of the Toes*, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other; and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the supe-

rior extremity, and the other for the body and inferior extremity.

**PHAL'ARIS CANARIENSIS**, *Cultivated Canary Grass*, (F.) *Alpista*. Family, Gramineæ. *Sex. Syst.* Triandria Digynia. The seed of this grass, *Canary seed*, (F.) *Graines d'aspic*, afford a nourishing meal. The ancients recommended them for allaying pains in the kidney and bladder.

**PHALLAL'GIA**, *Phallosyn'ia*, from φαλλος, 'the male organ,' and αλγος, 'pain.' Pain in the male organ.

**PHALLANCYLOSIS**, *Chordee*.

**PHALLITIS**; *Priapi'tis*, from φαλλος, 'the male organ,' and *itis*, a suffix denoting inflammation. Inflammation of the male organ.

**PHALLOCAMPSIS**, *Chordee*.

**PHALLOCARCINO'MA**, from φαλλος, 'the male organ,' and καρκινωμα, 'cancer.' Carcinoma or cancer of the penis.

**PHALLODYNIA**, *Phallalgia*.

**PHALLON'CUS**; from φαλλος, 'the male organ,' and ουσος, 'swelling.' Tumefaction of the male organ.

**PHALLOPSOPH'IA**, from φαλλος, 'the male organ,' and ψοφος, 'a noise.' Discharge of wind from the male urethra.

**PHALLORRH'GIA**, from φαλλος, 'the male organ,' and ερρηγμι, 'I break out.' Hemorrhage from the male urethra. Stimatosis.

**PHALLORRH'EA**, *Gonorrhœa*.

**PHALLORRHOIS'CHESIS**, from φαλλος, 'the male organ,' ροη, 'discharge,' and ισχυσι, 'to withhold.' Sudden arrest of a gonorrhœal discharge.

**PHALLUS**, *Penis*.

**PHANEROG'AMOUS**, *Phanerogam'ic*, *Phanerogam'icus*, from φανερος, 'evident,' and γαμος, 'marriage.' An epithet used by botanists for plants whose sexual organs are apparent. It is, consequently, the opposite to *cryptogamous*.

**PHANTASIA**, *Delirium*, *Imagination*.

**PHANTASM**, *Phantas'ma*, *Phanto'ma*, *Phantasma*, from φαντασθαι, 'I make appear.' A phantom, false appearance, apparition. Hallucination. Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

**PHANTASMA**, *Pseudoblepsia*.

**PHANTASMATOSCOPIA**, *Metamorphopsia*.

**PHANTASMOSCOPIA**, *Metamorphopsia*.

**PHANTOM**, *Fantom*.

**PHANTOMA**, *Phantasma*—p. *Obstetricium*, *Fantom*.

**PHARMACEIA**, *Poisoning*.

**PHARMACEUM**, *Apotheca*.

**PHARMACEUS**, *Apothecary*.

**PHARMACEUTA**, *Apothecary*.

**PHARMACEUTIC**; *Pharmacu'ticus*, from φαρμακον, 'a medicine.' An epithet for every thing belonging to pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

**PHARMACEUTICE**, *Pharmacy*.

**PHARMACEUTIST**, *Apothecary*.

**PHARMACIEN**, *Apothecary*.

**PHARMA COCATAGRAPHOLOG'IA**, *Catagrapholog'ia*, from φαρμακον, 'a medicine,' κατα, 'beneath,' γραφη, 'a writing,' and λογος, 'a description.' The art of writing prescriptions.—J. J. Plenck.

**PHARMACOCHYMIA**, *Chymistry*, *pharmaceutical*.

**PHARMACODYNAMICS**, from *φαρμακον*, 'a medicine,' and *δυναμις*, 'power.' *Pharmacodynamica doctrina*, *Pharmacodynamilog'ia*. A division of pharmacology, which considers the effects and uses of medicines.

**PHARMACODYNAMIOLOGIA**, Pharmacodynamics.

**PHARMACOGNOSIA**; *Acognos'ia*, *Acognos'ia*, from *φαρμακον*, 'a medicine,' and *γνωσις*, 'I know.' A division of pharmacology, which treats of simples, or unprepared medicines.

**PHARMACOLOGIA**, *Materia medica*.

**PHARMACOMANIA**; from *φαρμακον*, 'a medicine,' and *μανια*, 'mania.' One who has a mania for prescribing or for taking medicine.

**PHARMACON**, Poison.

**PHARMACOPEIA**, *Pharmacopoe'a*, (F.) *Pharmacopoeis*; from *φαρμακον*, 'a medicine,' and *ποιω*, 'I make.' A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority. Formerly, a chemical laboratory, *Laboratorium chymicum* seu *pharmacaceuticum*.

**PHARMACOPEUS**, Apothecary, Druggist.

**PHARMACOPOLA**, Apothecary, Druggist.

**PHARMACOPOLE**, Apothecary, Druggist.

**PHARMACOPOLIUM**, *Apotheca*, *Officina*, *Taberna Medica*. The shop of the druggist or apothecary, from *φαρμακον*, 'a medicine,' and *πωλω*, 'I sell.'

**PHARMACOPOSIA**, from *φαρμακον*, 'a medicine,' and *ποσις*, 'a portion.' A liquid medicine, especially one that is cathartic.

**PHARMACOSA MEDICAMENTA**, from *φαρμακον*, 'a poison.' Medicines that contain poisonous substances.—*Fallopium*.

**PHARMACOTHECA**, *φαρμακοθηκη*, from *φαρμακον*, 'a medicine,' and *τιθημι*, 'I place.' A case for medicines.

**PHARMACOTHERAPIA**, from *φαρμακον*, and *θεραπεια*, 'treatment.' Cure of diseases by remedies.

**PHARMACTER**, Apothecary.

**PHARMACUM**, Medicament, Poison—*p. Ægyptiacum*, *Ægyptiacum*—*p. Amatorium*, *Philtre*.

**PHARMACUM AD AURES**, *Ægyptium Medicamentum ad Aures*. A name given to a medicine, composed of bitter almonds, white pepper, saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate bark, unguentum nardinum, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

**PHARMACURGICUS**, Apothecary.

**PHARMACURGUS**, Apothecary.

**PHARMACY**, *Pharmacia*, *Pharmacuetice*, *Pharmacia*, from *φαρμακον*, 'a medicine.' The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galenical* and *Chymical*. The former, called after Galen, embraced the operations undertaken on medicines without chymistry:—the latter, *Chymical Pharmacy* or *Pharmacuetic Chymistry*, *Pharmacochymia*, comprised the preparation of medicines, founded on the chymical action of their principles.

**PHARMAXIS**, Pharmacy.

**PHARUS**, Pharynx.

**PHARYGATHRON**, Pharynx.

**PHARYGETHRUM**, Pharynx.

**PHARYNGÆUM**, (SAL.,) from *pharynx*.

A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain water, to make gargles, which were advised in quinsy.

**PHARYNGE**, Pharyngeal.

**PHARYNGEAL**, *Pharynga'us*, (F.) *Pharyngi*, *Pharyngien*. That which relates to the pharynx. A name given to the muscles, vessels, and nerves of the pharynx.

**PHARYNGEAL ARTERIES**. These are two in number. The one—*superior* or *pterygo-palatina*, *Ramus Pharynga'us superior* of Haller—arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygo-palatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other—the *inferior*—*Pharynga'us ascendens* of Haller—arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches: the one—the *pharyngeal*, properly so called—is distributed to the pharynx; the other—the *meningeal*—gives its branches particularly to the dura mater.

**PHARYNGEAL NERVE**—a branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glosso-pharyngeal nerve, of the superior laryngeal branch, and of the first cervical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

**PHARYNGEAL VOICE**, see Voice.

**PHARYNGEMPHRAXIS**, from *φαρυγξ*, 'the pharynx,' and *μφραξις*, 'obstruction.' Obstruction of the pharynx.

**PHARYNGETHRON**, Pharynx.

**PHARYNGEURYSMA**, Pharyngocele.

**PHARYNGICUS**, Pharyngeal.

**PHARYNGIEN**, Pharyngeal.

**PHARYNGITE**, *Cynanche pharyngea*—*p. Tonsillaris*, *Cynanche tonsillaris*.

**PHARYNGITIS**, *Cynanche pharyngea*.

**PHARYNGITIS APOSTEMATOSA**. Abscess of the pharynx.

**PHARYNGITIS, DIPHTHERITIC**, *Angina pseudo-membranacea*, *A. membranacea*, *A. pellucida*, *A. plastica*, *A. Diphtheritica*, *A. maligna*, *A. pseudo-membranosa*, *A. pestilentialis*, *Pharyngoacel*, *Pseudo-membranous Inflammation of the Throat*, (F.) *Angine couenneuse*, *A. gutturale couenneuse*, *A. pseudo-membranouse*, *A. plastica*, *A. diphtheritique*. Diphtheritic inflammation of the pharynx. See *Cynanche maligna*.

**PHARYNGITIS, FOLLICULAR**, *Follicular Inflammation of the Pharynx*, *Acne of the Throat*. Inflammation and enlargement of the follicles of the pharynx, occasionally extending to the larynx. Sometimes termed *Clergyman's Sore-throat*, and *Tubercles of the Larynx and Fauces*.

**PHARYNGITIS, GANGRENOUS**, *Cynanche maligna*.

**PHARYNGOCACE**, Pharyngitis diphtheritic.

**PHARYNGOCELE**, *Pharyngourysma*, *Di-*

*oerticulum* seu *Hernia* seu *Prolapsus Œsophagi* vel *pharyngia*, *Œsophagus succenturiatus*; from φάρυξ, 'the pharynx,' and αἴλη, 'a tumour.' An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

**PHARYNGODYNIA**, from φάρυξ, 'the pharynx,' and ὄδυς, 'pain.' Pain in the pharynx.

**PHARYNGOGLOSSAL**, *Glossopharyngeal*, *Pharyngoglossianus*. That, which belongs to the pharynx and tongue.

**PHARYNGOGLOSSAL NERVE**, *Glossopharyngeal Nerve*, *Lingualis lateralis*, (F.) *Nerv Glosso-pharyngion*, *Pharyngoglossien*—a portion of the eighth pair—arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments, which soon unite into a single cord, that passes out of the cranium by the foramen lacerum anterius; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylo-pharyngeus muscle. The glossopharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides into many branches, which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

**PHARYNGOGRAPHY**, *Pharyngographia*, from φάρυξ, 'the pharynx,' and γραφή, 'a description.' An anatomical description of the pharynx.

**PHARYNGOLOGOGY**, *Pharyngolog'ia*, from φάρυξ, 'the pharynx,' and λογος, 'a discourse.' The part of anatomy which treats of the pharynx.

**PHARYNGOLYSIS**, *Pharyngoplegia*.

**PHARYNGOPARALYSIS**, *Pharyngoplegia*.

**PHARYNGOPLEGIA**, from φάρυξ, 'the pharynx,' and πλῆσσι, 'I strike.' *Dysphagia paralytica*, *D. torpida*, *D. atonica*, *Angina paralytica*, *Asthēna Deglutitiōnis*, *Pharyngolysis*, *Pharyngoparalysis*, *Paralysis Œsophagi*, *Gula Imbecillitas*. Paralysis of the pharynx or œsophagus: commonly a symptom of general paralysis, or of approaching dissolution.

**PHARYNGORRHAGIA**; from φάρυξ, 'the pharynx,' and ρήγη, 'rupture.' Hemorrhage from the vessels of the pharynx.

**PHARYNGOSPASMUS**; from φάρυξ, 'the pharynx,' and σπασμος, 'spasm.' Spasm or cramp of the pharynx.

**PHARYNGOSTAPHYLINUS**, *Palato-pharyngeus*.

**PHARYNGOTOME**, *Pharyngotomis*, from φάρυξ, 'the pharynx,' and τέμνω, 'I cut.' An instrument, invented by J. L. Petit, and used to scarify inflamed tonsils, and to open ab-

cesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or casula of silver slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

**PHARYNGOTOMY**, *Pharyngotomis*; same etymon. Some authors have used this word synonymously with œsophagotomy. It means, also, scarification of the tonsils, or an incision, made for opening abscesses there, &c.

**PHARYNX**, *Pharyx*, *Pharus*, *Gula*, *Læmos*, *Fauces*, *Pharygæthrum*, *Pharyngæthron*, *Pharyngæthros*, *Pharyngæthron*, *Isthmos*, *Isth'mion*, *Inglu'vies*, *Principium Gulæ*, *Os posterum*, (F.) *Arrière-bouche*, *Gonier*. A species of musculo-membranous, symmetrical canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; and in the middle, with that of the mouth; below, with that of the œsophagus; and, at the sides, with that of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngostaphylini. The vessels and nerves are called 'pharyngeal.' The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

**PHARYNX, FOLLICULAR INFLAMMATION OF THE**, *Pharyngitis, follicular*.

**PHARYX**, *Pharynx*.

**PHASELUS**, *Phaseolus vulgaris*.

**PHASEOLUS VULGARIS**, *Phaseolus*, *Phase'lus*, *Fase'lus*, *Fase'olus*, *Bona*, *Boona*; the *Kidney Bean*; the *French Bean*, (F.) *Hari-cot. Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

**PHASEOLUS CRETICUS**, *Cajan*, *Cayan*. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux when excessive.

**PHASIANUS GALLUS**, so called from the river *Phasis*, in Colchis, near the Black Sea: (F.) *Cog*. The parts of generation of the cock, dried and pulverized, were formerly regarded as proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

**PHASIOLUS**, *Phaseolus vulgaris*.

**PHASMA**, *Phantasm*.

**PHATNE**, *Alveolus*.

## PHATNION, Alveolus.

PHATNORRHAG'IA, *Stomatorrhag'ia alveolarum*, from φάττωρ, 'an alveolus,' and ῥήγνμι, 'I break forth.' Hemorrhage from the alveoli.

PHAUSING'ES, φαυσίγγες, plural of φαυσίγγε, from φαύω, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a pustule.—Fossius.

## PHELLANDE, Phellandrium aquaticum.

PELLAN'DRIUM AQUAT'ICUM, *Phellandrium*, *Cenanthe phellandrium*, *Faniculum aquaticum*, *Cicuta'ria aquatica*, *Water Fennel*, *Fine-leaved Water Hemlock*, (F.) *Phellandre*, *Fenouil d'eau*, *Ciguë d'eau*. Family, Umbelliferae. See. Syst. Pentandria Digynia. This plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous atonic ulcers.

PHENIG'MUS, *Phanigmus*, *Phanigmus*, from φαίη, 'red.' *Red Jaundice*. A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his order *Ictericæ*. Also, the act of irritating a part by a stimulating application.

## PHENOMÈNE, Phenomenon.

PHENOM'ENON, *Phanom'ion*, (F.) *Phénomène*, from φαίνομαι, 'I appear.' An extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena* of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

## PHEUGOPHOBIA, Hydrophobia.

## PHEUGYDRON, Hydrophobia.

PHI'ALA, A *Phial* or *Vial*, (F.) *Fiola*. A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Medicines Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

## PHILADYNAMICA, Debilitants.

## PHILANTHROPUS, Galium aparine.

## PHILETRON, Philter.

## PHILETRUM, Lacuna labii superioris.

PHILIATROS, φιλιατρος, from φιλω, 'I love,' and ιατρικη, 'medicine.' An amateur of medicine. One who studies medicine; *Studio'us medicinæ*.

PHILIOB'ISIS, (F.) *Philobiosis*: from φιλω, 'I love,' and βίω, 'life.' The love of life.

PHILE'NIA, from φιλω, 'I love,' and οινος, 'wine.' Love of wine. Addiction to wine.

## PHILOGYNIA, Muliebricitas.

PHILONIUM LONDINENSE, Confectio opii.

## PHIOPATRIDALGIA, Nostalgia.

## PHIOPATRIDOMANIA, Nostalgia.

## PHILOSOPHER'S STONE, see Alchymy.

PHILOSOPHIA CORPORIS VIVI, Physiologia—p. *Hermetica*, Alchymy—p. *per Ignem*, Chymistry.

PHILTER, from φιλω, 'I love.' *Philtrum*, *Philtron*, *Pharmacum* vel *Poculum amatorium*, *Amatorium venesif'ium*, (F.) *Philtras*. A medicine or drink considered capable of causing love.

## PHILTRUM, Lacuna labii superioris.

## PHILYRA, Tilia.

## PHIMA, Phyma.

## PHIMOS, Capistrum.

## PHIMOS'ICUS, Relating to Phimosis.

Sauvages calls *Ischuria phimosica*, *Ischuria urethralis à phimosi*, the retention of urine which depends upon phimosis.

PHIMOS'IS, *Phymo'sis*, *Capistra'tio*, *Epagogium*, *Ligatura glandis*, *Strictura prepu'tii*, from φημο, 'I bind up.' A disease which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIMOSIS ADNATA seu CONGENITA seu PURRILIS, Congenital phimosis—p. *Circumligata*, *Paraphimosis*—p. *Congenita*, *P. adnata*.

PHIMOSIS OEDEMATODES, *Hydrophimos'is*. Phimosis with oedematous swelling of the prepuce.

## PHIMOSIS PURRILIS, Ph. adnata.

## PHLASMA, Contusion.

PHLEBARTERIODIALYSIS, see Aneurism.

PHLEBECTA'SIA, *Phlebot'asis*, from φλεψ, 'a vein,' and εκτασις, 'dilatation.' Dilatation of a vein, or of a portion of a vein.—Alibert.

PHLEBECTIARCTIE. A mongrel term, from φλεψ, 'a vein,' and αρκτο, 'I contract.' Contraction of a vein.

## PHLEBES, (Arteries.) See Artery.

## PHLEBEURYSMA, Varix.

PHLEB'ION, diminutive of φλεψ, 'a vein.' A vein.—Hippocrates. A small vein.—*Venula*.

PHLEBITIS, *Inflammatio venarum*, (F.) *Inflammation des veines*, from φλεψ, 'a vein,' and ιτις, the termination for inflammation. Inflammation of the inner membrane of a vein, which sometimes follows blood-letting, and extends from the small wound made in that operation to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligature or excision of varices; after amputation, gun-shot wounds, delivery (*Uterine Phlebitis*, *Metrop'hebitis puerparalis*, *Phlebitis uterina*, *Metric'itis venosa*), the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, Phlegmatia dolens—p. Uterina, see Peritonitis—p. Uterine, see Peritonitis, and Phlebitis.

PHLEBOGRAPHY, *Phlebogra'phia*, from φλεψ, 'a vein,' and γραφω, 'a description.' A description of the veins.

PHLEB'OLITE, *Phlebol'ithus*, *Vein stone*, from φλεψ, 'a vein,' and λιθος, 'a stone.' A loose concretion, varying in size from that of a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

## PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phlebolog'ia*, from φλεψ, 'a vein,' and λογος, 'a discourse.' The part of anatomy which treats of the veins.

**PHLEBOPALIA**, from φλεψ, 'a vein,' and πάλω, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins. See Pulsus venarum.

**PHLEBOPHTHALMOTOMIA**, *Ophthalmoplebotomia*, from φλεψ, 'a vein,' οφθαλμος, 'the eye,' and τέμνω, 'I cut.' Blood-letting in the eye.

**PHLEBOROSIS ECPHRACTICA**, Inflammation.

**PHLEBORRHAGIA**, from φλεψ, 'a vein,' and ρήγνυμι, 'I break out.' Rupture of the veins; and, in a more extensive sense, venous hemorrhage.

**PHLEBORRHEXIS**, from φλεψ, 'a vein,' and ρήξις, 'rupture.' Rupture of a vein. Also, hemorrhage from a vein, *Phleborrhagia*.

**PHLEBOTOMIST**, from φλεψ, 'a vein,' and τέμνω, 'I cut.' A bleeder. One who practises particularly the art of phlebotomy. See Blood-letting.

**PHLEBOTOMY**, Fleam.

**PHLEBOTOMY**, see Blood-letting.

**PHLEBS**, Vein.

**PHLEDONIA**, Delirium.

**PHLEGM**, *Phlegma*, *Pituita*, *Mucus*, (F.) *Pituita*. One of the four natural humours of the ancients, which, according to them, was cold and moist, as atrablis was cold and dry. It predominated, especially, in winter.

*Pituita* was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in physiology, — the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated, or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous, products obtained by subjecting moist vegetable matters to the action of heat.

**PHLEGMANARIUM CRASSUM**, Nasal mucus — p. Vitrioli, Sulphuric acid (very dilute.)

**PHLEGMAGOGUE**, *Phlegmagogus*; from φλεγμα, 'phlegm,' and αγω, 'I expel.' A medicine, formerly believed capable of "cutting" or removing phlegm.

**PHLEGMOPYRA**, Fever adeno-meningeal.

**PHLEGMASIA**, Inflammation, Phlegmon — p. Adenosa, Adenitis — p. Alba dolens puerperarum, Ph. dolens — p. Cellularis, Induration of the cellular tissue — p. Glandulosa, Adenitis — p. Myocia, Myositis — p. of the Peritoneum, Peritonitis.

**PHLEGMATIA**, from φλεγμα, 'phlegm.' Oedema, Anasarca, Hydrops.

**PHLEGMATIA DOLENS**, *P. lactea*, *P. dolens puerperarum*, *P. alba dolens puerperarum*, *Laucophlegmasia dolens puerperarum*, *Sceloncus*, *Scelalgia puerperarum*, *Anasarca serosa*, *Eephyma adematium*, *Spargano'sia puerperarum*, *Eechymo'sia lymphaticum*, *Ischias a spargano'si*, *Eidema puerperarum*, *Oed. lacteum*, *Infarctus lactei extremitatum*, *Metastasis lactis*, *Hysteralgia galactica*, *Hydrophlegmasia testis cellulosis*, *Cruval Phlebitis*, *White leg*, *Swelled leg*, *White swelling of lying-in women*, (F.) *Oedème des nouvelles accouchées*, *Oedème douloureux des femmes en couche*, *Dépot lacteux sur la cuisse*, *Oedème actif des nouvelles accouchées*, *Enflure ou Engorgement des*

*jambes et des cuisses de la femme accouchée*, *E. lacteux des membres abdominaux*. It occurs, for the most part, in the second or third week after delivery: — is limited to the lower extremity, and chiefly to one side; exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days, the heat, hardness, and sensibility diminish, and the limb remains œdematous for a longer or shorter period. The disease frequently, if not generally, consists in the obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus — the flow of blood being obstructed — the serous part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics: — the application of leeches or cupping-glasses near the groin: fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

**PHLEGMATIA LACTEA**, *P. dolens*.

**PHLEGMATIAE**, see Empresma — p. Membranosa et parenchymatosa, Empresma.

**PHLEGMATOPYRA**, Fever, adeno-meningeal.

**PHLEGMATORRHAGIA**, *Phlegmatorrhœa*, *Catarrh*, from φλεγμα, 'phlegm,' and ρω, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Coryza Phlegmatorrhœa* of Sauvages. See Coryza.

**PHLEGMHYMENTITIS**, Phlegmymentitis.

**PHLEGMON**, from φλεγμα, 'I burn.' *Phlegmo'sis phlegmonæ*, *Phlegmonæ*, *Phlegmasia*, *Incedium*, *Inflammatio*. Inflammation of the cellular texture accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensive and lancinating; afterwards, pulsatory and heavy. It is apt to terminate in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged as the next favourable termination to resolution.

**PHLEGMON PÉRINÉPHRÉTIQUE**, *Periphrenitis*.

**PHLEGMONE**, Inflammation — p. Mammæ, Mastodynia apostematosa — p. Mastodynia, Mastodynia apostematosa — p. Parotidea, Parotitis — p. Peritonæi, Peritonitis — p. Farulis, Parulis — p. Musculorum, Myositis — p. Ventriculi, Gastritis.

**PHLEGMONODES**, Phlegmonous.

**PHLEGMONOUS**, *Phlegmonodes*, from φλεγμα, 'a phlegmon,' and οἶδος, 'resemblance.' That which relates or belongs to a phlegmon.

**PHLEGMONOUS INFLAMMATION** is the active inflammation of the cellular membrane; in contradistinction to erysipelatous inflammation, or that of the skin.

**PHLEGMOPYRA**, Fever, adeno-meningeal.

**PHLEGMORRHAGIA**, *Blennorrhœa*.

**PHLEGMORRHAGIE PULMONAIRE**, *Bronchorrhœa*.

**PHLEGMORRHŒA**, *Blennorrhœa*.

**PHLEGMYMENTITIS**, *Phlegmymentitis*, from φλεγμα, 'phlegm,' and μεν, 'a membrane,'

and *itis*, the termination for inflammation. Inflammation of a mucous membrane.

PHLEGGYMERITIS ENTERICA, see Enteritis.

PHLEPS, Vein.

PHLOGIA, Inflammation.

PHLOGICUS, Inflammatory.

PHLOGISTICI, Empresma.

PHLOGISTICUS, Inflammatory.

PHLOGISTON, Hydrogen.

PHLOGMUS, Verbascum thapsus.

PHLOGODES, from φλοῖ, 'flame,' and ὄδερ, 'resemblance.' *Inflamed, Inflammatus, Inflammatorius*, Inflammatory. An epithet employed, particularly to express the red colour of the face.

PHLOGOPYRUS, Synocha.

PHLOGOSED, Inflamed.

PHLOGO'SIS, *Incoendum, Inflammation*.

Some writers use this word exclusively for external inflammation—phlegmon; others, for those that are superficial or erysipelatous.

PHLOGOT'ICA, *Inflammations*.

The second order in the class *Hæmatics* of Good.

PHLOIOS, Cortex.

PHLOMUS, Verbascum thapsus.

PHLOOS, Cortex.

PHLORIDZINE, *Phloridzin*, *Phloridzin*, from φλοῖς, 'inner bark,' and ρίζα, 'root.' The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour, when in masses, or in long slender prisms or tables, when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70°, to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents,—10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLOX, Verbascum thapsus.

PHLYCTÆ'NA, *Phlyctænis, Phlyctis, Phlyctæcion, Ampulla, Holophlyctides, Phlyctides, Phlysis*, from φλυκτα, 'I boil.' Tumours, formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA, see Hydatid.

PHLYCTENOID, *Phlyctenoides*. Resembling phlyctænæ. An epithet for a variety of herpes.

PHLYCTEN'ULAR, same etymon. Of or belonging to phlyctænula,—as *phlyctenular ophthalmia*, inflammation of the eye, accompanied with phlyctænula on the cornea.

PHLYCTIDES, Phlyctæna.

PHLYCTID'IUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment are examples of it.

PHLYCTIS, Phlyctæna.

PHLYSIS, from φλυκτα, 'I am hot,' 'I boil.' A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensile, glabrous; diffused, hot, throbbing; at length fluctuating, with an acrid ichor.—Good.

PHLYSIS, Phlyctæna—p. Ecthyma, Ecthyma

—p. Impetigo, Impetigo—p. Porrigo, Porrigo—p. Scabies, Psora.

PHLYZACIA, Ecthyma.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOM'ELES, from φοκη, 'a seal,' and μλος, 'a limb.' A genus of monsters, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea.—J. G. St. Hilaire.

PHŒNICISMUS, Rubeola.

PHŒNIGMUS, Phenigmus—p. Petchialis, Purpura simplex.

PHŒNIX DACTYLIFERA, Date tree.

PHONA'TION, *Phonatio*, from φωνη, 'voice.' The physiology of the voice.

PHONE, Voice.

PHO'NICA, φωνικα, from φωνη, 'voice.'

The first order of the class *Pneumatics* in Good's Nosology. Defined: diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phononosi*, from φωνη, 'the voice,' and νοσος, 'a disease.' *Phonopathia*. *Morbi vocis*. Diseases of the voice.

PHONOPATHIA, Phononosi.

PHORA, Gestation.

PHORBE, Pabulum.

PHORONOM'IA, from φορονεμα, or φερονεμα, 'I put myself in motion,' and νομος, 'law.' The doctrine of muscular motion.

PHOROUS, from φερον, 'I carry.' A suffix denoting conveyance. Hence, *Galactophorous*, &c.

PHOS, Light.

PHOSPHAS CALCICUM STIBIATUM, Antimonial powder—p. Calcis stibiatus, Antimonial powder—p. Natricum, Soda, phosphate of.

PHOSPHAT'IC, *Phosphaticus*, from *Phosphorus*. Relating to the phosphates; hence the *Phosphatic Diathesis* is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHORE, Phosphorus.

PHOSPHORENESES. M. Baumes unites, under this generic name, diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphate or its decomposition. Amongst these affections he ranks rachitis, osteo-malacia, and gout.

PHOSPHORES'CENCE, *Phosphorescentia*. The property possessed by certain bodies of being luminous in obscurity, or under particular circumstances.

PHOSPHORIC ACID, *Acidum phosphoricum*, (F.) *Acide Phosphorique*. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids.

PHOSPHORURIA, Urine, phosphorescent.

PHOSPHORUS, *Phosphorum, Autophosphorus, Ignis philosophicus, Lumen constans*, from φως, 'light,' and φερον, 'I carry.' (F.) *Phosphors*.—(A light carrier.) An elementary or undecomposed substance; not metallic; solid; transparent or semitransparent; colour-

less; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

PHOSPHURIA, Urine, phosphorescent.

PHOTODAMPNIS, Refraction.

PHOTOMANIA, from *φως*, 'light,' and *μανία*. Insane delirium induced by light.

PHOTOPHOBIA, from *φως*, 'light,' and *φοβός*, 'fear.' Aversion to light:—intolerance of light. Nyctalopia.

PHOTOPHOBICUS, Lucifugus.

PHOTOPHOBOPHTHALMIA, Nyctalopia.

PHOTOPHOBUS, Lucifugus.

PHOTOPSIA, *Visus lucidus*, from *φως*, 'light,' and *ὄψις*, 'the eye.' A false perception of light, as of sparks, flashes of fire, &c. occasioned by certain conditions of the retina and brain. See *Metamorphopsia*.

PHRAGMOS, *θαλαμος*, from *φρασσω*, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, *φρεν*, 'the mind.' Also, the diaphragm, and scrobiculus cordis.

PHRENES, Diaphragm.

PHRENESIA, Phrenitis.

PHRÉNÉSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENETISMUS, Phrenitis.

PHRENIC, Diaphragmatic.

PHRENICA, from *φρεν*, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties, (*Phrenopathia*, &c.) The first order of the class *Neurotica* of Good.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENITIS, *Phren'sis*, *Phrenes'ia*, *Phrenet'asis*, *Phrenis'mus*, *Phrenetis'mus*, *Cephalit'is*, *Cephalalgia inflammator'ia*, *Karabitus* (Arab.), *Sibars*, *Sphaolis'mus cor'ebri*, *Empres'ma ophal'itis*, *Siriasis*, *Seiriasis*, *Siderat'io*, *Inflammat'io phren'itis*, *Encephalit'is*, *Causa phren'itis*, *Phrensy*, *Delirium*, *Brain Fever*, (F.) *Phrénésie*, *Inflammation du cerveau et du cervelet*, from *φρεν*, 'the mind,' and *itis*, denoting inflammation. A disease characterized by violent pyrexia, pain in the head, redness of the face and eyes, intolerance of light and sound, watchfulness, and delirium, either furious or muttering. Its causes are the same as those of other inflammations: sometimes, however, it is induced by a *Coup de soleil*; by inebriation; violent mental emotions, &c. Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis*, *Encephalitis*, or *Cerebritis* to inflammation of the substance of the brain; but there are no pathognomonic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. Phrenitis is, of course, a very dangerous affection, from the importance of the organ con-

cerned. The most active treatment must necessarily be pursued. Repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter-irritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis*.

*Hydrocephalus acutus* is a variety of phrenitis.

PHRENITIS CALENTURA, *Coup-de-soleil*—p. Latrans, Hydrophobia—p. Potatorum, Delirium tremens—p. Verminosa, Vercoquin.

PHRENOLOGY, Craniology.

PHRENOPATHIA, see Phrenica.

PHRENOPATHIA ÆTHERICA. The aggregate of encephalic phenomena induced by the inhalation of ether.

PHRENSY, Phrenitis.

PHRICASMUS, Horripilation.

PHRICE, Horripilation.

PHRICIA, Horripilation.

PHRICIASIS, Horripilation.

PHRICO'DES (FEBRIS), from *φρίξω*, 'a shivering;' *Horri'fica*. A fever in which the chill is very intense and prolonged.

PHRYAGMA, Shuddering.

PHRYCTE, Colophonia.

PHRYGI'US (LAPIS). An earthy matter, found in Phrygia and Cappadocia, and formerly employed as an astringent.—Gorræus.

PTHARMA CALIGO, Caligo—p. Cataracta, Cataract—p. Glaucoma, Glaucoma.

PTHETHEIR, Pediculus.

PTHETHEIRE'MLIA, from *πθίρω*, 'I corrupt,' and *αἷμα*, 'blood.' A state in which the plastic powers of the blood are deteriorated.

PTHETHEIRIASIS, *Phthiriasis*, from *πθίρω*, 'a louse;' *Morbus pediculo'sus*, *M. pedicula'ris*, *Prurigo pedicula'ris*, *Pedicula'tio*, *Malis pediculi*, *Pest'ile*, *Lousiness*, *Lousy disease*, (F.) *Maladie pediculaire*, *Phthiriasis*. A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PTHETHEIRIUM, Delphinium staphisagria.

PTHETHEIROCTONUM, Delphinium staphisagria.

PTHINAS, Phthisis.

PTHINODES, Phthisicus.

PTHIRIASE, Phtheiriasis.

PTHIRIASIS, Malis, Phtheiriasis.

PTHIRIUM SCABIEL, see *Peora*.

PTHIRIUS, Antiparasitic—p. Inguinalis, see *Pediculus*.

PTHIROCTONUS, Abortive.

PTHIROPORON, Autumn.

PTHISES: same etymon as Phthisis. In the classification of Fuchs, diseases attended with ulceration, hectic fever, and emaciation.

PTHISIC, Phthisis.

PTHISICUS, *Phthisin'os*, *Tab'idus*, *Phthisical*, (F.) *Poitrinaire*; same etymon as phthisis.

sis. Belonging to phthisis. Also, one labouring under phthisis.

**PHTHISIS**, *Phthisis pulmonalis*—*p. Calculosa*, Calculi, pulmonary, see *Lithiasis pulmonum*—*p. Carcinomatosa*, Phthisis, cancerous—*p. avec Mélanose*, Anthracosis pulmonum—*p. Mésentérique*, *Tabes mesenterica*.

**PHTHISIOLOGY**, *Phthisiolog'ia*, from *φθισις*, and *λογος*. A treatise on phthisis.

**PHTHISIOSIS**, Tubercular consumption.

**PHTHISI-PNEUMONIA**, *Phthisis pulmonalis*.

**PHTHISIS**, *Phthoh*, *Phthinas*, *Tabes*, *Ts'cedon*, *Consumption*, *Decline*, from *φθισις*, 'I dry, I fade.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

**PHTHISIS**, BLACK, see *Anthracosis*.

**PHTHISIS**, BRONCHIAL, *Phthisis bronchialis*. Phthisis occasioned by the pressure of enlarged tuberculous bronchial glands, which, not unfrequently, communicate with caverns in the lungs or with the bronchia.

**PHTHISIS CALCULOSA**, *Lithiasis pulmonum*.

**PHTHISIS**, CANCEROUS, *Scirrhus*, *Carcinoma* et *Fungus Pulmonum*, *Medullary* or *Enccephaloid Tumour of the Lung*, (F.) *Cancer du Poumon*. Cancer of the lung, which gives rise to carcinomatous phthisis. (F.) *Phthisis carcinomatosa*, of Bayle.

**PHTHISIS CONSUMMATA**, see *Ph. pulmonalis*—*p. Dorsalis*, *Tabes Dorsalis*—*p. Dyspeptic*, see *Phthisis*—*p. Hepatica*, *Hepato-phthisis*—*p. Ischiadica*, *Ischiophthisis*.

**PHTHISIS LARYNGE'A**, *Chronic Laryngitis*, *Laryngitis* et *Tracheitis chronica*, *Tuberculosis laryngis* et *tracheae*, *Laryngo* et *Trachophthisis*, *Laryngophthisis*, *Ul'cera* seu *Halco'sis Laryngis*, (F.) *Phthisis laryngée*, *Ul'cres du larynx*, *Laryngite avec sécrétion de Pus*, is a species of consumption analogous to phthisis pulmonalis, produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis trachealis*, *Tracheophthisis*, is a similar affection, seated in the trachea. Chronic inflammation of the larynx and trachea may exist, however, without tubercles or phthisis.

**PHTHISIS MESAERICA**, *Tabes mesenterica*—*p. Notias*, *Tabes dorsalis*.

**PHTHISIS PULMONA' LIS**, *Ph. pulmo'num*, *Ph. pulmona'lis vera* seu *tuberculo'sa* seu *scrophulo'sa* seu *tuberculo-ulcero'sa* seu *purulen'ta* *ezulcora'ta*, *Maras'mus phthisis*, *Hectica phthisis*, *Hæmoptysis phthisis*, *P. Pulmona'ris*, *Phthisi-pneumo'nia*, *Tabes pulmona'lis* seu *pulmo'num*, *Ulcus pulmonum*, *Halco'sis pulmona'lis*, *Pneumonophthisis*, *Pneumonophthoh*, *Phthisis scrophulo'sa*, *Pneumophthoh*, *Pulmo'nia*, *Phthisis tuberculo'sa*, *Tuberculo'sis Pulmo'num*, *Gongrophthisis*, *Tuberculous disease of the Lungs*, *Pulmonary consumption*, *Consumption*, *Decline*, *Phthisie*, (F.) *Phthisis*, *P. pulmonaire*, *Crachement de pus*. Occasionally, this formidable disease occurs accidentally; but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be required to rouse the predisposition into action. It is less a disease of the torrid zone; and, in the temperate regions of the globe, its pathology is often intimately allied with

that of scrofula. It consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever—the universal attendant upon irritability and debility—is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritative fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough with dyspnœa. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnœa is increased on the slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning. This must be considered the confirmed stage,—*Phthisis consummata*, *Pneumophthisis*. In the third, or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhœa. The weakness becomes extreme, and the patient exhausted. *Physical Signs*.—1. In the first stage, whilst there are yet scattered miliary tubercles,—the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung. In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous râles are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be puerile. 3. When the tubercles are undergoing softening,—in addition to the preceding signs, auscultation exhibits a subcrepitant râle around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See *Climate*. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber be duly ventilated; and gestation in

the open air be used, whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action: 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counter-irritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids, united with opium, relieve the colligative sweats; and chalk and opium the diarrhoea.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural faeces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis*.

**PHTHISIS PULMONALIS PURULENTA EXULCERATA**, Phthisis pulmonalis—p. Pulmonalis scrophulosa, Phthisis pulmonalis—p. Pulmonalis tuberculosa, Phthisis pulmonalis—p. Pulmonalis tuberculosa-ulcerata, Phthisis pulmonalis—p. Pulmonalis vera, Phthisis pulmonalis—p. Pupilla, Synezisis—p. Pupillaris, Myosis—p. Scrophulosa, Phthisis pulmonalis—p. Tuberculosa, Phthisis pulmonalis—p. Uterina, Metrophthisis—p. Vesicalis, Cystophthisis.

**PHTHISURIA**, Diabetes.

**PHTHISURIE**, Diabetes—p. *Sueris*, Diabetes mellitus.

**PHTHOË**, Phthisis.

**PHTHOÏS**, Pastil, Trochiscus.

**PHTHOISCOS**, Pastil, Trochiscus.

**PHTHOROTONUS**, Abortive.

**PHUSCA**, Oxycerate.

**PHYGANTHROPIA**, Misanthropia.

**PHYGETH'LOŃ**, *Parus*, *Phypella*, from  $\phi\upsilon\gamma\epsilon\tau\omicron$ , 'I broil.' Inflammation of the superficial lymphatic glands, not ending in suppuration.

**PHYLACTERION**, Amuletum.

**PHYLACTERIUŃ**, from  $\phi\upsilon\lambda\alpha\sigma\omega$ , 'I preserve.' A *Phylactery*. An amulet—a prophylactic.

**PHYLAXIS**, Conservation.

**PHYLLANTHUS URINARIA**, *Binkohumba*. A plant employed in Ceylon, in decoction, as a diuretic.

**PHYLLITIS**, Asplenium scolopendrium.

**PHYMA**, *Phima*, from  $\phi\upsilon\mu\alpha\iota$ , 'I spring up.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, sycosis, and anthrax.

**PHYMA ANTHRAX**, Anthrax—p. Anthrax terminthus, Terminthus—p. Sycosis, Sycosis.

**PHYMATO'SES**, from  $\phi\upsilon\mu\alpha$ , 'a hard tumour.' Tuberculous diseases.—Fuchs.

**PHYMATOSIS**, Excrecence—p. Cerebri, Encephalophymata—p. Elephantiasis, Elephantiasis—p. Lupus, Lupus—p. Verrucosa, Verruca.

**PHYMOSIS**, Phimosis.

**HYPELLA**, Phypethlon.

**PHYSA**, Crepitation.

**PHYSAGOGA**, Carminatives.

**PHY'SALIS**, *P. Alkekengi*, *Soldanum vesicarium*, *Alchachen'ge*, *Alkekengi*, *Halicaadabum*, *Winter Cherry*, (F.) *Alkekenge*, *Coqueret*. Family, Solanææ. *Sax. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropical and calculous cases.

**PHYSALIS ALKEKENGI**, Physalis.

**PHYSCIA ISLANDICA**, Lichen islandicus—p. Nivalis, Lichen caninus.

**PHYSCO'NIA**, from  $\phi\upsilon\sigma\kappa\eta$ , 'a bladder.' *Ventros'itas*, *Ephy'ma physco'nia*, *Hyposar'ca*, *Emphrao'tica*, *Visco'nia*, *Hypersarchid'ios*. A generic term, under which Sauvages has comprised every large tumour developed in the abdomen, that is neither fluctuating nor sonorous. Linnaeus calls them *Hyposarca*.

**PHYSCO'NIA ADIPO'SA**, *Obs'itas seu Polysar'cia viscerum*. Accumulation of fat in the intestines.

**PHYSCONIA BILIOSA**, Turgescentia vesicalis fellæ.

**PHYSCONIA EMPHYSEMAT'ICA**. Accumulation of air in the cellular tissue, or between the coats of particular viscera.

**PHYSCONIA LIXNIS**, Splenoncus—p. Mesenterica, Tabes mesenterica—p. Splenicum, Ague cake.

**PHYSCONIA STRUMO'SA**, *Scrof'ula abdominalis inter'na*. Tumid abdomen from scrophulous enlargement of the glands.

**PHYSCONIE MËSENTËRIQUE**, Tabes mesenterica.

**PHYSEMA**, Tympanites, Phyesis.

**PHYSE'SIS**, *Physe'ma*, from  $\phi\upsilon\sigma\omega$ , 'I inflate.' An emphysematous tumour. Tympanites.

**PHYSETER MACROCEPHALUS**, see *Cetaceum*.

**PHYSIATRICE**, *Vis medicatrix naturæ*.

**PHYSIAUTOCRATIA**, *Vis medicatrix naturæ*.

**PHYSIC**, Medicament, Medicina—p. Indian, Euphorbia corollata, Gilleinia trifoliata—p. Root, Leptandria purpurea.

**PHYSICAL**, Medical.

**PHYSIC'IAN**, *Med'icus*, *Iatros*, *Aces'tor*, *Aces'ter*, *Althous*; from  $\phi\upsilon\sigma\iota\varsigma$ , 'nature.' (F.) *Médecin*. One who has received his degree from an incorporated Institution, as Doctor of Medicine. The French formerly used the word *physicien* in the same sense. It is now appropriated to the natural philosopher.

**PHYSICIAN**, LEARNED, *Iatrosophista*—p. Practical, *Istrotechna*.

**PHYSICIEN**, Physician.

**PHYSICS, MEDICAL**, *Iatrophys'ics*. Physics directly applied to medicine,—either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

**PHYSIAUTOCRATIA**, *Vis medicatrix naturæ*.

**PHYSIOGNOMY**, *Physiognom'ia*, *Physiognom'ica*, *Physiognom'ict*, *Physionom'ia*, *Physiognomon'ia*, *Physiognom'onè*, *Physiognomos'ynè*, *Physiognomosis*, *Anthroposopia*, *Protopomant'ia*, *Protopolog'ia*, *Semiot'icè fa'ctici*, *Physiognomon'ica*, *Physiognom'on'y*, *Metoposcopy*, *Protopos'ia*, from  $\phi\upsilon\sigma\iota\varsigma$ , 'nature,' and  $\gamma\iota\upsilon\sigma\tau\omega$ , 'I know.' The art of knowing the

dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

**PHYSIOLOGIA PATHOGENETICA**, see Pathogenetic.

**PHYSIOLOGICAL ANATOMY**, see Anatomy—p. Doctrine, Broussaism.

**PHYSIOLOGICE**, Physiology.

**PHYSIOL'OGY**, *Physiolog'ia*, *Biology*, *Biot'ics*, *Biophanomenolog'ia*, *Physiolog'icé*, *Économ'ia animal'is*, *Anatom'ia viva*, *Anatomé animal'is*, *Anthropolog'ia*, *Microcosmograp'hia*, *Microcosm'ica scient'ia*, *Cognit'io physiologia*, *Fars natural'is medic'inae*, *Philosoph'ia corporis vivi*; from *φύσις*, 'nature,' and *λογος*, 'a description.' Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the science of life. It is divided into *animal*—*Zoöphysiologia*, and *vegetable*, according as it considers the life of animals or of vegetables singly. *Comparative physiology* comprises both. Physiology is, also, *general* or *special*, according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*,—called also, *Hygienic Physiology*, to distinguish it from *Pathological Physiology* or *Pathology*.

**PHYSIOLOGY**, **PATHOGENETIC**, see Pathogenetic.

**PHYSIONOMIA**, Physiognomy.

**PHYSIONOMIE ÉGARÉE**, see Wild.

**PHYSIS**, Natura, Sex.

**PHYSOC'ELÉ**, *Pneumatoc'elé*, *Hernia ventosa*; *Oschooc'elé fatalen'ta*, *Emphyss'ima Scroti*, from *φύσσω*, 'I insufflate,' and *κηλη*, 'a tumour.' An emphysematous tumour of the scrotum; probably a case of intestinal hernia, containing much fatus.

**PHYSOCEPH'ALUS**, from *φύσσω*, 'I inflate,' and *κεφαλή*, 'the head.' *Physoceph'alus*. Emphysematous tumefaction of the head.

**PHYSOCCELIA**, Tympanites.

**PHYSO'DES**; from *φύσσω*, 'I inflate,' and *ἰδέε*, 'resemblance.' Full of air; apparently full of air—applied to tumours, &c.

**PHYSOME'TRA**, *Emphyss'ima U'teri*, *Hystero'ph'yst*, *Hystero'poph'ia*, *Hystero'mph'ys's'ima*, *Hystero'mph'ys's'ima*, *Metremph'ys's'ima*, *Edo'op'io'ph'ia uteri'na*, *Emphyss'ima uteri'num*, *Insta'tio U'teri*, *Tym'pany of the Womb*, *U'terine tympani'tes*, from *φύσσω*, 'I inflate,' and *μύτρα*, 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous, with wind occasionally discharged through the os uteri.

**PHYSON**, Flatulencia.

**PHYSONCUS**, Emphysema.

**PHYSOP'SOPH'IA**; from *φύσσω*, 'I inflate,' and *ψόφος*, 'a noise.' The discharge of air with noise.

**PHYSOSPASMUS**, Colica fatalenta.

**PHYSOTHORAX**, Pnenmothorax.

**PHYTTOROUS**, Phytophagous.

**PHYTOALOPECIA**, Porrigo decalvans.

**PHYTOLAC'CA DECAN'DRA**, *Poke Weed*, *American Night Shade*, *Cancer root*, *Poke*, *Stoke*, *Jucato Caldeas*, (†) *Jalay*, *Pigeon Berries*, *Jalay cancer root*, *Solan'num racom'sum America'num*, *S. magnum Virginia'num rubrum*, *Blitum America'num*, *Gargat*, (F.) *Roisin d'Amérique*, *Phytolaque à dix étamines*, *Morille en grappes*, *Mechoacan du Canada*. Family, Chenopodem. *See Syst. Decandria Decagynia*. The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism; and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions; tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

**PHYTOLAQUE À DIX ÉTAMINES**, *Phytolacca decandra*.

**PHYTOLOGIA MEDICA**, Botany, medical.

**PHYTOPH'AGOUS**, *Phytoph'agus*; *Phytiv'orvus*, *Phytiv'orus*; from *φύσις*, 'a plant,' and *φαγε*, 'I eat.' Feeding or subsisting on vegetables.

**PHYTOSPERM'A**, (F.) *Phytosperme*; from *φύσις*, 'a vegetable,' and *σπέρμα*, 'sperm.' Particles similar to the spermatozoa of animals, observed in vegetables, and presumed to possess a similar agency in reproduction.

**PHYTOTOMY**, see Anatomy, (vegetable.)

**PHYTOZOON**, Zoophyte.

**PIA MATER**, *Pia seu mollis seu ten'nis Mater*, *Pia meningis*, *Meningis interior*, *Meningis choro'i'des*, *Innar lamina of the Meninges*, (Ch.,) *Membra'na vasculo'sa Cerebri*, *Membra'na Cerebri ten'nis seu mollis seu pro'pria*, (F.) *Pia melle*, *Méningette*. The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosités, and envelope, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a net-work of blood-vessels, united by a lax cellular tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ, into which it penetrates by a cleft situate between the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum optico'rum. The pia mater contains a great number of granulations similar to the *Glandulae Pachioni*.

**PIA MATER TESTE**, Tunica vasculosa—p. Meningis, P. Mater.

**PIAN**, Frambossia.

**PIANS**, MOTHER OF, Mama-pian.

**PIAR**, Pinguedo.

**PIARHÉ'MIA**; from *πικρ*, 'fat,' and *αἷμα*, 'blood.' Fat in the blood.—Simon.

**PICA**, Malacia—p. Africanorum, Chthonophagia.

**PICAC**, *Euphorbia corollata*.

**PICACISM'US**, *Pica'tio*, from *πις*, 'pitch.' Depilation by means of a pitch plaster. Also, Malacia.

PICATIO, Malacia, Picacismus.

PICEA, Pinus abies.

PICERION, Butter.

PICHURIM BEANS. The seed of a tree not determined, which grows in Brazil, Guiana, Venezuela, and other parts of South America. They are of an elliptical shape; flat on one side, convex on the other; of an aromatic odour between that of nutmegs and sassafras, and of a spicy, pungent taste. The medicinal properties are the same as those of other aromatics.

PICKEREL WEED, SHOVEL, *Unisema deltoidea*.

PICOTE, Variola.

PICOTEMENT, Pricking.

PICRÆNA EXCELSA, Quassia.

PICRIA, Bitterness.

PICRIUM SPICATUM, *Contoubea alba*.

PICROCHOLOS, Bilious.

PICROMEL, *Bifin*; from *πίκος*, 'bitter,' and *μελι*, 'honey.' A name given by Thénaud to a colourless, soft substance, of an acrid, bitter, saccharine taste, nauseous smell, and very soluble in water.

It forms part of the bile, and is classed amongst the animal immediate principles.

PICROS, Amarus.

PICROTOXINE, *Picrotoxina*, *Picrotoxina*, from *πίκος*, 'bitter,' and *τεξινον*, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The *Cocculus Indicus* owes its poisonous properties to this principle.

PIE MÈRE, Pia mater.

PIE-MÉRITE, *Inflammatio pia matris*. A miserably compounded term, employed by M. Grisolle, to express inflammation of the pia mater—from (F.) *pie mère*, 'the pia mater,' and *ite, itis*; a termination denoting inflammation.

PIÈCE, Hepatitis.

PIÈCES D'ANATOMIE ARTIFICIELLES, see Artificial.

PIED, Pes—p. d'Alexandre, *Anthemis pyrethrum*—p. d'Alouette des champs, *Delphinium consolida*—p. Bot, see *Kyllosis*—p. de Chat, *Antennaria dioica*—p. de Cheval marin, *Cornu ammonis*—p. de Griffon, *Gryphus pes*, *Helleborus fetidus*—p. de Lion, *Alchemilla*—p. de Lis, *Origanium*—p. d'Ours, *Acanthus mollis*—p. Plat, see *Kyllosis*—p. de Veau, *Arum maculatum*—p. de Veau triphyllé, *Arum triphyllum*.

PIERON, Pinguedo.

PIERRE, Calculus—p. d'Aigle, *Ætites*—p. d'Azur, *Lapis lazuli*—p. Calaminaire, *Calamine*—p. à Couïtra, *Potassa cum calce*—p. Infernale, *Argenti nitras*—p. Judaïque, *Judeus*, (*lapis*)—p. au Lois, *Morochthus*—p. Médicamenteuse, *Medicamentous lapis*—p. Néphrétique, *Nephreticus lapis*—p. Ponce, *Pumex*.

PIERRES CRAYEUSES, Calculi, arthritic—p. au Fiel, Calculi, biliary—p. Stercorales, Calculus of the Stomach and Intestines—p. Urinaires, Calculi, urinary.

PIESTER, Press.

PIESTERION, Press.

PIESTRON, from *πίστρον*, 'I press.' An instrument recommended by Hippocrates for

breaking the bones of the fetal head when too large to be extracted otherwise.

PIGAMON JAUNÂTRE, *Thalictron*.

PIGEON BERRIES, *Phytolacca decandra*—p. Tree, *Aralia spinosa*.

PIGMENT CELLS, see Cell, pigment.

PIGMENTAL; from *pigmentum*, 'paint.' Having relation to pigment or colouring matter.

PIGMENTAL APPARATUS, (F.) *Appareil pigmental*. The apparatus concerned in the coloration of the skin of the coloured varieties of man.—Flourens.

PIGMENTARIUS, Apothecary, Unguentarius.

PIGMENTUM, Paint—p. Indicum, Indigo—p. Nigrum, see *Choroid*—p. Uracu, *Terra Orleana*.

PIGNEROLE, *Centaurea calcitrapa*.

PIGNON DE BARBARIE, *Jatropha curcas*—p. d'Inde, *Jatropha curcas*.

PIGNOT, *Earthenus*, *Groundnut*. The bulbous root of *Bu'nium Bulbocastanum*. Called *pignuts* from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney.—Hooper.

PIGNOT, *Bunium bulbocastanum*.

PIG'S FLARE, *Adeps suilla*.

PILA, *Sphæra*, *Ball*. A gymnastic exercise, much used by the ancients as well as moderns.—Galen. Also, a mortar and a pestle,—*Ad'ens*. PILA, Mortar, Pillar—p. Damarum, *Ægropila*—p. Ruplicaprarum, *Ægropila*.

PILA MARINA, *Sphæra Marina*, *Sphæra Thalassia*, *Halcyonius rotundum*, (F.) *Pelote de Mer*. Certain light, round, depressed, or oblong masses—inodorous and insipid—in which rushes, hairs, and the debris of shells are met with. These are found on the sea shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zostera Maris-næ*. Iodine is detected in the ashes, which accounts for their success in goître. They have, also, been given as a vermifuge.

PILARE MALUM, *Trichosis*.

PILATIO, from *pilus*, 'a hair.' Fracture of the cranium in which the fissure is narrow, and has the appearance of a hair—a *capillary fissure*, (F.) *Fons capillaris*.

PILEOLUM, *Calotte*.

PILEOLUS, *Caul*, *Pileus*.

PILEOLUS, *Pilo'us*, (F.) *Pileus*. That which relates to the hair.

PILLOUS SYSTEM of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

PILES, BLIND, *Cæca hemorrhoides*.

PILEUS, 'a hat, cap or bonnet for the head.' *Pilo'olus*. A shield. A nipple-like instrument, formed of various materials, and used by females for protecting the nipple during the child's sucking, when the part is painful. Also, a caul.

PILUS, *Cucupha*—p. *Hippocraticus*, *Bonnet d'Hippocrate*.

PILEUX, *Pileus*.

PILEWORT, *Ranunculus acris*, and *R. ficaria*.

PILI CAPITIS, see *Capillus*—p. *Cutis*, *Lanugo*—p. *Palpebrarum*, *Cilia*.

PILIER, *Pillar*.

PILIMICTIO, see *Trichiasis*.

PILL, *Pilula*—p. of Aloe and Camboge, *Pilula aloes et cambogiae*—p. of Aloe and cinchona, *Pilula aloes et kina kina*—p. of Aloe

and colocynth, *Pilulæ aloes et colocynthidis*—p. of Aloes and fetid gums, *Pilulæ de aloes et fetidibus*—p. of Aloes and ginger, *Pilulæ aloes et zingiberis*—p. Aloes and myrrh, *Pilulæ aloes et myrrhæ*—p. Aloetic, *Pilulæ aloeticæ*—p. Aloetic and asafetida, *Pilulæ aloes et asafetidæ*—p. Aloetic compound, *Pilulæ aloes compositæ*—p. of Ammoniuuret of copper, *Pilulæ ammoniuretæ cupri*—p. Analeptic, James's, see *Analeptica*—p. Anderson's, see *Pilulæ aloes et jalapæ*—p. Anodyne, *Pilulæ opiatæ*—p. Antibilious, Barclay's, *Pilulæ antibiliosæ*—p. Antibilious, Dixon's, *Pilulæ antibiliosæ*—p. Asiatic, *Pilulæ Asiaticæ*—p. Bacher's, *Pilulæ ex helleboro et myrrhâ*—p. Barbarossa's, *Barbarossæ pilulæ*.

**PILL, BLAUD'S.** These pills, proposed by M. Blaud as antichlorotic, are formed as follows: Take of *Gum Tragacanth*, in powder, six grains; *water*, one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pills similar to those of Vallet, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potass*, half an ounce. Beat until the mass becomes of a deep green colour, and of a soft consistence. Divide into 48 (?) pills. Dose, one a day; gradually increasing to two, and afterwards three.

**PILL, BLUE,** *Pilulæ hydrargyri*—p. Brandreth's, *Pilulæ Aloes et Cambogiæ*—p. Calomel, *Pilulæ hydrargyri chloridi mitis*—p. Camboge, *Pilulæ cambogiæ compos.*—p. Camboge, compound, *Pilulæ cambogiæ compositæ*—p. of Carbonate of iron, *Pilulæ ferri carbonatis*—p. Cathartic, compound, *Pilulæ cathartice compositæ*—p. Common, *Pilulæ aloes et myrrhæ*.

**PILL, EVERLASTING.** A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed through a hundred patients without any difficulty."—Paris.

**PILL, FEMALE,** *Pilulæ de aloes et fetidibus*—p. Ferruginous, of Vallet, see *Ferri Protocarboas*—p. Fothergill's, see *Pilulæ aloes et colocynthidis*—p. Galbanum, compound, *Pilulæ galbani compositæ*—p. Gum, *Pilulæ galbani compositæ*—p. of Hellebore and myrrh, *Pilulæ ex helleboro et myrrhâ*—p. Hesketh's, see *Pilulæ aloes et kina kina*—p. Hooper's, see *Pilulæ aloes et myrrhæ*—p. Keyser's, see *Hydrargyrus acetatus*—p. Lady Crespigny's, *Pilulæ aloes et kina kina*.

**PILL, LARTIGUES',** *Pilulæ Colchici et Digitalis* (*Ext. Coloc. c. zss: Ext. Sem. Colchic. alcoholic., Extract. Digital. alcohol.* ãã gr. iss: f. massa in pilul. x dividend.) Dose, two, three or more in the 24 hours, in gout.

**PILL MACHINE,** *Pilulier*—p. Matthews's, see *Pilulæ ex helleboro et myrrhâ*—p. Mercurial, *Pilulæ hydrargyri*—p. of mild chloride of Mercury, *Pilulæ hydrargyri chloridi mitis*—p. Moffat's, *Pilulæ aloes et cambogiæ*—p. Morrison's, *Pilulæ aloes et cambogiæ*, see *Pilulæ cambogiæ compositæ*—p. Moseley's, *Pilulæ rhej compositæ*—p. Night, common, *Pilulæ opiatæ*—p. Opiate, *Pilulæ opiatæ*—p.

Peters', see *Pilulæ aloes et cambogiæ*—p. Plesmmer's, *Pilulæ hydrargyri submuriatis compositæ*—p. of Sulphate of Quinia, *Pilulæ quiniæ sulphatis*—p. Red, *Pilulæ hydrargyri submuriatis compositæ*—p. Red, Boerhaave's, see *Hydrargyri sulphuretum rubrum*—p. of Rhubarb, *Pilulæ Rhej*—p. of Rhubarb, compound, *Pilulæ rhei compositæ*—p. Rufus's, *Pilulæ aloes et myrrhæ*—p. Scotch, *Pilulæ de aloes et fetidibus*—p. of Soap and opium, *Pilulæ saponis cum opio*—p. Speediman's, see *Pilulæ aloes et myrrhæ*—p. Squill, compound, *Pilulæ scillæ compositæ*—p. Starkey's, see *Pilulæ ex helleboro et myrrhâ*—p. Storax, *Pilulæ e styracæ*—p. of Strychnia, *Pilulæ strychniæ*—p. of Submuriate of mercury, compound, *Pilulæ hydrargyri submuriatis compositæ*—p. Tanjore, *Pilulæ Asiaticæ*—p. Turpentine, *Pilulæ de terebinthina*—p. Vallet's, see *Ferri protocarboas*, and *Pilulæ ferri carbonatis*—p. Webster's, *Pilulæ aloes et kina kina*.

**PILLAR,** *Pila, Colum'na, Columella*, (F.) *Pilier*. A name given to several parts; as the *pillars of the velum palati, diaphragm, &c.*

**PILON,** *Pilum*.

**PILOSELLA,** *Hieracium pilosella*.

**PILOSUS,** *Pileosus*.

**PIL'ULA,** Plural, *Pil'ulæ*. Diminutive of *pila*, 'a ball?' *Sphæridion, Catapotion, Catapotum, Sphæron, Gongyion, Gongylis, Gongylidium*. A Pill. (F.) *Pilula*. A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus*, the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour. *Pilula*, also, means a *Pilular mass*.

**PILULÆ EX ALOE,** P. aloes compositæ—p. de Aloes et cambogiâ, P. aloes et cambogiæ.

**PILULÆ ALOETICÆ,** *Pilulæ ex Aloë et Saponë, Aloetic Pill*. (F.) *Pilules d'aloës ou aloëtiques*. (*Aloës in pulv.; saponis*, sing. ʒi, syr. q. s. to form 240 pills. Ph. U. S.) Dose, gr. x. to xx in habitual costiveness.

**PILULÆ ALOES ET ASAFETIDÆ,** *Aloetic and Asafetida Pills*. (*Aloës; zss, asafetidæ, saponis*, sing. ʒss, mucilag. acaaciz, q. s. to form 180 pills. Ph. U. S.) Purgative and stomachic. Dose, gr. x.

**PILULÆ ALOES ET CAMBOGIE,** *P. de Aloë et Cambogiâ, P. Hydrago'ga Bon'tii, Pill of Aloes and Camboge*. (*Aloës, cambog., gum. ammoniac.*, ãã p. m. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water bath, to a pilular consistence. Ph. P.) Purgative: used in dropsy. Dose, gr. xij to xxx.

*Peters' Pills*—a nostrum—are formed of *aloës, jalap, scammony, and camboge*, of each equal parts.

The basis of *Morrison's Pills*, often called *Hygienic pills*, of *Brandreth's Pills* and *Moffat's pills*, is said to be *aloës, with camboge, scammony, &c.*

**PILULÆ ALOES ET COLOCYNTHIDIS,** *P. ex Colocynthidë cum aloë, P. Aloës cum Colocynthidë, P. coc'cinæ, P. cocchis, P. colocynthidis compositæ, P. cocchis minoræ, Pill of aloës and Colocynth.* (*Pulp. coloc. zss, aloës hepat., scammon.,* ãã ʒi, sapon. ʒij, ol. caryoph. ʒj,

*syrup. q. s. Ph. D.*) Cathartic. Dose, gr. v. to x or more.

*Fothergill's Pills* consist of aloe, scammony, colocynth, and oxide of antimony.

**PILULÆ ALOES COMPOSITÆ, *Pilula ex Aloë, Compound Aloetic Pills.*** (*Aloes spic. extract. cont. ʒj, ext. gentiana ʒss, olei carui gtt. xl. syr. q. s. Ph. L.*) These are sometimes, also, called *Family pills, Antibilious pills, &c.*

**PILULÆ DE ALOE ET FŒTIDIS, *P. Benedicte Fulleri, Pill of aloe and fetid gums; Pilula cephratica, Female pills, Pilula aloe martialis, (F.) Pilules bénites de Fuller.*** (*Aloes socotr., sennæ, asafetide, galbani, ʒā ʒij, myrrh, ʒiv, croci, macis, ʒā ʒj, ferri sulphat. ʒiss.* Reduce to powder separately, and add *ol. succin. gtt. viij, syr. artemisiæ q. s. Ph. P.*) Purgative, and given in hysteria. Dose, gr. xv to xx.

**PILULÆ ALOES ET JALAPÆ, commonly called Anderson's Pills, Anderson's Scots' Pills, Scotch Pills.** (*Aloes Barbado. ʒj, rad. helleb. nigr., rad. jalapæ, potassæ subcarb., ʒā ʒj, ol. anisi ʒiv, syrup. simpl. q. s.—Gray.*) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloes Barbados. ʒxxiv, Saponis, ʒiv, Colocynthid. ʒj, Gamboge, ʒj, Ol. anis. i. ʒss.*

**PILULÆ ALOES ET KINÆ KINÆ, *P. stomachicæ, P. ante cibum; Pill of Aloes and Cinchona, (F.) Pilules Gourmandes.*** (*Aloes socotr. ʒv, ext. cinchon, ʒij, cinnam. ʒj, syrup. absinth. q. s. Ph. P.*) Stomachic and laxative. Dose, gr. i. to xx.

*Lady Crespigny's Pills, Lady Webster's Pills, Lady Hesketh's pills,* and the *Pilula Stomachicæ Mesuë,* Ph. L. 1635, resemble these.

**PILULÆ ALOES MARTIALES, *P. de Aloe et fœtidis.***

**PILULÆ ALOES ET MYRRHÆ, *P. Aloes cum Myrrhâ, P. de Aloë et Myrrhâ, Rufus' or Rufus's Pills, Common Pills, Pilula Rufi seu Ruffi, P. Communes, Pills of Aloes and Myrrh.*** (*Aloes ʒij, croci in pulv. ʒss, myrrh, ʒj. Syr. q. s. to form 480 pills. Ph. U. S.*) Cathartic and emmenagogue. Dose, gr. x. to xx.

*Hooper's Pills,* according to one of Gray's formulæ, are made as follows. *Ferri Sulph., aqua, ʒā ʒviij; dissolve. Add Aloes Barbado. ʒij, and ʒviij, canellæ albæ, ʒvj, gum myrrh, ʒij, opopanax, ʒiv.*

The Committee of the Philadelphia College of Pharmacy recommend the following form. *Aloes Barbadosis, ʒviij, Ferri Sulphatis exsicc., ʒij, ʒiss, vel Ferri Sulph. crystall. ʒiv, Ext. Helleb. nigr. ʒij, myrrh. ʒij, Saponis, ʒij, Canellæ in pulv. trita, ʒj, Zingib. in pulv. trita, ʒj.*

*Speedyman's Pills* consist of aloe, myrrh, rhubarb, extract of chamomile, and essential oil of chamomile.

**PILULÆ DE ALOE ET SAPONE, *P. aloeticæ.***

**PILULÆ ALOES CUM ZINGIBERÆ, *Pill of aloe and ginger.*** (*Aloes hepat. ʒj, rad. zingib. in pulv. ʒj, sapon. Hispan. ʒss, ol. ess. mentha pip. ʒss. Ph. D.*) In habitual costiveness. Dose, gr. x to xx.

**PILULÆ AMMONIURETI CUPRI, *Pills of Ammoniauret of Copper, Pilula Cupri, (F.) Pilules d'ammoniaure de cuivre.*** (*Ammoniaur. cupri in pulv. ten. trit. gr. xvj, micæ panis ʒiv, aquæ*

*carbonatis ammoniæ q. s.* Beat into a mass, and divide into xxxij pills. *Ph. E.*) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

**PILULÆ ANTE CIBUM, *P. aloes et kinæ kinæ.***

**PILULÆ ANTIBILIOUSÆ, *Barclay's Antibilious Pills.*** (*Extract of colocynth ʒij, resin of jalap, ʒj, almond soap ʒiss, guaiac, ʒij, emetic tart. gr. viij. ol. jumsp., ol. carui, ol. rosmarin. ʒā gtt. iv, syrup of buckthorn q. s., to form 64 pills.*) Dose, 2 or 3.

*Dixon's Antibilious Pills* are formed of aloe, scammony, rhubarb, and tartarized antimony.

**PILULÆ ANTIHERPETICÆ, *Pilula hydrargyri submuriatis comp.—p. Anthystericæ, P. galbani compositæ.***

**PILULÆ ANTISCROPHULOSÆ, *P. ex Orïdo Stibii et Hydrargyri sulphureto nigro compositæ.*** (*P. scammon., hydrarg. sulphur. nigr., ʒā ʒij, antimonii oxidis albi, milleped., sapon. amygdalin., ʒā ʒij, extract. glycyrrh. ʒv.* Make into a mass. *Ph. P.*) Dose gr. iv. to xx.

**PILULÆ ANTISPASTICÆ, *P. galbani compositæ —p. Asafetidæ compositæ, P. galbani compositæ.***

**PILULÆ ASIATICÆ, *Asiatic Pills, Tanjore Pills.*** (*Acid. arsenios. gr. iv; Piper. nigr. pulv. ʒix., Acaciæ q. s. ut fiant pil. 800.* Each pill contains about one-fifteenth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis.

**PILULÆ BALSAMICÆ, *P. Doctõris Morton*** (*Milleped. pulv. trita. ʒviiij, gum. ammon. ʒxj, acid. benzoic. ʒvj, croci, balsam. Peruv. ʒā ʒj., balsam. sulph. anisat. ʒvj.* Mix. *Ph. P.*) Tonic, expectorant, and balsamic.

**PILULÆ BENEDICTÆ FULLERI, *P. de Aloe et fœtidis.***

**PILULÆ CAMBOGICÆ COMPOSITÆ, *P. de guttâ gaman'drâ, P. hydrago'gæ, Gamboge pills, Pilula gummi guttæ aloeticæ; Compound Camboge pills, (F.) Pilules de gomme guttæ compositæ.*** (*Cambogis contrita, aloes spicat. extract. contriti., pulv. cinnam. comp. sing. ʒj, saponis ʒij. Ph. L.*) Cathartic. Dose, gr. x to xx.

*Morrison's Pills* are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of cream of tartar.

**PILULÆ CATHARTICÆ COMPOSITÆ, *Compound cathartic pills.*** (*Ext. colocynth. comp. in pulv. ʒss; Ext. Jalapæ in pulv., Hydrarg. chlorid. mit. ʒā ʒij; Gambog. in pulv. ʒij. M.* Form into a mass with water, and make into 180 pills—*Ph. U. S.*) Three for a dose.

**PILULÆ COCCHI, *P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colchici et digitalis, P. Lartigues—p. Colocynthidis compositæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloe, P. aloes et colocynthidis—p. Communes, P. aloes et myrrhæ —p. Cupri, Pilula ammoniuretici cupri.***

**PILULÆ COPAIBÆ, *Pills of Copaiba.*** (*Copaib. ʒij; magnesic, recentè prepar. ʒj.* Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—*Ph. U. S.*) Each pill contains nearly five grains of copaiba. Two to six for a dose.

**PILULÆ DE CYNOGLOSSO, *P. de extracto o'pii.*** (*Pulv. rad. cynogloss., semin. hyoscyam. alb., extract. opi vinos. ʒā ʒiv. pulv. myrrh. ʒvj,*

*oliban.* ℥v, *croci.*, *castor.*, āā ℥ss, *syrup opii* q. s. Ph. P.) Anodyne. In cough, &c. Dose, gr. iv. to gr. viij.

**PILULÆ DEPURANTES, P. hydrargyri submuriatis compos.**—p. Ecphracticæ, P. de aloë et fœtidis.

**PILULÆ FERRI CARBONATIS, Pills of Carbonate of iron, Vallet's ferruginous pills.** (*Ferri Sulph.* ℥iv; *Sodæ Carbonat.* ℥v; *Mel. despartat.* ℥ijss; *Syrup.*, *Agua bullientis*, āā q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of ℥ ℥j of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey. Lastly, beat the mixture in a water bath, until it contains a pilular consistence.—Ph. U. S.)

**PILULÆ FERRI COMPOSITÆ, Compound pills of Iron, Pilula Ferri cum myrrha** (F.) *Pilula de Fer composita.* (*Myrrh* in pulv. ℥ij, *sodæ subcarb.*, *ferri sulph.*, āā ℥j. *Syrup.*, q. s. Mix, to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.

**PILULÆ FERRI CUM MYRRHĀ, P. Ferri composita**—p. Fœtidæ, P. galbani composita.

**PILULÆ GAL'BANI COMPOSITÆ, P. asafœtidicæ composita, P. fœtidæ, P. gummosæ, P. s. gummi, Compound galbanum pill, Pilula antispastrictæ, P. antihystericæ, P. myrrhæ composita, Gum pill.** (*Galban.*, *myrrhæ*, āā ℥ss, *asafœtidæ* ℥iv, *syrup.* q. s. to form 480 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

**PILULÆ GUMMI, P. galbani composita**—p. Gummi guttæ aloeticæ, P. cambogiæ composita—p. Gummosæ, P. galbani composita—p. de Gutta gamandra, P. cambogiæ composita.

**PILULÆ EX HELLEBORO ET MYRRHĀ, P. tonica, Bacher's Pills, Tonic Pills of Bacher, Pills of Hellebore and Myrrh.** (*Ext. helleb. nig.*, *extract. myrrh.* āā ℥j. *fol. cardui benedict.*, in pulv. ℥ijj. Mix. Ph. P.) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv. to gr. viij.

*Matthews's Pills*,—*Starkey's Pills*, are formed of *rad. helleb. nig.*, *rad. glycyrrh.*, *sapon. Castill.*, *rad. curcumæ*, *opii purif.*, *syrup. croci*, āā ℥iv. *ol. terreb.* q. s. to fiat massa.—Gray.

**PILULÆ HYDRÆOGÆ, P. cambogiæ composita**—p. Hydræogæ Bontii, Pilula aloë et cambogiæ.

**PILULÆ HYDRÆGYRI, P. mercuriales, Mercurial pill, Blue pill,** (F.) *Pilula de Mercurio.* (*Hydrarg. purif.* ℥j, *confect. rosa* ℥ss, *glycyrrh.* ℥ss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills.—Ph. U. S.) Antisyphilitic; mercurial;—in large doses, purgative.

**PILULÆ HYDRÆGYRI CHLORIDI MITIS, Pills of mild chloride of mercury, Calomel Pills,** (*Hydrarg. chlorid. mit.* ℥ss, *acacia*, in pulv. ℥j; *Syrup.* q. s., ut fiat pil. 240.—Ph. U. S.) Each pill contains one grain.

**PILULÆ DE HYDRÆGYRO, SCAMMONIO ET ALOE, vulgo MERCURIALES, (F.) Pilula Mercuriales ou de Mercure, Scammonée et Aloës.** (*Hydrarg. purif.* ℥j, *mellis* ℥xx). Rub until the globules disappear; then add *aloes Secot.*, *scammon.* āā ℥ij, *massis*, *cinnam.* āā ℥ij. Make into a mass. Ph. P.) Uses, same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Kousudet*.

**PILULÆ EX HYDRÆGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURIATICO, Pilula hydrargyri submuriatis compositæ.**

**PILULÆ HYDRÆGYRI SUBMURIATIS COMPOSITÆ, Pilula ex Stibio et Hydrægyro, P. antihæpatica, P. ex hydrægyro muriatico miti cum sulphure stibiato auriantico, P. resolventes cum mercurio, P. depurantes, Compound Pills of Submuriate of Mercury, P. Hydrægyri Submuriatis, Calomel Pills, Plummar's Pills, Red Pill.** (*Hydrarg. submur.*, *antimon. sulphur. precipitat.* sing. ℥ij, *guaiac. gum resin. contrit.* ℥iv, *spirit. rect.* ℥ss. Beat together. Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

*Leake's Pilula salutaris* resembles these. It is used in syphilis.

**PILULÆ MERCURIALES, P. hydrargyri, P. de hydrargyro, scammonio et aloë**—p. Doctoris Morton, P. balsamicæ—p. Myrrhæ compositæ, P. Galbani composita.

**PILULÆ OPIATÆ, P. Thebæica, Opiate Pills, Common Night Pills, Anodyne Pills, Nepochthes opiatum,** (F.) *Pilula Opioidea.* (*Opium*, p. 1; *ext. glycyrrh.* p. 7; *fruct. Myrt. piment.* p. 2. Mix. Ph. E.) Five grains contain gr. ss of opium.

**PILULÆ OPII, P. saponis cum opio**—p. de Extracto opii, P. de cynoglossa—p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilula anticropulosa—p. Resolventes cum mercurio, P. hydrargyri submuriatis compos.—p. de Rhabarbaro, Pilula rhei composita.

The stomachic nostrum, sold under the name of *Mossley's Pills*, consists merely of *rhubarb* and *ginger*.

**PILULÆ QUININÆ SULPHATIS, Pills of sulphate of Quinia** (*Quin. Sulph.* ℥j, *acacia*, in pulv. ℥ij, *syrup.*, q. s., ut fiat pilula 480. Ph. U. S.) Each pill contains a grain of the sulphate of quinia.

**PILULÆ RHEI, Pills of Rhubarb, (Rhej, in pulv. ℥vj, *saponis.* ℥ij; M. et fiat pil. 120. Ph. U. S.) Each pill contains three grains of rhubarb.**

**PILULÆ RHEI COMPOSITÆ, P. de Rhabarbaro, Compound Rhubarb Pills.** (*Pulv. Rhei* ℥j, *aloes* ℥vj, *myrrh* in pulv. ℥iv, *ol. mentha* p. f. ℥ss. Beat into a mass, with *syrup of orange peel*, to form 240 pills. Ph. U. S.) Laxative and stomachic. Dose gr. x. to xx.

**PILULÆ RUFI, P. aloës et myrrhæ**—p. Salutaris, *Leake's*, see *Pilula hydrargyri submuriatis composita*—p. Saponacæ, P. saponis cum opio—p. Saponis compositæ, P. saponis cum opio.

**PILULÆ SAPONIS CUM OPIO, P. saponacæ, Pills of Soap and Opium, P. saponis compositæ, Pilula Opii,** (F.) *Pilula de Sapon et d'Opium.* (*Opium* ℥ss. *Sapon.* ℥ij. M.—Ph. U. S.) Five grains contain one of opium.

**PILULÆ SCILLÆ, P. Scillæ compositæ, P. Scillitice,**

*P. Scilla cum Zinzibere*, *P. s. Scilla*, *Compound Squill Pill.* (*Scilla* in pulv. ℥j; *singib.* in pulv.; *ammoniac.* in pulv. āā ℥ij; *saponis*, ℥iij, *syrup.* q. s. ut fiat pil. 120—*Ph. U. S.*) Dose two pills. Expectorant and diuretic. Dose, gr. x to xx.

*PILULÆ SCILLÆ CUM ZINGIBERE*, *P. scilla compositæ*—*p. Scilliticæ*, *P. scilla compositæ*—*p. ex Stibio et hydrargyro*, *P. hydrargyri submur. compos.*—*p. Stomachicæ*, *P. aloes et kina kina*.

*PILULÆ STRYCHNINÆ*, *Pills of Strychnia.* (Very pure *strychnine*, 2 gr.; *conserves of roses*, ʒss. Make into 24 pills.) One or two for a dose.

*PILULÆ STYRACIS*, *Storax Pills.* (*Styracis pur.* ℥iij, *opis purif.*, *mellis*, *croci*, sing. ℥j. *Ph. D.*) Six grains contain one of opium.

*PILULÆ SUBLINGUALES*, *Hypoglossitides.*

*PILULÆ DE TEREBINTHINÀ*, *Turpentine Pills.* Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

*PILULÆ THEBAICÆ*, *P. opiatæ*—*p. Tonicæ*, *P. ex Helleboro et myrrha*.

*PIL'ULAR*, *Pilula'ris*; from *pilula*, 'a pill.' Relating to pills,—as 'a *pilular* mass,' 'a *pilular* form,' &c.

*PILULES*, *Pilulæ*—*p. Agrégatives*, see *Aggregate*—*p. d'Aloes ou aloésiques*, *Pilulæ aloeticæ*—*p. d'Ammoniaque de cuivre*, *Pilulæ ammoniuretici cupri*—*p. Béniques de Fuller*, *Pilulæ de aloë et fetidis*—*p. de Fer composées*, *Pilulæ ferri compositæ*—*p. Ferrugineuses de Vallet*, see *Ferri protocarbones*—*p. Gourmandes*, *Pilulæ aloes et kina kina*—*p. de Mercure*, *Pilulæ hydrargyri*—*p. de Mercure*, &c., *Pilulæ de hydrargyro*, et *scammonio et aloë*—*p. Mercurielles*, *Pilulæ de hydrargyro*, *scammonio et aloë*—*p. Opiacées*, *Pilulæ opiatæ*—*p. de Savon et d'Opium*, *Pilulæ saponis cum opio*.

*PILULIER* (F.), *Pill Machine.* An instrument invented by the Germans for rolling and dividing pills. Also, the earthen pot in which pills are preserved.

*PILUM*, *Pistillus*, *Pistillum*, *Hypocros*, *Cer'cia*, (F.) *Pilon.* A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

*PILUS*, *Capillus*, *Caul*, *Hair.*

*PIMELE*, *Pinguedo.*

*PIMELECCHYSIS*, *Pimelorrhœa.*

*PIMELICUS*, *Fatty.*

*PIMELI'TIS*, from *πικηλη*, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

*PIMELODES*, *Fatty.*

*PIMELO'MA*, from *πικηλη*, 'fat.' A fatty swelling.

*PIMELORRHŒ'A*, *Pimeloc'hysis*, from *πικηλη*, 'fat,' and *ειω*, 'I flow.' A morbid discharge or disappearance of fat.

*PIMELORTHOPNŒ'A*, *Piorthopnœ'a*; from *πικηλη*, 'fat,' *αρθος*, 'upright,' and *πναιω*, 'to breathe.' Dyspœa, practicable only in the erect attitude, owing to fat.

*PIMELO'SIS*, *Obes'itas nim'ia*, from *πικηλη*, 'fat.' Conversion into, or formation of, fat,—as *Pimelo'isis hepaticæ*, 'fatty degeneration of the liver.'

*PIMELOSIS HEPATICA*, *Adiposis hepatica*—*p. Nimia*, see *Polysarcia*.

*PIMENT*, *Capsicum anuum*—*p. Royal*, *Myrica gale*.

*PIMENTA*, see *Myrtus pimenta*.

*PIMENTÆ BACCÆ*, see *Myrtus pimento*.

*PIMENTO*, see *Myrtus pimenta*.

*PIMACULA*, *Labia pudendi*.

*PIMPERNEL*, *BLUE*, *Scutellaria lateriflora*—*p. Red*, *Anagallis*—*p. Scarlet*, *Anagallis arvensis*—*p. Water*, *Veronica beccabunga*.

*PIMPILIM*, *Piper longum*.

*PIMPINEL*, *ITALIAN*, *Sanguisorba officinalis*.

*PIMPINEL'LA ANISUM*, *The Anise plant*, *Anisum*, *Anisum vulgare*, *Sola'men intestino'rum*, *Anes'mum*, (F.) *Anis.* *Family*, *Umbelliferae.* *See Syst. Pentandria Dignya.* A native of Egypt. The seeds, *Anis'mum*, (Ph. U. S.) *Sem'ina Anisi*, *Aniseed*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative; and used in dyspepsia and the tormina of infants. Dose, gr. xv to ℥j, bruised. The oil,—*OLEUM ANIS'i*, (F.) *Huile d'anis*—is official. Dose, gr. v. to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illium Anisatum*.

*PIMPINELLA*, *GREATER*, *P. magna*—*p. Hircina*, *P. Saxifraga*.

*PIMPINEL'LA MAGNA*, *P. Nigra*; *Greater Pimpinella*; *Tragoselinum majus*, *Daucus*, *Cyanopus*, (F.) *Boucage majeur*. The root has been extolled as diuretic and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

*PIMPINELLA NIGRA*, *P. magna*.

*PIMPINELLA SAXIFRAGA*, *Saxifraga*, *Burnet saxifraga*, *Poterium sanguisorba*, *Sorbastræla*, *Tragoselinum*, *Pimpinella hircina*, *P. umbellifera*, (F.) *Boucage mineur*, *Petit B.*, *Pimprelle*. The root has an unpleasant smell, and hot, pungent bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

*PIMPINELLA UMBELLIFERA*, *P. saxifraga*.

*PIMPLE*, *Papula*.

*PIMPRENELLE*, *Pimpinella saxifraga*—*p. Noire*, *Sanguisorba officinalis*.

*PIN*. Perhaps from *Pennum*, low Latin; or from *Spina*; *Spina ferrea*, *Acus capita'ta*, (F.) *Epingle*. An iron or brass instrument, generally of a small size; pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

*PIN À PIGNON*, see *Pinus picea*.

*PINASTELLUM*, *Peucedanum*.

*PINASTER*, *Pinus sylvestris*.

*PINCÉ*, *Pinched*.

*PINCE LITHODRASSIQUE*, see *Lithodrassic*.

*PINCÉE*, *Pugillus*.

*PINCERS*, *Forceps*.

*PINCETTES*, *Forceps*.

*PINCHED*, *Contractus*, (F.) *Pinché*, *Grippé*. An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

*PINCKNEYA PUBENS*, *P. Pubescens*, *Georgia Bark*, *Bitter bark*, *Florida bark*, *Fever tree*. This bark has been used in Georgia in

the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ℥j.

**PINDARS**, *Arachis Hypogea*.

**PINE APPLE**, *Bromelia ananas*—p. Apherousis, *Pinus cembra*—p. Ground, stinking, *Camphorosma Monspeliaca*—p. Mountain, see *Pinus mughos*—p. Mugho, see *Pinus mughos*—p. Stone, *Pinus pinea*—p. Sugar, see *Arrow Root*.

**PINEA**, *Pinus pinea*.

**PINE'AL**, *Pinea'lis*, from *pinus*, 'a pine.' That which resembles a pine-apple.

**PINEAL GLAND**, *Glandula pinea'lis*, *Cerebra' epiph'ysis*, *Cona'rium*, *Conoi'des corpus*, *Penis cer'ebr'i*, *Corpus turbinatum*, *Virga seu Turbo cer'ebr'i*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sab'ulum cona'rii*. When these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebr'i* of Sömmering, *Lapil'li gland'ulae pinea'lis*. From this anterior part arise two medullary striæ, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix,—the *habenæ* or *reins of the pineal gland*.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

**PINEUS PURGANS**, *Jatropha curcas*.

**PINGUEC'ULA**, *Pterygium pingue* seu *lardæum*, from *pinguis*, 'fat,' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent cellular tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

**PINGUE'DO**, *Pinguet'udo*, *Pim'ell*, *Piar*, *Pic'iron*, *Lipos*, *Stear*, *Adeps*, *Sevum*, *Sebum*, *Corpus adiposum*, *Azun'gia*, *Fat*, (F.) *Grass*. A soft, white, animal substance; inodorous; insipid; oily; inflammable, easy to melt; spoiling in the air, and becoming rancid by union with oxygen; almost insoluble in alcohol; insoluble in water; soluble in the fixed oils. Fat is formed chiefly of immediate principles, *stearin*, *margarin* and *olein*, which are regarded as salts, composed of stearic, margaric and oleic acids, and a common base to which, from its sweetish taste, the name *Glyc'er'in* has been given: to these are, almost always, joined an odorous and a colouring principle. Fat is found in a number of animal tissues, and is very abundant in the neighbourhood of the kidneys and in the epiploon. It is generally fluid in the cetacea; soft and of a strong smell in the carnivora; solid, and inodorous in the ruminating animal; white, and abundant in young animals, and yellowish in old. It usually forms about a 20th part of the weight of the human body. The fat, considered physiologically, has for its function to protect the organs; maintain their temperature; and to serve for nutrition in case of need; and is observed in torpid animals.

**PINGUEDO RENALIS**, *Nephr'idion*.

**PINGUIC'ULA VULGARIS**, *Sanic'ula montana*, *S. Eboraceni'sis*, *Viola palustris*, *Dodecath'eon Plin'ii*, *Butter-wort*, *Yorkshire San'icle*. *Family*, *Personnæus*. *Sez. Syst.* *Dianthria Monogynia*. The unctuousness of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves,

in broths, are used by the common people in Wales as a cathartic.

**PINGUIN**, *Bromelia pinguin*.

**PINGUITUDO**, *Pinguedo*.

**PINHONES INDICI**, *Jatropha curcas*.

**PINK, CAROLINA**, *Spigelia Marilandica*.

**PINK DTK**, *Stripped safflower*, ℥ij, *subcarb. of potass*. gr. xviii, *spirit of wine* ℥vij; digest for two hours; add *distilled water* ℥ij; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

**PINK, GROUND**, *Silene Virginica*—p. *Indian*, *Spigelia Marilandica*—p. *Wild*, *Silene Virginica*.

**PINNA**, Ala, Pavilion of the ear—p. *Marina*, see *Bissus*.

**PINNACULUM FORNICIS GUTTURALIS**, *Uvula*.

**PINNÆ HEPATIS**, Lobes of the liver—p. *Naris*, see *Nasus*.

**PINNULA**, *Aileron*.

**PINNULÆ HEPATIS**, Lobes of the liver.

**PINO'LI**. (S.) A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

**PINONCILLO TREE**, *Castilignia lobata*.

**PINUS A'BIES**, *Abies rubra*, *A. excel'sis*, *El'atè thele'ia*, *Pice'a*, *Norway Spruce Fir*, *Yew-leaved Fir*. *Nat. Ord.* *Coniferæ*. *Sez. Syst.* *Monœcia Monadelphica*. The tops are used in making *Spruce Beer*.

*Essence of Spruce*, *Essentia Abietis*, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer*.

This fir affords the Burgundy pitch and common frankincense. 1. *Burgundy Pitch*, *Whice pitch*, *Pix Burgundica*, *Pix alba*, *Resi'na abietis hu'mida*, *Resi'na alba humida*, *Pini abietis resina spontè concre'ta*, *Pix ar'ida*, *Pix abiet'ina*, *P. abietis* (Ph. U. S.,) (F.) *Poiz blanche*, *Poiz grass*, *P. jauna*, *P. de Bourgogne*. This prepared concrete juice is of a close consistence, rather soft, of a reddish brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time;—as in cases of affections of the chest. 2. *Abietis Resi'na*, (Ph. L. since 1809.) *Thus*, *Common Frankincense*, *Perrosin*, *Thus samini'num*, *T. vulgare*, *Olib'anum vulgare*, *Resina abietis sicca*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

**PINUS BALSAME'A**, *Abies balsamea*. The tree which affords the *Canada Balsam*, *Balsamum Canaden'se*, *Resina strobili'na*, *Terebinth'ina Canaden'sis*, *Pini balsameæ resina liquida*, *Resina flu'ida Canadensis*, *Terebinth'ina balsamea*, *Canada Turpentine* or *Balsam*, *Balsam of Fir*, (F.) *Baume de Canada*, is one of the purest turpentines. It has the common properties of those substances.

**PINUS CANADEN'SIS**, *Abies Canaden'sis*, *Hemlock Spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch—*Pix Canadensis*, *Canada Pitch*,

*Hemlock Pitch*—obtained from it is commonly known under the name *Hemlock Gum*.

**PINUS CEMBRA**, *Aphernous'li Pins*. It yields an agreeably scented turpentine:—the *Carpathian Balsam*, *Bal'samum Carpath'ionum B. Lib'ani*, *Carpath'icum*, *Briançon Turpentine*. The nuts, *Cembro nuts*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

**PINUS DAMAR'RA**, *Ag'athis Damarra*; grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Damarra turpentine*.

**PINUS LARIX**, *Larix*. The *Larch*, (F.) *Mélèze*. From this tree exude *Or'emburg gum*, and *Briançon manna*. It also yields, by boring, *Common Venice Turpentine*, *Rosina Lar'icis*, *Terebinthina Ven'eta*, *Pini Lar'icis resi'na liq'uida*, (F.) *Térébenthine de Venise*, *M. de Mélèze*. It is usually thinner than the other sorts of turpentine.

**PINUS MUGHOS**. The *Mountain or Mugho Pine*, *Pinus Pumil'io*. From the extremities of the branches exudes the *Resina Strobili'na*, of the Germans, or *Hungarian Balsam*. It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz Oil*, *Oleum Templinum*.

**PINUS PALUSTRIS**, see *Pinus sylvestris*.

**PINUS PIC'EA**, *Abies pic'ea*, *A. pectinata*, *European Silver Fir Tree*, *El'atè*, *Abies*, *A. Gal'lica*, (F.) *Sapin commun*. By piercing the tubercles of the bark of this fir, the *Strasbourg Turpentine* is obtained:—the *Resi'na Abie'tis*, (Ph. L. before 1809,) *Oleum Abietis*, *Terebinth'ina Argentoraten'sis*.

**PINUS PINASTER**, see *P. sylvestris*.

**PINUS PI'NEA**, *Stone Pine*, *Pinea*, *Pinus*, *P. uber'ima*. The nuts, *Zirbelnuts*, *Pine nuts*, (F.) *Pin à pignons*, are eaten raw; or preserved like almonds. They are, also, used in emulsions.

**PINUS PUMILIO**, see *Pinus Mughos*.

**PINUS SYLVESTRIS**, *Pinaster*, *Peuce*, *Scotch Fir*. This pine, as well as *P. marit'ima*, (*P. Pinaster*) and other species of *Pinus*, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe*, *Terebinth'ina*, *T. vulg'aris*, *T. commu'nis*, *Resina pini*, *Bijon*, *Horse Turpentine*, *Bordeaux Turpentine*, (F.) *Térébenthine de Bordeaux*, *Térébenthine commune*, is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see *Oleum Terebinthinae*.) The *white Turpentine*, or *common Turpentine of America*—*Terebinth'ina*, Ph. U. S.—is produced chiefly from *Pinus palustris* and *P. taeda*, and perhaps from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin*, *Resi'na*, Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters: if without the addition of water, the residuum is common resin or *Colophony*. 2. When the cold begins to check the exudation of the common turpentine part of it concretes in the wounds. This is called, in France, *Gallipot*, *Barras*; and *White Rosin*, *Resina alba*, when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained—*Hygropissos*, *Pissa*, *Piz ced'ria*, *Re-*

*si'na pini empyreumat'ica liq'uida*, *Terebinth'ina empyreumat'ica*, *Alchitram*, *Alchitu'ra*, *Cedria*, *Piz liq'uida*, (F.) *Goudron*, *Brai liq'uids*. Tar water, *Agua Picea*, *A. Piceis*, *Infusum Piceis liq'uidæ* seu *Piceis empyreumaticæ liq'uidæ*, *Potio pice'a*, (F.) *Eau de Goudron*, was, at one time, a fashionable remedy in numerous complaints, and of late its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. 4. *Common Pitch*, *Piz nigra*, *Black Pitch*, *Burnea*, *Burnia*, *Stone Pitch*, *Piz sicca*, *P. atra*, *P. navo'lis*, *Topissa*, *Palimpse'sa*, *P. ar'ida* (Ph. L. before 1809), (F.) *Poiz navale*, *P. noire*, is obtained by inspissating tar. It is used only as a resolvent in plasters.

**PINUS TÆDA**, see *P. sylvestris*—*p. Uber'ima*, *Pinus pinea*.

**PIONE**, *Pæonia*.

**PIONY**, *Pæonia*.

**PIORTHOPNEA**, *Pimelorthopnea*.

**PIOULQUES**, (F.) A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

**PIPE-PLANT**, *Monotropa uniflora*.

**PIPER**, see *Piper nigrum*.

**PIPER ALBUM**, *Leucopiper*, *White Pepper*, is black pepper freed from its cuticle.

**PIPER ANGSTIFOLIUM**, *Matico*. **P. aromaticum**, *P. nigrum*—*p. Betel*, *Betel*—*p. Brazilianum*, *Capsicum annum*—*p. Calecuticum*, *Capsicum annum*—*p. Caryophyllatum*, see *Myrtus pimenta*—*p. Caudatum*, *P. cubeba*—*p. Chiapæ*, see *Myrtus pimenta*.

**PIPER CUBE'EA**, *Cubeba*, *Com'peper*, *Compeba*, *Cubal sini*, *Piper caudatum*, *Cubeb Pepper*, *Tailed Pepper*, *Cuma'mus*, (F.) *Poivre-à-queue*, *Quabeba*. A native of Java and Guinea. The odour of these berries is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubebæ*, oil of cubeba—which is official in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℥j to ʒj, in powder three or four times a day: of the volatile oil, ℥ or 12 drops.

'Turkey yellow berries,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubeba.

**PIPER GUINEENSE**, *Capsicum annum*—*p. Hispanicum*, *Capsicum*—*p. Indicum*, *Capsicum annum*—*p. Jamaicense*, see *Myrtus pimenta*.

**PIPER LONGUM**, *Macrop'iper*, *Acapat'is*, *Caturip'ali*, *Pim'pilim*, *Long Pepper*, (F.) *Poivre long*. As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative and tonic, like the other peppers. Dose, gr. v to ʒj.

**PIPER LISITANICUM**, *Capsicum annum*—*p. Murale*, *Sedum*.

**PIPER METHISTICUM**, see *Ava*.

**PIPER NIGRUM**, *Melanop'iper*, *Molagoco'di*, *Lada*, *Piper aromaticum*, *Piper* (Ph. U. S.) *Black Pepper*, (F.) *Poivre noir*. Black pepper is the unripe fruit dried in the sun. *Virtues*, same as those of the other peppers.

**PIPER ODOBATUM JAMAICENSE**, see *Myrtus*

pimenta—p. Tabascum, see *Myrtus pimenta*—p. Turcicum, Capsicum annuum.

**PIPERINA**, *Piperinum*, *Piperina*, *Piperin*. A resinoid substance, obtained from the piper nigrum by M. Gerstädt, in which a part of the virtues of the pepper resides. It has been employed, like the quinia, in intermittents, and successfully.

**PIPEROPASTUS**; from *πικρι*, 'pepper,' and *πασσαι*, 'to strew.' Strewed with pepper,—socks, for example, where it is desirable to excite the surface of the feet.

**PIPIN'NA**, *Men'cula parva*. A small penis.

**PIPPERIDGE BUSH**, see *Oxycantha Galeni*.

**PIPSISSEWA**, *Pyrola umbellata*—p. Spotted, *Pyrola maculata*—p. White, *Pyrola maculata*.

**PIPTONYCHIA**, *Onychoptosis*.

**PIQUETE**, see *Sablé*.

**PIQURE**, Puncture, Wound, punctured.

**PISA**, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. The climate is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

**PISCIARELLI**, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.) sulphureous and carbonated, and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

**PISCIDIA ERYTHRINA**, *Jamaica Dog wood*. A small branching tree, common in most of the West India Islands;—*Diadelphia Decandria* of Linneus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothache.

**PISCINA**, *Baignoire*.

**PISCIVOROUS**, *Piscivorus*, *Ichthyoph'agous*, *Ichthyoph'agus*, from *piscis*, 'a fish,' and *voro*, 'I eat.' Feeding or subsisting on fish.

**PISIFORM**, *Pisiformis*, from *pisum*, 'a pea,' and *forma*, 'shape.'

**PISIFORME OS**, *Os lenticula'rè*, *Os orbicula'rè*, *Os extra or'dinè carpi*, (F.) *Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

**PISO**, Mortar.

**PISSA**, see *Pinus sylvestris*.

**PISSASPHAL'TUS**, *Pissasphaltum*, *Mineral pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen,' (F.) *Pois minérale*. A thicker kind of *Petroleum* or *Rock Oil*; formerly employed as a vulnerary. It is synonymous with *Glutinous bitumen*, *Malta bitumen*, and *Mineral tar*.

**PISSELÆUM**, *Oleum Pisci'num*, from *πισσα*, 'pitch,' and *λαιον*, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

**PISSELÆUM INDICUM**, *Petroleum*.

**PISSEMENT DE SANG**, *Hæmaturia*.

**PISSENLIT**, *Leontodon taraxacum*.

**PISSE'ROS**, from *πισσα*, 'pitch,' Ancient name of a cerate, prepared of *olive oil*, *oil of roses*, and *dried pitch*. It was, also, called

*Cera'tum pisc'ium*, and *C. tetraphor'macum*.—*Hippocrates*.

**PISSITES**, *Vinum pisc'ium*. Same etymon. A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

**PISSOSIS**, *Malacia*.

**PISSWEED**, *Anthemis cotula*.

**PISTACHIO NUTS**, see *Arachis hypogea*, *Pistacia vera*.

**PISTACIA LENTIS'CUS**, *Terebin'thus lentiscus*, *Lentiscus vulgaris*; the *Mastic Tree*. Family, *Terebinthaceæ*. The wood of this tree abounds with the resinous principles of mastic; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastic*, *Resina Lentisc'na*, *Men'frige*, *Masti'chè*, *Mastix*, *Pistacia Lentis'ci Resi'na*. This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semi-transparent masses: soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop holes in carious teeth.

**PISTACIA TEREBIN'THUS**, *Turpentina Tree*, *Hab-el-Kalimat*, *Terebinthus vulgaris*, *Termintus*. The tree which affords the *Cyprus Turpentine*, *Resi'na Terebin'thi*, *Terebin'thina vera*, *T. Chia*, *T. Cyp'ria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentine.

**PISTACIA VERA**. Name of the tree which affords the *Nux Pistacia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

**PISTILLUM**, *Pilum*.

**PISTOLOCHIA**, *Aristolochia pistolochia*.

**PISTORIENSIS GLADIUS**, *Bistouri*.

**PIT OF THE STOMACH**, *Fossette de cœur*.

**PITAY'A BARK**. This bark is preferred in Columbia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

**PITAYINE**, see *Pitaya bark*.

**PITCAITHLEY**, MINERAL WATERS OF. These saline springs at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

**PITCH**, *Colophonia*—p. Black, see *Pinus sylvestris*—p. Burgundy, see *Pinus abies*—p. Canada, see *Pinus Canadensis*—p. Common, *Pinus sylvestris*—p. Hemlock, see *Pinus Canadensis*—p. Jew's, *Asphaltum*—p. Mineral, *Pissasphaltum*—p. Stone, see *Pinus sylvestris*—p. White, see *Pinus abies*.

**PITHYRIASIS**, *Pityriasis*.

**PITHYRINUS**, *Acerosus*, *Furfuraceus*.

**PITTA'CIUM**. A pitch plaster, from *πιττα*, 'pitch.'

**PITTO'SIS**, *Malacia*.

**PITTO'TA**. Medicines in which pitch is the chief ingredient.

**PITTSBURG**, MINERAL WATERS OF. A chalybeate mineral spring, situate about four

miles S. W. of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

**PITUITA**, Mucus, Plegm—p. Narium, Nasal mucus.

**PITUITARY**, *Pituita'rius*, *Pituito'sus*, from *pituita*, 'phlegm.' A name given to several parts.

**PITUITARY BODY**, P. gland.

**PITUITARY FOSSA**, *Fossa Pituita'ria*. A depression on the cerebral surface of the sphenoid bone, which lodges the pituitary gland. It is called, on account of its shape, *Sella Turcica*, *Ephippium*. Chaussier calls it *Fossa supra-sphenoida'lis*, from its situation.

**PITUITARY GLAND**, *Glandula Pituitosa* vel *pituita'ria*, *Glandula basilaris*, *Lacu'na* vel *Appendicula cerebri*, *Hypophysis* seu *Appendix cerebri*, *Pituitary body*, *Corpus pituita're*; —*Appendice sus-sphenoidale du cerceau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

**PITUITARY MEMBRANE**, *Schneiderian Membrane*, *Membra'na pituita'ria*, *M. olfacto'ria*. The mucous membrane which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united;—the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of smells, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

**PITUITOSUS**, Pituitary.

**PITYRIASIS**, from *πυρρον*, 'bran;' *Lepidosis Pityriasis*, *Pityria'ma*, *Pithyriasis*, *Herpès furfuraceus*, *H. farino'sus*, *Porri'go* (of some), *Tin'ea furfuracea*, *T. porriginosa*, *Furfuratio*, *Furfurica*, *Dandriff*, *Dandruff*, (F.) *Teigne*, *Dartre*, *Dartre furfuracée volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

**PITYRIASIS**, *Porri'go*—p. Nigra, Melasma—p. Versicolor, Chloasma.

**PITYRISMA**, Pityriasis.

**PITYROIDES**, Furfuraceus.

**PITYRON**, Furfur.

**PIVOINE**, Pæonia.

**PIX**, Sperm—p. Abietina, see *Pinus abies*—p. Abietis, see *Pinus abies*—p. Alba, see *Pinus abies*—p. Andra, see *Pinus abies*, and *Pinus sylvestris*—p. Atra, see *Pinus sylvestris*—p. Brutia, Brutia—p. Burgundica, see *Pinus abies*—p. Canadensis, see *Pinus Canadensis*—p. Cedria, see *Pinus sylvestris*—p. Græca, Colophonia—p. Liquida, see *Pinus sylvestris*—p. Navalis,

see *Pinus sylvestris*—p. Nigra, see *Pinus sylvestris*—p. Sicca, see *Pinus sylvestris*.

**PLACEBO**, 'I will please.' An epithet given to any medicine intended rather to satisfy the patient than to cure a disease.

**PLACENTA**. A Latin word, signifying a *Cake*. *P. uteri* seu *uteri'na* seu *uteri car'nea*, *Hepar* seu *Jecur uteri'num*, *Caro* seu *Affusio orbicularis*, *Masa*. A soft, spongy, vascular body, formed at the surface of the chorion, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. Its mode of attachment to the uterus is a topic of dispute: but it seems clear that the main circulation through it is of the blood of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fetal surface are confounded into one mass. It is composed of the umbilical vessels, cellular tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus. The function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being shown to that of the mother, and undergoing requisite changes.

**PLACENTA CRUORIS**, see *Blood*—p. Febrilis, *Ague cake*—p. Oblata, *P. prævia*—p. Obvia, *P. prævia*.

**PLACENTA PRÆVIA**, (from *præ* and *vicia*), *P. ob'via*, *P. ob'la'ta*. Presentation of the placenta; a condition which gives rise to *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

**PLACENTA SANGUINIS**, see *Blood*—p. Uteri Succenturiata, *Decidua*.

**PLACENTITIS**, *Placunti'tis*, *Placoi'tis*, *Inflamma'tio placen'te*. A hybrid word—from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

**PLACENTULA**, 'a little cake.' A rudimentary placenta. The placenta of an abortion.

**PLACOITIS**, *Placentitis*.

**PLACENTITIS**, *Placentitis*.

**PLADAROMA**, *Pladarosis*.

**PLADAROSIS**, *Pladara'oma*, *Pladar'otes*, from *παδαρον*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain. Trachomæ

**PLADAROTES**, *Pladarosis*.

**PLAFOND DES VENTRICULES DU CERVEAU**, *Corpus callosum*.

**PLAGA**, *Ictus*, *Wound*.

**PLAGIOBOLIA**, *Planobol'ia*, from *πλωγιος*, 'to one side,' and *βωλλειν*, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

**PLAGUE**, from *πληγη*, *plaga*, 'a stroke.' *Pestis*, *P. orienta'lis*, *P. bubona'ria orientalis* seu *inguina'ria*, *P. contagio'sa*, *P. acutiss'ima*, *P. septica*, *P. Glandulo'sa*, *P. Adæno-septica*, *P. inguinaria*, *Pestil'entia*, *Ephem'era pestilential'is*, *E. mortifera*, *Luas inguina'ria*, *Clades glandula'ria*, *Phthora*, *Pestilen-*

*tia, Lues, Loimos, Febris ad'no-nervo'sa, Lamos, Lame, La'mia, Læmopyra, Chaosda, Anthrac'ia Pestis, Anthracotyphus, Febris pestilens, Syn'ochus pestilentialis, Typhus pestis, T. pestilentialis, T. gravis'imus, T. an-thrac'icus, T. bubon'icus, Eranthe'ma pestis, the Pest, Levant plague, Septic or glandular pestilence, (F.) Peste, Typhus d'Orient, Fèvre du Levant.* An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groin or axillæ, and carbuncles. Its mias-mata—it has been conceived—adhere to differ-ent organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological ana-tomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently dis-tinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the sup-puration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quarantine Laws* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

**PLAGUE, COLD.** A severe form of congestive fever, seen in the Southern States. Bili-ous pneumonia, in which there is no reaction, has been, also, so called.

**PLAGUE MARK, Plague token**—*p.* Spot, Plague token.

**PLAGUE TOKEN, Plague mark, Plague spot.** A mark by which one struck with the plague was known. Perhaps the early stage of car-buncle in unfavourable cases. It is described as a small tubercle—*Bossa*—somewhat resem-bling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet seed to that of a bean.

**PLAGULA, Compress, Pledget, Splint.**

**PLAIE, Wound**—*p. d'Arme à feu, Wound, gunshot*—*p. d'Arquebusade, Wound, gunshot*—*p. Contuse, Wound, contused*—*p. Envenimée, Wound, poisoned*—*p. par Arrachement, Wound, lacerated*—*p. à Lambeau, see Lambeau.*

**PLANARIA LATIUSCULA, Distoma hepaticum.**

**PLANCHER (F.), 'floor.'** In anatomy, the inferior wall or boundary of a cavity.

**PLANCHER DU CERVEAU, Tentorium.**

**PLANCUS, Leiopus.**

**PLANE, Plexus.**

**PLANETES, Plan'eticus, Plan'icus, Erra-bundus, Errat'ic.** An epithet given to dis-eases, whose returns are irregular—especially to intermittent fever; *Planetes Febris, F. Errat'ica, F. Erronea, F. Vaga.*

**PLANETICA ARTHRITIS, Gout, wan-dering.**

**PLANICUS, Planetes.**

**PLANIPEDES, Steganopodes.**

**PLANITIS PEDIS, Sole.**

**PLANOBOLIA, Plagiobolia.**

**PLANTA NOCTIS, Hydroa, Sudamina**—*p.* **Pedis, Sole**—*p.* **Prima pedis, Tarsus.**

**PLANTA'GO, P. Major, Continer'via, Arno-glos'sum, Septiner'via, Polynou'ron, Hepta-pleu'ron, Planta'go latifolia, P. major, (F.) Plantain commun.** Family, Plantaginæ. *Sæc. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, substy-tic, and diuretic.

**PLANTAGO CORONOPUS, Coronop'dium, Cor-nu cervi'num, Stella terra, Plantago, Buck-horn Plantain.** Properties like the last.

**PLANTAGO PSYLLIUM, Psyll'ium, Pulica'ris herba, Crystallion, Cynomo'a, Branching Plantain, Fleawort, (F.) Herbs aux puces com-mune.** The seeds have a nauseous, mucilagi-nous taste, and no remarkable smell. The de-coction of the seeds is recommended in hoar-seness and roughness of the fauces.

**PLANTAIN, BRANCHING, Plantago psyll-ium**—*p.* **Buckshorn, Plantago coronopus**—*p.* **Commun, Plantago**—*p. d'Eau, Alisma plantago*—*p.* **Tree, Musa paradisiaca**—*p.* **Water, Alisma plantago, Unisema deltofolia.**

**PLANTAIRE, Plantar muscle**—*p.* **Grêle, Plantar muscle.**

**PLANTAR, Planta'ris, from planta, 'the sole of the foot.'** That which relates or belongs to the sole of the foot. This name has been given to several parts.

**PLANTAR APONEURO'SIS, P. fascia.** A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the me-dium of septa, which it sends between them.

**PLANTAR ARCH, see Plantar arteries.**

**PLANTAR ARTERIES.** These are two in num-ber, and arise from the extremity of the poste-rior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe. The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior or tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extre-mity of the first metatarsal bone, and anasto-moses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch or Cross*. It gives branches in all directions. The inferior and posterior have received no name. The su-perior—three in number—are the *posterior per-forating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *col-laterals of the last four toes*.

**PLANTAR CROSS, see Plantar arteries**—*p.* **Fascia, P. aponeurosis.**

**PLANTAR LIGAMENTS.** A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

**PLANTAR MUSCLE, Planta'ris, P. grac'ilis,**

*Tibia's gracilis, Extensor tarsi minor, (F.) Plantaris, P. Grêle, Jambier grêle, Petit femoro-calcaneus, (Ch.)* A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

**PLANTAR NERVES.** These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into—1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches;—the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other—*superficialis*—sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricalis.

**PLANTAR REGIONS OF SURFACES** are different regions or surfaces of the sole of the foot. Three are generally reckoned,—the *internal, middle, and external.*

**PLANTAR VEINS** follow a similar arrangement.

**PLANTARIA, Dengue.**

**PLANTARIS, Plantar muscle—p., Superficies pedis, Sole—p. Verus, see Flexor longus digitorum pedis profundus perforans (accessorius.)**

**PLANTE DU PIED, Sole.**

**PLANTI-SOUS-PHALANGIENS, Lumbricales pedis—p. Tendino-phalangiens, Lumbricales pedis.**

**PLANUM APONEUROTICUM DIAPHRAGMATICIS.** The tendinous expansion of the diaphragm.

**PLANUM OS, from planus, 'soft, smooth.'** The papyraceous or orbital plate of the ethmoid bone was formerly so called.

**PLANUM PEDIS, Sole.**

**PLANUM SUPERIORIS LINGUÆ.** The upper surface of the tongue.

**PLANURIA, from planus, 'wandering, false,' and urina, 'urine.'** Discharge of urine through unwonted ways.

**PLAQUEMINIER D'EUROPE, Diospyros lotus.**

**PLAQUES GAUFREES, Peyeri glandulæ—p. Laitouses, see Taches laitouses.**

**PLASMA, Liqueur sanguinis.**

**PLASTER, Emplastrum—p. Adhesive, Emplastrum resinæ, Sparadrapum adhesivum—p. Adhesive, of pitch and resins, Emplastrum de pice et resinis glutinans—p. Ammonicum, Emplastrum ammoniaci—p. **PLASTIC, Plasticus, Formativus, Formative, from πλασσω, 'I form.'** That which forms; which serves to form.

**PLASTIC ELEMENT.** One which bears within it the germs of a higher form.—Gerber.

**PLASTIC FORCE.** The generative power in organized bodies. It is also called *Nisus formativus, Vis seu Virtus plastica seu formativa, Vis reproductiva, Plasticismus, Virtus formatrix, Plasticitas, Plasticity, Force of Nutrition, F. of assimilation, Bildungstrieb* of the Germans.

**PLASTIC LYMPH, Liqueur Sanguinis—p. Surgery, Morioplastice.**

**PLASTICISMUS, Plastic Force.**

**PLASTICITAS, Plastic Force.**

**PLASTICITY, Plastic Force.**

**PLATA, Scapula.**

**PLATANO, Musa Sapientum.**

**PLATANUS, Musa paradisiaca.**

**PLATEA, Bothriocephalus latus.**

**PLATES, MANSFORD'S, see Galvanism.**

**PLATIASMUS, from πλατυς, 'broad.'** Excessive development of the lips, causing the articulation to be imperfect.

**PLATINA, Platinum.**

**PLATINUM, Platina, from (S.) plata, 'silver.'** The preparations of platinum resemble in their therapeutical properties those of gold. The **BICHLORIDE, Platini Bichloridum**, made by dissolving platinum in *aqua regia*, and the **DOUBLE CHLORIDE OF PLATINUM AND SODIUM, Sodii chloroplatinus, Chloroplatinate of Sodium**, prepared by dissolving bichloride of platinum and pure chloride of sodium in proper proportions in water, evaporating and crystallizing,—are the preparations used. They are not much prescribed.

**PLATULA, see Pediculus.**

PLATYBREGMATE, see Cranium.

PLATYCORIA, Mydriasis.

PLATYCORIASIS, Platycoria.

PLATYNO-SIS, from πλατυς, 'broad.' *Amplificatio*. Morbid extension of parts.

PLATYOPHTHALMON, Antimonium.

PLATYPODIA, see Kylosis.

PLATYPUS, see Kylosis.

PLATYS/MA from πλατυς, 'broad.' Any thing broadly extended. A spread plaster.

PLATYS/MA MYOIDES, *P. Myoides*, *Musculus cutaneus*, *M. subcutaneus* (Winslow), *Quadratus gena vel latis/simus colli*, *Expan/sio musculo/sa*, *Tetrag/onus*, *Stomoman/icon*, (F.) *Thoraco-maxillo facial*, *Thoraco-facial* (Ch.), *Peaucier*. A muscle situated superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the cellular tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER/NOS, from πλατυς, 'broad,' and στήν, 'the sternum.' One who has a broad well developed chest.—D. Pechlin.

PLATYSTOMUS; from πλατυς, 'broad,' and στομα, 'mouth.' One who has a broad mouth.

PLAUTUS, Leiopus.

PLECHAS, Perinæum.

PLECTANÆ, Cornua uteri.

PLECTANÆ, *Plica*, *Plegma*, *Plexus*. A fold; a plexus. Also, a cornu of the uterus.

PLECTRUM. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

PLEDGET, (D.) *Plagghe*, *Plumaco/otus*, *Linteamen*, *Plag'ula*, (F.) *Plumacau*, *Plumasseau*. A small compress or *gâteau* of lint—(the filaments arranged parallel to each other)—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, or to absorb the discharges.

PLEGE, Blow, Ictus.

PLEGMA, Plectane, Plexus.

PLEGOMETER, Pleximeter.

PLEIN, (F.) 'Full.' The middle part of a roller.

PLENA MULIER, Pregnant.

PLENITUDE, Fulness.

PLENITUDO, Plethora.

PLENCK'S DEPILATORY, see Depilatory, Colley's.

◀ PLEONECTICA ATHYMIA seu MELANCHOLIA. A form of insanity characterized by a desire for gain or by covetousness.

PLEONECTICUS, from πλεον, 'more,' and εχθρ, 'to have.' Covetous. Desirous to acquire.

PLERO/SIS, from πληρης, 'full;' also *Reple-*

*titio*, *Refectio*, *Repletio*. Restoration of flesh after sickness. Plethora.

PLEROTICUS, Incarnans.

PLESMONE, *Plenitudo*, *Sati'etas*, *Sati'ety*. Intemperance. A condition the opposite to that of hunger.

PLESSER, Plexor.

PLESSIMETER, Pleximeter.

PLETHOMER/IA, from πληθος, 'many,' and μέρος, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

PLETHORA, from πληθω, 'I fill.' *Polyæmia*, *Polyhyperhæmia*, *Polychymia sanguinea*, *Angeloplero/sis*, *Angioplero/sis*, *Erythræmia*, *Erythro/sis*, *Hæmatopletho'ra*, *Hæmopletho'ra*, *Plenitudo*, *Multitudo*, *Redundan'tia*, *Repletio*, *En'chyma*, *Comple'tio*, *Fulness*, (F.) *Abondance*, *Rédon'dance*. The word *plethora*, which means repletion, *Plero/sis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of *plethora* into *general* and *local*; the latter being called, according to its seat, *cerebral*, *pulmonary*, *uterine*, &c. The principal symptoms of *plethora* exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to *plethora*, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general *plethora*, as it increases hæmætosis.

PLETHORA, LOCAL, Hyperæmia.

PLETHORIC, *Plethoricus*, *Polyæmic*, *Polyæmius*, (F.) *Pléthorique*. Same etymon. Full of blood. Relating to or affected with *plethora*.

PLETHORICUS, Plethoric.

PLETHOS, Satiety.

PLEUMON, Pulmo.

PLEUMONIA, Pneumonia.

PLEURA, *Pleurum*, *Pleuro'ma*, 'the side, a rib.' *Membra'na pleuriti'ca seu costas succin'gens seu succin'gens*, *Membra'na seu Tunica costalis seu subcostalis*, *Hypopneu'ric*. (F.) *Pleure* ou *Pleure*. The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costalis*; the portion that covers the lungs, *Pleura Pulmonalis*. The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

*Pleura* is also used for *Cavity of the Pleura*, *Saccus Pleura*.

PLEURÆ. The sides of the chest.

PLEURAL, *Pleuralis*, *Pleu'ricus*, *Pleu'*

*rites*. That which concerns the pleura;—as a pleural fistula;—pleural cavity, &c.

PLEURALGIA, Pleurodyne.

PLEURAPOSTEMA, Empyema.

PLEURARTHROCA'CE, from πλεῦρα, 'a rib,' ἄρθρον, 'a joint,' and κακίη, 'bad.' Caries of the ribs.

PLEURE, Pleura.

PLEURESIA, Pleuritis.

PLEURESIE, Pleurisy.

PLEURESIS, Pleuritis.

PLEURICUS, Pleural.

PLEURIS, Pleuritis.

PLEURISY, Pleuritis.

PLEURISY, BILIOUS, *Pleuritis biliosa*, is pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the southern States especially, for bilious pneumonia before the pneumonic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax—p. Rheumatic, Pleurodynia—p. Root, Asclepias tuberosa.

PLEURISY, TYPHOID, *Pleuritis typhoides seu typhodes seu typhosa*. Pleurisy accompanied by adynamic symptoms.

PLEURITES, Pleural.

PLEURITIS, from πλεῦρα, 'the pleura,' *Morbis lateralis*, *M. pleuriticus*, *M. Costalis*, *Empyema Pleuritis*, *Pleuris*, *Pleuresis*, *Pleurisia*, *Pleuritis costalis seu vtra*, *Pleuritica Febris*, *Causa Pleuritis*, *Passio pleuritica*, *Inflammatio Pleura*, *Pleurisy*, *Inflammatio of the Pleura*, (F.) *Pleurisie*, *Fievre pleurétique*, *Inflammation de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnœa, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the plegmasiæ in general, strongly marked.

*Physical Signs*. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dulness of sound on percussion, the dulness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy*, one situated in the anterior mediastinum: and *false pleurisy* or *rheumatismal pleurisy*, that which occupies the intercostal muscles. The last has

received the name *Pleurodynia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid*, according as it is accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

PLEURISY, CHRONIC, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

*Physical Signs*. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On *dissection* of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions. The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name PLEURITIS VENTO'SA, and Pringle that of PLEURODYNIA VENTO'SA, to a pain behind the false ribs, attributed to the presence of air in the intestines.

PLEURITIS BRONCHIALIS, Bronchitis—p. Costalis, Pleuritis—p. Diaphragmatica, Diaphragmitis—p. Humida, Bronchitis—p. Muscularis, Pleurodynia—p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuropneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleu-

rodynia—p. Typhoides, see Pleuritis, (biliosa) —p. Vera, Pleuritis.

**PLEUROCELE**, from πλῆρα, 'the pleura,' and κήλη, 'a tumour.' *Hernia of the pleura*, *Hernia pleurica* et *pulmonalis*. This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

**PLEUROCOLLE'SIS**, from πλῆρα, 'the pleura,' and κολλάω, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

**PLEURODYNE**, Pleurodynia.

**PLEURODYNIA**, *Pleuralgia*, *Pseudo-pleuritis*, *Pseudo-pleurisy*, *Pleurodynē*, *Antalgia dolorosa*, *A stitch*, *Pain in the side*, *Stitch in the side*, *Parapleuritis*; *Stethorrhœuma*, *Rheumatismus pectoris*, *Pleuritis rheumatica*, *P. muscularis*, *P. spuria*, *Falso Pleurisy*, *Rheumatism* or *rheumatismal pleurisy*, *Pleuritis notha* seu *spuria* seu *spuria simulata*, *Pneumonia exterior*, *Lagonorionos*, *Thoracodynē*, *Dolor Pectoris exterior*, (F.) *Point de côté*, *Douleur de côté*; from πλῆρα, 'the side or pleura,' and ὄδυνη, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnœa, excepting under the form of a *stitch*, when dyspnœa exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resist, a blister will, almost always, remove it.

**PLEURODYNIA VENTOSA**, Pleuritis ventosa.

**PLEUROMA**, Costa, Pleura.

**PLEUROPATHIA**, from πλῆρα, 'the pleura,' and πάθος, 'a disease.' A disease of the pleura.

**PLEUROPERIPNEUMONY**, *Pleuroperipneumonia*, *Pleuropneumonia*, *Pneumopleuritis*, *Pneumopleuritis*, *Pleuritis pulmonis*, *Pneumonia pleuritis*. Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs*. A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

**PLEUROPNEUMA**, Pneumothorax.

**PLEUROPNEUMONIA**, Pleuroperipneumony.

**PLEUROPNEUMONITIS**, Pleuroperipneumony.

**PLEUROPYESIS**, Empyema.

**PLEURORRHŒA**, from πλῆρα, 'the side,' and ῥέω, 'I flow.' Accumulation of fluid in the pleura.

**PLEURORRHŒA CHYLOSA**, Chylothorax—p.

Lymphatica, Hydrothorax—p. Purulenta, Empyema—p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

**PLEURORHOPNŒA**, from πλῆρα, 'the side,' ὄρθος, 'erect,' and πνῆσι, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

**PLEUROSTO'SIS**, from πλῆρα, 'the pleura,' and ὀστέον, 'a bone.' Ossification of the pleura, or in the cavity of the pleura. Osteopleuria.

**PLEUROTETANUS**, Pleurothotonos.

**PLEUROTHOTONOS**, *Pleurotonos*, *Pleurotetanus*, *Tetanus lateralis*, from πλῆροθῆν, 'laterally,' and τῆσι, 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

**PLEUROTONOS**, Pleurothotonos.

**PLEURUM**, Costa, Pleura.

**PLEVRE**, Pleura.

**PLEXIMETER**, *Pleximeter*, *Plegometer*, *Plessimeter*, from πλέσσω, 'I strike,' and μέτρον, 'measure,' 'a measurer of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See Percussion, mediate.

**PLEXOMETEER**, Pleximeter.

**PLEXOR**, from πησσω, 'I strike.' *Plessor*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

**PLEXUS**, *Plegma*, *Plectant*, *Planē*, *Rett*, from πlecto, 'I interlace,' 'I entwine.' (F.) *Lacis*. A network of blood vessels or of nerves. The nervous plexuses, *Implicatio nes reticulares* seu *Textus nervorum* belong—some to the system of cephalic nerves—others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs or to other plexuses.

**PLEXUS CHOROIDES**, see Choroid—p. Ciliaris, Ciliary ligament—p. *Cæliacus*, Cæliac plexus—p. Coronarius ventriculi, Gastric plexus—p. Gangliiformis semilunaris, Cæliac plexus—p. Gangliiformes, Ganglions, nervous—p. Glandiformes, Ganglions, nervous—p. Glandulosi Peyeri, Peyeri glandulæ—p. Hederaceus, Corpus pampiniforme—p. Hepaticus, Hepatic plexus—p. Infra-thyroideal, see Thyroideal veins—p. *Lombo-abdominal*, Lumbar plexus—p. Median, Cæliac plexus—p. Mesenterii proprius et maximus, Cæliac plexus—p. Nervorum anserinus, Facial nerve—p. *Opistogastricus*, Cæliac plexus—p. Pampiniformis, Corpus pampiniforme—p. Retiformis, Corpus cavernosum vaginæ—p. Reticularis, Choroides plexus—p. Solar, Cæliac plexus—p. *Sous-mésentérique*, Hypogastric plexus—p. *Testiculaires*, Spermatic plexus—p.

*Trachilo-sous-cutane*, Cervical plexus—p. Vasculous funiculi spermatici pampiniformis, Corpus pampiniforme.

**PLICA**, from *plicari*, 'to be knit together.' *Tricho'sis plica*, *Tricho'ma*, *Trica*, *T. Incuborum*, *T. Serofo'rum*, *Plica Polonica*, *P. Polonica Judaica*, *P. Cachectica*, *P. Saxonica*, *Affectio Sarmatica*, *Matted hair*, *Plaited hair*, *Trichomatous hair*, *Lues Sarmatica*, *L. Polonica*, *L. Trichomat'ica*, *Helo'sis*, *Helo'tis*, *Cir'ragra*, *Cir'r'hagra*, *C. Pollonorum*, *Ecphy'ma tricho'ma*, *Morbus Cir'rhorum*, *Plica caput Medu'sa*, *Plica longicauda lateralis*, *Coma Cæsa'rea*, *Kolto*, *Rhopalo'sis*, *Plicatio*, *Plicatura*, (F.) *Plique*, *P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. The *Plica multiformis* or *Plica caput Medu'sa*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. laciniata*, (F.) *Plique en lamieres*) or much twisted (*P. C. M. laciniata*, (F.) *P. en vrilles*.) 2. *Plica longicauda*, (F.) *Plique solitaire* ou à queue; when the hair is united into a single long mass, and 3. *Plica capitis*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from being demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection—*sui generis*—of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable.

**PLICA**, Plectane—p. Cachectica, Plica—p. Caput Medusæ, Plica—p. Longicauda lateralis, Plica—p. Lunata, Valvula semilunaris—p. Polonica Judaica, Plica—p. Saxonica, Plica—p. Semilunaris, Valvula semilunaris.

**PLICATIO**, Plica.

**PLICATURA**, Plica.

**PLICATURÆ CEREBRI**, Gyri cerebri.

**PLICIOS**, Perineum.

**PLINTHIUM**, πλινθιον. A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armenarium Chirurgicum*.

**PLIQUE**, Plica—p. Polonaise, Plica.

**PLOMB**, Plumbum.

**PLOMB**, (F.) The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

**PLOMB, ACETATE ACIDE DE**, Plumbi superacetatis—p. Blanc, Plumbi subcarbonas—p. Blanc de, Plumbi subcarbonas—p. Carbonate de, Plumbi subcarbonas—p. Chlorure de, Plumbi chloridum—p. Iodure de, Plumbi iodidum—p. Oxide de, fondu, Plumbi oxydum semivitreum—p. Oxide rouge de, Plumbi oxydum rubrum—

p. Oxide semivitreux de, Plumbi oxydum semivitreum.

**PLOMBAGINE**, Graphites.

**PLOMBIÈRES, MINÉRAL WATERS OF**, *Fontes medicati Plumbarii*, *Thermæ Plumbariæ*. Plombières is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceus*, (F.) *Savonneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

**PLORATIO**, Lachrymatio.

**PLORATUS**, Lachrymatio.

**PLOTUS**, Leiopus.

**PLUGGING**, (Sw.) *Plugg*, (F.) *Tamponnement*. The act of stopping a hole. The introduction of a plug of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache.

**PLUM**, Prunum, Prunus domestica—p. Assyrian, Sebastina.

**PLUMA**, Lanugo.

**PLUMACEAU**, Pledget.

**PLUMACEOLUS**, Pad, Pledget.

**PLUMASSEAU**, Pledget.

**PLUMBAGO**, Graphites, Persicaria.

**PLUMBA'GO EUROPE'A**, *Dentaria*, *Crepant'la*, *Squama'ria*, *Dentel'ria*, *Leadwort*, (F.) *Dentaire*, *Herbe au Cancer*. Family, Plumbaginæ. *Sax. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for the toothache; like the *Pellitory of Spain*, which is also called *Dentaria*.

**PLUMBI ACETAS**, P. superacetatis—p. Acetatis dilutum alcoholicum, Liquor plumbi subacetatis dilutus—p. Acidulus siccus, Plumbi superacetatis—p. Carbonas, P. subcarbonas.

**PLUMBI CHLORIDUM**, *Chloride of Lead*, (F.) *Chlorure de Plomb*. This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

**PLUMBI DEUTOXYDUM RUBRUM**, P. oxydum rubrum—p. Iodidum, see Iodine—p. Ioduretum, see Iodine.

**PLUMBI NITROSAC'CHARAS**, *Nitrosac'charate of lead*. (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aquæ.* p. x.) Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water), filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.

Advised as a solvent to phosphatic calculi.

**PLUMBI OXYDUM ALBUM**, Plumbi subcarbonas—p. Oxydum carbonatum per acidum acetosum, Plumbi subcarbonas—p. Oxydum fusum, Pl. oxydum semivitreum.

**PLUMBI OXYDUM RUBRUM**, *Mir'ium*, *Miltus*, *Dentox'ydum plumbi rubrum*, *Superoz'ydum*

*Plumbo'um, Plumbum oxydatum rubrum, Sandiz, Sandyz, Red lead, (F.) Oxide de plomb rouge.* It is sometimes used to kill vermin.

PLUMBI OXYDUM SEMIVITREUM, *Lithar'gyrus, Lithargyrum, Lithargyr'um, Oxydum plumbi fusum, Spuma Argent'i, Semi-vit'rifid oxyd of lead or litharge, Calceito'sa, Cath'mia, (F.) Oxide de plomb fondus, Oxide de plomb semivitreux,* (a yellow protoxyd of lead, prepared by heat and combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis, Emplastrum plumbi, &c.* Formerly, the *Litharge of gold, Chrysis'tis, Mos'sicot,* and *Litharge of silver, Almariah,* were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBOXYDUM, *Carbonas plumbi, Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum, Magister'ium plumbi, Oxydum plumbi album, Cerussa, Zeru'go plumbi, P'simmyth'ion, P'sym'mythan, Simmitium, Flake white, Blanca, Gersa, Iffides, Subcarbonate of lead, Cerussa, White lead, (F.) Carbonate de plomb, Blanc de plomb, Plomb blanc,* (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPRACETAS, *Corusa acetata, Plumbi acid'ulus siccus, Plumbi acet'as* (Ph. U. S.), *Sal vel sac'charum Satur'ni, Superao'etate of lead, Plumbum acet'icum, Dulce'do Satur'ni, Acetas plum'bicum crystallisa'tum, Sal plumbi, Sugar of lead, Protoac'etate of lead, (F.) Acetate acide de plomb, Sel ou sucre de Saturne.* (Plumb. carb. Mj, Acid acetic. cong. 1j. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pelticle, that crystals may be formed. Wash the crystals and dry on blotting paper. Ph. L.) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in weak solution, cooling and sedative; in strong, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, Plumbi superacetas.

PLUMBOSUM SUPEROXYDUM, Plumbi oxydum rubrum.

PLUMBUM, *Molyb'dos, Molib'dus, Saturn'us, Capricor'nus,* (F.) *Plomb.* Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, Plumbi superacetas—

p. Album, Tin—p. Candidum, Tin—p. Carbonicum, Plumbi subcarbonas—p. Cinereum, Bismuth, subnitrate of—p. Oxydatum rubrum, Plumbi oxydum rubrum.

PLUMS, SEEDED, see Diospyros Virginiana —p. Winter, see Diospyros Virginiana—p. Yellow, see Diospyros Virginiana.

PLUNKETT'S CAUSTIC FOR CANCERS, Plunkett's ointment.

PLUNKETT'S OINTMENT. *Plunkett's Caustic for Cancers.* This empirical cancer remedy consists of *Arsenious acid, Sulphur,* and the powdered flowers of the *Ranunculus flammula* and *Cotula fastida*;—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLUTEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Fala cerebri.*

PLUTONIUM, Barium.

PNEOBIOMANTIA, Docimasia pulmonum.

PNEOBIOMANTICA, Docimasia pulmonum.

PNEUMA, Air, Life.

PNEUMAPOSTEMA, *Pneumapostema, Abscessus pulmonum;* from πνευμα, 'the lung;' and ἀσσειμα, 'abscess.' Abscess of the lung.

PNEUMATELECTASIS, Atelectasis pulmonum.

PNEUMATHORAX, Pneumothorax.

PNEUMATIC PHYSICIANS, *Pneumatic'ici.* Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element—which they called *Pneuma, πνευμα*—to those of the other elementary principles. This πνευμα was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

PNEUMATICA, from πνευμα, 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology.

PNEUMATOCELE, Physocèle.

PNEUMATO'DES, from πνευμα, 'wind,' and ἴδος, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMPHALOCÈLE, Pneumatomphalus.

PNEUMATOMPHALUS, *Pneumatomphaloc'ele,* from πνευμα, 'flatus,' and ομφαλε, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATOSE, Pneumatosis—p. *Péritonéale,* Tympanites.

PNEUMATO'SIS, *Aïr'o'sis,* from πνευμα, 'air.' *Flatus, (F.) Maladie ventreuse, Pneumatose.* Flatulence. Flatulent distention of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormal collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema—p. Abdominis, Tympanites—p. Enterica, Colica flatulenta—p. Pulmonum, Emphysema of the lungs—p. Ventriculi, et Pneumatosis enterica, Flatulence. PNEUMATOTHORAX, Pneumothorax.

**PNEUMOCACE**, Necropneumonia.  
**PNEUMOCHOLOSIS**, Pneumonia (bilious).  
**PNEUMOCHYSIS**, Œdema of the lungs.

**PNEUMOËCTASIE**, Emphysema of the lungs.

**PNEUMOGASTRIC**, *Pneumogastrius*, from πνευμων, 'the lung,' and γαστήρ, 'the stomach.' Chaussier gives this name to the Eighth pair of nerves, *Par vagum, Pars vaga, Nervus vagus seu ambulatorius, Middle sympathet'ic*; because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentia olivaris and near the corpora testiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius; behind the glosso-pharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypoglossal, and great sympathetic nerves; and furnishes, 1. a pharyngeal branch, 2. a superior laryngeal, 3. cardiac branches. In the chest, it gives off, 1. The inferior laryngeal or recurrent, 2. The pulmonary plexus, and, 3. The œsophageal branches. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, celiac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

**PNEUMOGRAPHY**, *Pneumographia*; from πνευμων, 'the lung,' and γραφή, 'a description.' The part of anatomy that describes the lungs.

**PNEUMOLOG'Y**, *Pneumologia*; from πνευμων, 'the lung,' and λογος, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

**PNEUMON**, Pulmo.

**PNEUMONALGIA**, Angina pectoris.

**PNEUMONATELECTASIS**, Atelectasis pulmonum.

**PNEUMONECTASIS**, Emphysema pulmonum.

**PNEUMONEMPHRAXIS**; from πνευμων, 'the lung,' and εμπεδιε, 'obstruction.' Congestion and infarction of the lungs.

**PNEUMONIA**, *Empres'ia Pneumoni'tis, Pleumo'nia, Peripneumo'nia, Pneumo'nia peripneumo'nia, Pneumoni'tis, Pulmo'nia, Pulmo'nia, Inflamma'tio pneumoni'ca, I. pectoris acuta, I. pulmonum, Pneumoni'tasis, Inflam'mation of the lungs, Lung fever (vulgarly), Febris pneumoni'ca, (F.) Inflam'mation des Poux-mons, Fievre pneumonique, F. peripneumonique, Fluxion de Poitrains, Inflam'mation du Parenchyme pulmonaire.* The chief symptoms of pneumonia are :—pyrexia, accompanied by

pain, sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain aggravated by the cough, which with dyspœna exists throughout the disease. At first, the expectoration is difficult and painful; but in the course of a few days it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt in one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens;—by induration and by hepatization.

**Physical Signs.** **FIRST STAGE, (F.) Engouement.** Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating râle, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant râle, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. **SECOND STAGE, (F.) Hépatisation rouge.** When Hépatization has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. **THIRD STAGE, (F.) Hépatisation gris.** When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse mucous râle is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopœna, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

**PNEUMONIA BILIOSA, P. bilious.**

**PNEUMONIA, BILIOUS, Pneumo'nia bilio'sa, Pneumochold'osis.** Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms;—*Pneumotyphus, Pneumo'nia typho'des seu typho'des seu typho'sa, Putrid, typhoid, adynamic or erysipelatous pneumo'nia.*

**PNEUMONIA, ERYSIPELATOUS, P. bilious—p. Gangrenosa, Necropneumonia—p. Hypostatica, Pneumonypostasis—p. Intermittens, Pneumotyphosis—p. Lobular, see Lobular—p. Notha,**

Peripneumonia notha—p. Pleuritis, Pleuropneumonia—p. Putrid, P. bilious—p. Typhodes, P. bilious—p. Typhoid, P. bilious—p. Typhosa, P. bilious, Necropneumonia.

**PNEUMONICA.** Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class Pneumatica of Good.

**PNEUMONIC'ULA.** Diminutive of pneumonia. A slight inflammation of the lung.

**PNEUMONICUS,** Pulmonic.

**PNEUMONIE,** Pneumonia—p. *Diastémis*, see Lobular—p. *Lobulaire*, see Lobular—p. *Mamelonné*, see Lobular.

**PNEUMONIE DES AGONISANTS,** *Pneumonia hypostatique.* The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

**PNEUMONIT'IC,** *Pneumonitis'icous.* Of, or belonging to pneumonitis, or inflammation of the lungs.

**PNEUMONITIS,** Pneumonia.

**PNEUMONOCARCINOMA,** from *πνευμων*, 'the lung,' and *καρκινωμα*, 'cancer.' Cancer of the lungs.

**PNEUMONOCE'LE,** from *πνευμων*, 'the lung,' and *ρηγη*, 'rupture.' Hernia of the lung.

**PNEUMONOCE'LE DIAPHRAGMATICA INTER'NA.** Hernia of the lung through the diaphragm.

**PNEUMONOCELE EXTER'NA seu THORAC'ICA.** Hernia through the parietes of the chest.

**PNEUMONOCELE THORACICA,** Pn. externa.

**PNEUMONCEDEMA,** Œdema of the lungs.

**PNEUMONOMELANOSIS,** see Melanosis.

**PNEUMONOPHTHISIS,** Phthisis pulmonalis.

**PNEUMONOPHTHOE,** Phthisis pulmonalis.

**PNEUMONOPLEURESIS,** Pleuroperipneumony.

**PNEUMONOPLEURITIS,** Pleuroperipneumony.

**PNEUMONORRHAGIA,** Hæmoptysis.

**PNEUMONORRHŒA,** Hæmoptysis.

**PNEUMONOSCIR'RHUS;** from *πνευμων*, 'the lung,' and *σκληρος*, 'induration.' Induration of the lungs.

**PNEUMONOSSES,** *Pneumoses.*

**PNEUMONYPOSTASIS,** *Pneumonia hypostat'ica.* Pneumonia caused in a depending portion of the lung, as from lying on the back.

**PNEUMOPERICARDE,** Pneumo-pericardium.

**PNEUMO-PERICARD'IUM,** *Pneumo-pericard'itis,* (F.) *Pneumo-pericarde,* from *πνευμα*, 'air,' and *περικαρδιον*, 'pericardium.' Laënnec designates, under this name, the effusion of air into the cavity of the pericardium.

**PNEUMOPHTHISIS,** Phthisis pulmonalis.

**PNEUMOPHYMATA,** Tubercles of the lungs.

**PNEUMOPLEURESIS,** Pleuroperipneumony.

**PNEUMOPHTHOE,** Phthisis pulmonalis.

**PNEUMORRHAGIA,** Hæmoptysis—p. Interna, Hæmatothorax.

**PNEUMOSEPSIS,** Necropneumonia.

**PNEUMOSSES,** from *πνευμων*, 'the lung.' A term under which Alibert comprises every morbid affection of the lungs.

**PNEUMOTHORAX,** *Pneumothorax, Pneumatothorax, Emphyse'ma pectoris, Asthma ædrium, A. emphysematicum, Dyspna'a pneumat'ica, D. phsysothorad'ica, Phsysothorax, Aërothorax, Aëropleuris,* (Piorry,) from *πνευμα*, 'air,' and *θωραξ*, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air a liquid is effused,—*Hydropneumothorax.* The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *sintement métallique.* The presence of liquid can always be ascertained by succussion. See Emphysema of the lungs.

**PNEUMOT'OMY,** *Pneumotom'ia,* from *πνευμων*, 'the lung,' and *τομη*, 'I cut.' Dissection of the lungs.

**PNEUMOTYPHUS,** Pneumonia, typhoid.

**PNEUMOTYPO'SIS,** *Pneumonia intermittens,* from *πνευμων*, 'the lung,' and *τυπος*, 'a stamp, a type.' Pneumonia characterized by periodicity.

**PNEUOBIMANTIA,** Docimasia pulmonum.

**PNEUSIOBIOGNOSIS,** Docimasia pulmonum.

**PNEUSIOBIOSCOPE,** Docimasia pulmonum.

**PNEUSIS,** Respiration—p. Pertussis, Pertussis—p. Singultus, Singultus—p. Tussis, Tussis.

**PNEUSOMETER,** Spirometer.

**PNIGALION,** Incubus.

**PNIGMOS,** Orthopnea, Strangulation.

**PNIGOPHOBIA,** Angina pectoris, Suffocation.

**PNIX,** Orthopnea, Strangulation.

**PNOE,** Aura.

**PNOOCOLYTICUS,** Asthmatic.

**POCHE DES EAUX,** see Parturition.

**POCK, KINE,** Vaccina.

**POCK-MARK,** *Scrobic'ulus Vari'olæ, Cicatrix Variolæ.* The mark left from a small-pox pustule.

**POC'ULUM, ABSINTHIA'TUM.** This was regarded in remote ages as a wholesome beverage; the *absinthium,* or 'wormwood,' being supposed to act as an antidote to drunkenness.

**POCULUM AMATORIUM,** Philter—p. Diogenis, Palm—p. Emeticum, Goblet, emetic.

**POD'AGRA,** *Podarthri'tis, Podorrhœ'ma, Podal'gia,* from *πους*, 'the foot,' and *αγα*,

'seizure.' Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification, synonymously with *gout*.

PODAGRA ABERRANS, Gout, (wandering)—p. Arthritis, Gout—p. Retrograda, Gout, (retrograde.)

PODAGRARIA, *Ligusticum podagraria*.

PODALGIA, Gout, Podagra.

PODALYRIA TINCTORIA, *Sophora tinctoria*.

PODANENCEPHALIA, see *Podencephalus*.

PODARTHROSIS, Podagra.

PODARTHRO'ACE, from *πους*, 'the foot,' *αρθρον*, 'an articulation,' and *κακος*, 'bad.' Caries of the articulation of the foot.

PODENCEPHALIA, see *Podencephalus*.

PODENCEPHALUS, *Podancephalus*, from *πους*, 'the foot,' and *κεφαλη*, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of monstrosity is termed *Podancephalia*, or more properly, *Podencephalia*.—G. St. Hilaire.

PODEX, Anus.

PODE'MA; from *πους*, 'foot,' and *οιδημα*, 'a swelling.' Edema of the feet.

PODOL'OGY, *Podolog'ia*, from *πους*, 'the foot,' and *λογος*, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYLLUM PELTATUM, *Podophyllum*, *Anapodophyllum Canadense*, *May apple*, *Mandrake*. Family, *Podophylleæ*. *Sex. Syst.* Polyandria Monogynia. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an anthelmintic.

PODOPHYLLUM MONTANUM, *Mountain May Apple*, *Mandrake*, *Wild Lemon*, *Ducksfoot*, *Raccoon Berry*, *Yellow Berry*, *Ground Lemon*, has the same properties.

PODORRHEUMA, Podagra.

PODOTHE'CA, from *πους*, 'a foot,' and *θηκη*, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chirotheca*, has been used for the cuticle of the hand.

POËLETTE, Cup.

POE'PHAGUS; from *ποιη*, or *ποιε*, 'a plant, an herb,' and *φαγω*, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting or feeding on herbs or vegetables is called *Poe'phag'ia*. Hence Strabo calls the Irish *πρωφαγοι*.

POGON, Beard.

POGONI'ASIS, *Pogo'nia*, from *πωγων*, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard—*Vira'go*.

POGO'NIUM, diminutive of *πωγων*, 'a beard.' A weak or small beard.

POHON ANTIAR, Upas.

POI. A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo—*Arum esculentum*.

POIDS ET MESURES, Weights and measures.

POIGNEE, Manipulus.

POIGNET, Carpus.

POIL, Hair.

POILETTE, Cup.

POINT, BLISTERING. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between its stage of high excitement and collapse, in which blisters will—he thought—usually produce unequivocally good effects.

POINT DE COTE, Pleurodynia.

POINTS LACRYMAUX, *Lachrymalia puncta*.

POIRE, see *Pyrus communis*.

POIREAU, *Allium porrum*.

POIRIER, *Pyrus communis*.

POIS A CAUTERE, see *Fonticulus*—p. *Chicha*, *Cicer arietinum*—p. *à Gratter*, *Dolichos pruriens*—p. *Patate*, *Dolichos tuberosus*.

POISON, *Phar'macon*, *Phar'macium*, *Toxicum*, *Vene'num*, *Virus*, *Deleterium*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of an organ. Poisons exist in the three kingdoms of nature, but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c., whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'ITATING, CORRO'SIVE, or ESCHAROT'IC, such as the concentrated acids and alkalis; mercurial, arsenical, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC; those that act particularly upon the brain; as opium, hyoscyamus, &c., but without inflaming the organ with which they come in contact. 3. NARCOT'ICO-ACRID or ACRONARCOT'IC;—those that act on the brain, but, at the same time, inflame the parts to which they are applied; as aconite, belladonna, &c. 4. SEPTIC or PUTRES'CENT;—those furnished by the animal kingdom. See *Venom* and *Virus*. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *coup d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections.

TABLE EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

*N. B. In all cases the Stomach-Pump should be used as soon as possible.*

## I. INORGANIC POISONS.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<b>ACIDS.</b>	<p>The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing or coughing; eructation, and excreting pain in the stomach; more or less corrugation of the lining membranes of the mouth and <i>primæ viæ</i>: excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.</p> <p>Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contracted pupil; convulsions, death.</p>	<p>The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions; for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk on account of the great heat, which is produced by their mixture. Subsequent inflammation to be treated by ordinary means.</p> <p>The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach.</p> <p>Ammonia is an antidote: but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douche</i> to the head has been recommended.</p>	<p>Sulphuric acid is known by a white precipitate with any salt of baryta, insoluble in nitric acid.</p> <p>Muriatic acid is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light.</p> <p>Nitric acid gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid.</p> <p>Acetic acid exhales the odour of vinegar.</p> <p>Citric acid blackens when heated.</p> <p>Tartaric acid precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water.</p> <p>Oxalic acid gives a white precipitate with lime water, which, when heated, is converted into carbonate of lime.</p> <p>Prussic acid exhales the odour of peach kernels; forms a white precipitate with nitrate of silver; neutralized with an alkali, gives a blue precipitate with the per-salts of iron.</p>
ACIDS.			
<i>Acetic Acid.</i>			
<i>Citric Acid.</i>			
<i>Muriatic Acid.</i>			
<i>Nitric Acid.</i>			
<i>Sulphuric Acid.</i>			
<i>Tartaric Acid.</i>			
<i>Oxalic Acid.</i>			
<i>Prussic Acid.</i>			
<i>Oil of Bitter Almonds.</i>			
<i>Laural Water.</i>			
<b>ALKALIES and their SALTS.</b>	<p>Violent caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hicough; violent colic pains, with purging of bloody stools and membranous flakes; death.</p> <p>The nitrate of potassa will not manifest the effect with turmeric paper. The carbonates, when vomited, will effervesce with acids; and the liver of sulphur will give rise to eructations of sulphuretted hydrogen.</p>	<p>The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects.</p> <p>Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.</p>	<p>The alkalies are known by their action on turmeric paper; restoring the colour of litmus, which has been reddened by an acid.</p> <p>Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal-ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.</p> <p>Nitrate of potassa decrepitates and deflagrates when thrown on hot coals.</p> <p>Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.</p>
AMMONIA, Strong Liqueur or Water of.			
Muriate of Ammonia or Sal Ammoniac.			
POTASSA.			
Caustic Potash, and Liqueur Potasson.			
Carbonate of, or Pearl Ash, and Salt of tartar.			
Nitrate of Potassa, or Saltpetre.			
Sulphuret of, or Liver of Sulphur.			
SODA.			
<b>EARTHS and COMPOUNDS.</b>			
BARYTA.			
Carbonate of Baryta.			
Muriate of Baryta.			
Nitrate of Baryta.			
LIME.			

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p><b>ALCOHOL.</b>  <i>Brandy, Wines, and all Spirituous Liquors.</i></p>	<p>Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.</p>	<p>A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.</p>	
<p><b>VOLATILE OILS.</b>  <i>Cresote.</i>  <i>Dippel's Animal Oil.</i>  <i>Oil of Tar.</i>  <i>Oil of Tobacco.</i>  <i>Oil of Turpentine.</i>  <i>Fusel Oil.</i></p>	<p>General action that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &amp;c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.</p>	<p>Cresote is immediately coagulated by albumen. Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.</p>	<p>No better mode of recognising these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; cresote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.</p>
<p><b>GASES.</b>  <i>Carbonic Acid or Fixed Air.</i>  <i>Carbonic Oxide.</i>  <i>Fumes of Burning Charcoal.</i>  <i>Chlorine.</i>  <i>Sulphuretted Hydrogen.</i></p>	<p>Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy or narcotic poisoning.</p>	<p>The antidotes to chlorine, are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.</p>	<p>Chlorine is recognised by its peculiar odour and bleaching properties. Sulphuretted hydrogen by its fetid smell, and the rapid blackening of lead. Carbonic acid by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.</p>
<p><b>IODINE.</b>  <i>Iodide of Potassium.</i></p>	<p>Irritant symptoms: burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.</p>	<p>Iodine combines with starch and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.</p>	<p>Iodine is known by its odour, and the formation of a blue precipitate when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.</p>
<p><b>METALS.</b>  <b>ANTIMONY.</b>  <i>Tartar Emetic.</i>  <i>Muriate, or Buttar of Antimony.</i>  <i>Oxide of Antimony.</i></p>	<p>Vomiting. If vomiting does not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.</p>	<p>If vomiting have not been produced, it should be brought about, by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly: powdered yellow bark may be used, until the infusion is prepared.</p>	<p>Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalies produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which redden litmus. It may also be converted into muriate, and then precipitated by adding water.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p><b>ARSENIC.</b>  <i>Arsenious Acid, or White Arsenic.</i>            —  <i>Orpiment, or Yellow Sulphuret of Arsenic.</i>            —  <i>King's Yellow.</i>            —  <i>Realgar, or Red Sulphuret of Arsenic.</i>            —  <i>Fly Powder.</i>            —  <i>Fowler's Solution.</i>            —  <i>Arsenical Paste.</i>            —  <i>Arsenical Soap.</i>            —  <i>Arsenite of Copper.</i>  <i>Scheele's Green.</i></p>	<p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching; vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited greenish or yellowish, sometimes streaked with blood; diarrhoea; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p>	<p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>skias arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &amp;c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p>	<p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with 1st. Ammoniac-sulphate of copper. 2d. Ammoniac-nitrate of silver. (<i>Hassel's Test</i>) 3d. Sulphuretted hydrogen gas. The first will produce a <i>green</i> precipitate; second, a <i>pale yellow</i> precipitate; third, a <i>bright yellow</i> precipitate, if arsenic be present. A portion of the powder, or one of these precipitates carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube—forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p> <p>If organic matter be present, it must be entirely destroyed by heating the substance with nitro-muriatic acid. After this has been done, and a clear transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (<i>Marsch's Test</i>.)</p>
<p><b>BISMUTH.</b>            —  <i>Nitrate of Bismuth.</i>            —  <i>Pearl Powder.</i>            —  <i>Oxide of Bismuth.</i></p>	<p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hic-cough, disagreeable metallic taste; vomiting; cramps; delirium; death.</p>	<p>Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding, glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p>	<p>Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. <i>Reinsch's Test.</i></p> <p>Bismuth is known by the formation of a white precipitate when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p>
<p><b>COPPER.</b>  <i>Sulphate of Copper,</i>  <i>Blue Vitriol.</i>  <i>Acetate of Copper,</i>  <i>Verdigris.</i>  <i>Carbonate of Copper.</i>  <i>Blue Verditer.</i>  <i>Arsenite of Copper.</i>  <i>Scheel's Green.</i>  <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i></p>	<p>Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.</p>	<p>Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>	<p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p><b>GOLD.</b> <i>Chloride of Gold</i> <i>Falsinating Gold.</i></p>	<p>Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.</p>	<p>The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.</p>	<p>Chloride of gold is very readily decomposed and the gold separated in a metallic state. Proto-sulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble except in nitro-muriatic acid.</p>
<p><b>IRON.</b> <i>Sulphate of Iron.</i> <i>Copperas.</i> <i>Green Vitriol.</i> <i>Chloride of Iron.</i></p>	<p>Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin and feebleness of the pulse.</p>	<p>Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.</p>	<p>Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalies or their carbonates.</p>
<p><b>LEAD.</b> <i>Acetate of Lead.</i> <i>Sugar of Lead.</i> <i>Carbonate of Lead.</i> <i>White Lead.</i> <i>Red Oxide or Red Lead.</i> <i>Litharge.</i> <i>Wines sweetened by Lead.</i> <i>Water which has been kept in Lead vessels.</i> <i>Acid food, cooked, or left standing in vessels glazed with Lead.</i></p>	<p>Irritation of the alimentary canal; spasms; nervous symptoms; paralysis either partial or complete. When taken for some time in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.</p>	<p>Sulphate of magnesia and phosphate of soda, are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.</p>	<p>Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.</p>
<p><b>MERCURY.</b> <i>Corrosive Sublimate.</i> <i>Cyanuret of Mercury.</i> <i>Nitrate of Mercury.</i> <i>White Precipitate.</i> <i>Red Oxide, or Red Precipitate.</i> <i>Sulphate, or Turbith Mineral.</i> <i>Vermillion or Red Sulphuret.</i></p>	<p>Violent symptoms of irritant poisoning; harsh metallic-astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze, stupor, convulsions and death.</p>	<p>Albumen in some form must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold finely mixed in dust, with fine iron filings?</p>	<p>The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda—when the metallic mercury will sublime, and may be collected in a globe.</p>
<p><b>SILVER.</b> <i>Nitrate of Silver, or Lunar Caustic.</i></p>	<p>Those of other irritant poisons.</p>	<p>Chloride of sodium or common salt immediately decomposes this substance and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.</p>	<p>Nitrate of silver is distinguished by the formation of a white precipitate insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.</p>
<p><b>TIN.</b> <i>Chloride of Tin.</i> <i>Solution of Tin, used by Dyers.</i> <i>Oxide of Tin, or Putty Powder.</i></p>	<p>The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.</p>	<p>Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.</p>	<p>The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.</p>
<p><b>ZINC.</b> <i>Oxide of Zinc.</i> <i>Sulphate of Zinc.</i> <i>White Vitriol.</i> <i>Acetate of Zinc.</i></p>	<p>Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.</p>	<p>The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.</p>	<p>A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of bread should be eaten to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

## II. ORGANIC POISONS.

### 1. VEGETABLE POISONS.

IRRITANT POISONS.	SYMPTOMS.	TREATMENT.
<p><i>Anemone pulsatilla.</i> Wind Flower.  <i>Arum maculatum.</i> Wake Robin.  <i>Bryonia dioica.</i> Bryony.  <i>Caladium seguinum.</i> Dumbcane.  <i>Calla palustris.</i> Water Arum.  <i>Caltha pal. stris.</i> Marsh Marigold.  <i>Chelidonium majus.</i> Celandine.  <i>Clematis vitalba.</i> Virgin Bower.  <i>Convolvulus jalapa.</i> Jalap.  <i>Convolvulus scammonia.</i> Scammony.  <i>Croton tiglium.</i> Purging Croton.  <i>Cucumis colocynthis.</i> Colocynth.  <i>Cyclamen Europæum.</i> Sow Bread.  <i>Daphne genkium.</i> Spurge Flax.  <i>Daphne mezereum.</i> Mezereon.  <i>Delphinium staphisagria.</i> Stavesacre.  <i>Dioica palustris.</i> Swamp leather wood.  <i>Equisetum hyemale.</i> Scourgrass.  <i>Euphorbia officinarum.</i> Euphorbium.  <i>Spurge.</i>  <i>Griatiola officinalis.</i> Hedge Hyssop.  <i>Hippomane mancinella.</i> Manchineel.  <i>Hura crepitans.</i> Sand Box.  <i>Hydrocotyle vulgaris.</i> Marsh Pennywort.  <i>Jatropha caracas.</i> Indian Nut.  <i>Jatropha manihot.</i> Cassada.  <i>Juniperus anbrina.</i> Savin (oil of).  <i>Juniperus Virginiana.</i> Red Cedar (oil of).  <i>Momordica elaterium.</i> Squirting Cucumber.  <i>Narcissus pseudo-narcissus.</i> Daffodil.  <i>Pastinax sativa.</i> Common Parsnip.  <i>Pedicularis palustris.</i> Marsh Lousewort.  <i>Phytolacca decand. a.</i> Poke.  <i>Piper cubeba.</i> Cubebs.  <i>Plumbago Europea.</i> Toothwort.  <i>Ranunculus acris,</i> and other species.  <i>Crow foot.</i>  <i>Rhododendron chrysanthemum.</i> Oleander.  <i>Ricinus communis.</i> Castor Oil Plant.  <i>Sambucus ebulus.</i> Elder.  <i>Sedum ar. r.</i> Stone Crop.  <i>Stalagmitis cambogoides.</i> Gamboge.  <i>Tanacetum vulgare.</i> Tansy (oil of).</p>	<p>The general effects of this class of vegetable poisons are;—an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene.</p> <p>If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules.</p>	<p>If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles.</p> <p>The fruit of <i>Feuillea Cordifolia</i> has been lately recommended as a powerful antidote against vegetable poisons: it is to be used in as recent a state as possible. (?)</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.</p>
<p>ACRO-NARCOTIC.</p> <p><i>Aethusa cynapium.</i> Common Fool's Parsley.  <i>Aconitum napellus.</i> Monkshood.  <i>Agaricus,</i> 5 species. Mushrooms (poisonous).  <i>Amanita muscaria.</i> Truffles (poisonous).  <i>Anagallis arvensis.</i> Meadow Pimpernell.  <i>Anda Gomezii.</i>  <i>Apocynum androsamifolium.</i> Dogsbane.  <i>Aristolochia clematidis.</i> Birthwort.  <i>Arnica montana.</i> Leopard's bane.  <i>Asclepias Syriaca.</i> Swallow wort.  <i>Atropa belladonna.</i> Deadly Night Shade.  <i>Esculus Oh. oensis.</i> Buckeye.  <i>Brucea antidysenterica.</i> False Angustura Bark.  <i>Cerbera,</i> 3 species. Cerbera.  <i>Chærophyllum sylvæstris.</i> Bastard Hemlock.</p>

Skunk Cabbage.  <i>Tiouna</i>. Extract of various plants—South America.  <i>Tinoté</i>. <i>Upas tauté</i>. Tree of Java.  <i>Triticum Hybernium</i>. Wheat (diseased).  <i>Upas antler</i>. Tree in Java.  <i>Veratrum album</i>. White Hellebore.  <i>Veratrum viride</i>. American Hellebore.  <i>Woorara</i>. War Poison of Guiana.  <i>Zea mays</i>. Maize (diseased.)</p>	<p>The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p>	<p>The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glisters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given before the poison is expelled, and it is desirable that but little fluid of any kind should be administered. N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.</p>
<p><b>NARCOTIC.</b>  <i>Actea spicata</i>. Baneberry.  <i>Amygdalus communis</i>. Bitter Almond.  <i>Amygdalus Persica</i>. Peach.  <i>Galiuminum stitidam</i>. Poisons.	SYMPTOMS.	TREATMENT.
	<p>pupil, and stupor; cold sweats, and death.</p> <p>Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.</p>	quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.

## 2. ANIMAL POISONS.

	SYMPTOMS.	TREATMENT.
<p><b>POISONOUS FISH.</b></p> <p><i>Balistes monoceros.</i> Old Wife.  <i>Cancer astacus.</i> Crawfish.  <i>Cancer rusticus.</i> Land Crab.  <i>Clupea herysa.</i> Yellow-billed Sprat.  <i>Coracinus fasciatus major.</i> Gray Snapper.  <i>Coracinus minor.</i> Hyne.  <i>Coryphæna spinidens.</i> Dolphin.  <i>Mormyræ.</i> Blue Parrot Fish.  <i>Muræna major.</i> Conger Eel.  <i>Mytilus edulis.</i> Mussel.  <i>Ostracion globellum.</i> Smooth Bottle Fish.  <i>Perca major.</i> Barracuda.  <i>Perca venenosa.</i> Grooper.  <i>Perca venenata.</i> Rock Fish.  <i>Physalia.</i> Portuguese Man of War.  <i>Scomber cavallus.</i> Spanish Mackerel.  <i>Scomber maximus.</i> King Fish.  <i>Scomber thynnus.</i> Bonetta.  <i>Sparus chrysops.</i> Forgee.  <i>Tetrodon ocellatus.</i> Tunny.  <i>Tetrodon ocellatus.</i> Blower.</p>	<p>In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria,) and in many cases death.</p>	<p>An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasms ensue; after evacuations, iaudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.</p>
<p><b>POISONOUS SERPENTS.</b></p> <p><i>Boa constrictor.</i> Copperhead.  <i>Crotalus moccasin.</i> Mockeson.  <i>Crotalus berræ.</i> Viper.  <i>Coluber prætor.</i> Black Viper.  <i>Crotalus,</i> (5 species.) Rattle Snake.  <i>Seydalla pictivorus.</i> Water Viper.</p>	<p>A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.</p>	<p>A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended.</p>
<p><b>CANTHARIS VESICATORIA.</b></p> <p>Spanish, or Blistering Fly.  <i>Lytta vittata.</i> Potato Fly.</p>	<p>Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and stranguary or retention of urine; frightful convulsions, delirium and death.</p>	<p>Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment.</p> <p>Camphor dissolved in oil may be rubbed over the belly and on the thighs.</p>
<p><b>VENOMOUS INSECTS.</b></p> <p><i>Tarantula.</i>  <i>Scorpio.</i> Scorpion.  <i>Vespa crabro.</i> Hornet.  <i>Vespa vulgaris.</i> Wasp.  <i>Apis mellifica.</i> Bee.  <i>Culex pipiens.</i> Gnat.  <i>Cæstrus bovis.</i> Gad-fly.</p>	<p>In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.</p>	<p>Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.</p>

	SYMPTOMS.	TREATMENT.
<p style="text-align: center;"><b>SALIVA OF THE RABID DOG.</b></p>	<p>At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.</p>	<p>Hydrophobia is more easily prevented than cured; indeed it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success.</p> <p>The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and after the most persevering ablation, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulations.</p> <p>No milder discipline can ensure safety.</p>

The most energetic poisons are used therapeutically; and often with considerable advantage. They have, of course, to be administered in extremely small doses; to avoid producing poisoning.

**POISON, ARROW,** see Arrow poison—p. **Savage**, Allantotoxicum.

**POISON-BERRY TREE,** *Melia azedarach*—p. **Italian**, *Liquor arsenicalis*—p. **Morbid**, *Virus*—p. **Oak**, *Rhus toxicodendron*—p. **Root**, *Cicutula maculata*—p. **Vegetable**, *Upas*—p. **Vine**, *Rhus radicans*.

**POISONING, Venefic'ium, Toxic'atio, Intoxic'atio, Entozis'mus, Entozic'is mus, Pharmacia, Malefic'ium, (F.) Empoisonnement, Intoxicatio.** The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

*Poisoning* has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innocuous. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

*Secret poisoning* was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

**POISONOUS, Toxic'al, Nox'ius;** having the qualities of a poison.

**POLANISIA GRAVEOLENS, Clammy weed, Stinkweed, Wormweed, Clammy Mustard, False mustard.** An indigenous plant, *Nat. Ord. Capparidæ; Sez. Syst. Dodecandria Monogynia*—which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

**POLECAT WEED, Dracontium fetidum.**

**POLENTA, Alphiton.**

**POLEY MOUNTAIN OF CANDY, Teucrium Creticum**—p. **Mountain of Montpellier, Teucrium capitatum.**

**POLIATER,** from *πολις*, 'a town,' and *ιατρος*, 'a physician.' A physician exercising his profession in a town, by the appointment of the government.—Castelli.

**POLICE, MEDICAL, Politi'a medica, Politobiotherapi'a, Medici'na polit'ica, State medicine, Political medicine.** Hygienic rules established, or to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

**POLICLINICA,** from *πολις*, 'a town,' and *κλινη*, 'a bed.' Treatment of diseases in a town.

**POLIO'SIS, Tricho'sis polio'sis, Spilo'sis polio'sis, Canit'ies.** Hair prematurely gray or hoary. The state of becoming gray.

**POLITIA MEDICA, Police, medical.**

**POLITOBIOETHERAPIA, Police, medical.**

**POLIUM CRETICUM**, *Teucrium Creticum*—p. *Montanum*, *Teucrium capitatum*.

**POLLEX**, *Antichoïr*, *Promanus*, *Dig'itus primus* seu *magnus*, from *pollere*, 'to have much strength.' (F.) *Posce*. The first of the fingers in size and strength. It is asserted, that the term *pollroon* is derived from *Pol'licet truncato*;—the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

**POLLEX**, see *Digitus*.

**POLLEX PEDIS**, *Hallus*, *Hallux*. The great toe.

**POLLINCTOR**, *Pollinctor*, (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

**POLLINCTURA**, *Embalming*.

**POLLOM**, *LITTLE*, *Polygala paucifolia*.

**POLLUTION**, *Pollutio*, from *polluo*, 'I profane.' The excretion of the seminal liquor or sperm at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*; when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution*, *Ezoneiro'sis*, *Oncirog'mos*, *Oncirog'onos*, *Oncirogonorrhœa*, *Ezoneirog'mus*, *Spermatoelem'ma*, *Spermatoelapsis*, *Spermatoles'is*, *Spermatoles'is*, *Gonorrhœa dormientium*, *G. oncirog'onos*, *G. vera*, *G. libidino'sa*, *Proflu'vium Sem'inis*, *Spermatorrhœa*, *Parovis'ia salax*, *Night pollution*, (F.) *Pollution involontaire*.

**POLLUTION INVOLONTAIRE**, *Pollution*—p. *Nocturnal*, *Pollution*—p. *Self*, *Masturbation*—p. *Voluntary*, *Masturbation*.

**POLY**, *Polya*, *πολυς*, 'many, full.' Hence:

**POLYÆMIA**, *Plethora*.

**POLYÆMIC**, *Plethoric*.

**POLYÆMICUS**, *Plethoric*.

**POLYANHÆMIA**, *Anæmia*.

**POLYANHÆMIE**, *Anæmia*.

**POLYANTHES TUBEROSA**, *Amarucaha*. The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

**POLYBLÉN'NIA**, from *πολυς*, 'much,' and *βλένω*, 'mucus.' Excessive secretion of mucus.

**POLYBREP'HA**, *Pregnancy*, complex.

**POLYCARP'Æ**, from *πολυς*, 'many,' and *καρπος*, 'fruit.' A division of cutaneous diseases of the family *Eczematosen*, of Fuchs, including *Psoriasis*, *Lichen*, *Herpes*, and *Impetigo*.

**POLY'CERAS**, from *πολυς*, 'many,' and *κερας*, 'horn.' A monstrous animal having many horns.—Gurli.

**POLYCHO'LIA**, *Pericho'lia*, *Hypercho'lia*, from *πολυς*, 'much,' and *χολη*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

**POLYCHREST'US**, from *πολυς*, 'much,' and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

**POLYCHRONIUS**, *Chronic*.

**POLYCHY'LIA**, from *πολυς*, 'much,' and *χυλος*, 'juice.' *Polychy'mia*. Fulness of juices.

**POLYCHYMIA**, *Polychylia*—p. *Sanguinea*, *Plethora*.

**POLYCLIN'ICA**, from *πολυς*, 'much,' and *κλινη*, 'bed.' Provided with many beds;—as an hospital.

**POLYCOR'IA**, from *πολυς*, and *κορη*, 'the pupil.' The state in which there is more than one pupil.—Von Ammon.

**POLYCYES'IA**, *Polycye'sis*, from *πολυς*, 'many,' and *κυστις*, 'pregnancy.' Frequent or quickly recurring pregnancies. Also, compound pregnancy.

**POLYDACTYLUS**, *Perissodactylus*, from *πολυς*, 'many,' and *δακτυλος*, 'a finger.' One who has a supernumerary finger or fingers, or toes.

**POLYDIP'SIA**, from *πολυς*, 'much,' and *διψη*, 'thirst;' *Sitis morbo'sa* seu *inten'sa*, *Poly-po'sia*, *Dippo'sis avens*, *Excessive thirst*, (F.) *Soif exco'ssive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called *Polydipsia*.

**POLYGALA**, from *πολυς*, 'much,' and *γαλα*, 'milk;' *P. vulga'ris*, *Common Milkwort*. Family, *Rhinanthoideæ*. *Sez. Syst.* *Diadelphina Octandria*. The leaves are bitter, and are used in the same cases as the *polygala amara*.

**POLYGALA AMARA**, *Bitter Milkwort*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubel'la*, or *Bitter Polygala* of the United States, has the same virtues.

**POLYGALA, BITTER**, see *P. amara*.

**POLYGALA SEN'EGA**, *Sen'eka*, *Rattlesnake Milkwort*, *Senega* or *Rattlesnake root*, *Polygala Virginia'na*, (F.) *Polygale de Virginia* ou *de Seneka*. The bark is the active part of the root. Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Feschier, it contains three particular principles, *Polygaline* or *Sen'egine*, *Isol'usine*, and *Polyg'alic Acid*. Dose, gr. 30 to 40 of the powder.

**POLYGALA PANCIPO'LIA**, *Trichisper'ma grandifl'ra*, *Dwarf Milkwort*, *Little Pollom*, *Evergreen Snakeroot*, (F.) *Polygale naine*, possesses the same properties as *P. Senega*.

**POLYGALA VIRGINIANA**, *P. senega*.

**POLYGALAC'TIA**, *Polyga'lia*, from *πολυς*, 'much,' and *γαλα*, 'milk.' Superabundant secretion of milk; galactia.

**POLYGALÉ NAINE**, *Polygala paucifolia*—p. *de Virginia*, *Polygala Virginiana*.

**POLYGALIA**, *Polygalactia*.

**POLYGALINE**, see *Polygala senega*.

**POLYGONATUM**, *Convallaria polygonatum*—p. *Multiflorum*, *Convallaria multiflora*—p. *Uniflorum*, *Convallaria polygonatum*.

**POLYGONUM AVICULARE**, from *πολυς*, 'much,' and *γωνη*, 'seed.' *Centino'dia*, *Centum-no'dia*, *Knot-grass*, *Knotweed*, *Bindweed*, *Sanguinalis* *Corrig'iola*, (F.) *Renoué*, *Trainasse*, *Centinodæ*. Family, *Polygonææ*. *Sez. Syst.* *Octandria Trigynia*. This grass is said to be a feeble astringent.

**POLYGONUM BISTORTA**, *Bistorta*, *Offic'inal Bistort*, *Great Bistort* or *Snakerweed*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒj.

**POLYGONUM DIVARICATUM**;—the *Eastern Buckwheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

**POLYGONUM FAGOPYRUM**, — *Fagopyrum*, *Buckwheat*, *Triticum Fagi'num*, (F.) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

**POLYGONUM HYDROPIPER**, *Hydropiper*, *Persicaria urens*, *Mercurius terrestris*, *Poor Man's Pepper*, *Biting Arse-smart*, *Lakewood*, *Water-pepper*, (F.) *Poivre d'eau*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

**POLYGONUM HYDROPIPEROIDES**, *P. punctatum*.

**POLYGONUM PERSICARIA**, *Persicaria*, *Persicaria mitis*, *Plumbago*, *Arse-smart*, (F.) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

**POLYGONUM PUNCTATUM**, *P. hydropiperoides*, *Water pepper* of America, *Swartwood*, possesses similar properties to *Polygonum hydropiper*, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhœa.

**POLYGROMA**, *Staphyloma*.

**POLYHIDRIA**, *Polyidria*, *Polyidrosis*, from *πολύς*, 'much,' and *ἵδρω*, 'sweat.' Excessive sweating.

**POLYHYDRIA**, *Hydros*.

**POLYHYPERHÆMIA**, *Plethora*.

**POLYIDRIA**, *Polyhidria*.

**POLYIDROSIS**, *Polyhidria*.

**POLYLIMPHIA**, *Anasarca*.

**POLYMASTHUS**, from *πολύς*, 'many,' and *μαστός*, 'breast.' A monster having several breasts.—Gurli.

**POLYMERIA**, *Polymerismus*—*p. Promiscua translativa*, *Transposition of the viscera*.

**POLYMERISMUS**, *Polyme'ria*, from *πολύς*, 'much,' and *μερῶς*, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

**POLYNEURON**, *Plantago*.

**POLYOPSIA**, *Poly'opsy*, from *πολύς*, 'much,' and *ὄψις*, 'sight.' Vision is so called, when multiple.

**POLYOPY**, *Polyopsia*.

**POLYOREX'IA**, from *πολύς*, 'much,' and *ορέξις*, 'appetite.' Excessive appetite or hunger. A genus in the gastrotes of M. Alibert.

**POLYPER'IA**, from *πολύς*, 'much,' and *περῶς*, 'mutilated.' Congenital misconstruction of various parts or organs.—Good.

**POLYPHAG'IA**, *Multivoran'tia*, from *πολύς*, 'much,' and *φαγῶν*, 'eat.' Voracity. Faculty of digesting many kinds of food. See *Boulimia*.

**POLYPHARMAC'IA**, *Polypharm'acy*; from *πολύς*, 'much,' and *φαρμακον*, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Polyphar'macus*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

**POLYPHYSIA**, *Flatulence*.

**POLYPIFORM CONCRETIONS**, see *Polypus*.

**POLYPIONIA**, see *Polysarcia*—*p. Infantum*, see *Polysarcia*.

**POLYPLASTIC**, *Polyplast'icus*, from *πολύς*, 'much,' and *πλασσω*, 'I form.' That which has many shapes.

**POLYPLASTIC ELEMENT**, in histology, is one which does not retain its primary shape; but undergoes transformation into others.—Gerber.

**POLYPODITES**. Wine impregnated with *polypody*.

**POLYPODIUM CALAGUALA**, *Calagualæ radix*—*p. Filix femina*, *Asplenium filix femina*.

**POLYPODIUM FILIX MAS**, *Aspidium Filix Mas*, *Pteris*, *Athyrium Filix Mas*, *Blechnon*, *Polyrrhizon*, *Blancnon Orida'isii*, *Lonchitis*, *Filic'ula*, *Male Polypody* or *Fern*, *Filix mas*, *Nephrodium crenatum*, *N. Filix mas*, (F.) *Fougère mâle*. *Nat. Ord.* Filices. *Sex. Syst.* Cryptogamia Filices. The rhizoma of this plant has been much extolled as an anthelmintic, and in cases of tœnia. It was the basis of a once celebrated remedy—*Madame Nouffer's*, but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of cambooge or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva.

**POLYPODIUM VULGARE**, *Common Polypody*; *Fern root*, *Rock Brake*, *Brake root*. This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as a cholagogue, and was given in head diseases. It is not used now.

**POLYPODY, MALE**, *Polypodium filix mas*—*p. Common*, *Polypodium vulgare*.

**POLYPOID**, *Polypoi'des*; from *polypus*, and *οἶδος*, 'form.' Having the shape of, or resembling, a *polypus*.

**POLYPORUS OFFICINALIS**, *Boletus laticis*.

**POLYPOSIA**, *πολυποσῖα*, from *πολύς*, 'much,' and *ποσις*, 'drink.' Great thirst—desire for drink. *Polydipsia*.

**POLYPUS**, *Pseudometamorphosis polypo'sa*, from *πολύς*, 'many,' and *πους*, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. *Polypi* may form on every mucous membrane. They are most commonly observed in the nasal fosse, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesic'ular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhus* or *cancerous*. *Fibrous polypi*, *Pol'ypi fibro'si*, *Inopolypi*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhus* or *carcinomatous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterisation* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term POLYPI, *Pseudopolypii*, *Carditis polyposa*, *Polypiform Concretions*, (F.) *Concretions polypuses* ou *polypiformes* ou *sanguines du Cœur*, *Hémocardioplasties*, (Piorry) has likewise been applied to collections of blood—fibrinous concretions—found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POLYBUS BRONCHIA' LIS, *Bronchlemmitis*, *Bronchi's membrana' cea*, *B. plastic*, *Bronchial Croup*, *Chronic Croup?* *Pseudo-membranous Bronchitis*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when expectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYPUS CARNOSUS, Sarcoma—p. Fibrosus, see Polypus—p. Uteri, Metropolypus.

POLYRRHIZON, Polypodium filix mas.

POLYRRHCEA, Profuvium.

POLYSAR' CIA, *Polysarco'sis*, from πολυς, 'much,' and σαρκς, 'flesh.' *Carnositias*, *Polysomatia*, *Adelipar'ia*, *Corpulentia*, *Steatit'as*. Excessive corpulency. Authors have distinguished two varieties of this:—POLYSAR' CIA CARNO'SA, *Corpulency*, and P. ADIPO'SA, *Polyptonia*, *Pimelo'sis nim'ia*, *Pachy'smus*, *Pachyn'sis*, *Obesity*, *Obesitas*, *Hyperpim'ole*, *Lepar'ia*, *Adipo'sis*, *Polysar'cia fagino'sa*, *Empy'melium polysar'cia*, *Barysom'ia*, *Barysomat'ica*, *Lepo'sis*, *Lepar'otes*, *Lepas'ma*, (F.) *Obesité*, *Embonpoint excessif*. A severe regimen and exercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid deposition has been termed *Polyptonia infantum*, and *Chloro'sis gigante'a*.

POLYSAR' CIA VIS' CERUM, Physconia adiposa.

POLYSARCOSIS, Polysarcia.

POLYSIA' LIA; from πολυς, 'much,' and σάλις, 'saliva.' Excessive discharge of saliva.

POLYSOMATIA, Polysarcia.

POLYSPAS'TON, from πολυς, 'much,' and σπασσι, 'I draw.' A powerful instrument for reducing luxations.—Gorræus.

POLYSPER'MIA; from πολυς, 'much,' and σπέρμα, 'sperm.' Richness or fullness of sperm.

POLYSTOMA PINGUICOLA, see Worms—p. Venarum, see Worms.

POLYTRIC, Asplenium trichomanoides.

POLYTR'ICHUM, from πολυς, 'much,' and

ῥιζή, 'hair.' *Polytr'iceon*, *Polytr'ichum vulgare*, *Adiantum aur'cum*, *Golden Maiden-hair*, (F.) *Perce-mousse*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICUM COMMUNE, Asplenium trichomanoides,

POLYTROPH'IA, from πολυς, 'much,' and τροφή, 'I nourish.' Abundant or excessive nutrition.

POLYURESIS, Diabetes.

POLYURIA, Diabetes.

POLYUR'ICUS, from πολυς, 'much,' and ουρον, 'urine.' Sauvages calls—*Ischuria polyurica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, Drink—p. Chinesais, see Citrus aurantium.

POMACEUM, Cider.

POMATUM, *Pommatum*, (F.) *Pommade*, *Léparolé*. A pharmaceutical preparation, employed only externally; which differs but little from an ointment, except in having generally less consistence. It is usually made aromatic, and coloured to render it more agreeable.

Common Pomatum is made of lard, 12℔; suet, 4℔; assesees, ℥viij.

POMATUM AD LABIA D'EMULGEREA, Cerate for the lips—p. Epispasticum flavum, Unguentum lytta medicatum aliud—p. Epispasticum viride, &c., Unguentum lytta medicatum—p. for the Lips, Cerate for the lips—p. Nitricum vel oxygenatum, Unguentum acidi nitrosi—p. Satural, Unguentum plumbi superacetatis.

POMEGRANATE, Punica granatum.

POMILIUS, see Nanus.

POMMADE, Pomatum—p. d'Algon, Unguentum acidi nitrosi—p. Antisporique de Jasser, Unguentum sulphuris compositum—p. d'Autenrieth, Unguentum antimonii tartarizati—p. de Cyrillo, Unguentum muriatis hydrargyri oxygenato medicatus—p. Epispastique jamae, Unguentum lytta medicatum aliud—p. Epispastique verte, Unguentum lytta medicatum—p. de Garou, Unguentum epispasticum de daphne gnidio.

POMMADE DE GONDRET, P. ammoniacale de Gondret (F.), *Gondret's Counterirritant*, *Gondret's ammoniacal Caustic*. Liq. ammon. p. ij; Savi, p. j; Ol. amygdal. p. j; M. Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm. He proposes two formula, one for summer, the other for winter. In the former he directs three parts of lard, one of suet, and four of liquor ammonia; in the latter, equal parts of lard and liquor ammonia.

POMMADE POUR LES LEVRES, Cerate for the lips—p. Ophthalmique (Regent's), Unguentum ophthalmicum—p. Oxygéné. Unguentum acidi nitrosi—p. Scibié, Unguentum antimonii tartarizati.

**POMMES HÉMORRHOÏDALES**, see Viscum album.

**POMMETTE**, see *Malus* os.

**POMMELLE**, *Pyrus malus*.

**POMPHOLYX**, from *πρωπος*, 'a bladder.'

A small vesicle on the skin. An eruption of *bulla* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Ecephlysis Pompholyx* of Good. See *Pemphigus*.

**POMPHOLYX**, *Tutia*, *Zinci oxydum*.

**POMPION**, *Cucurbita pepo*.

**POMUM ADA'MI**, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

**POMUM AMORIS**, Testicle—p. *Hierocelymitanum*, *Momordica balsamina*—p. *Melongena*, see *Solanum melongena*—p. *Mirabile*, *Momordica Balsamina*—p. *Spinosum*, *Datura stramonium*.

**PONCTION**, Puncturing.

**POND SHOVEL**, *Unisema deltofolia*.

**PONDERA ET MENSURÆ**, Weights and measures.

**PONDUS PHARMACEUTICUM**, see Weights and Measures.

**PONGITIF**, Pungent.

**PONS CEREBELLI**, *Pons Varolii*—p. *Hepatis*, see *Lobulus anonymus*—p. *Sylvii*, *Quadrigenina Tubercula*—p. *Tarini*, *Tarini pons*.

**PONS VAROLII**, *Pons Cerebelli*, *Corpus annulære*, *Processus annularis*, *Prominentia annularis cerebri*, *Eminentia annularis*, *Varolii's bridge*, *Nodus encephali vel Cerebri*, *Cerebral protuberance*, *Protuberantia annularis Willisii*, (F.) *Protuberance cérébrale*, *P. annulaire*, *Mésencéphale*, *Mésocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by *Varolius*. It is formed by the union of the *crura cerebri* and *crura cerebelli*.

**PONS ZYGOMATICUS**, *Zygomatic arch*.

**PONTE**, see *Parturition*—p. *Périodique*, see *Parturition*.

**PONTEDORA CORDATA**, *Unisema deltofolia*.

**PONTICUM ABSINTHIUM**, *Artemisia Pontica*.

**POPLAR, AMERICAN**, *Liriodendron*—p. *Black*, *Populus*—p. *Tree*, *Liriodendron*—p. *Tulip-bearing*, *Liriodendron*.

**POPLES**, *Gare'tum*, *Garratum*, *Ignys*, *Ig'nyé*, *Suffrago*, *Fossa genu*, *Fossa poplitæa*, the *Ham*, the *Hough*, (F.) *Jarret*. The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

**POPLITÆUS**, *Popliteus muscle*.

**POPLITÉ**, *Popliteus muscle*.

**POPLITE'AL**, *Poplitæus*, from *Poples*, 'the ham.' That which relates to the ham. A name given to various parts.

**POPLITEAL ARTERY**—*Popliteal portion of the crural*,—(Ch.) is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the posterior

tibial and peroneal arteries. In the ham, it gives off the three superior articular arteries; and, at the top of the leg, the arteries of the gemini muscles or gemini branches, (F.) branches *jumelles*, the two inferior articular arteries, and the tibialis antica.

**POPLITEAL FOSSA**, *Poples*.

**POPLITE'AL GLANDS**, *Glan'dula poplitæa*. Lymphatic glands, four in number, seated in the popliteal region or space.

**POPLITEAL MUSCLE**, *Popliteus Muscle*, *Muscle Jarrotier*, *Fémoro-popliti-tibial*, (Ch.), *Subpoplitæus*, (F.) *Muscle poplité*, is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

**POPLITEAL NERVES**. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The external popliteal, *Peroneal nerve*, *Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*, *nerf prétibio-digital*, (Ch.) and the *anterior tibial*, *nerf prétibio-susphalangéaire*, (Ch.) 2. The internal popliteal nerves, *Branche tibiale*, (Ch.) which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name of *tibial nerves*. It furnishes the external saphena nerve, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

**POPLITEAL REGION**, *Poples*—p. *Space*, *Poples*.

**POPLITEAL VEIN** has the same arrangement as the artery behind which it is situated.

**POPONAX**, see *Pastinaca opopanax*.

**POPPY, CORN, RED**, *Papaver rheas*—p. *Heads*, see *Papaver*—p. *Juice*, *Meconium*—p. *Prickly*, *Argemone Mexicana*—p. *Spotting*, *Cucurbalus Behen*—p. *Thorn*, *Argemone Mexicana*—p. *White*, *Papaver*—p. *White*, capsule, see *Papaver*.

**POPULUS**, *Populus nigra*, *Egë'ros*, *Achero'is*, *Black poplar*, (F.) *Pouplier noir*. The young buds, *oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an official ointment—the *unguentum populæum*. It was, also, recommended in chronic affections of the lungs.

The bark of *POPULUS TREMULOÏDES*, *American aspen*, and of *P. tremula*, *European aspen*, is antiperiodic, and furnishes *salicin* and *populin*, in which the properties probably reside.

**POPULUS BALSAMIFERA**, see *Fagara octandra*.

**PORCELAINÉ**, *Essera*, *Urticaria*.

**PORCELLIO**, *Oniscus*.

**PORCELLUS**, *Oniscus*.

**PORCULUS**, *Oniscus*.

**PORCUPINE DISEASE**, *Ichthyosis*.

**PORCUPINE MEN**, *Echinoder'mi*. Persons have been so called in whom the cuticle is pro-

duced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

**PORCUS**, Vulva.

**PORDE**, Crepitation.

**PORE**, *Porus*, *In'ertstice*, *poros*, 'a passage.'

Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. **EXHALANT PORES** have been supposed to exist in the exhalants, to transmit the fluids exhaled.—**ABSORBENT PORES** are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *ap'ra'cula*.

**PORI BILIA'RII**, *Ductus bilia'rii*, *Sur'culi fell'es*. Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

**PORI CUTA'NEI**, *P. Exhalan'tes* seu *Sudoriferi* seu *Resorben'tes*. The pores of the skin.

**PORI EXHALANTES**, *P. cutanei*—*p. Pulmonum*, *Cellulæ*, *bronchicæ*—*p. Resorbentes*, *P. cutanei*—*p. Sudoriferi*, *P. cutanei*.

**POROCELE**, from *poros*, 'a callus,' and *αλη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

**POROMA**, Induration.

**POROMPHALOCELE**, *Poromphalon*.

**POROMPHALON**, *Poromph'alus*, *Poromphaloes'le*, from *poros*, 'hard,' and *ομφαλον*, 'the navel.' Umbilical hernia with hard and thickened parietes.

**POROS**, Canal.

**POROSIS**, Chalaza, Induration.

**POROT'IC**, *Porot'icus*, from *poros*, 'callus.'

A remedy believed to be capable of assisting the formation of callus.

**PORPHURURIA**, Urine, purpuric.

**PORPHYRA**, Purpura—*p. Græcorum*, *Petchiæ*—*p. Hæmorrhagica*, *Purpura hæmorrhagica*.

**PORPHYRISMA**, Scarlatina.

**PORPHYRISMUS**, Scarlatina.

**PORPHYRIZATION**, Levigation.

**PORPHYRO-TYPHUS**, see Typhus.

**PORPHYRY**, *Porphyri'tas*, from *porph'ura*, 'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

**PORPHYRY**, BLACK, Ophites.

**PORRACÉ**, *Porraceous*.

**PORRA'CEOUS**, *Porra'ceus*, *Prasi'nus*, from *porrum*, 'a leek.' (F.) *Porra'cæ*. Having the green colour of the leek. An epithet given to certain excreted matters,—the sputa, bile and feces particularly.

**PORREAU**, *Allium porrum*.

**PORRECTUM**, Lever.

**PORRET**, *Allium porrum*.

**PORRIGINE**, *Porri'go favosa*.

**PORRIGINEUX**, *Porri'ginous*.

**PORRIGINOSUS**, *Porri'ginous*.

**PORRIGINOUS**, *Porri'ginos'us*, (F.) *Porri'ginous*. Appertaining to porrigo.

**PORRIGO** (L.), 'scurf or scall in the head.'

*Tinea favosa*, *Furfur'a'tio*, *Furfures*, *Ecpye'sis porrigo*, *Phlysis porrigo*, from *porrigere*, 'to spread.' (F.) *Teigne*, *Rachs*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules,

called favi and achores, unaccompanied by fever.

**PORRIGO DECAL'VANS**, *Tricho'sis a'rea*, *Area*, *Alope'cia areata*, *A. partialis*, *A. circumsc'ript'a*, *Phytoalop'ecia*, *Tyr'ia*, *Tyro'ma*, *Ophi'asis*, *Tin'ea tonsans*, *Herpes tonsu'rans*, *Limited or partial Baldness*; consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth recently found at the roots of the hair in *Tinea tonsans*, Malmsten of Stockholm has given the name *Trichophyton tonsu'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

**PORRIGO FAVOSA**, *Ce'ri'on*, *Fovus*, *Ecpye'sis porrigo favosa*, *Tinea favosa*, *Scab'ies cap'itis favosa*, *Melice'ra*, *Melice'rum*, *Melice'ria*, *Melilifivium*, *Porri'gophyto*, *Honey-comb Scall* or *Tetter*, (F.) *Teigne favouse*, *Porri'gine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature and formed of a parasitic plant, belonging to the genus *mycodermis*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigo.

**PORRIGO FURFURANS**, *Ecpye'sis furfura'cea*, *Tinea furfuracea*, *Tinea porri'ginosa*, *Pityri'asis Tricho'sis furfura'cea*, *Teigne furfuracæ* (Alibert), commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable, thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*—one made with the *Cocculus indicus*;—the *Sulphur ointment*;—*Citrus ointment* and *Ung. hydrargyri nitrico-oxydi*; *Tar ointment* and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

**PORRIGO LARVALIS**, *P. lupinosa*.

**PORRIGO LARVALIS**, *Crusta lactea*, *Ecpye'sis Porrigo crustacea*, *Ment'i'go*, *Achor*, *Tin'ea lactea*, *T. Fa'ciæ*, *Milky scall* or *Tetter*, *Lactu'men*, *Lacti'go*, (F.) *Croûte de lait*, *Croûte lacteuse*, *Peau volages*, *La Graine*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish achores on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs.

The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as of the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

PORRIGO LUPINO'SA, *Tin'ea lupi'na*, *Scabies capitis*, *Ecpys'sis porrigo lupino'sa*, *Porri'go larva'lis*, *Impetig'o figura'ta*, *Tin'ea granula'ta*, *T. muc'o'sa*, *Crusta lactea* (of some), *Men'agra infantum*, (F.) *Teigne*, *Dartre crustace flavescens*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminating in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish, and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SOUTULA'TA, *Tin'ea granula'ta*, *Ecpys'sis porrigo galea'ta*, *Tinea fco'sa*, *Acho'rea seu Scabies capitis*, *Ringworm of the Scalp*, *Scalped head*; (F.) *Teigne annulaire*, *T. en anneau*, *T. nummulaire*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children 3 or 4 years of age, and is very unmanageable. The rules laid down under *Porrigo furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem*, of Banyer, sometimes cures, when others fail.

PORRIGOPHYTE, *Porrigo favosa*.

PORRUM, Allium porrum, Thymion.

PORRUS, Sarcoma, Thymion.

PORTA, πύλη, *Pylé*, 'a gate.' The part of the liver where its vessels enter as by a gate. Also, the Vulva.

PORTA JECORIS, Porta vena.

PORTA VENA, *Vena portae*, *V. porta'rum*, *Ranalis vena*, *Jan'itricis*, *Vena magna seu qua ad portas est seu stalachia'a seu lactea seu ostia'ria*, *Porta Jec'oris*, *Porta*, *Vena arterio'sa seu arterialis*, *Manus Jec'oris seu hepatis*, *Vena ad portas*. The System of the vena porta or the Abdominal venous system, (F.) *Veins porte*, *Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdominalis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and in the female, the uterus. The *Abdominal vena porta* has two principal roots, the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the diges-

tive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite to the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ,—the capsule of Glisson. The different branches of the vena porta are devoid of valves. See Liver.

PORTAL, from *porta*, 'a gate.' Relating to the porta of the liver,—as the *portal system*, or system of the vena porta. By extension the term has been applied to an analogous system of vessels in the kidney. See Kidney.

PORTAL FISSURE, see Liver.

PORTE-AIGUILLE, *Acutenao'ulum*; *Needle-carrier*, *Needle-bearer*; from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE, (F.) A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-CAUSTIQUE, *Porte-pierre* — *p. Feuille*, *Subcaustularis*.

PORTE-MECHE (F.), from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA (F.). A small instrument for keeping the moxa applied to the part to be cauterized. It consists of a metallic ring—separated from the skin by three small supports of ebony—to which a handle is adapted.

PORTE-NEUD (F.), from *porter*, 'to carry,' and *naud*, 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

PORTE-PIERRE (F.), *Porto-caustique*, *Caustic bearer*. An instrument similar to a *porte-crayon* for carrying the lunar caustic.

PORTE-SONDE (F.). An instrument resembling a *porte-crayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lachrymalis.

**PORTE-VEINE**, Porta Vena.

**PORTER**, Cerevisia.

**PORTIO DURA**, Facial nerve.

**PORTIO MEDIA INTER PORTIO'NEM DURAM ET PORTIO'NEM MOLLEM**. A small nerve, which arises from the brain, between the origin of the portio dura and the trunk of the portio mollis.—Wrisberg.

**PORTIO MOLLIS**, Auditory nerve.

**PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL**, Longissimus dorsi—*p. Scailleux ou squameux du temporal*, Squamous portion of the temporal—*p. Lombaire du plexus oral*, Lumbar plexus.

**PORTION GODRONNÉE DE LA CORNE D'AMMON**. A name given by Vicq d'Azyr to a small denticulated cord of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

**PORTONARIUM**, Pylorus, Duodenum.

**PORTULA'CA**, *Andraeh'ne*, *Al'hium Gallicum*, *Portula'ca olora'ca*, *Pursiana*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

**PORUS**, Callus, Meatus—*p. Acusticus*, Auditory canal, internal.

**POSCA**, Oxycrate.

**POSE**, Coryza.

**POSIMOS**, Potable.

**POSITION, FALSE**, False position.

**POSOL'OGY**, *Posolog'ia*, *Dosilog'ia*; from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited.

**POSSET**, *Possé'tum*; from (L.) *Poseca*, 'sour wine and water.' Milk curdled with wine or any acid or treacle. A preparation of beer and milk; *Zythog'ala*.

**POSSETING**, Regurgitation, (of Infants.)

**POSTBRACHIALE**, Metacarpus.

**POSTCARPIUM**, Metacarpus.

**POSTERIOR ANNULA'RIS**. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring, and little finger, and is inserted into the inside of the tendon on the back of the ring finger. Its *use* is to draw the ring finger inwards.

**POSTERIOR AURIS**, Retrahens auris.

**POSTERIOR IN'DIGIS MANÛS**. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore finger, and is inserted into the inside of the tendon on the back of the fore finger. Its *use* is to draw the fore finger inwards.

**POSTERIOR INDICIS PEDIS**, *Abductor Indicis Pedis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore toe. Its *use* is to pull the fore toe outwards.

**POSTERIOR ME'DII DIG'ITI MANÛS**. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its *use* is to draw the middle finger inwards.

**POSTERIOR MEDII DIG'ITI PEDIS**, *Abductor medii digiti pedis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its *use* is to pull the toe outwards.

**POSTERIOR TER'TII DIG'ITI**, *Abductor tertii digiti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the 3d and 4th of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its *use* is to pull the toe outwards.

**POSTHE**, Penis, Prepuce.

**POSTHETOMIST**, *Posthet'omus*, from *ποσθη*, 'prepuce,' and *τομη*, 'incision.' One who performs the operation of circumcision.

**POSTHETOMY**, Circumcision.

**POSTHIA**, Hordeolum.

**POSTHIOPLASTIC**, *Posthioplasticus*, from *ποσθη*, 'the prepuce,' and *πλαστικός*, 'I form.' An epithet applied to the operation for restoring the prepuce.

**POSTHITIS**, from *ποσθη*, 'the prepuce, the penis,' and *itis*, the termination for inflammation. Inflammation of the prepuce or penis.

**POSTHIUM**, Prepuce.

**POSTHON'CUS**, from *ποσθη*, 'the prepuce or penis,' and *ωνκος*, 'a tumour.' Swelling of the prepuce or penis.

**POSTHOPLASTICA**, from *ποσθη*, 'prepuce,' and *πλαστικός*, 'formative.' The art of making a new prepuce.

**POSTPOSIT'IO**. Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense we speak of an *anticipating*, and a *postponing* (*Febri's hysteret'ica*) intermittent.

**POSTREMA**, Uterus.

**POTABLE**, *Potab'ilis*, from *potare*, 'to drink.' *Pot'imos*, *Potos*, *Post'imos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

**POTASH**. So called from the pots or vessels in which it was made;—*Potas'sa*, *Kali*, *Vegetable alkali*, *Gastrinum*.

**POTASH OF COMMERCE**, *Potassa impu'ra*, *Impure potass*, *Alu'men cati'num*, *Cin'eres Rus'sici*, *Subcar'bonas potas'sæ impu'ras*, *Potas'sæ car'bonas impurus*.—the *Pearlash* of commerce, is prepared from the ashes of land plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potass, sulphate of potass, chloride of potassium, silex, oxide of iron, &c.

From the ashes of lees of wine, and from wine twigs a much purer alkali is obtained. It is called *Cinis infecto'rius*, *C. facum*, *Cin'eres clavella'ti*, *Alu'men facum*, *Cin'eres gravellati*, (F.) *Cendres gravéllés*, *Cendres de sarment*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering and evaporating. It is called *Sals of tartar*, *Sal Tar'tari*, *Kali præparatum tartaro*, *Kali tartaro*, *Subcar'bonas potas'sæ puris'simum*, *Potas'sæ Subcar'bonas tartaro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered and

evaporated to dryness, it affords another variety of vegetable alkali, the *Sal abssinthii* or *Salt of wormwood*.

Impure potass is used for preparing the subcarbonate for medical use.

**POTASS, ACETATE OF, Potassæ acetatæ**—p. Bisulphate of, Potassæ supersulphas—p. Bitartrate of, Potassæ supertartaras—p. Carbonate of, Potassæ carbonas—p. Chlorate of, Potassæ murias hyperoxygenatus—p. Euechlorate of, Potassæ murias hyperoxygenatus—p. Fused, Potassæ fusa—p. Hydriodate of, Potassæ hydriodas—p. and Iron, tartrate of, Ferrum tartarizatum—p. with Lime, Potassæ cum calce—p. Mephite of, Potassæ subcarbonas—p. Muriate of, Potassæ murias—p. Nitrate of, Potassæ nitras—p. Oxymuriate of, Potassæ murias hyperoxygenatus—p. Subcarbonate of, Potassæ subcarbonas—p. Sulphate of, Potassæ sulphas—p. Sulphate of, acid, Potassæ supersulphas—p. Sulphuret of, Potassæ sulphuretum—p. Supercarbonate of, Potassæ carbonas—p. Supersulphate of, Potassæ supersulphas—p. Supertartrate of, Potassæ supertartaras—p. Tartrate of, Potassæ tartaras.

**POTASS AND SODA, TARTRATE OF, Soda, tartrate of.**

**POTASSA, Potash, P. fusa.**

*POTASSA CUM CALCÆ, Potass with lime, Calcæ cum kali puro, Caus'ticum commune fortius, Lapis infernalis sive septicus, Kali caus'ticum cum calce, Potassæ opæ calcis parata et igne fusa, Lapis caus'ticus, (F.) Potassæ præparata avec la chaux, P. de la chaux, Pierre à cautère. (Liquor. potassæ Biiij, calcis recent. ℞j. Boil the solution of potass to ℞j; then add the lime, slaked with water, and mix. Ph. L.)* Used for the same purposes as the next, but more manageable; being less deliquescent.

**POTASSA, FERROCYANATE OF, Potassii ferrocyanuretum**—p. Ferropussiate of, Potassæ cyanuretum.
